Introduction

by Nathan Brackett

Welcome to *The New Rolling Stone Album Guide,* your handbook to every record that matters. This fourth edition covers more than 10,000 albums from the most important artists of rock, punk, hip-hop, techno, soul, dance, blues, jazz, country, gospel, disco, reggae, and Top 40 pop, and is the product of three years of work by more than 70 writers and editors.

It's been a long 12 years since our last *Album Guide,* which was edited by Anthony DeCurtis, Holly George-Warren, and James Henke. More than 350,000 albums have been released. The record business has gone from big profits to experiencing the worst recession since the early '80s. And, more important for a book about albums, there are innumerable more ways for people to learn about music: not just from magazines anymore, but from fan websites; listening kiosks at record stores; music websites such as AllMusic.com and RollingStone.com; online music services such as iTunes Music Store; and, notoriously, file-sharing software such as LimeWire and Kazaa.

So how do you make an album guide that fits into a book bag? Selectively. For the most part, we've tried to limit the artists in this book to the people we think we'll still be listening to when the fifth or sixth edition of the *Guide* comes out, or to the artists who—even if they're not well known anymore—have made a lasting, undeniable contribution to pop music. Everyone in this book has moved the cultural needle in one direction or the other; you won't find many one-hit wonders, unless they were just too fascinating to ignore.

This is not a book for pop music historians, nor is it an encyclopedia (for that, see *The Rolling Stone Encyclopedia of Rock & Roll,* also published by Fireside/Simon & Schuster). This is a book to be used and enjoyed. Because this is a consumer guide, we've limited ourselves to covering domestically released albums that are currently in print. Our main criterion was that albums needed to be easily available from major online stores such as Amazon.com and Barnesandnoble.com. (One caveat: In special cases, we've included out-of-print or import albums if they are essential to understanding an artist.) In the case of nonrock artists with enormous discographies, such as Miles Davis and Pete Seeger, we've included a selective list to serve as a starting point for the interested beginner.

This book stands upon the foundation of the 1992 *Album Guide,* which was written entirely by just four writers: J.D. Considine, David McGee, Paul Evans, and Mark Coleman. Three of those writers—Considine, Evans, and McGee—have returned to update many of their old entries. Some entries have been cut (so long, Lobo; farewell to the Vogues); hundreds have been added, to the point that approximately 70 percent of this *Album Guide* is entirely new.

In the introduction to the first RS *Record Guide,* published in 1979, editor Dave Marsh noted that "writing about performers as diverse as Roscoe Holcomb, Elvis Presley and the Sex Pistols ought to be confusing," but went on to marvel that "as we progressed, the whole of popular music began to seem a seamless web."

As we started this project, that notion seemed quaint—pop is often described as a fragmented place today, where strange cliques form and multiply. As we got further into it, though, Marsh's original idea didn't seem so odd. Part of the joy of a book like this is the strange juxtapositions: Papa Roach appears on the same page as Charlie Parker; techno pioneer Juan Atkins follows Chet Atkins. But you also get the sense that in 25 years, these distinctions will seem less funny, just as the idea (as any Uncle Tupelo fan can attest) of the Sex Pistols and Roscoe Holcomb in one place doesn't seem so radical today.

Above all—despite the intimidating pages of gray text and official-looking listings—this book is meant to be fun, and to make you want to hear this music. Good hunting!

Ratings

★★★★★

Classic: Essential listening if you're even mildly curious about the artist or genre under discussion. Not only are these albums worthy of your disposable income, they stand a good chance of enriching your life.

★★★★

Excellent: Four-star albums generally represent outstanding performances by immortal artists or peak performances by mere mortals. If you're a fan of the artist or type of music in question, it's hard to go wrong with any of these albums.

★★★

Average to Good: Albums in the three-star range will primarily be of interest to fans of the artist being discussed. Like a B+ movie, these albums are often pleasurable but not necessarily memorable.

★★

Fair to Poor: Albums in the two-star category either fall below the artist's established standard or are failures in and of themselves.

★

Disastrous: Albums in the range of one star or less are wastes of vital resources. Only masochists and completists need apply.

Contributors

EDITORS

Nathan Brackett (N.B.) is a senior editor at ROLLING STONE, where he has edited the record reviews section since 1997.

Christian Hoard (C.H.) is a regular contributor to ROLLING STONE and *The Village Voice.*

WRITERS

Richard Abowitz (R.A.) is contributing editor to *Las Vegas Weekly, Las Vegas Life, Showbiz Weekly,* and *Vegas Magazine.*

Steve Appleford (S.A.) is a regular contributor to ROLLING STONE and the *Los Angeles Times.*

Arion Berger (A.B.) is entertainment editor of *Express* and a freelance writer. She lives in northern Virginia.

Pat Blashill (P.B.) has written for ROLLING STONE, *Details,* and *Wired,* and is the author of *Notes from the Underground: A Secret History of Alternative Rock* (Fireside, 1996).

Jon Caramanica (J.C.) is a regular contributor to ROLLING STONE and has written for *The New York Times, Spin, Vibe, The Village Voice, XXL,* and *Vice.*

Nick Catucci (N.C.) writes about music and books for *The Village Voice.*

Neva Chonin (N.CH.) is a pop-music critic for the *San Francisco Chronicle.*

Mark Coleman (M.C.), a contributor to the previous edition of *The ROLLING STONE Album Guide,* is the author of *Playback: From the Victrola to MP3: 100 Years of Music, Machines and Money* (Da Capo, 2004).

J.D. Considine (J.D.C.), a contributor to the previous edition of *The ROLLING STONE Album Guide,* has written for ROLLING STONE, *Entertainment Weekly, Blender, Guitar World, Bass Guitar, Revolver, The New York Times,* and the *Globe & Mail.*

Bill Crandall (B.C.) is the music editor of RollingStone.com.

Charles R. Cross (C.R.C.) is the author of four books, including 2001's *Heavier Than Heaven: The Biography of Kurt Cobain* and *Roomful of Mirrors,* a biography of Jimi Hendrix.

Andrew Dansby (A.D.) is the entertainment editor at the *Houston Chronicle.* A former news editor for RollingStone.com, he contributes to ROLLING STONE, *XXL, Blender, Harp,* and *Texas Music.*

Matt Diehl (M.D.) is a contributing music editor at *Interview* and managing editor of Flavorpill.net in Los Angeles. He has two books—one on contemporary punk rock, another on no-fall snowboarding—due in 2005.

Ben Edmonds (B.E.) is the U.S. editor of *Mojo* and the author of *What's Going On?: Marvin Gaye and the Last Days of the Motown Sound* (Canongate, 2001).

Jenny Eliscu (J.E.) is an associate editor at ROLLING STONE, where she has worked since 1999.

Paul Evans (P.E.), a contributor to the previous edition of *The ROLLING STONE Album Guide,* has written for *Book Magazine, The Washington Post,* and the *Los Angeles Times.* He teaches English and history in Charlottesville, VA.

Kris Ex (K.X.) has written for Rolling Stone, *XXL, Vibe,* and *The Source.* He is a former music editor of *The Source,* and is writing a book with 50 Cent, to be published by MTV Books.

Gaylord Fields (G.F.) is an assistant editor at Rolling Stone, and his work has also appeared in *Spin* and *Time Out New York.* He is also a DJ on the free-form radio station WFMU, in Jersey City, NJ.

Jason Fine (J.F.) is an assistant managing editor at Rolling Stone.

Sasha Frere-Jones (S.F.J.) is pop music critic for *The New Yorker.*

David Fricke (D.F.) is a senior editor at Rolling Stone.

Andy Gensler (A.G.) is a music writer and cofounder of the Mishpucha music collective and Legalize Dancing NYC.

Joe Gross (J.G.) is the pop-music critic for the *Austin American-Statesman.* He has contributed to Rolling Stone, *Spin, The Village Voice,* and others.

Ernest Hardy (E.H.) has contributed to Rolling Stone, *Vibe,* the *Los Angeles Times,* and many other publications.

Keith Harris (K.H.) is the editor in chief of Red Flag Media Publications in Philadelphia. He has written for Rolling Stone, *Slate, The Village Voice,* and others.

Geoff Himes (G.H.) has written for Rolling Stone, *The Washington Post, New Country,* and many other publications.

Steve Hochman (S.H.) covers pop music for the *Los Angeles Times* and is the music critic for the radio news magazine *The California Report,* produced by KQED-FM in San Francisco.

Tom Hull (T.H.) writes about philosophy and music on his websites TerminalZone.net, NotesOnEverydayLife.com, and TomHull.com, as well as for *The Village Voice* and *Seattle Weekly.*

James Hunter (J.H.) writes about music and books for Rolling Stone, *The Village Voice, The New York Observer,* and *L.A. Weekly.*

Mark Kemp (M.K.) is the entertainment editor for *The Charlotte Observer.* A former music editor of Rolling Stone, he is the author of *Dixie Lullaby: A Story of Music, Race, and New Beginnings in a New South.*

Rob Kemp (R.K.) has written for Rolling Stone, *Time Out New York,* and *The New York Observer.* He also plays bass in a punk-rock karaoke band in New York, NY.

Greg Kot (G.K.) is pop-music critic for the *Chicago Tribune* and author of *Wilco: Learning How to Die* (Broadway, 2004).

Ernesto Lechner (E.L.) is a frequent contributor to Rolling Stone, the *Los Angeles Times,* and other publications. His book on the history of Latin rock will be published in 2005 by the Chicago Review Press.

Joe Levy (J.L.) is a deputy managing editor at Rolling Stone, where he has worked since 1997.

David Malley (D.MA.) is an assistant editor at Rolling Stone.

Michaelangelo Matos (M.M.) is the music editor of *Seattle Weekly* and the author of *Sign O' the Times* (Continuum, 2004). He is also a frequent contributor to Rolling Stone, *Spin,* and *The Village Voice.*

Kembrew McLeod (K.M.) is a professor of communication studies at the University of Iowa, and is the author of *Freedom of Expression: Overzealous Copyright Bozos and Other Enemies of Creativity* (Doubleday, 2005).

David McGee (D.M.) is the author of *Go, Cat, Go!: The Life and Times of Carl Perkins, the King of Rockabilly.* He has contributed to all four editions of *The Rolling Stone Album Guide,* and has written for Rolling Stone, *BMI Music World,* and *Pro Sound News.*

Milo Miles (M.MI.) is a commentator for NPR's *Fresh Air* and a longtime contributor to Rolling Stone, *The New York Times, The Village Voice,* and the *Boston Phoenix.*

Tom Moon (T.M.) writes about music for *The Philadelphia Inquirer,* ROLLING STONE, and *GQ,* and is an on-air contributor to NPR's *All Things Considered.*

Tom Nawrocki (T.N.) is an assistant managing editor at ROLLING STONE.

Chris Nelson (C.N.) is a frequent contributor to *The New York Times, Mojo,* and ROLLING STONE.

Elena Oumano (E.O.) is a fulltime communications professor at the City University of New York, and has written about music for *The New York Times,* the *Los Angeles Times, Spin,* and *The Village Voice.*

Jon Pareles (J.P.) is chief pop-music critic for *The New York Times.*

Nina Pearlman (N.P.) is managing editor at *Revolver* magazine.

Parke Puterbaugh (P.P.) is a longtime contributor to ROLLING STONE, where he was also a senior editor. He has also written for *USA Today, Stereo Review,* and many other publications.

Mac Randall (M.R.) has written for *The New York Times,* the *Daily News, Observer,* ROLLING STONE, *Musician, Vanity Fair,* and *Mojo.* He is the author of *Exit Music: The Radiohead Story* (Delta, 2000).

Peter Relic (P.R.) has written for ROLLING STONE, *Mojo, Vibe,* and *Grand Royal* magazine.

Ann Powers (A.P.) is a senior curator at the Experience Music Project in Seattle, WA, and the author of *Weird Like Us: My Bohemian America.*

Tricia Romano (T.R.) is a dance music and nightlife columnist for *The Village Voice* and has written for *Spin,* ROLLING STONE, *Seattle Weekly,* and *Salon.*

Chris Ryan (C.R.) is a frequent contributor to *Spin* and *The Village Voice.*

Kelefa Sanneh (K.S.) is a pop-music critic for *The New York Times.*

Roni Sarig (R.M.S.) has contributed to ROLLING STONE, *Vibe, Spin, XXL, Salon,* and *Maxim,* and is the author of *The Secret History of Rock: The Most Influential Bands You've Never Heard.*

Bud Scoppa (B.SC.) is a former managing editor of *Hits* magazine, and has written for ROLLING STONE and many other publications.

Scott Seward (S.S.) writes for *The Village Voice.*

Rob Sheffield (R.S.) is a contributing editor to ROLLING STONE.

Dev Sherlock (D.S.) is a former editor at *Musician,* who has written for ROLLING STONE, *Musician, Time Out New York, N.M.E.,* and *Billboard.*

Laura Sinagra (L.S.) writes about music and film for ROLLING STONE, *The Village Voice,* and *Spin.*

Ben Sisario (B.S.) writes about music and books for *The New York Times,* ROLLING STONE, *Blender,* and other publications.

Richard Skanse (R.SK.) is the editor of *Texas Music* magazine. He contributed to *The ROLLING STONE Encyclopedia of Rock & Roll* and has written for ROLLING STONE, *Tracks, Blender,* and the *Austin American-Statesman.*

Franklin Soults (F.S.) is former music editor of the *Cleveland Free Times* and has written for ROLLING STONE, the *Boston Phoenix,* and the *Chicago Reader.*

Carla Spartos (C.S.) is a former senior editor at *The Village Voice* and a freelance music and nightlife writer.

Allison Stewart (A.S.) is a contributing editor to *No Depression* and has written for *The Washington Post, Chicago Tribune,* ROLLING STONE, and *The Village Voice.*

David Swanson (D.S.) is an assistant editor at ROLLING STONE.

Greg Tate (G.T.) is a staff writer at the *The Village Voice,* the author and editor of many books on music and culture, and guitarist with the jazz band Burnt Sugar.

Barry Walters (B.W.) is a senior music critic at ROLLING STONE.

Douglas Wolk (D.W.) writes about music for *The Village Voice,* ROLLING STONE, *The Nation,* and *Slate,* and runs the record label Dark Beloved Cloud.

David Wykoff (D.WY.) is an entertainment attorney in Nashville, TN, and former contributor to ROLLING STONE.

Charles M. Young (C.M.Y.) writes for ROLLING STONE, *Men's Journal,* and many other publications. He is also a former editor of ROLLING STONE and *Musician* magazines.

Warren Zanes (W.Z.) is vice president of education at the Rock and Roll Hall of Fame Museum in Cleveland. His album *Memory Girls* was released in 2003 on Dualtone Records.

Aa

Aaliyah

★★½	Age Ain't Nothing but a Number (Jive, 1994)
★★★½	One in a Million (Jive, 1996)
★★★★	Aaliyah (Virgin, 2001)
★★★★	I Care 4 U (Blackground, 2002)

Appropriately for a nice Midwestern girl, the late Aaliyah Haughton occupied the sensible middle ground of R&B divas. When it came to sexual availability, she was between En Vogue maliciously taunting "You're never gonna get it" and Tweet blankly cooing "Oops, there goes my shirt." You *might* get it, Aaliyah's wary delivery suggested, if the time and place were right, but her clothes weren't about to magically vanish. Her best singles, "Are You That Somebody" and "Try Again," outline the rules a smart but passionate nonvirgin must set to protect herself in an age of sexual free-for-all.

Though her debut was overshadowed by the revelation that her producer, R. Kelly, had married the 15-year-old Chicago-raised starlet, Aaliyah's artistic personality occasionally pokes its nose above Kelly's bland settings. But it wasn't until Timbaland's stuttering beats *challenged* Aaliyah rather than cushioned her (as Kelly had) that her full personality revealed itself. If more critics had attuned their ears to the smooth, just-ever-so offbeat *One in a Million,* Missy Elliott's *Supa Dupa Fly* might have not seemed like such a shock.

The best was yet to come. The *Doctor Dolittle* soundtrack's "Are You That Somebody?," which placed Aaliyah up against the most idiosyncratic twitch of Timbaland's career, remains one of '90s' R&B's most astounding moments. And Aaliyah's third release was self-titled for a reason. On the ballads, she floats assuredly without drifting off into slow-jam tedium, while her commonsense avoidance of melodrama contrasts nicely with Timbaland's Latin tinges.

By her death at the age of 22 in a private-plane crash, Aaliyah had grown from studio puppet to a powerful R&B archetype—a more self-aware Ronnie Spector for a time that requires more self-awareness of its young adults. Sure, Timbaland sculpted her sound throughout, but Aaliyah imprinted herself upon those beats—as a catalyst, she's equaled only by Missy Elliott herself.

The six new tracks on *I Care 4 U*—a partial best-of for an artist who deserves a full career overview—add to the impression that Aaliyah's career was just beginning to blossom creatively. And that legacy lives on: According to the U.S. Social Security Administration annual report, Aaliyah was one of the 100 most popular names for newborn girls in 2001. —K.H.

ABBA

★★★	Ring Ring (1973; Universal, 2001)
★★★	Waterloo (1974; Universal, 2001)
★★★★	ABBA (1975; Universal, 2001)
★★★★	Arrival (1977; Universal, 2001)
★★★★	The Album (1978; Universal, 2001)
★★★	Voulez-Vous (1979; Universal, 2001)
★★★★	Super Trouper (1980; Universal, 2001)
★★★★	The Visitors (1981; Universal, 2001)
★★★	ABBA Live (PolyGram, 1986)
★★★★½	The Millennium Collection (Universal, 2000)
★★★★	The Definitive Collection (Universal, 2001)

Perhaps the first band to force rock elitists to take fluff pop seriously, ABBA made deliriously optimistic, naive, danceable, slightly off-kilter Europop that has enjoyed three heydays: its original one, during the '70s; one during the '80s and '90s, sparked by open-minded fans of the craft; and one that began in 1999, with the success of *Mamma Mia!,* a musical based loosely on ABBA songs. At this point, fans can find virtually every blip and chord the Swedish quartet ever recorded, thanks to Universal's frantic mass release, in 2001, of the band's early albums, remastered and tricked up with bonus tracks. Although the original version of *Waterloo,* the band's second record, is still on the stands, as is 1977's *Arrival,* Universal's rereleases are the ones to seek out.

There's some stylistic variation among ABBA's releases—some are disco, some are Euro-by-way-of-cabaret, some are "serious"—but, thanks to the never-less-than-sterling songwriting gifts of Benny Andersson and Björn Ulvaeus and the clean, pert female vocals of Anni-Frid Lyngstad and Agnetha Faltskog, there's very little variation in the recordings' quality. Some of the rereleases fool around with chronology, but their featured bonuses are plums: *Arrival* sticks in "Fernando" as well as the cheery travelogue "Happy Hawaii"; *ABBA* contains a medley of folk songs recorded for a charity album as well as the B side "Crazy World"; *Waterloo* introduces a Swedish version of the title song and includes a remix of "Ring Ring," which can of course be found, unremixed, on *Ring Ring* the album—early, less bouncy ABBA with the men singing lead. *The Album* offers an early version of "Thank You for the Music"; *Super Trouper* includes an outtake ("Put On Your White Sombrero") and a previously 7-inch-only B side "Elaine." *Voulez-Vous* features no fewer than three bonus tracks: "Summer Night City," "Gimme! Gimme! Gimme! (A Man After Midnight)," and the B side "Lovelight." If none of the above sounds interesting to you, but you still want to own "Dancing Queen" and "Waterloo," buy the airtight *Millennium Collection.* —A.B.

ABC

★★★★	The Lexicon of Love (Mercury, 1982)
★★★	Beauty Stab (Mercury, 1983)
★★	How to Be a Zillionaire! (Mercury, 1985)
★★	Alphabet City (Mercury, 1987)
★★	Up (Mercury, 1989)
★★★★	Absolutely: The Best of ABC (Mercury, 1990)
★★	Abracadabra (Mercury, 1991)
★★	Skyscraping (Deconstruction, 1997)
★★★★	The Millennium Collection (Mercury, 2000)

ABC's classic debut, *The Lexicon of Love,* holds up as one of the catchiest, funniest, and smartest records to emerge from the '80s' British haircut-pop brigade. Martin Fry had a silver tongue to go with his platinum wedge of hair, and the group dressed up in opera capes and black tie to play suave Roxy Music–style synth funk. Fry unzipped his cocktail croon for witty songs about sex, money, and pop fantasy, playing the cosmopolitan cad with a heart full of secrets he'll keep until he finds a place to sell them. "The Look of Love" and "Poison Arrow" were huge hits, but "Date Stamp," "Valentine's Day," and "Many Happy Returns" are every bit as tasty, as Fry shops for romance in a material world: "I get sales talk from sales assistants/When all I want to do, girl, is lower your resistance/Everything is temporary, written on that sand/Looking for the girl who meets supply with demand." Bravo. The group also made a hysterically funny feature film to go with the album, the little-seen, Julien Temple–directed *Mantrap.*

For *Beauty Stab,* they made two surprising decisions: they decided to get all serious and they decided to use loud guitars, because, as people tended to believe in 1983, guitars meant sincerity. *Beauty Stab* produced one great single, "That Was Then, but This Is Now"—rarely have the political implications of fruit-based pastry been explored more succinctly than in the line "Can't complain, mustn't grumble/Help yourself to another piece of apple crumble." But after *Beauty Stab* flopped, ABC returned to synth pop for the fabulously poignant 1985 hit "Be Near Me," on *How to Be a Zillionaire! Alphabet City* had the hit "When Smokey Sings," but the barbed irony was gone, and by now ABC could have been Wang Chung or Glass Tiger or Johnny Hates Jazz or any number of bland Brit smoothies. The group dissipated into occasional comeback attempts. *The Lexicon of Love* is a better album than any of ABC's greatest hits collections *(Absolutely, Millennium Collection),* but you really do need a copy of "Be Near Me" somewhere in your life. —R.S.

Paula Abdul

★★★	Forever Your Girl (Virgin, 1988)
★	Shut Up & Dance (Virgin, 1989)
★	Spellbound (Captive/Virgin, 1991)
★	Head Over Heels (Captive/Virgin, 1995)
★★★	The Greatest Hits (Virgin, 2000)

The "Forever Your Girl" kid was a disco star in the Hot Radio heyday of Milli Vanilli, Young MC, and Soul II Soul, with a pliant grin and a short skirt that helped America forgive her for having a voice like a pair of windshield wipers. A former choreographer, cheerleader, and Laker Girl, Paula squealed four straight #1 hits: "Straight Up" (she's caught in a hit and run), "Forever Your Girl" (but she loves you anyway), "Opposites Attract" (a rap duet with a cartoon cat), and "Cold Hearted" (snake-hating propaganda with a Bob Fosse–knockoff video and lyrics worthy of vintage Goffin-King). *Forever Your Girl* went platinum seven times over, probably because as a pop bunny in a hip-hop world, Paula was so darn eager to please everybody—she was white on the front cover of her album and black on the back cover. She was very pretty, and if you ever had fantasies of having sex with a chipmunk, you probably bought three copies. She also did a remix album, *Shut Up And Dance,* no doubt because someone asked her very nicely.

Spellbound was Paula's bid to prove that she was (1) a real singer, with (2) something to say, and failed beyond miserably at both efforts. The ballad "Rush Rush" has one of the most laughable vocals ever to reach #1, with Paula squeaking baby talk ("Lover come to me/I wanna see you 'gree with me"? What the hell does that even mean?) over piano and strings. The New Order–like "Promise of a New Day" was a much better song, with a strange video that stretched out Paula's body vertically to make her look skinnier. She finally exhausted the world's last remaining reserves of patience with the career-killing "Vibeology," repeatedly chirping, "I'm in a funky way!" Paula briefly married Emilio Estevez, basically retired, gritted her teeth through the contractual obligation *Head Over Heels,* and finally found her greatest success in 2002 as a cohost of TV's *American Idol.* "Cold Hearted" still sounds pretty good; "Rush Rush" has to be heard to be believed. —R.S.

AC/DC

★★	High Voltage (1976; Epic, 2003)
★★½	Let There Be Rock (1977; Epic, 2003)
★★½	Powerage (1978; Epic, 2003)
★★★	If You Want Blood, You've Got It (1978; Epic, 2003)
★★★★½	Highway to Hell (1979; Epic, 2003)
★★★★★	Back in Black (1980; Epic, 2003)
★★★	Dirty Deeds Done Dirt Cheap (1981; Epic, 2003)
★★★½	For Those About to Rock, We Salute You (1981; Epic, 2003)
★★½	Flick of the Switch (1983; Epic, 2003)
★★½	'74 Jailbreak (1984; Epic, 2003)
★★½	Fly on the Wall (1985; Epic, 2003)
★★★★	Who Made Who (1986; Epic, 2003)
★★½	Blow Up Your Video (1988; Epic, 2003)
★★★	The Razor's Edge (1990; Epic, 2003)
★★½	AC/DC Live (1992; Epic, 2003)
★★★½	Ballbreaker (EastWest, 1995)
★★½	Stiff Upper Lip (EastWest, 2000)

AC/DC rose to fame during the second half of the '70s, but this veteran Australian quintet forged the archetype for '80s metal with its turn-of-the-decade release *Back in Black.* Perhaps AC/DC's most crucial innovation is the way their lyrics make plain the boys' locker-room conception of sexuality that had previously bubbled just under the surface of most heavy-duty rock. Shamelessly sexist panderers or refreshingly frank entertainers? AC/DC fits both descriptions, but none of it would matter if guitarist Angus Young wasn't such a gargantuan riffmonger equipped with a Godzilla-like rhythm section to boot. Learn to laugh with or at lead singer Brian Johnson's shrieking depictions of those hormonal surges, and AC/DC's thundering musical charge will sweep you up like a riptide.

Original lead singer Bon Scott pioneered the raunchy, high-pitched style that Johnson later perfected; he died shortly after AC/DC's belated American breakthrough, *Highway to Hell.* Produced by pop-metal maven Robert "Mutt" Lange, that album sharpens the band's impact by refining some of its rougher edges. "You Shook Me All Night Long," from *Back in Black,* the Lange-produced platinum followup, epitomizes AC/DC's streamlined attack: a ringing, near-melodic chorus is welded to a granite-shattering beat. "Rock and Roll Ain't Noise Pollution" insists the climactic final cut, but overall *Back in Black* proves that noise pollution, when properly deployed, can qualify as great rock & roll.

Predictably, AC/DC hasn't changed a whit since then. Angus Young still stalks the stage in a schoolboy's uniform, tossing off riffs and abbreviated solos while his brother Malcolm strokes a propulsive rhythm guitar and Brian Johnson shakes the roof. *For Those About to Rock* almost measures up to the heft of *Back in Black,* but successive albums quickly become rote. AC/DC's macho posturing is unspeakably dull when it is not supported by killer hooks. (*Dirty Deeds Done Dirt Cheap* compiles the best of Bon Scott–era AC/DC; the title cut is a trashy, irresistible revenge fantasy.) A quickie soundtrack album, *Who Made Who* nevertheless works as an effective introduction to the group: Previous triumphs ("You Shook Me All Night Long") contrast with reclaimed later efforts ("Sink the Pink," from *Fly on the Wall*) and a completely out-of-character '70s blooze number called "Ride On." Of course, AC/DC returns to business as usual with *Blow Up Your Video,* where even the hottest riffs ("Heatseeker") don't seem to detonate with the same gratifying crunch. But after girding its loins for a few years, AC/DC confidently stalked back into the metal arena with *The Razor's Edge*—loud and proud. "Money Talks" makes the prospect of AC/DC's eventual greatest hits collection seem all the more enticing to nonmetalheads.

The rest of the '90s was a victory lap for the band, rereleasing much of its back catalogue and touring behind albums that were just a shadow of their powerful predecessors. A serviceable 1992 live album, *AC/DC Live,* culled from the tour following *The Razor's Edge,* acted as a reminder of their onstage fury. After a three-year break the band returned to the studio for the Rick Rubin–helmed *Ballbreaker.* Perhaps using Rubin, whose work with bands such as the Red Hot Chili Peppers had made him the de facto hard-rock producer of the day, was a stab at relevance. Motivations aside, *Ballbreaker* has a spark that the band had been missing on most of its late-era work, with tracks such as "Hard as a Rock" sitting comfortably next to any other behemoth in its arsenal. The band returned in 2000 with *Stiff Upper Lip,* a somewhat tired collection, lacking the energy of *Ballbreaker* and smelling suspiciously like an excuse to rake in more arena ticket money. Guess what? None of the tens of thousands of fans who packed those concert halls cared one whit. AC/DC were inducted into the Rock and Roll Hall of Fame in 2003. —M.C./C.R.

Johnny Ace

★★★★	The Johnny Ace Memorial Album (1973; MCA, 1990)

Born John Alexander in Memphis, Johnny Ace was the piano player in a band dubbed the Beale Streeters, which in the late '40s could often be found backing B.B. King and Bobby Bland. But Ace, blessed with a smooth, sturdy baritone voice, had no intention of remaining a faceless backing musician. Signed to the Duke label, he proceeded to cut several R&B hits that showed him comfortable delivering a blues ballad ("So Lonely" and "Never Let Me Go" being two of the most affecting performances of their day) as well as uptempo material ("Don't You Know" and "How Can You Be So Mean" being the only representatives of that style on this album). He didn't have great range, and sometimes he wobbled slightly off key, but Ace did have presence and personality to burn. Among the 12 cuts here is the immortal "Pledging My Love," the velvety R&B ballad that hit the Top 20 and might have made Ace a crossover star if it hadn't made him a legend first. When it was released in 1955, Ace was dead, having expired on Christmas Eve of 1954 after losing a game of Russian roulette backstage before a show that evening at Houston's City Auditorium.

Despite all the archaeology the CD era has inspired, *Memorial Album* is the same package Duke owner Don Robey issued following Ace's death—no bonus tracks or alternative takes (maybe none exist?), and hyperbolic liner notes lacking any references to backing musicians or recording dates. It's only a hunch, but those familiar with some of the early Sun blues sessions will want to check out the scorching, distorted guitar solo on "How Can You Be So Mean," which bears the stylistic trademarks of Ace's friend B.B. King. —D.M.

Aceyalone

★★★★	All Balls Don't Bounce (1995; Project Blowed, 2004)
★★★½	A Book of Human Language (Project Blowed/Nu Gruv, 1998)
★★★★	Accepted Eclectic (Ground Control/Nu Gruv, 2001)
★★½	Love and Hate (Project Blowed, 2003)

A founding member of Los Angeles rap troupe Freestyle Fellowship, Aceyalone is one of the most underrated MCs currently working. His first solo album, 1995's *All Balls Don't Bounce,* is an arty, loping, good-natured disc whose slice-of-life feel (with a giant side order of disses, including one capped by a dead-on Beavis and Butt-head impersonation) falls halfway between De La Soul's *3 Feet High and Rising* and Atmosphere's *Lucy Ford.* Best of all is the wry "Annallillia," the story of Acey's continued attempts to court a difficult woman with an unusual name ("I bet you think I'm silly, huh, Annallillia?"). Unfortunately, in a hip-hop scene saturated with Wu-Tang rip-offs and Cali gangsta, *All Balls'* boho aura helped the record go precisely nowhere. (The disc was reissued in 2004, after having been out of print for the better part of a decade, with a good bonus disc of remixes and contemporaneous cuts that add a darker undertone to the original album's often flighty groove.)

Three years later, *A Book of Human Language* reintroduced Aceyalone as even more high-concept, with each track meant to represent a chapter in a book on, you guessed it, language itself. Heady stuff, and occasionally overwhelming, but the jazz-tinged music keeps it light on its feet. The more song-oriented *Accepted Eclectic* was Aceyalone's strongest album to date, from its playful title track (whose twittering cartoon effects recalled early Soul Coughing, of all things) to the brilliant "Rappers, Rappers, Rappers," which celebrates everything from "Ugly rappers/ Pretty rappers, big city rappers, country rappers" to "two-for-fiddy," Hello Kitty, and Frank Nitti rappers. (Even gum wrappers receive a shout-out.) Unfortunately, the newer *Love and Hate* finds Acey sounding unsure where to go next. —M.M.

Ace of Base

★★★½	The Sign (Arista, 1993)
★★½	The Bridge (Arista, 1995)
★★½	Cruel Summer (Arista, 1998)
★★★½	Greatest Hits (Arista, 2000)
★★★	Platinum and Gold Collection (Arista, 2003)

Look, it's not as if Ace of Base *chose* to come from Sweden. So keep those pathetically easy, inaccurately dismissive ABBA comparisons to yourself. These particular northerners were jaded club rats, not bubblegum Scandi-naifs. Jonas "Joker" Berggren and Ulf "Buddha" Ekberg's seemingly benign Eurodisco thump was actually full of moody undertones; their plastic textures were pristine rather than antiseptic; and their synthetic skank was surprisingly club-wise. And they wrote "The Sign," the wisest, catchiest, most triumphant kiss-off since "I Will Survive."

On the debut disc, an Ennio Morricone–style keyboard whistle marks the welfare-state cautionary tale "All That She Wants." (Dig the "Bhangra Version," though.) "Don't Turn Around" is a logical impossibility—a funky Diane Warren song!—made reality. And if the group wasn't above feigning airheadedness (one lyric has siblings Jenny and Linn Berggren cooing "Kiss me baby, I'm attractive"), you could always spy the smirk underneath.

Though now out-of-print *Lucky Love* was an adequate followup, the palpable desperation audible in Ace of Base's "Cruel Summer" cover was commercial, not sexual. *Greatest Hits* will net you some fine house mixes and Motown fabrications. —K.H.

Adam and the Ants

★★★½	Dirk Wears White Sox (Epic, 1979)
★★★½	Prince Charming (Epic, 1981)
★★★	Friend or Foe (Epic, 1982)
★★	Strip (Epic, 1983)
★★	Vive le Rock (Epic, 1985)
★	Manners and Physique (MCA, 1990)
★★★★	Antics in the Forbidden Zone (Epic, 1990)
★★½	The Peel Sessions (Dutch East India, 1991)
★★★½	B-Side Babies (Epic, 1994)
★	Wonderful (Capitol, 1995)
★★★★	Antbox (Epic, 2000)

Sexual perversion, pirate costumes, visible black lingerie for men, tribal drumming, loud surf guitars, brain-dead lyrics, high-pitched shrieks barely hinting at the moral depravity lurking under the surface—Adam Ant brought an awful lot to the table. He was one of the great New Romantic pop stars, a dandy highwayman swashing his buckle for some of the '80s' most outrageous hits. Adam began as a London art-rock leather boy on *Dirk Wears White Sox,* but even though he was still working out his shtick, he was already a sexy phony with a puffy-shirt complex and stiletto cheekbones. (He was also a former teen flame of actress Amanda Donohoe—oh, the humanity.) The music was twisted postpunk kicks, with the incredible "Cleopatra" leading the way for sick thrills like "Car Trouble," "Digital Tenderness," and "Zerox." Hard as it is to believe, some people took Adam incredibly seriously, and they—okay, *we*—have been scarred by the experience ever since.

Adam Ant took a huge leap on *Kings of the Wild Frontier,* where he became a U.K. sensation with his new formula of "Antmusic for Sexpeople." Now here was a poseur among poseurs: Adam dressed up in 18th-century pirate finery, all frills and sleeves and pseudo-Apache warpaint, with the rest of his Ants looking mean in the same costume, ready to go keelhaul some landlubbers. The music was a shameless pop hustle, full of big Burundi-inspired rhythms and stolen guitar hooks, all amped up to headache levels and topped with debauched howls as the Ants fleeced their fans of their money at musket-point. The songs pay homage to art-terrorist inspirations such as Blackbeard, Geronimo, Link Wray, *Planet of the Apes,* and Joe Orton, in slobbering come-ons such as "Dog Eat Dog," "Los Rancheros," "Feed Me to the Lions," or the immortal "Physical (You're So)." "Jolly Roger" was the theme song, with all the Ants chanting in unison, "It's your money that we want!/And your money we shall have!"

Prince Charming was exactly the same album, except with a blue cover. The Ants scored their finest hit with "Stand and Deliver," a rollicking guitar anthem that used stagecoach robbing as a perfect metaphor for rock stardom, advertising a lifestyle in which you dress up to make trouble and ride away under cover of night. Unfortunately, the amazing B side "Beat My Guest" missed the album, finally appearing years later on *Antics in the Forbidden Zone.* Other classics here include "Ant Rap," "Mile High Club," "S.E.X.," and "Picasso Visita el Planeta de los Simios." The title song offered the ultimate New Romantic motto: "Ridicule is nothing to be scared of." On *Friend or Foe,* "Adam and the Ants" officially became "Adam Ant," which made no difference to anyone except people who'd loaned money to the other Ants. The scurvy was obviously reaching Adam's brain by this point, but that just made him sound funnier in the likes of "Try This for Sighs," "Crackpot History and the Right to Lie," and his biggest U.S. hit, "Goody Two Shoes." He also did a cover of the Doors' "Hello I Love You"—it takes a lot of pretension to make Jim Morrison sound sincere, but Adam was maybe the one rock star capable of pulling it off.

Strip was the album where Adam walked the plank. Two of the tracks were produced by Phil Collins, the worst possible sign, although there were still great tunes such as "Puss in Boots" ("Pussycat pussycat, where have you been?/I've been to London and now I'm queen") and the minuet-core title tease. But *Strip* went straight to Davy Jones' locker, and so did his attempted teddy-boy comeback *Vive le Rock,* although in retrospect it had a few Antworthy moments (was Adam the first nondisco pop star to employ the song title "Miss Thing"?). *Manners and Physique* was conformist mainstream pop, and *Wonderful* may as well have been Michael Bolton. By now Adam was concentrating on his acting career *(Slam Dance, Blue Steel)*, but his musical cred level remained high thanks to high-profile acolytes such as Elastica, who covered "Cleopatra," and Nine Inch Nails, who covered "Physical (You're So)." *Antics in the Forbidden Zone* was a near-flawless best-of, although loyal Antpeople still cling to the rarities of *B-Side Babies* and the brilliantly titled three-disc *Antbox*. Never one to go quietly, Adam Ant was arrested in a bizarre 2002 incident in which he supposedly whipped out a gun in a London pub. It turned out to be a toy. By George, he's still got it. —R.S.

Bryan Adams

★★	You Want It, You Got It (A&M, 1981)
★★★	Cuts Like a Knife (A&M, 1983)
★★★½	Reckless (A&M, 1984)
★★	Into the Fire (A&M, 1987)
★★★	Waking Up the Neighbours (A&M, 1991)
★★★	So Far So Good (A&M, 1993)
★★★	Live! Live! Live! (A&M, 1995)
★★	18 'til I Die (A&M, 1996)
★★	MTV Unplugged (A&M, 1997)
★½	On a Day Like Today (A&M, 1998)
★★★	Greatest Hits (A&M, 1999)
★★½	Best of Me (A&M, 2001)

As a singer, Adams can't quite master Rod Stewart's tender gruffness. As a writer, he falls more than a few notches short of Bob Seger's small-town mythologizing. But in the early '80s Adams tried valiantly to match these strengths—and on his singles, at least, came close to delivering an easier, radio-perfect version. Beginning as a songwriter for Bachman-Turner Overdrive, Kiss, and Bob Welch, the harmlessly leather-jacketed Canadian embodied the rock-as-career-choice approach of his moment; he was crafty, modest, competent, likable. "Cuts Like a Knife" (1983) and "Summer of '69" (1985) were perfect as bright, chunky singles. "(Everything I Do) I Do It for You," off *Waking Up the Neighbours*, sold in stratospheric amounts, but it was Adams at his slickest, not his best. There's more of Adams' sappy, big-screen balladry on *Best of Me*. *So Far So Good* stresses the rockin' hits. —P.E.

Faye Adams

★★★	The Herald Recordings (Collectables, 1990)

Among the virtues that led Atlantic Records to sign Joe Morris' Blues Cavalcade in the early '50s was its lead singer, Faye Adams, whose big, aching voice bore an uncanny resemblance to Dinah Washington's. When the Cavalcade broke up before it had even cut a side for Atlantic, Adams signed with the small Herald label and emerged as a distinctive voice in postwar R&B. She could belt the blues with anyone, and her voice had an exciting trill in it that could make devastating work of a ballad such as "Anytime, Anyplace, Anywhere" or, even better, her signature song, "Shake a Hand" (written by Joe Morris), a slow, churning vow of devotion featuring Adams' gutsy reading backed by a personable small combo with a tinkling blues piano prominent in the mix and a monolithic horn section blowing chunky, foreboding chords in the distance. Adams' recordings were marked both by a rawness that lent them the feel of live tracks and by strong, often inventive instrumental work—"Takin' You Back" swings along at a heady pace and then hits a stop-time phrase to make room for a couple of energetic burps from a tenor sax; and several of her dramatic ballads are lent richer atmosphere by robust, Jimmy McGriff–like organ lines.

Her first Herald single, 1953's "Shake a Hand," topped the R&B chart and crossed over to become a #22 pop record; she followed that with another R&B chart-topper, the stomping, sax-powered "I'll Be True," and in 1954 topped the R&B chart for the third and final time with "Hurts Me to My Heart." Adams moved to the Imperial label in 1957, and subsequently recorded for several other independents—including Savoy and Prestige—without much success. She retired in 1963, leaving *The Herald Recordings* as her admirable legacy. This collection supplants the label's earlier *Golden Classics* LP, and includes all three of the artist's #1 R&B hits, plus 11 other choice tracks that offer ample evidence of her versatility and persuasive vocalizing. —D.M.

Ryan Adams

★★★★½	Heartbreaker (Bloodshot, 2000)
★★★	Gold (Lost Highway, 2001)
★★★	Demolition (Lost Highway, 2002)
★★★½	Rock N Roll (Lost Highway, 2003)
★★★½	Love Is Hell (Lost Highway, 2004)

Ever since the demise of his '90s alt-country band Whiskeytown, Ryan Adams has shown himself to be a skilled and fearsomely prolific tunesmith with a voice that's as suited to caustic punk as it is to mopey folk. If you can make it past Adams' self-conscious streak—some of his songs practically scream "I am a Major American Artist, and you will recognize my brilliance!"—there's plenty to enjoy on these discs.

Recorded with fellow lovers of twang Gillian Welch and David Rawlings, *Heartbreaker* is the closest Adams has come to classic tear-in-my-beer country. His tender duet with Emmylou Harris on "Oh My Sweet Carolina" is a career highlight. The sprawling followup, *Gold,* is Adams' first outright attempt to don the genius mantle, via a loving pastiche of various '70s singer-songwriters. Though admirably ambitious, the album is bottom-heavy, with most of its standout tracks ("Enemy Fire," "Touch, Feel and Lose," "Goodnight, Hollywood Blvd.") clustered near the end.

Adams allegedly recorded four albums' worth of material within months of *Gold*'s release. *Demolition* grabs 13 songs from that pile. Good songs, too, but despite gritty rockers like "Gimme a Sign" and heart-in-throat ballads like "Cry on Demand," the end result doesn't hang together. On *Rock N Roll* and *Love Is Hell,* Adams makes some serious chameleon moves. The former transparently references every hard-rockin' band from the Stooges to the Strokes, while the latter, originally released in 2003 as two EPs, aims for a moody mix of the Smiths, Radiohead, and Jeff Buckley. Excellent songs abound, and yet it's hard to locate a distinct personality at work here. Adams' high level of talent is obvious; here's hoping that in the future he'll offer more than a tour through his record collection. —M.R.

King Sunny Ade

★★★★½	Juju Music (Mango, 1982)
★★★★	Synchro System (Mango, 1983)
★★★	Live Live Juju (Rykodisc, 1988)
★★★½	E Dide (Get Up) (Mesa, 1995)
★★★★	Odu (Atlantic/Mesa, 1998)
★★★	Let Them Say & Edide, Classics, Vol. 1 (Masterdisc, 2001)
★★★½	Ekilo Fomo Ode & The Way Forward: Classics, Vol. 2 (Masterdisc, 2001)
★★★	The Good Shepherd & The Child: Classics, Vol. 3 (Masterdisc, 2001)
★★★½	Mo Ti Mo & Destiny: Classics, Vol. 4 (Masterdisc, 2001)
★★★	Surprise & Conscience: Classics, Vol. 5 (Masterdisc, 2001)
★★★	Merciful God & Baba More Pe O, Classics, Vol. 6 (Masterdisc, 2001)
★★★★½	King of Juju—The Best of (Wrasse, 2002)
★★★★½	The Best of the Classic Years (Shanachie, 2003)

A superstar in his native Nigeria since the late '60s, juju bandleader King Sunny Ade was introduced to audiences in Europe and the U.S. in 1982 as "the next Bob Marley"—a sales pitch aimed more at stoking the engines of hype than accurately describing Ade's music. Granted, juju (as Ade plays it) is a catchy and exotic sound, but far more foreign to Western ears than reggae ever was. Instead of being centered around the vocal line, juju accords equal or greater importance to its guitars and drums, with episodic melodic development instead of regular verse-chorus structures.

Moreover, the fact that Ade sang only in Yoruba meant that his lyrics were largely unintelligible to non-Nigerians. Even so, Ade's Western recordings are surprisingly accessible. Well-versed in musical technology even before signing with Mango, Ade's African Beats had no difficulty absorbing the synths and drum machines added by producer Martin Meissonnier to *Juju Music* and *Synchro System.* After beefed-up electronics and even a Stevie Wonder cameo on the now-deleted *Aura* did little to improve sales, Ade was dropped from the label, and he disbanded the African Beats.

In 1986 he returned to recording with a new group, whose sound is somewhat more techno-intense and percussive. *Live Live Juju* gives a reasonable approximation of that group in concert, though no live recording has been able to capture the diverse interactions of the African Beats in full flight. After another pause of several years, Ade began releasing calmer, more autumnal sets (as befit a performer now in his 50s) that show he'd kept up with technology. *Odu* has the warmest sound and the most cleanly organized layers of rhythm, voice, keyboards, and guitar of any Ade album. The Masterdisc series presents Ade's own selections from his back catalogue and is hugely recommended to fans: *Ekilo Fomo Ode & The Way Forward* has the most lambent guitar workouts, *Mo Ti Mo & Destiny* the prettiest tunes.

Ade has never been as well represented in the era of digital music as he is now. The *King of Juju* import presents highlights from all three Island LPs and a selection of his more aggressive and electronic sides of the same vintage. *The Best of the Classic Years* is what it says: Ade's modern juju before it went international—an engrossing dream of interlocked beats, pealing guitars, and sweet voices. Although he failed to conquer America, Ade refused to fade away. In a huge affirmation for veteran Ade fans, his sterling retrospectives and confident new releases show he's both determined to stay and strong enough to last. —J.D.C./M.MI.

★★★★½	O, Yeah! Ultimate Aerosmith Hits (Columbia, 2002)
★★★½	Honkin' on Bobo (Columbia, 2004)

In the days when drugs and alcohol were required substances on the road to rock & roll nirvana, Aerosmith blazed the path of excess, American-style. Though the Boston quintet's glam-rock swagger paved the way for Guns n' Roses, Mötley Crüe, and countless others, the originals greased their lip-smacking arena-rock dramatics with hip-shake rhythms out of an earlier era steeped in R&B and blues. Their affinity for the groove provided a logical bridge for the first rock-rap crossover, Run-D.M.C.'s inner-city reincarnation of Aerosmith's "Walk This Way."

Aerosmith establishes the formula that would carry the so-called Toxic Twins—singer Steven Tyler and guitarist Joe Perry—through three decades in which they'd swing wildly between hits and hokum, shotgun-blues raunch and purple balladry. Perry brought riffs by way of the Rolling Stones and the Yardbirds, and Tyler the bawdiness, while second guitarist Brad Whitford, bassist Tom Hamilton, and drummer Joey Kramer applied the lubrication, a rhythm section that never forgot that it don't mean a thing if it ain't got that below-the-belly-button swing. "Dream On" is the debut's signature piece, a "Stairway to Heaven"–style ballad that suggested these hard-rock bad boys had arena aspirations from the get-go.

That goal became reality after the twin triumphs of *Toys in the Attic* and *Rocks,* hard-rock landmarks that bring the melody without stinting on the toughness. But the band's excesses soon swallowed them up, as evidenced by a bankrupt series of studio albums from *Draw the Line* through *Done With Mirrors.* Things got so bad during this period that Perry and later Whitford briefly quit.

Ignited by the Run-D.M.C. collaboration, the reunited and newly cleaned-up Aerosmith began marshalling a comeback. An audacious single, "Dude (Looks Like a Lady)," perked up the otherwise thin *Permanent Vacation,* but *Pump* made their return to hard-rock glory official: the first wall-to-wall classic since *Rocks.* It revealed a previously well-concealed social consciousness on "Janie's Got a Gun" and still managed to snarl through the slick production. Its success ushered in a new era of studio puffery, with ballads and gimmicks competing for space with the rockers on *Get a Grip.* As a live act, the new Aerosmith came across like multimillionaire craftsmen; their hook-filled but disconcertingly sanitized bombast is documented on the live disc *A Little South of Sanity.*

Nine Lives sees the band resorting to repeating itself and others, with "Hole in My Soul" revising "Dream On," while Led Zeppelin's "Kashmir" is the template for "Taste of India." *Just Push Play* continues to press the same buttons that recharged the band's career: power ballads so overblown they might make Mariah Carey blush, the occasional contemporary production touch (turntable scratching, drum loops), plus the time-tested arsenal of dirty guitar licks and lip-smacking, jive-rapping sexual innuendo. There's something sleazy and craven about the whole affair—no surprise from a band that shared a stage with Britney Spears and 'N Sync during the 2001 Super Bowl. The blues covers that dominate *Honkin' on Bobo* allow Aerosmith to play it looser and raunchier, and this time there're no gratuitous pop concessions to muck up the low-rent thrills.

Among a truckload of hits compilations and retrospectives, the priciest is *Box of Fire,* which repackages the 12 albums from the band's first Columbia Records era with a marginal five-song bonus disc. The best is *O, Yeah! Ultimate Aerosmith Hits,* which combines the classic '70s material with the best of its "Janie's Got a Gun"–era hits for Geffen. —G.K.

Aesop Rock

★★★	Float (Mush, 2000)
★★★★	Labor Days (Def Jux, 2001)
★★★★	Daylight (EP) (Def Jux, 2002)
★★★	Bazooka Tooth (Definitive Jux, 2003)

White New York City rapper Aesop Rock rhymes as if he's trying to recite his internal monologue, smothering exotic beats in bizarre observations and confessional narratives seemingly woven from the utterances of someone talking in their sleep. On *Float,* the breakthrough that—along with Cannibal Ox's *The Cold*

Vein—ushered in the postmillennial "undie" (short for "underground") hip-hop movement, Aesop even provided liner notes explaining the ambitious, oblique, and sometimes simple ideas that inspired each song. About "6B Panorama" he writes, "Home. Studying my surroundings from the inside looking out. Taking notice of the overlooked elements of one day." These elements include pigeons, vagabonds, princesses, junkies, "batty" senior citizens, jaywalkers, and men "slapping dominoes down"—the details of a "city, a village, a neighborhood, a ghost town."

And he goes on. And on, and on, over the croak of '70s funk synth and a stripped-down, skipping beat he produced. Blockhead, Omega, and, most famously, Slug (the voice behind fellow undie stalwarts Atmosphere) also create Aesop's music, which is usually elegant but sometimes hook-deficient. The funny, meditative, and startlingly original *Labor Days*, however, brims with crooked details that snag one's attention, like the bursts of woolly synth on "Labor," the flutelike lead and melodic bassline on "Daylight," the Asian ambience of "Flashflood." Aesop's dorky and subtly ironic voice courses through every track like a snake digesting a recent meal, as he ponders the metaphysics of working nine to five, relates the life and times of a wannabe artist named "Lucy," and makes obscure references (to mythology, for instance) that even the careful listener will never parse. More than dense, Aesop Rock's food-for-thought rhymes are delectably rich. And every so often he delivers a zinger, like this one from "Daylight": "Life's not a bitch/life's a beautiful woman/you only call her a bitch 'cause she wouldn't let you get that pussy."

"If cameras are guns, one of y'all is gonna shoot me to death," Aesop intones at the start of "Easy," overestimating the amount of press his last two discs earned him. *Bazooka Tooth* suffers from his premature effort to stay underground: the beats are crafted for close listening, not casual enjoyment, and the rhyme flows are overly dense and therefore seem less impassioned. —N.C.

Afghan Whigs

★	Big Top Halloween (Ultrasuede, 1988)
★★½	Up in It (Sub Pop, 1990)
★★★½	Congregation (Sub Pop, 1992)
★★★½	Uptown Avondale (EP) (Sub Pop, 1992)
★★★★½	Gentlemen (Elektra, 1993)
★★★½	What Jail Is Like (EP) (Elektra, 1994)
★★★½	Black Love (Elektra, 1996)
★★★	1965 (Columbia, 1998)

Too alt-identified (or complicated) for the mainstream, too straightforward (or cock-rockish) for many indie lifers, the Afghan Whigs never found the mass audience to which their cinematic, oddly addictive soul-rock infernos aspired. Much of the admiration they did inspire centered on frontman Greg Dulli, an inspirationally pudgy, manic-depressive cad who would have creeped out Don Giovanni. Dulli's a Catholic boy blessed with a filmmaker's sense of story, a robust, overly industrious voice that can't quite stay on key, sexual hang-ups for days, and the seeming conviction he may, in fact, be black. Dulli could introduce a song "Ladies/Let me tell you about myself/I've got a dick for a brain/And my brain is gonna sell my ass to you" and let his corrosive charisma and charred voice do the rest.

After a fetal 1988 debut called *Big Top Halloween* they've longed to forget, *Up in It* showed some signs of ambition beyond the Sub Pop Singles Club, but thudding production hides the band's latent smarts in sludge. The quantum leap that is *Congregation* shows they ditched grunge for soul because they were no damn good at the former and ladies dig the latter. Dulli's sex-god persona is coming into focus. Convinced submission ("I'm Her Slave"), predation ("Tonight"), and absolution ("This Is My Confession") are all necessary to balance out the guilt and pleasure, and he macks like an expert at all of them. The hidden track, "Miles Iz Dead," brings a terrific faux-funk riff to life and sums up Dulli's seduction strategy thus: "Don't forget the alcohol."

The placeholding *Uptown Avondale* dives into soul covers such as Freda Payne's "Band of Gold" and the Supremes' "Come See About Me." It'd be nice if Dulli stayed on key the whole time, but the band's hearts and hips are in the right place.

But *Gentlemen* they will take to their grave. A brilliant, knowing record sleeve hides one of '90s rock's messiest psychodramas. Reportedly written after a particularly nasty breakup, the *Gentlemen* song cycle portrays the artist as a grandmaster headfucker, the kind of guy you would keep your slightly obsessive sister away from at all costs even as she is, once again, climbing into his car. Dulli chronicles the melodramatic chess of maximum codependence with vengeful loathing, self- and otherwise, while the band—guitarist Rick McCollum in particular—pounds out complex, almost proggy R&B. From the howling single "Debonair" and the subtle, savage fuck-off "Be Sweet" to the plaintive "What Jail Is Like" and the astoundingly bitter "When We Two Parted," *Gentlemen* dissects the sort of emotional train wreck few bands have ever documented as unflinchingly. *Gentlemen* is toxic and cunning, hopelessly arrogant and just plain hopeless. (*What Jail Is Like* is more soul covers and killer live tracks, demonstrating that almost any live bootleg from here forward is worth a spin.)

"Tonight I say goodbye/To everyone that loves me," opens *Black Love,* a smoother, more flagrantly soulful, and somehow even darker album. Where *Gentlemen* at least felt like the catharsis of vibrant autobiography, *Black Love*'s noir-novel vibe balls up in the pit of your stomach and eats right through. The album's overtly cinematic feel works like a distancing effect until you realize just how fucked up Dulli sounds. The opening "Crime Scene Part One" is thunderously dramatic, but the funk on "Going to Town" and the "Honky's Ladder" jive feels more shticky than sticky.

Created after an increasingly ill Dulli received treatment he clearly really, *really* needed for clinical depression, *1965* is the headfucker on Zoloft. Instead of hating himself and the world, Dulli, who's never sung better, sounds like he's actually enjoying sex because sex is fun and not just a power trip he can't escape. He shouts out Nas on "Omerta," and "John the Baptist" and "Somethin' Hot" shake what his mama gave him, while "Neglekted" is just plain dirty. At the time, *1965*'s groove thang felt like a mild letdown from the previous trilogy's relentlessness, but in hindsight it's clear Dulli wasn't as used to joy as pain, and probably had as much to say about the former as the latter. Having been almost famous for a little too long, the Afghan Whigs called it a day in February 2001. —J.G.

A.F.I.

★★ Answer That & Stay Fashionable (1995; Wingnut, 2000)
★½ Very Proud of Ya (NIT, 1996)
★★½ Shut Your Mouth & Open Your Eyes (NIT, 1997)
★½ Fire Inside (Adeline, 1998)
★★★ Black Sails in the Sunset (NIT, 1999)
★★★ The Art of Drowning (Nitro, 2000)
★★★★ Sing the Sorrow (DreamWorks, 2003)

By the time of the release of their major label debut, *Sing the Sorrow,* A.F.I. had transformed themselves from lightning-fast hardcore-punk torchbearers to scary goth-metal freakazoids on a mission to gather up an army of alienated youth. It's clear from the opening minutes of that album—where the music lurches to a sludgy crawl more than a couple times—that A.F.I. are on to something new, weaving electronic drums, synths, punk rhythms, anthemic choruses, creepy-crawly lead vocals, and metal riffage into a dark, near-perfect album for even darker times. The A.F.I. of *Sing the Sorrow* come off as the Damned for the new metal generation, whereas the A.F.I. of their debut, *Answer That & Stay Fashionable,* could have been just about any hardcore-obsessed garage band from the 1980s or 1990s. The transition from a generic Southern California punk band to something more substantive and original began with 1999's *Black Sails in the Sunset,* in which they started slowing things down and finding their own voice. Earlier releases like the four-song EP *Fire Inside* (not a cover of the Bob Seger song, but a reference to the band's name, which stands for "A Fire Inside") seem to end almost as soon as they begin, which is even true of blitzkrieg full-length albums like *Answer That & Stay Fashionable* and *Very Proud of Ya.* —K.M.

Christina Aguilera

★★ Christina Aguilera (RCA, 1999)
★★½ Stripped (RCA, 2002)

Of the teen divas who revived bubblegum in the late '90s, Christina Aguilera had the distinction of being the one who could "really sing"—meaning she did better impressions of Whitney Houston and Mariah Carey than anybody else. Groomed for showbiz from the time her teeth first sparkled, she appeared on *Star Search* at age eight (she sang "The Greatest Love of All," and lost) and, like Britney Spears and the boys of 'N Sync, was a cast member on Disney's *The New Mickey Mouse Club.* By the time she recorded her debut album at eighteen, she was a fully formed hitmaker. *Christina Aguilera* has two alluring anthems of pop femininity, "Genie in a Bottle" and "What a Girl Wants" (both by coed songwriting teams), but the remainder is generic Top 40 pop that sounds like she had not quite outgrown the sexless Disney mindset. In that she lost market share to Spears, who straight from the start exuded a vampishness that appealed to teenagers and pedophiles alike.

Fans of Aguilera had to wait three years for the sluttification of their American idol: *Stripped,* decorated with images of the singer in varying states of piercings and undress, claims to be an honest self-portrait, "no hype, no gloss, no pretense," despite a superabundance of hype, gloss, and pretense. The hip-hop–influenced songs, mostly written or cowritten by Aguilera—with some much needed help from Linda Perry ("Beautiful") and Alicia Keys ("Impossible")—finally bring her in step with the times, but she's more chameleonlike than ever, claiming an uncompromising, defiant individuality in songs that have little. —B.S.

Air

★★★★½ Moon Safari (Astralwerks, 1998)
★★★½ Premiers Symptomes (Source/Astralwerks, 1999)
★★★½ The Virgin Suicides: OST (Source/Astralwerks, 2000)

★★	10,000 Hz Legend (Source/Virgin, 2001)
★★	Everybody Hertz—10,000 Hz Legend Remixes (Source/Virgin, 2001)
★★★★	Talkie Walkie (Astralwerks, 2004)

L'amour, c'est bleu, and nobody captures the sound of posh melancholy quite like the sad-eyed gentlemen who call themselves Air. The French duo of Nicolas Godin and Jean Benoit Dunckel specialize in moody space pop, combining the digital flash of outré dance music with the tropes of '60s French easy-listening schlock: bongos, castanets, vintage electric piano, and shag-carpet organ straight from the soundtracks of movies such as *Un Homme et Une Femme.* You can practically hear Anouk Aimee pouring them some Riunite on ice in the background. But the sound is too lavishly sentimental to be just a joke, and Air makes for resonant late-night listening, when you can hear the sadness under all the glitz.

Air's debut, *Moon Safari,* takes off with the sleazy cocktail grooves of "La Femme d'Argent," "Sexy Boy," and "Kelly Watch the Stars." Guest vocalist Beth Hirsch coos a few *très tragique* café ballads, "New Star in the Sky" recalls David Bowie in his Jacques Brel mode, and "Ce Matin Là" gets you weeping along with a tuba solo. It's just a shame *Moon Safari* isn't available on reel-to-reel. *Premiers Symptomes* is a fab collection of early singles. The duo did the superb soundtrack for Sofia Coppola's film *The Virgin Suicides,* with '70s-style keyboard nostalgia such as "Afternoon Sister," "Bathroom Girl," and "Dirty Trip." To avoid typecasting, Air changed their sound completely for the drastic departure *10,000 Hz Legend.* In theory, this is an admirable idea, but theories suck and so does *10,000 Hz Legend,* as well as its companion remix album, *Everybody Hertz.* The sound is harsh, dry, disjointed, and completely humorless, with the exception of an ode to fellatio starring Cibo Matto's Miho Hatori, "Wonder Milky Bitch." *Talkie Walkie* was a significant return to form, with the cheerfully whistled chorus of "Alpha Beta Gaga," the happiest melody they've ever written. —R.S.

Arthur Alexander

★★★½	You Better Move On (Dot, 1962)
★★★	Arthur Alexander (Warner Bros., 1972)
★★★½	Lonely Just Like Me (Elektra/Nonesuch, 1993)
★★★★★	The Ultimate Arthur Alexander (Razor & Tie, 1993)
★★★★	Rainbow Road: The Warner Bros. Recordings (Warner Bros. 1994)

A gentle singer with a penchant for the pathos of love, Arthur Alexander was one of the pioneers of country soul, and arguably its finest interpreter. Born in Alabama, Alexander grew up on country music; as a teenager in the late '50s he wrote songs that used his forlorn, gospel-influenced vocal delivery to lift the clichéd commonplaces of country (cheating hearts, etc.) into the realm of high art.

The first song Alexander recorded, 1962's "You Better Move On," was his biggest hit, and was later covered by the Rolling Stones. Subsequent singles didn't fare nearly as well, but by then Alexander was established as a writer, and his earnest songs became hits for others: The Beatles recorded "Anna" and "Soldier of Love," while Esther Phillips and Percy Sledge both had success with "Set Me Free." Elvis Presley had his last monster hit with "Burning Love," a song Alexander introduced but didn't write.

Alexander's own versions, gathered on the well-curated starting point *The Ultimate,* remain marvels of poised, brilliantly understated phrasing—the plaintive "Anna (Go to Him)" and the more anguished "Whole Lot of Trouble" show why other singers, including Otis Redding, considered Alexander one of the masters. Coming out of his first retirement in 1972, Alexander released *Arthur Alexander* (reissued, with several additional tracks, as *Rainbow Road*). The album, recorded in Memphis, has a tighter, more assertive rhythm attack, and songs saturated with slow-burning emotional torment and disconsolate heartache.

Embittered, Alexander left the business in 1981, and was driving a bus for a Cleveland social-services agency when he was rediscovered in the early '90s. *Lonely Just Like Me,* which reunited him with Dan Penn and others from his past, combines sharply rendered updates of Alexander's old songs interspersed with surprisingly emotional new material, including the plaintive "If It's Really Got to Be This Way." The album won near universal praise, but this return was also bittersweet: Alexander died of heart failure in June 1993, just before he was to embark on a summer tour. —T.M.

★★★	Poison (Music Media, 2003)

Rock lost the ability to shock so long ago that Alice Cooper's original impact is hard to fathom now. A true early-'70s antihero, Alice bridged the old generation gap and defined a new one: Concerned older siblings and parents alike couldn't fathom what young teenagers saw in the scrawny cross-dressing geek and the simplistic blare his band passed off as music. These days, the only shocking thing about the records is just how perfect the early ones still sound. *Love It to Death* and *Killer* flesh out Alice's theatrical fantasy trip with sublime, straight-ahead rock & roll: punchy guitar riffs, roadworthy rhythms, defiant melodies, and, yes, memorable lyrics.

It was certainly a shock when "I'm Eighteen" became a hit single in early 1971, as you couldn't have found a band with less hit potential than Alice Cooper. The L.A. (via Phoenix) quintet—and Alice Cooper was the name of the group, not just of its singer, minister's son Vincent Furnier—had recorded two forgettable albums of painfully arty psychedelia for Frank Zappa, and were known only for the speed with which they repelled paying customers. (The dreadful *Alice Cooper Live* dates from the 1969 Toronto Rock & Roll Revival; you'll walk out on the CD, too.) But relocating to Detroit, they found specific inspiration sharing stages with the MC5 (streamlined rock), Stooges (the danger of Iggy), and Parliament/Funkadelic (theatrical outrage). Encouraged by rabid Motor City audiences, Alice Cooper simultaneously became tighter and even more outrageous. Caked with makeup, wrapped in a live boa constrictor, Alice's late-night horror-show act dramatized his fans' barely spoken fears. Producer Bob Ezrin was the final piece of the newly revved-up band's puzzle, and the exemplary hard rock of *Love It to Death* and *Killer* (both 1971) helped transform unlikeliest-to-succeed Alice into one of '70s rock's first great arena attractions.

The group possessed genuine songwriting talent (particularly guitarist Michael Bruce), so even their most theatrical pieces had enough musical underpinning to hold up on record, and a knack for concocting catchily subversive singles. The title track of *School's Out* was the biggest and best, a liberating gust of pure adolescent rebellion. Unfortunately, the corny *West Side Story* quotes on "Gutter Cats vs. the Jets" pointed toward Alice's imminent future—pure show biz. *Billion Dollar Babies* still carries some kick, especially the 2001 *Deluxe Edition* featuring a 1973 concert disc. But "shock" numbers such as "I Love the Dead" were becoming predictable, and the group's fixation on its own success did not portend well. The wages of fame, and the internal frictions inevitable when group and singer answer to the same name, took their toll, and the sagging *Muscle of Love* was an unfitting end for what had been an exhilarating four-year run. Singer and band parted company, but *Greatest Hits* collects all their hard-rock battle cries from those decadent days of yore—"I'm Eighteen," "Under My Wheels," "School's Out," "No More Mr. Nice Guy"—in one irresistible, timeless album.

The now-solo Alice Cooper held his ground by hiring the Detroit guitar tag team of Steve Hunter and Dick Wagner for *Nightmare.* "Only Women Bleed" came out of left field to become a pop hit in 1975, and he would return to ballads ("I Never Cry," "You and Me," "How You Gonna See Me Now") for chart sustenance throughout the decade. He'd need them. Golfing with George Burns, goofing on *Hollywood Squares,* Alice started making wan, lazy albums that sadly reflected his shifting priorities. 1977's live *The Alice Cooper Show* featured the able Hunter-Wagner band pummeling the early classics—nostalgia, already. Throughout the rest of the '70s and much of the '80s Alice was adrift, trying on styles from new wave to pop metal in a series of albums now mercifully disappeared. The 1989 comeback *Trash,* produced to mainstream specifications by songsmith Desmond Child, rewarded a defanged Alice Cooper with his first platinum in fifteen years. *Hey Stoopid* has a bit more bite, the cautionary title tune containing welcome flashes of the old reprobate's wit and wisdom: "Hey, bro, take it slow, you ain't livin' in a video."

Classicks, A Nice Nightmare, and *Super Hits* are all collections of this early-'90s material, and unessential. *The Best of Alice Cooper* is more utilitarian: the bulk of 1974's *Greatest* plus the lighter cream of the solo years. At four CDs *The Life and Crimes of Alice Cooper* box set may be too long by a disc, but it's hard to listen to its ups and downs without acquiring newfound respect for the old pro's counterpunching abilities. And he's not done yet. *Brutal Planet* (2000) and *Dragontown* (2001) are purported to be the completion of a trilogy begun in 1994 with *The Last Temptation,* but their main attraction is simply that they rock harder than anything he's done in two decades, and provide Vince Furnier with an excuse to take the stage one more time and become Alice Cooper, the beloved heavy metal entertainer.

Alice dialed down the metal for *Eyes.* Its more mainstream rock recalls the classic Cooper group, appropriate for an album whose central track is "Detroit City" and features MC5 guitar slinger Wayne Kramer. *Poison* is a double-disc compilation of later Alice, with live versions of some of the earlier, bigger hits thrown in. Vigorous and entertaining but not terribly essential. —M.C./B.E.

Alice in Chains

★★★	Face Lift (Columbia, 1990)

★★★	Live (Columbia, 2000)
★★★	Greatest Hits (Columbia, 2001)
★★★	Essential Alice in Chains (Sony Legacy, 2004)

Heavy metal was every bit as crucial an ingredient as punk in the mix of influences that became Seattle grunge. Though often underrated next to more celebrated grunge progenitors such as Nirvana, Mudhoney, and Soundgarden, Alice in Chains' slow-grind roar may be even more influential; later bands such as Godsmack (named after an Alice song), System of a Down, and Creed would be unimaginable without them.

That said, the quartet's output was relatively small and its accomplishments undercut by singer Layne Staley's long-running battle with heroin, which prematurely broke up the band and eventually took his life in 2002. That tragic history is presaged by "We Die Young," the first song on the band's debut album. Death, drugs, and the struggle to transcend both would be the band's enduring themes, and Alice created a signature sound that fit the dire imagery. It's heard to devastating effect on "Man in the Box," the defining moment on *Face Lift:* guitarist Jerry Cantrell's black-angel chords distended by a relentless wah-wah pedal, with Staley moaning in harmony.

Staley's hell-awaits wail, augmented by monks-of-doom harmonies, is as eerie as mainstream metal gets in the '90s, Seattle's version of Black Sabbath's '70s encounters with Beelzebub. Essential to the atmosphere is Cantrell's guitar playing, a slow-motion death spiral that places a premium on space and density. The rhythm section specializes in slow burn; uptempo moods, like humor, are virtually nonexistent in the Alice lexicon. *Dirt* is a contender for bleakest multiplatinum album in rock history. It contains Alice's best-known song, the unusually melodic "Would?," which also appears on the soundtrack to Cameron Crowe's movie *Singles.* But the album's dark heart lies in the remorseless "Sickman," "Godsmack," "Hate to Feel," and "Junkhead," in which Staley distills his self-destructive attitude with a chilling offhandedness: "What's my drug of choice? Well, what have you got?" Cantrell's "Rooster," about a war veteran, paints a different, equally riveting portrait of against-the-odds survival.

Jar of Flies may have been designed as a stopgap between major albums but the seven-song EP sounds like Alice's answer to *Led Zeppelin III*—an inspired change of pace. Staley's voice floats over acoustic guitars, harmonica, and strings, and the melodies are among the band's most durable. But with the singer's health deteriorating, Alice begins repeating itself on its final studio album, *Alice in Chains.* Its legacy is kept alive by a steady stream of vault-clearing retrospectives, none of which matches the impact of the original studio creations. —G.K.

Tha Alkaholiks

★★★★	21 & Over (Loud/RCA, 1993)
★★★½	Coast II Coast (Loud/RCA, 1995)
★★★½	Likwidation (Loud/RCA, 1997)

Tha Liks

★★½	X.O. Experience (Loud/Columbia, 2001)

Music critics and the masses alike largely ignored this '90s West Coast rap trio, but not since '50s lounge comedy has anyone gotten so much mileage out of playing drunk. Dean Martin and others milked the bottle because it offered some kind of hysterical release to repressed white suburbanites. On their wonderful 1993 debut, *21 & Over,* Tha Alkaholiks aimed tighter (so to speak), offering simple, hedonistic release to upstanding "alternative rap" fans, while also providing smart, comic relief from the hardcore gangsta scene that thrived in the crew's home base, L.A.

It wouldn't have worked without the trio's intoxicating chemistry. Cali native J-Ro (James Robinson) was a charismatic card: He sounded like L.L. Cool J's younger brother as he burped his way through "Only When I'm Drunk," staying on the beat even as he staved off the heaves. Two friends transplanted from Ohio provided counterpoint, Tash (Rico Smith) with tighter, grimier raps and E-Swift (Eric Brooks) with an infectious blend of jazzy instrumentation and brittle sound effects (his occasional raps held their own, too).

On *Coast II Coast,* E-Swift's mixes came to the fore, tinged with a new darkness and harder funk to underpin the 'Liks' tacit acknowledgement that maturation was unavoidable. But if they hinted at breaking out of their haze (the reality check "21 and Under"), occasionally the stupor just turned stupid (the misogynistic "Hit and Run"). *Likwidation* was even more uneven, featuring throwaway skits and guest raps but also many of the crew's finest creations, from the extended dis of "Captain Hook" to the Stevie Wonder bliss of "All Night."

After threatening breakup, the group shortened their name and came back with *X.O. Experience,* a disc that goes all the way hard by hooking up with the Neptunes and other edgy, electrified youngsters. Teetering is one thing, losing all sense of balance another. —F.S.

Don't be fooled by the two lead guitars, the two drummers, the legendary concerts that only kicked into gear around the two-hour mark: Boogie-'til-you-puke overkill really isn't a part of the Allman Brothers' recorded legacy. Guitarist Duane and singer-organist Gregg Allman knocked around Los Angeles in the late '60s, polishing their chops in third-billed psychedelic ballroom bands such as the Hour Glass and Allman Joys. Moving back to Macon, GA, in 1968, the Allmans put together a powerhouse outfit of similarly inclined players: second guitarist Dickey Betts, bassist Berry Oakley, drummers Butch Trucks and Jai Johanny Johanson. At the same time, Duane Allman began doing session work at the Muscle Shoals studio in Alabama—where this skinny white hippie quickly earned a reputation as a stinging, soulful accompanist. Duane and Gregg both exhibited a natural feel for black music that the much-hyped British "blues masters" of the period couldn't begin to match. Growing up in the South, they absorbed gutbucket R&B and sanctified gospel along with the more common influences of soul and freedom jazz, and came up with an unprecedented sound: a searching, polyrhythmic extension of rock. Duane and Dickey Betts shied away from distortion and overamplified special effects; instead, they stroked clean, precise lines out of their Gibsons. On a good night, they seemed to nudge and push each other toward new heights, supported by a massive, rock-solid wall of rhythms. And Gregg's capacity as a blues belter—already startling when he was in his early 20s—grows deeper and more resonant with time.

The "Don't Want You No More"/"It's Not My Cross to Bear" medley kicks off the debut in definitive style. After a fluid jazzy intro ("Don't Want You") the band explodes into a slow blues ("Not My Cross") where Duane's guitar and Gregg's voice join in a beautifully anguished duet—wailing from the very depths of their souls. The bittersweet, organ-drenched "Dreams" showcases the band's easy-rolling melodic punch, while "Whipping Post" draws up a sturdy blueprint for the cathartic concert extrapolations that would become the Brothers' signature.

Idlewild South is way too skimpy timewise, but the musical development is stunning. The Bible-thumping "Revival" points up a crucial country music influence and the haunting, melancholy "Midnight Rider" fully asserts Gregg's identity as a singer. Once again, "In Memory of Elizabeth Reed" presents the blueprint of a concert warhorse, capturing the Allmans at their most adventurous. This is what jazz-rock fusion groups of the mid-'70s should have aspired toward.

Some would say *At Fillmore East* is the peak achievement of the band. Certainly, it communicates all the excitement and drama of the group's concert explorations. The blues standards sound grittier and more rockin' than anything on the first two albums, and after "Whipping Post" builds to its shuddering peak, that long spacey fade-out provides sheer post-orgasmic bliss. Nevertheless, *Beginnings* (the debut album and *Idlewild* packaged together) gets the nod over *Fillmore* since it takes account of the band's considerable pop-song potential as well as its instrumental prowess. But rock jamming just doesn't get any better than *Fillmore East*—except, perhaps, on 1992's expanded, double-CD version, *The Fillmore Concerts.*

Just a few months after *At Fillmore East* was recorded, Duane Allman died in a motorcycle accident. He was 24. The stopgap *Eat a Peach* extracts even more magic from the historic Fillmore stand. Perhaps the live "Mountain Jam" (almost three quarters of an hour long) loses something in the translation to disc, but the snarling cover of Sonny Boy Williamson's "One Way Out" and devastatingly pretty studio tracks such as "Blue Sky" add quite a bit to the legend.

Bassist Berry Oakley was killed in similar circumstances in 1972, just a little more than a year to the day after Duane's accident. Miraculously, the remaining group bounced back strong with *Brothers and Sisters,* wisely adding a pianist, Chuck Leavell (rather than trying to replace Duane with another guitarist), and emphasizing Dickey Betts' country-tinged picking and singing. The Brothers' refurbished, slightly twangier sound soon became the flagship model of a new genre—"Southern rock." The instrumental "Jessica" isn't quite up to the standard of "Elizabeth Reed," but the liquid guitar leads on the hit single "Ramblin' Man" introduced the pop mainstream to a tangy, intoxicating regional delight.

Hard touring (and the resultant hard living) took an inevitable toll on the band, though. *Win, Lose or Draw,* a lackluster live album *(Wipe the Windows, Check the Oil, Dollar Gas),* and a passable best-of *(The Road Goes On Forever)* show further signs of strain. *Enlightened Rogues,* from 1979, has its moments, though the presence of guest star Bonnie Bramlett on the best cut ("Crazy Love") doesn't bode well for this proudly self-contained band. The band reached its low point with a pair of rudderless albums on Arista (*Reach for the Sky* and *Brothers of the Road,* both mercifully out of print) and seemed to break up for good in the early '80s.

Inevitably, the Brothers reconvened during the nostalgic summer of 1989, but the group's live shows (featuring the added muscle of new guitarist Warren Haynes) quickly laid to rest any accusations of reputation pimping. Gregg's voice emerges with a fresh, whiskey-ruined authority on the respectable *Seven Turns* (1990), and somehow the 1991 followup, *Shades of Two Worlds,* actually expands on that renewed promise. The timeless, soaring improvisations of "Desert Blues" and "Sort of Bird" firmly reassert the band's unique, enduring brand of blues power, while Gregg fills his sobriety songs with the shaky conviction of lived experience: He's been to the "End of the Line" and back. Betts, meanwhile, contributes one of the best songs of his Allman Brothers career with *Where It All Begins'* "Back Where It All Begins." Never mind the soaring beauty of his country-jazz guitar soloing that pads out the song's nine-minute-plus running length; the real hook is in his warm and heartfelt delivery of the song's catchy chorus, which Dave Matthews would kill for. But *Where It All Begins* would mark Betts' swan song with the group (apart from 2000's *Peakin' at the Beacon,* the weakest of the band's three live releases of the decade). He was booted from the group in early 2000, and his characteristic country rock soul is missed on 2003's *Hittin' the Note.* That said, the album finds Gregg and the remaining players hitting the note more often than not, even if they never quite hit on anything new. The twin guitars of Haynes (back in the group after sitting out the second half of the '90s) and new kid Derek Trucks pack plenty of punch—both in the extended jams and the opening "Firing Line," a particularly potent, straight-up blues rocker—and Gregg's brutally trenchant "Old Before My Time" is one of the most effectively world-weary life-on-the-road songs in a long, long time.

With four discs covering not only the band's greatest hits but also solo cuts and a sampling of Gregg and Duane's earlier work in Hour Glass and the Allman Joys, the 1991 box set *Dreams* is the definitive Allman Brothers Band anthology. After that, the 2001 expanded double-disc version of *The Road Goes On Forever* improves on the original with 13 extra tracks, though the tighter *A Decade of Hits* is just as (if not more) potent. *Mycology* makes a convincing case for the reunited band's '90s output, but *Hell & High Water,* which picks through the wreckage of the two best-forgotten Arista albums, is for completists only.

For Duane Allman enthusiasts, both volumes of *An Anthology* collect sterling examples of the late guitarist's session work—including tracks with the Hour Glass, Wilson Pickett, and Eric Clapton—and are highly recommended to guitar students and Southern-soul buffs alike. His famous solo on Aretha Franklin's "The Weight," on *Volume One,* is worth the price of admission alone. The same volume also features Derek and the Dominos' "Layla," but it's hard to imagine anyone shilling out for either of these collections who doesn't already own that album. Brother Gregg, meanwhile, has had more time to work on his solo résumé. Never a prolific songwriter, he recast some of his Allman Brothers tunes as moody blues pop on his 1974 solo debut, *Laid Back,* and scored a surprise hit. *The Gregg Allman Tour*—which features a 24-piece orchestra—is lush but not without soul. The harder-hitting *Playin' Up a Storm,* from 1977, actually eclipsed most of the Allmans' work of the same period. A decade later, Gregg made a few tentative steps back in the right direction with *I'm No Angel* (1987), followed by *Just Before the Bullets Fly* (1988); the title track of the former presents a battle-scarred veteran with a surprising amount of fire left in his bones. The workmanlike *Searching for Simplicity* (1997), however, failed to turn up anything new. *No Stranger to the Dark* sums up the three latter albums, while the skimpier *Millennium Collection* focuses on the first three. *One More Try* devotes an exhausting two discs to solo Gregg—overkill, to say the least, though the abundance of previously unreleased and alternate tracks (including versions of many Allman Brothers Band tunes) doubtless lends the collection collector appeal. —M.C./R.SK.

★★½	The Complete Greatest Hits (Rhino, 2001)
★★½	Definitive America (WEA, 2001)

America was to '70s folk rock what the Archies were to Beatlesque pop. The trio camouflaged its songs with earnest, three-part harmonies (à la Crosby, Stills & Nash) and earthy, pseudo-cosmic lyrics, but its music was little more than bubblegum for adolescent hippies.

Dewey Bunnell, Dan Peek, and Gerry Beckley cantered out of the gate in 1972 with a #1 hit ("A Horse with No Name") that duplicated the laid-back yawn of Neil Young. But the song was weighed down by clunky, banal lyrics ("In the desert, you can remember your name/ 'Cause there ain't no one for to give you no pain") and a repetitious melody.

Though they tried, America never achieved the emotional scope or instrumental inventiveness of Young and his sometime vocal partners CSN. America's early-'70s hits all were variations on the same themes: mawkish love songs ("I Need You"), clumsy impressionism ("Horse," "Ventura Highway"), childhood fairy-tale metaphors ("Tin Man"), and corny affirmations ("Lonely People"). By the middle '70s, the group had enlisted former Beatles producer George Martin to brighten their acoustic sound with lush pop arrangements, but the songs remained the same.

In 1979 America switched labels and forged ahead with a new Adult Contemporary sound. The music and lyrics were as tepid as ever, with the group replacing the faux folk-pop of its past with overproduced, Eagles-lite rockers. The new America fit well into early-'80s MOR playlists, and the group scored two more hits ("You Can Do Magic" and "The Border") before fading into the murk of MTV-friendly synthesizer pop.

For those who have a desire to revisit their '70s childhood memories, *History: Greatest Hits* offers all the America anyone needs. The interchangeable *Complete Greatest Hits* and *Definitive* add songs from the group's post-1975 albums. The boxed set *Highway* is mind-numbing overkill. —M.K.

American Hi-Fi

★★	American Hi-Fi (Island, 2001)
★½	Live from Tokyo (Island, 2002)
★★	The Art of Losing (Def Jam, 2003)

Maybe it's because he felt oppressed by females as drummer for Veruca Salt, but when Stacy Jones (who also drummed for another '90s alt mainstay, Letters to Cleo) formed American Hi-Fi with guitarist Jaime Arentzen, bassist Drew Parsons, and skinsman Brian Nolan, he used the forum to smear the human race's better half. While his overdetermined pop punk and hypersensitivity set Jones apart from losers such as Limp Bizkit's Fred Durst, even his tunefulness sounded turgid. "Flavor of the Weak," the Cheap Trick–meets–Green Day hit off their self-titled debut, poisons Billie Joe Armstrong's snotty delivery with barely concealed disgust. Jones' crush, it turns out, dares to date a dude who likes "Nintendo" and getting "stoned." What happens when he gets the girl? He blames her for the loss of something unnamed but apparently very important: "You fucked it out of me," he half wails, half sneers at a lover in "My Only Enemy." *The Art of Losing,* released after a pointless live disc, matches *American Hi-Fi,* cut of bitter fluff for cut of bitter fluff. "Run away from me," he snarls in "Beautiful Disaster." Happily. —N.C.

Tori Amos

★★★★½	Little Earthquakes (Atlantic, 1992)
★★★★	Crucify (EP) (Atlantic, 1992)
★★★★	Under the Pink (Atlantic, 1994)
★★½	Boys for Pele (Atlantic, 1996)
★★★½	From the Choirgirl Hotel (Atlantic, 1998)
★★★	To Venus and Back (Atlantic, 1999)
★★	Strange Little Girls (Atlantic, 2001)
★★★½	Scarlet's Walk (Epic, 2002)
★★★★	Tales of a Librarian: A Tori Amos Collection (Atlantic, 2003)

Tori Amos seemed to come out of nowhere in 1992. Though she'd materialized briefly four years before, fronting a best-forgotten hairspray band that also included future Guns n' Roses drummer Matt Sorum, her solo debut, *Little Earthquakes,* was one of that year's most improbable success stories. At the time, rock was mostly a boys' club, and a girl who played piano was out of the question. *Little Earthquakes* trumpeted a sea change, heralding the return of the singer/songwriter and helping to pave the way for Lilith Fair–types from Paula Cole to Ani DiFranco. Its songs are like confidences, full of intimate personal detail, sexual candor ("so you can make me cum/that doesn't make you Jesus"), and playfully surreal language that somehow makes emotional sense. The a capella "Me and a Gun" unflinchingly faces her own rape experience; like the love child of Kate Bush and Kurt Cobain, this is an arty singer/songwriter with a jagged alternative edge. This alt-worthiness was reinforced when her piano-and-voice version of "Smells Like Teen Spirit" (from the *Crucify* EP, which also includes Tori treatments of the Stones and Led Zep) garnered significant alternative airplay. Still, word of Amos spread like an exotic rumor until *Little Earthquakes* was suddenly platinum.

Under the Pink is nearly as good. It beats the sophomore jinx by taking more chances—breaking away from personal pain in "God" ("Do you need a woman to look after you?") and "Cornflake Girl," even as her lyrics dive deeper into abstraction. Her popularity had become so great that *Boys for Pele* entered the charts at #2, but this difficult album resists meeting comprehension even halfway. The pain displayed on "Hey Jupiter" is clear and convincing, but elsewhere the melodies can be as elusive as the words, an insular personal language that only the most committed fan will be motivated to decipher. The move to a band format on *From the Choirgirl Hotel* provides the focus that had been lacking on the previous album, and pushes her singing to carry as much meaning as the words. *To Venus and Back* is an ambitious, and only intermittently successful, double-CD set. The studio disc consists of new songs cut with a minimum of preproduction. The spontaneity suits the elementary lilt of "Concertina," but on more demanding constructs such as "Bliss" ("maybe we're bliss/of another kind") she and the band simply sound underrehearsed. The second disc, recorded live on her 1998 tour, passes over her signature songs in favor of B sides, obscurities, and neglected album tracks.

The mission of *Strange Little Girls* is gender reversal—Tori takes on a collection of songs ostensibly written from a male viewpoint and turns the tables. The only track that truly fulfills this premise is her hushed reading of Eminem's "'97 Bonnie and Clyde," which unmasks the full horror of his tale of dumping a murdered girlfriend's body. Tom Waits' "Time" and Depeche Mode's "Enjoy the Silence" at least play to her strengths, which cannot be said of her reconstructions of Neil Young, the Beatles, and Slayer. There's also a concept to *Scarlet's Walk,* its suite of songs chronicling a cross-country journey in the aftermath of 9/11. The booklet's color-coded roadmap isn't necessary; these songs *feel* like a triptych. Quietly intense, it is her most carefully crafted and inviting album since *Little Earthquakes,* the caressing melodies and relatively straightforward narratives of "A Sorta Fairytale" and "Crazy" acknowledging our overriding need for connection. *Scarlet's Walk* is an unexpectedly accessible gift from Tori Amos, an artist blessed with a substantial audience willing to follow wherever she may lead. No compilation could possibly please her famously fussy and proprietary audience, but *Tales of a Librarian* does a reasonable job of cherry-picking her catalogue, remixing many tracks and reworking some. —B.E.

Trey Anastasio

★★½	One Man's Trash (1998; Phish Dry Goods, 2002)
★★★	Trey Anastasio (Elektra, 2002)
★★★½	Plasma (Elektra, 2003)
★★★	Seis de Mayo (Elektra, 2004)

Phish guitarist Trey Anastasio's solo albums tend to explore areas that he avoids with his usual henchmen—which, considering his old band's eclecticism, is saying something. Officially, Anastasio's solo career began with the total-improv freakouts of 1996's *Surrender to the Air* (now out of print) and continued with two interesting but nonessential collections of demos and home-studio experiments, only one of which, *One Man's Trash,* remains in print. But for most intents and purposes, *Trey Anastasio* is the real beginning of our story, showcasing his singing, songwriting, and guitar-playing talents; songs with deceptively tight arrangements that often gambol into jazz-rock fusion territory (see Nicholas Payton's hot licks on "Last Tube").

Plasma captures Anastasio live with a 10-piece band, ditching some of his studio albums' complexity and replacing it with lengthy but rewarding jams. Much of the material on the all-instrumental *Seis de Mayo* was originally performed by Phish, but the tunes are rearranged for a variety of ensembles, including (on the closing "Guyute") a full orchestra. Ambitious but far from pompous, it's both an intriguing detour and, now that Phish is history, an indication of a possible future main route. —M.R.

Laurie Anderson

★★★	Big Science (Warner Bros., 1982)
★★★★	Mister Heartbreak (Warner Bros., 1984)
★★★	United States Live (Warner Bros., 1984)
★★★	Home of the Brave (Warner Bros., 1986)
★★★★	Strange Angels (Warner Bros., 1989)
★★★½	Bright Red (Warner Bros., 1994)
★★★	The Ugly One With the Jewels and Other Stories (Warner Bros., 1995)
★★★★	Talk Normal: The Laurie Anderson Anthology (Rhino, 2000)
★★★★½	Life on a String (Nonesuch, 2001)
★★★★	Live at Town Hall, New York City, September 19–20, 2001 (Nonesuch, 2002)

Performance artists are entertainers as much as they are artists—sometimes even more so—and as such, the skills Laurie Anderson most relies upon tend to be comic, not musical: timing, for instance; inflection; a sense of character that allows her to slip effortlessly out of her normal deadpan and into a believable secondary voice; and, of course, the ability to distill an idea in the fewest and most effective words possible. That's not to slight her music. Although Anderson isn't much of a singer (or, at least, wasn't until *Strange Angels*), she does know how to delegate, and fleshes out her compositions with meticulously produced—if melodically minimal—arrangements. In other words, her albums are competent and listenable, and the work they showcase can be wonderfully illuminating. In the end, however, what you're left with is closer to theater than to music, and frankly, theater isn't as suited to the home stereo as it is to the stage.

Even so, what got Anderson's career going was, ironically enough, a hit single: "O Superman." Granted, it was a hit only in the U.K., and owed its success mostly to the way its hypnotic strangeness transformed the mundane (an answering machine message) into the surreal. But it did understand the form and function of a single, and it fits in perfectly well with the rest of *Big Science.* Here, Anderson's speech is the central focus, and her musical support—keyboards, percussion, and occasional saxophone or bagpipe—is skeletal and hypnotic, relying mostly on repetition and teasingly attenuated phrases. All of its selections came from Anderson's massive theater piece *United States,* which is offered in its entirely on *United States Live,* a four-and-a-half-hour marathon that heaps pronouncements, gags, epigrams, and shaggy-dog stories into an amiable, enigmatic statement on America's inscrutability. Despite its epic sprawl, the set moves along nicely—although it's doubtful many listeners will want to plough through it more than twice.

Anderson's albums aren't always so ambitiously conceptual, and as such generally make for somewhat easier listening. *Mister Heartbreak* has the shiny patina of pop, thanks to Bill Laswell's eclectic, atmospheric production on "Sharkey's Day" and "Sharkey's Night," not to mention the Peter Gabriel collaboration

"Excellent Birds" (which can also be found, under a slightly different title, on his album *So*). The soundtrack *Home of the Brave* remakes the Sharkey songs and features some attractive guitar work by Adrian Belew, although the Nile Rodgers–produced "Language Is a Virus" is more clever than successful.

Strange Angels finds Anderson moving toward a more musical approach, singing more than talking and relying on meatier, more melodic arrangements. While that doesn't completely transform these words-and-music constructions into songs, the cheerful melodies and flowing, Caribbean cadences make it a remarkably engaging and approachable album. With *Bright Red,* however, she returns to material that is more word-focused and atmospheric (although with Brian Eno as producer, the atmospheres are exquisite). Still, even that is more "pop" in approach than *The Ugly One With the Jewels,* a collection of pieces drawn from her book *Stories From the Nerve Bible.* It's witty, captivating, and slyly musical, but more the musical equivalent of an illuminated manuscript than a pop album. (*Talk Normal* neatly and intelligently summarizes Anderson's recorded output to this point.)

With *Life on a String,* Anderson returns to the sort of song-form material she explored in *Strange Angels.* It's a remarkable piece of work—lush, evocative, provocative, and unexpectedly catchy. While still not pop in the conventional sense, it uses the pop vocabulary with a knowing deftness, pulling the listener in even as she undermines her audience's expectations. *Live at Town Hall* takes material from that album, as well as assorted Anderson "oldies," and refracts them through the lens of the 9/11 terrorist attacks on New York and Washington, D.C. (which occurred mere days before these performances). As always, her timing is excellent. —J.D.C.

Angry Samoans

★★½	Live at Rhino Records (Triple X, 1990)
★★★★	The Unboxed Set (Triple X, 1995)
★★½	The 90's Suck & So Do You (Triple X, 1999)

Though not featured in the film *The Decline of Western Civilization,* the Angry Samoans were as much a part of the early L.A. hardcore scene as more celebrated bands such as X, Fear, Black Flag, the Germs, and the Circle Jerks. Formed in 1978 by two rock critics, "Metal" Mike Saunders and Gregg Turner, the Samoans were as offensive as they were tuneful. Only East Coast counterparts the Meatmen came close to rivaling the homophobia, misogyny, and generally retarded sexuality on early Angry Samoans cuts such as "Homo-Sexual," "They Saved Hitler's Cock," and "Steak Knife."

Fueled by garage-rock riffs baked in pop charm, the Samoans' music was more advanced than the dumb metal of the Meatmen or almost any other hardcore band. As a result, the band quickly alienated itself from the dogmatic scene that birthed it, and later releases focused more on the band's love of bubblegum pop. The *Unboxed Set* includes on a single disc almost everything the band recorded during its glory years. *Live at Rhino* captures an early incarnation of the band doing a sloppy set of originals and covers. Though the original band split in 1988, Saunders, with a largely new lineup, revived the Samoans name for *The 90's Suck & So Do You,* which offers less than 15 minutes of inconsequential tracks. —R.A.

The Animals

★★★★½	The Best of the Animals (1966; Abkco, 1988)
★★	House of the Rising Sun (1970; Brentwood, 2002)
★★★½	Before We Were So Rudely Interrupted (1977; Repertoire, 2002)
★★★	Ark (1983; Castle, 1997)
★★★½	The Best of Eric Burdon and the Animals (Polydor, 1991)
★★	In the Beginning (Sundazed, 1993)
★★★	The Best of Eric Burdon and the Animals (PolyGram Special Markets, 1997)
★★★★½	Animalisms (Repertoire, 2000)
★★	Taken Alive (Fuel, 2002)

Monstrously talented, the Animals were second only to the Rolling Stones as British purveyors of R&B in the '60s. But internal divisiveness dogged them from the start, and while popular during their short peak, they never mustered the survivalist smarts of the Stones, and their songwriting fell consistently short of Jagger and Richards'. England never produced a finer singer, however, than Eric Burdon at his best. Hailing, as did his bandmates, from Newcastle-on-Tyne, Burdon was the archetypal working-class hero, a short, boozing scrapper gifted improbably with an amazing voice. Blues and R&B perfectly suited his skills and sensibility; the U.K. equivalent of Mitch Ryder, he sang black music with almost eerie assurance. Searching for a singer, the Alan Price Combo (Price: keyboards; Hilton Valentine: guitar; Chas Chandler: bass; John Steel: drums) enlisted Burdon, guaranteeing themselves success, but also tension—Price would soon prove no match for the charismatic Burdon. So frantic were the group's early stage shows that they renamed themselves the Animals, and in their reworking of the blues standard off Dylan's first album, "House of the Rising Sun," they gained a #1 hit with only their second single. The band then scored with a brilliant cover of Nina Simone's "Don't Let Me Be Misunderstood" and with Mann-Weill's "We Gotta Get Out of This Place," both featured on the Abkco *Best of. Animalization,* however, remains their most fully realized album—effects-heavy and menacing, the guitar work on Goffin-King's "Don't Bring Me Down" is Valentine at his toughest; "Gin House Blues" is Burdon singing with frightening authority; "Inside—Looking Out" builds to a ferocious climax (this 1966 masterpiece is repackaged along with "Animalism," another gem from that year, on Repertoire's *Animalisms*). Although Price left in 1965, the substitution of classically trained Dave Rowberry ensured that organ and piano would contribute heavily to the group's distinction—and the playing of the other Animals was always first-rate. But Burdon was the ace. Remarkable phrasing and unwavering focus characterized all of his work with the band; *The Best of the Animals* covers most of the essential stuff, from the anthemic "It's My Life" to their snappy last single, "See See Rider"—but the compilation isn't really extensive enough to do them justice. And it's a good idea to supplement it with the live *In the Beginning,* great in-concert fare from 1963.

In September 1966, the original Animals fell apart. Burdon was becoming enraptured with nascent psychedelia and gobbling acid; so LSD-addled had Valentine become that he began believing he was Jesus; and the rest of the group was simply exhausted. A new band, Eric Burdon and the Animals, was the result: Taking along only drummer Barry Jenkins (replacing Steel, who had left in 1966), Burdon moved to California and left R&B behind. Polydor collected the trippy stuff on *The Best of Eric Burdon and the Animals* (don't confuse it with the lesser album of the same name on PolyGram Special Markets). The original Animals got back together in 1977 on *Before We Were So Rudely Interrupted.* A better reunion album than most, its highlight is Burdon's tortured version of "Many Rivers to Cross." Another comeback bid, *Ark,* from 1983, was less successful. —P.E.

Anthrax

★★	Fistful of Metal (1984; Megaforce, 1995)
★★★	Armed & Dangerous (1984; Megaforce, 1995)
★★★½	Spreading the Disease (Island, 1985)
★★★	Among the Living (Island, 1987)
★★★½	I'm the Man (Island, 1987)
★★★	State of Euphoria (1988; Island, 1990)
★★★½	Persistence of Time (Island, 1990)
★★★½	Attack of the Killer B's (Island, 1991)
★★★	Sound of White Noise (Elektra, 1993)
★★★	Anthrax Live: The Island Years (Island, 1994)
★★★	Stomp 442 (Elektra, 1995)
★★★★	Return of the Killer A's: The Best of Anthrax (Beyond, 1999)
★★★½	Madhouse: The Very Best of Anthrax (Island, 2001)

Up until *I'm the Man,* Anthrax seemed a perfectly typical thrash act. *Fistful of Metal* (recorded with original lead singer Neil Turbin) finds them starting out playing fairly straightforward hard rock, while the version of "God Save the Queen" on *Armed & Dangerous* (featuring subsequent vocalist Joe Belladonna) points up its debt to punk. *Spreading the Disease* shows off its chops (check the "Theme from *Masterpiece Theatre*" quote in "Gung-Ho"), while *Among the Living* emphasizes its ferocity ("Caught in a Mosh," "Efilnikufesin") and *State of Euphoria* its uncompromising point of view ("Make Me Laugh," "Schism").

I'm the Man, however, not only features a rap tune—"I'm the Man"—that beats the Beastie Boys at their own game, but also balances it with a Black Sabbath cover. In other words, not only was the group down with rap, but it refused to recognize a difference between rap and thrash—a powerful gesture in the pre–rap rock era.

But there's the rub. Even though Anthrax's subsequent hip-hop hit, a duet version of "Bring the Noise" with Public Enemy (included on *Attack of the Killer B's, Return of the Killer A's,* and *Madhouse*) is clearly a landmark performance, Anthrax was largely played out by the early '90s. The band hit its peak with *Persistence of Time,* which adds an epic sweep to "Blood" and "H8 Red," expands its social commentary with "All in the Family" (about inbred prejudice), and even has a Joe Jackson cover ("Got the Time"). *Attack of the Killer B's* maintains that plateau, thanks to "Bring the Noise" as well as a nasty country-style attack on record labeling ("Startin' Up a Posse"). But despite its clever title, *Sound of White Noise* opens no new ground for the band, while *Stomp 442* (the title of which refers to the displacement of a classic Oldsmobile engine) delivers more punch than it does memorable material.

Of the two best-ofs, *Madhouse* takes a straightforward anthology approach, while *Killer A's* offers several remixes and includes illuminating commentary in the liner notes. —J.D.C.

Antipop Consortium

★★½	Tragic Epilogue (75 Ark, 2000)
★★★½	Arrhythmia (Warp, 2002)
★★	Antipop Consortium vs. Matthew Shipp (Thirsty Ear, 2003)

Vets of New York's underground hip-hop and poetry scenes, High Priest, Beans, and M. Sayyid formed

Antipop Consortium circa 1997 with ambitions of bringing the unbridled creative freedom of the avant-garde—jazz, poetry, who knows—to rap. Though they never exactly broke free from the chains of the form, they went about as far with experimental hip-hop as anybody did in the '90s, or is ever likely to do, with stuttering, uncomfortable beats and torrents of free-associative lyrics that are always just a few quick syllables away from total incomprehensibility.

Tragic Epilogue is a thorough but joyless manifesto of the Antipop philosophy, with deliberately amateurish electronic programming, simple yet uncomfortably off-kilter beats, and abstract, rambling lyrics seemingly straight out of the poetry slam. The pseudoscientific jargon and pretense of futurism gives them a unique way to boast and taunt, but after a while it becomes apparent that they're simply self-satisfied nerds. "The world is flat, ha ha, you fell off/Hoping that the laws of gravity will bring you back to Earth/If not, okay, your words fall lighter than air/So throw it away and disappear to a black hole, son" is a typically shrugworthy line: while impressive in its dense poetics, it's meaningless.

They mended things considerably with *Arrhythmia,* which manages to be funky and catchy—uh-oh, sounds like pop—without compromising the essential weirdness of their vision. Every line is a nonsequitur, and some of it is even quite funny. "Mega" ends with grandiose operatic cadences, and the rhythm track of "Ping Pong" is built, as though on a dare, around the sound of balls bouncing between the speakers, a trick used by the Beastie Boys in *Paul's Boutique* but not as cleverly folded into the rhythm as here, a testament to the skills of their producer, Earl Blaize.

The group broke up in mid-2002 but early the next year issued—without Sayyid—a collaboration with Matthew Shipp, one of the most adventuresome jazz pianists to emerge in the '90s. Shipp finds some fascinating points of contact with the slippery Antipop grooves, but for the most part the project is unproductive. Not exactly a tragic epilogue, but an unfortunate one nonetheless. —B.S.

Aphex Twin

★★★★	Analogue Bubblebath (EP) (1991; TVT, 1994)
★★★	Analogue Bubblebath II (EP) (Rabbit City, 1991)
★★★★	Selected Ambient Works 85–92 (1992; PIAS, 2002)

★★★★	Drukqs (Warp/Sire, 2001)
★★★	26 Mixes for Cash (Warp, 2003)

Polygon Window

★★★	Surfing on Sine Waves (1993; Warp, 2002)

No one looms larger in '90s electronic music than Cornwall's own Richard D. James, a.k.a. Aphex Twin, a young man who started his career rewiring his keyboards to make acid-house tracks and ended up a quasi-religious figure to followers of electronica. James' output is influential and frustrating in equal parts, following the arc of a gifted child's primary school report card. James often starts with a brilliant idea, plays it out halfway and then drops it, bored. Scattered through his catalogue are ideas other groups took up later with more success. His reputation in the press as an eccentric and eternal adolescent is somewhat borne out by tendencies in his work: the obsession with childhood ("milk," "child," and "boy" show up in titles); samples of children's voices; and a sonic palette that recalls nursery mobiles and toys. The young-man aesthetic is also manifest in his detailed, complex compositions and flashes of bathroom humor. This bedroom auteur actually sounds like he's in his bedroom, giggling and farting to his infamy. But that doesn't mean he isn't a genius—just that the act of making records often seems to be secondary to the act of simply being Richard James. (If anyone ever cried out for a well-curated best-of, it's Dr. Aphex.)

The title track of his 1991 debut EP, *Analogue Bubblebath,* was a juicy redrawing of ambient techno aesthetics, with hints of the mania to come in the track "AFX2." Soon, James released the effective but less innovative acid-house track "Digeridoo," started his own label, Rephlex, and got signed to Belgian label R&S. (Most of this period of work is compiled on *Classics.*) This is the last time James sounds like he's part of a movement other than his own—"Flaphead" is an anonymous acid-house track and "Polynomial-C," though effective, could have been any number of people working in the ambient techno field in 1991. The germs of what's to come are here—the distorted drums of "Phloam" prefigure later tracks such as "Ventolin" (and much of Autechre's *Anvil Vapre* EP), and "Quinophec" presages the soft, pastoral sounds that Aphex uses for much of 1994 and 1995 (and out of which Boards of Canada have made an entire career). "Isopropanol" marks the debut of the children's voices and hectic programming that would become his dominant tactic in the late '90s.

Prolific and fond of games, James released new albums almost instantly under different names. *Caustic Window* is James still working within the confines of the dance community. Both "Joyrex" tracks take acid house's 4/4 foundation and twist it into knots without losing the beat. The remainder is, confusingly, not that different from other James records of the time, with the exception of the distorted beats on "Astroblaster" and "AFX 114." A title such as "On the Romance Tip" suggests that Aphex is having a laugh, except that it also sounds like many of his "serious" tracks. Not for the last time, it is hard to tell which bits are piss-takes and which are the "real" tracks. *Selected Ambient Works 85–92* shows Aphex mostly tossing the jokes and doing some of his best work, floating between dub and techno but never settling. Tracks like "Tha" and "Ageispolis" opened up ambient syntax, hinting at work from later practitioners such as Pole and the Basic Channel family in Berlin. James' virtuosity is clearest, paradoxically, when he isn't being particularly virtuosic and lets his innate sense of hierarchy and pace drive his sounds.

Signing to Warp, the Motown of '90s electronic music, Aphex showed up first as Polygon Window with the *Surfing on Sine Waves* album. It's an archetypal James affair, beginning brilliantly with "Polygon Window" and "Audax Powder," one of his best tracks, then wandering through dodgy interrogations of beatmaking ("Quoth") and sappy soundtracks ("Is It Really Me?"). The last vestiges of acid house and off-the-rack ambient are gone, though, and the Aphex everyone knows begins to emerge.

Then, to keep everyone off balance, comes *Selected Ambient Works, Vol. 2,* an almost beatless two-disc series of untitled compositions. Some thought it was a joke, others threw themselves at James' feet. Roughly in the ambient genre as Eno first imagined it, *Selected* simply drifts with lots of minor-key themes and digital reverb. Occasionally beautiful, it does sound sometimes as if James hooked up a loop, put it through a reverb device, and went out to lunch. (Not that there's anything wrong with that.) Another puzzler. *I Care Because You Do* is actually of a piece with *Selected,* adding an increasingly active drum foundation (inspired, in part, by the increasing presence of drum and bass in the UK). String sounds begin to creep in on tracks such as "Icct Hedral," and his overall sound becomes denser and stranger. "Ventolin" is the ghost of "Phloam" beefed up brilliantly. (Often missed is James' own annotations of his track listings, indicating that some of the tracks date back as far as 1990. The best are the newest, from 1994.) The artwork is another James joke: Tagged as a "faceless" techno artist, James strikes back with the album cover, an oil painting of himself, smiling. The sincerity of the title itself is in doubt, but James' liking of his own face isn't. It will show up again, many times.

The Richard D. James Album is a rollicking combination of hyperkinetic drum-and-bass patterns, silky strings, and crosstalking oddities. "Girl/Boy" was something of a hit in the U.K., and the vaguely obscene lyrics of "Milkman" got James even more press as an enfant terrible. By this point, Trent Reznor and Philip Glass were both calling to work with James, and it was obvious that his brio and skill could read to people far removed from dance music and bedroom electronics. (James' collaboration with Glass, as well as some other singles, are available on the solid *51/13* compilation.)

Two of James' best works are the EPs that followed *RDJ, Come to Daddy* and *Windowlicker.* Both were driven to market by controversial videos directed by Chris Cunningham, each making extensive use of a latex mask of James' face. (We won't spoil the effect, but it is quite likely that one or both videos will offend you.) In smaller doses, James' work improves. "Come to Daddy" is NIN gone nerdy but too comic to be really scary, while the delicate "Flim" and the athletic "Bucephalus Bouncing Ball" are two of James' most important tracks. "Windowlicker" is possibly the Aphex apex, a deft, inviting, and weird blend of all his interests. Start here.

Drukqs is a two-disc set dedicated to testing how far James can push his aesthetics, from total programming nightmares ("Omgyjyaswitch 7") to murky death dub ("Gwely Mernans"). To these extremes, James adds a series of very short piano and harpsichord pieces apparently inspired by Satie. They break up the action well; the second disc of *Drukqs* is his best-sequenced chunk of work. Weirdly dismissed by many, *Drukqs* is often spectacular.

There was an oft-repeated, possibly apocryphal story about James and his ubiquitous remixing services in the '90s. A messenger from an unnamed label showed up to retrieve a promised Aphex Twin remix. Delinquent but unfazed, James allegedly handed them a DAT off the shelf and took the cash. Nobody knew better. The title *26 Mixes for Cash* doesn't exactly dispel rumors of cynicism such as this, nor does some of the work. For every amazing piece such as his remix of Wagon Christ's "Spotlight" or the remix of 808 State's "FlowComa," (simply listed as "Remix by AFX") there are five others that just go through the motions. As with all AFX product, the high points are great (the "Windowlicker acid edit" is unusually organic and funky), so it's up to you to decide if you really need your cash or the mixes. Ultimately, Aphex is essentially '90s—the perfect music for working at a desk and watching the money roll in: unfailingly intelligent, occasionally astonishing, but often lighter than the air that surrounds it. Bubbletronica. —S.F.J.

Aphrodite

★★★½	Takeover Bid: Round One (Razor & Tie, 1998)
★★★★	Aphrodite (V2, 1999)

Few dance producers reign over their subgenre as unquestionably as Gavin King dominates jump-up. Fusing reggae-style intensity with funk beats as hard as they are hyper, the results are similar to dancehall, but without those muppet-voiced Jamaican dudes threatening to off batty boys. Aphrodite's self-titled American debut is a compilation of older tracks that still sound fresh. The shifting bass lines offer melodies before King drops the proceedings into freefall. Snippets of melodic ornamentation—electronic seagulls, soul saxophones, unmoored organ vamps—surface then plunge away beneath the breakbeat surf. And the awesome "B.M. Funkster" is jump-up's defining moment, sampling a loping horn riff from James Brown protégé Marva Whitney's "Unwind Yourself" for maximum funk impact.

As with most dance music producers, King has scattered more singles, mixes, and remixes about than any album guide can take into account. For starters, though, *Takeover Bid* is an ace mix disc. King has also masterminded numerous remixes—of Nine Inch Nails, among others. His self-released import tracks are worth hunting for, as are tracks released under the names Alladin and Amazon II—pseudonyms are yet another way the dance underground tries to elude you. This time, at least, it's worth the quest. —K.H.

Fiona Apple

★★★	Tidal (Epic, 1996)
★★★½	When the Pawn Hits the Conflicts He Thinks Like a King What He Knows Throws the Blows When He Goes to the Fight and He'll Win the Whole Thing 'Fore He Enters the Ring There's No Body to Batter When Your Mind Is Your Might So When You Go Solo, You Hold Your Own Hand and Remember That Depth Is the Greatest of Heights and if You Know Where You Stand, Then You Know Where to Land and if You Fall It Won't Matter, 'Cuz You'll Know That You're Right (Epic, 1999)

Fiona Apple, the waiflike singer/songwriter with a whale of a voice, was only 19 when her debut album came out in 1996. By then the New York native had already been writing songs for seven years and playing piano for eleven. Seductively miserable, *Tidal* was packed with jazzy torch songs and twitchy electronic flourishes. It was remarkably mature stuff, on par with the music Alanis Morissette and Tori Amos were releasing at the time, and two cuts—"Shadowboxer" and "Criminal"—became hit singles. Apple was open about the fact that she had been raped years earlier, although in songs like "Sullen Girl" ("But he washed me ashore and he took my pearl—and left an empty shell of me"), her agony was better communicated by her throaty, soulful voice than by her often sophomoric lyrics. Her bratty rant at the 1997 MTV Music Awards ("This world is bullshit!") proved again that this precocious Maya Angelou fan wasn't very economical with or smart about her choice of words. Then came her second album, with a 90-word title that does not adequately represent how much Apple had improved since *Tidal:* As her own turn of phrase in "A Mistake" suggested, she had "acquired quite a taste for a well-made mistake," trading two-dollar words for more subtle phrasings. On "Fast As You Can," and "Get Gone," she toys with lopsided rhythms and her voice turns more defiant and pissed-off, more self-aware and playful than on *Tidal.* Though it is more musically complex and melodically advanced, *Pawn* keeps the focus on Apple's sultry voice and moody piano playing, which consistently make up for any of her dysfunctional self-indulgence. —J.E.

The Apples in Stereo

★★★½	Fun Trick Noisemaker (spinART/Elephant 6, 1995)
★★★½	Science Faire (spinART/Elephant 6, 1996)
★★★★	Tone Soul Evolution (spinART/Elephant 6, 1997)
★★½	Her Wallpaper Reverie (spinART/Elephant 6, 1999)
★★★	The Discovery of a World Inside the Moone (spinART/Elephant 6, 2000)
★★★	Let's Go! (EP) (spinART, 2001)
★★★½	Velocity of Sound (spinART, 2002)

Led by Robert Schneider, a writer/producer who can practically make two tin cans and a comb sound like *Revolver,* the Apples in Stereo are the core of the Elephant 6 Recording Company, a loosely affiliated set of bands in love with the psychedelic hues of '60s pop (others include Neutral Milk Hotel and Olivia Tremor Control). *Fun Trick Noisemaker* is Elephant 6's statement of purpose, bursting with inventiveness and energy, and graced with gleefully lysergic arrangements and Beach Boys–inspired harmonies. *Science Faire* collects a few earlier, rawer singles, recorded at home on a four-track tape machine—if you heard them on an AM radio, though, you'd never know the difference.

With *Tone Soul Evolution,* the Apples got to play in a big studio for the first time, and you can hear their delight with their new toys—they layer on track after track of horns and piano and doot-doot-doot backing vocals like they're determined to use all 24. Schneider's songs aim for the simple elegance of the classic pop he adores, and usually get there; "Seems So" and "Shine a Light" are almost impossibly catchy, and he scatters them with sweetly bent guitar solos that conjure up vintage George Harrison. The subsequent *Her Wallpaper Reverie*—seven songs, plus eight little instrumental doodles—gets lost in suspicious fumes in much the same way as its lesser psychedelic ancestors, although it does include the stately *Magical Mystery Tour* homage "Strawberryfire."

The Discovery of a World Inside the Moone raises the stakes again—the production compresses half an hour's worth of classic-rock-radio harmonies, hip-swinging beats, and guitar crunch into every three minutes. After the opening slam dunks of "Go" and "The Rainbow," though, the tunes aren't as memorable as the lush, varied recording implies they are. *Let's Go!* is a nifty quickie for kids, featuring two versions of "Signal in the Sky," the irresistible rocker they recorded for TV's *The Powerpuff Girls,* plus a sloppy-but-fun live cover of the Beach Boys' very Apples-esque "Heroes & Villains."

The Apples ditched the fancy production and streamlined their boogie on *Velocity of Sound.* Schneider's new model seems to be *Nuggets*-style caffeine-buzz garage psychedelia, drummer Hilarie Sidney's two tunes match his hook-for-hook, and the band's got its fuzz pedals cranked all the way up. Average track time: 2:38. —D.W.

Archers of Loaf

★★★½ Icky Mettle (Alias, 1993)
★★★★ Vee Vee (Alias, 1995)
★★★½ The Speed of Cattle (Alias, 1996)
★★★½ All the Nations Airports (Alias/Elektra, 1996)
★★★ White Trash Heroes (Alias, 1998)
★★★ Seconds Before the Accident (Alias, 2000)

Every college town in America shelters a gaggle of underemployed noisemakers throttling haphazardly tuned guitars in the hope some unkempt sense will waft out of the din. But these unfortunately named North Carolina smart guys were distinguished by the precision of their barrage. Here was a band so in control of its crosscut dissonance and go-go-*stop* rhythms that even its obligatory grab bag of B sides and leftovers, *The Speed of Cattle,* stands as a solid, listenable whole.

Icky Mettle is a sparring match between the two cannily dissonant guitars of two cannily dissonant Erics, Bachmann and Johnson. Darting upward, dipping downward, shouldering each other for space in the mix, these serrated lines jut, slash, sear, and occasionally fit their teeth into each other's groove. To be heard over this clash, Bachmann must bark the verbal piecemeal of his lyrics ("All I ever wanted was to be your spine!", "There's something wrong with my toast!") so vehemently that they cohere into rousing shout-along catchphrases in spite of themselves.

With the roiling swell of *Vee Vee,* the Archers sculpted a lively testament to heroic failure. Not only does a mob forcibly drown the "frontman/For the world's worst rock and roll band," but before we get to the rousing finale, "Underachievers March and Fight Song," Bachmann is already hoping that "the worst is yet to come!" Prophetic? Maybe, but only because the band peaked so early. By the time Alias scored major-label distribution, the Archers were *so* over the sort of postpunk anthemry that might have gotten them noticed: Rife with prickly images of terrorism and consumer fraud, *All the Nations Airports* was arid, arty, and angular.

By *White Trash Heroes,* Bachmann's voice was largely blown. (*Accident,* recorded around this time, showcases a great live band hobbled by this vocal setback). This regrouping album, sometimes soft and mournful, adorned with elegiac overtones and brooding synthesizers, offers a ruminative coda to an otherwise screechy career. Going out not with a bang but a whimper never sounded so poignant. —K.H.

Arrested Development

★★★★ 3 Years, 5 Months & 2 Days in the Life of . . . (Chrysalis, 1992)
★★★ Unplugged (Chrysalis, 1993)
★★½ Zingalamaduni (Chrysalis, 1994)
★★★ Extended Revolution (Stateside, 2003)

Speech

★★ Spiritual People (Vagabond, 2002)

Inspired by the political awareness of Public Enemy and the spiritual missives of the Native Tongues tribe, Atlanta-based collective Arrested Development came out of nowhere in 1992 with what was then a novel sound: consciousness-raising hip-hop that was funky, easygoing, and instantly accessible.

Their debut, *3 Years, 5 Months & 2 Days In the Life of . . .* —a reference to the amount of time it took the group to secure a recording contract—is pure audio delight from start to finish, a triumph of smartly turned rhythm tracks and the mellow verbal dexterity of rapper Speech, who, on the imploring "Give a Man a Fish," advises listeners, "Malt liquor got you licked, it's your powerful master" and "Raise your fist but also raise your children." One of the rare documents that's equally successful as a political statement and as pop art, *3 Years* covers a daunting range of topics and musical styles, rehabilitating Sly Stone ("People Everyday" is a canny update of "Everyday People") and advocating for old-fashioned morality ("Fishin' 4 Religion"), humanizing homelessness ("Mr. Wendal"), and envisioning a utopia ("Tennessee"). The album sold over 4 million copies and won several Grammys, but perhaps more important, it became the model for much of the so-called enlightened rap that would become an alternative to the gangsta-thug material that ruled much of the '90s.

Alas, the group never again reached the heights of *3 Years.* The quickie followup *Unplugged* is predictably erratic—though Arrested Development toured, they were never revered for their live show. The official studio followup, 1994's *Zingalamaduni,* is loaded with rhetoric, and more than a little strident: Despite several idyllic melodies, tunes such as "Ache'n for Acres" and "In the Sunshine" sound pedantic and forced. Speech made one forgettable solo record, and in 2003 he participated in an Arrested Development remix project, *Extended Revolution,* which boasts several intense reworkings from electronica pioneer Paul Oakenfold. —T.M.

Ashanti

★★	Ashanti (Murder Inc., 2002)
★½	Chapter II (Murder Inc., 2003)

Ashanti was better than her first album indicated. Onstage she was a natural, sultry and light, at ease and with real power in her young voice. Only under the guidance of Murder Inc. kingpin Irv Gotti could a hot diva whispering "Baby, baby, baby, baby!" sound so damn boring. Ashanti's self-titled debut followed her appearances in star-making duets with Ja Rule ("Always on Time") and Fat Joe ("What's Luv"). The sound was strictly radio-ready R&B circa 2002, up-to-date and anonymous, and no threat creatively to contemporaries Alicia Keys and India.Arie. She curses undependable men on "Foolish" in a girlish vamp submerged in gloss, but taps a small vein of funk for "It's Over." Ashanti sounds most genuine on "Dreams," a delicate ballad that edges toward Stevie Wonder's sentimental side. But it's not enough to turn soul clichés into something real.

Chapter II is even lighter, without a single new trick but with plenty of boasting and dumb chatter between songs. "Then Ya Gone" is a torrid and potent funk duet with rapper Chink Santana, while "The Story of 2" is a distant echo of ancient girl-group soul. Too much of the rest is empty of feeling, turning this Murder Inc. princess into just another lovesick diva tumbling back down the charts. —S.A.

Asian Dub Foundation

★★★½	Facts and Fictions (1995; Beggars, 2002)
★★★½	Rafi's Revenge (London, 1998)
★★	Conscious Party (Virgin France, 1998)
★★★½	Community Music (Virgin France, 2000)
★★★	Frontline 1993–97: Rareities and Remixes (2001; Beggars, 2002)
★★½	Enemy of the Enemy (EMI, 2003)

Though it has not enjoyed quite the exposure or recognition of fellow tablas-'n'-breakbeats Londoners Talvin Singh and Cornershop, this collective—formed in 1993 at a music-technology workshop run by bassist Dr. Das (Aniruddha Das), with civil rights worker and DJ Pandit G (John Pandit) and a young Bengali rapper named Master D (Deeder Zaman)—has set a high standard for its uncompromising politics and clever mingling of very old and very new musical traditions. With postcolonial fury and a sample box, the group has made some of the most righteously and intelligently angry pop music to come out of England since the Clash, eagerly taking up the flame of anti-imperialist, multicultural rock in a new decade and a tense new world order.

Fact and Fictions finds ADF's sound—frenetic reggae meets drum-and-bass beats—fully formed. "We ain't ethnic, exotic, or eclectic/The only 'E' we use is electric," Master D barks in "Jericho," a song boldly introduced as speaking "for the consciousness of the nation."

The heat builds on *Rafi's Revenge,* with yet more controversial topics and a sound that pushes the bubbling tabla drums, slippery guitar patterns, and frenzied rhythms to explosive heights. "Naxalite," one of the most impassioned political songs since U2's "Sunday Bloody Sunday," cries, "We must never give up/Until the land is ours . . . / 'Til we have taken the power."

A mediocre live disc *(Conscious Party)* held the place while ADF recorded its most carefully articulated and varied album, *Community Music.* Toning down the inflammatory stuff, the group makes more cogent and nuanced social criticisms than ever before. "Real Great Britain" castigates the "shoegazer nation" that won't look its problems in the face, while "Collective Mode" and "Memory War" call for unity and truth in the face of propaganda.

Master D left the group at the end of 2000, and following a collection of remixes and miscellany, the group released *Enemy of the Enemy,* with a series of guest MCs taking D's place. None of them match his wild, lispy charm, and underwhelming guest spots by Sinéad O'Connor and Radiohead guitarist Ed O'Brien don't help either. —B.S.

The Association

★★½ The Association's Greatest Hits (Warner Bros., 1968)
★ The Association's Golden Heebie Jeebies (Edsel, 1987)
★★ Just the Right Sound: The Association Anthology (Rhino, 2002)

White-bread, saccharine, fake flower-power shmaltz. Atop elevator-music instrumentation, the Association crooned. While hits such as "Windy" and "Along Comes Mary" convey the daffy zing of toothpaste ads, and "Cherish" tingles as a makeout classic, the band bombed on anything more ambitious, such as, for example, the antiwar dirge "Requiem for the Masses" or the Pepsi Generation anthem "Enter the Young." With more than 50 cuts, the Rhino collection induces sugar shock. —P.E.

Ass Ponys

★★★★ Some Stupid with a Flare Gun (Checkered Past, 2000)
★★★½ Lohio (Checkered Past, 2001)

"Standing on the highway, pants around my knees/I'd write her name out on the road but I can't piss 'Denise.' " That classic couplet is now largely lost to history. The Ass Ponys' *Electric Rock Music,* the album that gave us that boozy confession, is, like the rest of the Ponys' '90s output, shamefully out of print. In fact, by the time these Cincinnati oddballs resurfaced in 2000, they were little more than a historical footnote, a band fondly remembered by a handful of critics and college-radio jocks. The Ponys' loose, rootsy jangle coexisted with a dark undertow of dissonance, a split personality that neatly matched Chuck Cleaver's deft sketching of mid-American weirdos.

Fine as they were, though, most of those early records lacked the rocket-launch freewheeling of guitarist Bill Alletzhauser, whose presence on *Flare Gun* inspires the rhythm section to a crunch rarely even approximated in the band's heyday. Perhaps fearful of being pegged as a novelty artist, Cleaver shies away from outright comedy here, but his vignettes of loners with overactive imaginations retain a quiet emotional pull without straining toward melodrama.

Lohio was more varied yet, with drum flurries of almost Who-like intensity mixed in among looser, countrified shuffles. Still, if you ever run across a cutout or used copy of *Electric Rock Music,* snatch it up. Until then, feel free to write disgruntled letters to whoever supervises A&M's back catalogue. Oh, and maybe ask 'em what happened to the Feelies' *Time for a Witness* while you're at it. —K.H.

Chet Atkins

★★★★ Chet Atkins in Hollywood (RCA, 1959)

★★★ Tribute to Bluegrass (BMG Special Products, 2002)

with Mark Knopfler

★★★★ Neck and Neck (Columbia, 1990)

Like Nashville's other ace instrumentalists (Floyd Cramer, Boots Randolph, Charlie McCoy), guitarist Chet Atkins spent a long time releasing albums that showcased remarkable skill—in contention with syrupy string arrangements, baby-talk back-up vocalizing, and mediocre material. That said, his technical dexterity and trademark twangy fluidity were such that a goodly amount of that mass of material (he began recording in the late '50s) rewards exploring. *In Hollywood* is a good place to start—such smooth fare as "Let It Be Me" and "Greensleeves" shows off the virtuosity that earned Atkins the name of "Mr. Guitar." *Picks on the Grammys* continues in the same vein: hits from 1967 to 1996 ably covered by the master. For an exhaustive serving of classic early Atkins, guitar fanatics will drool over *Galloping Guitar,* a massive box set. One Way has also done an excellent job of assembling twofers of vintage Chet; *Hum and Strum Along With Chet Atkins/The Other Chet Atkins* is a nice novelty featuring Latin tunes. *Almost Alone* is great six-string work, almost unaccompanied. Both *The Essential* and *Guitar Legend* are fine compact overviews of Atkins at his solo best, but some of his more exciting works are collaborations. *Chester and Lester* pairs him with Les Paul, and a sweet fire gets going between the two old stalwarts.

Mainly turning out hokum during the '70s, Atkins revived in the next decade. Helped out by bassist David Hungate and keyboardist Darryl Dybka, he released a series of albums that, for all their jazz-lite glossiness, surrounded him with very accomplished players. A guitar conclave, *Stay Tuned* joins him with Earl Klugh, Steve Lukather, George Benson, and Dire Straits mainman Mark Knopfler, and, while the tunes are formulaic, the playing is impressive. A followup, *Sails,* is easy listening raised to an artform. *Neck and Neck* is irresistible—with Atkins and Knopfler as equal partners, this labor of love ranges in style from Stephane Grappelli to Don Gibson. Its strength, however, lies in its country numbers—on a few of which Atkins actually sings (quite creditably). *The Day Finger Pickers Took Over the World* is Atkins acoustically dazzling, trading riffs with Aussie composer/guitarist Tommy Emmanuel. —P.E.

Juan Atkins

★★★★ Wax Trax! Mastermix, Vol. 1 (TVT/Wax Trax!, 1998)
★★★ Legends, Vol. 1 (OM, 2001)

Model 500

★★★★ Classics (R&S, Austria, 1995)

It is impossible to overstate Juan Atkins' importance in the history of dance music. As a member of Cybotron (alongside Rick Davis) in the early '80s, Atkins essentially wrote the blueprint for Detroit techno, and as a DJ and producer he has continued to map the genre's terrain. His most important work post-Cybotron came under the moniker Model 500, whose singles, including the great "No UFO's," "Off to Battle," and "Night Drive (Time, Space, Transmat)," are collected on *Classics.* "No UFO's" keynotes Atkins' *Wax Trax! Mastermix Vol. 1,* a slamming DJ set that also serves as a smart history lesson, ranging from early techno (Rhythim Is Rhythim's "Nude Photo") to obscure disco (Martin Circus' "Disco Circus") to ghetto-tech (DJ Assault's "Sex on the Beach") to European minimalism (Maurizio's "7"). 2001's *Legends, Vol. 1* is less historically minded and more overtly interested in moving asses, and while a few tracks stand out (Isoleé's "Beau Mot Plage"), most don't. —M.M.

Atmosphere

★★★½ Overcast! (Rhymesayers Entertainment, 1997)
★★★★½ Lucy Ford: The Atmosphere EPs (Rhymesayers Entertainment, 2001)
★★★★ God Loves Ugly (Fat Beats/Rhymesayers Entertainment, 2002)
★★★★ Seven's Travels (Rhymesayers/Epitaph, 2003)

Minneapolis underground hip-hoppers Atmosphere began in the mid-'90s, when Slug (né Sean Daley), rhyme partner Spawn, and producer Ant (born Anthony Davis) began releasing homemade cassettes; by 1997, they'd become one of the most popular live acts in the Twin Cities, a position solidified by the self-released *Overcast!,* which introduced Slug as a skillful braggart with a penchant for offering to take your girl home.

Cassettes such as the excellent, out-of-print *Se7en,* as well as a rigorous touring schedule and vigorous networking (Slug often played shows with punk, rock, and R&B acts as well as fellow hip-hoppers), earned Atmosphere a sizable cult following. But it was 2001's *Lucy Ford* that made Slug a hot commodity. Playing like a cross between De La Soul's *3 Feet High & Rising* and Modest Mouse's *The Lonesome Crowded West, Lucy Ford* is both a day-in-the-life-of-a-slacker classic and a great break-up album. There's almost no boasting, plenty of self-examination, and Ant's loops and beats match Slug's goofy, warm, worried persona at every step; "Guns and Cigarettes" is one of the most drunk-sounding hip-hop tunes ever recorded.

God Loves Ugly, the followup, pulled a 180-degree switch, with a heavy concentration on bully-boy boasting ("The Bass and the Movement," "Flesh") and vitriol ("Fuck You Lucy"). But "Modern Man's Hustle" may be his best single to date, finding a middle ground between Slug's introverted and extroverted sides. A year later, Rhymesayers, Atmosphere's label, signed to punk indie Epitaph for distribution and released the excellent *Seven's Travels*—recorded at the same time as *Ugly* but with a markedly different sensibility (jaunty maturity rather than growing pains). The semihit video for "Trying to Find a Balance," as well as their appearing twice on the Warped Tour, helped make Slug indie rap's icon du jour and threatened to turn him into a bona fide star. —M.M.

At the Drive-In

★★½	Alfaro Vive, Carajo! (EP) (Headquarter, 1995)
★★½	Acrobatic Tenement (Flipside, 1996)

Mars Volta

★★★	European Tour Sampler (Southern, 2002)
★★★½	Tremulant (EP) (Gold Standard, 2000)
★★★★	De-Loused in the Comatorium (Gold Standard/Universal, 2003)

At the Drive-In reinvigorated American postpunk, combining emo's unabashed passion with a politically edged fury reminiscent of the MC5. The El Paso, TX, fivesome—singer Cedric Bixler, guitarist Omar Rodriguez, guitarist Jim Ward, bassist Paul Hinojos, and drummer Tony Hajjar—established their formula early on, combining the rough-edged emo of underground favorites Jawbreaker with Rage Against the Machine's bombastic punk-metal attack. *El Gran Orgo*'s six tuneful tracks sound more focused than previous album *Acrobatic Tenement*'s sprawl of tricky rhythms and noisome textures: On "Picket Fence Cartel," Bixler spits a barely discernible barrage of bitter words over stop-start guitars and stomping-yet-precise drums and bass, before breaking into what was to become his trademark yowl in the strangely catchy chorus.

With emo's aggressive longing distilled into Bixler's convulsion of a voice, the band ditched its vestigial pop-punk niceties on *In/Casino/Out* and played harder and faster than ever before. Explosive and frequently pretty, the disc would sound spastic were it not so carefully orchestrated. The bass growls like a Rottweiler, the guitars twine like two strands of razor wire, and the cascading drums leap out of the mix. (Bixler's lyrics, on the other hand, become completely confused. On "Pickpocket," he blathers that "In the humble stench of nativity/hummed the smell of television snow" as if it actually meant something.)

The seven-song EP *Vaya* actually scales back the simulated chaos and dials in some exquisite, restrained tension. The lissome groove on "300 MHz" puts Rage Against the Machine's quiet parts to shame, and includes a bridge with Bixler's vocals being played backward (either that or he's truly spouting gibberish), while "Heliotrope" gallops into slinky, frenetic funk that repeatedly seizes and recovers, then drops down to Bixler's hoarse whisper and explodes. "198d" even proves the band's ability as balladeers.

Their major label debut, *Relationship of Command,* ratchets the levels back up to 11. In comparison to *Vaya, Command* sounds a little icy. But this is owed mostly to Ross Robinson's all-edges production; ATDI play as deftly as ever, unleashing a fireworks display of competing yet complementary sound bursts. The sinisterly schizo "One Armed Scissor" enthralled indie-oriented hard-rock fans who had yet to hear from the Strokes or the White Stripes, but personal differences broke At the Drive-In apart before they could make a mark on MTV.

Bixler and Rodriguez (the ones, famously, with MC5-inspired afros) went on to form Mars Volta, but it was Sparta—Paul Hinojos and Tony Hajjar, with Jim Ward on guitar and vocals—who capitalized on ATDI's momentum, essentially by re-creating their sound. Sparta obviously intended the startlingly good *Wiretap Scars* for an audience wider than At the Drive-In's. Ward can't help but sing more conventionally than Bixler, although he flits quite comfortably between vulnerable coo and outraged shout. Big guitars and beats abound, but so do melodies, and the pretty parts stretch out, interrupted only by explosive choruses.

Mars Volta's three-song EP *Tremulant* also smoothes out At the Drive-In's spiky textures, but with a psychedelic sheen and smidgens of ambient electronica. The almost absurdly ambitious *De-Loused in the Comatorium*—a well-received concept album about the drug-related death of a friend—moves like tropical weather, squalling in tremendous bursts, then settling into hushed interludes that sound like breezes playing on loose debris. Bixler fully releases his helium-fed voice, playing on every crash and whisper, ultimately breaking through the cast of rage that defined At the Drive-In. Sparta scored a hit with "Cut Your Ribbon"; one hopes Mars Volta will someday vault onto radio. If At the Drive-In did it, anything's possible. —N.C.

Audioslave

★★★ Audioslave (Sony, 2002)

The combination of Rage Against the Machine and Chris Cornell looks on paper like something that could be achieved only in a game of fantasy rock baseball, or a really excellent impromptu jam session. This supergroup of noise came together after singer Zack de la Rocha's departure left Rage without a frontman; Cornell's Soundgarden had already split, so the pairing was set. Their debut album is a sonic assault that bears more similarity to Cornell's former team, albeit with actual ballads such as "I Am the Highway," the prettiest of the bunch. "Light My Way" lands at the other end of the spectrum, a full-on pan of boiling water in the face that proves guitarist Tom Morello listened to his fair share of Nugent albums while studying at Harvard. Cornell's lyrics can seem a bit New-Agey when set to Morello's guitar histrionics, but when the group sets to rocking, there is much firepower present. Still, as with most supergroups, or corporate mergers, past résumés hang heavy over these songs. —C.R.C.

Autechre

★★½ Incunabula (Wax Trax!, 1994)
★★½ Amber (TVT, 1994)
★★★★ Tri Repetae ++ (1995; Wax Trax!, 1999)
★★★ Chiastic Slide (Warp, 1997)
★★★ LP5 (Warp, 1998)
★★★ EP7 (Nothing, 1999)
★★★ Confield (Warp, 2001)
★★★ Draft 7.30 (Warp, 2003)

Blip, buzz, zap: Sean Booth and Rob Brown, the two knob-twiddlers behind Autechre, were among the leaders of the electronica renaissance of the mid-'90s, blending the cool minimalism of '70s pioneers such as Kraftwerk and Brian Eno with stark avant-garde noise, plus a touch of the block-rocking intensity of '80s hip-hop and electro-funk. As with Aphex Twin, Mouse on Mars, and other innovators, their treatment of electronic dance music is at once a cerebral deconstruction that demands close listening on headphones (and far away from a dance floor) and a challenge to other experimental music makers to produce work that can elicit a physical, sexual response. No wonder it's called intelligent dance music.

The group began slowly, with smart if unexciting ambient watercolors on *Incunabula* and *Amber* that give no indication of the innovations to follow. On *Tri Repetae ++*, Booth and Brown hit a stride that carried them through nearly a decade of intensely challenging music. Pushing the limits of danceability, the album squeezes faster, tighter, and more bizarre rhythms out of an arsenal of tones ranging from the squiggly and percussive to the breezily melodic. The soundscapes, made of complex patterns that alter and intersect in ever changing ways, retain an excitable pulse while veering dangerously out of orbit and into a noisy outer realm where there is no disco ball and no bar.

So how do you top a visionary work that challenges the very nature of dance music? Unfortunately, you don't. After *Tri Repetae,* Autechre albums have a mind-numbing sameness despite their minute-by-minute ingenuity. Like, say, Chicago, they basically made the same album—and the same EP, and the same remix—many, many times. *Chiastic Slide* is a dull sequel, but *LP5* kicks in with faster and more jarring rhythms. *Confield* and *Draft 7.30* continue in familiar patterns of crunching, robotic rhythms and clean, spacey melodies that swarm in and out of focus. Mindlessly repetitive, yes, but in the best sense possible. —B.S.

The Auteurs

★★★★ New Wave (Caroline, 1993)
★★★ Now I'm a Cowboy (Vernon Yard, 1994)
★★★ After Murder Park (Hut, 1996)

Baader Meinhof

★★★½ Baader Meinhof (Caroline, 1997)

Black Box Recorder

★★★★ England Made Me (Jetset, 1999)
★★★★½ The Facts of Life (Jetset, 2001)
★★★ The Worst of Black Box Recorder (Jetset, 2001)
★★★★ Passionoia (One Little Indian, 2003)

Luke Haines was too sardonic and overeducated to rouse the masses at Wembley Stadium, so he deployed power chords as a framework for his unrequited, self-referential show biz obsessions. On the band's debut, "Don't Trust the Stars" and "Starstruck" pun off the connections between astrological coincidences and showbiz success, while "American Guitars" mocked rock-god aspirations as well as the British Haines' own aesthetic incompatibility with such aspirations.

New Wave offered a survey of that low-rent district where the privileged bohemian poor rub shoulders with the criminal underground, a world of lack more than want, grasping and pathetic and lively. Haines conflates cynicism and charm so freely that his targets rarely matter: When he discredits thrift-shop chic with a casual "Lenny Bruce never walked in a dead man's shoes," the elliptical angle of his assault is the hook. By the time of *After Murder Park* Haines was hinting at dangers and calamities that he couldn't quite pin down with lyrics or music. So, naturally, he orchestrated a likeably tense little one-off concept album about German terrorists Baader Meinhof.

Having learned a bit of electronics from that detour, Haines formed Black Box Recorder with Jesus and Mary Chain drummer John Moore and pert, pouty, posh Sarah Nixey on vocals. Right as rain and just as damp, *The Facts of Life* watches synth patterns trickle past spare drumbeats in a languid contest to see which can seem the most innocuous. Call it drip-hop—aural drizzle as an indicator of romantic malaise. But just because Nixey coos with the calm tenderness of a latent sociopath doesn't mean she wants to hurt you. *Passionoia* is a bit more wan musically, but two Nixey set pieces play off her prim sexpot persona smashingly. On the title cut, she's a frosty, disciplinary headmistress; on "Andrew Ridgley," she eulogizes the go-go '80s from the perspective of a poor little rich girl. —K.H.

The Avalanches

★★★★ Since I Left You (Modular/Sire, 2001)

Anyone with a sampler can create a new song out of bits and pieces of existing music, but it takes real panache to balance the familiar and obscure. *Since I Left You,* the first album from Australian quintet the Avalanches, strikes that balance perfectly. Composed of hundreds of samples, the disc's playful, airy grooves are ecstatic with the endless possibilities of sound, evoking the Beastie Boys' *Paul's Boutique* refracted through the rave-kissed bliss of Primal Scream's "Loaded." What sticks, though, is the disc's surprisingly resonant emotional core, which explores the thrill and dread of leaving a stifling relationship and entering the wider world—in this case, the night world of club culture—in order to find yourself. —M.M.

Roy Ayers

★★★ Daddy Bug and Friends (Atlantic, 1967–69)
★★★ Ubiquity (Polydor, 1971)
★★★½ He's Coming (Polydor, 1972)
★★★★ Live at the Montreux Jazz Festival (Verve, 1972)
★★★ Coffy (Polydor, 1973)
★★★½ Virgo Red (Polydor, 1973)
★★★ Mystic Voyage (Polydor, 1975)
★★★ Vibrations (Polydor, 1976)
★★ You Might Be Surprised (Columbia, 1985)
★★★★ Evolution: The Polydor Anthology (Chronicles/Polydor, 1995)
★★ Live at Ronnie Scott's (Silverline, 2001)
★★★★ Virgin Ubiquity: Unreleased Recordings, 1976–1981 (Rapster/BBE, 2004)

Like many music makers of the '60s and '70s, vibraphonist Roy Ayers, known for his crisp instrumental funk, has enjoyed an echoing multigenerational success: Not only are the records he made then considered classics in their own right, but via sampling, they've provided the foundation for countless hip-hop and acid jazz productions from DJ Jazzy Jeff, 2Pac, Outlawz, and others.

A native of San Francisco, Ayers discovered the vibraphone at age 17, and by his early twenties was recording with West Coast jazzers Jack Wilson and the Gerald Wilson Orchestra. He joined flutist Herbie Mann's group in 1966, and under Mann's direction recorded his first solo efforts, which featured tenor man Joe Henderson and are collected on *Daddy Bug and Friends.* Forming the Roy Ayers Ubiquity in 1970 with Billy Cobham and other jazz-rock heavyweights, Ayers began his most consequential recording period: Hits included "We Live in Brooklyn, Baby" from 1971's *He's Coming* and "Coffy Is the Color" from the 1973 soundtrack to *Coffy,* while several other records, including the 1972 *Live in Montreux,* show that Ayers and his ensemble were rare among the jazz-rock "fusion" outfits of the day because they were capable of sliding between heavy-backbeat music and crisp traditional swing without compromising in either direction. Though many individual titles are out of print, the essentials of the Ayers canon are collected on the two-disc *Evolution: The Polydor Anthology,* which showcases the leader's wry, agile solo play.

By the 1980s, Ayers' own records grew listless and overproduced, devoid of the sparky interplay that once defined his groups. He continued, however, to record, collaborating with Afro-pop star Fela Anikulapo Kuti and guesting on Guru's pathfinding jazz–hip-hop experiment *Jazzmatazz* in 1993. Ayers continues to record; his most recent efforts, including several live albums recorded at London's Ronnie Scott's, don't significantly expand his legacy.

Ayers finally opened his vaults in 2004, and the result is *Virgin Ubiquity,* a set of previously unreleased studio sides made during one of the vibraphonist's most prolific periods. Three vocalists take turns doing leads, but the highlights are the instrumentals—an alternative version of "Mystic Voyage" and the funky "Green and Gold," which captures Ayers' chattering exchange with Bobby Lyle on electric piano. —T.M.

AZ

★★★ Doe or Die (EMI, 1995)
★★½ Pieces of a Man (Virgin, 1998)
★★½ S.O.S.A. (Virgin, 2000)
★★ 9 Lives (Motown, 2001)
★★★½ Aziatic (Motown, 2002)

AZ's career is, in some ways, a testament to the staggering influence that his fellow Queensbridge rapper Nas had over the hip-hop world in the early '90s. After appearing on Nas' excellent debut, *Illmatic,* AZ found himself on the tip of many a rap fan's tongue, as people wondered when the passionate MC from Nas' "Life's a Bitch" would drop his own album. Those questions were answered with 1995's *Doe or Die,* a literate, sensitive look at street life that sits comfortably, as a companion, next to Nas' masterpiece. After appearing on the Nas-led (and rather ill-conceived) "supergroup" the Firm, AZ made his followup, the disappointing *Pieces of a Man.* Like Nas, AZ began relying on shinier production (handled mostly by the Trackmasterz) and smoothed out his sound to appeal to an R&B audience.

S.O.S.A. is a slight return to the raw style that brought him prominence, but it still suffers from AZ's concessions to the mainstream sounds of Puff Daddy and Bad Boy. *9 Lives* sadly found AZ sinking into obscurity with little to no contributions from any top-notch producers or MCs. AZ couldn't carry the weight all by himself and the album suffers from a generic feel. Happily, *Aziatic* is a return to form. Coming out in the shadow of Jay-Z's *The Blueprint, Aziatic* has a similar, soul-drenched sound, using the production of veterans such as DR Period (M.O.P.) to highlight his exceptional lyrical talents. —C.R.

Babes in Toyland

★★★	Spanking Machine (Twin/Tone, 1990)
★★	To Mother (EP) (Twin/Tone, 1991)
★★★★	Fontanelle (Reprise, 1992)
★★	Nemesisters (Reprise, 1995)
★★	Further Adventures of Babes in Toyland (Fuel 2000, 2001)

Hailing from Minneapolis, Babes in Toyland came out of the same hardcore scene that a few years earlier had produced the Replacements and Hüsker Dü. But Babes in Toyland proved to be a more traditional punk band than either of those predecessors. Kat Bjelland, dressed in a tattered wedding dress, came on like Miss Havisham on the war path. Led by Kat's sloppy guitar and screams from the gut, Babes on *Spanking Machine* and *To Mother* (a followup EP) helped inspire the nascent riot grrrl movement perhaps even more than former Babes member Courtney Love's far more successful Hole. Still, it was a surprise when Babes was signed to a major label. But unlike, say, the major-label debut of the Replacements or Hüsker Dü, *Fontanelle*—produced by Sonic Youth's Lee Ranaldo—finds Babes using the big recording budget to create the trio's most uncompromising effort. Ranaldo does a fantastic job capturing the dissonance in Bjelland's guitar as well as the band's hard-driving rhythm section. On tracks such as "Bruise Violet" and "Handsome and Gretal," Bjelland purrs sweet nothings one minute and howls like a banshee the next. Though angry enough to scare anyone with a dick, Bjelland is never dogmatic on *Fontanelle*. Instead, she is all feminist rage sans feminism; in short, *Fontanelle* is great punk rock played by an all-chick band. Sadly, by *Nemesisters* the band members had become expert enough players to evolve into just an average metal band. Babes split up in 1997; *Further Adventures* offers a gathering of the influential group's live recordings, rarities, and outtakes. —R.A.

★★★½	Love Songs (Epic, 2001)
★	Face2Face (Arista, 2001)
★★	The Spirit of Christmas (Sony Special Products, 2002)

For a time in the '90s, Kenneth "Babyface" Edmonds was half of the hottest hit-making team in pop, along with his songwriting and production partner, Antonio "L.A." Reid. His Midas touch generated massive hits for Whitney Houston, Boyz II Men, Paula Abdul, and even Eric Clapton. But where Reid used that momentum to climb the corporate ladder (eventually becoming head of Arista Records), Babyface followed his art and ended up a spent force—but not before having a number of smoothly unobtrusive R&B hits.

Lovers, recorded after L.A. and Babyface had left their band the Deele is competent but predictable, with the singer lavishing his light tenor on slow, soulful ballads like the Stylistics' "You Make Me Feel Brand New." Unsurprisingly, *Tender Lover* also includes a few powerhouse ballads, the best of which (such as "Whip Appeal") capture the insinuating cadences of a lover's pillow talk. *A Closer Look* provides highlights from both albums, as well as two live tracks and duets Babyface recorded for albums by Karyn White and Pebbles.

For the Cool in You further refined that formula, increasing the potency of the uptempo tunes while scoring a major hit with the warmly sentimental "When Can I See You Again," and then Babyface peaked with *The Day,* an all-star, hit-encrusted effort that more or less epitomized the R&B pop aesthetic of the mid-'90s. But after the nakedness of *MTV Unplugged* exposed his weaknesses as a singer, his career stalled and his creativity crashed. *Christmas With Babyface* is low key and agreeably traditional, and would have made a nice, quiet exit. (*A Collection of His Greatest Hits* would make nice time capsule fodder.) But Babyface, convinced he could somehow seem hip, came back with *Face2Face,* a painful grab for street cred on which the only thing more painful than the maudlin "Still in Love With U" is hearing Snoop Dogg work his persona on "Baby's Mama." —J.D.C.

Burt Bacharach

★★½	Reach Out (A&M, 1967)

★★★★	What the World Needs Now: Burt Bacharach Classics (A&M, 2003)

with Elvis Costello

★★★½	Painted from Memory (Mercury, 1998)

Classically trained and phenomenally industrious, Burt Bacharach began writing hits in the '50s for performers as various as Perry Como, Marty Robbins, and Gene Pitney, after having honed his arranging skills as conductor for Marlene Dietrich. With lyricist Hal David, he went on to deliver an astonishing series of '60s pop singles for Dionne Warwick. Combining Tin Pan Alley craft, Gershwinesque jazz flourishes, and daring offbeat rhythms, his songs became Muzak staples—a sad but inevitable fate.

On his own, he made albums that featured lush, symphonic versions of his work for other artists. He sometimes sang (very poorly); more often, he assembled dreadful choirs who crooned like jingle hacks. If you can get beyond this, his arrangements still pack punch and surprise. Overfond of whimsical instrumentation (harpsichords, bossa-nova guitars), he still comes off as a distinctive musical intelligence—he does "light" with more class than almost any other AOR composer. *Woman,* a semiclassical epic, is his most ambitious work, but nonobsessives will be much more interested in his greatest-hits sets, which contain such ubiquitous singles as "Alfie," "I Say a Little Prayer for You," "Promises, Promises," and "What the World Needs Now Is Love." In the late '90s, Bacharach appeared alongside Elvis Costello in *Austin Powers: The Spy Who Shagged Me* as a living embodiment of slightly kitsched-up elegance, and a new generation of indie rockers took Bacharach's soft, orchestrally rich pop in arty (and sometimes ironic) new directions. Bacharach and Costello also teamed up for 1998's *Painted From Memory,* which showed that Bacharach's gift for melody remained undiminished; Costello added a layer of hip credibility. Bacharach's new trendiness also spurred some terrific best-ofs, the best being Rhino's *The Look of Love,* and the all-star tribute album *One Amazing Night.* The latter underscores Bacharach's wide appeal—check out Wynonna's killer version of "Anyone Who Had a Heart" and a nifty take on "Raindrops Keep Falling on My Head" courtesy of Ben Folds Five. —P.E.

Bachman-Turner Overdrive

★★	Bachman-Turner Overdrive (Mercury, 1973)
★★★	Bachman-Turner Overdrive II (Mercury, 1974)
★★★	Not Fragile (Mercury, 1974)
★★	Four Wheel Drive (Mercury, 1975)
★★	Head On (Mercury, 1975)
★★★	Best of Bachman-Turner Overdrive (So Far) (Mercury, 1976)
★★	Freeways (Mercury, 1977)
★	Street Action (Mercury, 1978)
★	Rock 'n' Roll Nights (Mercury, 1978)
★★★½	Best of B.T.O. (Remastered Hits) (Mercury, 1998)

Bachman-Turner Overdrive launched a million bad jokes about spare tires and hefty metal, but this beefy Canadian band's shimmering power hooks still motor past all tasteful objections. Toughening his old group's pop sensibilities with a big guitar sound, ex–Guess Who member Randy Bachman hit the ground running in his '70s vehicle. "Let It Ride," "Roll on Down the Highway," and "You Ain't Seen Nothing Yet" all sound like they rolled off the same assembly line—on purpose. B.T.O. maintained a fairly high standard of quality across its initial releases, pumping out tuneful filler alongside the aforementioned hits. However, the optimistically titled *Best of Bachman-Turner Overdrive (So Far)*—reissued in 1998 with the parenthetical *(Remastered Hits)*—is all the B.T.O. general listeners need to hear. Tossing in the FM standard "Gimme Your Money Please" (about a mugging) and the ambitious "Lookin' Out for #1," this one qualifies as essential if your car still has a tape deck. On the post–*Four Wheel Drive* titles, B.T.O. sputters and eventually stalls, and the plethora of collections and live CDs that keep coming out on a variety of labels can't jump-start this rusty old engine. —M.C./M.K.

Backstreet Boys

★★½	Backstreet Boys (Jive, 1996)
★★★½	Millennium (Jive, 1999)
★★	Black & Blue (Jive, 2000)
★★★	The Hits: Chapter One (Jive, 2001)

Five young men from the time-honored teen-pop proving grounds of church choirs and regional theater, the Backstreet Boys were, in their heyday—before they were unseated by 'N Sync—the biggest teen sensation since the Monkees, at the crest of the late-'90s pubescent-pop tidal wave.

Under the aegis of Orlando impresario Lou Pearlman, the Backstreet Boys signed to Jive Records in 1994, releasing their self-titled 1996 debut to great success in Europe and Canada before issuing it stateside the next year. Packed with soon-to-become unavoidable hits—"Quit Playin' Games (With My Heart)," "Everybody (Backstreet's Back)," "As Long As You Love Me"—*Backstreet Boys* served as the blueprint for boy bands to come, mixing soulful, sexually inoffensive ballads with harmony-heavy R&B and mildly edgy dance tracks. It eventually sold 13 million copies, though the Boys' popularity wouldn't actually peak until the release of *Millennium* (which would sell more than 1 million copies in its first week) two years later. While *Millennium* wasn't as shamelessly hook-filled as *BSB*, it did offer up the Boys' best-ever track, "I Want It That Way," a near-perfect slice of puppy-dog soul.

Released the next year, *Black & Blue* followed roughly the same formula as its predecessors, with decidedly lesser results. With the exception of the irresistibly cheesy "Shape of My Heart" and the just-plain-bad cheating-boyfriend apologia "Call," most of the tracks here are unexceptional.

Dogged by bad reviews, heart ailments, substance abuse, and encroaching facial hair, the Boys have had a relatively rough time of things since their 1999 heyday, but their 2001 best-of collection, *The Hits: Chapter One*, brings to mind happier times. Every smash is here, and every modest success as well, from "All I Have to Give" to "Drowning," a new single with little of the kick of the group's best work. Unlike most retrospectives, *The Hits* doesn't exactly chart the band's musical evolution—there hasn't been one to speak of—but it does offer an impressive tribute to their hit-making power. —A.S.

Bad Brains

★★★★★	Bad Brains (1982; ROIR, 1996)
★★★★	Rock for Light (1983; Caroline, 1991)
★★★★★	I Against I (1986; SST, 1990)
★★★	Live (1988; SST, 1990)
★★★	Quickness (Caroline, 1989)
★★★★	Youth Are Getting Restless: Live in Amsterdam (Caroline, 1990)
★	Rise (Epic, 1993)
★★	God of Love (Maverick, 1995)
★★★★★	Black Dots (Caroline, 1996)
★★★½	Omega Sessions (EP) (Victory, 1997)
★★★½	Banned in DC: Bad Brains Greatest Riffs (Caroline, 2003)

Bad Brains would have been as important as fluoridated water if their only contribution to pop music had been their 1980 debut 45 "Pay to Cum," an impossible freight train of sound and speed-singing that split American hardcore into Before and After. But they did much more, including simply being black, which made their white-hot punk a quintessentially American triumph. The skinny Rastas in the Lacoste shirts fled, banned, from D.C. to New York in 1979, fronted by Joseph "HR" Hudson. Combining the moves and vocals of James Brown and Johnny Rotten with some Nadia Comaneci acrobatics, HR was hilarious, scary, unscripted, and beautiful. To watch HR start a show by doing a backflip off the drum riser and land on the downbeat was as close to God as many of us will come. And his band was black and they played all this dub. What *were* they doing?

Just being New York's greatest hardcore band, blowing every mind they touched. Dimwits have called their 1982 debut ROIR cassette "badly recorded," which is like saying the guitar on "You Really Got Me" sounds funny. *Bad Brains* is one long thought, starting with the dangerously torqued and catchy "Sailin' On" and continuing through an articulation of punk as political liberation and reggae as spiritual salvation that has yet to be fully unpacked. Their music was the word as act, almost unbearable live, barely containable on tape. Some analogies: late-period John Coltrane, a broken water main emptying into your house, an amplified rockslide. The debut's only flaw is that "Pay to Cum" is included only in a live version. The priceless original appears on *Banned in DC: Bad Brains Greatest Riffs*, a solid best-of that goes too heavy on the live versions to be a definitive introduction.

Rock for Light was their slightly more visible 1983 debut on Caroline, produced by Ric Ocasek with an infuriating lack of low end. It's still unapologetic and brilliant, if just for adding older set numbers such as "How Low Can a Punk Get?" and "We Will Not." Like Monk or Hendrix, there is no limit to how many times you can hear them play their best songs.

After some heavy touring, the band began to suffer from some of HR's less helpful tendencies, such as ending up in jail. But they made another landmark album in 1986, *I Against I,* a fusion of punk and metal that put moshing on the map and gave stadium sports an anthem: "Re-Ignition." The reggae element was reduced and the live show honed to a terrifying point. The hooks on "Let Me Help" and "She's Calling You" sounded almost like Love, and the multipartite structure of the title track revealed that, yes, these guys really *had* been a jazz fusion band called Mind Power before they heard the Dead Boys in 1977. But that's OK.

That was it for making history. *The Youth Are Getting Restless* is the live album to own; the others attempt to cash in on the studio records. *Quickness,* recorded in large with Cro-Mags drummer Mackie recording in place of HR's brother, Earl Hudson, has the essential Brains track "Soul Craft" and a few stormers but is marred by HR's increasingly homophobic and bonkers worldview. Sans HR, the band signed to Epic in 1993 and made the miserable *Rise* with replacement singer Israel Joseph. (Imagine ABBA with different singers. Sensible?) HR rejoined for the Maverick reunion *God of Love* but got into new trouble, and the band ended up with neither a label nor their band name, which lawyers at Maverick held on to for sentimental reasons. The band reformed for the umpteenth time as Soul Brains and still tours under that name. The band is great, but HR stands still on stage and imitates Haile Selassie's Mona Lisa smile. The major addition to their discography was *Black Dots,* the 1996 Caroline release of the four-track basement demos made in 1979 with D.C. engineer Don Zientara. (HR recorded his vocals on the lawn.) Stripped of any studio enhancements, the band is even more terrifying, and this might be the record to start with for novices. There is nothing else like them in American music. —S.F.J.

Bad Company

★★★½	Bad Company (Swan Song, 1974)
★★★	Straight Shooter (Swan Song, 1975)
★★½	Run With the Pack (Swan Song, 1976)
★★½	Burnin' Sky (Swan Song, 1977)
★★★	Desolation Angels (Swan Song, 1979)
★★½	Rough Diamonds (Swan Song, 1982)
★★	Fame and Fortune (Atlantic, 1986)
★★	Dangerous Age (Atlantic, 1988)
★★★★	10 From 6 (Atlantic, 1988)
★★	Holy Water (Atco, 1990)
★★	Here Comes Trouble (Atco, 1992)
★	The Best of Bad Company Live . . . What You Hear Is What You Get (Atlantic, 1993)
★★	Company of Strangers (East West, 1995)
★★	Stories Told & Untold (East West, 1996)
★★★½	The "Original" Bad Company Anthology (Elektra, 1999)
★★	In Concert: Merchants of Cool (Sanctuary, 2002)

This mid-'70s supergroup picks up precisely where lead singer Paul Rodgers old band left off. Bad Company coarsens and distorts Free's economical blooze attack just enough to put it across to a howling, smoke-filled arena. Compared to his shrieking competition (from Ian Gillan in Deep Purple to Sammy Hagar in Montrose and later Van Halen), Rodgers is a remarkably soulful hard-rock frontman. And former Mott the Hoople guitarist Mick Ralphs proves an able foil; his stuttering riffs and clipped solos boldly copy Free guitarist Paul Kossoff's signature sound, while ex–Free drummer Simon Kirke provides thundering foursquare rhythms.

Bad Company came as a breath of fresh air amid arena rocks' increasing stench, but this particular breeze quickly turned into a gust of hot air. Rodgers and Company never could get beyond the "Baby I'm a Bad Man" stance of Bad Company. The no-bullshit minimalism and rhythmic thrust of the debut becomes a rut by the third album. The post-Rodgers releases—beginning with *Fame and Fortune*—find Ralphs and Kirke keeping company with a couple of unfortunate Rodgers clones, Brian Howe and later Robert Hart. The albums aren't bad enough to be abominations, or shameless enough to be successes.

That said, there's not a bum riff or bogus groan to be found on *10 From 6,* a collection that mixes the full bore earthquakes ("Can't Get Enough") and half-acoustic lust ballads ("Shooting Star") alongside musings on the road ("Movin' On") and the music ("Rock & Roll Fantasy")—it's essential to any survey of '70s rock. While *The "Original" Bad Company Anthology* is overkill, it's a not-bad selection from the band's first five albums plus a handful of B sides and four new Rodgers-fronted tunes. Of the two live discs, only *Merchants of Cool* is worth hearing, as it brings Rodgers back for some fairly spirited takes on the chestnuts. —M.C./M.K.

Badly Drawn Boy

★★½	How Did I Get Here? (Toys Factory [Japan], 1999)
★★★★	The Hour of Bewilderbeast (XL, 2000)

★★★ About a Boy (Artist Direct, 2002)
★★★½ Have You Fed the Fish? (Artist Direct, 2002)
★★★½ One Plus One Is One (Astralwerks, 2004)

England's Damon Gough, who performs as Badly Drawn Boy, is a big Bruce Springsteen fan. Seems strange at first, because he's one of a young cluster of wounded-romantic singer/songwriters, not an arena rocker. His songs feel intimate even when they are dense with strings and horn charts, and he's convincingly sensual either in a whisper or a shout. But the Springsteen connection is clear during Badly Drawn Boy concerts, both in his determined outreach to fans and in their sense of knowing him like a friend. He gathers you in. The most frequent comparison is to Elliott Smith, another essentially acoustic fabulist of the heart's troubles who was fond of sinuous, insistent melodies. But where Smith often presented soiled boys and girls who found love to be broken, for Badly Drawn Boy, love is forever part of "All Possibilities." Clever at taking the temperature of a relationship and ardent but able to take hard knocks, he can be sweetly caring, as in "I Need a Sign" and "Pissing in the Wind," without coming off like a quivering sap or a fraud. Also like Springsteen, Badly Drawn Boy's mature work is meticulously crafted.

So, combining early EPs with a few scattered tracks, *How Did I Get Here?* is a product purely for dedicated fans, since the songs, if not exactly badly drawn, are at least incomplete sketches. All of Badly Drawn Boy's abilities snap into place for *The Hour of Bewilderbeast.* It's less experimental instrumentals, more song form and conversational, and presents one of the most beguiling and fully formed sensibilities to pop out of nowhere since Beck's *Mellow Gold.* If "Magic in the Air" evokes your favorite summer night of shifting passions, Badly Drawn Boy has breached your defenses for good.

Comely, affecting, light on its feet, reflective, and witty, *About a Boy* matches its movie as well as any soundtrack this side of *Magnolia,* and it plays as well on its own. Worth adopting. Even more encouraging, *Have You Fed the Fish?* indicates that success won't spoil Badly Drawn Boy. He cherishes his young family and his hugely expanded audience without being either smug or abashed by either. The album delivers rich, multi-instrument arrangements that sound like he invented them rolling out of bed, plaintive laments that could not be more unplugged, and thoughts about angels and rewinding to move forward that he makes sound like pearls. Meet a sensitive soul for our time.

Judging only from the recorded evidence on *One Plus One Is One,* Gough still wasn't getting out of his bedroom enough, but the sense of personal warmth triumphing over everyday melancholia is one of the album's biggest charms. On songs such as "Life Turned Upside Down," "Logic of a Friend," and the tear-jerking "Year of the Rat," Gough writes to the sound of his own conversational murmuring and fills in the blank spots with rumbling timpani, keyboards, and a children's choir. —M.MI.

The Bad Plus

★★★★ These Are the Vistas (Columbia, 2003)
★★★★ Give (Sony, 2004)

Look solely at the instrumentation of the Bad Plus—acoustic piano, upright bass, drums, no vocals—and you'd think they were a jazz trio. While that assumption's not wrong, it doesn't do them justice. These quirky Midwesterners have jazz chops and jazz panache, but they apply those traits with the muscle of a rock band. Oh yeah, they play rock songs, too: Nirvana's "Smells Like Teen Spirit" and Blondie's "Heart of Glass" on *These Are the Vistas,* the Pixies' "Velouria" and Black Sabbath's "Iron Man" on *Give.* A neat gimmick, and well executed—especially the triumphant crescendoes of the Sabbath cover—but in the end, it's just a gimmick; the real rewards here are to be found in the band's own compositions. The droll singsonginess of "Keep the Bugs off Your Glass and the Bears off Your Ass" (*Vistas*) and the off-center lyricism of "Frog and Toad" (*Give*) demonstrate yet again that truly cool music sneers at the concept of category. —M.R.

Bad Religion

★★★ How Could Hell Be Any Worse? (Epitaph, 1982)
★ Into the Unknown (Epitaph, 1983)
★★★ Suffer (Epitaph, 1988)
★★★ No Control (Epitaph, 1989)
★★★★ Against the Grain (Epitaph, 1990)
★★★ 80–85 (Epitaph, 1990)
★★★ Generator (Epitaph, 1992)
★★★ Recipe for Hate (Epitaph/Atlantic, 1992–93)
★★★★ Stranger Than Fiction (Dragnet/Sony, 1994)
★★★ All Ages (Epitaph, 1995)
★★ The Gray Race (Atlantic, 1996)
★★★ Tested (Epic, 1997)
★★ No Substance (Atlantic, 1998)
★★ The New America (Atlantic, 2000)
★★★ The Process of Belief (Epitaph, 2002)
★★★ The Empire Strikes First (Epitaph, 2004)

In the late '70s, Southern California's cookie-cutter suburbs were a breeding ground for Ramones mania among bored, leather-jacketed misfits, and their response was to create hardcore: a faster, harder, less melodic version of CBGB-era punk. Bad Religion brought braininess to the mix, and its multisyllabic lyrics—ranging from latchkey-kid autobiography to cautionary political commentary—resonated on a level that set the quintet apart from its smashmouth peers.

Lacking a record label, the band simply started its own, and Bad Religion and the Epitaph imprint became something of a West Coast counterpart to Washington, D.C.'s Dischord, run by Minor Threat bandmates Ian MacKaye (later in Fugazi) and Jeff Nelson. Epitaph became a hothouse for the '90s pop-punk explosion, nurturing the Offspring, Rancid, NOFX, and Pennywise, among others—bands who in many cases eclipsed Bad Religion in commercial impact, but all of whom owe their sound and their careers to the pioneering hardcore band's '80s output.

The place all of those pop-punk disciples started is compiled on *80–85,* which repackages Bad Religion's debut album and other early recordings. It's the quintessential L.A. hardcore primer, an unrefined but exciting mix of compressed musical fury (two-minute or shorter screeds) and angry-nerd lyrics by singer and future biology Ph.D. Greg Graffin, then only in his teens. But the band struggled for years to take the next step. *Into the Unknown*—conspicuously excluded from *80–85*—remains the black sheep of the back catalogue, a head-scratching 180-degree turn toward '70s keyboard pop that essentially broke up the band for a few years.

On *Suffer,* the reunited Bad Religion distills its essence to 15 blast-furnace songs in under 30 minutes; the melodies build to anthemic choruses and then crash abruptly. *No Control* refines the formula and *Against the Grain* perfects it, beefing up the multipart harmonies and achieving a howling clarity. It's the band's mid-career peak, a manifesto on the price of modernization that presages the premillennial hand-wringing heard in countless rock albums a decade later.

Subsequent releases struggle to live up to that standard, and on *Recipe for Hate* the band invited a bevy of admirers (Eddie Vedder among them) to vary the increasingly predictable arrangements. The great leap forward finally arrived with Andy Wallace, hired as the band's first outside producer, who brought a blue-flame clarity to *Stranger than Fiction.* Suddenly the band's songs lunged at the listener with a previously unheard fist-meets-face ferocity, drummer Bobby Schayer proved he could do more than deliver a punk polka beat, and the compact melodies soared, particularly the title song and a sharp remake of "21st Century (Digital Boy)" (originally heard on *Suffer*). Both of the latter tunes were written by guitarist Brett Gurewitz, and his departure from the band after the release of *Stranger than Fiction* coincided with its demise as a creative force. Graffin's pseudophilosophical lyrics sounded clumsy without Gurewitz's melodies to offset them, and the shared songwriting of *No Substance* and celebrity producers on *The Gray Race* (Ric Ocasek) and *The New America* (Todd Rundgren) did little to pull the band out its rut. Gurewitz's return for *The Process of Belief* and *The Empire Strikes First* restored the balance, and though they broke no ground, the discs were easily the band's strongest releases in a decade. —G.K.

Erykah Badu

★★★	Baduizm (Universal, 1997)
★★★	Live (Universal, 1997)
★★★½	Mama's Gun (Motown, 2000)
★★★	World Wide Underground (Motown, 2003)

She has a sweet-and-sour voice, she preaches self-respect and social idealism, and she's got a love for the cool grooves, minor keys, and impressionistic surprises of jazz. Erykah Badu incorporated all of these strengths into *Baduizm,* a mellow, tasteful album of intelligent R&B, garnering comparisons to Billie Holiday upon its release. Badu cowrote all the record's tracks except for a cover of Atlantic Starr's "4 Leaf Clover," and on songs such as "Appletree," "Afro," and "Certainly" she evinces an impressive sense of loungey sass. It's an ambitious album despite the wobbles in quality—at her best, Badu is just the jaundiced, tenderhearted but realistic jazzy torch singer that the '90s, with its spate of plasticky R&B dolls, needed.

Badu kept the momentum from her debut at a boil with the release of *Live,* a document of how much of a crowd favorite she'd become. A masterful performer in full control of her audience and her material, Badu covers familiar territory—tracks from *Baduizm*—and includes a couple of surprises as well. She does a cocktail-lounge version of the disco hit "Boogie Nights" and unleashes the magnificent "Tyrone," a can't-take-it-anymore lament of monumental proportions.

Mama's Gun looks back toward '70s soul and angular jazz; it's less elliptical and less thickly textured than *Baduizm.* This cool breeze of an album brings hip-hop boasting into the lounge with the mellow "Cleva" and incorporates tricky stop-start jazz instrumentation into an updated girlfight on "Booty." The album spawned a hit with "Bag Lady," but the song is a naive number, offering spiritual aphorisms (such as "Pack light") and lousy advice ("I betcha love can make it better") to the titular down-and-outer. *World Wide Underground* gets too caught up in its gentle hip-hop groove, never going anywhere, except on a few tracks—most notably the vibrant "Danger." —A.B./N.B.

★★★★	Joan Baez, Vol. 2 (Vanguard, 2001)

Joan Baez's musical and political significance are so intertwined that it's hard to assess her impact solely on aesthetic grounds. A leading participant in the '60s cultural revolution, she lent intelligent credibility to radical ideas; and not only did her perfectly enunciated versions of Bob Dylan and Tim Hardin songs win highbrow listeners over to the new music, but her chaste—if sometimes overbearing—seriousness made the message of that music appear all the more critical and "legitimate." In the '70s, long after many of her peers had given up on the notion of music as message, Baez persevered. By the time of the U.S.A. for Africa revival of social consciousness a decade later, she had become a figure largely ignored, dismissed as unhip. The subsequent triumph of intelligent, strong female folk singers, however, testifies, no matter how indirectly, to Baez's spiritual influence—Tracy Chapman and Sarah McLachlan are as certainly her psychic daughters as they are Joni Mitchell's.

Gathered together on a dizzying array of repackagings, Baez's early work is traditional folk ("Man of Constant Sorrow," "Streets of Laredo," "Silver Dagger") of the most pristine variety. Baez's high, resonant, vibrato delivery is sometimes more musically satisfying than interpretively acute; her acoustic guitar playing can be equally hyperprecise, and, too often, the songs sound like a folklorist's reverent guide to the form rather than a singer comfortably emoting. But *Very Early* and *In Concert* are strong collections of Scots/Irish traditionals; and *Ballad Book, Lovesong Album,* and *Country Music Album* remain admirable.

Joan Baez 5 found the singer branching out, delivering an impressive Villa-Lobos classical piece with light-operatic grace and crusading for contemporary songwriters by covering Richard Farina's "Birmingham Sunday," Phil Ochs' "There but for Fortune," and Bob Dylan's "It Ain't Me Babe." Paired romantically with Dylan during the early '60s as the "King and Queen of Folk," she concentrated throughout the decade on reverent readings of his songs. Championing his genius proves to be one of her most endearing gestures—but as her Dylan collection, *Any Day Now,* attests, it's exactly by handling his lyrics as Holy Writ that Baez betrays her signal weakness. As a singer she triumphs when rendering dignified pathos; the ambivalence of Dylan eludes her. *Baptism* is mid-period Baez at her most ambitious. Having nearly exhausted standard folk music, she tries out sung and spoken readings of Welsh ballads, spirituals, and poems by Garcia Lorca, Yevtushenko, Whitman, and e. e. cummings. With orchestral arrangements by Peter Schickele (P.D.Q. Bach), the record has its gorgeous moments, but it's an effortful listen; like a PBS special, it's too apparently "good for you."

In the early '70s, Baez turned out artful covers of Kristofferson and Beatles songs, hit a high point with her version of the Band's "The Night They Drove Old Dixie Down," and on *Hits, Greatest and Others* shows herself to be a creative, if not very revealing, interpreter of high-end pop. She begins, too, to write more of her own material—and *Gulf Winds, Come From the Shadows,* and *Diamonds and Rust* are certainly smarter than most singer/songwriter albums of the time. But her best work *(From Every Stage)* remains her less obviously personal—"Swing Low, Sweet Chariot" and "Joe Hill" are strong and effortless, betraying none of the fretful quality that sometimes weakens her autobiographical songs.

Generating no interest from record companies, Baez was absent from the scene in the early '80s. When she finally returned, however, her work had gained in assurance. *Recently* and *Speaking of Dreams* are graceful sets; working with the Gipsy Kings, Paul Simon, and a host of studio aces, her delivery more casual than in her heyday, she sings about old loves and current causes—and she sounds not only wise but comfortable. *Play Me Backwards* won a deserved Grammy for Best Contemporary Folk Recording; *Gone from Danger* emphasized her contemporary appeal, as she convincingly covered songs by younger writers (Indigo Girls, Mary Chapin Carpenter). In fact, her career and stature were significantly revived in the '90s, as a new audience came to appreciate not only the clarity of her voice but also the courage of her convictions. —P.E.

LaVern Baker

★★★★	LaVern Baker Sings Bessie Smith (1958; Atlantic, 1988)
★★★★★	Precious Memories/LaVern Baker Sings Bessie Smith (1959, 1958; Collectables, 2000)
★★★★★	Soul on Fire: The Best of LaVern Baker (Atlantic, 1991)
★★★	Live in Hollywood '91 (Rhino, 1991)
★★½	Woke Up This Mornin' (DRG, 1992)
★★★★½	LaVern/LaVern Baker (Collectables, 1998)
★★★½	See See Rider/Blues Ballads (Collectables, 1998)
★★★★★	The Legend at Her Best (Collectables, 2000)

If anyone came to her profession with an unassailable pedigree, it was LaVern Baker. Born Delores Williams in Chicago in 1929, the niece of Memphis Minnie, Baker started her recording career in 1950 with the Eddie Penigar Band. Those sides were unissued, but a year later she appeared on three Okeh singles as Bea Baker, then billed herself as Little Miss Sharecropper and recorded for National, RCA/Victor, and Columbia. In 1952, using the name LaVern Baker, she joined Todd Rhodes and His Orchestra and recorded for King; she then signed to Atlantic the following year. There, she delivered the sultry slice of urgent R&B "Soul on Fire," a cataclysmic performance that found Baker employing a stunning array of vocal tools ranging from a deep, longing blues growl to tearful glottal stops to wanton upper-register shouts. It was a portent of things to come. In early '55 she had her first hit, "Tweedlee Dee," which had a near-three-month run on the pop chart, peaking at #14; between 1956 and 1963 she placed six more singles in the Top 50, with 1956's "Jim Dandy" rising to the Top 20 and 1958's wrenching "I Cried a Tear" peaking at #6 in its five-month chart run.

As her Aunt Minnie had done more than 20 years earlier, Baker stepped into a man's world, making a lasting impression on fans and on female vocalists who came after her. Hers was a voice that would not be denied, whether she was belting out an uptempo pop hit or probing the nuances of Doc Pomus' poignant blues ballad "My Happiness Forever," which demands the singer put across equal measures of resilience and vulnerability from one phrase to another. And on those occasions when she got hold of a song that took her back to her Baptist church roots, as she did on Leiber and Stoller's "Saved," she could testify with the best, using her big, booming voice to proclaim the Lord's goodness and mercy for all to hear. She was never better than on her 1959 gospel album, *Precious Memories,* on which she sounds like a cross between Mahalia Jackson and Sister Rosetta Tharpe. Her measured, mesmerizing version of Thomas A. Dorsey's standard "Precious Lord" is alone worth the price of admission, but housewreckers such as the propulsive "Didn't It Rain" and the ebullient gospel-soul of "Everytime I Feel the Spirit" will get the blood boiling and the spirit soaring.

The Atlantic years are succinctly documented on *Soul on Fire.* The other essential document from this time is the one that best reveals the depth and breadth of Baker's artistry: *LaVern Baker Sings Bessie Smith* links the former most dramatically to the latter's legacy, not merely by its title but by the intelligence and personality of Baker's interpretations. Here she is by turns bawdy ("Baby Doll"), strong and independent ("I Ain't Gonna Play No Second Fiddle," "Young Woman's Blues"), vulnerable ("Empty Bed Blues," "After You've Gone"), and bowed but proud ("Nobody Knows You When You're Down and Out"). Among a stellar supporting cast of players, Buck Clayton on trumpet and Vic Dickenson on trombone stand out with solo turns that buttress Baker's tour de force with eloquent instrumental commentaries. In asserting her heritage, Baker tells anyone who will listen that this music defines her. She sings Bessie Smith in grand style—but the control, phrasing, and attitude are all LaVern Baker, whose best-known work barely suggests her great gift as an artist.

These critical years in Baker's career have been fleshed out recently by the Collectables label, which has reissued six of her Atlantic albums on single-disc twofers and has combined four of those titles on the double CD *The Legend at Her Best.* The best of the lot is the gospel album *Precious Memories* packaged on the same disc with *LaVern Baker Sings Bessie Smith*—rarely have God and Mammon been evoked so profoundly as they are here, but the line between the two is almost indistinguishable when Baker digs into a song. Another twofer combines Baker's first two albums, *LaVern* and *LaVern Baker,* and here is an object lesson in how Atlantic transformed one of its greatest singers into an artist who made her commercial bones singing frothy novelty songs. On *LaVern,* she's a gutbucket R&B singer, growling and shouting her way through Chuck Willis' "Of Course I Do" and one of her own songs, "Lots and Lots of Love," putting a bluesy spin on the pop classic "Harbor Lights," and turning "Everybody's Somebody's Fool" into an anguished torch song with pop affectations. On *LaVern Baker* she's lightened up her husky tone just a bit, dropped the blues singer's bent notes and sultry growls and supplanted them with a perky, wailing style better suited to overtly commercial (and lightweight, albeit irresistibly bouncy) material such as "Jim Dandy," "Tra La La," and "Tweedlee Dee." Not that she abandoned her essence—a hymnlike treatment of "That Lucky Old Sun" takes her right back to the church, whereas Doc Pomus' "My Happiness Forever" is strictly after-hours R&B testifying. The blues belter and balladeer reigns on the twofer featuring *See See Rider* and *Blues Ballads.* The latter is the gut wrencher of the two, featuring some first-rate songs from Doc Pomus and Mort Shuman ("You're Teasing Me"), Neil Sedaka and Howie Greenfield ("I Waited Too Long"), Leiber and Stoller ("Whippersnapper"), along with W.C. Handy's "St. Louis Blues" and a Baker original, "So High, So Low." There's no going wrong with any of these Collectables twofers—the song selection, the arrangements, and especially Baker's sense of the song as expressed in her interpretive choices are all impeccable and frequently stunning. In the absence of a box set, the double CD *The Legend at Her Best* is a satisfying choice in that it offers all the tracks from *LaVern/LaVern Baker* and *Precious Memories/LaVern Baker Sings Bessie Smith*—a really broad perspective on the range Baker exhibited in these years on the four strongest albums of her Atlantic tenure.

When the hits stopped coming in the '60s, Baker continued touring and recording before dropping out of sight by decade's end. When found almost 20 years later, she was happily engaged as the entertainment director of a U.S. military NCO club in the Philippines, where she had been raising a family and performing for GIs. In 1988 she returned to the States to participate in Atlantic's 40th-birthday celebration at Madison Square Garden—where she brought the house down. Gradually she made her way back, performing selected concert dates, cutting "Slow Rollin' Mama" for the 1988 *Dick Tracy* soundtrack, then following her friend and former Atlantic artist Ruth Brown in the starring role in Broadway's *Black and Blue.* In early 1991 she was elected to the Rock and Roll Hall of Fame, and followed that honor with her return to recording. *Live in Hollywood '91* is the resulting document of her early comeback, being a performance recorded at Hollywood's Cinegrill club in the Roosevelt Hotel. The years have been kind to her voice; here, it sounds even more powerful than it does on some of the Atlantic sides, and age has lent it an earthy huskiness that deepens the feeling she brings to bluesier material such as "Tomorrow Night," a song identified with Lonnie Johnson. Biggest surprise: the venerable "Tennessee Waltz" done up in a strutting tempo, with Baker tossing off the verses as if she were engaged in idle chitchat; then she swoops and glides through the chorus, her voice suddenly exposing the hurt and longing she feels below the surface—a remarkable performance.

Six months after her Cinegrill performance, Baker ended her 20-year exile on record by cutting a studio album, *Woke Up This Mornin',* in New York with a host of top-flight musicians, among them guitarist Cornell Dupree, bassist Chuck Rainey, drummer Bernard Purdie, and powerhouse Ronald Cuber, who manhandles the baritone sax in delivering one sterling solo after another. Technically out of print now, this album remains available on some retail Internet sites, and is well worth seeking out. True to her versatile nature, Baker assays a wide range of material here. Blues and R&B dominate the proceedings, with the torchy reading of "Body and Soul" standing out, although she one-ups herself on "Trouble in Mind," going low for some deep blues as Dupree and Cuber support her with well-crafted, emotion-packed solos. Elsewhere, she makes a good, lusty run at the Bee Gees' "To Love

Somebody," imbuing the song with a bold eroticism uncommon to most interpretations; does Otis Redding proud with a fiery take on "Can't Turn You Loose"; then closes out the proceedings with another reading of "Tennessee Waltz," again done uptempo, but with Baker's performance even more nuanced than that heard on her live album. There are a few missteps here—the treatments of Eddie Floyd's "Knock on Wood" and William Bell's "You Don't Miss Your Water" are a bit too stolid in their arrangements, and Baker sounds unduly restrained as a result.

Recipient of a Pioneer Achievement Award from the Rhythm and Blues Foundation in 1989, Baker performed in her later years despite advancing physical disabilities. A diabetic, she eventually lost both of her legs to the disease, and also suffered a series of strokes in the '90s. Undeterred, though, she continued performing from a wheelchair until her disease caught up with her for good on March 10, 1997, stilling one of the most authoritative voices of the last half century. —D.M.

Afrika Bambaataa

★★	United DJ's of America: Electro-Funk Breakdown (Moonshine/DMC, 1999)
★★★	Looking for the Perfect Beat 1980–1985 (Tommy Boy, 2001)
★★★	Afrika Bambaataa Presents Eastside (Obsessive, U.K., 2003)

Afrika Bambaataa is one of hip-hop's seminal figures, both as DJ (his nickname was "Master of Records") and as record maker. *Looking for the Perfect Beat* covers his early work as handily as you could want—all that's missing is some liner notes. It kicks off with 1980's "Zulu Nation Throw Down," in which Bam's then-crew, the Cosmic Force, chants party rhymes over live funk (including a drummer who paradiddles just this side of disastrous) to the breaka-breaka-dawn with the infectious brio of the Furious 5 or the Funky 4 + 1. 1981's "Jazzy Sensation" beefs up the sound and smooths out the rhymes, but it's "Planet Rock," from 1982, that changed the world. Combining a pair of Kraftwerk tunes ("Numbers" and "Trans-Europe Express") over an earth-quaking groove and fuzzy call-and-response vocals from the Soul Sonic Force, the record codified both electro and Latin freestyle and remains a classic that can rock any party, any crowd, anytime. Its formula pointed the way to Bambaataa's future, including two more hits in the same vein (1983's "Looking for the Perfect Beat" and 1984's "Renegades of Funk") and the more humdrum fare that takes up *Perfect Beat*'s second half. Similarly, Bam's DJ mix *United DJs of America* is electro-heavy but lacks inspiration, though a couple of tracks (Uberzone's "Freaks," Bam's "2 Kool 4 Skool") almost make up for it. —M.M.

Bananarama

★★½	Deep Sea Skiving (London, 1983)
★★★	Bananarama (London, 1984)
★★½	True Confessions (London, 1986)
★★★	Wow! (Polydor, 1987)
★★★★	Greatest Hits Collection (Polydor, 1988)
★★	Pop Life (London, 1991)
★★★½	The Essentials (Rhino, 2002)

It would not be too great an exaggeration to suggest that Bananarama was the original Spice Girls—except that in this case, the emphasis would be on sugar and everything nice. Starting off with more enthusiasm than talent, the trio—Sarah Dallin, Keren Woodward, and Siobhan Fahey—found stardom despite its musical limitations.

As in the old days, most of the credit for their success belonged with Bananarama's producers, the suitably anonymous teams of Swain-Jolley and Stock-Aitken-Waterman. *Deep Sea Skiving,* an agreeable hodgepodge that flaunted Bananarama's amateurishness while nonetheless delivering a few decent singles, is most memorable for the mock-exotic "Aie a Mwana" and the chipper, Swain-Jolley–produced "Shy Boy." Not wishing to mess with a winning formula, Swain-Jolley were retained to produce all of *Bananarama* and most of *True Confessions,* although with somewhat diminishing returns; their embrace of unison vocal lines pulls a certain poignancy from the B-girls' voices (as "Cruel Summer," from *Bananarama,* demonstrates), but diminishes their overall pop appeal.

Enter S-A-W, a neo-disco production team that in 1986 was just entering its ascendancy. Not only did S-A-W hand the trio its biggest U.S. hit with an impossibly upbeat remake of the Shocking Blue hit "Venus," but it gave the group backing tracks so irrepressibly tuneful that Bananarama's vocal strengths (or lack thereof) were essentially beside the point. As such, *Wow!* is a perfect pop bonbon, from hook-heavy dance tunes such as "I Heard a Rumour" and "I Can't Help It" to relatively low-key confections such as "Nathan Jones." No wonder *The Greatest Hits Collection*—track for track, the group's best album—relies so heavily upon this period.

Success, however, is a cruel mistress, turning the head of even the most marginally talented. Siobhan Fahey, after marrying Dave Stewart of Eurythmics, left just before *Hits,* and Jacquie O'Sullivan was brought in as B-girl number three, a change more noticeable in the album art than in the sound of the music. The effect of the absence of Stock-Aitken-Waterman on *Pop Life,* however, was much more pronounced. Despite the efforts of ex–Killing Joke bassist Youth to add some edge to the girls' sound, their meringuelike voices seem largely unaffected by his efforts, and consequently *Pop Life* suffers.

O'Sullivan bailed, whereupon Dallin and Woodward recorded several albums—*Please Yourself, Violet,* and *Exotica*—as a duo. Mercifully, the first two have been deleted, while the third never saw U.S. release. —J.D.C.

The Band

★★★★★	Music From Big Pink (Capitol, 1968)
★★★★★	The Band (Capitol, 1969)

★★★½	Northern Lights—Southern Cross (Capitol, 1975)
★★★★	The Best of the Band (Capitol, 1976)
★★½	Islands (Capitol, 1977)
★★★★	The Last Waltz (Warner Bros., 1978)
★★★	Jericho (WEA/Rhino, 1993)
★★★	High on the Hog (WEA/Rhino, 1996)
★★★½	Jubilation (WEA/Rhino, 1998)
★★★	The Best of the Band, Vol. 2 (WEA/Rhino, 1999)
★★★★½	Greatest Hits (Capitol, 2000)

The Band didn't have a bona fide star, but the first two albums from the mostly Canadian outfit are essential influences for almost every country-rock band that followed, from Little Feat to Lucinda Williams to Uncle Tupelo. While honing their chops in Canada as backup players for the Arkansas-born rockabilly singer Ronnie Hawkins, the Band developed a strong sense of their roles as musicians and singers. They also heard a lot of tall tales about the American South that would inspire their later music. When the group left Hawkins to eventually back Bob Dylan during his mid-'60s transformation from acoustic folkie to rock poet, guitarist Robbie Robertson and keyboardist Richard Manuel absorbed Dylan's literary approach to songwriting. In 1967, the Band moved into a country house (dubbed "Big Pink") in upstate New York, where they came up with the songs for their extraordinary first album.

Music From Big Pink introduces a group with a clarity of vision that had never before been heard in rock & roll. While the Beatles were downing LSD and writing about tangerine dreams and marmalade skies, *Big Pink* was remarkably simple and direct, right down to the tiniest details. In the opening track, "Tears of Rage," the sensitivity and grace of the singing and nuances of each instrumental brushstroke underscore the desperate plea of a father saddened by his daughter's hotheadedness: "We carried you in our arms on Independence Day/And now you'd throw us all aside and put us all away."

From Robertson's stinging Stratocaster leads to Levon Helm's raunchy drumming, Rick Danko's down-home bass lines, Manuel's gospel/R&B piano playing, and Garth Hudson's majestic, churchlike organ textures, it seemed at times as if the Band was trying to work up a soundtrack for Democracy itself. But it was Robertson's remarkable ability to match the songs with the right voices—Helm's Southern twang, Danko's mournful croon, or Manuel's haunting tenor—that elevated the Band from a great musical ensemble to artful storytellers. *Big Pink* is basically a collection of short stories about ordinary Americans—as powerfully and gracefully painted onto a musical canvas as Twain's characters were written into books. The album's most famous track, "The Weight," encapsulated the mood of the album and of the times, offering a simple tale of human vulnerability in a time of great upheaval.

Robertson and company expanded on their reputation as American storytellers on *The Band.* Kicking off with the sweeping "Across the Great Divide," the group's second album combines uptempo songs (the rural dance tune "Rag Mama Rag" and working-class allegory "Up on Cripple Creek") with more delicate personal meditations (the ethereal solitude of "Whispering Pines" and bitter betrayal of "Unfaithful Servant"). This time, Arkansas native Helm's influence on Robertson's songwriting is evident, and his voice is more prominent on the album. His Southern drawl gives credibility to "The Night They Drove Old Dixie Down," a populist anthem written from the bitter perspective of a proud but powerless Civil War soldier.

With the success of the Band's first two albums came the by-products of fame: substance abuse, exhaustion, grandiosity, and greed. As a result, *Stage Fright* found the Band slipping. Robertson's songwriting took a more personal turn as he dealt with the psychological toll on his group. The highlights—"The Shape I'm In," "Daniel and the Sacred Harp," and "Stage Fright"—reveal a growing sense of anxiety and cynicism. While the playing—especially Hudson's evocative organ and accordion parts—remains first rate, the sharply detailed character sketches of the first two albums are in shorter supply.

Cahoots is a near-total wash. The carnivalesque atmosphere of the music and cinematic sweep of the lyrics never completely gel. Only the lead-off track, "Life Is a Carnival," "4% Pantomime" (with a guest spot by Van Morrison), and Helm's gorgeous interpretation of Dylan's "When I Paint My Masterpiece" deliver anything approaching the quality of the Band's previous work. The dubious distinction of *Cahoots* is that it contains Robertson's first truly awful song, "The Moon Struck One." Perhaps the most portentous song is the prophetic plea "Where Do We Go From Here?"

The Band never completely recovered from the lost innocence of *Stage Fright* and *Cahoots.* While *Rock of Ages* is an excellent double-disc document of the group's early-'70s live performances, *Moondog Matinee* finds the Band retreating to the safety of its collective childhood with a set of interesting if unremarkable cover versions of '50s and '60s R&B songs. On *Northern Lights—Southern Cross* Robertson reclaims his reputation as one of rock's great songwriters ("Ophelia," "Acadian Driftwood," and "It Makes No Difference"), although the synthesizer flourishes date the overall sound. *Islands* is a barely listenable collection of outtakes the Band released to fulfull its contractual obligations to Capitol Records.

When the Band decided to call it quits (at least, for a while), they staged a farewell concert in San Francisco featuring an all-star cast of their musician friends (including Neil Young, Joni Mitchell, Van Morrison, Eric Clapton, the Staple Singers, Muddy Waters, Dr. John, and Emmylou Harris) and mentors (Ronnie Hawkins and Bob Dylan). *The Last Waltz,* the Martin Scorsese film that chronicled the concert, is one of the best rock movies of all time, and the concert album of the same name (recently expanded into a four-CD box set) is an excellent companion piece.

In 1983, the Band (without Robertson) regrouped and began touring small clubs again, but they didn't record a new album for another decade. *Jericho* was dedicated to Manuel, who had committed suicide while on the road with the Band in the mid-'80s. It was a surprising return to form for the Band, even without Robertson, its primary songwriter and guiding light. Gone are the sweeping storylines and stinging guitars, but the Band's signature blend of vocals, instrumentation, and American musical styles remains intact. *Jericho* lacks the edge of the Band at its prime, but the interpretations of Bruce Springsteen ("Atlantic City"), Bob Dylan ("Blind Willie McTell") and Muddy Waters ("Stuff You Gotta Watch") and the moving tribute to Manuel ("Too Soon Gone") make this album a fascinating milestone in the group's development. *High on the Hog* basically repeats *Jericho*'s formula, with less successful results. *Jubilation* finds the reunited Band growing, its mix of acoustic instruments and roughened voices revealing a new, dignified maturity. By 1999, however, the death of Danko and the loss of Helm's voice to throat cancer treatments effectively put an end to the Band.

Greatest Hits is a misnomer—"Up on Cripple Creek" was the Band's only Top 30 single—but it's a solid chronological anthology of the group's best songs, and offers more music than the earlier collection, *The Best of the Band. The Best of the Band, Vol. 2* is a decent overview of the reunited Band's work. All of the original albums have been remastered and reissued with previously unreleased outtakes and detailed liner notes, and are well worth seeking out. —M.K.

The Bangles

★★★	All Over the Place (Columbia, 1984)
★★½	Different Light (Columbia, 1985)
★★½	Everything (Columbia, 1988)
★★★	Greatest Hits (Columbia, 1990)
★★½	Doll Revolution (Koch, 2003)

Mining the early Beatles for rock & roll catchiness and the Mamas and the Papas for vocal harmonies, this self-conscious L.A. girl group began with '60s revivalism of an earnest, unexamined sort and ended up with lush, radio-perfect pop. Extremely capable practitioners of hitcraft, the band played tightly and chose their songs well—and achieved gigantically the dubious triumph of sound over significance. With "Going Down to Liverpool" and "Hero Takes a Fall," *All Over the Place* presented a quartet of British Invasion fans well versed in the chiming guitars and brisk melodies of a competent second-string act of that era (the Bangles were hardly fake Kinks, for example; more like fake Searchers).

Different Light reaped hits aplenty, in Prince's "Manic Monday," the funky novelty "Walk Like an Egyptian," and Jules Shear's lovely "If She Knew What She Wants." Rhythm guitarist Susanna Hoffs mastered a singing style that combined pep, coy sweetness, and an occasional plaintive resonance; bassist Michael Steele's "Following" featured tough-talk vocalizing that nicely leavened the band's tendency toward a cloying, somewhat arch delivery.

On *Everything,* Hoffs' "In Your Room" caught definitively the Bangles' gift for pastiche—its strings recalled the Stones' "2,000 Light Years from Home," its organ riffs echoed the Detroit Wheels, its guitar was crunchy like sanitized punk. "Eternal Flame" was a widescreen, fairly bathetic ballad, its orchestral sweep connoting a new, unwelcome "seriousness." Predictably, *Greatest Hits* is the best Bangles—no real thematic consciousness enlivened their individual albums, and on the compilation there's the nice addition of two sharp singles, Paul Simon's "Hazy Shade of Winter" and the Grass Roots' "Where Were You When I Needed You?" Far more authentic an enterprise than, say, the Monkees, the Bangles put out smart, clean, calculated pop music. After a number of ill-fated solo projects, the group came together in 2000 for the inevitable reunion. But even nostalgia has its limits. —P.E./E.L.

Buju Banton

★★★	Stamina Daddy (VP Records, 1992)
★★★	Mr. Mention (Penthouse, 1993)
★★★½	Voice of Jamaica (Penthouse/Mercury Records, 1993)
★★★★½	'Til Shiloh (Penthouse/Loose Cannon, 1995)
★★★★	Buju Banton: The Early Years (Penthouse/VP Records, 1996)
★★★½	Inna Heights (Penthouse/VP Records/Island Records/PolyGram, 1997)
★★★½	Unchained Spirit (Penthouse Productions/Epitaph, 1999)
★★★	Buju Banton and Posse: Rudeboys Inna Ghetto (IMC Music, 1999)
★★★	Friends for Life (Penthouse/Epitaph/VP Records, 2003)

When he was 17, he penned and voiced "Boom Bye Bye"; two years later, thanks to that track, which advocates shooting gay men in the head, Buju Banton was the international poster boy for homophobia. No excuses, but "batty bwoy" lyrics are de rigueur for Jamaican MCs, yet today's Buju is the sole reggae artist to publicly acknowledge one's right to love whom one chooses.

Despite his grave juvenile error, Buju is the worthiest successor to the mantle of Bob Marley. "He's our sun," says the respected DJ (reggae rapper/producer) Tony Rebel. "Every other reggae artist revolves around him." Cleaving to Bob's implicit rule that yuh haffe sing rough for the sufferah and following the Gong's generous example of lyrical inclusiveness, Buju's coarse, resinous vocals are more compelling than just about anyone else's tones.

The 15th child of an inner-city Kingston family, Buju descends from Jamaica's Maroons—fugitive slaves who tormented the British for nearly 100 years, until the colonial government was forced to sign a treaty that guaranteed Maroons perpetual freedom and self-government. Chubby baby cheeks earned Mark Myrie his first name—*buju* is the Maroon term for "breadfruit"—but soon after Buju passed through the gates of the fabled Penthouse Studio, he conquered Jamaica's dancehalls as a gangly, rail-thin, gravel-voiced teen, a.k.a. Mr. Mention.

That sobriquet became the title of his debut set, a collection of fifteen sizzling boomshots. Dropping his tightly coiled, percussive bass flow over relentless digital beats, Buju slugs rhymes fast, hard, and deep, like Ali at his prime. Even if non-Jamaicans sometimes can't penetrate his thick patois flow, like all reggae greats Buju draws listeners into his world. Tracks such as "Batty Rider," a bouncing hymn to scantily clad dancehall "models," evoke dancehall's escape from tropical ghetto pressures via blissful self-regard and sinewy hip grinds. Yet even then, Buju revealed a razor-keen social conscience in "How the World a Run," an incisive dissection of 20th-century postcolonialism.

In 1993, soon after NYC-based indie Loose Cannon released Buju's aptly titled *Voice of Jamaica*, "Boom Bye Bye" surfaced in a reggae compilation and Buju's crossover plans tanked. Two years later, though, he stunned the international reggae axis by regenerating roots-style reggae with *'Til Shiloh*. Alternating his signature DJ bluster with a new Marley-esque yet quintessentially Buju singing style, *Shiloh* is powered by a shatteringly honest emotionalism and a soul guidance unmarred by the usual pieties.

Buju sings in "Prelude," "Though you may think my faith is in vain/'Til Shiloh we will chant Rastafari's name," then chuckles and muses, "All my days/seems they have been wasted, eh?" Buju had been down to the river and reborn as a Rasta man, but he hadn't wasted a day. Whether wringing every drop of emotion from the soaring title track or treading more familiar good-body-gal turf in the rough-riding "Champion," Buju proves that a reggae artist can praise Jah and Janet equally. With that release, dancehall and roots styles became simply opposite ends of reggae's wide-ranging territory. Followup albums *Inna Heights* (nearly as sublime as *Shiloh*), *Unchained Spirit*, and *Friends for Life* offer the same compelling blend of reggae's rowdy and rapturous. —E.O.

Barenaked Ladies

★★★	Gordon (Reprise, 1992)
★★★	Maybe You Should Drive (Reprise, 1994)
★★	Born on a Pirate Ship (Reprise, 1996)
★★★½	Rock Spectacle (Reprise, 1996)
★★★½	Stunt (Reprise, 1998)
★★½	Maroon (Reprise, 2000)
★★★½	Disc One: All Their Greatest Hits (1991–2001) (Reprise, 2001)
★★	Everything to Everyone (Reprise, 2003)

From the Coasters to Biz Markie, comedy has occupied an important place in rock history. But from

"Purple People Eater" to Jimmy Fallon, it's occupied a dubious (often downright irritating) space as well. Repetition is the key to pop brilliance—a song has to sound better each time you hear it. But repetition makes jokes stale—when's the last time you laughed at a bumper sticker? Musicians seem to realize this. Maybe that's why no one wants to be a gag band. Or maybe it's just that pranksters get laid less often than brooding types.

So, for all their shortcomings, you've got to give the Ladies credit for not going all serious on us. These amiable Canadians are actually more endearing the weaker their jokes are. You root for the songwriting team of Ed Robertson and Steven Page, who are considered a national treasure among their countrymen. Both the intensity of their cult and the limitations of its size were surely earned—they deserved as much notice and not much more. Tracks such as "Be My Yoko Ono" are so benign they never threaten to split your sides. But if you're warmed by the chuckle, most any of these discs will make you smile and tap your feet.

For the rest of us, there's the best-of. In the late '90s, when pop mutations thrived amid a confused marketplace, the absurdist "rap" "One Week" was the big breakthrough. Even better is "It's All Been Done," a wise (not to mention catchy) perspective on continuing to make new stuff this late in the history of stuff. No, they won't be giants, but the gawky "If I Had $1,000,000" uncovers the elusive secret at the heart of the Ladies' popularity—how to overindulge in modesty without resorting to a self-effacing cringe. —K.H.

MC Paul Barman

★★★★	It's Very Stimulating (Wordsound, 2000)
★★★	Paulellujah! (Coup d'État, 2002)

Paul Barman—Brown graduate, sometime illustrator and puppet-maker, short, bespectacled Jew—found a perfect partner in legendary hip-hop producer Prince Paul, himself a comedian of some repute. Despite appearances, it was an inspired pairing. The producer's bemused, jovial beats on *It's Very Stimulating* proved to be a dream fit for Barman's not-quite-on-the-beat flow and nasal pitch. As an MC, Barman had nothing but surprises: a predilection for polysyllabic rhymes, esoteric lyrical references, and an aww-shucks folksiness that's only available to genre outsiders. His debut name-checked Chuck Close, Wallace Shawn, and Krzysztof Kieslowski, and also boasted that "my dandy voice makes the most anti-choice granny's panties moist." Elsewhere, he argued against test-based school curricula and fantasized about making it in the Metropolitan Museum of Art.

Paulellujah!, his first full-length album, stretched the shtick to its extreme. "I make def tunes," he says on "Excuse Me," "take from MF Doom and Jeff Koons." Barman uses a host of producers here, and the lack of sonic consistency holds him back, although some of his most transcendent storytelling comes on the two-part "Anarchist Bookstore," a rambling tale about the late-afternoon goings-on of a leftist gaggle. At his worst, Barman is clunky and awkward, but at his best, his songs are like tone poems with a purpose, exploring the multitudinous permutations of good ol' syllables, and the various meanings such an experiment might evoke. —J.C.

Syd Barrett

★★★	The Madcap Laughs (1970; EMI, 1990)
★★★	Barrett (Capitol/EMI, 1970/1990)
★★★	The Peel Sessions (Dutch East India/Strange Fruit, 1987)
★★	Opel (Capitol/EMI, 1989; Alliance, 1996)
★★	Crazy Diamond (Harvest/EMI, 1993)
★★★½	The Best of Syd Barrett: Wouldn't You Miss Me? (Harvest/Capitol/EMI, 2001)

With Brian Wilson, Roky Erickson, Kurt Cobain, and a handful of others, Syd Barrett is among rock's most egregiously troubled geniuses, a drug casualty whose primary legacy is his crucial role in founding Pink Floyd and steering the band through its initial batch of singles and a monumental debut album, *The Piper at the Gates of Dawn.* On that album, Barrett pioneered space rock with his singing, songwriting, and guitar playing only to lose his grip on the band, and reality, as LSD slowly did him in. His subsequent solo recordings—done with the empathetic production assistance of friends such as manager Peter Jenner and David Gilmour, the guitarist who replaced him in the Floyd—provide mere glimpses of what might have been.

At their best, *The Madcap Laughs* and *Barrett* can be entrancing. Against muted backdrops that suggest a warmer, more bucolic answer to the Floyd's epic psychedelia, Barrett strums a guitar and gently sing-speaks lyrics that combine nursery-rhyme innocence with nightmare visions. His idiosyncrasies meld with haunting melodies on "Octopus," "Terrapin," and "Baby Lemonade," but the albums contain too many fragments, wanderings, and false starts to qualify as more than cult items—it's like listening to a meltdown in slow motion, with the listener as voyeur. The problem is exacerbated on *Opel,* which collects leftovers such as "Word Song," in which the singer sounds like he's trying to identify the strange pictures floating through his ravaged mind. *Crazy Diamond* collects all three albums, plus even more depressing bonus tracks, to create a picture of madness that verges on the exploitive.

The Best of Syd Barrett, on the other hand, plays like a celebration of eccentricity. Bereft of the filler that marred Barrett's studio releases, it's a coherent statement of outsider art, fleshed out with two previously unreleased songs. These include the solo acoustic "Bob Dylan Blues," a witty and charmingly low-key take on a singer that Barrett, in a better world, might've one day rivaled. —G.K.

Basement Jaxx

★★★★	Atlantic Jaxx Recordings: A Compilation (1998; Astralwerks, 2001)
★★★★	Remedy (Astralwerks, 1999)
★★★★½	Rooty (Astralwerks, 2001)
★★★★½	Kish Kash (Astralwerks, 2003)

House music tends to mythologize itself as an urban wonderland where anything can happen, but few artists make music that lives up to that fantasy the way Basement Jaxx's does. South Londoners Simon Ratcliffe and Felix Buxton, who began recording tracks together in the mid-'90s, reimagine Prince's Paisley Park as a bustling, shape-shifting grooveathon taking in dub, psychedelia, Vocoder chants, soca horns, Latin-jazz vibes, football-hooligan yell-alongs, and tuff-girl vocals, all set to a luscious, irresistible 4/4 beat.

You can hear Ratcliffe and Buxton's vision taking shape on the dozen early sides collected on *Atlantic Jaxx Recordings: A Compilation*. "Samba Magic" and "Belo Horizonti" (the latter credited to the Heartists) explore Latin music with an assurance shocking in a pair of pasty Englishmen, while the thuggish stomp of "Set Yo Body Free" and the euphoric synth stabs of "Fly Life" are definitive mid-'90s club anthems. It's *Remedy*, though, where the duo goes nova. From the Spanish guitar strum that hooks the synth-string disco of "Rendez-Vu" to the carnival-bound horn blasts of "Bingo Bango" to "Same Old Show" 's playful retooling of the Selecter's "On My Radio," the album displays more variety than most house DJs demonstrate in a six-hour set. The disc's masterpiece was "Red Alert," the best "1999" rewrite ever, complete with a bass hook every bit as irresistible as Prince's synth riff.

Improbably, *Rooty* was even better. Some club rats cried sellout because the Jaxx made the tunes short and structured them like actual songs instead of stretches of beat punctuated by occasional stuff on top. Everybody else danced their asses off. The irresistible "Romeo" plays follow-the-bouncing-hook, while "Get Me Off" and "S.F.M. (Sexy Feline Machine)" make electro bleeps signify like hot-'n'-heavy breathing. And "Where's Your Head At" turns a Gary Numan sample until it both jacks your body and bangs your head at once, escaping house's often narrow parameters by refusing to put on the same old show. *Kish Kash*, released in 2003, is more kaleidoscopic-leaning pop, with 'N Sync's JC Chasez buttering up the swarming rock-dance "Plug It In," Siouxsie Sioux making the punk-disco title cut stick like porcupine quills, and Meshell Ndegéocello paying explicit homage to Prince on the nasty "Right Here's the Spot." Unknowns like Emily (the piping "Hot and Cold") and Totlyn Jackson ("Supersonic") hold their own, as Buxton and Ratcliffe prove themselves to be the best production team in the world this side of the Neptunes. —M.M.

★★ Hawthorne, CA: Birthplace of a Musical Legacy (Capitol, 2001)
★★★ Sounds of Summer: The Very Best of the Beach Boys (Capitol, 2003)

No pop musician has expressed the thrill and pain of being a teenager better than the Beach Boys' Brian Wilson. Early hits such as "Surfin' U.S.A.," "Little Deuce Coupe," "Fun, Fun, Fun," and "I Get Around" provided a road map to '60s suburban California kicks, and put dreams of riding the waves at Doheney, Del Mar, Tressles, and Laguna in the minds of kids who'd never even seen the Pacific Ocean. Of course, not all the songs were about waves and cars—from the start many were about Brian Wilson's own loneliness, vulnerability, and deep psychic pain. The delicately melancholy "In My Room" and the yearning ballad "Surfer Girl," both from 1963, hinted at a heavy undertow pulling below the group's frothy surface.

Wilson formed the Beach Boys in 1961 when he was 20, with his two younger brothers, Carl and Dennis, their cousin Mike Love, and neighbor Alan Jardine (who was replaced on two early albums by another childhood friend, David Marks). The group's first recording, the crude doo-wop anthem "Surfin," became a regional radio hit and drew the attention of Capitol Records. The next single, "Surfin' Safari," released on Capitol in 1962, hit #14 on the pop charts and was followed by "Surfin' USA," which mapped out Wilson's vision: to combine Chuck Berry's rock & roll guitar with the intricate vocal harmonies of the Four Freshman. Listening to the Beach Boys' early material is a thrill—you can hear Wilson's confidence and abilities grow with each new song, as he crafts increasingly daring instrumental arrangements, drives the group's sunny vocal harmonies into unexpected, often magical places, and develops ingenious ways of using the studio to make his music come to life. "Don't Worry, Baby" and "The Warmth of the Sun," from 1963's *Shut Down, Vol. 2,* are among the most lush and wonderful songs the Beach Boys ever recorded. "I Get Around," with its handclap rhythm, surf guitar riff, and Wilson's wild falsetto, is a career high point. Even the mediocre *Beach Boys Christmas Album* is memorable for Wilson's use of studio orchestration—something that would come to mark his brilliant mid-'60s productions.

By 1964, the Beach Boys rivaled the Beatles as the world's preeminent pop group—and it was a rivalry Wilson took extremely seriously. Touring took its toll on the Beach Boys' leader, though, and at the end of a 1964 European trip Wilson suffered a nervous breakdown and decided to quit the road. While the rest of the group toured (with Glen Campbell initially replacing Wilson on stage, later Bruce Johnston), Brian stayed home to work on new songs. This marked a turning point—allowing Brian unlimited time to perfect his arrangements and develop his studio craft. For *Today!,* he wrote most of the lyrics, cut the backing tracks, and planned the vocal arrangements. By the time the group came home, all they had to do was lay down their vocals. The Beach Boys had essentially become Brian's band. And Brian wasn't writing novelty surf songs anymore.

The results crystallize on side two of *Today.* The music is orchestral, idiosyncratic, and revealing—a direct line into Wilson's troubled romantic soul. "Kiss Me, Baby" and "Please Let Me Wonder," in particular, are as complex and personal as any pop music ever made. While *Pet Sounds,* from two years later, remains Wilson's masterpiece, the second side of *Today* is where that album really starts.

Following *Today,* the Beach Boys rushed out *Summer Days (and Summer Nights!),* notable mainly for the stellar single "California Girls," then Brian went back to the studio to finish *Pet Sounds.* Inspired by the Beatles' *Rubber Soul, Pet Sounds* was Wilson's attempt to make an entire coherent, emotionally honest record—a song cycle of loneliness, hope, and the search for love. It was also his most elaborate production, for which Wilson created complex, unorthodox instrumental landscapes to give his songs a breathtaking majesty. "God Only Knows," one of the great love songs of all time, and "Caroline, No," Brian's heartbreaking meditation on lost innocence, may be the most remarkable tracks, but from start to finish *Pet Sounds* is mind-blowingly transcendent even 29 years after it was made.

Ironically, *Pet Sounds* didn't sell well—the next album, *Party,* a mostly acoustic "live" album recorded with friends (including Jan and Dean) in the studio, sold much better on the strength of its #2 single, "Barbara Ann." Also notable are three Beatles covers and a version of Dylan's "The Times They Are a-Changin'."

Brian soon returned to the studio with the idea of making an album even more complex than *Pet Sounds*—one he intended to change pop music forever. Collaborating with lyricist Van Dyke Parks, Wilson started on *Smile,* which featured intricate vocal sections, songs divided into suitelike parts, and generally the most far-out experiments he'd attempted. The other Beach Boys didn't support Brian's extravagant efforts, and Wilson, already wrestling with his own mental instability and the emotional fallout from experiments with pot and LSD, buckled under the pressure. The album was abandoned. Rerecorded versions of various songs appear scattered over '70s albums, but it wasn't until 2004 that Wilson went back into the studio to complete the project he intended to be his masterpiece (see Brian Wilson entry).

One hint at what Wilson was initially attempting with *Smile,* however, is "Good Vibrations," which he had started during the *Pet Sounds* period and released as a single in 1966. Recorded in three studios over six months, it is one of the most densely woven songs ever recorded—a "pocket symphony," Wilson called it, in which he layered vocal track upon vocal track, and employed instruments including tubas, marimbas, and a theremin, to create three and a half of the most riveting minutes in pop music. Released as a single in October 1966, "Good Vibrations" stayed in the Top 40 for 12 weeks.

The next Beach Boys album, *Stack-o-Tracks,* is essentially a Beach Boys karaoke record containing just instrumental backing tracks that "you can play along to"—fascinating for Beach Boys obsessives, perhaps, but unnecessary for anyone else. The group attempted to salvage the *Smile* fiasco with the inconsistent *Smiley Smile,* for which they pieced together rerecorded portions of *Smile*'s epic "Heroes and Villains," "Vegetables," and the lovely "Wonderful." (It also contained the "Good Vibrations" single.) Released in September 1967, at the height of the summer of love, LSD, and political turmoil over the Vietnam War, the album was like a strange throwback—it highlighted how out of touch these suburban California surfers had become with the psychedelic times. The album bombed, and the Beach Boys' commercial career never quite recovered.

But while the group wouldn't have another #1 song until "Kokomo" in 1988, the Beach Boys continued to make some fascinating, mostly overlooked music into the '70s. One of the great thrills of discovering the Beach Boys, in fact, is to dig through these later albums for hidden gems. *Wild Honey, Friends, Sunflower, Surf's Up,* and *Love You* are all fantastic albums in their own way, and great songs can also be found buried on the often-dismissed *Carl and the Passions, 15 Big Ones,* and *Holland.*

Wilson floated in and out of the group during this time, no longer intent on being the producer or dominant songwriter, but just an occasional contributor. Brothers Carl and Dennis stepped up to fill Brian's shoes—Carl proved himself a talented producer and the group's most exciting lead singer, with a warm R&B-styled sound; Dennis also produced tracks, and demonstrated a gift for writing songs with gentle, introspective melodies. Unlike the grand productions of Wilson's mid-'60s records, these albums are sparse, simple, free of studio flourishes—not as ambitious, for sure, but easygoing and warm.

Friends, from 1968, typifies the period. If you can get past sappy wannabe-hippie tracks such as "Wake the World" and "Transcendental Meditation," the album is gorgeous, with standout moments including "Meant for You," one of Mike Love's finest vocals, and Brian's "Busy Doin' Nothin'," a samba shuffle in which Wilson details his homebound life—the lyrics even include a to-do list for the day and an invitation to come visit him (complete with directions to his house). *Wild Honey* is a rougher album of California soul, on which Carl contributes his finest vocals on the excellent "Darlin' " and "I Was Made to Love Her," a tribute to Stevie Wonder. *20/20,* similarly, features excellent vocals by Carl on songs such as "I Can Hear Music" and "Time to Get Alone," as well as Dennis's sweet "Be with Me" and another of Brian's stay-at-home gems, "I Went to Sleep."

The next album, *Sunflower,* is the epitome of '70s California cool. Songs such as "This Whole World," "Add Some Music to Your Day," "Forever," and "Cool, Cool Water" are filled with crisp melodies, delicate harmonies, and a mood of hope and sunshine. While it's often written that the Beach Boys never recovered once Brian abdicated leadership, *Sunflower* is a testament to what they could still do as a group. *Surf's Up* is darker, with a four-minute title track (including the lines "surf's up/there's gonna be a tidal wave") that's like the hangover to all the group's early surf-song highs. The album also features the excellent "Long Promised Road," "Feel Flows," and Brian's heartbreaking " 'Til I Die." *Carl and the Passions—So Tough* is weaker, with a few standout cuts such as "You Need a Mess of Help to Stand Alone" and "Marcella." *Holland* is a mess of an album recorded mainly in Holland without Brian, but features a pair of his excellent songs, "Sail on Sailor" and "Funky Pretty" (both sung by drummer Ricky Fataar.) *15 Big Ones,* featuring mostly covers, was an attempt to capitalize on Brian's return to the band (which didn't last), but the next year's *Love You* is one of Wilson's most overlooked works, essentially a Brian solo album, with gentle piano melodies in songs that show a man who's been damaged but not destroyed. (It also features some hilarious and bizarre tunes, such as "Johnny Carson," an adoring ode to the late-night television host.)

The album didn't get much attention, and the Beach Boys went on without Brian, releasing a string of inconsequential albums including 1978's *MIU,* produced by auxiliary Beach Boy Bruce Johnston, 1979's *L.A. (Light Album),* and the abysmal *Keepin' the Summer Alive.* In 1988, the Beach Boys topped the charts with "Kokomo," from the *Cocktail* movie soundtrack, but the next and last album, 1992's *Sum-*

mer in Paradise, produced by Mike Love, is perhaps the group's worst.

Unfortunately, the great Beach Boys two-record compilation *Endless Summer* from 1974—an album that helped put them back on the map after their '60s, slide—is out of print. But after a long period of mismanagement, the group's catalogue is back in stores with well-done two-for-one releases of all the original albums (with superb liner notes), and a new series of greatest-hits packages. Though it's a behemoth collection (five discs in all), even casual fans will find plenty to love on *Good Vibrations,* which includes key parts of all the group's albums, plus an excellent selection of alternative takes, a capella tracks, and demos, as well as the only officially released portion of the *Smile* sessions. It also includes a bonus disc of unreleased material including great tracking sessions, demos, and rarities. Also wonderful is the *Pet Sounds Box* set, a painstakingly compiled five-disc collection (with a 125-page explanatory booklet) that includes the first ever stereo mix of *Pet Sounds* (Brian recorded in mono, because he was deaf in one ear), as well as bonus tracks, in-progress studio sessions, vocal-only tracks, and alternative takes.

Beach Boys Greatest Hits, Vols. 1–3 is a basic introduction that breaks down the group's major songs chronologically. *Endless Harmony* is a mixed bag of unreleased tracks, including stereo mixes of "Kiss Me, Baby," a great live version of "Do It Again," and another mix of Brian's devastating " 'Til I Die." *Hawthorne, CA: Birthplace of a Musical Legacy* is two discs of leftovers, alternate versions, studio clowning, and other arcana—nothing essential but lots of fun. The only other current collection is *Sounds of Summer: The Very Best of the Beach Boys,* which gathers all their hits, from "Surfin' Safari" to "Kokomo." Perhaps modeled after *The Beatles 1,* a massive success, *Sounds of Summer* is not nearly as impressive—unlike the Beatles, the Beach Boys' best stuff often wasn't the hits, but the secret treasures. —J.F.

Beanie Sigel

★★★	The Truth (Roc-A-Fella, 1999)
★★★	The Reason (Roc-A-Fella, 2001)

Earning the nickname Broad Street Bully for a punishing, brutal rhyme style and unforgiving portraits of Philadelphia crime life, Beanie Sigel has acted as Roc-A-Fella's muscle. Coming up under Jay-Z's benevolent wings, Sigel debuted in 1999 with *The Truth,* featuring the searing title track (produced by a then-unknown Kanye West) and other grim entries, such as the prison tale "What Ya Life Like." The monochromatic delivery, with it's simplistic yet effective wordplay, and the limited variety of content takes a toll. For his sophomore effort, Beanie lightened up a bit, engaging the club-track template on songs like "Beanie" and remaking an EPMD classic with Roc cohort Memphis Bleek, "So What You Saying." Sigel played to his strengths with songs like the West-produced "Nothing Like It" and the emotional "Mom Praying," with Scarface. Sadly, Sigel proved just how real he kept it when he found himself in a heap of legal trouble that stemmed from various 2002 and 2003 incidents in. His career seems to be indefinitely derailed. —C.R.

Beastie Boys

★★★★★	Licensed to Ill (Def Jam/Columbia, 1986)
★★★★★	Paul's Boutique (Capitol, 1989)
★★★½	Check Your Head (Grand Royal/Capitol, 1992)
★★	The In Sound From Way Out! (Grand Royal/Capitol, 1992)
★★★★	Ill Communication (Grand Royal/Capitol, 1994)
★★★½	Some Old Bullshit (Grand Royal/Capitol, 1994)
★★★★½	Hello Nasty (Grand Royal/Capitol, 1998)
★★★★	Sounds of Science (Grand Royal/Capitol, 1999)
★★★★	To the 5 Boroughs (Capitol, 2004)

The Beastie Boys—Adam "Ad Rock" Horovitz, Adam "MCA" Yauch, and Michael "Mike D" Diamond—have spent their entire career trying to live down their first record and live up to their second. That they have managed to do either, let alone both, is one of the not-particularly-minor miracles of reinvention that rock & roll has long thrived on.

There is little overstating the importance of the Beasties' debut, *Licensed to Ill.* It arrived out of nowhere, following some negligible hardcore punk singles, one hilarious prank phone call on wax ("Cookie Puss"), and two singles on the then-upstart Def Jam label. (Not for nothing did the Beasties collect this early material under the name *Some Old Bullshit,* aka *S.O.B.,* which can be summed up thusly: enjoyable, yes; essential, no). From the Led Zeppelin sample that opened the album to the *Green Acres* sample that closed it, *Licensed to Ill* was bombastic and hilarious, driven equally by Saturday-morning cartoons, punk attitude, Jamaican bass, '70s rock strutting and '80s street swagger. It was also a phenomenon: It was the first credible hip-hop album from a white group, and it became the fastest-selling debut in Columbia Records history, something that never would have been possible if the record company had not convinced the Beasties to drop their original title, *Don't Be a Faggot.*

Make no mistake: Although the Beasties matured quickly and continually, at this point, they were adolescents with microphones and the chance to tell the world to suck their dicks, which is exactly what they did. *Licensed to Ill* is filled with enough references to guns, drugs, and empty sex (including the pornographic deployment of a Wiffle-ball bat in "Paul Revere") to qualify as a gangsta-rap cornerstone. The Beasties would later try to explain away their *Licensed* personas as a joke—"the most illingest B-boy" as a parody of rock-star excess—and though it's doubtless more complicated than this, it's also clear from the pirates-on-the-prowl boasts of the first cut, "Rhymin' & Stealin'," that there's a lot of playground playacting at work.

Producer Rick Rubin had already rolled out skeletal hip-hop rhythms with L.L. Cool J's *Radio* (1985) and had topped the charts in 1986 with a blend of rock guitars and rap on Run-D.M.C.'s "Walk This Way." For *Licensed to Ill,* the producer upped the ante on both styles—the beats clanked harder and rumbled deeper, the guitars aped the skunk rock of Alice Cooper and Motörhead. "Fight for Your Right" became the pop-metal anthem the Beasties would forever try to live down (going so far as to apologize for it on the liner notes of their 1999 retrospective, *The Sounds of Science*). But the music of "The New Style" and "Hold It Now, Hit It" was radical and inventive, full of electro-rhythms and cavernous bass punctuated by guitar slams and breakbeats. For their part, the Beasties brought a sensibility born of cathode-ray-tube overexposure and liberal-arts majors—MCA name-checks *Barney Miller*'s Abe Vigoda and Picasso. But they also brought with them a dream cultivated by coming of age in downtown Manhattan clubs in the early '80s, with punk ebbing and rap ascendant: a vision of black and white music and audiences not just side by side but thoroughly inseparable. Ad Rock's nasal sneer was an instant hip-hop classic (you can hear its effect on Cypress Hill's B-Real, to say nothing of Eminem); MCA's growl got the party started right; and Mike D, well, Mike D tried hard to keep up and did.

Licensed to Ill sold 9 million copies, and after the Beasties fell into a royalty dispute with Def Jam, they decamped from Manhattan for Los Angeles, where they rented a house in the Hollywood Hills and began work on their second masterpiece. *Licensed to Ill* was the Beasties as the Three Stooges, full of comic aggression; *Paul's Boutique* was the Beasties as the Marx Brothers, full of comic surrealism. With producers the Dust Brothers, the Beasties introduced a dense, and densely funky, music woven of endless samples. It was, as they named the suite that ended the album, "B-boy Bouillabaisse," and the references flew faster and wilder than ever: David Bowie, Bob Marley, Clint Eastwood, Pink Floyd, the Funky Four Plus One, the Beatles, Fred Flintstone, J.D. Salinger, Jimi Hendrix, the Brady Bunch, Joni Mitchell, Galileo, Run-D.M.C., Ricky Powell, and on and on until the break of dawn. Moving to the West Coast, the Beasties pioneered psychedelic hip-hop, which was mind-expanding in text and texture. It would take seven years until the world would catch up with the expansive grooves and mindset of *Paul's Boutique,* at which point the Dust Brothers would be helping to make Beck a star. Meanwhile, the Beasties were still rhyming about girls, drugs, guns, and watching television, though now with a growing social conscience: They wear condoms, offer compassion to the homeless bum of "Johnny Ryall," and preach that "racism is a schism on the serious tip" to the knuckleheads in "Looking Down the Barrel of a Gun."

When *Paul's Boutique* stiffed commercially, the Beasties regrouped at their G-Son studios, in L.A., built themselves a skate ramp, and began to re-create themselves as a total cultural experience. *Check Your Head* arrived with the Beasties' own magazine and label, both named Grand Royal, and a Beastie-approved wardrobe, which was sold at Mike D's X-Large stores in New York and L.A. The album took its name from *Flex Your Head,* a 1982 compilation of Washington, D.C., hardcore on the Dischord label, marking a return to the Beasties' hardcore-trio roots. This is where they went back to the basics, returning to their instruments, so they could try to play the beats they once sampled and bash their way through sloppy rock songs like "Gratitude." Conceptually, it was a breakthrough; but of all their records, *Check Your Head* has aged the worst. The freestyling on "Pass the Mic" (where Mike D rhymes "commercial" with "commercial" and offers the novel advice to "be true to yourself") sounds stiff, and when they try to replicate '70s lounge-funk on the organ-driven "Lighten Up," it's downright embarrassing. (Their not-rare-enough rare grooves are collected on *The In Sound From Way Out!,* and you are advised to spend your money on any random Grant Green or Meters record.) Despite standouts like "So Whatcha Want," the indie-rockrap-band concept didn't really gel until *Ill Communication* was released.

For one thing, the Beasties—with help from Mario Caldalto—had gotten better at producing themselves. *Ill Communication* was more layered and tricked-out, not as spare and homemade as *Check Your Head.* Now the beats sounded like they had been cooked up in a laboratory, not knocked together in a garage; the album unfolded with strange, dubbed-up sonic detours into flute interludes and fuzzed-out rock and organ jams that offered the surprises of a good DJ set. (And the instrumentals centered on keyboardist Money Mark, who could actually play.) Mike D got his yoga on in “Root Down”; in “Sabotage,” Ad Rock struck back at media snoopers who’d crashed a friend’s wedding; and MCA was the spiritual seeker who’d discovered Buddhism while snowboarding. He was the group’s moral center, laying down the law in “Sure Shot” (“The disrespect to women has got to be through”), laying out his mission in “Do It” (“Slowly but surely I seek to find my mind”), laying out hip-hop genealogy in “Alright Hear This” (“I give respect to what’s been borrowed and lent/I know this music comes down from African descent”), and bringing back the old dream of black and white audiences together, also on “Sure Shot” (“Send my rhymes out to all nations/Like Ma Bell, I’ve got the ill communications”). In the year Kurt Cobain checked out, 1994, the Beasties became indie-rock leaders, headlining that year’s Lollapalooza alongside the Smashing Pumpkins.

In the four years that followed *Ill Communication,* the Beasties moved back to New York and produced a nearly perfect synthesis of their early and later work. *Hello Nasty* combined the anarchic wiseass humor of *Licensed to Ill* with the musical reach of *Paul’s Boutique,* and yes, they played the instruments (or some of them). The return to New York brought back an old-school vibe: “Super Disco Breakin’ ” the lead cut, and references to mid-’80s hip-hop abound, from long-gone dances like the wop to *Krush Groove* and a sample of the Beasties’ own “The New Style.” But in truth, the old school the Beasties reconnected with wasn’t old-school hip-hop; it was New York bohemia. They had long since stopped being a hip-hop group and were by now an indie-rock group that rapped. This was the first Beasties album to include singing—five songs, no less (six if you include dub-master Lee Perry’s preaching on the estimable “Dr. Lee, PhD”). MCA gets existential on the bossa nova “I Don’t Know,” and Ad Rock takes on the objectification of women on “Song for the Man,” which sounds like ’60s French pop. He also contributes “And Me,” which sets a thrumming melody to a drum-and-bass beat that spirals into the strangest sounds ever to appear on a Beasties album. Ad Rock—who had indulged his jones to keep on making records with the hardcore band DFL and beat merchants BS 2000—provides much of *Hello Nasty’s* drive and probably more than few twisted beats. He closes the album with “Instant Death,” an attempt to come to terms with the loss of his mother.

To the 5 Boroughs arrived after a six-year layoff, during which time MCA and Mike D had started families. And much more had changed: The Twin Towers, depicted on the album’s cover, had been leveled. The country was at war. It was an election year. The sound of *To the 5 Boroughs* is stripped-down and straightforward—no instrumental interludes or singing, just hip-hop beats and straight-up rapping. But that sound has nothing to do with the hip-hop of their contemporaries—the disc is driven by breakbeats and scratches, as if the Beasties were trying to rock a Bronx roller rink in 1979. There is so much scratching, in fact, that the album serves as a de facto tribute not just to the spirit of New York but also to fallen comrade Jam Master Jay, from Run-D.M.C., who’d been shot dead two years earlier. There is also much editorializing from the Beasties—much of it necessary some of it pretty funny. The message was simple: more gun control, no war, and if the five boroughs can work together, so can the rest of us. “We need a little shift on over to the left,” advises MCA on the dancehall jam “Time to Build,” before Mike D, always the Beasties’ business genius, starts rapping about the national debt. On such a high-minded album, the MC boasts come off stranger than ever. (What rapper had stepped up to the Beasties in the last 15 years?) But after six albums in a 20-year career, it all came down to the old dream, rekindled on “An Open Letter to NYC,” which sampled CBGB punks the Dead Boys as well as Queens punks 50 Cent and Nas. The dream: black and white music and audiences, together forever. The chorus: “Brooklyn, Bronx, Queens, and Staten/From the Battery to the top of Manhattan/Asian, Middle Eastern, and Latin/Black, white, New York—you make it happen.” —J.L.

John had the vision, Paul had the heart, George had the spirit, and Ringo had two fried eggs on toast, please. Together, they were the Beatles, four working-class Liverpool boys who came out of nowhere to conquer the world with the greatest songs ever heard. In case you're from Mars, John Lennon (the Smart One) and Paul McCartney (the Cute One) wrote the tunes. George Harrison (the Quiet One) played lead guitar. Ringo Starr (the Drummer) played drums. They all sang. They invented the idea of the self-contained rock band, writing their own hits and playing their own instruments. They invented the idea that the world's biggest pop group could grow up into arty, innovative musicians. For that matter, they invented the idea that there was any such thing as the world's biggest pop group. They also invented drugs, beards, bed-ins, India, concept albums, round glasses, the Queen, breaking up, and vegetarians.

The Beatles left behind more great music than anybody can process in a lifetime. Sheer abundance is part of their story: Life with the Beatles means vaguely disliking a chestnut like "Nowhere Man" or "Blackbird" for years until it sneaks up and gets into your blood for good. Just check out "I Want to Hold Your Hand," which explodes out of the speakers with the most passionate singing, drumming, lyrics, guitars, and girl-crazy howls ever—it's no insult to the Beatles to say they never topped this song because nobody else has either, although the lads came pretty close themselves with "You're Going to Lose That Girl." It's the most joyous three minutes in the history of human noise.

The Beatles were already bar-band veterans when they released their 1962 debut single, "Love Me Do," toughened by speed-fueled all-nighters in the sleazy clubs of Hamburg. They banged out *Please Please Me* in one marathon 10-hour session with producer George Martin on February 11, 1963. It's a blueprint of everything the Beatles would ever do, mixing up doo-wop, country, R&B, girl groups, Chuck Berry, Buddy Holly, Little Richard, and Tin Pan Alley into their own exuberant sound. John and Paul sang the openhearted originals "Ask Me Why," "There's a Place," and "I Saw Her Standing There." Ringo shouted, "All right, George!" in his gender-flipped cover of the Shirelles' ultrafemme "Boys." All four Beatles sang and played with total emotional urgency, holding nothing back, knowing their first shot at getting out of Liverpool could have been their last. You can hear John completely blow out his voice in the last track, "Twist and Shout."

On *With the Beatles,* the mop-tops stepped out with a bunch of great Motown tributes: "Please Mister Postman," "You Really Got a Hold on Me," and the window-rattler "Money (That's What I Want)." They also shone with the originals "It Won't Be Long" and "All My Loving," George's "Don't Bother Me," and the Ringo showcase, "I Wanna Be Your Man." Unfortunately, there's also some real crapola here, such as "Little Child" and "Devil in Her Heart." The old show tune "Till There Was You" would rank as the Beatles' all-time ghastliest moment—if not for the horrifying "Hold Me Tight" ("It's you!/You, you, you!") which happens to be an original.

The full-length originals didn't come out in America until 1987. Today, the out-of-print U.S. versions don't even have nostalgia value, except maybe *Meet the Beatles.* The U.S. *Rubber Soul* adds acoustic tunes from *Help!* for an interesting album more conceptually unified than the U.K. original—although shorter, and not as good.

A Hard Day's Night, the soundtrack from the Beatles' superb debut film ("Don't touch Ringo's drums—they loom large in his legend"), was also the first album comprised entirely of Lennon-McCartney originals. Although they were now the four most famous people in the world, the toppermost of the poppermost, bigger than Elvis, bigger than Jesus, they were still holding nothing back emotionally or musically: Just listen to "If I Fell" or "You Can't Do That."

The strain of Beatlemania shows in *Beatles for Sale,* as the lads unload some of the ickiest covers from their bar-band days. But they keep growing with "What You're Doing" and "I'm a Loser." The harmonies of "Baby's in Black," the hair-raising "I still loooove her" climax of "I Don't Want to Spoil the Party," the eager hand claps in "Eight Days a Week"—it all makes "Mr. Moonlight" easy to forgive.

Help! was a big step forward, exploring doubt, loneliness, alienation, adult sexual longing, acoustic guitars, electric piano, bongos, castanets, and the finest George songs known to man. The Cute One suddenly proved he was also the Smart One, the Smart One proved he could sound cuter than the Cute One, the Quiet One got Smart as well as Cute, and "Act Naturally" proved how much they all loved Ringo. *Help!* was utterly ruined in its U.S. version, which cut half the songs and added worthless orchestral soundtrack filler, so it's always been underrated. But *Help!* is the first chapter in the astounding creative takeoff the Beatles were just beginning: the soulful bereavement of "Ticket to Ride," the impossibly erotic gentleness of "Tell Me What You See," the desperate falsetto and electric punch of "You're Going to Lose That Girl."

On *Rubber Soul,* the Beatles grew up with an album of bittersweet romance, singing adult love ballads that feel worldly but not jaded. "Drive My Car" was a brash pop-life satire featuring Ringo's hottest drumming, while "Girl" upped the folk-rock ante on Bob Dylan. "Norwegian Wood" wove sitar and acoustic guitar together as John cryptically sang about an affair so his wife wouldn't guess what the song was about. (The rest of us can get confused as well—does he light up a joint at the end or burn the girl's house down?) John and Paul both took off as singers: "Nowhere Man" might be slight as social commentary but it's heartbreaking as music, while "I'm Looking Through You" and "Wait" bare the vulnerable emotion in Paul's vocals. "In My Life" was one of the last Lennon-McCartney songs that the pair actually wrote together, and it could well be a loving farewell to each other before the friendship turned sour.

For *Revolver,* the Fabs tuned in to Dylan, the Stones, the Beach Boys, the Byrds, and decided to top them all. They also decided to make Ringo sing the one about the yellow submarine. On top of the world, at the peak of their powers, competing with one another because nobody else could touch them, the Beatles breezed through acid rock ("She Said She Said"), chamber music ("For No One"), raga ("Love You To"), R&B ("Got to Get You Into My Life"), and everything in between with superhuman confidence. It contains their prettiest music ("Here, There, and Everywhere"), their bitchiest ("And Your Bird Can Sing"), their friendliest ("I Want to Tell You"), and their scariest (the screaming-seagull acid-nightmare "Tomorrow Never Knows"). John's songs are the best, but Paul gets in the funniest line: "If I am true I'll never leave,/and if I do I know the way there."

Revolver got butchered particularly badly in its U.S. release, which only gave John three songs, the same number as George. Incredibly, Americans didn't get to hear the uncut *Revolver* until the CD came out in 1987. Ever since *Revolver* has steadily climbed in public estimation. These days, *Revolver* has earned its reputation as the best album the Beatles ever made, which means the best album by anybody.

Sgt. Pepper's Lonely Hearts Club Band, the psychedelic soundtrack of the Summer of Love, was the first Beatles album released in its original uncut version in America, where fans hadn't even heard the full *Revolver* yet. So it was a revelation of how far artists could go in a recording studio with only four tracks, plenty of imagination, and a drug or two. It's a masterwork of sonics, not songwriting—the words and melodies are a lot more rickety than on the previous three albums. But with Paul overdubbing every instrument under the sun and George Martin fixing the holes, *Sgt. Pepper* still sparkles, especially the jangly "Getting Better," the half-past-dead "A Day in the Life," and Ringo's greatest hit, "With a Little Help from My Friends."

Sgt. Pepper marked a turning point: No longer playing live, increasingly dimmed by drugs, the Beatles were drifting apart. They collaborated less and worked solo, isolating John's caustic rock edge, Paul's light pop whimsy, and George's sere spiritualism. *Magical Mystery Tour* was a lot goopier than *Sgt. Pepper,* though lifted by the cheerful "All You Need Is Love" and the ghostly "Strawberry Fields Forever." Her Majesty the Queen had the best comment: "The Beatles are turning awfully funny, aren't they?" By now, the Beatles didn't need to push—they could have hit #1 with a tape of themselves blowing their noses, which would have been catchier than "Hello Goodbye" or "Lady Madonna." *Yellow Submarine* was a flat soundtrack rather than a real album, but here's a question: Why is George's "It's All Too Much" not heralded as one of the top five all-time psychedelic freakouts in rock history?

The Beatles wrote most of the White Album on acoustic guitars while on retreat in Rishikesh, India, a place where they had no drug connections, which probably explains why they came up with their sturdiest tunes since *Revolver.* As John recalled, "We sat in the mountains eating lousy vegetarian food and writing all these songs." Even Ringo: a big hand, please, for the man who wrote "Don't Pass Me By." The double-disc White Album, officially entitled *The Beatles,* has loads of self-indulgent filler—even the justly maligned "Revolution #9" is more fun than "Honey Pie" or "Yer Blues." Before CDs, most people just made a 45-minute tape of highlights for actual listening; now you can program "Sexy Sadie" and "Long, Long, Long" without having to lift the needle to skip over "Helter Skelter." But nobody would pick the same highlights, which is part of the fun, and besides, if the Beatles had edited it down to one disc, "Rocky Raccoon" would have been the first to go, which would have been tragic. "Martha My Dear," "Blackbird," "Dear Prudence," "Julia," "Cry, Baby, Cry," "Savoy Truffle," and "Happiness Is a Warm Gun" are all among the Beatles' finest songs, even if nobody will ever understand how they talked George Martin into permitting that godawful bass feedback at the end of the otherwise perfect "Julia."

As a strange footnote, the White Album acquired permanent notoriety during Charles Manson's 1969 trial, when an L.A. district attorney floated the theory that the album had inspired an alleged hippie murder cult. Silly stuff, but the accusation stuck, even though there's never been any evidence behind it; as Charlie himself admitted, he was more of a Bing Crosby man. Oh, well—"Helter Skelter" still sucks anyway.

Despite its solo vocals, the White Album was the last Beatles album to evoke the old team spirit. *Let It Be,* the ill-fated documentary soundtrack, wasn't even released until 1970. The singing, playing, and writing are weak, despite the White Album–style gems "Dig A Pony" and "Two of Us." "The Long and Winding Road" is actually a not-terrible tune under Phil Spector's orchestral dreck (just listen to Aretha Franklin sing it on *Young, Gifted, and Black*). Fortunately, the band decided not to go out like that, and reconvened to make the farewell *Abbey Road.* Slick, polished to the point of easy listening, *Abbey Road* devotes side two to a Paul-dominated "pop symphony," as George's "Here Comes the Sun" gives way to a medley of inspired tunelets such as "Golden Slumbers," "Sun King," and "The End." The spottier side one has John's "I Want You (She's So Heavy)," his de facto sequel to "I Want to Hold Your Hand," and Ringo's kiddie fave "Octopus's Garden," which makes "Yellow Submarine" sound like "The Wreck of the Edmund Fitzgerald." Good night, everybody. Everybody, everywhere. Good night.

Beatles reissues are a story in themselves. Over the years, Capitol has cranked out Beatles anthologies from every conceivable angle—*Love Songs, Reel Music, Rock & Roll Music, Rarities,* and so on. Hardly any of them have been rip-offs, however; Elvis Presley should be so lucky as to have his legacy preserved with this much care. *The Beatles 1962–1966* and *1967–1970,* the "Red" and "Blue" albums, became the canonical sets in the '70s, and they still sound great, although they're overpriced, each spreading a single CD's worth of great music over two discs—and nobody has ever explained what the hell "Old Brown Shoe" is doing on the Blue Album. *Hollywood Bowl* is a loving tribute to the screaming girl fans who drown out the band in these 1964–65 shows; those girls were heroes on the rock & roll frontier, and they deserve to be the lead instrument on a Beatles album of their own. *Live at the Star Club* is a dull live set from the tail end of the group's early Hamburg days, right about the time the Beatles were making it at home and going through the motions in Hamburg. *Past Masters* collects their singles on two CDs, including essential nonalbum cuts such as "She Loves You," "Hey Jude," "Yes It Is," and "Rain." The 1977 *Love Songs* had a nice cover.

The long-bootlegged *Live at the BBC* has excellent radio performances of the lads chattering, nattering, cracking one another up, dedicating songs to their aunties out there in radio land, and playing many otherwise unrecorded covers, as well as the great original "I'll Be On My Way." The all-outtakes *Anthology* sets are too much of a good thing, good for only a couple of listens apiece, although *Anthology 3* has "Junk," a sweet acoustic White Album ballad Paul revived on his solo debut. The three surviving Beatles reunited in 1995 to touch up the John outtake "Free as a Bird," which in retrospect wasn't a bad song at all, although the very idea was dead grotty. The song peaked at #2 in the U.K. and therefore missed inclusion on *1,* the budget-priced collection of #1 hits that shocked the music business by selling zillions of copies, even though everybody on earth already has all the songs. In fact, the Beatles were the top-selling act of 2001. "Free as a Bird," no doubt, will appear on the inevitable sequel *2,* which will also have "Please Please Me" and "Strawberry Fields Forever"; also brace yourself for the Beatles' *H,* so everybody can buy new copies of "Help!," "Hello Goodbye," "Hey Bulldog," and "Her Majesty."The Paul-supervised *Let It Be . . . Naked* remix isn't worth the trouble.

The Four Historic Ed Sullivan Shows Featuring the Beatles came out on DVD in 2003 with no fanfare and a clumsy title, but it's essential. You get 20 1964–1965 Beatles performances, including three versions of "I Want to Hold Your Hand," but the real revelation is how badly the rest of the show sucked. Mitzi Gaynor singing show tunes? Mr. Acker Bilk doing a clarinet solo called "Acker's Lacquer"? Magic from the Great Fantasio, acrobats, card tricks, and a host who resembles a suburban funeral director with a mouthful of Vicodin? So *this* is what people did for fun before the Beatles came along? No wonder America freaked out. —R.S.

Beatnuts

★★★ Intoxicated Demons (Relativity, 1993)
★★½ Street Level (Relativity, 1994)
★★★ Stone Crazy (Relativity, 1997)
★★★ A Musical Massacre (Relativity, 1999)
★★½ Take It or Squeeze It (Loud, 2000)
★★ Originators (Landspeed, 2002)
★★ Milk Me (Penalty, 2004)

For over a decade Psycho Les and JuJu of the Beatnuts have been pumping out gritty New York street rap with remarkable consistency and uneven quality. As producers, these two Queens natives, along with DJ Premier, are the architects of a brand of hardcore East Coast hip-hop known by its heavy drums and sparse loops. As MCs, Psycho and JuJu stick to the basics: gunplay and bedroom antics. The subject matter and music may not vary significantly from album to album, but for what they do, the Beatnuts are some of the best. *Intoxicated Demons* is as good a place as any to start, as it features their anthem, "Reign of the Tec," a tribute to vengeance as exhilarating as any early-'90s rap track.

Street Level sits comfortably with the typical roughneck rap of the day (think Mobb Deep and Notorious B.I.G., minus the highs). *Stone Crazy* was something of a breakthrough for the duo, giving them a bona fide hit with "Off the Books" (a track that also served as an introduction of sorts to Big Punisher). *A Musical Massacre* is more of the same, with an "Off the Books" sequel of sorts in "Watch Out Now."

By 2000's *Take It or Squeeze It* the formula was starting to get tired. While the production continued to reveal nuances in the 'Nuts' minimal palette, the lyrics were beginning to run thin on ideas. After finding themselves in label limbo with the folding of Loud Records, the Beatnuts returned to the underground with *Originators.* The album sadly rested on the laurels of their past achievements, offering little new in the way of musical or lyrical ideas. —C.R.

Beats International

★★★½ Let Them Eat Bingo (Elektra/Asylum, 1990)
★★½ Excursion on the Version (London/PolyGram, 1992)

The grandfather of mash-up/bootleg culture is Beats International's debut album, and especially its dance hit "Dub Be Good to Me"—an ingenious combination of the S.O.S. Band's "Just Be Good to Me" and the bass line from the Clash's "The Guns of Brixton." The group's mastermind was Norman Cook, who'd just spent a few years as the Housemartins' bassist and hadn't yet become Fatboy Slim. Beats International was a transitional band for him, as he started to play with making new grooves out of fragments of other people's recordings, but also wrote some splendid original songs. "For Spacious Lies" is a mournfully perky assessment of the distance between political principles and practice: "Freedom's just a song by Wham!, but we pretend." (The following year's *Excursion on the Version,* now out of print, is more dub-obsessed and less clever.) —D.W.

The Beautiful South

★★★★ Welcome to the Beautiful South (Elektra, 1989)
★★★ Choke (Elektra, 1990)
★★★½ 0898 (Elektra, 1992)
★★★★½ Carry On Up the Charts (Mercury, 1995)
★★★★ Blue Is the Colour (Ark 21, 1996)
★★★ Quench (Mercury, 1999)
★★★½ Painting It Red (Ark 21, 2000)

The dissolution of British pop socialists the Housemartins at the end of the '80s was one of the most productive breakups in rock history. Bassist Norman Cook transmogrified into Fatboy Slim. But by targeting sentimental suburbans rather than club rats, Paul Heaton achieved a stranger, more nuanced triumph. As the Beautiful South, Heaton and guitarist David Rotheray fashioned soft facsimiles of housewife balladry, but their lyrics worked deftly cynical twists on romantic truisms. The results are simultaneously sweet and painful—like a razor blade hidden in a chocolate bar.

Welcome to the Beautiful South kicks off with an acid critique of a callous songwriter's transformation of his love life into chart-topping gold. It closes by taunting a fickle pop audience: "Twenty years from now, will you come to my cremation?" Future albums found the band concentrating less on the crudities of showbiz, more on expressing Heaton's empathy for his plodding, unloved listeners. That empathy prevents *Beautiful South* from degenerating into a sardonic, wiseass scam. After all, in the U.K., Heaton's gently wafting bitterness actually registered as pop—these songs did indeed carry on up the charts, as their best-of declares. Proof that pop fans are smarter than either elitist highbrow snobs or cynical label execs happen to believe.

Blue Is the Colour brings Heaton's empathy to the fore, offering crafted pop for people desperately seeking an alternative to middle-class stasis, folks who've "lost the difference between bored and lonely." Auxiliary vocalist Jacqueline Abbot makes her intentions immediately clear, offering a two-way way out of domesticity's confines on the disc's opening track, "Don't Marry Her": "Fuck me." "Liar's Bar" beelines for the standard British escape, the pub, while it imagines a Disney apocalypse: "The world won't end in darkness/It'll end in family fun." Sometimes wistful, sometimes resigned, the Beautiful South's resistance to such a bland decline in subsequent albums amounts to the kind of small-scale heroism they celebrate in their songs. —K.H.

Beck

★★★★★ Mellow Gold (Bong Load/DGC, 1994)
★★★½ Stereopathetic Soulmanure (Flipside, 1994)
★★½ One Foot in the Grave (K, 1994)
★★★★★ Odelay (DGC, 1996)
★★★ Mutations (DGC, 1998)
★★★½ Midnight Vultures (DGC, 1999)
★★★★½ Sea Change (DGC, 2002)

Beck is the king of the Hanna-Barbera blues singers, a rock & roll dumpster diver trying to make folk music dangerous again by looting American culture for toys, whether they're acoustic guitars or drum machines or two turntables and a microphone. He's a joker, a smoker, a midnight Bram Stoker, an L.A. boho who mixes up Gertrude Stein and Grandmaster Flash with last night's *Welcome Back, Kotter* rerun. Although he's a folkie at heart, acoustic minimalism cannot contain his more-is-more sensibility. Beck always sounds most himself when he piles on the star wars and other galactic funk.

Beck first blew up with the epochal 1994 hit "Loser," in which he skated to glory on a hot-wired Duane Allman guitar lick and a cheap beatbox. Like the rest of *Mellow Gold,* "Loser" sounded brilliantly disposable at the time, which was part of the fun. But the musical imagination and emotional resonance of *Mellow Gold* hold up long after the surprise wears off. It's a nonstop gas, collecting the best of his homemade recordings: the scruffy valentine "Nitemare Hippy Girl," the psychedelic death trip "Steal My Body Home," the hip-hop goof "Beercan," the scam-artist tearjerker "Pay No Mind (Snoozer)." *Mellow Gold* was nothing short of miraculous: Bob Dylan's *Bringing It All Back Home* as choreographed by Sid and Marty Kroft.

Having fluked into a major-label hit, Beck defied all commercial logic by releasing two more albums that same year, both on indie punk labels. He earned some cred with the acoustic folk blues of *One Foot in the Grave,* which was sincere but dull: too much Sigmund, not enough Sea Monsters. *Stereopathetic Soulmanure* collected random home-taping junk from 1988 to 1994, from the cathartic punk of "Tasergun" and "Pink Noise (Rock Me Amadeus)" to the gorgeous Deadhead country of "Modesto." Even at this formative stage, Beck proved himself the kind of folkie who can ride boxcars with Depression-era hoboes in "Waitin' for a Train" and then give props to "Ozzy." He sings with giddy abandon whether he's indulging in elaborate Guthrie-esque tropes ("Plastic donut can of Spam/There's no kindness in this land") or just letting it all hang out ("So what/I lost my job at the Hut/My ass got cut").

But Beck really got crazy with the Cheez Whiz on *Odelay,* the smash hit that proved he could do it all. As the title suggests, it's his ode to L.A., mixing up his folk and rap and punk and hippie passions into cosmopolitan American slop, with help from his producers the Dust Brothers. Beck shimmies in and out of his musical guises, strumming acoustic guitar in "Ramshackle," rocking the Catskills hip-hop-style in "Where It's At," blaming it on the bossa nova in "Readymade," or murmuring his most beautiful ballad ever in "Jack-ass." It's a vision of an America of wide-open cultural frontiers—in "Where It's At," when Beck announces, "There's a destination a little up the road," he's imagining a future of sonic and sexual freedom that never arrived, never really even came close, although at the time it seemed so near we could reach out and touch it. *Odelay* could have come off as a bloodless art project, but Beck gets lost in the jigsaw jazz and the get-fresh flow until his playful energy makes everyone else sound tame. Put it together, it's a strange invitation.

Odelay was the last time Beck tried so many tricks on one album; his subsequent records basically explore one side of his music at a time. *Mutations* slowed it down for an album of depressive ballads about locking yourself indoors and waiting to die, produced (too loudly) by Nigel Godrich of Radiohead fame. While *Mutations* was sensitively fashioned, it was also incredibly boring, hitting duller-than-dog-breath lows by the third verse of practically every song, so the outright comedy record *Midnite Vultures* came as a relief. Fans of his serious side were appalled by gimmicky funk throwaways such as "Get Real Paid," "Hollywood Freaks," and "Mixed Bizness." ("She's mixing business with leather"—how the hell did Beck beat Prince to that one?) But for anyone who doesn't believe melancholy is inherently deeper than fun, *Midnite Vultures* is a hoot, especially the climactic slow jam "Debra," where he picks up a lucky lady in his Hyundai to take her for a real good meal.

Sea Change was a return to acoustic shoegazing, with gorgeous, downbeat reflections on a broken relationship, brooding in the style of Nick Drake and Serge Gainsbourg. But this time Beck came up with the first-rate melodies he left out of *Mutations,* and the emotion of the music was no joke at all. All over *Sea Change* he sounded like the same open-eared, warily ironic busker who recorded *Mellow Gold*—except eight years after "Loser," he sounded like he knew how it feels to actually lose something worth keeping. How long can he keep this up? Well, Beck has always been eager to flaunt how fallible he is. But that destination is still a little up the road, a little farther than it used to be, and Beck is one musician who's in the journey for the long haul. —R.S.

Jeff Beck

★★★½	Truth (Epic, 1968)
★★½	Beck-Ola (Epic, 1969)
★★★	Rough and Ready (Epic, 1971)
★★	Jeff Beck Group (Epic, 1972)
★★	Beck, Bogert & Appice (Epic, 1973)
★★★★	Blow by Blow (Epic, 1975)

★★½	Wired (Epic, 1976)
★	Jeff Beck With the Jan Hammer Group Live (Epic, 1977)
★★½	There and Back (Epic, 1980)
★★★½	Flash (Epic, 1985)
★★½	Jeff Beck's Guitar Shop (Epic, 1988)
★★★★	Beckology (Epic, 1991)
★★★	Crazy Legs (Epic, 1992)
★½	Frankie's House (Epic Soundtrax, 1992)
★★★	Who Else! (Epic, 1999)
★★★★	You Had It Coming (Epic, 2001)
★★★★½	Jeff (Epic, 2003)

Between his virtuosic command of the fretboard and his daredevil feel for feedback and distortion, Beck's playing is rarely less than astonishing. But he lacks the vision and determination necessary to convert that instrumental intensity into any viable group chemistry, a weakness that has kept his solo career from amounting to much more than a few dazzling moments scattered through a lot of disappointing music.

Perhaps the closest he's ever come to fronting a band that could balance and enhance his strengths as a soloist was with the group he formed after leaving the Yardbirds. Because both singer Rod Stewart and bassist/guitarist Ron Wood had enough presence and confidence to hold their own ground alongside Beck, the music they made together was often as cohesive as it was exciting. *Truth,* despite a tendency to confuse showboating with ambition, is an excellent example of the heights Beck and his bandmates could achieve; had they continued in this vein, in time they could have eclipsed even the mighty Led Zeppelin. Unfortunately, it was not to be; although *Beck-Ola* features a couple of amusingly energized Elvis covers ("Jailhouse Rock" and "All Shook Up"), the group's attempts to add a heavier edge to its sound only succeed in making the music more lugubrious.

After losing Stewart and Wood to the Faces, Beck's next group opted for a funkier approach, built around jazz-oriented keyboardist Max Middleton and David Clayton-Thomas imitator Bob Tench. It wasn't an ideal match. *Rough and Ready* stumbles whenever faced with a ballad but otherwise offers a passable gloss on the sort of vaguely improvisatory white soul Traffic made popular. But *Jeff Beck Group* pushes the band's mannerisms to the point of self-parody. Beck then tried the power-trio approach, but the results, as embodied by *Beck, Bogert & Appice,* aren't much better, offering all the self-indulgence of Cream but none of the focus or pop appeal. (A concert recording from this period, *Beck, Bogert & Appice Live,* is even more embarrassing, but was released only in Japan.)

By rights, Beck's next attempt at reinvention—this time as a fusion jazz star—ought to have been just as disastrous as the previous three, but thanks to producer George Martin, the all-instrumental *Blow by Blow* emerges as one of the most listenable and consistent albums of the guitarist's career. An eloquent player with absolutely nothing to say, Beck isn't much of a jazzman, but Martin works around the guitarist's limitations, elegantly framing the solos with sympathetic rhythm arrangements and lush string orchestrations.

With *Wired,* Beck leaps into the deep end, abandoning all his *Blow by Blow* playmates except Middleton to work with Mahavishnu Orchestra alumni Jan Hammer and Narada Michael Walden. Beck plays gamely, but it's really Hammer's album, since his synth solos are what ultimately galvanize the group. *Jeff Beck With the Jan Hammer Group Live* would seem a natural outgrowth from this collaboration, but the actual results are a mess, with Beck getting by on feedback and flash while Hammer's group tries to hold the music together. *There and Back* returns Beck to the studio with a more sympathetic set of collaborators (Hammer, drummer Simon Phillips, keyboardist Tony Hymas), but still goes nowhere.

Astonishingly, Beck's next album, *Flash,* was a pop outing with Wet Willie alumnus Jimmy Hall singing on most tracks. Thanks to producers Nile Rodgers and Arthur Baker, it's consistent and accessible, but threw sparks only when the guitarist reunited with Rod Stewart for a version of "People Get Ready." Bored, Beck went back to fusion and the empty acrobatics of *Jeff Beck's Guitar Shop,* but that didn't last. His next album, *Crazy Legs,* was a tribute to Gene Vincent & the Bluecaps guitarist Cliff Gallup that found Beck playing in classic rockabilly style with the Big Town Playboys, while the soundtrack album *Frankie's House* found him working in a enough different styles (R&B, New Age, semimetal) to show off his versatility, but without enough focus for the music to make much of an impression.

Although not quite a career summation, the box set *Beckology* includes highlights from the above, as well as Beck's first recordings (with the Tridents), a good sampling of his Yardbirds material, and a smattering of arcana. By rights, it should have been a solid career summation, but in the late '90s Beck discovered techno and found himself creatively refreshed. Partly live and partly studio-concocted, *Who Else!* had its moments, but never quite gelled. *You Had It Coming* offered a more cohesive approach, particularly in its interplay with guitarist Jennifer Batten (the first real fretboard sparring partner Beck has had since the Yardbirds) and in its approach to such roots material as the blues standard "Rollin' and Tumblin'." *Jeff* more fully embraced the studio-based aesthetic, pairing Beck with only a producer (mostly Andy Wright and Apollo 440) and one or two musicians for most tracks. But because his guitar reacts purely to the tracks, it's as if all filters have evaporated; not only does he recapture the improvisational abandon of *Wired,* he actually takes the music a step forward. Who says the keyboard is mightier than the fretboard? —J.D.C.

Walter Becker

★★½	Mose the Fireman (Rabbit Ears, 1993)
★★★	11 Tracks of Whack (Giant, 1994)

When Steely Dan took a hiatus from 1981 through 1994, their work ethic went to hell. Donald Fagen and Walter Becker (who for all intents and purposes were the group) yielded a grand total of three solo albums over those 14 years. Sure, they produced some albums for other folks (Becker oversaw discs for Rickie Lee Jones, Michael Franks, China Crisis, John Beasley, Jeremy Steig, etc.), but one of the most prolific songwriting teams of the '70s released just 26 songs during that period.

Nonetheless, those solo albums revealed who contributed what to the Steely Dan partnership. Fagen's *The Nightfly* proved that he had the voice, the melodies, and the romanticism. Becker's *11 Tracks of Whack* showed that he was the iconoclast, the one who gave the acerbic edge to the lyrics and the unpredictable shiftiness to the chord changes. Becker's thin, nasal, cramped voice is a real barrier to appreciating these songs, but if you can get past that handicap, the songs are quite good, unsettling portraits of a "Junkie Girl," "This Moody Bastard," and other self-destructive characters on society's margins. It was the first Fagen-Becker coproduction since 1980, and the tracks glistened. Oh, but that voice.

Becker is also credited as the cocreator of the children's album *Mose the Fireman.* Becker and John Beasley composed the ragtime and Dixieland music and led the quartet that played it behind Michael Keaton's narration about a mythical New York fireman. The music is then repeated without the narration. You will also see albums credited to Becker and Fagen; these are the duo's early songwriting demos before they finally landed their Steely Dan deal. Fewer than 30 songs are involved; some of them were later redone by Steely Dan, but most were not. The better-than-forgettable, less-than-compelling leftovers have been assembled into countless compilations too numerous and transitory to list. For completists only. —G.H.

★★★★	Their Greatest Hits: The Record (Polydor, 2001)

Nothing if not professional, the Aussie Brothers Gibb—leader Barry and twin followers Maurice and Robin—enjoyed two mega-careers playing two sorts of music: lush, Beatles-like pop and high-gloss disco. Milking the pop sensibility that prizes gesture over authenticity, they made remarkable '60s jukebox love songs, their trademark warbling conveying genuine passion about as accurately as Hollywood kisses capture the mess and tangle of real love. The trick, however, to "Holiday," "Words," "I Started a Joke," and "To Love Somebody" was that the Bee Gees understood their teenage make-out audience. So what if the lyrics didn't make sense? Who cared, when everything was so digestible?

After *Odessa,* the *Sgt. Pepper's* copy that all '60s headliners felt driven to attempt (the Bee Gees' wasn't bad; faulting it for pretentiousness makes absolutely no sense), the Bee Gees faded, resurfacing occasionally with such ace radio balladry as "How

Can You Mend a Broken Heart?" Then, with the out-of-nowhere timing of melodrama, they returned in the '70s with brilliant, plastic R&B. Pumped by finger-popping bass and swishing high-hat cymbals, *Main Course, Spirits Having Flown,* and, most spectacularly, their contributions to *Saturday Night Fever* didn't create disco but mainstreamed it with stunning craft. They had gigantic hits, of course. A third bid at stardom seemed to risk the ire of even the most indulgent of gods. The '80s Bee Gees appeared tentative and flailing.

Still, they persevered. Driven by the irresistible single "You Win Again," 1987's *E.S.P.* was a huge international hit (stateside listeners remained unconvinced). *One* fared even better. *High Civilization, Size Isn't Everything,* and *Still Waters* found them in a holding pattern, although the brothers' 1997 induction into the Rock and Roll Hall of Fame sparked a revival of interest. They ended the '90s with a fairly urgent live album, *One Night Only,* and entered the new century with one of their strongest albums in years, *This Is Where I Came In.* Mixing the AOR-funk of their latter years with melodic pop that echoed their early glory days, it wasn't exactly their Third Coming, but by that point most newcomers were interested in the Bee Gees' slew of hits, which has been collected most completely on *Their Greatest Hits: The Record* and *Tales from the Brothers Gibb,* a four-disc collection that's a little heavy on filler material. The Bee Gees continued to tour occasionally until January 2003, when Maurice Gibb died of cardiac arrest while receiving treatment for an intestinal blockage. Following his death, Robin and Barry declared that the Bee Gees were finished. —P.E.

Bell Biv DeVoe

★	Hootie Mack (MCA, 1993)
★★★	Best of Bell Biv DeVoe (MCA, 2000)
★★	BBD (MCA, 2001)

After the teen outfit New Edition lost Bobby Brown to solo success and a life in the tabloid headlines, the three remaining singers regrouped as Bell Biv DeVoe—for Ricky Bell, Michael Bivins, and Ronnie DeVoe—and forged on. On their debut album, *Poison,* now out of print, the boys leave behind New Edition's syrupy odes to sodas and hand-holding, and their meltingly harmonious vocals prove just as suited to such adult fare as scheming lovers ("Poison"). The followup, *Hootie Mack,* inexplicably still available, sounds like the rush release it was. Eight years later, the group gave it another go with *BBD,* awkwardly and blatantly trying to adjust to the times with a potty-mouthed mix of hot kink, bling, and bling. The best that can be said about *The Best of* is that it gives fans access to songs from the first album; the worst is that it vividly demonstrates how completely these young men squandered their talents. —A.B.

Belle and Sebastian

★★★★	Tigermilk (1996; Matador, 1999)
★★★★★	If You're Feeling Sinister (The Enclave, 1996)
★★★★	The Boy With the Arab Strap (Matador, 1998)
★★★★	Lazy Line Painter Jane (Matador, 2000)
★★★½	Fold Your Hands Child, You Walk Like a Peasant (Matador, 2000)
★★	Storytelling (Matador, 2002)
★★★★	Dear Catastrophe Waitress (Rough Trade, 2003)

When Belle and Sebastian (named after a children's television series) made their debut album, *Tigermilk,* they were barely even a band. Singer/guitarist/keyboardist Stuart Murdoch assembled a sextet to record his tender, introverted compositions; the record was originally released (on vinyl only) in early 1996 as a Glasgow vocational school's class project. It would surely have passed immediately into obscurity, except that the songs are astonishingly great—sly, literate, interlocking stories of disaffected youth, set to unstoppable melodies. ("I gave myself to God," Murdoch murmurs in "The State I Am In." "There was a pregnant pause before he said OK.") The arrangements jangle, shuffle, and don't get in the way of the tunes; they're occasionally graced with elegant trumpet lines, in homage to Murdoch's beloved Love.

With *If You're Feeling Sinister* Murdoch gets everything exactly right. This time, the songs are even more audacious, lyrically and sonically: the blasting harmonica that powers "Me and the Major," the self-referential games of "Judy and the Dream of Horses," the orgasmic orchestral crests of "The Stars of Track and Field." Murdoch's characters' sexual confusion and personal failings are unsparingly cast, but drawn with consummate compassion and wit, and he's come up with another set of impossibly hooky melodies. A perfect album.

The three 1997 EPs collected as *Lazy Line Painter Jane* gave the band a chance to experiment a bit, with mostly spectacular results. Guest singer Monica Queen bursts into the title track halfway through and transforms it into a Dusty Springfield–via–Velvet Underground barnstormer; the Murdoch-sung "A Century of Fakers" and an odd little spoken piece by guitarist Stuart David, "A Century of Elvis," are radically different takes on a single backing track; "Dog on Wheels" is Murdoch's most overt Love homage yet. (The band has continued to release nonalbum singles ever since; the best are "Legal Man," a goofy fake-1971 dance number, and the slow-simmering "This Is Just a Modern Rock Song.")

The Boy With the Arab Strap finds Murdoch delegating some of the songwriting to his bandmates. That's not an intrinsically bad idea—Isobel Campbell's fey "Is It Wicked Not to Care?" is charming, and anticipates the records she made under the name the Gentle Waves—but he's a great songwriter, and the others are merely pretty good. Murdoch himself is singing as gently as ever, but his lyrics are seething with oddly embittered rage. Musically, though, the band's on top form. "Sleep the Clock Around" builds on a pulse by degrees until it lets loose with a triumphal trumpet-and-bagpipe coda, and the title track is a rollicking update of vintage glam rock.

Even more of a group effort, the still darker *Fold Your Hands Child, You Walk Like a Peasant* has a couple of Murdoch's most finely wrought songs ever, especially "The Model" and its Proustianly complex melody. It's also got B&S's first actively embarrassing moment (the leaden Lee Hazlewood pastiche "Beyond the Sunrise"), another Campbell-sung winner ("Waiting for the Moon to Rise"), and a handful of barbed references to the Bowlie Weekender music festival the band headlined in 1999, including "The Chalet Lines," which Murdoch sings from the perspective of a woman raped at it.

Storytelling—music written for Todd Solondz's movie of the same name, and barely used in it—is a filler-y comedown, with grandiose instrumentals and half a dozen songs that could mostly pass for a subtle Belle and Sebastian parody. Only the garage-rocking, 75-second "Scooby Driver" is a sign of hope that they're not trapped by their own songwriting habits. Although Campbell left the band shortly after *Storytelling* was released, Belle and Sebastian soon began crafting *Dear Catastrophe Waitress.* Pop maximalist Trevor Horn (who had worked with the likes of Seal and Rod Stewart) was an unlikely choice to produce the album, but he worked out beautifully. *Dear Catastrophe Waitress* has a lush, detailed sound and shows Murdoch in a playful mood, imagining that his boss seduces him on "Step Into My Office, Baby" and alluding to Thin Lizzy with "I'm a Cuckoo." (He has also offered his most overtly Christian lyrics to date.) It ends with a fabulous rocker, "Stay Loose," proof that the band has left its stylistic cul-de-sac behind. —D.W.

Belly

★★★½	Star (Sire/Reprise, 1993)
★★★	Baby (Silvertooth, 1993)
★★★	King (Sire/Reprise, 1995)
★★★★	Sweet Ride: The Best of Belly (Rhino, 2002)

Tanya Donelly

★★	Lovesongs for Underdogs (Warner Bros., 1997)
★	Beautysleep (4AD, 2002)

Distorto-melodic Throwing Muses featured slasher-burner Kristin Hersh doing the most throwing and stepsister Tanya Donelly doing the bulk of the musing. By 1992, Donelly had skipped out for a one-album Pixies-ish twist with Kim Deal's Breeders, then alighted again to make it big with her own Belly (with ex-Muse Fred Abong on bass, plus drummer and guitarist brothers Chris and Tom Gorman). The band's strong first EP, *Slow Dust,* hit #1 on the U.K. indie charts, and 1993's full-length *Star* debuted just as stateside aggro-grunge gloom gave way to alt's broader palette. Confident pop fables, such as the jaunty, puppeteering "Gepetto," Gypsy nightmare "Slow Dog," and radio-glistening "Feed the Tree" give witchy weirditude serious (if shoegazey) melodic muscle. The even more songful 1995 followup *King* (produced by rock icon maker Glyn Johns) is another ebullient charmer, its showpiece tune "Now They'll Sleep." But *King*'s commercial nonstart ended up breaking up the band, and the quiet self-analysis of Donelly's 1997 solo debut, *Lovesongs for Underdogs,* is more a postcard from an old friend than a blazoned manifesto, and on 2002's *Beautysleep,* songs such as the ultrasound-heartbeating "Life Is But a Dream" and the Stevie Nicks–ish "Night You Saved My Life" reveal our onetime dervish in the creative thrall of motherhood. In "Night," she sings, "Now I sit with my baby at my breast/I was never this good at my best," bringing her spiritual quest to the domestic sphere. —L.S.

Pat Benatar

★★★	In the Heat of the Night (Chrysalis, 1979)
★★★	Crimes of Passion (Chrysalis, 1980)
★★	Precious Time (Chrysalis, 1981)
★★	Get Nervous (Chrysalis, 1982)
★★	Live From Earth (Chrysalis, 1983)
★★	Tropico (Chrysalis, 1984)
★★	Seven the Hard Way (Chrysalis, 1985)
★★	Wide Awake in Dreamland (Chrysalis, 1988)
★★★	Best Shots (Chrysalis, 1989)
★	True Love (Chrysalis, 1991)
★	Gravity's Rainbow (Chrysalis, 1993)
★	Innamorata (CMC, 1997)
★★	8-15-80 (CMC, 1998)
★★½	Synchronistic Wanderings (Chrysalis, 1999)

Just as there are a lot of songwriters who have no business singing, there are a lot of singers who would really be better off not writing. Pat Benatar, for instance. As a singer, her ability was obvious from the first, for not only did *In the Heat of the Night* do more with John Mellencamp's "I Need a Lover" than he ever did, but its emphasis on metallic, Suzi Quatro–style rockers such as "Heartbreaker" and the title tune gave her a saleable image and a sound. *Crimes of Passion* follows much the same pattern, thanks to such tough-but-tuneful offerings as "Treat Me Right" and "Hit Me with Your Best Shot" (although the latter got her into hot water with anti–sexual abuse activists). But Benatar wanted more than cover-song success; she wanted to prove her mettle as a writer, and actually does so with "Hell Is for Children" (from *Crimes*), an anti–child abuse song written by Benatar and bandmates Neil Geraldo and Roger Capps.

"Hell" was a fluke, unfortunately, and *Precious Time* proved it, with original songs that are either silly or clichéd, and sometimes both. *Get Nervous* continues the decline, while *Live From Earth* (eight concert recaps of earlier hits, plus two studio tracks) perks up only when it gets to "Love Is a Battlefield"—a song Benatar and band didn't write.

Tropico moves away from arena rock and toward a more intricately arranged sound, but only Lowen & Navarro's "We Belong" does anything with the approach. Tellingly, *Seven the Hard Way* is loaded with outside material, and Benatar soars through the likes of "Sex as a Weapon" and "Invincible" (though her version of "7 Rooms of Gloom" is enough to make one wonder if she'd ever heard Motown before).

About the only thing on *Wide Awake in Dreamland* that's worth hearing is "All Fired Up," and it—along with most of Benatar's hits—can be found on *Best Shots* (which is, song for song, a better deal than the career-encapsulating *Synchronistic Wanderings*, which, at three CDs, is about two discs longer than casual fandom would warrant). As for *True Love*, Benatar's painfully earnest bout with the blues, it seems to be the product of a misunderstanding; traditionally, one must suffer to earn the right to sing the blues, not just listen to it. Since then, she has retreated to the nostalgia circuit and its CD corollary, CMC Records. —J.D.C.

Ben Folds Five

★★★★ Ben Folds Five (Passenger/Caroline, 1995)
★★★ Whatever and Ever Amen (550, 1997)
★★½ Naked Baby Photos (Caroline, 1998)
★★★½ The Unauthorized Biography of Reinhold Messner (550, 1999)

Ben Folds

★★★★ Rockin' the Suburbs (Epic, 2001)
★★ Ben Folds Live (Epic, 2002)
★★ Speed Graphic (EP) (Sony, 2003)
★★★ Sunny 16 (EP) (Sony, 2003)

The Bens

★★★½ The Bens (EP) (Sony, 2003)

When North Carolina trio Ben Folds Five arrived with its self-titled debut in 1995, a still grunge-heavy modern-rock climate made the guitarless group seem almost a novelty. But actually, Folds' aggressive piano playing falls in line with ivory-pounding rockers from Jerry Lee Lewis through Elton John, and the group's keyboard-based pop quirks draw from Todd Rundgren and Joe Jackson, among others. At the very least, then, *Ben Folds Five* marked the arrival of a formidable new addition to the tradition. In particular, songs such as "Uncle Walter" and "Boxing" display Folds' knack for character sketches, something relatively rare among his alt-rock peers. Meanwhile, "Underground"—with its faux-dramatic opening, multiple vocal parts, and skewering of the so-called alternative scene—typifies Folds' sharp humor as well as the threesome's ability to mount surprisingly complex arrangements with limited resources.

A more sardonic, even bitter, voice emerges on the group's major-label debut, *Whatever and Ever Amen*, which screams "break-up album" all over—particularly on the revenge-fantasy opener, "One Angry Dwarf and 200 Solemn Faces," and the self-explanatory "Song for the Dumped." Its most notable exception, "Brick," features a rather contrite, sullen narrator recounting, without political agenda, a trip to the abortion clinic. It's beautifully executed, and even became an unlikely hit for the group. Elsewhere, though, *Whatever*'s dark obsessions snuff out a lot of the topical humor that made the group's debut a delight, even as the musical approach remains largely unchanged.

Naked Baby Photos is the group's former indie label attempting to benefit from "Brick" 's success—a somewhat premature odds-and-ends compilation of the formative years: outtakes, original versions, studio goofs, and early live recordings. *The Unauthorized Biography of Reinhold Messner*, the trio's third and final studio album, marked a significant change in direction. Though not as heady or literal as its title suggests, it has the feel of a concept album—an extended treatise on a man coming to terms with his shortcomings, demons, regrets, and mortality—complete with string and horn orchestrations, plus other divergences from the trio's familiar piano-bass-drums aggregation. Mostly, it's as serious as it sounds and the writing is often good enough to do its subjects justice. But tracks such as "Army" and "Your Redneck Past" leave room for Folds' dark humor as well, making *Reinhold*

Messner the group's most sophisticated, accomplished record, if not the most easy to enjoy.

Rockin' the Suburbs is Folds' proper solo debut, (there is a very odd set of instrumental and spoken-word tracks that he released under the name Fear of Pop, which you can safely ignore). With its bright production ("Annie Waits") and character-driven romps ("Zak and Sara," "The Ascent of Stan"), *Suburbs* marks a partial return to the writing style that made *Ben Folds Five* so successful. New additions to the sonic vocabulary include drum-machine hand claps, synthesizers, multitracked vocals, even guitars—both acoustic ("Still Fighting It") and full-on electric (the hilarious title track, also a single). Integrating elements of all the things Folds does best—biting irony, bittersweet tales, expertly crafted sketches—the pianist seems to have reached a new level of comfort and consistency on this engaging record.

Ben Folds Live features concert recordings from Folds' 2002 solo piano tour. However, since most of his songs are dominated by piano anyway, hearing them without additional accompaniment doesn't offer much of a new twist. A cover of Elton John's "Tiny Dancer" and a pair of songs that don't appear on other albums hardly make *Live* a must-hear, either, though an included DVD featuring eight live video clips might entice fans. Instead of a proper followup to his solo debut, Folds released two EPs in rapid succession, which were available for sale online only. *Sunny 16* and *Speed Graphic* feature five tracks, including one cover song each (the Cure's "In Between Days" on the first; Divine Comedy's "Songs of Love" on the second). While limited-edition EPs would seem the perfect place to experiment, the eight originals are mostly just standard Folds fare, and not particularly his best work. *Sunny 16* is the more notable of the two, with humorously topical songs like "There's Always Someone Cooler Than You" and "Rock Star."

The Bens, released the same year, showcases the tantalizing union of Folds with indie-rock singer/songwriters Ben Lee and Ben Kweller. While the prospect of three Bens in one band might have been too good a novelty to pass up, in fact, the four-song collection scores on each track—from the CSN-style harmonies of "Just Pretend" to the new-wavey romp of "Xfire." Like the best EPs, this one leaves you wanting more. —R.M.S.

★★★½ A Wonderful World (Sony, 2002)

That Tony Bennett is as popular, if not more so, in the 21st century as he has been at any other time in his 50-plus years in show business is more than testimony to the power of persistence or to the MTV generation appreciating his individual sense of style as a mark of unassailable cool. When he sings, Bennett, by the very personal nature of his lyric readings, creates new worlds and reveals the heart's deepest desires. He has never lost sight of the wisdom proffered by two early mentors, Frank Sinatra and Count Basie, to wit, insist on singing the best songs (Sinatra) and "economy of line, keep it simple, keep it swingin' " (Basie).

Exhibit A in defense of the above observations is the four-CD box set *Forty Years: The Artistry of Tony Bennett,* released in 1991. Its 87 songs, from Bennett's first single, 1950's overblown "Boulevard of Broken Dreams," to 1989's "When Do the Bells Ring for Me," show songwriter credits from the pantheon: notably Jule Styne, Richard Rodgers, Johnny Mercer, Cole Porter, Kurt Weill, Harold Arlen–Ira Gershwin, Cy Coleman–Carolyn Leigh, Carl Sigman, Gordon Jenkins, Jerome Kern, Oscar Hammerstein, Johnny Mandel, Betty Comden–Adolph Green, Jimmy Van Heusen, and Hank Williams (whose "Cold, Cold Heart" Bennett and producer Mitch Miller transformed with strings and a pop arrangement into a single that had a six-week run atop the pop chart in 1951, the first country-to-pop mutation embraced by the masses). He worked well with a number of producers ("some terrible, some terribly artistic," he writes in his liner notes) whose styles varied, including Mitch Miller, Ernie Altschuler, Helen Keane, Teo Macero, and his own son, Danny Bennett, and found a comfort zone where he could deliver honest performances. And it never hurts to have the kind of backing Bennett was blessed with during these years, particularly that of his longtime (since 1956) piano accompanist/musical director Ralph Sharon, the Count Basie Orchestra, Bill Evans, Jo Jones, Jimmy Rowles, Joe La Barbera—a mile-long list of the finest musicians of the day. And this litany hasn't yet accounted for the superb arrangers on these sessions, such as Robert Farnon, Torrie Zito, George Siravo, Marion Evans, et al.

The box set documents the breadth and depth of Bennett's art in all its remarkable variety. His first producer, Mitch Miller, knew nothing of subtlety, favoring instead a big, bright sound, full of rising strings, orchestral crescendos, and big-voiced backup singing. Still, Bennett had a productive run with Miller, as disc one of this set shows. Elsewhere, though, the textures become richer as new producers and arrangers pass through and Bennett becomes a singer, as opposed to the belter he often had to be under Miller's aegis. In this light, disc four is a revelation, as it showcases Bennett in more austere settings, digging deep into his lyrics and delivering again and again with deeply felt but introspective probings of the human condition, particularly with regard to feelings of love and the passing of time. The apex of this 22-song disc—and the entire box set, some might argue—is three songs cut in 1975 with the evocative minimalist pianist Bill Evans providing the sole instrumental support. On his solo forays Evans steps out, but gingerly, with atmospheric, discursive variations on the theme, then backs off when Bennett returns, supporting the vocalist's moody deliberations with solemn right-hand fills.

The box set becomes the jumping-off point for all of Bennett's work in the years leading up to his 1990s "rediscovery." For one, the artist himself is now engaged in a reconsideration and repackaging of his catalogue, with titles reissued as the Tony Bennett Master Series. These are perfect products of their times: 1963's *I Wanna Be Around,* comprised of the entire original *I Wanna Be Around* album and seven tracks from another 1963 LP, *This Is All I Ask,* captures the mood of American pop in its final, florid orchestral stage before the British Invasion and rock & roll in general took control of the radio and of the American cultural mainstream; 1964's *Who Can I Turn To,* released at the height of Beatlemania, reads like a troubled internal monologue conducted in the aftermath of a love affair gone south, with the material reflecting the appropriate contrasting moods, from desolation ("Who Can I Turn To") to tearful reflection ("There's a Lull in My Life") to the determination to move on ("The Best Thing to Be Is a Person," a blues ballad that closes the album as an optimistic philosophical bookend to the opening title track); 1965's lush, mesmerizing *If I Ruled the World: Songs for the Jet Set* could have been the soundtrack for a Claude LeLouche–directed romance. When it swings, it does so subtly, not bombastically; when it goes into a dreamy mode, Bennett sings with the lightest, most affecting of touches, as the Ralph Sharon Trio provides delicate accompaniment, the Will Bronson Chorus harmonizes sotto voce, Al Cohn occasionally steps in with a sensuous tenor sax solo, and the strings hum softly and evocatively in the background. The material is made to order for romance: "Fly Me to the Moon"; the Latin-tinged breakup song "How Insensitive," written in part by Antonio Carlos Jobim; Sammy Cahn and Jimmy Van Heusen's poignant monologue of a man determined to turn his life around, "All My Tomorrows"; a horn-rich, swinging interpretation of Richard Rodgers' "Two By Two"; and a previously unissued take on a classic Richard Rodgers–Lorenz Hart discourse on the condition known as being in love, "Falling in Love With Love," with which Bennett has such a good time that he chuckles to himself at the end of the second verse. On 1970's *Something,* Bennett finds his emotional touchstones in contemporary material such as the George Harrison–penned title track; Lennon-McCartney's "The Long and Winding Road"; a swinging version of Fred Neil's "Everybody's Talkin' "; and a deliberate, almost conversational reading of the Bacharach-David gem "Make It Easy On Yourself" to which Bennett imparts a mature acceptance of the inevitable while also suggesting the bombastic emotion found in the Walker Brothers' 1965 hit version and the poignancy of Dionne Warwick's 1970 hit.

Astoria, an autobiographical song cycle, is a special entry in the Bennett catalogue owing to the songs being carefully chosen to reflect the ideas and moods of the singer's formative years in New York, where he was born Anthony Dominick Benedetto in 1926 to immigrant Italian parents. *Astoria* provides perspective on a life, *Tony Bennett Jazz* on a career. As the box set indicates, Bennett has blurred the lines between jazz and pop singing by working effectively in both styles. On *Jazz* he assays an assortment of sides cut between 1954 and 1967, adding grist to the argument that he ranks with the best jazz singers of any generation; along the same lines, his two after-hours summits with Bill Evans, *The Tony Bennett/Bill Evans Album* and *Together Again,* are treasures barely hinted at even by the exceptional cuts on the box set. Other recommended forays into more pronounced jazz encounters should start with *Tony Bennett Sings Rodgers & Hart Songs,* which features Bennett accompanied with great sensitivity by the Ruby Braff–George Barnes Quartet on a 20-song overview of two Rodgers and Hart albums Bennett cut for his own Improv label in 1976 and 1977; even by Bennett standards these represent a daunting standard of interpretive singing and imaginative accompaniment. Check out the astonishing, near-whisper vocal Bennett employs throughout most of "Lover," and the mind-bending evocation of a lonely man for whom the turning of the earth does not bring renewal in an autumnal reading of "Spring Is Here." In a celebratory spirit, Bennett leaves the blues behind on the scintillating *Basie Swings, Bennett Sings* with Count Basie and His Orchestra.

Bennett/Berlin teams the master interpreter with a set of Irving Berlin tunes less obvious than one might imagine, despite the inclusion of "White Christmas." Focusing on several melancholy entries in the Berlin canon, Bennett in effect delivers a concept album quite moving in its depictions of shattered love. A 1986 album, *The Art of Excellence,* finds a low-key, dispassionate Bennett ruminating over aspects of love in a performance enlivened by a humorous, topical call-and-response duet with Ray Charles on "Everybody Has the Blues."

Given that he had 32 Top 40 singles between 1951 and 1965, with all but two rising into the Top 30, the purely commercial aspect of Bennett's art demands some sort of representation. And so it is that three "greatest hits"–type compilations exist. *Tony Bennett's All-time Greatest Hits* and *16 Most Requested Songs* assemble the most successful singles in their respective packages, while *The Essence of Tony Bennett* aspires to an elevated plateau. On the latter, timeless moments such as "Because of You," "Solitaire," and "I Left My Heart in San Francisco" are present and accounted for, but so are less obvious but equally scintillating entries.

From the first quiet notes and heartfelt lyrics of "Time After Time," the opening track on *Perfectly Frank,* it's apparent something special is going on. And something is: this is Tony Bennett paying homage to Frank Sinatra, the man who, on national television in 1974, called Bennett his favorite singer and subsequently extolled his virtues many times over. Sensitively backed by the Ralph Sharon Trio, these intimate readings are direct and passionate, the ambience is strictly late-night, small club, and the theme is romance. Warming up to the challenge of the album's concept, Bennett tackles trademarked Sinatra fare such as "Nancy" and "One for My Baby" as well as less prominent selections in the Chairman of the Board's repertoire, gives it all a respectful, swinging spin, and for a moment owns each of the 24 tracks. No mere masterful tribute, *Perfectly Frank* is a vivid demonstration of a peerless interpreter at the top of his game. His first studio effort after the *Forty Years* box returned him to the public eye in a major way, *Perfectly Frank* was the launching of an artistic renaissance for Bennett that has continued unabated into the new millennium.

In the wake of his tribute to the singer's singer, Bennett tipped his hat to the stylist's stylist in a collection of Fred Astaire chestnuts. Best known through his film roles as the epitome of upper-crust elegance and a dancer nonpareil, Astaire's unique way with a song marked him as a formidable stylist, very nearly the equal of the giants of his generation. His range would not wow anyone, and his singing voice was soothing but not especially rich in colors. Yet he understood and knew how to sell the sophisticated lyrics he sang, be they celebrations of high life (Irving Berlin's "Steppin' Out with My Baby") or high romance (George and Ira Gershwin's "He Loves And She Loves").

American popular song gets no better than *Steppin' Out,* with 18 tracks written by Irving Berlin, the

Gershwins, Arthur Schwartz–Howard Dietz, Cole Porter, and A.J. Lerner. Again backed by the Ralph Sharon Trio, Bennett finds new points of personal reference in the Astaire canon as he explores the worldly wise texts of Cole Porter's "I Concentrate on You" and the Gershwins' "Nice Work If You Can Get It," the latter being an especially nice bit of work as the mood and tempos change from the jaunty, cocky opening bars into a solemnly described account of love's end.

Continuing to pay tribute to those who had influenced him, Bennett surfaced again in 1995 with *Here's to the Ladies,* 18 songs otherwise associated with some of the top female vocalists of the past half-century—the likes of Billie Holiday, Peggy Lee, Rosemary Clooney, Sarah Vaughan, Margaret Whiting, Ella Fitzgerald, Dinah Washington, and others—expertly executed by the Ralph Sharon Trio supplemented by a big band. With Sharon on piano and backed by an unobtrusive orchestra, Bennett focused his attention solely on Billie Holiday in the 1997 release *Tony Bennett on Holiday.* Ambience counts for much here, and Bennett, who coproduced with his son Danny, keeps things resolutely quiet, his vocals floating free with feathery tenderness across the medium-cool soundscape. An electronic duet between Bennett and Billie Holiday on "God Bless the Child" (the only track produced by Phil Ramone, he being the architect of Frank Sinatra's *Duets* albums) sounds as pasted together as it really is. Even though this is the only opportunity we have to hear these two remarkable vocalists in the same place at the same time, the concept worked better in theory than it does in practice. It doesn't undermine the album, but it wasn't necessary. In keeping with the theme nature of his latter-day albums, *The Playground* is an odd but ultimately captivating entry in that, although its songs are taken from the classic American-pop songbook, it's an album expressly aimed at children.

2001's *Playin' With My Friends: Bennett Sings the Blues* teams the vocalist nonpareil with a cross-generational mix of guest artists, with contemporaries such as B.B. King (on a rousing treatment of "Let the Good Times Roll") and Ray Charles (an engaging take on "Evenin' ") and young upstarts Diana Krall and Sheryl Crow (who does not acquit herself well with a dolorous treatment of "Good Morning Heartache") bridged by Stevie Wonder, Billy Joel, and Bonnie Raitt. It's a likable album, but hardly ranks with Bennett's transcendent work.

MTV Unplugged documents Bennett's transformation into alternative rock icon with his appearance on the in-concert show that gives this album its name. Here Bennett and the Sharon Trio work out on a compelling set of classics, including "Old Devil Moon," "Fly Me to the Moon," "Body and Soul," as well as the signature songs (which also qualify as classics) "Rags to Riches" and "I Left My Heart in San Francisco." Elvis Costello and k.d. lang make guest appearances, the latter harmonizing nicely with Bennett on a medium-cool version of "Moonglow" and taking her own well-considered solo turns; the less said about Costello's affected performance the better. Now we know he can't sing pop, either. Lang teamed up with Bennett in 2002 for an album of duets, *A Wonderful World,* heavy on some tried-and-true standards that the duo has a splendid time turning inside out in delicate fashion, especially "A Kiss to Build a Dream On" and the album-closing "If We Never Meet Again."

Oh, yes. In addition to the advice given him by Sinatra and Basie, there is one other tenet to which Bennett has held firm over the years, one borne out by the half-century-plus of artistry documented here. The words, his own, are as elegant as his singing: "I believe in music being truthful and beautiful, and that has become the premise for what I am doing." Well said; well sung. —D.M.

with Bo Diddley

★★	Two Great Guitars: Bo Diddley & Chuck Berry/The Super Super Blues Band: Howlin' Wolf, Muddy Waters, Bo Diddley (1964; BGO, 2002)

By now it's easy to see that rock & roll was an inevitable outgrowth of all the seemingly disparate musics emerging in the post–World War II years, rather than something that fell out of the sky full-blown on the day Elvis Presley walked into the Memphis Recording Service. All the early rock & roll giants occupied distinctive niches defined by their musical approach. Chuck Berry was the first important writer, performer, and instrumentalist in the rock & roll style, a man whose immediately identifiable playing and powers of observation and eloquence have remained touchstones for succeeding generations of artists, one of the standards by which great rock is measured. Had he been only a profound influence on Bob Dylan, the Beatles, and the Rolling Stones he would merit distinction; but Berry's signature shows up frequently in current performers from punks to singer/songwriters.

At a time when critics discounted rock & roll as adolescent caterwauling, Berry was not only defining a subculture, he was providing running commentary on a country in the midst of change, more mobile, more affluent, more restless, free for the moment from the specter of war but bitterly divided internally over racial issues. Aiming his messages unequivocally at the younger generation, Berry made poetry of the seemingly mundane complexities of adolescent life. His was folk music for teens, with references to a world with its own language, symbols, and customs.

But as much as he was a chronicler of young American culture, so was Berry given to deeper ruminations. "Too Much Monkey Business" is a vivid depiction of the drudgery and ennui of the working life. If you get past the clever images spicing "Brown-Eyed Handsome Man" the story becomes one of black men overcoming the strictures of segregation. A touching memory of love lost and love renewed is rendered in mellow, bluesy fashion in "Time Was." The force and sincerity behind "I've Changed" will move anyone familiar with Berry's checkered history with the law. At a time when American families are breaking up in record numbers, the story of a divorced father's desperate search for his daughter in "Memphis" takes on new relevance. He also wrote the greatest songs *about* rock & roll in "Sweet Little Sixteen," "Around and Around," "Rock and Roll Music," and "Roll Over, Beethoven."

Those seeking classic Berry all in one place now can take three steps up: the flawlessly programmed *The Great Twenty-Eight* (easy to find used), the more in-depth and fully rounded *The Anthology,* or the hefty *Chess Box.* The *Box* also offers the pleasure of side trips into Berry's lesser-known work, much of it in a blues vein and some of it instrumental. The *His Best* and *20th Century Masters* anthologies are simply lesser versions of the same package. When he arrived at Chess in 1955, Berry was familiar with a number of styles. In his longtime pianist Johnnie Johnson he had an accompanist equally at home in blues, boogie-woogie, R&B, and rock & roll, and at Chess he worked with the sterling players populating the label's studio: Willie Dixon, Fred Below, Jimmy Rogers; even Bo Diddley and his maraca man Jerome Green sit in on a few cuts. Completists, then, are advised to grab the *Rock 'n' Roll Rarities* collection and seek out *Missing Berries, Volume 3,* now missing itself and a much sought-after sampling of blues-oriented material.

Also noteworthy are the out-of-print former LPs *Chuck Berry Is on Top, Rockin' at the Hops,* and *New Juke Box Hits.* These show how Berry was wedging in what might be called alternative material amid his rock & roll—check out Berry's steel guitar on the instrumental "Blues for Hawaiians" from *Chuck Berry Is on Top,* the deeply felt covers of Jay McShann's "Confessin' the Blues" and Charles Brown's timeless "Driftin' Blues" on *Rockin' at the Hops,* and a stirring treatment of B.B. King's "Sweet Sixteen" on *New Juke Box Hits.* The most important deleted original LP, however, is *St. Louis to Liverpool.* The title is a reminder that in 1964, when this album was released, it was clear that the Beatles, the Rolling Stones, and lesser British rockers were deeply indebted to the man. In addition to classic tracks—"Little Marie," "Promised Lan'," "You Never Can Tell," and "No Particular Place to Go"—the album includes one of the best cover versions of the Charles Brown classic "Merry Christmas, Baby," a tough rendition of Guitar Slim's "Things I Used to Do," and a searing instrumental, "Liverpool Drive"; then Berry calms down with a mellow, after-hours blues, "Night Beat." Another easily found cutout, *The London Chuck Berry Sessions* (1972), is notable for producing Berry's only #1 single, "My Ding-a-Ling," a dreadful fluke novelty now mercifully forgotten.

Berry left Chess to record for Mercury between 1966 and 1969, producing nothing of note. *Chuck Berry's Golden Hits* consists of reworkings of some of the great Chess sides, plus one new track, the unremarkable "Club Nitty Gritty." Accept no substitutes for the originals. In particular, the many latter-day live recordings with various pickup bands are to be shunned. Apart from the Chess material, the other Berry album of note is *Rockit,* originally released on Atco in 1979. No gem this, but an exemplary return to good rockin' form. Guitar aficionados may find something of interest in the teaming of Berry and Bo Diddley on two of the four extended instrumental tracks on *Two Great Guitars,* but for these two masters, the workouts are fairly routine (currently reissued as a twofer with the equally forgettable *Super Super Blues Band*). An excellent item for the confirmed Berry fan, *Blues* includes Nat "King" Cole–style blues pop and jump blues in addition to modified Delta blues twangers. The disc is wonderful for comparing Berry to Chess blues masters and for hearing how he concocted rock from the roots. —D.M./M.MI.

The Beta Band

★★★★	The Three E.P.'s (Astralwerks, 1998)
★★	The Beta Band (Astralwerks, 1999)
★★½	Hot Shots II (Astralwerks, 2001)
★★★★	Heroes to Zeros (Astralwerks, 2004)

For a while there, it looked as if Scotland's Beta Band was destined to be one of those outfits that never match their earliest work. To be fair, though, following *The Three E.P.'s* would have been tough for just about anyone. Originally released as three separate discs—*Champion Versions, The Patty Patty Sound,* and *Los Amigos del Beta Bandidos*—the album dazzles with its kaleidoscopic inventiveness, as the Betas gobble up every conceivable pop style, from prissy folk to sweaty funk, and convert them into long, multisegmented song suites, full of seemingly offhand melodies and goofy humor. The quartet's digestive process isn't always reliable, but the cumulative effect is impressive.

On *The Beta Band* and, to a lesser degree, *Hot Shots II,* the Betas come close to losing their way. The humor has gone from goofy to nearly incomprehensible, and the interesting musical snatches are undone by countless irritating digressions. When the arrangements get sparse (as on *Hot Shots II*'s "Gone"), things tend to work, but that just doesn't happen often enough.

Heroes to Zeros is a very different kettle of kippers. As the opening track, "Assessment" (which tips its hat rather broadly to U2's "I Will Follow"), suggests—and the rest of the album conclusively demonstrates—the Betas have figured out how to streamline their sound without killing their creativity. Songs like "Space Beatle" and "Liquid Bird" reach Wilsonian (Brian Wilsonian, that is) heights of complexity but never come ungrounded. Four albums into its career, the Beta Band has finally beaten the sophomore slump. —M.R.

Bettie Serveert

★★★½	Palomine (Matador, 1992)
★★½	Lamprey (Matador, 1995)
★★★½	Dust Bunnies (Matador, 1997)
★★★½	Private Suit (Hidden Agenda, 2000)
★★★★	Log 22 (Palomine, 2004)

When it was first released, *Palomine* was hailed as college rock's *London Calling.* And yet: Repeated listening reveals that, despite standouts such as the title track's bittersweet vow of friends forever or the persona-defining "Tom Boy," these Dutch pals of ours were better at sustaining a vague mood than concretely bringing their desires, their fears, and their tunes into focus. *Lamprey* proved itself merely a pleasant, vacant wash. But while no one was listening, Bettie Serveert got better. *Dust Bunnies* finds the band wondering if it should be sadder that it isn't famous, why it doesn't like its friends more than it does, and if disillusionment is anything more than an immense cosmic gag. (Their answer: a resounding "Hmm, dunno.") This is the testament of a band whose limited success denied it the luxury of outright failure—like it or not, it was just going to keep on rocking, or droning, or jangling, or whatever it was it did—and that writes and plays funnier and freer as a result.

For *Private Suit,* the band submitted to the iron hand of P.J. Harvey associate John Parish, who shoehorned them into a snug girl-singer-plus-backup-band template. With Visser limited to reeling off quick hooks, this arranged chamber pop seems claustrophobic after the rangy expanse of *Dust Bunnies.* But the girl singer sounds more womanly and self-possessed than ever. "Took a Tylenol and an hour's drive," she begins the album, "and somehow found a reason why I'm still alive."

On *Log 22,* produced by Visser, the band loosened up considerably, kicking into full-on Velvets-as-jam-band mode. "Wide-Eyed Fools" indicated that these boho ramblers had no intention of assuming a quiet, normal life anytime soon. —K.H.

The B-52's

★★★½	The B-52's (Warner Bros., 1979)
★★★★★	Wild Planet (Warner Bros., 1980)
★★★★	Party Mix (Warner Bros., 1981)
★★	Mesopotamia (Warner Bros., 1982)
★★★	Party Mix/Mesopotamia (1981–82; Warner Bros., 1991)
★★	Whammy! (Warner Bros., 1983)
★★	Bouncing off the Satellites (Warner Bros., 1986)
★★★	Cosmic Thing (Warner Bros., 1989)
★★	Good Stuff (Warner Bros., 1992)
★★★★	Time Capsule: Songs for a Future Generation (Warner Bros., 1998)
★★★	Nude on the Moon: The B-52's Anthology (Rhino, 2002)

A party band in the truest sense of the term, the B-52's were one of the first pop acts to pick up on the ironic attitude of the postpunk underground. Taking its cue from acts such as Blondie and the Sic Fucks, *The B-52's* is obsessed with the detritus of hip, embracing such trash icons as lava lamps and beehive hairdos (the latter having in fact inspired the band's name). Yet for all its playful sarcasm, the album manages to avoid the usual pitfalls of camp, never daring to act as if the band was somehow superior to its material.

Even so, that would likely wear thin in a hurry were it not for the band's other strength: its music. Applying the amateurism of New York punk to the abandon of beach music (the soulful Carolina kind, not the twangy California stuff), the band came up with a sound unlike anything else on the scene. It wasn't Ricky Wilson's idiosyncratic guitar lines or the simple stomp of Keith Strickland's drumming that did it, so much as the way their jerry-rigged groove reinforced the campy quality of Fred Schneider's declamations and Cindy Wilson and Kate Pierson's B-girl harmonies. This was the chemistry that made "Rock Lobster" so oddly arresting, and that spirit carries over to the rest of the album, from the sci-fi silliness of "Planet Claire" to the fevered insistence of "Dance This Mess Around."

Wild Planet improves on the formula by fleshing out the musical mannerisms with actual songs, offering everything from the dark, enigmatic groove of "Private Idaho" to the near pathos of Cindy Wilson's "Give Me Back My Man." That triumph was short-lived, however. After *Party Mix,* a collection of club-oriented remixes of the most danceable songs from *The B-52's* and *Wild Planet, Mesopotamia* found the band out of its element as it tried to swap its fun-loving frivolity for the arch art rock of bands such as Talking Heads (whose David Byrne produced the album). Never had the group's music sounded so boring or pretentious. (Both EPs have since been combined on a single CD.)

Whammy! is an attempt to return to the silliness of the first albums, but is unable to overcome either its self-conscious songs (which range from the mock-utopian "Song for a Future Generation" to the pseudo-Southern culture of "Butterbean") or the stiffness of its drum machine–driven rhythm tracks.

With the death of Ricky Wilson in 1985, the B-52's were thrown even further into disarray, having not only to augment the band's lineup with session players but also to virtually reinvent its sound. No wonder *Bouncing off the Satellites* flops miserably; solid as the singing is—note how neatly Cindy Wilson and Kate Pierson harmonize on "Summer of Love"—it sounds hollow and contrived. So the band went back to its roots and hit the jackpot. Commercially, *Cosmic Thing* was far and away the band's most successful effort, producing two Top 5 singles and spending nearly a year in the *Billboard* Top 40. Artistically, though, it's less heartening. Despite their no-nonsense melodicism, most of the songs here reprise the band's early sound without any edge or ambiguity. Thus "Love Shack," instead of sending up beach music dance parties, becomes a straight-up tribute—an act of imitation, not transcendence. And while the considerably slicker production doesn't stop the band from generating a simulacrum of its original groove on the likes of "Channel Z" and "Deadbeat Club," the B-52's tumble into self-caricature.

Cindy Wilson left the group once *Cosmic Thing* had run its course, and thus bears no responsibility for the hash that is *Good Stuff.* Clearly, the group had run out of gas, artistically and commercially. *Songs for a Future Generation* compiles all the B-52's classic tracks, but dilutes the effect somewhat by padding the disc with such second-rate fare as "Hallucinating Pluto." *Nude on the Moon* is an even longer version of the same exercise, and is useful mainly as a cure for nostalgia. —J.D.C.

B.G.

★★	Chopper City (Cash Money, 1997)
★★	It's All on U, Vol. 1 (Cash Money, 1997)
★★½	It's All on U, Vol. 2 (Cash Money, 1997)
★★★½	Chopper City in the Ghetto (Universal, 1999)
★★	True Story (Universal, 1999)
★★★	Checkmate (Universal, 2000)
★★	Livin' Legend (Koch, 2003)

The young prince of Cash Money, B.G., a.k.a. Baby Gangsta, was plucked out of the notorious Uptown ghetto of New Orleans by Cash Money founders Baby and Slim Williams when he was just eleven years old. Rather than play up the prodigy's youthful innocence, the Williams brothers capitalized on the somewhat disturbing thrill of hearing a hardly pubescent boy spitting grime-filled rhymes laced with violence and sex talk. Over in-house producer Mannie Fresh's sparkling electro beats, he quickly established himself as a regional superstar on the Southern rap scene. As was their way, Cash Money, recognizing a star when they saw one, released album after album from B.G., paying little heed to established artist-release schedules. In 1997 alone, B.G. put out three albums, the best of which, *It's All on U, Vol. 2,* helped Cash Money link up with Universal Music in a lucrative distribution deal. He also, along with labelmate Juvenile, was made one of the cornerstones of Cash Money's supergroup, Hot Boyz.

Chopper City in the Ghetto, from 1999 was a phenomenal success, placing Cash Money on the national map, making B.G. a household name, and adding the word *bling* to the cultural vocabulary. With its smash hit, "Bling Bling," and its anthemic roll call, "Cash Money Is an Army," it stands as B.G.'s best work. 1999 also saw the rerelease of B.G.'s first album, recorded at the tender, and one would think innocent, age of 11. Its pleasures are largely cheap thrills. *Checkmate* would be B.G.'s final record with Cash Money, as he departed unamicably from the empire soon afterward. His followup, released three years later, would go mostly unnoticed, suffering from the absence of Mannie Fresh and his Cash Money cohorts. —C.R.

Big Audio Dynamite

★★★ This Is Big Audio Dynamite (Columbia, 1985)
★★★★ No. 10, Upping St. (Columbia, 1986)
★★★★ Tighten Up, Vol. 88 (Columbia, 1988)
★★★ Megatop Phoenix (Columbia, 1989)
★★★ The Globe (Columbia, 1991)
★★★ Higher Power (Columbia, 1994)
★★½ F-Punk (Radioactive, 1995)
★★★★ Planet B.A.D.: Greatest Hits (Columbia, 1995)
★★★ Superhits (Columbia, 1999)

After the Clash, guitarist Mick Jones—whose pop sense provided that band with some of its biggest hits—decided to abandon punk entirely and embrace a more modern sound, one that reconciled guitar-based rock with the electrobeats and sonic manipulation of hip-hop. Dubbed Big Audio Dynamite (because it was B.A.D., geddit?), his new group's initial experiments were more gimmicky than illuminating, but by *No. 10, Upping St.* its use of samples was no longer simply a matter of sonic special effects, with "C'mon Every Beatbox" using its electronics to create a common ground between hip-hop, rock, and reggae. *Tighten Up, Vol. 88* expanded the music's base even further to include ska, rockabilly, and even country music. Yet even as B.A.D. was laying the groundwork for later work by Jesus Jones, the Farm, and EMF, the group's refusal to embrace dance music outright, combined with Jones' predilection for predictable, singsong melodies, kept it from topping its early success—leaving *The Globe* and *Higher Power* mired in mediocrity. *F-Punk* tried to relight the fire by cranking the guitars, but to little avail. —J.D.C.

Big Black

★★★ Lungs (EP) (1982; Touch and Go, 1992)
★★★ Bulldozer (EP) (1983; Touch and Go, 1992)
★★★★ Racer X (EP) (1984; Touch and Go, 1992)
★★★★½ Atomizer (1985; Touch and Go, 1992)
★★★½ Headache (EP) (1986; Touch and Go, 1992)
★★★★ The Hammer Party (1986; Touch and Go, 1992)
★★★★ Songs About Fucking (Touch and Go, 1987)
★★★★½ The Rich Man's Eight Track Tape (1987; Touch and Go, 1992)
★★★½ PigPile (Touch and Go, 1992)

Rapeman

★★★ Budd (EP) (Touch and Go, 1988)
★★★★ Two Nuns and a Pack Mule (Touch and Go, 1989)

It's like watching an optical illusion in which white dots on a black background switch places across the page. In the wildly influential Big Black, punk polymath and indie philosopher-king Steve Albini's flesh-shredding riffs and freight-train drum machine sought to destroy everything in his band's path with disciplined, scabrous noise and caustic yellow journalism.

Big Black's debut EP, *Lungs,* is a mere skeleton of future triumphs: thin, angular guitars, a relentless drum machine named Roland, humorless screeds. The followup EP, *Bulldozer,* the first with brilliant guitarist Santiago Durango, is thicker and more fully realized ("Cables," about the slaughterhouse as theme park, became a fan fave). The *Racer X* EP is the first fully conscious Big Black record, with the band's savage aesthetic in its final form: British postpunk set alight by American hostility. (All three EPs benefit from their compilation on *The Hammer Party.*)

Atomizer is a full-bore revelation, a key document of 1980s underground culture and one of the most influential albums of the age. Durango and bassist Dave Riley aid Albini in setting these odes to tabloid America on "liquify"; guitars have simply never sounded so annihilating. Topics include child abuse, racial self-loathing, sex-plus-arson (the catchy, haunting "Kerosene"), and a live reprise of "Cables." And contrary to popular belief, there's a (misinterpretable) half-assed morality at play; Big Black doesn't make the horror, it just reports it, soaked in wit and loathing. You get it? Fine. You don't? Fuck you. (*The Rich Man's Eight Track Tape* combines *Atomizer*—minus the useless near-instrumental "Strange Things"—a single covering Wire's "Heartbeat," and the inferior-by-comparison followup EP *Headache.*)

The smart bombs on *Songs About Fucking* feel still more focused but less inspired, the songwriting less diverse. Their lyrical focus hasn't budged, and the sound is starting to calcify into shtick. Big Black still stuns, but it no longer surprises, and it's no wonder Durango split for law school and the band called it quits—at the height of its indie fame—on the eve of *Fucking*'s release. (The *Fucking* CD appends one single.) A fun-but-not-revelatory live album and video appeared in 1993.

Albini soon formed Rapeman with bassist David Wm. Sims and human drummer Ray Washam, both late of Texas noise maniacs Scratch Acid. They didn't last very long, hampered by a protest-worthy name, but *Two Nuns and a Pack Mule* is a scorcher, an underrated slice of funny, brutal skreepunk that slams vegetarians, covers ZZ Top, and shouts out Sonic Youth. (The *Nuns* CD is appended with the band's fetal debut EP *Budd,* notable only for the brilliant title track.) —J.G.

Big Brother and the Holding Company

★★	Big Brother and the Holding Company (1967; Columbia, 1971)
★★★½	Cheap Thrills (Columbia, 1968)
★★	Big Brother and the Holding Company Live (Rhino, 1985)
★★½	Live at Winterland '68 (Columbia/Legacy, 1998)
★★	Do What You Love (Cheap Thrills, 1999)

Complete with R. Crumb cover art, endless, warped guitar solos, and clunky, hippie homages to "da blooze," *Cheap Thrills,* Big Brother and the Holding Company's second album, sums up acid rock in all its messy, pseudo-psychedelic glory. Even the group's name was an underground pun—"holding" being doper's slang for possessing drugs. What makes the record more than a period piece is, of course, its singer, Janis Joplin. While her more focused work came later, Joplin already thrills like a force of nature: "Piece of My Heart" and Big Mama Thornton's "Ball and Chain" unleash a vocalist whose urgency finds no equal in mainstream rock. From her ripest beginnings, Joplin comes on as an archetypal desperado, her passion ripped from the same inner source as that of the timeless bluesmasters Ma Rainey, Howlin' Wolf, and the like. *Live at Winterland '68,* for better and worse, is even more unleashed. —P.E.

Big Daddy Kane

★★★★	Long Live the Kane (Cold Chillin', 1988)
★★★★	It's a Big Daddy Thing (Cold Chillin', 1989)
★★★½	Taste of Chocolate (Cold Chillin', 1990)
★½	Prince of Darkness (Cold Chillin', 1991)
★★★	Looks Like a Job For . . . (Cold Chillin', 1993)
★★½	Daddy's Home (MCA, 1994)
★★½	Veteranz Day (Blackheart, 1998)
★★★★	The Very Best of Big Daddy Kane (Rhino, 2001)

Tall, dark, and handsome, Big Daddy Kane was all that and then some: the undisputed champion playboy MC of the Western world at a time when fast rap was the freshest sound around. Kane was born Antonio Hardy on September 10, 1968—his stage name was an acronym for "King Asiatic Nobody's Equal." Before his personal charisma and skills on the mike came to the fore, Kane was a ghostwriter, penning raps for Biz Markie ("Pickin' Boogers," "The Vapors") and Roxanne Shante ("Have a Nice Day"). The goofy, hefty Biz was the flipside of Kane's cock-diesel loverman look: The pair joined legendary Queens producer Marley Marl's Juice Crew and signed to Marley's Cold Chillin' label. Kane waxed his debut single, "Raw," ("chillin'/killin' like a villain/the meaning of RAW is Ready And Willin' ") for Cold Chillin' in 1987, and that set the stage for his great late-'80s albums. An appearance alongside Vanilla Ice in Madonna's salacious *Sex* book in 1992 gave rise to vicious rumors that didn't help the popular perception that Kane had taken his smooth lothario persona too far. Kane has defended his R&B-flavored material, pointing out that early hip-hop hits such as "Rapper's Delight" were essentially rhymes laid over R&B tracks like "Good Times." Then there's the fact that by the late '90s, sung R&B hooks became de rigueur in both underground and mainstream hip-hop. So either Kane was unfairly penalized for being a trendsetter, or he deserved his lambasting for setting a wack precedent; either way, his R&B-flavored hits such as "Smooth Operator" cannot hold a candle to his energetic fast rap classics "Raw," "Ain't No Half-Steppin' " and "Set It Off" (all of these tracks are on *The Very Best of*). *Taste Of Chocolate* (1990) featured intriguing collaborations with the likes of Barry White (the pair, who met while contributing to Quincy Jones' *Back on the Block* album, delivered the ballad "All Of Me"), Malcolm X's daughter, Gamilah Shabazz (for the duet "Who Am I"), and rhyming comedian Dolemite (on the hilarious dis-fest "Big Daddy Vs. Dolemite"). Kane also gave a young Jay-Z a leg up, featuring him along with Ol' Dirty Bastard on "Show & Prove" from *Daddy's Home.* Also worth seeking out is the DJ Premier–produced "Platinum Plus," featuring Kane on Big L's 2000 album *The Big Picture.* —P.R.

Big L

★★	Lifestylez ov da Poor and Dangerous (Sony, 1995)
★★★	The Big Picture (Rawkus, 2000)

Born Lamont Coleman, and a member of Fat Joe's DITC (Diggin' in the Crates) crew, Big L's first album, 1995's *Lifestylez ov da Poor and Dangerous,* garnered little notice, but by the late '90s he'd become one of the most well-respected underground hip-hop

MCs in New York, thanks in large part to the 1998 single "Ebonics." Unfortunately, Coleman was murdered in Harlem on February 15, 1999, a couple of months shy of his 25th birthday. *The Big Picture* is an uneven collection of music he was working on before his shooting; tracks such as "Ebonics," "Holdin' It Down," and "Flamboyant" portray Big L as a rapper full of potential that his early death squandered, one of the sadder what-if stories of recent hip-hop. —M.M.

Big Pun

★★★½	Captial Punishment (Loud-RCA, 1998)
★★★★	Yeeeah Baby (Loud-Columbia, 2000)
★★★½	Endangered Species (Loud-Columbia, 2001)

Despite his untimely passing and limited discography, Bronx rapper Big Pun (born Christopher Rios) is widely acknowledged to be one of the most gifted MCs ever to breathe life into a microphone. His main claim to pop success was his debut's radio-friendly "Still Not a Player," but there's much on *Capital Punishment* worthy of praise. The music is filled with ominous bass loops, sharp drum stabs, and soul-filled R&B. When Pun teams up with other MCs—the Roots' Black Thought on "Super Lyrical;" mentor Fat Joe on "Twinz" (a remake of Dr. Dre and Snoop Doggy Dogg's "Deep Cover"), Wyclef on "Caribbean Connection,"; Noreaga on "You Came Up,"; Mobb Deep's Prodigy; and Wu-Tang's Rebel INS (Inspectah Deck) on "Tres Leches"—he shines with intricately laced, breathless strings of words. On his own he's just as deadly, as he proves on "The Dream Shatterer" and "Beware" where he boasts, "Y'all niggas can't do shit to me/Physically, lyrically, hypothetically, realistically/I'm the epitome of catching wreck."

Rios died of a heart attack in 2000. Released two months after his death, *Yeeeah Baby* is musically adventurous, blending sublime R&B ("It's So Hard"), operatic stylings ("Off With His Head"), raunchy ballads ("My Dick"), and Latin tunes ("100%"). His legendary humor is on display through self-deprecating skits and numbers like "Laughing at You" and "Nigga Shit." He's still as ferocious an MC as ever, letting off beautifully scripted barrages of rhyme on "We Don't Care" and "Leather Face."

The posthumous *Endangered Species* features former highlights, unreleased numbers, and past cameos. The inclusion of star-studded posse cuts such as "John Blaze," "Wishful Thinking," and "Banned from TV," next to remixes of Brandy's "Top of the World" and Ricky Martin's "Livin' la Vida Loca," showcases the full range of Pun's verbal dexterity and makes this a worthy sendoff for a star that shone bright but briefly. —K.X.

Big Star

★★★★	#1 Record (Ardent, 1972)
★★★★★	Radio City (Ardent, 1974)
★★★★★	Third/Sister Lovers (1978; Rykodisc, 1992)
★★★★★	#1 Record/Radio City (Line/Fantasy, 1992)
★★½	Big Star Live (Rykodisc, 1992)
★★★½	I Am the Cosmos (Rykodisc, 1992)
★★	Columbia: Live at Missouri University 4/25/93 (Zoo, 1993)
★★	Nobody Can Dance (Norton, 1999)

Big Star toiled in obscurity in the '70s, making off-kilter garage pop that hardly anybody noticed at the time. The Memphis popsters were too light and tuneful to connect with the hard-rock crowd, too weird for mainstream attention. But their music kept steadily blowing young minds and influencing other musicians, and by the time the American indie underground came into its own in the '80s, they were rightfully acclaimed as forefathers. Poignant, plaintive, brainy, Big Star devised a cool rock & roll swagger that was quintessentially Southern; the music was arty and bohemian, yet had nothing at all to do with New York or L.A., and it has made these men cult heroes to generations of restless small-town kids. All three Big Star albums have taken their places as classics.

Lead singer Alex Chilton was already a jaded music-biz castaway by the time the band started. After singing the Box Tops' hit "The Letter" as a teenager, he'd sunk back into obscurity. With Big Star, his voice got higher and lighter, meshing with the jagged guitar chime of *#1 Record*. Along with drummer Jody Stephens and fellow singer/songwriter Chris Bell, Chilton had a bent style of Beatles songcraft, with guitar ravers such as "Feel" and "In the Street" alongside one of the all-time great love songs, the acoustic "Thirteen." *Radio City* is even sharper and smarter, with Chilton's boyish, angelic, occasionally zonked-out vocals on top of slashing guitar and barbed harmonies. "September Gurls," "Life Is White," and "Mod Lang" became underground classics, rewriting the *Rubber Soul* songbook with a bittersweet Memphis edge, and while Bell was almost entirely absent from the album, bassist Andy Hummell contributed the killer "Way Out West." The Fantasy and Line reissues both put *Radio City* and *#1 Record* on the same CD, which makes both albums sound even better.

Radio City didn't sell, and Big Star's followup took years to get released. Originally issued in 1978 as *Third*, more commonly known by its original title, *Sister Lovers*, it's a truly amazing album of catatonic grandeur, full of long, slow, rambling melodies that sink to the depths of despair ("You're sitting down to dress/And you're a mess," goes one typical lyric). Chilton's songs are stark and brilliant, with piano, strings, heavy studio reverb, eccentric soul flourishes, and a cover of Lou Reed's "Femme Fatale." It's often been reissued with varying track listings and running order—the longest version is Rykodisc's 1992 version—but however you find it, the music is stately ("Stroke It Noel," "Nightime"), sometimes joyous ("Thank You Friends," "O Dana"), and always gorgeous ("Blue Moon"). A late-night masterpiece.

Alex Chilton eventually reemerged with a solo career in the '80s, looking a little surprised to find himself still kicking around. As Big Star started getting posthumous respect, archival reissues popped up: *Big Star Live* is a 1974 concert featuring a nasty version of Loudon Wainwright's "Motel Blues"; *Nobody Can Dance* is more raw and punkish. In 1993 Chilton and Stephens reunited for a one-off show (backed up by the Posies) recorded as *Columbia: Live at Missouri University.* Chris Bell was killed in a 1978 car crash after recording a solo album that never got released in his lifetime. *I Am the Cosmos* finally appeared in 1992, with the adolescent yearning of "You and Your Sister" and the acoustic desolation of "I Am the Cosmos." —R.S.

Bikini Kill

★★★★ The C.D. Version of the First Two Records (Kill Rock Stars, 1992)
★★★★ Pussy Whipped (Kill Rock Stars, 1994)
★★ Reject All American (Kill Rock Stars, 1996)
★★★ Singles (Kill Rock Stars, 1998)

Julie Ruin

★★ Julie Ruin (Kill Rock Stars, 1998)

Le Tigre

★★★★ Le Tigre (Mr. Lady Records, 1999)
★★★ From the Desk of Mr. Lady (EP) (Mr. Lady Records, 2001)
★★★ Feminist Sweepstakes (Mr. Lady Records, 2001)

Feeding subtlety, recording quality, and centuries of female subservience into the meat grinder of punk, the pioneering *Bikini Girl* fanzine—devoted to "Revolution Girl Style Now"—spawned an even more potent and far-reaching monster: the Olympia, WA, quartet Bikini Kill. Led by editor/rabble-rouser/singer Kathleen Hanna, the band's shows consciously set out to create a new, female-centric agenda for rock and nurtured the inner feminist in rockers from Sleater-Kinney to Nirvana's Kurt Cobain, whose "Smells Like Teen Spirit" was inspired by a slogan Hanna spray-painted graffiti-style on his wall.

The band's early recordings are rougher than burlap on baby skin, and the politics is very earnest and sometimes preachy, Hannah's intensity breathtaking in bad-girl manifestos such as "Double Dare Ya," "Suck My Left One," and "Rebel Girl," cowritten with Joan Jett. The sound captured on *The C.D. Version of the First Two Records* is caustic, daring, and shamelessly didactic, a two-by-four to the chops of patriarchy. *Pussy Whipped* compresses a dozen more songs into 24 minutes and climaxes midway with Hanna screaming like she's being knifed on "Tell Me So" and riding a lascivious guitar riff on "Sugar," then a few songs later exits on the uncharacteristically tender "For Tammy Rae." It would prove to be the band's last essential recording; *Reject All American* quickly loses steam and *Singles* is a slight epitaph, marking the third appearance on CD of "Rebel Girl."

Hannah sketches out a transition strategy on *Julie Ruin,* in which she sings, writes, and plays most of the instruments herself. It introduces a more rhythmic and melodic approach, but is no less blunt in its politics or low-fi in its sonics, with a cheap drum machine and cheesy sampler making this the femme-punk equivalent of a Throbbing Gristle B-sides album. "I Wanna Know What Love Is" answers NWA's "Fuck tha Police," while "Crochet" disembowels another favorite target: the media.

With Le Tigre, Hannah asks, "Who took the bomp from the bompalompalomp?" The electro-rock trio answers its own musical question on *Le Tigre,* which makes Hannah's hot rock only seem more palatable with its Shin-Dig!-worthy beats and Shangri-La's-like vocal give-and-take. The self-titled album flat-out swings while namechecking feminist icons in "Hot Topic," and mulls the genius-feminist divide on "What's Yr Take on Cassavetes."

Feminist Sweepstakes keeps the party rolling: The "LT Tour Theme" celebrates "rollerskate jams" with diabolical laughs and an Iron Maiden–worthy guitar solo, and "Dyke March 2001" is a sci-fi protest anthem. But the stakes are very much the same as they were on Bikini Kill's first album, with stories of dead-end jobs and marginalized lives—snapshots from a world in which gender and sexual orientation too often dictate the difference between economic success and failure, social acceptance and ostracism. All of which makes Le Tigre one of the most subversive dance bands in rock history. —G.K.

Biz Markie

★★★ I Need a Haircut (Cold Chillin', 1991)
★★★★ All Samples Cleared (Cold Chillin', 1993)

★★★½	The Best of Cold Chillin' (Landspeed, 2000)
★★★★	Goin' Off/The Biz Never Sleeps (1988/1989; Landspeed, 2001)
★★★	Greatest Hits (Landspeed, 2002)
★★★½	Weekend Warrior (Tommy Boy, 2003)

Considering it came out in 1988, the same year as Public Enemy's sonically dense *It Takes a Nation of Millions to Hold Us Back,* Biz Markie's debut, *Goin' Off,* is either the last of the old-school rap records or the first release of the old-school revival. With tracks built around a basic drum-machine pattern and DJ cuts and scratches, the sound is decidedly schoolyard lo-fi. Unconcerned with depicting street life or expressing black consciousness, Biz Markie's raps—some written for him by Big Daddy Kane, or with producer Marley Marl—are designed purely to be party entertainment, vocal candy to accompany the dance beat. Novelties delivered in Biz's distinctive nasal slur, including the gross-out "Pickin' Boogers," the crowd rocker "Biz Dance Pt. 1," and the human beatbox display of "Make the Music with Your Mouth Biz" introduce Biz as hip-hop's clown prince.

Reissued together with *Goin' Off* in a two-CD set, Biz Markie's second release, 1989's *The Biz Never Sleeps,* continues in this jokey, party-time vein with tracks such as "The Dragon," an ode to body odor, and "Mudd Foot," his dance tribute to a "Fat Albert" character. But this time, Biz is at the helm, and with writing and production help from his cousin and DJ, Cutmaster Cool V, he cooks up an album that's still relatively spare, but far more musically sophisticated than the debut. In particular, tracks such as "Check It Out," "Biz in Harmony," and "Just a Friend"—the latter Biz's biggest pop hit, later revived by teen crooner Mario—offer original musical accompaniment, back-up harmonies, and melodies that manage to be catchy even when delivered with Biz's mock-earnest off-key singing.

I Need a Haircut further refines Biz's now-trademark blend of slobbering rap comedy, interpolations of familiar songs, and tracks built on classic R&B riffs. "Road Block" is typical, casting Biz as an everyman loser in love as he sings (butchers) the melody of "American Woman." In the same vein, "Alone Again" centers or the chorus of Gilbert O'Sullivan's 1972 hit, "Alone Again (Naturally)." Biz's song, featured on original copies of *Haircut* but absent from the current version, became the focus of a copyright-infringement battle between O'Sullivan and Biz that changed hip-hop, setting a new precedent for sample clearances. *Haircut's* most memorable track, however, is "T.S.R. (Toilet Stool Rap)," which is at once a gross-out novelty similar to *Goin' Off*'s "Pickin' Boogers" as well as a clever slice of life about that place of quiet repose where so many creative ideas are born.

All Samples Cleared is both a good-natured reference to Biz's "Alone Again" ordeal and also a statement of fact in the newfound hip-hop landscape: Kool and the Gang, Lee Dorsey, James Brown, Cannonball Adderley, Rufus Thomas, and other more obscure names all get credited (and, presumably, paid) for use of their music in constructing these songs. It also happens to be Biz's most accomplished and engagingly melodic record. "I'm the Biz Markie" opens with a fast-flowing vocal performance and track reminiscent of Brand Nubian. Elsewhere, Biz offers his most topical material: an honest admission of his looks ("I'm a Ugly Nigga [So What]"); a rundown of his colorful relations ("Family Tree"); cautionary tales of folk wisdom ("Bad By Myself"); madcap adventures in sexual pursuits ("Young Girl Bluez," "Hooker Got a Boyfriend"), and, for good measure, another Biz-created dance step ("The Gator [Dance]").

By 2003, there was no reason to expect Biz would ever release another album. So when *Weekend Warrior* arrived, it not only seemed to come out of nowhere, it also surprised fans by being every bit as good as any of the records he had made during his prime. With solid production and star cameos from P. Diddy, Elephant Man, and others, *Warrior* offers pleasant surprises all the way through. Still defiantly old-school, Biz's hilariously tossed-off rhymes and random gabbing are pure entertainment, reanimating the party spirit of hip-hop's earliest rapping DJs.

Two Biz best-ofs—both contain his most familiar material and almost identical track listings—are also available. *The Best of Cold Chillin'* offers seventeen tracks, including the post-*Samples* single "Studda Step" and a couple other nonalbum cuts. *Greatest Hits* features fourteen songs, among them Biz's 2001 comeback single, "Turn tha Party Out." —R.M.S.

Björk

★★★½	Debut (Elektra, 1993)
★★★★	Post (Elektra, 1995)
★★★½	Telegram (Elektra, 1997)
★★★★½	Homogenic (Elektra, 1997)
★★★	Selmasongs (Elektra, 2000)
★★★★½	Vespertine (Elektra, 2001)
★★★★	Greatest Hits (Elektra, 2002)
★★★	Family Tree (Elektra, 2002)
★★★	Livebox (One Little Indian, 2003)

Somehow, over the course of a decade, Björk Gudmundsdóttir has transformed herself from the singer of a decent Icelandic alt-rock band into the world's most successful avant-garde musician—the person who turns everyone else's difficult-listening experiments into pop praxis. *Debut,* her coming-out party after the breakup of the Sugarcubes, was produced by Soul II Soul's Nellee Hooper, with songs that serve the gasping, note-stretching eccentricities of her voice. It scored three dance hits in "Human Behaviour," "Violently Happy," and "Big Time Sensuality," and although not all of her stylistic about-faces succeed, the horny daydream "Venus as a Boy" is cute as a button.

Hooper returned for *Post,* this time joined by more top-rank producers, including Tricky and 808 State's Graham Massey. It's very much like the good parts of *Debut,* but with more assured melodies for Björk's voice to circle like Christmas lights, especially "Isobel," a light-headed ode to self-adoration. Comedy relief comes from "It's Oh So Quiet," an unlikely big-band cover of Betty Hutton's 1948 novelty song "Blow a Fuse" that became an even less likely hit. *Telegram* is remixes and rerecordings of most of *Post* (done with the likes of the Brodsky Quartet and Pan Sonic's Mika Vainio) that actually shed new light on the songs. There's also a cool little collaboration with percussionist Evelyn Glennie and a new mix of "I Miss You."

Homogenic announces itself from the get-go as unlike any other pop record in sight, and then transforms its peculiarity into sheer majesty. A swooning string section meets noise splatters as beats (courtesy of Mark Bell and Howie B.), and Björk's glorious vocal acrobatics coax them all into bed together. She's also blossoming as a songwriter, especially on "Jóga," a gesture of devotion to a friend, and the radiant "All Is Full of Love."

The brief soundtrack for Björk's starring role in the film bummer *Dancer in the Dark, Selmasongs* includes duets with Catherine Deneuve and Radiohead's Thom Yorke. It's a terrific exercise in constructing lush movie-musical songs around the rhythms of heavy industry, and her voice is in top form; it just feels a bit skimpy.

Vespertine, on the other hand, is a banquet in the hall of Björk's personal erotics. The lyrics (mostly by the diva herself, with filmmaker Harmony Korine and the late poet e.e. cummings pitching in) obliquely concern life-changingly great sex, and she lingers ecstatically over every syllable. It's not the stuff of radio hits, but the music is spectacular, gently transplanting cutting-edge digital art music into lush, euphonious pop, with contributions from experimental electronic duo Matmos, avant-garde harpist Zeena Parkins, and, on a trio of songs, a custom-made music box. And her voice is still a marvel: Her subsequent world tour included a few shows in venues small enough that she could sing *without a microphone.*

The lineup of *Greatest Hits* was determined by a survey on Björk's Web site. The set combines alternate mixes and a negligible new song, "It's in Our Hands," with an otherwise solid if unilluminating survey of her career peaks. *Family Tree* is an extravagance for serious fans: one disc of Björk's own picks from her previous records, plus five three-inch mini-CDs surveying her pre-*Debut* recordings and alternate arrangements of a few familiar songs that feature the Brodsky Quartet. Nice but unessential. The same goes for *Livebox,* a five-disc set that documents live versions of her four proper studio albums (and throws in a DVD of five more tracks). She rearranges her songs cleverly and her singing is as wonderful as ever, but there's nothing revelatory here. —D.W.

Frank Black

★★★★ Frank Black (4AD/Elektra, 1993)
★★★½ Teenager of the Year (4AD/Elektra, 1994)

Frank Black and the Catholics

★★ Frank Black and the Catholics (spinART, 1998)
★★½ Pistolero (spinART, 1999)
★★★ Dog in the Sand (What Are Records?, 2000)
★★★ Black Letter Days (spinART, 2002)
★★★½ Devil's Workshop (spinART, 2002)
★★★ Show Me Your Tears (spinART, 2003)

Between 1986 and 1993, Charles Thompson IV, a.k.a. Black Francis, headed one of America's greatest alt-rock bands, the Pixies. In the music he's made since then, under the new handle Frank Black (get it?), you can still hear the stylistic features that distinguished his first group: wildly lurching melodies and chord progressions; sudden shifts of meter, tempo, and dynamics; guitar parts that run the gamut from surf sparkle to hardcore chug; and vocals that alternately coo and howl words covering every shade of peculiar. But as the Black catalogue stretches into the present, those features fade into the background. Clearly, Thompson has mellowed over time, becoming more sensible, more direct, and less interesting.

Coproduced by fellow oddball Eric Drew Feldman (Captain Beefheart, Pere Ubu), Black's self-titled debut remains his best album. Songs such as "Places Named After Numbers" and the near-epic "Parry the Wind High, Low" achieve a menacing kind of catchiness, while "I Heard Ramona Sing" features a typically left-field lyric: "I hope if someone retires/They pull another Menudo." A good chunk of *Teenager of the Year*'s whopping 22 tracks sound underdeveloped, but there's enough top-shelf material ("Headache," "Pie in the Sky") to make it worthwhile.

From here the pickings get thinner. Black's next album, *The Cult of Ray* (now out of print), is a punk-metal disaster. His first disc with new band the Catholics goes for a live garage-rock vibe; the energy's great but the songs aren't memorable. *Pistolero* is a slight improvement, interspersing a few sterling tunes ("I Switched You," "So Hard to Make Things Out") among the filler.

On *Dog in the Sand* and its followers, Black regains some of his former juice, adding extra musicians, including Feldman, to the Catholics' basic rock quartet setup and exploring country, folk, and blues influences. They're all decent records—*Devil's Workshop* is the standout—and yet they still miss that lunatic spark of old. —M.R.

Blackalicious

★★★½	A2G (EP) (Quannum Projects, 1999)
★★★★	Nia (Quannum Projects, 2000)
★★★½	Blazing Arrow (MCA, 2002)

Xavier Mosley (Chief Xcel) and Tim Parker (Gift of Gab) got together as Blackalicious back in 1991. They came out of the Sacramento/Davis underground rap scene, which released records as Solesides and Quannum Projects. Over the nine years until they released their first full-length album, they cut a handful of singles and two EPs and contributed some of the best things on comps such as *Solesides Best Bumps* and *Quannum Connection*. But while their basic shtick wasn't unusual for alt-rap—Gab's torrent of gangsta-free words flooding Xcel's utility beats and turntableism—they showed quite a knack for memorable hooks such as, in the seven-cut *A2G*, the alphabet sequence of "A to G," the p-funky chorus in "Rock the Spot," or the "by any means necessary" refrain to "Making Progress."

By the time they assembled *Nia* (Swahili for "purpose") they had 45 songs to choose from; the biggest problem with the nineteen that they chose (including three repeats from *A2G*) is that hooks and messages pile up so fast that it's hard to keep them straight. But "Ego Trip by Nikki Giovanni" (whose protagonist created the pyramids and the Nile, sent an ice age to Europe and burned out the Sahara, gave oil to the Arab world, and can fly) stands on its own, not least because Erinn Anova handles the vocal. Then there's the speech at the end of "Cliff Hanger," the "Blackalicious, we keep it fat, delicious" chorus on "Smithzonian Institute of Rhyme," the "un-huh"s that stomp home "Reanimation," the subliminal "drifting"s on the lullaby "Sleep."

Given that the market for underground rap is a good hundred times that for, say, underground jazz, major labels beckoned, and for better and worse, *Blazing Arrow* was the result. The deal gives them access to samples from the likes of Harry Nilsson, on "Blazing Arrow," and De La Soul, on "Paragraph President," and the guest stars queue up, although they still hang with old friends such as DJ Shadow and Cut Chemist. But in the end it's still much the same record: fast beats and scratches, lots of words, a few less hooks, but the refrain on "Sky Is Falling" (lifted from one of those B-boys—Beethoven, I think) is awesome. Two lines sum them up nicely: "passion, the drive to press, to strive for best," but especially, "aural pleasure, y'all." —T.H.

The Black Crowes

★★★½	Shake Your Money Maker (American, 1990)
★★★★	The Southern Harmony and Musical Companion (American, 1992)
★★★★	Amorica (American, 1994)
★★½	Three Snakes and One Charm (American, 1996)
★★★½	By Your Side (American, 1999)
★★★★	Greatest Hits 1990–1999: A Tribute to a Work in Progress (American, 2000)
★★★	Live at the Greek (with Jimmy Page) (TVT, 2000)
★★	Lions (V2, 2001)
★★★	Live (V2, 2002)

The Black Crowes seemed little more than blues-rock throwbacks when they swaggered onto MTV in 1990, with a low-budget, live-in-concert video for their Stonesy debut single, "Jealous Again." Soon after, the band dropped a hard-rocking, blue-eyed remake of Otis Redding's funky "Hard to Handle," and music critics cried sacrilege. But what the critics didn't know, the little girls understood: The Black Crowes—along with Guns n' Roses and Lenny Kravitz—put the roll back into rock at a time when hip alternative bands were downplaying the music's sexuality. Guitarist Rich Robinson's raunchy riffs sliced into the funky grooves of the Georgia band's rhythm section like a serrated knife into peach pie, laying a foundation of sweet, soulful boogie for the spastic, Jagger-esque moves and throaty moans of frontman Chris Robinson.

The Crowes hit the ground running on their first two CDs. They don't just ape classic rock on these albums, they actualize the quality of the Rolling Stones' prime years (*Sticky Fingers* and *Exile on Main Street*), thereby reclaiming the Southern American roots of late-'60s and early-'70s British blues rock. Even without the two aforementioned hits, *Shake Your Money Maker* displays a rare maturity for a debut album. In 1990, "She Talks to Angels" was one of the most achingly sublime ballads about drug addiction to appear on a rock record in years—and more empathetic than the Stones' "Sister Morphine." The raw riffage and whiplash boogie of "Thick 'n Thin" pays tribute to the Crowes' regional forebears Lynyrd Skynyrd. With its sharper, beefier attack, *The Southern Harmony and Musical Companion* is even better. The highlights—"Remedy," "Thorn in My Pride," "Hotel Illness," and a gospelish remake of Bob Marley's "Time Will Tell"—find the Crowes effortlessly gliding over all the rock & roll bases: dirty-ass guitar licks, decadent lyrics, soulful vocals, and acoustic-blues pensiveness.

On *Amorica,* the Black Crowes really come into their own as a contemporary hard-rock boogie band. Here, they downplay the Stones influences and focus on their strengths: Chris Robinson's increasingly potent vocals and ever-darkening lyrics; Rich Robinson and Marc Ford's furious guitar interplay; drummer Steve Gorman's Zeppelinesque workouts with bassist Johnny Colt; and Eddie Harsch's churchy piano parts. Percussionist Eric Bobo (of Beastie Boys fame) lends a hypnotic, Latin-tinged seasoning to the music, while the haunting pedal-steel guitar of American Music Club's Bruce Kaphan underscores the album's overall sense of dread. In the wah-wah-fueled funk of "A Conspiracy," sad country soul of "Wiser Time," and resigned country blues of "Descending," the group locks into a sound that owes debts to no one in particular—except the Black Crowes themselves.

Three Snakes continues in the more eclectic vein of *Amorica,* but the album lacks the strong material of its predecessor. While the Robinson brothers are in top form, their solid musicianship can't rescue this album from the awkward, grunge-inspired pop of "Nebakanezer," the psychedelic pretentiousness of "How Much for Your Wings?" or the silly, Sly Stone–via–Lenny Kravitz funk of "(Only) Halfway to Everywhere." On the much better *By Your Side,* the Crowes return to what they do best: lean, mean Southern boogie. At times, they dip back into their stylistic catalogue a bit too literally, once again invoking the Stones ("Kickin' My Heart Around") and Faces ("By Your Side").

In 2000, the Black Crowes toured with former Led Zeppelin guitarist Jimmy Page; the resulting *Live at the Greek* finds Page and the Crowes whipping out brawny performances of such Yardbirds and Zeppelin classics as "Shapes of Things" and "Whole Lotta Love." Page's influence can be heard all over the Crowes' next studio album, *Lions,* as the band continues its back-to-basics approach on a new label. But all the lumbering stomp and Zeppelinesque bombast in the world can't prop up the album's weak, unmemorable songs.

With the various Crowes itching to fly the coop, the band capped its career (at least temporarily) with the double-disc *Black Crowes Live.* It's a fitting farewell; the Crowes always soared highest onstage, and here they kick out the hippie jams ("Cosmic Friend"), swagger like Ronnie Van Zant ("Wiser Time"), and reach for the heavens with stoned abandon ("She Talks to Angels"). *Greatest Hits 1990–1999* is a solid selection of the Crowes' best American Recordings. —M.K.

Black Dice

★★★½	Black Dice (Troubleman, 2001)
★★★★½	Cold Hands (Troubleman, 2001)
★★★½	Beaches and Canyons (DFA, 2002)
★★★½	Creature Comforts (DFA, 2004)

If the Strokes revived vintage CBGB rock and the Yeah Yeah Yeahs embodied Brooklyn's hipster cool, Black Dice represented the cutting edge of New York City's postmillennial punk. The foursome started out in the Providence, RI, noise scene, which was established by Rhode Island School of Design students and centered on the legendary underground venue Fort Thunder. Unlike Providence's other leading band, Lightning Bolt—a bass-and-drums duo who recycle riff-happy heavy metal into amphetamine-kicked skronk—Black Dice set about tearing apart the rigid structures of '90s hardcore.

When Black Dice's lead screamer, effects-board maestro, and youngest member, Eric Copeland, elected to attend New York University, his guitarist brother, Bjorn, bassist Aaron Warren, and drummer Hisham Bharoocha decided to move with him to Brooklyn. Their first, self-titled release after the move, on respected New Jersey hardcore label Troubleman, sounds like a building collapsing: Screeching and buzzing guitar and bass crash into convulsing beats, while Eric's wordless cries approximate both outrage and anguish. Stripped of recognizable repetition and language itself, the songs don't even have names.

Originally known for assaulting audiences at their shows—both physically, by jumping into the crowd swinging, and sonically, by cranking their amps to almost literally unbearable levels—Black Dice slowly began focusing on musical performance, attentively twiddling knobs and pushing buttons in order to orchestrate layers of on-the-spot loops and yet more obscurely wrought noise. *Cold Hands* jumps from splintered screamo to almost pastoral, yet still creepy, passages: The hushed title track's jagged motif could be the slow winding of a music box, its pretty melody reversed and twisted, or ghostly echoes in a deserted boatyard.

Beaches and Canyons, released by much-hyped upstart Manhattan label DFA, fully revealed Black Dice's long-simmering fetish for Japanese noiseniks the Boredoms, whose experimental thrash punk gave way over time to an expansive, spiky psychedelia. (Back-to-nature Brooklyn-by-way-of-Baltimore aggregate Animal Collective also influenced *Beaches and Canyons.*) Black Dice drummer Bharoocha, who spent part of his childhood in Japan, creates tribal polyrhythms instead of breaking beats; Eric literally coos, whoops, and screeches like a monkey; and everyone tries their hand at gee-whiz effects tools, including the "Korg Kaos Pad, Flip 2 Power VT-X Tremelo, Electro Harmonix Poly Chorus, and DOD Gonkulator." (We're not making these up, although they might have.) However Black Dice made it, the combination of whipping feedback, frenetic rhythms, and tidal washes encapsulates the concrete jungle's controlled chaos unlike the sound of any other New York City band.

The hushed, amorphous *Creature Comforts* was made, painstakingly, to be heard on headphones: The highly processed guitars, hand drums, and God knows what else subtly suggest surf, dub, and shoe gazer but also Ed Wood sound effects, jungle racket, and conversation. —N.C.

Black Eyed Peas

★★★	Behind the Front (Interscope, 1998)
★★★½	Bridging the Gap (Interscope, 2001)
★★½	Elephunk (Interscope, 2003)

L.A.-based hip-hop trio Black Eyed Peas started out as the unofficial West Coast franchise of the East Coast's iconic Native Tongues collective, desperate to show the world that not all West Coast rap devotees were about was blingin', bangin', and bitches: Former break dancers garbed in boho gear, comprised of various races and stressing positivity, the trio was a pointed antidote to the gangsta and ghetto fabulousness of the day. Their 1998 debut, *Behind the Front* produced the irresistible club hit, "Joints and Jams," but the group hadn't found their voice yet and the album sinks under the weight of its slick production. Their followup, *Bridging the Gap,* is a more organic-feeling representation of their considerable skills and vision: Tracks such as "On My Own" and "Weekend" display uncluttered and muscular production, deft samples, and smart rhymes.

The group wanted to crack the big time, though, and they did with *Elephunk,* breaking out some marquee names—Justin Timberlake, Papa Roach, Brazilian samba legend Sergio Mendes—as well as adding a female member, Fergie, to their crew. The would-be *What's Goin' On*–era Marvin Gaye track "Where Is the Love" became an Up With People anthem, and the Parliament-inflected "Let's Get Retarded" achieved their booty-shaking goals (and became a theme song for the NBA). The production is meticulously detailed, but the crew's clichéd observations, preachy lyrics, and MTV-ready posturing make *Elephunk* their least inspiring album. —E.H.

Black Flag

★★★	Jealous Again (EP) (SST, 1980)
★★★★½	Damaged (SST, 1981)
★★★	Everything Went Black (SST, 1982)
★★★★	The First Four Years (SST, 1983)
★★★	My War (SST, 1983)
★★	Family Man (SST, 1984)
★★★	Slip It In (SST, 1984)
★★	Live '84 (SST, 1984)
★★	Loose Nut (SST, 1985)
★★★	The Process of Weeding Out (EP) (SST, 1985)
★★★	In My Head (SST, 1985)
★★★	Who's Got the 10"? (SST, 1986)
★★★★★	Wasted . . . Again (SST, 1987)

Lords of the Huntington Beach surf-punk scene and pioneers of the California hardcore aesthetic, Black Flag was an enormously influential band in its day, and it made a handful of indisputably great recordings—as well as an unconscionable number of mediocrities. Granted, a good bit of that had to do with the rapid rate at which the band churned out new albums (six titles in one two-year stretch), but far more damaging was its fondness for poetry readings and dissonant, self-indulgent instrumental recordings. Henry Rollins, the singer/poetry reader who fronted the band from *Damaged* on, was clearly the star, and he made a career as a bandleader/actor/writer and alt-celebrity after Black Flag broke up. But the band's real strength was guitarist Greg Ginn, whose slash-and-burn rhythm work and short, searing solos recall the classic cacophony of Johnny Thunders.

Perhaps the best place to start is *Damaged,* a stunning display of suburban disaffection. Black Flag's writing is cuttingly sharp here, and the band makes some telling points in such consumer-culture parodies as "Gimmie Gimmie Gimmie" and "TV Party." Beyond that, the band's discography becomes a minefield of missteps, spotty albums, and ramshackle reissues. *The First Four Years,* which recaps the band's early singles and EPs, is worth owning; the career-spanning best-of *Wasted . . . Again* is essential listening, but *Everything Went Black*, a collection of early studio sessions and outtakes, is pretty much for collectors only. *My War, Slip It In, Loose Nut,* and *In My Head* each have their moments, but only *Slip It In* manages enough of them to justify a full album. *Live '84* is rambling and chaotic, but *Who's Got the 10"?* cuts through its occasional self-indulgence with brutally intense playing. And though almost every solo on *The Process of Weeding Out* goes on too long, at least it spares us the poetic recitations that make *Family Man* so hard to bear. —J.D.C.

Black Rebel Motorcycle Club

★★★★	B.R.M.C. (Virgin, 2000)
★★★	Take Them On, On Your Own (Virgin, 2003)

A tried-and-true rule of rock & roll: It's okay for an American band to sound British if at least one member hails from the U.K. In the case of Los Angeles trio Black Rebel Motorcycle Club, it's their drummer, Nick Jago, whose presence helps justify the band's hefty debt to '80s Brit-rockers such as the Jesus and Mary Chain and Love and Rockets. The band's debut album—named, like the group itself, for Marlon Brando's biker gang in *The Wild Ones*—adds a heavy bass groove to the swirly, psychedelic sound of the U.K. groups that inspired them. Dark, dizzying, and heavy with distortion, *B.R.M.C.* is the best '80s Brit-rock album since, well, the '80s. "Whatever Happened to My Rock & Roll" is a spacey, blues-rock romp, and "Rifles" coasts on drugged-out vocals and shimmering guitars.

Take Them On, On Your Own has fewer hooks, but at least BRMC is starting to sound like their own band. "Stop" declares its presence with a wet, sexy bass line—the song's melodic anchor for Peter Hayes' droning guitar. Other numbers ("Six Barrel Shotgun") rev hard and fast, exactly like Detroit garage rock would sound to three California Anglophiles. On "Ha Ha High Babe," they indulge their psychedelic tendencies with an impenetrable tangle of noise that loops and loops and loops all the way out to space while Hayes pants, "You're ha ha high baby/You can't keep it on the ground." Original, it's not. But it still sounds awfully good while it's happening. —J.E.

★★★★★	Black Box: The Complete Original Black Sabbath 1970–1978 (Rhino, 2004)

Black Sabbath the album, the song, and the band have been studied by metalheads with all the fervor accorded the Dead Sea Scrolls. "Black Sabbath" the song starts off the not-feeling-so-fab four's 1970 debut, and from the moment that its first fearsome notes were unleashed on an unsuspecting public it has remained one of the unshakeable cornerstones of heavy metal. While Led Zeppelin, Deep Purple, and even earlier gods of noize such as Blue Cheer and Jimi Hendrix are also responsible for the storied future of hard rock and metal, this Birmingham, England, quartet stands apart from its peers on a high mountain peak of doom, cannabis, and the monster riffs that—along with evil T-shirts, volume, and shaggy hair—have fueled a million basement dreams of dark glory. They took the blues out of blues-rock and replaced it with Wagner, creating epic battle rhythms filled with a tension and release that any adolescent boy would know about firsthand. Thanks to Roger Bain's production, *Black Sabbath* sounds really big and really unhealthy. It's an album that eats hippies for breakfast; also, it has even been statistically determined that if a brain cell were the size of a grain of sand, the amount lost while listening to this record upon its first year of release could easily fill the Grand Canyon.

What people forget about Black Sabbath—and it's understandable given their demonic imagery and All Hallow's Eve vibe—was that it was one of the most God-driven, puritanical, wet-blanket rock bands in history. Its "mankind is evil and must repent for its wicked ways" thesis would influence almost all the future bards of the metallic arts. On their second and supremely heavy album *Paranoid,* there are laments on the destruction of war and the hypocrisy of politicians ("Electric Funeral" and "War Pigs"), the perils of technology ("Iron Man"), the perils of drug abuse ("Hand of Doom"), and the perils of mythical creatures and their choice of footwear ("Fairies Wear Boots"). On "Hand of Doom," Geezer Butler's subatomic bass, Ozzy Osbourne's tortured bullfrog yelp, Bill Ward's smack-you-in-the-face drums, and Tony Iommi's fuzz guitar lead mesh seamlessly into something so unholy and beautiful that it would take lesser bands years of back-to-the-drawing-board grunt work to achieve such badassed symmetry.

Hot on the heels of *Paranoid* came *Masters of Reality,* an even darker album, if that's possible. The moralizing reaches new heights and the world is given the generous gift of "Sweet Leaf" and "Children of the Grave." *Vol. 4* is one of those difficult "cocaine" albums that bands were fond of making back then. Sabbath was rich, bored, huge in America, and it was the '70s—you do the math. Sluggish and muddy, it nonetheless has its moments and remains a hard-to-beat monument to bloat and excess. Plus, it features a heartfelt ballad from Ozzy called "Changes" that just might be the scariest song the band ever committed to tape.

Sabbath Bloody Sabbath, from 1973, is yet another drugs album, but there is inspiration here that suggests the band found another supplier. Not even Yes's Rick Wakeman can kill the schizophrenic weirdness of a track like "Sabbra Cadabra." Ambitious and tortured, the group creates the first conceptless concept album. "Killing Yourself to Live" is a keeper, as is the now-classic title track. *Sabotage* continues the theme of themeless epic suites with twisted stoner-prog anthems that rock as hard as the early days, but also hyperextend themselves in unexpected ways. It might be the most underrated of their albums, and was certainly the original band's last stab at greatness together. Songs such as "Hole in the Sky," "Symptom of the Universe," and "The Writ" are weird, wild, and massive.

Technical Ecstasy is the '70s-era Sabbath album least likely to be found in a hard-rock fan's collection. It's not horrible, but you wonder if anyone in the band remembers making it. Is it an ill-fated attempt to snag some of the boogie-rock money that Ted Nugent was rolling around in? Or had they just run out of steam? Tony Iommi's guitar is the only thing left alive. The same might be said of *Never Say Die,* the last album Ozzy appeared on before taking a hike and finding solo fame. The songs are better, though, especially the title tune, and it sounds like someone poked Bill Ward with a stick because the drum work is great throughout. Not a blaze of glory for the original foursome but better than people might remember.

There are several good-to-great Sabbath compilations out there, most of which are heavy on Ozzy-era material. Shy, retiring types and scaredy cats looking for an easy way into Black Sabbath's diabolical cosmology can't go wrong with the 1976 best-of *We Sold Our Soul for Rock 'n' Roll,* which is all a weekend blasphemer could ever need. For a more complete overview of Sabbath's glory days, check out *Black Box,* which collects the first four albums and tacks on a load of bonus material. (*Symptom of the Universe* is the abridged version.)

Buyer beware: Of the post-Ozzy albums—and a good many of them should have been sold under the name the Tony Iommi Experience—there are three essential purchases. *Heaven & Hell* and *Mob Rules,* featuring the elfin dragon-slayer Ronnie James Dio on vocals, are both excellent. *Born Again,* recorded with ex–Deep Purple yelper Ian Gillan, is likewise a monstrous beast and one of the best Sabbath albums that hardly anyone has heard. Anything after that is recommended only to diehard freaks who can't go a day without hearing yet another spitfire lick from their master's Gibson, fans of train wrecks who want to hear *The Eternal Idol* (one of Iommi's attempts to cross over into the world of '80s pop metal), and Otto the bus driver. —S.S.

Black Sheep

★★★★ A Wolf in Sheep's Clothing (Mercury, 1991)

Like its cohorts in the pioneering Native Tongues clique—De La Soul, A Tribe Called Quest, and the Jungle Brothers—New York hip-hop duo Black Sheep approached its music with humor, wit, and creativity. Its 1991 debut, *A Wolf in Sheep's Clothing,* is all youthful energy and cocky strut, with Dres and Mista Lawnge goofing on sell-out rappers, dodging homely honeys, and mocking envious haters. The pair specialized in call-and-response hooks, the most memorable of which, "You can get with this/Or you can get with that," popped out of speakers on the classic "The Choice Is Yours." Mostly though, Black Sheep were girl crazy, and *A Wolf in Sheep's Clothing* is rife with bedroom boasts, horny come-ons, ménage à trois fantasies, and meditations on fly females. Thanks to the duo's comical approach, the subject matter stays fun and light, and offbeat production touches such as the flute sample flitting through "Hoes We Knows" and the rhythmic dog barks that punctuate "Similak Child" make the album consistently engaging. —K.M.

Blackstreet

★★½	Blackstreet (Interscope, 1994)
★★★½	Another Level (Interscope, 1996)
★★½	Finally (Interscope, 1999)
★★	Level II (DreamWorks, 2003)
★★★★	No Diggity: The Very Best of Blackstreet (Interscope, 2003)

The brainchild of producer Teddy Riley (Bobby Brown, Michael Jackson, etc.), Blackstreet was the sound of Riley getting back into the groove of performing, which he hadn't done since his former group Guy broke up. After single-handedly defining the New Jack Swing sound that swept R&B in the early '90s, Riley stretched out musically on his group's four studio albums, the best of which is *Another Level,* which features the brain-melting, ass-moving single "No Diggity." The song stood out because of its minimalist production, dark vibe, and a guest rap by Dr. Dre that made it absolutely impossible to ignore (it was surpassed as the single of 1996 only by another Dr. Dre–related song, Tupac's "California Love"). Neither *Finally* or *Level II* contain a single like "No Diggity," in either quality or pop impact, though these albums still continued Blackstreet's visibility on the R&B scene. Like many groups in the same vein, their best-of compilation stands as their most consistent album; *No Diggity: The Very Best of Blackstreet* is an awe-inspiring example of bump and grinding single after single. A party favorite. —K.M.

★★★	The Millennium Collection (Universal, 2002)

In retrospect, it's tempting to describe Black Uhuru as the Fugees of '80s reggae. Not necessarily because both trios had the same gender breakdown, but because at its peak Black Uhuru was blessed with a similar understanding of how to make Caribbean culture accessible to mainstream America. Black Uhuru never sold as well as the Fugees; only two of their albums (*Chill Out* and *Now*) ever cracked the Billboard Hot 200 album chart. But with the release of *Red,* Black Uhuru was recognized as the most important roots reggae act to have emerged since Bob Marley's Wailers first splashed down in the U.S. Like its predecessors, *Red* made ample use of lead singer Michael Rose, whose elaborately ornamented phrasing at times has more in common with cantorial singing than with typical reggae vocal style; likewise, the album's rhythm work—by producers Sly Dunbar and Robbie Shakespeare and their cohorts—is flawless and enticing. But the writing is what really makes this album sizzle, from the spiritual wisdom of "Youth of Eglington" and "Carbine" to the sensual pleasures of "Sponji Reggae" and "Puff She Puff."

Black Uhuru's output up to this point was solid, if a bit hard to track. Its debut, *Love Crisis* (which was later remixed and reissued as *Black Sounds of Freedom*) has many of the same vocal and instrumental strengths as *Red,* but suffers from overly conventional material; *Showcase,* a collection of singles that was later repackaged as *Guess Who's Coming to Dinner,* is much stronger, thanks to stirringly militant numbers such as "Abortion" and "Guess Who's Coming to Dinner." *Sinsemilla* consolidates these strengths, and makes somewhat better use of Puma Jones (who joined during the period covered by *Showcase*).

Regrettably, the group's live album, *Tear It Up,* doesn't, but that poor showing may simply reflect the changes Black Uhuru was going through as the group developed a more cosmopolitan attitude and approach. *Chill Out* is far more urban (and far less doctrinaire) than its predecessors, but even that album seems cautious and conservative when compared to the techno-intense sound of *Anthem.* Taken simply on the strength of its groove, *Anthem* is certainly one of the group's most insinuating efforts, but apart from tunes such as "Party Next Door" and a version of

Miami Steve Van Zandt's "Solidarity," the songwriting is less than convincing.

Rose left the group at this point, and was replaced on *Brutal* by Junior Reid. His performance isn't terribly distinctive, but the songs and production more than make up the difference, particularly on the Arthur Baker–remixed "Great Train Robbery." Reid takes more of a leading role with *Positive* (Jones' last album with the group), although here the dub version almost outclasses the original. But he, too, left the group soon after, leaving founding member Duckie Simpson to recruit Don Carlos and Garth Dennis (both of whom had sung in Black Uhuru's very first lineup) for the polished but increasingly pedestrian *Now, Iron Storm, Mystical Truth,* and *Strongg* (all followed by obligatory dub versions). Of the various best-ofs, *Liberation* gives the best overview of the band at its peak, while *The Ultimate Collection* has the highest hits-per-dollar ratio. —J.D.C.

★★★★	Mundo (Sony, 2002)

Presidential candidate in his native Panama, Hollywood actor, and legendary *salsero:* Rubén Blades is Latin music's great renaissance man. And yet his loftiest achievement has probably been his protean transformation of Afro-Caribbean music into a sociopolitically conscious genre that reflects the never-ending carnival of Latin American reality with humor and poignancy.

Blades the salsa master was also a product of a specific time and place—New York in the '70s, where the Fania record label spearheaded the salsa revolution by revamping the old Cuban rhythms with a gritty, modern-day influence and subtle echoes of American R&B. Blades was one of the shiniest stars in the Fania constellation, which also included Celia Cruz, Eddie Palmieri, Johnny Pacheco, Héctor Lavoé, and visionary trombonist/producer Willie Colón.

It was Colón who took Blades under his wing, collaborating with him on the smoldering, thickly textured *Metiendo Mano!* A year later, *Siembra* would become the best-selling album in salsa history (an honor it held for a few decades) thanks to Blades' anthemic "Pedro Navaja," a seven-minute dance epic fueled by biting social commentary, deliciously dark humor, and an impossibly sticky chorus.

Wanting to distance himself from traditional Afro-Caribbean terrain and bring his music closer to a new, savvier pop hybrid, Blades dropped his customary big band in favor of a jazzier sextet (Seis del Solar), signed with Elektra in 1984, and released the masterful *Buscando América.* The music had lost none of its swing, but the lyrics were deeply reflective and melancholy. By then, it was quite clear that Blades was one of Latin America's all-time essential songwriters.

Instead of recycling the *Buscando América* formula, Blades used his Elektra tenure as an opportunity to continue experimenting. The inevitable lapses in judgment included an English-language album that failed to ignite much interest from the mainstream.

After reuniting with Colón for a lackluster 1995 session that found both performers recording their alleged duets in separate studios, Blades took an even bolder step away from the tropical sounds that had made him famous. Limiting the salsa repertoire to his fiery, nostalgia-tinged concert appearances, he released a series of albums that embraced all kinds of Latin folklore while searching tirelessly for a mature pan-global statement that at times bordered dangerously close to world lite. But he finally got it right with *Mundo,* his most eclectic effort to date and a soulful statement of purpose for a man who really believes that the heart of an honest musician knows no cultural boundaries. —E.L.

Blake Babies

★★★	God Bless the Blake Babies (Zoë/Rounder, 2001)

During their original 1986–91 run, Boston's Blake Babies were darlings of college radio for embodying things eternally fresh: amateurish talent, love/hate passions, youthful voices. When the band—which parted ways as singer/bassist Juliana Hatfield staged a successful solo career—reformed a decade later, they wisely refrained from trying to go home again. *God Bless* is a refined, adult set. It even feels like a family disc: Hatfield, guitarist John Strohm, and drummer Freda Love Smith all sing lead, and longtime collaborator Evan Dando of the Lemonheads turns up as well. Occasionally the professionalism they acquired on sabbatical polishes any ardor off the work, and "What Did I Do" reverts to dorm-room angst. But in songs like "Picture Perfect" and "When I See His Face," the Blake Babies sound like a band that knows how to settle down in style. —C.N.

with B.B. King

★★★★ B.B. King & Bobby Bland: Together for the First Time Live (1974; MCA, 1990)
★★ B.B. King & Bobby Bland: Together Again . . . Live (1976; MCA, 1990)

Less celebrated than his contemporary B.B. King (for whom he served briefly as valet and chauffeur) and lacking King's major-label support, Bobby "Blue" Bland nonetheless has a lot more than staying power going for him. Although nearly 50 years have passed since his early, scuffling days working joints on Memphis's Beale Street with King, Roscoe Gordon, and Johnny Ace, he has quietly become one of the best-selling and most frequently charted R&B artists of all time, well ahead of some of his celebrated peers.

Born in 1930 near Memphis, the young Robert Calvin Bland received his first lessons in direct, heartfelt singing while a member of various church groups in town; in the late '40s he took to Beale Street and began honing a singular vocal approach out of the gospel, blues, and early R&B that had become his artistic touchstones. Bland didn't, and doesn't, have a big, powerful voice. Rather, his was the quiet storm of postwar blues—forceful and determined in a macho kind of way on the uptempo numbers, but with an underlying tenderness that could put the hurt in a ballad to a degree approached in his peer group only by B.B. King. Although his artistic growth was far from complete when he cut his first sides at Sam Phillips' Memphis Recording Service in 1951, he sounds every bit the assured vocalist, recording in his hometown backed by musician friends from Roscoe Gordon's band; a year later he was signed to the Houston-based Duke label, teamed with players unfamiliar to him (Johnny Board and His Orchestra), and lost nary a step—in fact, Board brought a big, ambitious sound to Bland's sessions by way of a prominent horn section and an organist and vibraphonist whose embellishments brought a jazz feel to the arrangements, prompting even more richly textured performances from Bland. Such was the genesis of a signature style that embraced not only florid, emotionally charged blues (and borderline pop) ballads but also hard-driving blues and jump blues orchestrations, extending a tradition pioneered in the '30s by Big Joe Turner and the boogie-woogie cats from Kansas City.

An exemplary reissue program has restored order to Bland's Duke recordings, thanks primarily to the three essential well-annotated two-CD collections, *I Pity the Fool: The Duke Recordings, Volume One, Turn on Your Love Light: The Duke Recordings, Volume Two,* and *That Did It! The Duke Recordings, Volume Three.* The ultimate aim of this program is to bring the entirety of Bland's 20-year Duke recording history to the market in chronological order, including alternate takes, rarities, and previously unissued sides. Lower-budget Duke retrospectives include the single CDs *The Best of Bobby Bland* (which includes "Farther Up the Road" and two other certified Bland classics in "I Pity the Fool"—his second #1 single, from 1960—and "Turn On Your Love Light"); *Greatest Hits, Vol. 1,* with its 16 essential tracks (although the omission of "Little Boy Blue" is puzzling); and the 12-cut

20th Century Masters—The Millennium Collection: The Best of Bobby "Blue" Bland set ("I Pity the Fool," "Turn On Your Love Light," the scabrous "Poverty," and the exquisite, monumental "Lead Me On" from *Two Steps from the Blues* are the highlights of this truncated overview).

Among the non–greatest hits albums, the one absolute must-have is *Two Steps from the Blues,* one of the most powerful R&B albums ever recorded. From the raw-boned confessional blues of the opening title song to the final, touching "I've Been Wrong So Long," Bland constructs a concept album devoted to intimate reflections on love and longing so personal and atmospheric that it comes off as R&B's answer to Sinatra's brilliant forays into thematic unity, *Only the Lonely* and *In the Wee Small Hours.* Check out the aching plea "Lead Me On" for a heartbreaking sample of this artist's deeply felt balladeering style—this one's strictly Mount Olympus in grandeur.

Aging as gracefully as his friend B.B. King, Bland, after some fallow years on ABC in the mid- to late-'70s (the highs and lows of which are encapsulated on the two live albums with King, and on the 16-track *Greatest Hits, Vol. 2: The ABC-Dunhill/MCA Recordings,* which includes a couple of interesting forays into country with "Today I Started Loving Her Again" and "I Hate You"), found a home on Malaco and has stayed the course with gospel-soul stylings and exemplary song selection in a traditional R&B vein. A good starting point for this era is *First Class Blues,* something of a greatest-hits package comprising several tracks from Bland's first two Malaco albums, *After All* and *Members Only,* as well as fresh interpretations of "Two Steps from the Blues" and another Bland evergreen from the Duke years, "St. James Infirmary." On a fervent interpretation of "In the Ghetto," Bland, all soul on ice, gives a slow, deliberate reading that has the effect of making vivid the desperation of inner-city life. This latter stage of Bland's career finds him affecting an odd strangled wail he calls "the squall." It's a truly weird effect on disc, but in concert it still elicits squeals of delights from the women in the audience. The *Members Only* album is one premier showcase for "the squall," but in no way does it undercut the powerful but nuanced sadness he brings to the wistful title song, which remains one of his towering performances in the recording studio. The inspired *Midnight Run, Portrait of the Blues,* 1998's *Memphis Monday Morning,* and especially 1993's *Years of Tears* show the mature vocalist in splendid form, working his turf, moving hearts, and sounding as involved in his material as he was at the outset of his career. Remarkable—then and now. —D.M.

★★★★	No More Drama (MCA, 2001)
★★★	Love and Live (Geffen, 2003)

Mary J. Blige's authoritative, sometimes bellicose voice and no-bull delivery made her one of the important new voices of the '90s. A bridge between the R&B world and the hip-hop nation, she pioneered the movement that would later become neo-soul, generating gripping songs that were also massive radio hits. Blige has the distinction of being the first to fully seize the narrative possibilities of rap: Her tough-girl persona and streetwise lyrics give even the sweet songs of her 1992 debut *What's the 411?* a gritty undertone and a realism missing from much of the devotional love songs ruling the charts at that time.

Growing up in a housing project in Yonkers, Blige listened to everything from "Planet Rock" to Anita Baker; she was initially discovered by Uptown's Andre Harrell, then came under the wing of Sean "Puffy" Combs, who coproduced *What's the 411?,* situating her voice in capricious, playful settings just edgy enough to rate time on hip-hop mix shows.

Blige's vocal skills shine more completely on the followup, 1994's *My Life,* which finds Combs guiding her into more conventional R&B-ballad territory. Blige sings of hard times, men who hurt her, and struggles she's known, sometimes veering precariously close to overly emotional hand-wringing. The most compelling material, however, is the more sensual songs, among them the hit "Mary Jane (All Night Long)" and the brisk "You Bring Me Joy."

The success of her first two projects enabled Blige to call the shots on her next one, and she moved even further toward the R&B mainstream by hiring Jimmy Jam and Terry Lewis, Babyface, and others to produce. *Share My World,* which entered at #1 on the *Billboard* charts, displays Blige's hit-song savvy but fewer memorable performances. 1999's *Mary* more fully realizes Blige's vision for *Share My World.* Its songs include a beautiful duet with Lauryn Hill, "All That I Can Say," and two smart appropriations: "Deep Inside" interpolates Elton John's "Bennie and the Jets," while "Time" borrows portions of Stevie Wonder's "Pastime Paradise" and Al Green's "I'm Glad You're Mine."

By the time Blige returned with *No More Drama* in 2001, her neo-soul approach had helped artists such as Macy Gray become stars. Sensing the potential for burnout, Blige makes the music more assertive (Dr. Dre produces the percolating dance-floor anthem "Family Affair") and the lyrics more uplifting and compassionate. Several songs, including the title track, pursue the theme of reconciliation, and there's even an ode to the emotional trials of "PMS." As in the past, Blige gathers an enormous amount of talent to help her—from rappers Eve, Missy Elliott, and Ja Rule to Combs, now P. Diddy, who does a remix of the title track—and, on this set, the intense singer makes sure that everyone shines.

Blige's reunion with P. Diddy, *Love and Life,* doesn't quite hark back to the pair's enduring *What's the 411?*, but is a feast of contrasts: Some of the tracks catch Blige celebrating the joy of romance, and others, particularly tracks with Method Man and 50 Cent providing rap cameos, offer craftily produced chronicles of sex and its aftermath. —T.M.

Blind Faith

★★★★	Blind Faith (Polydor, 1969)
★★★	Blind Faith Deluxe Edition (Polydor, 2001)

When Eric Clapton and Ginger Baker (from the recently dissolved Cream), Steve Winwood (on hiatus from Traffic), and Rick Grech (from Family, which was a big deal in Britain, at least) got together in 1969 as Blind Faith, they had created something new to rock & roll: the supergroup. But like almost every supergroup since, Blind Faith was never quite the sum of its parts. Although its one album had some incredible moments—the ethereal "Presence of the Lord" and "Can't Find My Way Home"—too much of the album was given over to directionless jamming.

The quartet held together for barely a year, breaking up after its first tour. Nonetheless, the band left enough in the way of unreleased material to allow Polydor to issue a *Deluxe Edition* of *Blind Faith,* on which the original album is augmented by an hour and a half of studio leftovers (including an entire CD of unfocused, uninspired instrumental jams). If ever a product proved that less is more, this deluxe edition is it. —J.D.C.

Blind Lemon Jefferson

★★★★	Blind Lemon Jefferson (1974; Milestone, 1992)
★★★★½	King of the Country Blues (Yazoo, 1988)
★★★	Penitentiary Blues (Collectables, 1989)
★★★★	Moanin' All Over (Tradition, 1996)
★★★★★	The Best of Blind Lemon Jefferson (Yazoo, 2000)
★★★½	Blue on Blues (Varèse Sarabande, 2002)

Among the influential guitarists of the 1920s only Lonnie Johnson claims a stature comparable to that of Blind Lemon Jefferson. Blind at birth, Jefferson began performing in his early teens, playing in the streets, at parties, wherever he could find an audience. As the years progressed, his repertoire expanded to include not only blues but also field hollers, work songs, ballads, prison songs, hymns—all expressed in the idiosyncratic style he had developed. His guitar style is marked by unpredictable riffs and irregular rhythms that are free of any easily pinpointed influence. As a writer Jefferson was given to the dark, brooding tales, but he leavened chilling narratives such as " 'Lectric Chair Blues" and "Prison Cell Blues" with the light of salvation proffered in gospel numbers ("He Arose from the Dead," "I Want to Be Like Jesus in My Heart") and a randy sense of humor ("Match Box Blues"). Recording steadily during the last four years of his life, Jefferson left a body of work that made a significant impact on succeeding generations of blues artists—Lightnin' Hopkins, T-Bone Walker, and B.B. King are among the giants who acknowledged Jefferson's impact on their own styles—and signature songs such as "See That My Grave Is Kept Clean," "Black Snake Moan," and "Easy Rider Blues" that were recognized as genre classics. In addition he became a footnote in early rock & roll history when his "Match Box Blues" served as the foundation for Carl Perkins' 1957 rewrite, "Match Box," which was later covered by the Beatles.

The Yazoo and Milestone albums are highly recommended, as all three offer a broad overview of Jefferson's best-known work with a minimum of song duplications and uniformly solid annotation. By contrast, the skimpy nine-track *Penitentiary Blues* duplicates a few of the songs on the Milestone set, and its generic annotation fails to provide any information about the album itself. Aficionados, however, will find the two versions of "Black Snake Moan" interesting, as well as the starkly rendered title song. The newest Jefferson title, *Blue on Blues* from Varèse Sarabande, divides a dozen cuts between Jefferson and Charlie Patton, with Jefferson's representative tracks including "See That My Grave Is Kept Clean," "Black Snake Moan," and "Penitentiary Blues." While the domestic releases do an exemplary job in telling Jefferson's story, completists will want to check out Document's four-volume *Complete Recorded Works* collection. —D.M.

Blind Melon

★★	Blind Melon (Capitol, 1992)
★	Soup (Capitol, 1995)
★	Nico (Capitol, 1996)

Blind Melon's lone hit, the acoustic ditty "No Rain," gave off sweet hippie love vibes for the summer of

1993, with forlorn vocals and a moving video starring the Bee Girl, an awkward adolescent girl in a bee costume and glasses who roamed the grassy wastelands of youth in search of other hive folk to buzz and bumble with. When she finally found her apiary soulmates at the end of the video, "No Rain" was an instant tearjerker and an MTV classic. But not even the support of the insect community could get Blind Melon a second hit. Not so much hippies trying to pass for grunge as metalheads trying to pass for hippies, the Melon men didn't have their hearts in faking it. For their followup, *Soup,* they evidently just stitched some contorted practice-tape highlights together and hoped nobody would care. Nobody did. The lead singer, Shannon Hoon, died of drugs soon afterward; *Nico* collects posthumous scraps. Oh, Bee Girl, wherever you are: We remember. —R.S.

Blink-182

★★½ Buddha (1994; Kung Fu, 1998)
★★½ Cheshire Cat (1995; Cargo/Uni, 1998)
★★★ Dude Ranch (Grilled Cheese, 1997)
★★★★ Enema of the State (MCA, 1999)
★★★★ Take Off Your Pants and Jacket (MCA, 2001)
★★★★ Blink-182 (Geffen, 2003)

If Green Day's bratty emotion defined pop-punk in the mid-'90s, Blink-182's alternately gushy and goofy radio hits updated it for the new millennium. On their first two albums, *Buddha* and *Cheshire Cat,* the San Diego–area trio slapped together lilting melodies and racing beats in an attempt to connect emo, hardcore's sullen "emotional" branch, and skate punk, a sort of pop hardcore. In 1997, the year Green Day discovered acoustic balladry and harmonica on *Nimrod,* Blink-182 finally focused their sound with *Dude Ranch.* Guitarist Tom DeLonge plays the straight man, singing sturdily and deadpan, while the squeakier-voiced bassist Mark Hoppus bleats urgently about romance gone wrong. Drummer Scott Raynor (who was replaced by Travis Barker in 1998), sticks to double time, but his songwriter bandmates hang their old weepie-and-wedgie routine on shiny new hooks. And while later pop-punk bands such as the Promise Ring will implausibly deny their emo tendencies, the scrupulously unpretentious Blink actually name one of their bitter anthems after the frequently derided genre. (Don't ask where they got the inspiration for "Dick Lips.")

Were it not for three classic singles, Blink-182's major-label debut, *Enema of the State,* would've sounded like just another visit to the *Dude Ranch.* "Adam's Song" took its controversial place in rock history alongside Ozzy Osbourne's "Suicide Solution" when a teen killed himself in his bedroom while the track played on repeat. DeLonge announces the song's plain opening lines, "I never thought/I'd die alone," just as chiming guitar gives way to a handful of pent-up chords. The chorus, a sluice of pounding, harmony-laced redemption, transforms the melancholy into triumph: "The tour is over, I've survived/I can't wait till I get home/to pass the time in my room alone." The point, of course, is that teens trapped in their rooms *aren't* alone.

And then there's hiding in your room with someone else. "All the Small Things" is Blink's most subtle song about sex—the title does not refer to the band's penises. (Don't ask where they got the inspiration for "Dysentery Gary.") In its schoolyard-chant verse and na-na-na chorus, Hoppus sweetly tilts at his "little windmill," a love interest who comes to his shows, gives him roses, and thinks about spending the night. An adolescent fear of sex animates *Enema of the State*'s best cut, the blithely jubilant "What's My Age Again?" "We started making out/and she took off my pants," DeLonge narrates obliviously, "but then I turned on the TV." How better to close the '90s than by posing and then answering the question "What the hell is ADD?" in under two and a half minutes?

Essentially a concept album about being a teenager, *Take Off Your Pants and Jacket* nimbly touches on disenchantment with adult life, socializing online, meeting girls at rock shows, first dates, Christmas Eve with only two presents wrapped, mother jokes, grandparents shitting their pants, ejaculating into socks, discovering punk rock, puking from a "sip" of alcohol, breakups, parents getting divorced, wanting to leave home, and coming home anyway. If none of this album's singles stand out quite as much as those from *Enema of the State,* it's because of *Jacket*'s unprecedented cohesion: Almost every song interweaves gently plaintive moments with bolts of frantic energy. Kids discovering punk rock could do much worse than starting here. *Blink-182* showed that Mark, Tom, and Travis channeled their adolescent angst by deepening their sound. Mixing in expert electronic touches and drawing on the stormy tumult and openhearted expressiveness of underground emo punk, full-bodied barn burners such as "Feeling This" and "Asthenia" are both deep-feeling and catchy as all get-out. And just to prove that they'd really grown up, they even named a tune after the Stockholm Syndrome, a psychological condition wherein hostages identify with their captors. —N.C.

Blondie

★★★★ Blondie (1976; Private Stock/Chrysalis, 1977)
★★★ Plastic Letters (Chrysalis, 1977)

★★★★½	Parallel Lines (Chrysalis, 1978)
★★★½	Eat to the Beat (Chrysalis, 1979)
★★★	Autoamerican (Chrysalis, 1980)
★★★★½	Best of Blondie (Chrysalis, 1981)
★★	The Hunter (Chrysalis, 1982)
★★★	No Exit (Beyond, 1999)
★★★★½	Greatest Hits (Capitol, 2002)
★★	The Curse of Blondie (Sanctuary, 2004)

"Blondie Is a Group!" announced the ads for this New York combo's first album, somewhat defensively. For once, the hype was correct, though lead singer and focal point Deborah Harry certainly had the ability to steal a spotlight—and hold on to it. One of the earliest punk bands, Blondie was pretty much a second-string act at CBGB until its debut album came out in late 1976. Harry, guitarist Chris Stein (also Harry's longtime boyfriend), and cohorts flaunt an enthusiasm for pop effluvia that's absolutely contagious. Surf music, girl groups, Motown, bubblegum, glitter rock, even a touch of heavy metal—everything gets boiled down into sweet little concoctions that release surprisingly complex, lasting pleasures. Eventually, Stein and Harry's devotion to the Bowie/Eno/Roxy Music school of art rock overwhelmed their pure pop impulses, but for a while, Blondie's stylistic experiments yielded impressive results. While Debbie Harry was hardly a punk antistar like Patti Smith, her sex symbolism exuded street smarts and a knowing sense of humor. Clearly, this woman was nobody's bimbo.

Blondie revels in the trashiest strains of '60s pop, adding a dry Manhattan twist to "X Offender" and "Rip Her to Shreds." *Plastic Letters,* the followup, sounds rushed and hollow, though the catchy singles "Denis" and "(I'm Always Touched by Your) Presence, Dear" both tap into Harry's emotional reserves. *Parallel Lines,* recorded with an expanded lineup, represents a huge leap in musicianship and overall conception. From the dynamite rock & roll opener "Hanging on the Telephone" to the rock-disco crossover "Heart of Glass," Blondie keeps the hooks—and ideas—coming fast. *Eat to the Beat* strives for the same natural balance, and comes surprisingly close.

You have to admire Blondie's artistic gumption. However, by the time of *Autoamerican,* the band's eclecticism begins to diffuse. "Rapture" and "The Tide Is High" were satisfying singles, but Blondie's grasp of hip-hop and reggae (respectively) wasn't nearly as strong as its hold on good ol' rock & roll. The end came in the early '80s during Chris Stein's prolonged illness with a rare disease (he's since recovered): Blondie's last tour and album *(The Hunter)* were distracted, painful affairs.

Although it was nice to have the band back for *No Exit,* the album is clearly the work of a group that has experienced some loss of muscle. Only "Maria" signals a return to the deep, dangerous pop well of Blondie's youth; otherwise, the record fails to recapture the gorgeous possibilities the group was previously able to make out of the pop buffet. The band's old eclecticism returns on *The Curse of Blondie*—there's a rap-rock attempt, as well as some jazz—mostly to ill effect.

All of Blondie's '70s and '80s recordings have been released with uninteresting live, and often fuzzy, tracks tacked on. What they show is that, up through *Eat to the Beat,* at least, Blondie came up with one revelation after another, tapping '60s pop with such ferocious verve and goodwill that even the weirdest moments, such as the sonic experimentation of *Eat,* remain rivetingly listenable. —M.C./A.B.

Bloodhound Gang

★★½	Use Your Fingers (Columbia, 1995)
★★★	One Fierce Beer Coaster (Geffen, 1996)
★★	Hooray for Boobies (Interscope, 2000)

By turns offensive and just plain dorky, the Bloodhound Gang will not likely ever get much credit for being one of the earliest groups of suburban white guys to integrate rap into their rock and pop music. After an independent debut EP, *Dingleberry Haze,* brought attention to the band's blend of early Beastie Boys brattiness, Ween's sick-in-the-head stoner humor, and a musical vocabulary defined by watching too much MTV in the '80s, the group arrived nationally with *Use Your Fingers.* While passing mild misogyny off as playful fun and attempting other assaults on political correctness ("You're Pretty When I'm Drunk," "She Ain't Got No Legs"), Bloodhound Gang rampages through the detritus of low-pop culture, referencing Kajagoogoo and *Sanford & Son.* While doing its best to act dumb, the music is deceptively eclectic, ranging from early rap-rock fusion to human beatbox a cappella. Ultimately, though, how much you can take of this record depends mostly on your tolerance for the group's middle-school humor.

One Fierce Beer Coaster offers more of the same, but in smaller, more easy-to-swallow doses: There's the postmodern kitchen-sink pop references, the eager-to-offend lyrics ("I Wish I Was Queer So I Could Get Chicks," "Kiss Me Where It Smells Funny"), and the mix of rap rock with moments that indicate a wider musical palette. And "Fire Water Burn," which combines old-school hip-hop with Cake-like monotone and a Pixies quote, is accessible enough to have earned the group its first notable airplay.

After a four-year absence, the Bloodhound Gang returned with *Hooray for Boobies,* the group's most musically varied release and also its most hateful, complete with purportedly playful takes on prison torture ("I Hope You Die"), rape ("A Lap Dance Is So Much Better When the Stripper Is Crying"), and angry sex ("Yummy Down on This") that, regardless of intent, don't sound like much fun (or very funny) at all. The exception is the record's minor hit, "The Bad Touch," a catchy pop song set to a synth-pop/house beat that indicates the group's ability to temper its sophomoric attitude into something worth hearing. —R.M.S.

Blood, Sweat and Tears

★★★★	Child Is Father to the Man (Columbia/Legacy, 1968)
★★½	Blood, Sweat and Tears (Columbia/Legacy, 1969)
★★½	Blood, Sweat and Tears 3 (1970; Columbia, 1986)
★★	Blood, Sweat and Tears 4 (1971; Legacy, 1999)
★★★	Greatest Hits (Columbia, 1972)
★★	Nuclear Blues (LAX, 1980)
★★	Found Treasures (Columbia, 1990)
★★★	Live (Rhino, 1994)
★★★	What Goes Up: The Best of Blood, Sweat and Tears (Columbia, 1995)
★★★	Super Hits (Columbia, 1998)

Frighteningly pretentious, BS&T were fired by the same questionable impulse to fuse rock and jazz that compromised Miles Davis and nearly killed off Jeff Beck. Convinced that rock & roll just wasn't bright enough, these high-culture bullyboys figured that what was missing was brass. Horns, of course, had been a brilliant mainstay for Little Richard and James Brown, but what BS&T had in mind was fat big band—Woody Herman, Glenn Miller, et al. Soon staging a saxophone shootout with contemporary rivals Chicago, BS&T delivered hits that indeed featured breathtaking arrangements and playing—but their virtuosity was wholly misbegotten.

Dylan sideman and ex–Blues Project member Al Kooper founded BS&T, but held on only long enough for their first, and best, record. Featuring such classy writers as Harry Nilsson and Randy Newman, *Child Is Father to the Man* showed a band not yet gripped by terminal condescension; it's an elegant, ambitious record. Then came David Clayton-Thomas. Bearish, amiable, and deeply desirous of the chintz mantle earned by being "a great entertainer," C-T was a scenery chewer of a singer, radiating bogus black soul and arrogant "chops." Bellowing "And When I Die," "Spinning Wheel," and "You've Made Me So Very Happy," he made their second album hit-heavy and hollow—and primed them for a career of unintended Vegas-aspiring. BS&T is best represented by an album of its live work—the band really gets to stretch out and, even if the material is still inflated, there are passages of crack playing as expert as, say, the Johnny Carson–era *Tonight Show* orchestra. —P.E.

Kurtis Blow

★★★	Kurtis Blow (Mercury, 1980)
★★	Deuce (Mercury, 1981)
★★	Tough (Mercury, 1982)
★★★	Party Time? (Mercury, 1983)
★★	Ego Trip (Mercury, 1984)
★★★	America (Mercury, 1985)
★★	Kingdom Blow (Mercury, 1986)
★★	Back by Popular Demand (Mercury, 1988)
★★★½	The Best of Kurtis Blow (Mercury, 1994)

Kurtis Blow was the first rapper to cut albums for a major label, a breakthrough that would have been more impressive had Blow actually been an album artist. But he was essentially a singles act, meaning that while his original albums have their moments—"The Breaks" on *Kurtis Blow,* say, or "Basketball" from *America*—moments are usually all they offer. The exception is *Party Time?* (which, at five songs, is actually more like an EP than an album), where Blow's temporary alliance with the Washington, D.C., band EU produces the first meaningful rap/go-go fusion, a genuine footnote in hip-hop history. By the mid-'90s, Blow had so completely disappeared from the scene that Chris Rock, playing a millionaire rapper in the comedy *CB4,* joked that he was going to go out and "find Kurtis Blow!" Far easier to find is *The Best of Kurtis Blow,* which offers all the classic singles, as well as a few less-than-classic tracks. —J.D.C.

★★★½	Super Hits (Columbia, 1998)
★★★½	Don't Fear the Reaper: The Best of (Columbia, 2000)

"This Ain't the Summer of Love," Blue Öyster Cult sneered in 1976, and they meant it, man. BÖC were a metal band who sent up hippie spiritualism with their own readymade mythology: the funniest name and lyrics in metal history, plus a cryptic logo that got spray-painted in every parking lot in America. These Long Island dudes looked like a bunch of stereo salesmen, but they wanted you to know they were really, really evil. And they sound surprisingly fresh today because their sensibility was pure punk. Buck Dharma, Allen Lanier, Eric Bloom, and producer Sandy Pearlman invented a guitar sound that purged all the emotion away, crisp and clean and scientific, speeding up rock licks with an unsentimental technocratic wit. Demanding "Cult" status while refusing to pay their Summer of Love dues, BÖC have become pariahs on classic-rock radio, but there are plenty of tasties in their oeuvre for those who dare to dig.

Blue Öyster Cult introduces the band with thought-provoking titles such as "I'm on the Lamb But I Ain't No Sheep" and "She's as Beautiful as a Foot." "And Then Came the Last Days of May" is a tale of hippie dope dealers killing each other, as the wide-open spaces of the psychedelic frontier implode into banally murderous capitalism. *Tyranny and Mutation* revs both the velocity and the irony for a four-song opening suite as perfectly paced as Wire's *Pink Flag*. With "The Red and the Black" (later covered by the Minutemen), "7 Screaming Dizbusters" (and you know how those dizbusters can scream), and "Hot Rails to Hell" (Lucifer rides the subway!), it's one molten hook after another. *Secret Treaties* turns up the volume with stun-guitar riffs and ridiculously demonic lyrics. "Dominance and Submission" has zip to do with sex—it's about listening to the radio. Lanier's then girlfriend Patti Smith cowrote the even funnier "Career of Evil," with its unforgettable threat, "I'll spend your ransom money/But still I'll keep your sheep."

After a limp live album and Lanier's appearance on Smith's *Horses*, the Cult regrouped for *Agents of Fortune*. "Don't Fear the Reaper" is their masterpiece, guitars whispering in your ear about sex and death and Romeo and Juliet, limpid Beach Boys voices floating with a truly chilling blandness, a libretto about "40,000 men and women" making no sense whatsoever: It all made a perfect radio creepshow for the summer of *The Omen*. *Agents* also offers some anomalously pretty love ballads ("I love you like sin/But I won't be your pigeon"?) and a vocal cameo from Patti herself. But punks like Patti soon cornered the market on sarcastic hard rock, and BÖC got left behind.

They settled into a grind of live rehashes and studio flops, refusing to release a proper best-of (*Cult Classics* looks like one, but it's a pathetic set of 1994 rerecordings; *Career of Evil* and *Workshop of the Telescopes* suffer from too many live versions and post-*Agents* filler; *Super Hits* and *Don't Fear the Reaper* are superior). Too cold and cerebral for the '80s metal revival, BÖC never adapted to punk despite bequeathing guitar sounds to everyone from Tom Verlaine and R.E.M. to Pavement and Stereolab. *Mirrors* is notable for "In Thee," a moving Lanier ballad about breaking up with Smith. *Fire of Unknown Origin*, a frequent item in dollar bins, is definitely worth a buck for "Burnin' for You," a spooky, sexy anthem cowritten by rock critic Richard Meltzer that became a fluke 1981 hit. As for the rest—well, nobody ever said it was easy making a career of evil. —R.S.

Blues Traveler

★★★	Blues Traveler (A&M, 1990)
★★★	Travelers and Thieves (A&M, 1991)
★★★	Save His Soul (A&M, 1993)
★★	Four (A&M, 1994)
★★	Live from the Fall (A&M, 1996)
★★	Straight on Till Morning (A&M, 1997)
★★★	Bridge (A&M, 2001)
★★	Travelogue: Blues Traveler Classics (A&M, 2002)
★★★	Truth Be Told (Sanctuary, 2003)

Linchpins of the late '80s jam-band scene that also disgorged Phish, the Spin Doctors, and Widespread Panic, Blues Traveler borrowed the strategy of the Grateful Dead and built a steady following by emphasizing chops over image and relentless touring over studio-crafted radio hits. The New York quartet is best known as catalysts for H.O.R.D.E., one of the most successful festival tours to emerge in the wake of Lollapalooza.

Though Blues Traveler's albums boast few truly memorable melodies, they're uniformly competent blues-based rock, distinguished by John Popper's acrobatic harmonica runs and gruff vocals, Chan Kinchla's agile guitar playing, Bobby Sheehan's aggressively melodic bass playing, and the spacious drumming of Brendan Hill. When Popper sings about "mulling it over" on the debut album, he summarizes the band's ethos: The quartet loves to chew over a simple melody and explore all the flavors before exhausting it. Popper himself is not short of ambition, sometimes to his detriment—he's a wordy lyricist and an effusive soloist who has trouble reining himself in. *Blues Traveler* provides a blueprint for all the band's studio releases: exotic but danceable grooves in sometimes unconventional time signatures, and guitar fills and baroque harp flourishes that start out as mere decoration but build into more open-ended jams as the album progresses and the songs widen.

The formula, reprised on *Travelers and Thieves* and *Save His Soul,* finally broke through to a mainstream audience on Blues Traveler's slightest album, *Four.* The radio hit "Run-Around" captured the band at its most amiable, Popper's ebullient solo back-flipping like a frisky pup. "Hook" is in a similar vein, but "Look Around" and "The Mountains Win Again" show the band brooding in the slow-build atmosphere, the soloists biding their time until they can open up and wail.

Showboating prevails on the double-CD *Live from the Fall,* a noodlefest that will appeal to fans of fancy harp and guitar solos, but no one else. *Straight on Till Morning* presents Blues Traveler at its bluesiest on "Make My Way" and "Carolina Blues," and virtuosity serves the song on the hard-charging "Great Big World." Still, Popper's cringe-inducing lyrics and embarrassing stabs at scat singing make this a typically mixed bag for nonbelievers. Sheehan's death prompted a retooling of the lineup for *Bridge,* though some of the old excesses remain—there's even a drum solo. When the band truly focuses on interplay, *Bridge* burns brightest. Keyboardist Ben Wilson is a welcome addition, his clavinet whipping up the funk with Popper on "You Lost Me There" and turning up the flame underneath "You're Burning Me." The effusive Popper is still prone to overreach as a lyricist ("When you're living, you're just a series of atmospheres"), but Sheehan's death brought out a disarming directness in the singer's songwriting on "Pretty Angry," a beautifully paced slow-burn elegy embroidered by Wilson's piano. The keyboardist also infuses *Truth Be Told* with inventive technique, and the disc finds the band in top form, with compact solos folded into tautly arranged songs. —G.K.

Blur

★★½	Leisure (Food/SBK, 1991)
★★★½	Modern Life Is Rubbish (Food/SBK, 1993)
★★★★½	Parklife (Food/SBK, 1994)
★★★★½	The Great Escape (Food/Parlophone/Virgin, 1995)
★★½	Blur (Virgin, 1997)
★★★	13 (Food/Parlophone/Virgin, 1999)
★★★★½	Blur: The Best of (Food/Parlophone/Virgin, 2000)
★★★	Think Tank (Virgin, 2003)

In their youth, this British quartet of art-school pretty-boy popsters was caught between two of the U.K.'s dominant early-'90s styles: the noisy quasi-psychedelia of shoegazers such as My Bloody Valentine and Ride and the groovy quasi-funk of "Madchester" bands such as the Stone Roses and Happy Mondays. While *Leisure* has some engaging moments—"She's So High," "Bang," "Repetition"—its indecisiveness sinks it.

By the time *Modern Life Is Rubbish* was released, Blur had undergone a remarkable transformation. Spurred by disgust at the wave of American grunge washing over England, principal singer/songwriter Damon Albarn was now writing detailed third-person character studies such as "For Tomorrow" and "Chemical World" and decking them out with complex musical arrangements that recalled such defiantly British acts as XTC, the Buzzcocks, Madness, and the godfathers of them all, the Kinks. Though not a perfect collection, *Modern Life* had a colossal influence on the Britpop movement of the '90s.

On Blur's next two albums, Albarn's storytelling and hook-crafting savvy reached its pinnacle. *Parklife* dissected the mating habits of young Brits on their Mediterranean holidays to a Duran Duran–style disco beat ("Girls and Boys") and made a music-hall knees-up out of the daily routines of the chronically unemployed (the title track). *The Great Escape*'s "Country House" sneered at the idle rich, while "Ernold Same" empathized with the plight of the commuter class. And with "This Is a Low" *(Parklife)* and "The Universal" *(The Great Escape)*, Blur proved it had the majestic-anthem angle covered too.

Having established a winning sound (and engaged in a pointless media-fueled rivalry with Oasis), Blur promptly transformed itself again. Irony, clever craftsmanship, and devotion to all things English were jettisoned, as the band turned to American indie rock for inspiration. The resulting self-titled album can politely be called transitional. "Song 2," a primeval riff-o-rama punctuated by Albarn's fevered "whoo-hoo"-ing, was the band's first U.S. hit (up to this point, they were major stars just about everywhere *except* America), but the rest is uneven and often unconvincing. The followup, *13,* lacks focus and runs on too long; even so, it's more rewarding than its predecessor. "Battle" and "Caramel" are mesmerizing space rock, and on "Tender" and "No Distance Left to

Run," Blur dares to be both vulnerable and bluesy. Despite its exclusion of some crucial *Modern Life*–era cuts, *The Best of* makes a strong case for Blur as the preeminent British singles band of the last decade. *Think Tank,* the group's first album without founding guitarist Graham Coxon, carries the stylistic expansiveness of *13* even further, but otherwise ace tracks like "Out of Time" are undone by atypically shallow lyrics, which leads one to wonder whether Albarn's heart is still in writing pop songs. —M.R.

Boards of Canada

★★★★	Music Has the Right to Children (Warp/Matador, 1998)
★★★	In a Beautiful Place Out in the Country (EP) (Warp, 2000)
★★	Geogaddi (Warp, 2002)

The Scottish duo of Michael Sandison and Marcus Eoin, Boards of Canada took the often-impenetrable formula known as IDM (intelligent dance music) popularized by Autechre in the mid-'90s, and softened the form's rough edges by adding austere atmospheres that were often as chilly as they were beautiful. Their debut album, *Music Has the Right to Children,* coupled eerie, foreboding walls of sound with a heavy, thudding hip-hop beat while whimsical harmonies play off of dark, processed vocals. The otherworldly, off-kilter rhythms of "Telephasic Workshop" are brought back to earth with the simplest trick: a catchy tune.

BOC followed up *Music* with a five-song (EP), *In a Beautiful Place Out in the Country,* discarding the strong backbeats of their debut in favor of the willowy, soft textures prominently featured on the title track. Their long-awaited second full-length, *Geogaddi,* disappointed, however. The shock of the new no longer applied, so the contrast of evil undertones and electronic lullabies simply wasn't as compelling. Still, a few tracks—with their offbeat explorations of sound—demonstrate why BOC remain influential and important contributors to experimental techno. —T.R.

Body Count

★★★	Body Count (Sire/Warner Bros., 1992)
★★	Born Dead (Virgin, 1994)
★	Violent Demise: The Last Days (Virgin, 1997)

Body Count began as a thrash-metal side project for West Coast gangsta rapper Ice-T, but briefly eclipsed his hip-hop albums in notoriety for the song "Cop Killer." The song was initially released on Body Count's self-titled debut, then deleted when the rapper's label, Warner Brothers, caved in to public pressure from, among others, President George Herbert Walker Bush, who took the song far too literally. "Cop Killer" was deleted from subsequent versions of the album, replaced by a First Amendment rant by former Dead Kennedys singer Jello Biafra.

It was much ado over one of the weaker songs on what is otherwise an album of darkly satiric and politically pointed commentary, sexist rants, and ghetto storytelling by Ice-T—who was then at the height of his powers after two extraordinary hip-hop albums, *The Iceberg/Freedom of Speech . . . Just Watch What You Say* and *O.G. Original Gangster.* Body Count is a middle-tier thrash band at best, but Ice-T is an entertaining front man, trafficking in outrage, whether imagining a tryst with a white supremacist's daughter in "KKK Bitch" or dissecting integration tensions in "There Goes the Neighborhood."

The novelty of a celebrity rapper mixing politics and speed metal wore off by the time of *Born Dead* and the stillborn *Violent Demise.* Lesser material focusing on locker-room juvenilia is partially to blame, and so is the band's relative lack of thunder when compared to nastier crews such as Slayer and Pantera. —G.K.

Michael Bolton

★★	Michael Bolton (Columbia, 1983)
★★½	The Hunger (Columbia, 1987)
★★	Soul Provider (Columbia, 1989)
★★	The Early Years (RCA, 1991)
★	Time, Love & Tenderness (Columbia, 1991)
★	Timeless (The Classics) (Columbia, 1992)
★½	The One Thing (Columbia, 1993)
★★	The Greatest Hits 1985–1995 (Columbia, 1995)
★½	This Is the Time—The Christmas Album (Columbia, 1996)
★★	All That Matters (Columbia, 1997)
★★★	My Secret Passion: The Arias (Sony Classical, 1998)
★	Timeless (The Classics), Vol. 2 (Columbia, 1999)
★★	Love Songs (Columbia, 2001)
★½	Only a Woman Like You (Columbia, 2002)

Easily one of the most reviled figures in mainstream pop, Michael Bolton has a powerful, expressive, remarkably versatile voice—and an almost perverse sense of how to apply it. While he owed his initial popularity to he-man power ballads that made him a late-'80s heartthrob, his subsequent decision to remake various R&B chestnuts made him a figure of derision and disdain in some circles.

Bolton began life as Michael Bolotin, and sang in several nondescript Connecticut hard rock bands before being signed to Columbia in 1982. (The cover-heavy *The Early Years* offers all anyone need hear from that period.) *Michael Bolton* is better balanced and more pop-savvy, but falters when he attempts an overburdened rendition of the Supremes' "Back in My Arms Again."

Finally having learned to relax, *The Hunger* finds him turning to Otis Redding's "(Sittin' on) The Dock of the Bay," which gets an earnest, respectful reading so faithful to the original you'd think Bolton had begun doing impressions. Chuffed by that single's success, he takes greater liberties with *Soul Provider,* overemoting his way through such classics as "Georgia on My Mind" (as expected, Bolton goes through "Georgia" like Sherman). By *Time, Love & Tenderness,* his approach to the likes of "When a Man Loves a Woman" seems almost a parody of soul singing.

A pity, really, because when left to his own material, Bolton's singing is quite bearable. "Walk Away" and "That's What Love Is All About" (from *The Hunger*) may look like pro forma rock ballads, but Bolton understands how to play the inner dynamics to add drama to their heartbreak sentiment. While that may easily lead to schmaltz, performances such as "How Am I Supposed to Live Without You" or "How Can We Be Lovers" (both from *Soul Provider*) suggest that Bolton could be capable of greatness.

But it was not to be. He continued to ransack the classics through cover versions, offering a pair of albums shamelessly dubbed *Timeless: The Classics* (and if you think what he does to R&B is cruel, wait 'til you hear his cheerily bombastic take on "Like a Rolling Stone" from *Timeless, Vol. 2*), but otherwise seemed stylistically adrift. *The One Thing* compiles most of the worst clichés of '80s MOR rock, while *All That Matters* (despite some nicely subtle singing on "Safe Place from the Storm") is muddled and unconvincing. By contrast, *My Secret Passion,* his foray into operatic arias, is surprisingly good—not quite Metropolitan Opera caliber, but tasteful and quite competent. But what his public preferred was the soppy emotionalism of the material collected in *Love Songs,* and so *Only a Woman Like You* delivered the sad spectacle of Bolton trying to seem relevant through wan attempts to catch some of Marc Anthony's buzz through soppy, Latin-inflected love songs. Sad, very sad. —J.D.C.

Gary U.S. Bonds

★★★	On the Line (1982; BMG/Razor & Tie, 1991)
★★★★	The Very Best of Gary U.S. Bonds: Original Legrand Masters (Varèse Sarabande, 1998)
★★★	Back in 20 (M.C., 2004)

Some of the liveliest feel-good, party-down singles of the early '60s pre-Beatles period came out of a Norfolk, VA, recording studio owned by Bronx, NY–raised producer/Legrand Records label chief Frank Guida, whose principal client was a local club singer named Gary Alexander. Guida had cowritten a rousing rocker of a tune called "New Orleans," intending to give it to another vocalist, Leroy "Bunchy" Toombs. Preferring to cut his own original material instead, Toombs passed on the song, so Guida turned to Alexander.

On first listen, Guida found Alexander's performance a bit thin, not because of any deficiency in the singer—who had energy and expressiveness to burn—but rather in the somewhat limited technology of the day. So Guida had Alexander double his vocal, and "New Orleans" was done. On a billboard down the street from the studio was an advertisement exhorting Americans to "Buy U.S. Bonds!" The enterprising Guida recognized it immediately as Gary Alexander's new stage name, and the late summer of 1960 saw the release of Legrand single 1003 by Gary U.S. Bonds. With the studio band, the Church Street Five (propelled by Emmett Shields' double-bass-drum beat), rocking furiously behind him, Bonds set the rowdy atmosphere by shouting the opening lines, "I said-a hey, hey, hey, hey, yeah!" and was answered with equal enthusiasm by the band as saxophonist Earl Swanson began wailing. The assault didn't let up, and almost three minutes later the party wound down, leaving listeners everywhere breathless but eager for more. By the fall "New Orleans" was peaking at #6 on the pop chart. A rock & roll juggernaut had been launched that would roll on for only two years but leave an indelible mark on a generation of rockers and producers then coming of age at the dawn of the British Invasion. Bonds' third single, "Quarter to Three," not only topped the chart, but its sizzling, dense sound established Guida as one of the most innovative and influential producers of his time. "Quarter to Three" was a tribute in song to the intoxicating effects of the music of "Daddy G' " (he being the Church Street Five's other saxophonist, Gene Barge) on the all-night revelers saluted in the lyrics. In addition to the usual hyperkinetic Bonds vocal, Guida enlisted 14 children to whoop it up in the studio, and they came through, sounding for all the world like the most debauched human beings on the planet at that moment. To this Guida added five more overdubs of party ambience. The end result proved irresistible. Succeeding singles were variations on this formula, and a number of them worked in grand fashion: "School Is Out," the raucous followup to "Quarter to Three," went to #5, a sequel, "School Is In" (clearly a less interesting topic), topped out at #28, but Bonds closed out 1961 with a return to the Top 10 with "Dear Lady Twist." This exhilarating ride continued into 1962, beginning with another dance-oriented number, "Twist, Twist Señora," which spiced its hand-clapping and ensemble shouting with a pop-calypso flavor, all of which met with approval to the tune of a #9 pop hit.

Bonds barely broke a sweat in making his final appearance in the Top 30 as a Legrand artist. For the Richard Lester–directed film *It's Trad, Dad,* the legendary songwriting team of Doc Pomus and Mort Shuman penned the jovial but slightly wistful doo-wop-influenced "Seven Day Weekend" (which finds the singer lamenting that his life can't be one long party); in about 10 minutes' time, Bonds was filmed lip-synching the song in a New York studio, collected his money, and went home. Peaking at #28, "Seven Day Weekend" marked the end of Bonds' hit-making tenure with Guida, despite several good singles cut over the next four years.

Varèse Sarabande's 16-track *The Very Best of Gary U.S. Bonds: The Original Legrand Masters* tells the story of the exemplary work Bonds and Guida did for each other (the latter remains woefully underacknowledged for his sculpting of a distinctive sound signature in the studio). All the abovementioned hits are here, as well as nonhit sides that demonstrate the admirable consistency of the artist's and the producer's efforts over the years. Consistency is not the same as diversity or the mark of an artist taking chances; rather, Bonds and Guida had an infectious formula and they worked it for all it was worth. No shame in that: the music stands.

Bruce Springsteen was one of those budding rockers who became infatuated with Bonds' music in the early '60s, and he later made "Quarter to Three" a staple of his live shows. In 1981 the Boss returned the favor by coproducing, with his E Street Band guitarist Steve Van Zandt, two albums for Bonds, *Dedication* (1981) and *On the Line* (1982). Now out of print, *Dedication* featured the Springsteen-penned "This Little Girl," very much in a Guida vein sonically, with some E Street edge, which propelled Bonds back onto the chart, peaking at #11. *On the Line* made its mark via the single "Out of Work," which peaked at #21, Bonds' final appearance in the Top 50. With four Springsteen songs and appearances by most of the E Streeters in support roles, *On the Line* has the feel and energy of the long encores the Boss used to do in which he put his stamp on '60s rock and soul tunes that had influenced him. Completists are advised to check the online services for twofer import releases (via the Ace label) of Bonds' Legrand albums. —D.M.

Bone Thugs-n-Harmony

★★★★ Creepin On Ah Come Up (EP) (Ruthless, 1994)
★★★★ E. 1999 Eternal (Ruthless, 1995)
★★★½ The Art of War (Ruthless, 1996)
★★★½ BTNHResurrection (Ruthless/Epic, 2000)
★★★½ Thug World Order (Ruthless/Epic, 2002)
★★★★ The Collection: Volume One (Ruthless/Epic, 1998)
★★★★ The Collection: Volume Two (Ruthless/Epic, 2000)

Mo Thugs Family

★★★ Mo Thugs Family, Family Scriptures (Relativity, 1997)
★★★½ Mo Thugs Family, Chapter II: Family Reunion (Relativity, 1998)
★½ Mo Thugs Family, III: The Mothership (Koch, 2000)

Bizzy Bone

★★★ Heaven'z Movie (Ruthless, 1998)
★★ The Gift (AMC, 2001)

Krayzie Bone

★★★½ Thug Mentality 1999 (Ruthless, 1999)
★★ Thug on Da Line (Ruthless, 1999)
★★ L-Burna AKA Layzie Bone, Thug by Nature (Ruthless, 2001)

Bone Thugs-n-Harmony—the resilient group comprised Cleveland, OH, natives Anthony "Krayzie Bone" Henderson, Charles "Wish Bone" Scruggs, Steve "Layzie Bone" Howse, and (from nearby Columbus) Byron "Bizzy Bone" McCane—redrew the hip-hop map. When Bone burst onto the scene, commercially successful hip-hop came almost exclusively from New York and California. A telephone audition with Eazy-E of L.A.'s most notorious group, N.W.A, provided Bone with its break. Eazy-E sent Bone bus tickets to Los Angeles, where the group signed to Ruthless Records. Bone's unique sound—light-speed, snappily syncopated raps combined with round-toned, sweet soul harmonies—was already in evidence on its eight-song debut proper, *Creepin On Ah Come Up.* Their grimy East Cleveland street origins and Eazy-E's gangsta tutelage informed the EP's breakout hits "Thuggish Ruggish Bone" and "For tha Love of $."

In March 1995, while Bone was recording its full-length debut, *E. 1999 Eternal,* Eazy-E died of AIDS. His passing deepened Bone's sense of purpose. The group's tribute to its mentor, "Crossroad," got a radio-ready remix rebirth as "Tha Crossroads" and became its biggest hit, tieing the Beatles' 32-year-old record for the fastest-rising *Billboard* single. Clad all in white, the group performed the song on that year's

Grammy Awards, and took home the trophy for Best Rap Performance.

Followup double album *The Art of War* spawned hit singles "Look into My Eyes" and "If I Could Teach the World" but was plagued by an excess of rote material. (This problem can be attributed at least in part to Bone's prolific output, making both *Collection* CDs welcome distillations of their weighty catalogue.) *The Art of War* did, however, contain the Cameo-sampling nugget "Blaze It," suggesting that even though Cypress Hill are hip-hop's most famous herb advocates, Bone's blissful, plentiful pot paeans take you higher.

Though there is something to recommend on all of Bone's solo albums, the group recognizes its superior unified strength. Later albums *BTNHResurrection* and *Thug World Order* even suggest that their soul-stirring singing is well suited to the mellowness of age.

Now that there are rap superstars from every corner of the country, it's easy to overlook Bone's early role in expanding hip-hop's geographic boundaries. That it also broadened the genre's artistic parameters is to the group's lasting credit. When its staccato rhyming cadence is purposely copied—as Biggie Smalls did on his rousing Bone collabo "Notorious Thugs"—it makes the group's unique identity clear. Having recorded with everyone from 2Pac to Mariah Carey, Bone Thugs-n-Harmony remains one of popular music's most intriguing and enduring propositions. —P.R.

Bon Jovi

★★	Bon Jovi (Mercury, 1984)
★½	7800° Fahrenheit (Mercury, 1985)
★★★½	Slippery When Wet (Mercury, 1986)
★★	New Jersey (Mercury, 1988)

★★★½	This Left Feels Right (Island, 2003)

Jon Bon Jovi

★★	Blaze of Glory (Mercury, 1990)
★★★	Destination Anywhere (Mercury, 1997)

Emerging in the wake of the '80s pop-metal boom, Bon Jovi's early recordings fused the crass popcraft of Journey and Starship with the average-Joe populism of Bruce Springsteen for a sound that aspired to rock & roll grandeur without achieving it. *Bon Jovi* and *7800° Fahrenheit* understand the basic formula, but offer little in the way of memorable material, sticking close to pop conventions like heartbreak lyrics and strident, minor-key choruses (although *Bon Jovi* does at least hint at things to come with "Shot Through the Heart"). The band is nearly redeemed by *Slippery When Wet,* an album which in its better moments—"Livin' on a Prayer," say, or "Wanted Dead or Alive"—actually delivers enough melodic razzle-dazzle to make the band's shameless posturing almost forgivable. Unfortunately, the band's massive sales encouraged the lads to show how little success had changed them, which they did through the bombastic Springsteenisms of *New Jersey.*

Bon Jovi the band went on hiatus, during which time frontman Jon Bon Jovi released the solo album-cum-soundtrack *Blaze of Glory* (written for the film *Young Guns II*), which updates "Wanted Dead or Alive" but otherwise makes the Wild West sound suspiciously like East Jersey. After regrouping, the band quickly returned to form with the cheerfully clichéd *Keep the Faith,* which at least balanced the bombast with the corny but heartfelt ballad "Bed of Roses." *Cross Road,* a relentlessly tuneful best-of, has charms enough to be a guilty pleasure for all but the most cynical, and even adds to the canon with "Always." (A second best-of, *This Left Feels Right,* dilutes the catalogue's charm with later and lesser hits.)

From there, the band continued on as if the '90s never happened, cranking out variations on the old formula and somehow continuing to fill arenas (stadiums in its home state). It hardly matters that *These Days* sounds like it should have been called *Those Days* (though it's hard not to admire the shamelessness of "Lie to Me"). *Destination Anywhere,* Jon Bon Jovi's second solo project, sounds more like a collection of demos than a fully-realized album, but it did give the singer the opportunity to flex his melodrama muscles on "August 7, 4:15." *Crush* is summed up in the chorus to "Two Story Town," which complains of "the same old sights, the same old sounds," but *Bounce* finds the band briefly revitalized by the tragedy of 9/11. Not that the blunt, jingoistic "Undivided" deserves comparison to the similar-but-superior "The Rising," but it wouldn't be Bon Jovi if the band didn't continue to aspire to Springsteen. —J.D.C.

The Bonzo Dog Band

★★	Gorilla (Liberty, 1967)
★★★	History of the Bonzos (BGO, 1987)
★★★	Cornology (EMI, 1998)
★★	Anthology (Voiceprint, 1999)
★★	Vol. 1: The Intros (EMI, 2000)
★★	Vol. 2: The Outros (EMI, 2000)
★★	Vol. 3: Dog Ends (BMI, 2000)

Before Monty Python, there was Bonzo. A remarkably inventive gang of wits, this late-'60s London quintet did twisted vaudeville, delivering custard-pie funny bits with an acid-era sense of the absurd. Lord Buckley and Lenny Bruce were among their influences; the satirical pieces of the Mothers of Invention provided an American parallel (although the Bonzos were far more cheery). Keeping close watch on the zeitgeist, the Bonzos sent up mod mania on "Cool Britannia" and hippie preoccupations on "Kama Sutra" and "Can Blue Men Sing the Whites?"; Paul McCartney produced their 1968 hit, "I'm the Urban Spaceman." As is true of most comedy acts, the Dog Band's routines were uneven, but its box set, *Cornology,* proves how often it did score. Plus, the boys could really play their saxes, guitars, and assorted devices. *Anthology* assembles the band's rarities; the EMI volumes repackage early work and are mainly for fanatics. —P.E.

Boogie Down Productions

★★★★★	Criminal Minded (B-Boy, 1987)

KRS-One

★★★	Return of the Boom Bap (Jive, 1993)
★★★★	KRS-One (Jive, 1995)
★★★★	I Got Next (Jive, 1997)
★★★★	A Retrospective (Jive, 2000)
★★★	The Sneak Attack (Koch, 2001)
★★½	Spiritual Minded (Koch, 2002)
★★★★	The Mix Tape (Koch, 2002)
★★★	Kristyles (Koch, 2003)
★★★	Keep Right (Grit, 2004)

Laurence Krisna Parker (born August 20, 1965) was living in a Bronx homeless shelter in 1985 when he met social worker Scott Sterling (a.k.a. Scott LaRock). The pair formed the hardcore rap group Boogie Down Productions, releasing only their debut album *Criminal Minded* (an unadulterated classic and the template for all subsequent gangsta rap) before LaRock was fatally shot at a party in the Bronx. KRS-One soldiered on as BDP, his personal acronym (Knowledge Reigns Supreme Over Nearly Everyone) blossoming on *By All Means Necessary* as he declared "Some people say I am a rap missionary/some people say I am a walking dictionary/some people say I am truly legendary/but what I am is simply a black revolutionary." While many early BDP story-raps were street-level parables, KRS did not fall prey to gangsta caricatures; in the liner notes to *Edutainment* he castigated "gangster pop star pimps" for "acting the way the government wants black people to act." Earning his nickname the Teacher, KRS-One produced info-packed lectures in rap form on topics including U.S. government complicity in the drug trade ("Illegal Business" on *By Any Means*), African-American history ("You Must Learn" from *Ghetto Music*), and vegetarianism ("Beef" from *Edutainment*), delivered in a commanding voice often inflected with Jamaican patois. His songs featured sonic calling cards and iconic choruses such as the whooping alert of "Sound of da Police" and the titular chant of "Black Cop" (both on *Return of the Boom Bap*) that became ingrained in the consciousness of multiple generations of hip-hop devotees. In 1993, KRS shelved the BDP moniker in favor of his own name, although in tone and quality his overall oeuvre remained relatively seamless. Despite dipping popularity in the face of fickle fashion, and even considering his gospel (!) effort *Spiritual Minded,* KRS-One has never made the concessions that would result in a wack album. In the summer of 2004, he embarked on an intimate U.S. club tour, performing a furious nonstop sequence of his greatest hits (there are many) to a distilled, fervent fan base, laying a very strong claim to being the greatest MC of all time. "Kool Moe Dee has a new book out where he claims Melle Mel was the greatest ever," said KRS-One at these shows, "and I took Melle Mel out, so . . ." So think about it: KRS-One lyrically destroyed rappers from MC Shan (on "The Bridge Is Over," off 1987's *Criminal Minded*) to Nelly (check "Ova Here" on 2002's *The Mix Tape*), and looks set to continue recording strong material past his 40th birthday. He has a point. —P.R.

Booker T. and the MG'S

★★½	Green Onions (Stax, 1962)
★★	Soul Dressing (Atlantic, 1965)
★★★	And Now, Booker T. and the MG's (Atlantic, 1966)

★★	That's the Way It Should Be (Sony, 1994)
★★★½	Time Is Tight (Box) (Stax, 1998)

Backing up Otis Redding and a host of Stax all-stars, Booker T. and the MG's were among the prime movers behind the Memphis Sound. Adamant in their insistence that less is more, each of the quartet's players was a lean and efficient virtuoso. One of the inventors of funk guitar, Steve Cropper played trebly, swift riffs; his lead lines were telegraphic and never flashy. An unorthodox player, Donald "Duck" Dunn seldom relied on the blues patterns of most R&B players—his bass, instead, provided essential punctuation. Drummer Al Jackson's spare drumming was soul music's counterpart to that of Rolling Stone Charlie Watts. Only Booker T. Jones himself, a teenage wunderkind when he started out at Stax, was a more expansive talent: The eloquence of his organ lent the band's records an insinuating grace.

The MG's masterworks are '60s instrumentals such as "Green Onions," "Hip Hug-Her," "Groovin'," and "Soul Limbo." All of the Stax records have worthwhile cuts; and each of the best-of compilations—especially the *Time Is Tight* box—has timeless, elegant funk. *That's the Way It Should Be,* a reunion effort, still shows them in strong form on both originals and covers ranging from U2's "I Still Haven't Found What I'm Looking For" to Dylan's "Gotta Serve Somebody." —P.E.

★★★½	Rebore Vol. 0 (WEA Japan, 2001)

One of the most adventurous bands on the planet, Osaka, Japan's Boredoms are rarely easy to take, but—especially on their later records—they're also sublime and monumentally powerful. Led by the indefatigable Eye Yamatsuka (later Yamantaka Eye, or simply EYE), they smash every preconception of what rock music is supposed to be like into splinters, and then build a palace out of them.

Boredoms' first album, *Osorezan to Stooges Kyo* ("The Stooges Craze and Osorezan"), was subsequently compiled with the earlier *Anal by Anal* EP *as Onanie Bomb Vs. the Sex Pistols.* It's a total mess—they've clearly decided that they want to destroy everything predictable about music, but haven't a clue what to replace it with. There's a lot of vehement shrieking in a made-up language, riffs that self-destruct after a few seconds, and incoherent clattery mayhem. *Soul Discharge* is a real improvement. It's still hilariously berserk, but the epileptic rhythms are purposeful more than accidental, and they're actually sort of engaging with pop, albeit from somewhere outside our solar system—check out the B-52's disembowelment "52 Boredom" and the punk-metal freakout "Sun, Gun, Run."

With *Pop Tatari,* Boredoms had a decent recording budget for the first time, and used it to make their most agitated and discombobulated record yet. It starts with 30 seconds of a piercing sine wave (called "Noise Ramones"), and thereafter whirls into an hour-long schizophrenic frenzy—*Eye*'s voice sounds like an entire zoo fighting to the death. *Wow2* is Boredoms live in the studio and attempting to pass for a heavy rock band, which is sort of like Frankenstein's monster attempting to pass for a professional wrestler.

Around this time, Boredoms made their first real splash in America, opening the Lollapalooza tours of 1994 and 1995 with their legendary live show, as much acrobatic theater of the absurd as rock performance. Beneath the howling anarchy of tracks such as the Bore anthem "Shock City," though, *Chocolate Synthesizer* is a genuine work of compositional art, featuring melodic motifs that recur through the album, battered into every conceivable shape, as well as the band's newfound willingness to stay in their fabulously twisted grooves.

Having pushed chaos to the limit, they started to get serious about building a set of tools for their music with a series of EPs and albums called *Super Roots*—experimental records, which by this band's standards is saying something. The first *Super Roots* EP is an attempt to record something quiet (or, as Eye put it, "ambient hardcore"); they were still constitutionally incapable of not bashing things and squealing, but it's fun to hear them try to restrain themselves, and "Budokan Tape Try (500 Tapes High)" even sort of paraphrases Grace Jones' version of "Demolition Man." *Super Roots 2* is an ultra-limited single that includes lots of silence; *Super Roots 3* is the entire band hammering at a one-chord riff for half an hour; there is no *Super Roots 4,* since 4 signifies in Japanese roughly what 13 does in English; *Super Roots 5* is an hour-long noise cloud; *6* is a series of scraggly but intense exercises in rhythm and timbre.

And then they proved what all that research had been for. *Super ae* is a pounding, astounding psychedelic masterwork, the raw power of Boredoms' early records harnessed and directed into sustained riff-laden sun worship. Its centerpiece, "Super Going," rises and breaks and rises again with tidal majesty; elsewhere, its drones and chants blow up to monomaniacal electric force and fall again to heart-stopping acoustic splendor. It's beautiful, which they'd never been before, and it sounds like a new kind of hymn.

Two more *Super Roots* discs followed *Super ae: 7* is a very long, delightful band-plus-electronics jam on the riff from the Mekons' "Where Were You?" and *8* is just a single, a frenetic jungle-influenced cover of an old Japanese cartoon theme. *Vision Creation Newsun* is the real sequel to *Super ae,* and at times even more intense—there are shades of drum and bass in its pattering rhythms—although it recycles a few of the same themes and structures. *Suncidal Cendencies* is an album-length "EP" with two variations on one of *Vision*'s tracks, plus a 24-minute, five-percussionist workout credited to "Uoredoms."

The *Rebore* discs are extended megamixes of the Boredoms catalogue (leaning most heavily on *Super ae* and *Vision*); vols. *1, 2,* and *3* are respectively remixed by U.N.K.L.E., Ken Ishii, and DJ Krush, and don't alter the source material much beyond throwing in the occasional breakbeat. Eye himself takes over for *Vol. 0,* and unsurprisingly does odder things. The members of Boredoms are also staggeringly prolific outside the band, with more than 50 recorded side projects—the records Eye has made with turntablist Otomo Yoshihide as MC Hellshit & DJ Carhouse are particularly insane, and he's collaborated memorably with Sonic Youth and with John Zorn's Naked City project. Eye's cover artwork for the *Shock City Shockers* compilation of Bore pals was subsequently appropriated as the back cover of Beck's *Midnite Vultures.* —D.W.

Boston

★★★½	Boston (Epic, 1976)
★★½	Don't Look Back (Epic, 1978)
★½	Third Stage (MCA, 1987)
★★★	Greatest Hits (Epic, 1997)
★★	Rock and Roll Band (Sony Music, 1998)

After painstakingly experimenting in his basement studio for years, Boston guitarist and MIT-trained engineer Tom Scholz channeled his frustrations into a song called "More Than a Feeling." This 1976 pop Top 10 ushers in the long, cold winter of arena rock; Boston's soaring combination of high-tech metal guitar punch and smooth pop vocal hooks quickly became the cornerstone of Album Oriented Radio. But as slick as it sounds, "More Than a Feeling" also strikes an uncommonly resonant emotional note.

In retrospect, it's a classic one-shot-to-glory tale. Only problem is, Boston went on to make two far less distinctive and even more popular albums. *Boston* itself sports two satisfying, if similar, followups ("Peace of Mind" and "Hitch a Ride"), alongside a couple of cleaned-up boogie crowd-pleasers ("Smokin' " and "Rock & Roll Band"). The title track of *Don't Look Back* would hold its own on the debut, but Boston's formulaic virtuosity dulls rather quickly. Perhaps Scholz realized this: He retired for eight years after the second album. When the long-delayed *Third Stage* finally saw the light of day, the Boston concept seemed a little musty. That didn't stop "Amanda" from climbing to the top of the charts, of course. *Greatest Hits* charts the band's descent from genre builders to also-rans. —P.E.

Bottle Rockets

★★★	The Bottle Rockets (East Side Digital, 1993)
★★★★	The Brooklyn Side (1994; Atlantic, 1995)
★★★★	24 Hours a Day (Atlantic, 1997)
★★	Leftovers EP (Doolittle/New West, 1998)
★★★	Brand New Year (Doolittle/New West, 1999)
★★★	Songs of Sahm (Bloodshot, 2002)
★★	Blue Sky (Sanctuary, 2003)

The Bottle Rockets, from rural Missouri, are the thinking person's hillbilly bar band. At their best, they bridge the worlds of the hicks and the hippies, blues junkies and potheads, Motörhead and Hank Williams. The songs of singer-guitarist Brian Henneman are odes to blue-collar rednecks, trailer-park denizens, and divorcees who solve their problems by downing shots, flinging fists, driving fast, or going down slow. His humor is cut by poignancy, an affection for his motley down-on-their-luck characters that is vividly descriptive but rarely judgmental.

The Bottle Rockets finds Henneman coming off his gig as a guitar roadie for Uncle Tupelo to write songs in a similar vein: countrified rock that blends electric guitars and banjo, and sparse production that frames stories of death ("Kerosene"), Southern bravado ("Wave That Flag"), and lust ("Trailer Mama").

The Brooklyn Side has a similar arc with sharper production, opening with an acoustic country ballad and then adding carefully calibrated doses of bombast until Henneman is ranting like a drunk in boxer shorts on the oddly moving "Sunday Sports." There are hints of Neil Young, Sun Records rockabilly, and Chuck Berry rock & roll in an album that packs a Saturday-night kick even as it acknowledges the Sunday-morning hangover.

24 Hours a Day is more concise, the specifics in songs such as the darkly comic "Indianapolis" and the rueful title track honed with literary precision, while the band perfects its mix of barbed-wire guitars and stringed instruments.

There's truth in advertising on *Leftovers:* Outtakes such as "Coffee Monkey" come off as amusing B sides. *Brand New Year* boasts the slickest sound yet on a Rockets album, at odds with the typically homespun subject matter. *Songs of Sahm* gets the band back on track with a collection of genre-defiant songs written by kindred spirit Doug Sahm, the late cosmic cowboy from San Antonio. The Rockets' affinity for Sahm's brand of blues, acid rock, honky tonk, and Tejano balladry stamps them as worthy heirs to his maverick Americana legacy.

Blue Sky is the most subdued Bottle Rockets yet, as the bar-band brashness of old is replaced with a more reflective tone. Henneman's songs are as oddly touching and humorous as ever, but musically, he's gone soft. —G.K.

Is David Bowie's "Young Americans" the greatest song ever? It could be. Over grand, lurching piano glam, Bowie testifies like a deranged soul crooner about the new breed of young Americans coming to save the world. They're the pretty things who drive their mamas and papas insane, the chosen people sent by the gods of rock to bring action and adventure and romance and sex sex sex back to a dead-end society. Bowie was only 27 at the time, but he sounds much older, a slinky vagabond rooting for the hot tramps and glitter kids of the future. He sounds old and English, almost like a vampire, but he's saved by the young Americans. All night he wants the young Americans: he wants to do us, he wants to be us, he wants what we want. For the five minutes of the song, all anyone could ever want is to be or do a young American. David Bowie's whole world, and everything great about rock & roll, is in this tune.

Rock & roll had pretensions long before it had a David Bowie, but Bowie invented whole new levels of theatrical posing, stylistic diddling, and sexual provocation, doing for pretensions what Jimi Hendrix did for electric guitars. The erstwhile David Jones had begun in the late '60s wasting his ambitions on costumes that didn't quite fit: mod, folk music, mime. He was clunky as a mod (the results have been recycled as *David Bowie, Love You Till Tuesday, Images, Early On*), and wispy as a folkie *(Space Oddity),* but he began to rock on *The Man Who Sold the World,* more bluesily than he ever would again, teaming up with guitarist Mick Ronson and producer Tony Visconti for heavy visions such as "Width of a Circle."

And then one day David visited New York, where a friend turned him on to the Velvet Underground's "Sweet Jane." The result: *Hunky Dory,* Bowie's first classic, an album of Nico-style cafe ballads about queen bitches falling in love with pretty things. On *Hunky Dory,* the David in Miss Jones finally got loose, reveling in pansexual lust, visionary gossip, glam flamboyance, and you're-soaking-in-it decadence. Brilliant tunes, too—Barbra Streisand covered the best song here ("Life on Mars?"), while Dinosaur Jr covered the second best ("Quicksand"), and that pretty much sums up the bizarro impact of *Hunky Dory.* The bubbleglam rocker "Queen Bitch" pays tribute to Lou Reed while giving David a chance to look swishy in his bipperty-bopperty hat.

Hunky Dory made Bowie the star he has remained ever since. But *Ziggy Stardust* remains the most famous of all glam records, turning up Ronson's boogie guitar for a concept album about an androgynous rock star from outer space. Bowie took it all too far, and he couldn't even play guitar, but he works his fey vibrato in "Suffragette City," "Starman," and "Moonage Daydream," while "Five Years" is one of the all-time great album openers, with doomy drums and a chanting choir to announce the end of the world and the dawn of the new Bowie era. The Rykodisc reissue adds the key rarities "Velvet Goldmine" and "Sweet Head," which has the credo "Before there was rock, you only had God."

Aladdin Sane cranks up the hard, slick, sensationalistic energy of *Ziggy,* minus the draggy bits, for a sequel that sounds even better than the original, driven by the guitar swagger of "Watch That Man" and the swoony postapocalyptic love song "Drive-In Saturday." *Pin Ups* was a set of '60s Swinging London covers with Twiggy on the cover; the one great moment is the Yardbirds' "Shapes of Things," where Bowie becomes an unlikely ecologist, whimpering "Please don't destroy the lands/Don't make them desert sands" even though he doesn't sound biodegradable. *Diamond Dogs* announced the end of the world (again?) with a certain boy-who-cried-wolf quality, despite "Rebel Rebel" and the title song, which celebrates "the year of the scavenger, the season of the bitch." Bowie boasts he has never listened to *David Live,* and good for him; the *Ziggy* film soundtrack is a waste. The real live document of the Ziggy period is the little-screened BBC documentary *Cracked Actor,* which has to be seen to believed, especially when Bowie sings the title tune while jamming his tongue into a human skull like a glam Hamlet.

Bowie switched gears for the surprisingly warm R&B homage *Young Americans,* which he described as "plastic soul." Cut in Philadelphia with background vocals from a young Luther Vandross, it's short on tunes aside from the title song. But it was the warm-up for *Station to Station,* the album where Bowie dyed his hair blond, proclaimed himself the Thin White Duke, and made the most intense music of his life. "TVC15," "Golden Years," and "Stay" combine heavy guitar grooves and shiny vinyl funk beats, plus nutzoid lyrics ("Light is so vague when it brings someone new/This time tomorrow I'll know what to do"). It all explodes in the heart-pounding 10-minute onslaught of the title song, inspired by the Catholic devotion of the Stations of the Cross and apparently quite generous helpings of drugs. *Station to Station* is a space-rock masterpiece, even if Bowie admits he can barely remember making it.

Low, released the week Bowie turned thirty, marked a new beginning. After burying himself in white powder in Los Angeles, he fled to Berlin for some personal detox and began his famous "Berlin trilogy." Side one of *Low* consists of seven synth-pop fragments; side two consists of four brooding electronic instrumentals. Bowie sings about spiritual death and rebirth, from the electric blue loneliness of "Sound and Vision" to the doomed erotic obsession of "Always Crashing in the Same Car." Thanks to producer Tony Visconti, keyboardist Brian Eno, and the fuzzed-out guitars of Ricky Gardner and Carlos Alomar, it's the music of an overstimulated mind in an exhausted body, as rock's prettiest sex vampire sashays through some serious emotional wreckage.

Heroes expands the formula with guitarist Robert Fripp, a thicker, fuller sound, a more prominent role for Eno, and the killer title hymn. The finale of the Berlin trilogy, *Lodger* is that rarest of rock & roll artifacts: an underrated Bowie album. Not even the artiste himself has ever made grand claims for this one, but it rocks as hard as *Station to Station* or *Aladdin Sane,* with razor-sharp musical corners and new layers of wit and generosity in the songwriting, especially "Boys Keep Swinging," "D.J.," and "Fantastic Voyage." *Lodger* guitar hero Adrian Belew also appears on *Stage,* a surprisingly decent live album that perversely turns Side Two of *Low* into arena fodder.

Scary Monsters turns up the Fripp guitar for a sleek, chilly-chic set, not as bold as *Lodger* but excellent nonetheless, especially the terrifying "Space Oddity" update "Ashes to Ashes" and the anthemic "Young Americans" update "Teenage Wildlife," which proved beyond any doubt that when Bowie decided not to sing, he could out-not-sing any nonsinger in rock & roll. By now, Bowie's pop clout was bigger than ever, as entire genres sprouted from phases of his past, including goth, punk, techno pop, and the New Romantic poseurs. Bowie cashed in with *Let's Dance,* a slight but pleasant pop record with a few big MTV hits, including the touching rocker "Modern Love."

At the time, Bowie fans debated whether *Let's Dance* was a stylistic triumph, a pop sellout, or just a table-setter for future glories. But it's safe to say nobody suspected it would go down as Bowie's last stand. Still only 36, the most iconic and influential active artist in rock, Bowie seemed to lose his touch overnight, wheezing unpleasantly through the rest of the decade. *Tonight* was an expensive quickie padded with lame covers, while *Never Let Me Down* made things even worse with originals. But the noose he chose to hang himself with was guitar sidekick Reeves Gabrels, who ruined everything left to ruin in Bowie's music. Gabrels collaborated with Bowie in the misbegotten Tin Machine project, producing three albums of dreary art-metal wankeroo. *Black Tie White Noise* had a witty cover of Morrissey's "I Know It's Gonna Happen Someday," the sound of Bowie imitating one of the all-time great Bowie imitators. *The Buddha of Suburbia* was soundtrack filler. *Outside* was a poor reunion with Eno, who presumably had bills to pay.

There were signs of life on Mars in *Earthling* and *Hours*, which offered strong songs ("Looking for Satellites," "Seven," "Thursday's Child") damn near ruined by Gabrels' cheesy guitar glop. *Heathen* and *Reality* were redeemed by Gabrels' exit and a lighter songwriting touch as well as funny covers of Neil Young, the Pixies, and the Legendary Stardust Cowboy. The last few albums prove that Bowie's creative powers are alive and well—as always, he just needs collaborators who can get him pushing.

Bowie's hits collections are as much fun as his proper albums, because his genius for the grand statement and the big splash meant that he didn't skimp when it came to dreaming up hit singles. The 1976 *Changesonebowie* is the original crash course for the ravers. The 1990 *Changesbowie* combines *Changesonebowie* and *Changestwobowie* for a one-disc whammy, although there are too many shortened single edits and it's hard to forgive that "Fame '90" remix. The double-disc *Singles* runs too far into the '80s and '90s; *Sound and Vision* is a mostly redundant three-disc box; *Bowie at the Beeb* collects early BBC live material, including Lou Reed and Chuck Berry covers. The two separately available *Essential* volumes are both eccentric, but present worthy rarities such as Bowie's original version of "All the Young Dudes." Hot tramps in search of a handy introduction should use *Changesbowie* as a map and then start playing around. Despite his image as an alien Major Tom figure, what endures most in Bowie's music is the lust for life you can hear in "Young Americans," "Fantastic Voyage," "Teenage Wildlife," "Five Years," and so many more. His music will always sound great as long as the world still has kooks, cracked actors, glitter babes, and young folk going through that difficult phase. Mother Nature clearly didn't intend David Bowie to become a singer, but his whole career proves that sometimes it's nice to fool Mother Nature, because she's a kook like us. —R.S.

Bow Wow Wow

★★★	Your Cassette Pet (EMI Harvest, 1980)
★★★	See Jungle! See Jungle! Go Join Your Gang Yeah! City All Over! Go Ape Crazy (RCA, 1981)
★★	The Last of the Mohicans (EP) (RCA, 1982)
★★	I Want Candy (RCA, 1982)
★★★½	Original Recordings (Capitol, 1982)
★	When the Going Gets Tough the Tough Get Going (RCA, 1983)
★★	Girl Bites Dog (EMI, 1993)
★★★½	Best of Bow Wow Wow (RCA, 1996)
★★	Live in Japan (Receiver imp., 1997)
★★	Wild in the U.S.A. (Cleopatra, 1998)

Bow Wow Wow was Malcolm McLaren's first big project after the Sex Pistols imploded, and the erstwhile media manipulator made sure his new band bounded onto the scene with a whole gaggle of gimmicks. The first was Annabella Lwin, a 14-year-old Burmese immigrant McLaren found working in a laundry and decided to remake into a postpunk goddess. Then there was what used to be Adam's Ants, the trio of Matthew Ashman (guitar), Leroy Gorman (bass), and Dave Barbarossa (drums), whom McLaren introduced to African music—specifically, the sound of Burundi tribal drumming—then induced to dump Adam and follow him.

But it was the product that ultimately pulled the package together. Bow Wow Wow's cassette-only first single, a home-taping anthem called "C-30, C-60, C-90 Go!," had little going for it musically—a basic Burundi-beat groove topped with a chant-along vocal—but made quite a stink when it hit the charts smack in the middle of the British Phonograph Industry's "Home Taping Is Killing Music" campaign. No surprise, then, that the group's cassette-only first and now out-of-print album, *Your Cassette Pet,* was almost pure provocation, filled with such nudge-wink nasties as "Uomo Sex al Apache" (say it real fast) and "Sexy Eiffel Towers" (a tribute to the famous Gallic phallic symbol). But between the Bow Wow boys' vigorous rhythm work and Annabella's charmingly hammy vocals, even the likes of "Louis Quatorze"—in which Annabella breathily recounts her ravishings by the beastly Louis—seems more silly than scandalous.

Much the same can be said for the impossibly titled *See Jungle! See Jungle! [etc.]* which introduced the group to this country. But American pop radio proved less than enamored of McLaren's recastings of Rousseau ("Go Wild in the Country") and McLuhan (["I'm a] T.V. Savage"), so RCA turned the Bows over to a proven hitmaker: Kenny Laguna, who converted the band's Burundi beat into a jazzy Bo Diddley groove and gave it a near-hit with a remake of the

Strangeloves' "I Want Candy." The out-of-print *Last of the Mohicans* includes the single and three others, but since all four tracks also appear on *I Want Candy,* the only real reason to seek it out is its cover photo, which finds an unclothed Annabella posed with the rest of the band in McLaren's last art-school joke: a re-creation of Manet's *Déjeuner.*

I Want Candy did well enough to encourage Capitol to issue *12 Original Recordings,* an LP edition of *Your Cassette Pet* and the band's first British singles. But *Candy's* lack of material—half its tracks are remakes of earlier recordings—and spiritless performances marked the beginning of the end for the band. By the time the McLaren-less group got around to cutting the slick, empty *When the Going Gets Tough,* smart listeners knew to keep going. —J.D.C.

Box Tops

★★★	The Letter/Neon Rainbow (1967; Sundazed, 2000)
★★★	Cry Like a Baby (1968; Sundazed, 2000)
★★★	Nonstop (1968; Sundazed, 2000)
★★	Dimensions (1969; Sundazed, 2000)
★★★½	The Ultimate Box Tops (Warner, 1987)
★★★	Tear Off! (Last Call, 1998)
★★★★	Best of the Box Tops: Soul Deep (Arista, 1996)

Revered by indie rockers for his highly personal brand of power pop in Big Star and the eccentricity of his solo albums, Alex Chilton achieved his greatest commercial success as the 16-year-old lead singer of the Box Tops. The Memphis quintet was cobbled together by veteran Memphis producer Dan Penn to record a single, "The Letter," a huge hit that blended a sophisticated string arrangement with a jaunty, calliope-like keyboard riff and the sound of an airplane taking off. But it was the gravelly, remarkably mature wail of the teenage Chilton that separated "The Letter" from other Summer of Love radio fodder. The subsequent debut album is steeped in Memphis soul, with touches of country and blues, an approach that would remain intact on subsequent releases.

The Penn-written title track of *Cry Like a Baby* produced another major hit, and Chilton began contributing to the songwriting (the negligible "Nonstop") while cementing his status as a transfixing blue-eyed soul stylist on "I Met Her in Church." With Penn giving way to Chips Moman as resident studio guru, *Dimensions* took a more eccentric turn, with a lascivious novelty ("Sweet Cream Ladies, Forward March"), a leering Chilton blues ballad ("I Must Be the Devil"), and an ill-advised guitar jam (a nine-minute "Rock Me Baby"). *Tear Off* found a reunited Box Tops ripping it up persuasively on a batch of vintage blues, soul, and rockabilly tunes that inspired their sound three decades earlier. Of the hits compilations, *Best of the Box Tops* provides the most expansive introduction to Chilton's formative years. —G.K.

Boyz II Men

★★★	Cooleyhighharmony (Motown, 1991)
★★★★	II (Motown, 1994)
★★★	Evolution (Motown, 1997)
★★	Nathan Michael Shawn Wanya (Universal, 2000)
★★★	Legacy: The Greatest Hits Collection (Universal, 2001)
★★	Full Circle (Arista, 2002)
★★★	The Millennium Collection (Motown, 2003)
★★★	The Christmas Collection (Motown, 2003)

You don't become the most commercially successful R&B act of all time—resetting the record for most weeks at #1 on the *Billboard* singles chart a jaw-dropping three times—by bragging about the size of your dick. Tailoring their advances to the most timid sexual prey, these four nice Philadelphia boyz carefully cushioned a come-on such as "I'll make love to you" with a polite "When you want me to." Their hands-off sensuality made the existence of white idols such as the Backstreet Boys and 'N Sync all but inevitable, while their ladies-first approach offered a triumphant twist on the old adage "Nice guys finish last."

As protégés of Bell Biv Devoe's Michael Bivins, BIIM initially assayed New Jack Swing on their most atypically thumping hit, "Motownphilly." The remainder of *Cooleyhighharmony* was recklessly unafraid of schmaltz, a counterbalance to the breakbeat swagger of the New Jack era. Though the quartet was ever peering back over its shoulder at doo-wop, its nostalgia sounded contemporary, because rather than attempting to re-create the past, it made it sound, sadly, forever lost.

It's no coincidence that the group named its first album after a flick and that its whopper hit "End of the Road" sprang from the *Boomerang* soundtrack—BIIM's sentimentality always emitted overtones of Hollywood. So while *Legacy* is amazing track by track, it's a disorienting overall listen, like watching the last five minutes of a dozen different romantic comedies spliced together. *II* is more coherent and no less popwise—the uptempos benefit from the nuances of Dallas Austin and Jimmy Jam and Terry Lewis, the ballads ("I'll Make Love to You," "Water Runs Dry") are Babyface at his most romantic.

The rest of the group's output is an increasingly wimpier whimper. Once, the Boyz' harmonies seemed like a collective counterbalance to hip-hop's aggrandizement of the individual. And so the collective anonymity of *Full Circle*'s weak balladry is sadder than any of the group's heartbreak songs. —K.H.

Billy Bragg

★★★★	Talking With the Taxman About Poetry (Elektra, 1986)
★★★★	Back to Basics (Elektra, 1987)
★★★	Help Save the Youth of America (Elektra, 1988)
★★★½	Workers Playtime (Elektra, 1988)
★★★½	The Internationale (Elektra, 1990)
★★★½	Don't Try This at Home (Elektra, 1991)
★★★	William Bloke (Elektra, 1996)
★★★½	Reaching to the Converted (Rhino, 1999)
★★★½	England, Half English (Elektra, 2002)
★★★★½	Must I Paint You a Picture (Rhino, 2003)

Billy Bragg is a folksinger, less because of his musical roots (which in fact owe more to the Clash than to the Child ballads) than his principal interest: that is, average folk like you and me. Bragg's overriding sense of humanity puts the heart into his love songs, the sparkle into his social sketches, and keeps even his most stridently ideological material from turning into socialist harangues.

These qualities can be found in their rawest form on *Back to Basics,* a 21-song album compiling the whole of Bragg's first three U.K. releases *(Life's a Riot With Spy vs. Spy, Brewing Up With Billy Bragg,* and *Between the Wars).* Recorded for the most part with little more than Bragg's electric guitar behind his rough-hewn vocals, the best of these songs—"The Milkman of Human Kindness," "A New England," "Love Gets Dangerous," "Which Side Are You On"—are tuneful and affecting despite their stripped-down simplicity. Nor does *Talking With the Taxman About Poetry* add much in the way of accompaniment, but that hardly keeps him from pulling a sense of drama from "Levi Stubbs' Tears" or lending "Ideology" the sort of power-chord majesty associated with bands like the Who.

Bragg begins to move toward a full-band sound with *Workers Playtime,* an album that bears the subtitle "Capitalism Is Killing Music." (And if you think Bragg doesn't see the joke in having such a legend on a major label release, you seriously underestimate his sense of humor.) As usual, the love songs are well-drawn and emotionally involving, but this time around the political tunes—particularly the countryish "Rotting on Remand" and the triumphant "Waiting for the Great Leap Forwards"—have the edge melodically. That's also the case with *The Internationale,* although Bragg can't take credit, since most of these songs are well-known anthems. *Don't Try This at Home* is easily the most accessible of Bragg's albums, with love songs ("Moving the Goalposts," "You Woke Up My Neighbourhood," and, especially, "Sexuality") that are winning and witty, and issue songs ("God's Footballer," "North Sea Bubble") that suck the listener in with melody before springing their message.

Sadly, the dour *William Bloke* doesn't match that sense of fun (or even the wit of its title). *Reaching to the Converted,* a miscellany of tracks that never made it onto U.S. albums, is hardly essential, but it does include some gems, including the wry, wistful "Scholarship Is the Enemy of Romance" and a lovely cover of the McGarrigle sisters' "Heart Like a Wheel." Bragg fully returns to form with *England, Half English,* which matches typically impish, insightful reflections on politics (on both the interpersonal and national levels) with some of the best-realized band arrangements of Bragg's career (the reggae-inflected title tune is especially nice). *Must I Paint You a Picture* summarizes his career to date, compiling enough first-rate songs to leave any listener wondering why this guy isn't more famous. —J.D.C.

The Brand New Heavies

★★★½	The Brand New Heavies (Delicious Vinyl, 1991)
★★	Heavy Rhyme Experience, Vol. 1 (Delicious Vinyl, 1992)
★★★★	Brother Sister (Delicious Vinyl, 1994)
★★★	Original Flava (Hollywood, 1995)
★★½	Shelter (Delicious Vinyl, 1997)
★★★★	Trunk Funk Classics: 1991–2000 (Rhino, 2000)

Years in the making, *The Brand New Heavies* sounds today almost as good as it did in the early '90s, the heyday of the so-called acid jazz movement, and the beginning of a return of sorts to natural sounds and the kind of sexy syncopation that only a live drum kit can generate. The group's powerful instrumental alchemy (the Heavies' main lineup had been jamming together in the West London suburb of Ealing since 1985) was bolstered by the regal vocals of Atlanta, Georgia, native N'Dea Davenport. Although her involvement with the group remained sporadic throughout the years, Davenport quickly became the Heavies' most memorable persona.

With its overblown gallery of guest rappers, the much-anticipated followup *Heavy Rhyme Experience, Vol. 1* was an ambitious, cluttered affair—the kind of conceptual record that sounds better on paper than in real life. Two years later, the Heavies emerged from the studio with *Brother Sister,* their ultimate funk manifesto and a bona fide commercial success. One listen to the jubilant "Back to Love" was proof enough that

Davenport and company had grown up listening to the right records. Granted, there was nothing new and innovative about their festive R&B revival. So tight and life affirming was the Heavies' groove, however, that it was virtually impossible to stop dancing and question the validity of it all.

That sobering moment came in 1997 with *Shelter.* Slicker than its predecessors and with a new vocalist to boot (Siedah Garrett) it went platinum in the U.K. with a fun, still-energetic sound that was slowly beginning to feel formulaic. Not much has been heard since then from the Heavies, except for the release of a compilation that included (surprise, surprise) a newly recorded cut with the ever-excellent Davenport. —E.L.

Brand Nubian

★★★★	One for All (Elektra, 1990)
★★★	In God We Trust (Elektra, 1993)
★★★	Everything Is Everything (Elektra, 1994)
★★★	Foundation (Elektra, 1998)
★★★★	Best Of (Rhino, 2001)
★★½	Fire In The Hole (Babygrande, 2004)

Sadat X

★★★	Wild Cowboys (Loud/RCA, 1996)
★★	No Better Way (Light, 1996)
★★	The State of New York vs. Derek Murphy (Relativity, 2000)

Grand Puba

★★★	Reel to Reel (Elektra, 1992)
★★	2000 (Elektra, 1995)
★★	Understand This (Koch/Rising Son, 2001)

When Brand Nubian stepped onto the scene at the dawn of the 1990s, it seemed as if funky, mindful, barrier-breaking hip-hop albums were coming out every day. De La Soul and A Tribe Called Quest were at the height of their powers, and nearly forgotten groups such as KMD and the Goats were dropping gems. Brand Nubian, a quartet from New Rochelle, New York, made crucial contributions to this era of hip-hop richness. Maxwell "Grand Puba" Dixon, Lorenzo "Lord Jamar" Dechelaus, Derrick "Sadat X" Murphy, and DJ Alamo wore wooden necklaces and colorful, batik-printed shirts on the cover of the classic debut *One for All,* and from the start they had a sobering lyrical style equally effective whether promoting African-American consciousness ("Concerto in X Minor") or telling hoes to chill (the Edie Brickell–sampling "Slow Down"). Sporting two MCs with classic voices (the lithe-tongued Grand Puba and the sinewy, nasal Sadat X), the group's sound was instantly recognizable. But Puba went solo after *One for All,* taking DJ Alamo with him. Lord Jamar and Sadat X brought DJ Sincere aboard and continued under the Brand Nubian banner for *In God We Trust* where they furthered their commitment to the Nation of Islam on "Meaning of the 5%" and the chanting "Allah and Justice." That album blew up on the strength of the Diamond-produced single "Punks Jump Up to Get Beat Down," whose gay-bashing lyrics raised eyebrows and objections. *Everything is Everything* didn't have any hits, but it was just as effective. Brand Nubian's original lineup reunited in 1998 for *Foundation.* While by no means a perfect album (it has a number of light, corny tracks—particularly the instantly dated single "Let's Dance" with Busta Rhymes), it includes fine production from Gangstarr's DJ Premier on "The Return" and incisively addresses social topics such as questionable police procedure ("Probable Cause") and maligned black women ("Sincerely") on some of the group's best work. While Brand Nubian's *Best Of* wisely includes essential solo cuts such as Grand Puba's "360 Degrees," anyone interested in latter-day Nubian cream should pick up the compilation *Soundbombing II* (Rawkus, 1999), which includes Grand Puba and Sadat X joining Sir Menelik on "7XL" and the superb Sadat X/Common collabo "1-9-9-9." Sadat X also appears on "Come On," the best cut on the Notorious BIG's posthumous *Born Again,* and the awesome title track from 2002's *Art of War,* an album by Berlin-based DJ Desue available only in Germany. Grand Puba, Lord Jamar, and Sadat X reunited for *Fire in the Hole.* —P.R.

Brandy

★★½	Brandy (Atlantic, 1994)
★★★½	Never Say Never (Atlantic, 1998)
★★★½	Full Moon (Atlantic, 2002)
★★★½	Afrodisiac (Atlantic, 2004)

Listening back over Brandy Norwood's R&B career, it's tempting to say she developed as a singer. And perhaps her pipes did strengthen over the years—she definitely grew into her persona. But it's more to the point to say that stardom entitled her to better songs and more inventive producers. There's a greater contrast between the lackluster "I Wanna Be Down" and the wonderful "Almost Doesn't Count" than there is between her vocal delivery on either song. And while *Full Moon* was her "adult" album as advertised, her vocals hadn't matured so much as her tracks had grown up—the crushing off-kilter beat of "What About Us" is certainly not kiddie stuff.

Which isn't to deny Brandy's vocal presence. On paper, "Sittin' up in My Room" (from the epochal *Waiting To Exhale* soundtrack) is just another ode to unrequited puppy love. But Brandy's voice, forlorn yet with a ghost of a chirp lingering, retains a sense of perspective—you can hear that she knows she won't be lonely forever. And on paper, her duet with Monica, "The Boy Is Mine," couldn't have been more of a vocal mismatch. Brandy's girly breathiness up against Monica's baby-diva suavity—it was like Ronnie Spector versus Aretha (albeit on a much, much smaller scale). But Brandy more than held her own, and the result was a definitive clash between distinct female pop archetypes.

Only a greatest hits will properly highlight Brandy's contributions to the past decade's R&B. But her work with top-line producers like Rodney Jerkins and Dallas Austin ensures that there are few lulls in between the hits on her albums. And she accomplished no small feat, starring in a half-decent sitcom while putting her name on some classic pop singles. Can Alyssa Milano claim the same? Patty Duke? John Stamos? —K.H.

Bratmobile

★★★½	Pottymouth (Kill Rock Stars, 1993)
★★★	Peel Sessions (BBC, 1993)
★★★★	The Real Janelle (Kill Rock Stars, 1994)
★★★½	Ladies, Women, and Girls (Lookout, 2000)
★★★	Girls Get Busy (Lookout, 2002)

These pioneering riot grrrls have been one of indie rock's most consistently kicky bands over the past decade or so, committed to toughing it out in a world grown increasingly hostile to both unruly women and low-budget rock bands. But for all their political smarts, their records are more fun than a barrel of monkeys. The main reason is guitarist Erin Smith, who whips out the surfy, rock-lobster trash riffs that make the music go bang. Molly Neuman hits the drums, while wiseacre Allison Wolfe takes care of business on the mike, even when she's just chanting "Girl germs, girl germs/Can't hide out—they're everywhere."

Bratmobile first revved up in the early '90s with stray singles and compilation tracks, including "Girl Germs" (on the 1991 *Kill Rock Stars* compilation), "Cool Schmool" (a 1991 split single with Sleater-Kinney bassist Corin Tucker's original band, Heavens to Betsy), and the great 1992 7-inch "Kiss and Ride"/"Queenie." Its long-awaited debut, *Pottymouth,* appeared in 1993, remaking some of these songs and adding others, including "Panik," "Bitch Theme," and a gender-pretzeled cover of Joan Jett's "Cherry Bomb." *The Real Janelle* is their most dynamic, fullest-sounding album, with the sad ballad "And I Live in a Town Where the Boys Amputate Their Hearts."

Bratmobile broke up for a while, with Neuman joining the Frumpies and the Peechees while Wolfe and Smith formed Cold Cold Hearts. Though these bands were decent, it was happy news when the festive ladies reunited for *Ladies, Women, and Girls* and *Girls Get Busy.* The Brat spirit was fully intact in rave-ups like "I'm in the Band," "Gimmie Brains," and "Cheap Trick Record." The band's live shows were better than ever, too—proof positive that the punk rockers who can tackle adulthood tend to be the ones who learn to dance. —R.S.

Toni Braxton

★★★	Toni Braxton (LaFace, 1993)
★★★★	Secrets (LaFace, 1996)
★★	The Heat (LaFace, 2000)
★★	Snowflakes (Arista, 2001)
★★★½	More Than a Woman (Arista, 2002)
★★★★	Ultimate Toni Braxton (Arista, 2003)

Kenny "Babyface" Edmonds likes to make women suffer. That's what pop songwriters do, for the most part, and Edmonds has employed some of the most talented women in the field to consciously explore the full continuum of romantic pain. But Toni Braxton was the sort of multiplatinum masochist a songsmith stumbles across once in a career. Her taut huskiness was palpably physical, as if her sadness was literally constricting her throat: She sings "I shall never breathe again" as if in need of mouth-to-mouth. As for the remainder of the material, one title said it all: "Another Sad Love Song."

If her debut hinted that Braxton's romantic despair was a narrow patch of turf to mow, best sampled a single at a time, *Secrets* allowed Braxton to move through a wider range of emotions than anyone had reason to previously suspect. Though both songs are thematically similar, the aural striptease of "You're Makin' Me High" couldn't be farther from the girlish flirtatiousness of "I Love Me Some Him." And "Un-Break My Heart" is Braxton at her most monolithically abject—maintaining a pained, almost heroic dignity as she prostrates herself before her tormentor.

Success was not kind to Braxton's musical persona—stars don't need to play the victim, after all. And *The Heat* allows Braxton to breathe heavily over the gently strummed Spanish guitars beloved by Babyface as well as most directors of soft-core porn. The catty "He Wasn't Man Enough" steams things up. The rest is just hot air. By contrast, *Snowflakes,* a quickie Christmas moneymaker, is as chilly as its title, with Braxton's refined stylings toppling over into sanctimony.

But Braxton was at her toughest on *More Than a Woman*—in fact, no other woman in R&B was coming up with kiss-offs like "Hit the Freeway" and "Let Me Show You the Way (Out)." *Ultimate* renders most of her studio albums redundant, and the steady increase in sass as her career progresses is fun to track. —K.H.

The Breeders

★★★★ Pod (4AD/Elektra, 1990)
★★★ Safari EP (4AD/Elektra, 1992)
★★★★½ Last Splash (4AD/Elektra, 1993)
★★ Title TK (4AD/Elektra, 2002)

The Breeders started as a Boston supergroup, featuring the Pixies' bassist Kim Deal (writing most of the songs and playing guitar) along with guitarist Tanya Donelly from Throwing Muses, violinist Carrie Bradley of local heroes Ed's Redeeming Qualities, and a couple of out-of-towners: Slint's drummer Britt Walford (who called himself "Shannon Doughton" and later, ahem, "Mike Hunt") and British bassist Josephine Wiggs (from the Perfect Disaster). Originally planned as a one-off project, *Pod* was striking enough to spawn a career. It's hazy and creepily erotic, showcasing Deal's thin purr and bizarre, skeletal songs—you're never sure if they're going to make it to the next phrase—as well as a sinuous cover of the Beatles' "Happiness Is a Warm Gun." Aside from the racing "Hellbound," it's as elliptical as rock gets, and it was just what college radio had been waiting for.

With *Safari,* Kim Deal added her identical twin sister Kelley on lead guitar (never mind that Kelley, legendarily, could barely play) and vocals. More or less a concept EP about Kim's breakup with her husband, it featured more-fleshed-out original songs and a spunky take on the Who's "So Sad About Us."

Donelly and Walford left, and new drummer Jim MacPherson arrived, before the Breeders hit it out of the park with the summery alternative-rock landmark *Last Splash.* With its scraping, rhythmic hooks and headlong three-chord chorus, "Cannonball" was an MTV hit, and the rest of the album developed Kim's loopy melodies and oblique words into an unpredictable guitar-rock tornado. "Divine Hammer" is a chiming tribute to her favorite part of men's bodies; "Drivin' on 9" resurrects an old Ed's Redeeming Qualities favorite as tender country. Kelley even sings lead on a spiteful little rocker, "I Just Wanna Get Along." The band had never sounded more assured or more ebullient.

And then there was silence. The Breeders of *Last Splash* toured the world, but only managed to eke out one more single; Kelley was busted for heroin; Kim and some Ohio pals, as the Amps, made a ramshackle album, *Pacer* (forgettable aside from its title track, another of Deal's perfect garage-rock readymades). Finally, after nine years, the Deals and new hired hands delivered the mostly dreadful *Title TK*—journalistic slang for "we'll fill it in later." It's an attempt to return to the protean, stripped-down aesthetic of *Pod,* but the songs (one recycled from *Pacer*) just seem unfinished and aimless, and the stark arrangements and recording do them no favors. —D.W.

Bright Eyes

★★ A Collection of Songs Written and Recorded 1995–1997 (Saddle Creek, 1997)
★★★½ Letting Off the Happiness (Saddle Creek, 1998)
★★★½ Every Day and Every Night (EP) (Saddle Creek, 2000)
★★★½ Fever and Mirrors (Saddle Creek, 2000)
★★★ Oh Holy Fools [split with Son, Ambulance] (Saddle Creek, 2001)
★★★★½ There Is No Beginning to the Story (EP) (Saddle Creek, 2002)
★★★★½ Lifted or the Story Is in the Soil, Keep Your Ear to the Ground (Saddle Creek, 2002)
★★ A Christmas Album (Saddle Creek, 2002)

Desaparecidos

★★★½ Read Music/Speak Spanish (Saddle Creek, 2002)

There are exceptions—the compilation of his teenage experiments, a split EP with an obnoxious-voiced friend, and an ill-advised Christmas disc that at least benefits a charity—but the remarkable consistency of Bright Eyes' output cannot be denied. In fact, it suggests a myth the collective-fronting singer/songwriter himself, Conor Oberst, would probably jump at having granted: that his voice, once discovered, channeled a perpetually precocious talent. Young—he turned 22 the year *Lifted or the Story Is in the Soil, Keep Your Ear to the Ground* ended up on many critics' year-end lists—hair-in-those-bright-eyes sexy, and as romantically, existentially sad as he is romantically, existentially opposed to straight-laced society and its discontents, Oberst piles on the drama and then self-consciously peels it back, enthralled with what makes things sad and beautiful at the same time.

Oberst's older brother Justin started Saddle Creek records in 1993 to put out tapes Conor recorded. Less than 10 years later, the label headed up an acclaimed Omaha, NE, scene including Conor's buddies in Cursive and the Faint. *Letting Off the Happiness* was the label's breakthrough, even if the rest of the country didn't know it yet. Always in confessional mode, Oberst strums an acoustic guitar along with his own sweetly warbling voice only some of the time, as on the seemingly caffeine-fueled "June on the West Coast." Often he's joined by friends on drums, bass, pedal steel guitar, keyboards, organ, samplers, and finger cymbals. Recorded in houses around town—haphazardly, judging by the liner notes—the disc sounds loose but not shambolic, casually buoying Oberst's notebook poetry and cathartic melodies, which he whispers or shouts in jagged chunks.

The tender *Every Day and Every Night* EP turns the normal travails of teenhood—boredom, love lost—into meditations on the joys and disappointments of making art. On paper, this sounds like a snoozefest, but Oberst races through the philosophy books he's probably only partly read to get at the stinging, soaring questions that remain after the last page has been turned. *Fever and Mirrors*—the title refers to Oberst's search for rapture in sickness and obsessive self-reflexivity—opens with a young boy haltingly reading aloud a book he clearly doesn't understand. The album's pretty, almost poppy second-to-last track, "An Attempt to Tip the Scales," ends with a too-long, tacked-on radio interview in which Oberst describes his deep depression in excruciating detail. It is only here, in mocking his self-indulgence, that Oberst slips—who wants to hear about it, except in a tune?

As a sojourn from defining art, love, and life itself, Oberst turned his focus to late capitalism and economic injustice with Desaparecidos. His crimped holler perfectly suits the raucous, new wave–inflected indie rock, but it was on the next Bright Eyes full-length, *Lifted or the Story Is in the Soil, Keep Your Ear to the Ground,* that Oberst (and a small army of musicians playing accordion, mandolin, cello, etc.) finally quit squinting in the spotlight he'd been occupying all along. Take "You Will. You? Will. You? Will. You? Will." Oberst, his voice and guitar echoing in what sounds like a large room—a change from earlier recordings, where the only air seems to come from his breath—confirms a lover's accusations: "You say that I treat you like a book on a shelf/I don't take you out that often 'cause I know that I've completed you/and that's why you are here/that's the reason you stay here/how awful that must feel." The song's climax, a woozy hoedown in which Oberst drags the title's ambivalent thicket of grammar up and down the musical scale, encapsulates and animates as never before this young dude's struggle to step outside of himself without simply tumbling into someone else's embrace or ideas. And while he's as prone to drama as ever, Oberst asserts that people aren't just characters in books—or songs. —N.C.

Garth Brooks

★★★ Garth Brooks (Capitol, 1989)
★★★★ No Fences (Capitol, 1990)
★★★★ Ropin' the Wind (Capitol, 1991)
★★★½ The Chase (Capitol, 1992)
★ Beyond the Season (Capitol, 1992)
★★★½ In Pieces (Capitol, 1993)
★★★★½ The Hits (Capitol, 1994)
★★ Fresh Horses (Capitol, 1995)
★★ Sevens (Capitol, 1997)
★★ Double Live (Capitol, 1998)
★ Garth Brooks & the Magic of Christmas (Capitol, 1999)
★ Garth Brooks in . . . the Life of Chris Gaines (Capitol, 1999)
★★★ Scarecrow (Capitol, 2001)

If ever there was a more over-the-top country-music entertainer than Garth Brooks, then he or she has not yet been discovered. His performances combine arena-rock spectacle with aw-shucks sentimentality, and his record sales are astronomical. Brooks personifies the kind of slick country music that took Nashville from its Southern working-class roots smack into the politically moderate values of Clinton-era middle-class America. The singer's mix of country with '70s-style singer/songwriter music, album-oriented rock, and middle-of-the-road pop came just as the Baby Boom generation was looking beyond contemporary pop and classic rock for a new sound to grow old with. But Brooks' music also resonates with younger heartland fans who fall outside the postpunk and urban demographics. The singer's impact on popular music cannot be overestimated; his influence runs that deep.

Brooks' first album is a collection of music typical of the New Traditionalist sound of '80s country. The album did well—yielding four hits, including two chart-toppers—but its overall sound is unremarkable. It was on *No Fences* that Brooks began genre-hopping his way to superstardom. The album has all the ingredients that would come to define him—sensitive ballads, power ballads, honky-tonk barnburners, and pretty pop. Opening with "The Thunder Rolls," a dead ringer for the heartland arena sound of Bob Seger, the album builds up to Brooks' smash hit "Friends in Low Places"—pure honky-tonk with a seductive pop hook. He fleshes out *No Fences* with heart-tugging singer/songwriter fare ("Victim of the Game") and Tin Pan Alley–style Western swing ("Mr. Blue"). *No Fences* wound up selling more than 10 million copies, and forever changed the way country music was made.

Ropin' the Wind was even bigger and better. Kicking off with a gutbucket Southern rocker ("Against the Grain") that outdoes Charlie Daniels at his own game, Brooks brings an edge to the music that he'd not previously shown, combining all the elements that made *No Fences* such a gargantuan hit to even greater effect.

Ropin' the Wind has your sentimental love ballads ("What She's Doing Now") and your cheatin' songs ("Papa Loved Mama"), but it also includes a Billy Joel cover ("Shameless") that confirms what was becoming increasingly clear: Garth Brooks is the Billy Joel of the South—a pop star for weekend warriors. It may be slick, and it may be little more than ear candy, but there's nary a bad cut on this record.

Garth got ambitious on *The Chase,* and his sales suffered. Still, the gospel choir on "We Shall Be Free," covers of songs by Little Feat ("Dixie Chicken") and Patsy Cline ("Walking After Midnight"), and Brooks' more confessional writing make for an album of greater depth than anyone imagined. After *The Chase*'s disappointing sales, country's pudgy poster boy returned to straight crackle 'n' pop country on *In Pieces,* another solid collection of puffed-up anthems, emotional overkill, and cinematic C&W for the upwardly mobile.

By the middle '90s, Brooks' formula was getting stale. How many times can a cowboy beat his dead horse before the beast starts stinking? On *Fresh Horses,* Brooks turns in a bad Aerosmith cover one moment, a bad Dylan cover the next, and fills the spaces with tired honky-tonk and increasingly tedious pop schlock. To quote his own damn self, he's "so New York and then L.A. and every town along the way." *Sevens* is worse. Here, Brooks becomes a bona fide parody of himself (which is to say he's become a parody of a parody). On *In the Life of Chris Gaines,* he attempts to remedy the problem by adopting an alt-rock alter ego. The album comes with a fictional biography describing Garth-as-Gaines as a legendary Aussie rocker—complete with facial hair and a wig—but the music was neither legendary nor rock. Gaines was the most monumentally disastrous marketing idea that mainstream pop had seen in years, and the album tanked. Brooks never recovered from the embarrassment of the Gaines fiasco, and *Scarecrow* found him returning to the country, rock, and pop blend that only Garth Brooks can pull off.

The Hits is a fine set of Brooks' best songs. *Beyond the Season* and *Magic of Christmas* are his huge-selling holiday collections that, depending on your tolerance for schmaltzy Christmas songs, are dispensable. *Double Live* is one of those "you had to be there" performance sets wherein the singer brings absolutely nothing new to the original versions of his songs. —M.K.

Big Bill Broonzy

★★★★	Feelin' Low Down (GNP Crescendo, 1973)
★★★★	Big Bill Broonzy and Washboard Sam (1986; Chess/MCA, 1991)
★★★★	Big Bill Broonzy Sings Folk Songs (Smithsonian Folkways, 1989)

★★★	Absolutely the Best (Varèse Sarabande, 2000)
★★★★	Trouble in Mind (Smithsonian/Folkways, 2000)

An important transitional link between acoustic country blues and electrified urban blues, Big Bill Broonzy, born in Mississippi and raised in Arkansas, helped shape the force that became Chicago blues after moving to the Windy City in 1920 upon completing a tour of duty in the army. A fiddle player at that time, he switched to guitar and began playing the instrument as if born to it, and was often seen in the company of local stars such as Blind Lemon Jefferson and Sleepy John Estes. Even among this crowd, his style was distinctive: basic, fundamental guitar accompaniment highlighted by stark, single-string solos and forceful chording and a smooth but plaintive cry of a singing voice (which moved easily from a world-weary moan to a mellow, sanguine tone) suited to deliver self-penned songs focused on the travails of big city life, social inequities, and hard times with women. More than any guitarist of his time, he made effective use of silence as a dramatic component of his music, sometimes employing only a few strong, angular retorts to punctuate key lyric sections, but at the same time he was an unqualified master of many styles, from ragtime and blues fingerpicking to a flatpicking style that echoed with country influences. And he was prolific: At his death in 1958, over 300 songs had been copyrighted with his name as composer.

Broonzy's early years are well documented on the Yazoo, Columbia, and Legacy collections. The Yazoo discs focus primarily on solo acoustic or duet recordings from 1928 to 1935, whereas Columbia's *Good Time Tonight* and *Warm, Witty & Wise* single-disc sets offer both solo acoustic and combo recordings spanning the years 1930 to 1940. A notably delicious treat recommending *Do That Guitar Rag* is the inclusion of four bawdy numbers featuring scintillating musical dialogues between Broonzy on guitar and Georgia Tom Dorsey on piano (obviously before he saw the light and began writing the songs that defined modern gospel music), supporting Jane Lucas' sassy vocalizing.

An engaging live performance is captured on Evidence's *Black, Brown & White,* with seven tracks recorded in concert in Antwerp, Belgium, in 1952, and six others recorded in 1955 at a friend's house in Brussels. Playing acoustic, or with pianist Blind John Davis, Broonzy samples virtually every type of song in his repertoire. Topical songs are represented by the brutal title track ("If you's white/you's all right/ if you's brown/stick around/but if you's black/oh, brother, get back, get back, get back"), with its light, lilting rhythm quite at odds with the lyric's frontal assaults on racism ("I helped build the country/and I fought for it too/Now I bet you can see/what a black man have to do").

That Broonzy never left his social conscience behind is indicated on the opening track of Collectables' first-rate *The 1955 London Sessions,* "When Do I Get to Be Called a Man," an explicit litany of the sacrifices a man had made for his country and what his country had withheld in return—dignity, for one; respect, for another. Apart from the solo acoustic sides, Broonzy is teamed here with a septet on some bluesy, boozy performances with a decidedly New Orleans feel about them, notably "Southbound Train," with trumpeter Leslie Hutchinson blowing piercing, muted fills. Drive Archive's *Baby, Please Don't Go* suffers only from a lack of adequate liner information, but what's there indicates these 10 tracks were recorded between 1952 and 1955. The key track: the dramatic interpretation of "Backwater Blues (I Got Up One Mornin' Blues)"—not only one of the most haunting tracks Broonzy ever recorded, but ranks with Bessie Smith's version in terms of the profound sense of loss the singer communicates. Similarly, but with far better annotation, the Smithsonian Folkways entry, *Big Bill Broonzy Sings Folk Songs,* collects some recordings Broonzy made for the label near the end of his life as well as several live tracks, some featuring Pete Seeger on harmony vocals and banjo, all of which underscore the remarkable breadth and depth of Broonzy's repertoire. From the same label comes a second excellent over-view, *Trouble in Mind,* containing 24 tracks (including several alternate takes) from the artist's 1956–57 sessions. Seeger is here too, pitching in on banjo and vocals on a stirring live version of "This Train (Bound for Glory)," but Broonzy's solo with acoustic guitar carries the day.

GNP Crescendo's *Feelin' Low Down* is a set of acoustic sides, raw and potent, but lacking any dates or session information. Apart from that oversight, its 14 cuts feature vintage Broonzy in many moods on songs ranging from his own moving originals (including "Big Bill Blues" and "Lonesome Road Blues") to stirring covers, such as the heavyweight treatment he gives the traditional folk number "John Henry." Before he died of throat cancer in 1958, Broonzy had helped ignite a folk and blues revival in this country that brought attention to many of his contemporaries who might otherwise have died in obscurity. Today he is far less known among the general public than, say, Robert Johnson, but his most penetrating and personal songs remind us of the important issues of his time that remain relevant to our own. —D.M.

Charles Brown

★★★½	Boss of the Blues (1964; Mainstream/Legacy, 1993)

Late night, lights down low, bottle of wine at hand, someone to dream with, and Charles Brown, blues elegance personified—now there's a scenario suitable for any true romantic. Blues and R&B have had any number of outstanding boudoir balladeers, but Charles Brown, who died on January 21, 1999, always brought a special warmth and engaging personality to his efforts, and thus carved out for himself an exalted place among his peers and, for a few years in the late '40s and early '50s, the general public as well.

Born in Texas City, TX, Brown's burgeoning interest in music led him to Los Angeles after he graduated from Prairie View College. He formed an association with Ed Williams and Johnny Moore in a group they called the Three Blazers. Of their three wonderful voices, none stood out more than Brown's in its laconic grace and soothing timbre (comparable to Nat "King" Cole's "smoky gray" quality), attributes made more effective by the singer's unerring sense of propriety with regard to a lyrical phrase—gingerly kneading key words, or stretching them over a few beats, to draw out an underlying feeling—and frugal use of ornamentation (deep bass dips, or a conversational or recitative style) for greatest emotional impact. The Three Blazers hit it big out of the box in 1945 with "Driftin' Blues," a song Brown had written in high school, which remained on the R&B chart for nearly six months, until Brown went solo. On his own, he wrote and recorded numerous upper-level R&B chart singles—nine in 1949 alone—including two #1s in 1949's "Trouble Blues" and 1951's "Black Night." All the while this was happening, a Christmas song he wrote and recorded with the Three Blazers in 1947, the melancholy "Merry Christmas, Baby," was becoming a seasonal classic, charting every year in the first three years after its release. While "Driftin' Blues" is regarded as his signature song, "Merry Christmas, Baby" has lived on in numerous cover versions, by far the most powerful being Elvis Presley's tour de force of blues vocalizing on his *Elvis Sings the Wonderful World of Christmas* LP. Collectables' *Driftin' Blues: The Best of Charles Brown* is the must-have CD charting these fruitful years.

Brown's chart run ended in 1952, and he became so low-profile he seemed to have dropped off the Earth for a couple of decades. Brown in fact stayed on the road, and every so often found a small label here or there that was happy to have him for a moment. *Blues n' Brown,* released in 1995, is a ten-song collection of low-down blues—most of them cowritten by Brown—recorded at the Modern/Kent studios in Los Angeles in 1971, with producer Maxwell Davis.

Praise be to Bullseye Blues, which performed a great service in giving Jimmy McCracklin and Charles Brown a home, to the benefit of both artists. Brown's first Bullseye effort, *All My Life,* is another smooth, assured outing showing off the artist's interpretive powers. Throughout these sessions his vocals reflect a stronger sense of love as an impermanent state in being more resonant, more nuanced, more ambivalent than on any of his other recordings.

Possibly as a response to the harder edge of *All My Life, Someone to Love* is soft, mellow, back-to-the-boudoir fare, beginning with the Brown–Bonnie Raitt duet on the title track, which finds the two singers engaged in the vocal equivalent of long, meaningful looks into each other's eyes, and discreet, under-the-table hand-holding. The same year he recorded *Someone to Love,* Brown slipped into a San Francisco studio for three days and came back with *Blues and Other Love Songs* (originally released on Muse in 1992, it has been reissued by 32 Jazz), produced by the formidable tenor saxophonist Houston Person, who lent his distinctive touch to five of the songs, including a barn-burning workout on his version of "One Mint Julep."

Brown's 1994 Bullseye release, *Just a Lucky So and So,* is a more ornate affair in that Brown is backed not only by a small combo, but also by the Crescent City Horns (the album was recorded in New Orleans) and the New Orleans Strings. The pleasing result is a combination of the best of the Mainstream style with the small-combo midnight blues of *Someone to Love.*

In the late '90s Brown and his regular working combo—a tight, tasty quartet that included Clifford Solomon on tenor sax, Danny Caron on guitar (and providing some savvy business guidance to Brown's career), Ruth Davies on bass, and Gaylord Birch (who passed away after the sessions for the 1996 release, *Honey Dripper*) on drums—cut three fine albums for Verve that turned out to be Brown's final, stirring testimony on disc. Although his voice was now a matured, slightly weathered instrument, his phrasing and preternatural cool remained things of wonder, his piano playing retained its characteristic ebullience and sensitivity, and the band played tight, economical support behind him. Some of the most memorable moments in this album trifecta come when Brown goes minimalist, as on the solo piano and vocal on a moody version of Duke Ellington's "I Got It Bad (and That Ain't Good)" and a grand, stately reimagining of "Amazing Grace," both from *These Blues;* or the angular, New Orleans–style solo piano ruminations underpinning his solo performance of Thomas A. Dorsey's gospel monument "Precious Lord" on *Honey Dripper* (which also features, in addition to the Joe Liggins title tune, two new Brown songs: the slow-grinding blues of "News All Over Town" and a lively jump blues quite at odds with the subject matter, "I Cried Last Night," enlivened by robust tenor sax solos courtesy of Clifford Solomon and some fleet-fingered runs by guitarist Danny Caron); or, on *So Goes Love,* a gospel-influenced rendition of "Stormy Monday," with Brown's smooth crooning supported only by his steady rolling piano lines and Solomon's restrained tenor sax punctuations, and an album-closing solo piano-vocal downcast blues ballad, "Blue Because of You." Those were the last notes of Brown's career on record, and when all was said and done he had produced a body of work over the course of 53 years that was remarkable for its consistency and its soulful expressiveness. Gone he may be, but Charles Brown's music lives on, timeless and majestic to the highest degree. —D.M.

James Brown may never have captured the zeitgeist as Elvis Presley or the Beatles did, nor can he be said to have dominated the charts like Stevie Wonder or the Rolling Stones, but by any real measure of musical greatness—endurance, originality, versatility, breadth of influence—he rivals or even betters them all. Brown has been astonishingly productive over the first four decades of his recording career, churning out more than 100 albums (give or take a few anthologies) as a singer, bandleader, or instrumentalist; many are great, and nearly all are worth hearing. And even though none of the 44 singles he put into the Billboard Top 40 ever made it to #1—indeed, only two cracked the Top 5—in retrospect, that reflects worse on the pop audience than it does on his music.

Indeed, Brown has long boasted that his best ideas were years ahead of their time, and history has borne him out. Hip-hop borrowed freely from his catalogue, as rappers such as Rob Base, Kool Moe Dee, and Eric B. & Rakim all powered singles with beats Brown produced as much as 20 years earlier. Nor were they the only ones, for by the early '90s the churning fatback pattern immortalized in Brown's "Funky Drummer" (1969) was a staple among club-savvy alternative rock acts. Even Michael Jackson's celebrated moonwalk was little more than an update of a Brown move called the camel walk.

Dealing with a body of work so wide-ranging and important is not easy, particularly for those starting from scratch. Certainly, there are greatest-hits albums available, of which *20 All-Time Greatest Hits* is the best buy (*JB40: James Brown's 40th Anniversary Collection* is more expensive, but makes for a nicely compact history). Those interested in specific eras of his career may prefer the close focus of such sets as *Funk Power, 1970: A Brand New Thang* or *Dead on the Heavy Funk: 1975–1983.* But the single best introduction to Brown's work is *Star Time,* a wonderfully annotated, admirably representative four-disc box set that follows Brown's career from "Please Please Please," his 1956 debut, to "Unity," a 1984 collaboration with hip-hop godfather Afrika Bambaataa. In addition to including all the intervening hits, it restores some singles to their full-length versions, offers a fair amount of non-LP material, and includes several illuminating rarities, among them the previously unreleased original version of "Papa's Got a Brand New Bag." Five stars are barely enough.

As for the rest of his work, well, let's just start at the beginning. *Roots of a Revolution,* focusing on the 1956–62 period, with two songs each from 1963 and 1964, gives a strong sense of Brown's early evolution, but because the set purposely excludes Brown's best-known titles from that period, it should be seen as a "second step" album for fledgling fans.

Then there are the original albums. Of these, *Think* is by far the best, in part because it has the highest hit quotient ("Think," "I'll Go Crazy," "Good Good Lovin' ") but mostly because it offers Brown's most distinctive work to that point, particularly in its chugging title tune. *Please Please Please,* despite including Brown's first single (the raw, gospel-inflected title track) and his first R&B chart-topper (the more traditional R&B tune "Try Me"), is mostly given over to derivative material such as "Chonnie-on-Chon" and "Let's Make It." *Try Me*—which was reissued in 1964 as *The Unbeatable James Brown*—repeats "Try Me" but otherwise leans more toward the blues, thanks to such songs as "I Want You So Bad" and "Messing with the Blues," while *The Amazing James Brown* shows off the increasing proficiency of his band through gritty titles such as "Dancin' Little Thing" and "Come Over Here."

With *Presents His Band,* Brown moves into the instrumental realm and delivers his epochal remake of Jimmy Forrest's "Night Train" (a huge hit in the U.K.), but *Excitement Mr. Dynamite*—which has also been available as *Shout and Shimmy*—returns Brown and company to the hard-hitting vocal approach of *Think,* even to the point of repeating "Good Good Lovin'."

At that point in his career, Brown was still better-known for his live show than for his recordings, a fact that explains the somewhat misleading title to the studio album *James Brown and His Famous Flames Tour the U.S.A.* Incredibly, King Records president Syd Nathan felt there was no market for a real James Brown live album, so the singer went ahead and recorded *Live at the Apollo* at his own expense; it turned out to be the album that finally put him on the map—and no wonder. It doesn't just present the hits, but also shows off the incredible precision of Brown's band as well as the uncanny bond he had with his audience. *Pure Dynamite!,* an even more energetic set recorded before a raucously appreciative crowd at Baltimore's Royal Theatre, followed a year later, and Brown would release eight more live albums after that, including three more recorded at the Apollo: *Live at the Apollo, Vol. II,* with its itchy, intense rendition of "There Was a Time"; and *Revolution of the Mind: Live at the Apollo, Vol. III.* (*Live at the Apollo 1995* is by that point a needless exercise in nostalgia for both star and venue.) Because Brown toured with an entire revue, *The James Brown Show* puts its emphasis on the other players in the show, including his band; likewise, *James Brown Presents His Show of Tomorrow* features only two tracks by Brown, with the rest given over to members of the revue. Brown also put out a couple of "faked" live albums—studio recordings with audience noise dubbed in later. Perhaps the most notorious of these was *Showtime* (fortunately, its best tunes appear without embellishment on *Messing with the Blues*), but *Super Bad* repeats the ruse, as does the first half of the double-album *Sex Machine,* although the loping, hypnotic groove generated by his band on "Give It Up or Turnit a Loose" makes such fakery almost forgivable.

Brown later admitted that his model for *Live at the Apollo* was Ray Charles' concert album *In Person.* That wasn't his only nod to Brother Ray; *Prisoner of Love,* with its string sweetening and choral cushioning, is self-consciously in the vein of Charles' ABC recordings—although Brown remains far too raw a singer to seem much at home in these MOR arrangements. No matter; the direction Brown takes with *Papa's Got a Brand New Bag* would soon leave Charles in the dust, at least from an R&B perspective. This, in effect, is the birth of funk, as Brown's songs grow lean and repetitious, with fewer and fewer chord changes and a greater emphasis on rhythmic tension. Granted, nothing else on the album takes that idea quite as far as its two-part title tune, but that was more than enough. The revolution truly had begun.

Brown suggests in his autobiography that the revolution had actually begun with *Out of Sight,* an album he recorded for Smash shortly before *Brand New Bag,* but a legal battle among Brown, King Records, and Smash resulted in a court order withdrawing the album shortly after its release (the single "Out of Sight" can be found on *Star Time*). Part of the loss when *Out of Sight* was put out of the picture was a track entitled "I Got You (I Feel Good)," but Brown, typically, turned the situation to his advantage and recut the song with a harder groove; both versions of the song can be found on *Star Time,* but the funkier and more familiar of the two is the centerpiece of *I Got You (I Feel Good).* Brown didn't cut down on his balladry during this period, however. *It's a Man's, Man's, Man's World* certainly has its share of funk, including the two-part "Ain't That a Groove," but there's room enough for the slow ones, including the title track and a tearfully intense number called "The Bells." Likewise, *James Brown Sings Raw Soul* alternates rhythmically intense tunes such as "Money Won't Change You" and "Let Yourself Go" with soppy ballads along the lines of "Tell Me That You Love Me." Even the unstoppable groove of "Cold Sweat"—which, with its driving, monolithic bass pulse and exquisite Maceo Parker sax break, was a milestone almost as important as "Papa's Got a Brand New Bag"—is flanked on *Cold Sweat* by MOR numbers such as "Mona Lisa" and "Nature Boy" as well as a smattering of rock & roll oldies.

Of course, some of that was simply a reflection of Brown's determined eclecticism. Like Ray Charles, Brown refused to see himself as a one-dimensional musician and regularly fleshed out his albums with material that ranged far afield from the sound of his singles. Sometimes, he did whole albums of these songs, such as *Thinking About Little Willie John and A Few Nice Things,* a tribute to the influential R&B stylist that boasts a touching cover of John's "Talk to Me!" He also flirted with jazz, trying his hand at lounge singing with the Dee Felice Trio on *Gettin' Down to It* and recording *Soul on Top* with the Louis Bellson big band.

But Brown's most consistent sideline was playing organ, piano, and vibraphone. Although by no means a master technician, his solos are remarkably fluid, and at their best compare well with the work of such jazz-funk players as Les McCann and Ramsey Lewis. In all, Brown released 11 all-instrumental albums between 1961 and 1971; some, such as *James Brown Plays the New Breed, James Brown Plays the Real*

Thing, or *James Brown Plays James Brown Today and Yesterday* feature his funky, Jimmy McGriff–style organ solos; others, such as *Mighty Instrumentals, The Popcorn,* and *Ain't It Funky* put the emphasis on his band. Most have been written off as inconsequential, but the music is often quite good, particularly on rhythmically centered tunes such as "Peewee's Groove in 'D,' " from *Real Thing,* or "Soul Pride," from *Popcorn.* Finding the original albums may be a bit of a trick, but fortunately *Soul Power: The Instrumentals, 1960–1969* includes all the highlights and then some. Nor should we forget the albums he produced for his backing band, the JBs, and their various spin-offs, a sampling of which is spread between *James Brown's Funky People* and *James Brown's Funky People (Part 2).*

With *Say It Loud, I'm Black and I'm Proud* Brown states what had long been implicit in his music; the black power sentiment of the title tune generated a certain amount of controversy at the time, but the album isn't all politics, as the loping "Licking Stick—Licking Stick" makes clear. Brown's band was getting funkier with each passing month; even his outtakes are astonishing, as evidenced by the selection on *Motherlode. It's a New Day So Let a Man Come In* is especially strong, thanks to "Give It Up or Turnit a Loose," a mesmerizing workout with interlocking guitar and bass patterns, as well as such lesser greats as "It's a New Day" and "Let a Man Come in and Do the Popcorn." But many of Brown's hottest singles from this period—"Funky Drummer," for instance—didn't make it to album until Brown began to be anthologized in the '80s and '90s. Some of these tracks turn up in remixes on *In the Jungle Groove,* a DJ-oriented release that augments "Funky Drummer" with a three-minute "Bonus Beat Reprise," while *Star Time* offers a choice selection of complete versions of key tracks such as "Mother Popcorn." But if what you want to hear is what Brown heard during this period, your best bet is *Funk Power 1970: A Brand New Thang,* which not only offers a clear picture of the Brown band with bassist Bootsy Collins but also presents a number of hits in their original, unedited form.

Brown took the notion of funk quite literally with *Hot Pants,* and gets down even further with *There It Is* (including "I'm a Greedy Man" and the marvelously kinetic "Talkin' Loud & Sayin' Nothing," as well as the message song "King Heroin"). After the double album *Get on the Good Foot,* Brown released several soundtracks, of which only *The Payback* is worthwhile; from there, he went straight to *Hell,* a somewhat mixed double album that includes the Nixon-inspired "Funky President (People It's Bad)." By this point, Brown was losing his edge, and as he tried to cope with the disco era, his albums grew increasingly spotty. Some, such as the remake-oriented *Sex Machine Today* or the uncharacteristically mellow *Everybody's Doin' the Hustle & Dead on the Double Bump,* are conceptual failures, while others—*Bodyheat, Mutha's Nature, Jam 1980's,* or *People*—are uninspired. Still, he had his moments: *Hot,* on which Brown copied David Bowie's "Fame" for "Hot (I Need to Be Loved, Loved, Loved)"; *Get Up Offa That Thing,* with its insistent title tune; and "For Goodness Sakes, Look at Those Cakes," on *Take a Look at Those Cakes.* With *The Original Disco Man,* he even came to terms with disco itself, and proved on *Soul Syndrome* that he could imitate the Miami sound as well as anyone.

By the early '80s, Brown was in limbo, with no label and a waning audience. Recorded at Studio 54, *The Greatest Hits Live in Concert* isn't even as good as the live-in-Japan *Hot on the One,* recorded a year earlier. He tried going independent, releasing the pleasantly retro *Bring It On!* through the tiny Churchill/Augusta label; it's a good album heard by almost no one. He even went Hollywood for a time, appearing in and contributing to the soundtracks of *The Blues Brothers* and *Dr. Detroit;* the latter has the more interesting musical performance. But it wasn't until he cut "Living in America" for the soundtrack to *Rocky IV* that Brown was able to reestablish himself. Ironically, part of the reason "Living in America" works is that it plays off the cliché James Brown–isms that had come back into vogue, resulting in Brown imitating himself (as he is through the rest of *Gravity*). *I'm Real* takes the opposite approach, with Brown complaining about rappers ripping him off, over rhythm tracks largely built around sampled James Brown records. *Soul Session Live* is the soundtrack from a Cinemax special that offers more stars (Aretha Franklin, Joe Cocker, Wilson Pickett) than memorable music, but *Love Over-Due,* recorded after Brown's release from prison on drug charges, is a return to form that boasts a sharp new band and a classic sense of material. From there, Brown went mostly into repackaging—even in the movies, with Jackie Chan (!) impersonating him in *The Tuxedo.* He did record with his touring band, but despite some fine playing *The Next Step* clearly leads nowhere. —J.D.C.

Cowritten by Jackson Browne and the Eagles' Glenn Frey, "Take It Easy" pinpoints the attitudinal and musical changes taking place at the start of the '70s: "Don't even try to understand/Just find a place to make your stand/And take it easy." While the Eagles pursued the more hedonistic implications of that agenda, "trying to understand" is what Jackson Browne has always been about. Though he has focused on events in the world around him since the mid-'80s, Browne refined and perfected the role of the dark, sensitive singer/songwriter in the 1970s. He took the autobiographical charge of Joni Mitchell's early transmissions and raised the voltage. His philosophical slant endeared Browne to a generation of smart teenagers who'd read a bit and were asking Big Questions. Along with Mitchell, Jackson Browne served as a combination of bard, sex symbol, and intellectual mentor. Though both these L.A. troubadours also commanded sizable audiences among adults, their formative influence on subsequent singers and songwriters—not to mention other people—can't be overstated.

Browne's debut lays the groundwork for future heart-and-soul excavations. "Doctor My Eyes," an early hit single, communicates the subdued, subtle power of his half-spoken melodies, while "Rock Me on the Water" and "Song for Adam" foreshadow the free-ranging contemplation to come. *For Everyman* strikes a balance between the cool introspection of "I Thought I Was a Child" and "Sing My Song to Me" and the warm humor of "Ready or Not" and "Redneck Friend." David Lindley's loping slide guitar and arsenal of stringed instruments buoys Jackson's occasional slides into melancholy. "These Days," an FM-radio hit for Gregg Allman, stands as one of Browne's most intricately detailed emotional scenarios.

Late for the Sky strengthens and solidifies Browne's approach; it's the quintessential Browne album. The metaphorical complexity of "Fountain of Sorrow" and the clear-eyed poignancy of "For a Dancer" would be a tough act to follow; unsurprisingly, "The Fuse" and "Sleep's Dark & Silent Gate" (both from *The Pretender*) aren't quite as eloquent. They are effective, though; Browne's once-hesitant singing improves with each album. But even when his songwriting is sharp, the mellowing trend in his music dulls the impact. Browne eerily predicts the rise of the yuppie on *The Pretender*'s title track, only to have his point undercut by a creeping string section.

Just when it seemed that mellow inevitably turned to mush, Browne made good on all the singer/songwriters' claims to confessional integrity. At a time when the overdub-enhanced live double album was a rock commonplace, Browne released a real concert document. *Running on Empty* collects new material, previously unrecorded cover versions, motel jams, loose ends, rough edges, mistakes, and unexpected moments of triumph. The album exudes intimacy, revealing the empathetic, flexible bond between Browne and his audience.

Hold Out returned to the popification program begun on *The Pretender,* though even the catchiest ruminations (the title track and "Hold On Hold Out") don't sink in over time like Browne's thoughtful hooks of old. *Lawyers in Love* marked the singer/songwriter's transition from the personal to the political. The title track is a cutting slice of social observation, but the remainder of the album is muddled. For the first time, Browne seems unsure of himself. Interestingly, both Browne and Mitchell started writing topical songs in the mid-'80s. Browne has stuck with it. The subsequent albums convey his passion and commitment, though the well-intentioned broadsides and liberation anthems never quite connect with the musical setting: tasteful, state-of-the-art L.A. studiocraft. Little Steven Van Zandt's "I Am a Patriot," from *World in Motion,* is the only truly memorable song on Browne's trilogy of protest albums.

Fortunately, Browne left the politics behind on *I'm Alive,* returning to his forte: the personal joy and agony of day-to-day human interaction. Here, he deals with the various stages of a failed relationship, from the thrill of attraction (the reggae-tinged "Everywhere I Go") to post-honeymoon-period worry (the gentle "Too Many Angels") and, ultimately, the grief of breaking up (the piano-based "Two of Me, Two of You"). Browne continued his renewed introspection on *Looking East,* to slightly lesser success. Looser, warmer, and more live sounding than Browne's other recent work, *The Naked Ride Home* takes on domestic mysteries (on the title track) and political realities ("Casino Nation"), and is passionately crafted and sung.

Despite its subtitle, *The Next Voice You Hear* is not the best of Jackson Browne. Though it contains some of his most well-known album tracks ("These Days," "Fountain of Sorrow") and biggest hits ("Doctor My Eyes," "Lawyers in Love"), so much great material is missing—and too many weak songs appear on the collection—that it doesn't adequately represent his oeuvre. For a true overview, pick up the 32-song *Very Best of,* compiled by Browne himself. —M.C./M.K.

Bubba Sparxxx

★★★	Dark Days, Bright Nights (Beat Club/Interscope, 2001)
★★★★	Deliverance (Beat Club/Interscope, 2003)

Bubba Sparxxx (born Warren Anderson Mathis, in tiny Lagrange, GA) is the Ronnie Van Zant of rap. Like the scrappy late singer of Lynyrd Skynyrd, Mathis brings his background as a white, working-class Southern man into a popular new arena—in his case, hip-hop. Some critics initially dismissed Mathis' rural, country-tinged rap, just as some had scorned Skynyrd's gritty mix of blues, country, and '70s hard rock. Some people even summoned the tired old demeaning "redneck" term. But it's not lack of smarts that mars Bubba's first album; it's lack of a coherent vision and consistent delivery. He's not the most elegant rapper, but his topics—and the dazzling production of Timbaland (Jay-Z, Missy Elliott)—make up for his sometimes clunky rhymes. Bubba's concerns are as valid as Van Zant's, and when he lashes out at old prejudices about the poor, white South or conveys the fears of threatened factory workers, he joins a long line of proud, Southern-rock provocateurs. *Dark Days* delivered a hit with "Ugly" (#15 pop; #6 rap), but some pundits wrote off the Bubba/Timbaland partnership as a lesser clone of the Eminem/Dr. Dre dream team. It was a superficial comparison, but Bubba's hayseed video for "Ugly" also only reinforced the white-trash stereotypes his songs rose above.

Deliverance was a big step forward. The rapping is more assertive, the album more coherent. Bubba acknowledges the country and blues roots of his hip-hop without resorting to the disingenuous overstatement of Kid Rock. In "Nowhere," Bubba offers an allegory about coming from a rural backwater over a spooky mix of house-music vocals and hip-hop ambience. "She Tried" is the tale of a guilt-ridden cheater told over ancient Appalachian fiddles and contemporary beats. Timbaland incorporates Irish whistle, acoustic guitars, banjo, and pedal steel, but the instruments don't come off as mere novelty. On *Deliverance,* Bubba writes from his experiences growing up in the dirty South of the 1990s, but he also proves that he is, first and foremost, a legitimate rapper. —M.K.

Buck 65

★★★	Language Arts (1997; WEA, 2002)
★★★½	Vertex (1999; WEA, 2002)
★★★★	Man Overboard (2001; WEA, 2002)
★★★½	Synesthesia (2001; WEA, 2002)
★★★½	Weirdo Magnet (WEA, 2002)
★★★★	Square (WEA, 2002)
★★★★	Talkin' Honky Blues (V2, 2004)

Buck 65 (Richard Terfry) is a DJ/rapper from Nova Scotia who's not just underground, but off the beaten path. Or, as he puts it: "Street credibility: zero. Dirt road credibility: up the yin yang." But he became a legend in Halifax for his elemental beats, deft scratches, obscure dubs, and plainspoken but brainy rap, and he impressed Warner Music Canada enough to not just sign him but release his six-album back catalogue. Five are installments in the *Language Arts* series. The other, *Weirdo Magnet,* collects older tapes going back to 1988. While his music is often inventive, it mostly serves to set up his words: He tells amazing stories, waxes philosophical, obsesses over his craft, and on occasion exposes himself with radical honesty—although I'd bet against his having been in the Sex Pistols, and the only incontrovertible detail of his centaur tale is that he for sure has a complex mind. And while he can easily conjure up his former childhood, he can also project profound maturity and age; in short, he gives you much to think about. For example, on *Weirdo Magnet* he has a piece where he spouts unclichéd, unironic platitudes such as "the most expensive indulgence is hate/the most dangerous man is the liar."

The first *Language Arts* album is the most underground, with lots of scratches and a long pastiche at the end. *Vertex* is best known for "Centaur," about the trials of someone "built like a horse from the waist down," but he also goes shopping for records and announces, "the older I get, the more life starts to make sense, and the less I care." *Man Overboard* is richer melodically and more diverse, assuming many voices, but none more immediate than his own as he mourns his late mother, whom he never managed to take to Graceland, but whose pride motivated his music. *Synesthesia* (expanded in the 2002 reissue, and now listed as part five of *Language Arts*) is a darker, grumpier album, where he disavows the f-word and frowns on groupies and regrets that "you can't chop wood with an axe made of words," but it's also his densest, most rhythmic work. In *Square,* he returns more to storytelling: a heavy-handed man, "born with his heart on the outside," afraid to touch his loved ones; a stigmatized girl from his hometown; but it also features paeans to science and food, and admits that "sometimes dumb crimes blow my mind." *Talkin' Honky Blues* is even better, introducing a band replete with pedal steel for a richer sound that still serves primarily to set up the words of an older, more worn persona, "a road hog with an old dog," who boasts, "I run with the bulls and swim with the pool sharks." So he came from nowhere, but he's been around. He gets compared to DJ Shadow and Laurie Anderson, but he's so original you never know what's coming next. A major talent, but in his own words, "it's possible that I can be huge, but I doubt it." —T.H.

Lindsey Buckingham

★★★★	Law & Order (1981; Warner Bros., 1987)
★★★½	Go Insane (1984; Warner Bros., 1991)
★★★★	Out of the Cradle (Reprise, 1992)

The fact that Fleetwood Mac's 2003 offering *Say You Will* began life as a Lindsey Buckingham solo album is something of a shame. Mac albums may sell like Big Macs, but Buckingham's solo ventures are rare, weirdly wonderful birds. While Fleetwood Mac's *Tusk* more than hinted at the guitarist's closet experimental tendencies, *Law & Order* is the first true glimpse of Buckingham unleashed, and the result is a meticulously crafted beautiful mess. The hit "Trouble" was irresistible bait; with a firm rhythmic assist from Mick Fleetwood on drums, Buckingham wraps an artfully strummed melody line around a seductive, breathless reverie. It's like listening to a long, sweet sigh. After that, *Law & Order* is an unruly, one-man-band grab-bag of McCartney-esque pop ("Shadow of the West"), doo-wop ("September Song"), and wickedly gleeful, oddball cheek ("That's How We Do It in L.A."). Remarkably, it never feels overly indulgent, as Buckingham matches every quirk with an equally inventive hook. The moodier *Go Insane* could use a little more of its predecessor's sense of organic fun, if only to counter that distinctly '80s synth-and-drum-machine chill and the slump that sets in after the strong opening triptych of "I Want You," "Go Insane," and "Slow Dancing." *Out of the Cradle*, by contrast, is Buckingham at his most sublime, almost to a fault. Buffed to a flawless, sparkling sheen, it's essentially an album of transcendent pop lullabies ("Don't Look Down," "You Do or You Don't") for the middle-aged, with a few snarling, paranoid nightmares ("Wrong") thrown in for good measure. How catchy is it? Suffice to say, had Mick Fleetwood and Co. snatched this baby from Buckingham's cradle, the '90s might have sounded a lot more like the late '70s. —M.C./R.S.K.

Jeff Buckley

★★★★	Live at Sin-é (Columbia, 1993)
★★★★★	Grace (Columbia, 1994)
★★½	Sketches for My Sweetheart, the Drunk (Columbia, 1998)
★★★	Mystery White Boy (Columbia, 2000)
★★★★	The Grace EPs (Columbia, 2003)
★★	Songs to No One: 1991–1992 (Knitting Factory Works, 2002)
★★★★	The Complete Live at Sin-é (Columbia, 2003)

Jeff Buckley's voice had supernatural shapeshifting powers—he could sing like angels in rapture one minute and moan with the anguished deprivation of '60s soulmen the next, or lash out like an ornery cornered cat. The son of iconoclastic folkie Tim Buckley, the singer, songwriter, and guitarist became a rock figure to watch on the basis of just a scruffy EP (*Live at Sin-é*) and then one full studio album, 1994's transcendent *Grace*. After struggling with various versions of the followup, which he'd tentatively titled *My Sweetheart, the Drunk*, Buckley finally began recording in Memphis during the spring of 1997, only to drown in the Mississippi River in late May. He was 30.

Buckley didn't rush into the record business. Setting up shop first in Los Angeles and then New York, he kicked around in several bands and collaborated with all kinds of musicians—among them Captain Beefheart guitarist Gary Lucas, with whom he formed Gods and Monsters and cowrote "Mojo Pin" and "Grace," both represented in demo form on the mostly dreary set of experiments entitled *Songs to No One*. His early New York tenure, captured on the acoustic-guitar-based *Live at Sin-é* EP and a new expanded two-disc set, reveals an introspective bent and a penchant for fitful vocal improvisations that show the influence of qawwali master Nusrat Fateh Ali Khan, Van Morrison, and, of course, his father.

Buckley's maturation as a vocalist was nearly complete by the time he recorded *Grace*, which features a full band and finds him fully inhabiting songs that glance toward Led Zeppelinish mysticism (the slow-building "So Real," the grandiose and gorgeous "Mojo Pin") or the hushed intimacy of the post-Dylan troubadours (a cover of Leonard Cohen's "Hallelujah"). The gorgeously recorded album, which made many critics' 10-best lists, led to nearly a year of constant touring with an increasingly hard-rocking band; the erratic *Mystery White Boy* captures the outfit at its most coherent. The *Grace EPs* collect material Buckley recorded during the sessions for *Grace;* two of them, *Peyote Radio Theater* and *So Real*, were intended as promo-only items, and each of the others contains at least one track from *Grace*. Gems include extended live versions of "Mojo Pin," Leonard Cohen's "Hallelujah," and Van Morrison's "The Way Young Lovers Do," all revealing different facets of Buckley's gift for rapturous vocal improvisation.

Buckley wrote lots of songs after *Grace*, obviously in pursuit of a slightly different sound. He convinced Television's Tom Verlaine to produce him, and the two demoed coy, inventively experimental versions of the songs—the best of them begin the odd, inevitably erratic two-disc *Sketches for My Sweetheart, the Drunk,* which gathers material from several different sessions and eras. Verlaine abandoned the project well before its completion; Buckley was in the midst of rerecording the material he'd concocted with Verlaine, as well as newly written songs, when he died. —T.M.

★★★	Live at the Troubadour, 1969 (Rhino, 1994)
★★★	Honeyman (Manifesto, 1995)
★★★½	Morning Glory: The Tim Buckley Anthology (Rhino, 2001)

Dreamily handsome, possessed of a genuine, if eccentric, poetic gift, capable of singing a veritable choir of voices, and brandishing an archetypal romantic sensibility, Tim Buckley was a sort of late-'60s folkie Coleridge—overwhelmed by the gods with too many gifts. His work was as ambitious as that of any of his contemporaries: It was also a commercial disaster. His fatal overdose in 1975, however metaphorically apt, was a tragedy—and for a long time even the Buckley myth was an obscure one, as most of his records had gone out of print.

With such curious instrumentation as bottleneck guitar, harmonium, kalimba, and the vibes that would become a Buckley trademark, *Goodbye and Hello* drew critical raves for its meandering beauty, willful vision, and strange grace. Somewhat psychically akin to Van Morrison's *Astral Weeks* and Leonard Cohen's earliest work, this was orphic, amorphously lovely stuff. With titles such as "Phantasmagoria in Two" and "I Never Asked to Be Your Mountain," the record's lyrics recalled Wallace Stevens, and Buckley's voice seemed almost a little mad in its dramatic versatility (he sounds alternately like a child, a crone, and a straightforwardly expert folk singer). With his tone poems extending to 10 and 12 minutes on *Happy/Sad,* the songs soared past any verse-chorus-verse structure; this was abstract expressionism of a rare bravery. So were Buckley's next three albums, with the jazzy *Starsailor* being that cluster's standout. Perhaps frustrated with his cult status, Buckley then veered wildly—*Greetings from L.A.* was rock, of a sort, and *Look at the Fool* was desperate (his voice sounds like a croaking Al Green, and the record funks around to no purpose). In his glory hour, however, Buckley was a solid live performer who flourished in concert, and both *Dream Letter* and *Honeyman* are outstanding. The mid-'90s witnessed a welcome revival of interest in the singer, largely due to the arrival of his son, Jeff, yet another brilliant talent, who also, sadly, died young. —P.E.

Buffalo Springfield

★★★½	Buffalo Springfield (Atco, 1966)
★★★★★	Buffalo Springfield Again (Atco, 1967)
★★★	Last Time Around (Atco, 1968)
★★★	Retrospective (Atco, 1969)
★★★★½	Box Set (Rhino, 2001)

Creative tension between Stephen Stills, the highly proficient craftsman, and Neil Young, the erratic, extreme genius, produced, in Buffalo Springfield, one of America's best '60s bands. Simultaneously more of a mainstream musical pro and more of an unexamined hippie than the idiosyncratic Young, Stills sang declamatory vocals and played tremolo guitar on "For What It's Worth," a 1967 Top 10 hit decrying the Sunset Strip riots in which flower children faced off the police. Young's standout from the debut was the characteristically ambitious "Nowadays Clancy Can't Even Sing" with its surreal poetry and keening vocals.

Potentially nearly an American Beatles, the supergroup employed orchestral arrangements, four-part vocals, Wild West mythmaking, unrivaled instrumental prowess—and a fertile internal explosiveness along the lines of the Who's. Stills' finest hour came with the band; "Bluebird" and "Rock & Roll Woman" find him a stronger singer and more versatile guitarist than he's ever been since. And in Buffalo Springfield, Young tried out not only such bravura cinematic fare as "Broken Arrow," but premiered the artful naiveté of "I Am a Child," its resonant simplicity paving the way for his solo hits.

The other members were hardly slouches. Rhythm guitarist Richie Furay's "Kind Woman" served as a blueprint for the refined country rock he'd later make with Poco. Bassist Jim Messina would join Furay in Poco, and then pair with Kenny Loggins in one of the '70s' biggest soft-rock acts. The band's twin peaks, of course, would fitfully collaborate again in Crosby, Stills, Nash & Young—an inflated Springfield that, for all its musical achievement and countercultural significance, lacked the buoyancy of its prototype.

Only two years after its dazzling start, the Springfield was just a memory. But a memory that lingers: Rock & roll this expert and melodic would prove hard to find in the years to come. The group's legacy was aptly served by the 2001 release of the plainly named *Box Set.* The 88-song/four-disc compilation includes 36 unreleased tracks, the highlight being bare-bones acoustic demos of several of the Springfield's greatest moments. —P.E./G.F.

Jimmy Buffett put his adopted hometown of Key West on the map with a deep catalogue of albums that found him adding a Caribbean lilt to his country- and folk-based songs. His subject matter—neatly summed up in the definitive box set *Boats, Beaches, Bars & Ballads*—illuminated a subtropical state of mind that found favor with fans of margaritas and sunsets. No matter that much of Buffett's audience works from nine to five in their daily lives; his songs offer companionable escapist fantasies, while his legendary live performances served as mobile Floridian beach parties. Buffett's fans—the colorfully attired "Parrotheads"—have become as much a part of the cultural landscape as the man himself.

Buffett got his start in Nashville, recording a pair of overlooked and now long out-of-print albums—collected on the 1993 album *Before the Beach*—before making a southerly change in latitude. A former journalist and history major, Buffett unassumingly puts his literate background to good use. His story-songs resonate with sharp observations; his travelogues include a strong sense of time and place; his shaggy-dog tales stay on the leash. And most important, he applies his wry sense of humor to his brand of counterculture hedonism, even as he celebrates it.

He found his voice as a transplanted Floridian in the early '70s with *A White Sport Coat and a Pink Crustacean* and *Living and Dying in 3/4 Time.* The beautiful "Come Monday," from the latter album, established him on the pop charts, and that plainspoken ache and quiet melody still cut deep. Both albums mix chunky little bits of honky-tonk and Western swing into Buffett's defiantly left-of-center sensibility.

Then followed a string of albums on which Buffett created his very own beachgoing post-hippie subculture. If you closed your eyes, you could practically hear the palm trees swaying on *A1A,* his highwater mark as a recording artist. *A1A* (named after Florida's coastal highway) introduces the seafaring theme on cuts like "Trying to Reason With Hurricane Season," "A Pirate Looks at Forty" and "Nautical Wheelers." Buffett captures the lazy serenity of a steamy late summer day on "Life Is Just a Tire Swing."

Changes in Latitudes, Changes in Attitudes made him a superstar, thanks largely to "Margaritaville"—the first Top 10 hit of Buffett's career and something of a national anthem for the figurative Conch Republic (i.e., those who live in Key West or wish they did). The sound is breezy, Caribbean-scented soft rock, but the self-recriminating edge is pure country: "Some people say there's a woman to blame/but I know it's my own damn fault." After that flash of insight, Jimmy Buffett began retreating to his own personal "Margaritaville"—lost in a pleasant, unchallenging haze where he began to sound a bit routine. His last essential albums were 1979's *Volcano* and 1981's *Coconut Tele-*

graph. With *Somewhere Over China,* Buffett sounded for the first time like he was treading water.

Much of the rest of Buffett's '80s output is music that only a Parrothead could love. There were a few high points, such as the fan favorite *Floridays* and *Hot Water,* on which he attempted to stretch himself as a songwriter. Along the way came a nice single-disc compilation, wryly titled *Songs You Know by Heart: Jimmy Buffett's Greatest Hit(s);* a near-definitive twofer, *Meet Me in Margaritaville: The Ultimate Collection;* and the smartly compiled box set *Boats, Beaches, Bars & Ballads.*

Of course, there also have been plenty of live albums: *You Had to Be There* (1978), *Feeding Frenzy* (1990), *Buffett Live: Tuesdays, Thursdays, Saturdays* (1999). In 2003, on his own Mailboat label, he released four intact concerts, raw and uncut, for Parrothead degustation. But Jimmy Buffett is not the Grateful Dead. Even longtime fans questioned the sound quality and the point. Let's just say that you had to be there.

Buffett did great business on the road in the '90s and beyond, but as a songwriter he seemed to have lost a compelling voice. *Fruitcakes, Barometer Soup,* and *Banana Wind* are solid and craftsmanlike, but still a few mangos shy of a load. At least when he did get around to cutting the inevitable Christmas album *Christmas Island,* he managed to throw in some left-field twists, such as Chuck Berry's "Run Rudolph Run" and John Lennon's "Happy Xmas (War Is Over)." And his 1998 collaboration with Herman Wouk, which resulted in the musical *Don't Stop the Music,* showed an admirable sense of adventure. Coming from the man who put Key West on the map, *Don't Stop the Carnival* displays surprising candor in unveiling the conflicts and tensions that underlie the superficial enchantments of life on a tropical island.

By the time of 2002's *Far Side of the World,* he was back to preaching to the choir and largely making his mark as a staple of summer shed tours. And then Jimmy found his mojo again: In 2004 Buffet cut his first overtly country album and was rewarded with his first #1 album. Given that the contemporary C&W crowd freely embraced the Eagles and Fleetwood Mac, it's no surprise that a reflective singer/songwriter with a party-hearty streak like Buffett should find favor as an icon, too. *License to Chill* is a case of a mature artist getting his second wind. To his credit, Buffett made the move on his own terms, adapting country music to his folky, Floridian style rather than the other way around. Steel drums, slide guitar, marimba, and endless references to the good life on or near the water comfortably bob alongside fiddle, steel guitar, and his duettists' twangy voices. The result is a union of sensibilities best described by the title of a Buffett original: "Conky Tonkin'," a droll slice of life about a pair of rootless party mavens "headin' down U.S. 1" to (where else?) Key West. —P.P./M.C.

Built to Spill

Doug Martsch

★★★★	Now You Know (Warner Bros., 2002)

The American indie rock scene of the 1990s didn't produce many guitar heroes, but Doug Martsch, leader of the Boise, ID–based collective Built to Spill, definitely qualifies. Following the trail first blazed by Neil Young and Dinosaur Jr's J Mascis, Martsch (the only person to play on every Built to Spill record) is equally comfortable with intricate textural overdubs and unhinged fuzz-o-rama soloing. He also sings in a Neil Young–ish whine and writes clever, cutting songs. In short, he's a talent more people ought to know about.

Built to Spill's opening gambit, *Ultimate Alternative Wavers,* is out of print but worth hunting down for the noisy catharsis of "Revolution" and "Nowhere Nothin' Fuckup." More restrained and more focused, *There's Nothing Wrong with Love* shines brightest in the quiet moments; the wayward backing vocals and slide guitar on "Cleo" lend extra charm to the lyrics, sung from the perspective of Martsch's then-newborn son. A rambling EP cut with the help of another Boise band, Caustic Resin, is for fans only, as is *The Normal Years,* a collection of early singles and outtakes.

Thanks to a major-label production budget, *Perfect From Now On* is Built to Spill's tightest-sounding album yet, though the songs are still discursive: "Stop the Show," for instance, starts with an ominous, vaguely flamenco three-minute intro, morphs into loud, snotty rock, turns right on a jangle-and-chime hook, then left for a gut-busting lead. *Keep It Like a Secret* is punchier and poppier, boasting delightful hide-and-seek tunes such as "Center of the Universe" and "Time Trap." It's probably the best initial buy for new listeners. *Live* is a raw and energetic concert record that boasts plenty of Martsch's guitar-o-rama wailing and a 20-minute-plus version of Young's "Cortez the Killer."

Ancient Melodies sticks to the *Secret* formula, with hardly less impressive results. Martsch's excellent first solo album, *Now You Know,* emphasizes his acoustic slide playing, but leaves just enough room for a trademark wah-wah freakout on "Impossible." —M.R.

LTJ Bukem

★★★	Mixmag Live! Continuous DJ Mix (1995; Moonshine, 1996)
★★★★	LTJ Bukem Presents Logical Progression, Level 1 (1996; Sire, 2001)
★★★	Progression Sessions Featuring MC Conrad (Good Looking, 1999)
★★★	Journey Inwards (Good Looking/Kinetic, 2000)
★★★★	Producer 01 (Good Looking, 2001)
★★	Producer 05: Rarities (Good Looking, 2002)

Twelve-inch single releases are dance music's real medium, not albums, so it should not be surprising that LTJ Bukem (a.k.a. Danny Williamson) has released only one "real" album of new material thus far in his career. However, his influence on the genre of drum-and-bass music—as an artist, label head, producer, remixer, and DJ—is immeasurable.

Drum and bass, initially termed "jungle," exploded in the clubs of London in the early '90s and Bukem was one of its earliest proponents. By taking the form's skittering breakbeats and melding them with a blend of funk grooves and spacey synths, he was creating a more atmospheric and soulful style than his peers, who opted to explore the music's darker edges with colder, more metallic digital soundscapes.

As head of his own label group, the Good Looking Organization, Bukem has released countless compilations of his roster's material (ranging from the more straight-ahead drum and bass of his Good Looking and Looking Good labels to the more ambient-funk-driven *Earth* and more soulful *Cookin'* series), but none more important than *Logical Progression, Level 1,* a landmark drum-and-bass album showcasing tracks of his own and a host of other like-minded artists and future drum-and-bass superstars, including Peshay, PFM, and ILS. A fantastic introduction to the genre, not only did it signal a fresh, more musical direction for drum and bass at the time, but it continues to serve as a blueprint for many of today's drum-and-bass artists. This ranks alongside Goldie's debut, *Timeless,* as perhaps one of the two most important drum-and-bass releases of the decade.

Increasingly, Bukem was finding space within this inventive and futuristic new style of electronic music to incorporate the music of his teenage idols, '70s jazz-funk fusioners such as Herbie Hancock and Beastie Boy faves Lonnie Liston Smith and Roy Ayers. This was most in evidence on his double-CD solo album. *Journey Inwards* was just that: thoughtful compositions with Rhodes keyboards, nature sounds, female vocals, drifting synths, and wah-wah guitar all giving life to the stiffer programmed beats while paying homage to his influences. It made for a much more organic, instrumental, and downtempo collection than his previous output.

The *Mixmag Live* DJ set is an early statement of intent from Bukem but, as it was not widely released at the time, serves more as a historical document now than anything. The *Progression Sessions* series showcases GLO artists in a more exciting live-mix setting with Bukem on the turntables and sidekick MC Conrad freestyling (more singing than rapping) over the top. The MC is a common feature in live drum-and-bass club sets but, unless you're looking to re-create a Sunday night out in Brixton (and despite Conrad's prowess), it does tend to distract from an otherwise superb tune selection.

The other two all-Bukem albums, *Producer 01* and *Producer 05,* collect his numerous single releases and are both very good, but the first stands out on account of such early classics as "Music" and the once-hard-to-find "Demon's Theme." Fans may also want to seek out the Bukem-compiled *Points in Time* and *Looking Back* series. —D.S.

Solomon Burke

★★★★	If You Need Me/Rock 'N' Soul (1963, 1964; Collectables, 1998)

★★★★	Don't Give Up On Me (Fat Possum, 2002)
★★★★	Got to Get You Off My Mind and Other Hits (Rhino, 2003)

When Solomon Burke won a Grammy Award for his 2002 album *Don't Give Up On Me,* it was an honor both well deserved and long awaited. Even during his peak commercial years during a seven-year stint with Atlantic Records in the '60s, Burke was hardly a top-drawer soul star, although his fans were legion and devoted. But it seemed like someone was always bigger, always stealing the headlines, whether it was his friend Sam Cooke (whose death was the inspiration for Burke's easy-rolling 1965 hit, "Got to Get You Off My Mind") or more flamboyant contemporaries such as Otis Redding and Wilson Pickett. But Burke kept his nose to the soul and gospel grindstone, staying close to the music he felt in his heart, cutting a bunch of exemplary records, some of which earned rave reviews but were no longer suitable stylistically for the mainstream of contemporary black music.

But *Don't Give Up On Me* couldn't be ignored as a statement, even if its commercial potential seemed limited. In his younger days Burke could sound startlingly like Nat "King" Cole or Brook Benton, master crooners both; nowadays, the sexagenarian artist emotes in a gruff, husky tone, occasionally rising into sandpapery shouts when he really gets into testifying from the soul music pulpit. The weight of the years in his voice, and the intensity of his identification with a song's story line, bring an immediacy and urgency to every performance on *Don't Give Up On Me.* Producer Joe Henry did right by the aging Burke, ditching full-bodied Southern soul arrangements for an austere approach, backing the artist with a small combo of guitar, bass, piano/keyboards, and drums/percussion, supplemented by the rich, churchy organ of Rudy Copeland, who handles those same duties in Burke's own church. The assembled musicians do work themselves into a churning, edgy froth once in a while—most effectively on a lowdown, bluesy treatment of Bob Dylan's bitter "Stepchild"—but the dominant mode is deep introspection framed by subdued support. The stark landscape suits Burke to a tee, and he digs into some gems supplied by Van Morrison ("Fast Train," "Only a Dream"), Nick Lowe ("The Other Side of the Coin"), Brian Wilson and Andy Paley ("Soul Searchin'," the most overt foray into R&B in Wilson's history), and Tom Waits and Kathleen Brennan, whose expressions of streetwise pragmatism in the rich gospel tones of "Diamond in Your Mind" is not only the highlight of the album but one of the stellar interpretive moments of Burke's entire career—a truly towering performance of breathtaking feeling.

But to those who had been following the Philadelphia-born Burke's career lo these many years, *Don't Give Up On Me* was an unsurprising show of strength: He's been doing this sort of thing pretty much since he stepped into a recording studio in 1955 to cut "Christmas Presents from Heaven" for the Apollo label. At that point he was already a boy wonder on the gospel circuit, not as a vocalist but as a real live preacher who was actually billed as the "Wonder Boy Preacher," and could be heard delivering his sermons on radio as well. He dressed in regal garb—a king's crown and rhinestone-studded cape—worked himself and his flock into a lather, then wowed 'em with a rousing gospel number to bring it all home.

Signing with Atlantic in the early '60s, he was teamed variously with producers Jerry Wexler and, most successfully, Bert Berns. Over the course of seven years, Burke ranged across his entire musical vocabulary, cutting classic Southern soul with full-throttle rhythm and horn sections and shouting female gospel singers in the background, as well as gospel, pop, and especially country—his first crossover hit was a beautiful, crooning version of the country song "Just Out of Reach (Of My Two Open Arms)," which peaked at #24 in 1961. Possessed of a keen social conscience, Burke also cooked up what he thought would be an empowering project for the black community in the wake of segregation's end, in the form of a super summit called the Soul Clan. This musical group was to have been composed of soul stars Burke, Wilson Pickett, Otis Redding, Don Covay, and Joe Tex, and its aim was to take profits from a planned album and reinvest them in black neighborhoods, building good housing and rehabilitating local businesses so that blacks wouldn't abandon their own communities for the better-appointed white-dominated business districts and neighborhoods. Alas, the group's demand for a $1-million advance was dismissed out of hand by Atlantic, Redding was killed in an airplane crash, and Pickett bowed out. Arthur Conley and Ben E. King joined up, but the sole fruit of this labor was a single, "Soul Meeting," and then Soul Clan receded into history.

The glorious years on Atlantic are well documented, although much remains out of print. Still, the essential recordings, singles and album tracks alike, are pretty much all available, but not in one place. A great starting point is Rhino's double-CD, 40-track collection, *Home in Your Heart: The Best of Solomon Burke,* which contains the five pop hits (apart from those already mentioned, these include "If You Need Me," "Goodbye Baby [Baby Goodbye]," and "Tonight's the Night"), a moving country-soul take on Mel Tillis' "Detroit City," and a frightful, devastating account of the wages of bad love, "The Price" (the legend behind this one being that Burke improvised the lyrics onstage shortly after being served with divorce papers). At 16 tracks, another Rhino entry, *The Very*

Best of Solomon Burke, suffers by comparison, but all of the hits are here as well as the Soul Clan single, "Soul Meeting," which is not on *Home in Your Heart.* For a look at what Burke was really up to, check out the Collectables twofer combining 1963's *If You Need Me* and 1964's *Rock 'N' Soul* albums. The former's title song was a #37 pop single and the latter leads off with 1964's #33 pop hit, "Goodbye Baby (Baby Goodbye)," but go deeper into the disc, and there's Burke's blistering, self-penned self-condemnation, "Stupidity"; two fine country numbers, "I Really Don't Want to Know" done as a saloon song and a heartbreaking interpretation of the Jim Reeves hit "He'll Have to Go"; a sensitive reading of the Lloyd Price–penned, Little Richard–recorded "Send Me Some Loving"; and even a lively stab at Woody Guthrie's "Hard Ain't It Hard."

Since leaving Atlantic in the late '60s, Burke has bounced from label to label, with mixed results leaning toward the positive. For a while he returned to the gospel fold, with his tenure on Savoy producing the best work in that vein. The Savoy albums are by turns fire and brimstone and soothing and meditative, with the message always coming through loud and clear no matter the approach. Burke's two Rounder albums brought him back to the secular world. *Soul Alive* is a live album that catches him in one of his most expansive moods, ranging across a typically broad spectrum of material. *A Change Is Gonna Come,* a studio album, is a spotty attempt at updating Burke's sound. When it works, it's mesmerizing—his take on "A Change Is Gonna Come" is given added resonance by the overwhelming sadness in Burke's delivery, a sadness no doubt composed of equal parts mourning over the loss of his friend Sam Cooke and despair over the title sentiments ever applying in a profound way to the black community. *Proud Mary: The Bell Sessions* documents Burke's 1969–70 stint on the Bell label, notable mainly for a fiery cover take of John Fogerty's "Proud Mary," which was a soul chart hit. At this point Burke was making a more aggressive move to incorporate some rock glide in his stride (viz, "Proud Mary" and a bonus track featuring a fairly fierce cover of Bob Dylan's "The Mighty Quinn"), but otherwise he clings to his soul and gospel sensibility with the likes of Otis Redding's "These Arms of Mine" and Marvin Gaye's "I'll Be Doggone," and tips his hat to country with a powerful "She Thinks I Still Care." The one misstep in recent years is 1996's *The Definition of Soul.* This is a heavily produced, ham-handed attempt at social commentary a la latter-day Bo Diddley that is no more successful than Diddley's and almost as embarrassing. You don't have to get too far into the proselytizing album opener, "Why Can't We Come Together," before it's apparent that Burke is out of his element. Saving grace: the teaming with Little Richard on "Everybody's Got a Game," because the famous Mr. Penniman makes everything better whenever and wherever he shows up. None of this foretold the coming of *Don't Give Up On Me,* though, which ought to be a template for more great work to come as Burke ages most gracefully. —D.M.

T Bone Burnett

★★★	Truth Decay (Takoma, 1980)
★★★½	Trap Door (Warner Bros., 1982)
★★	Proof Through the Night (Warner Bros., 1983)
★★★	T Bone Burnett (Dot, 1986)
★★★★	The Talking Animals (Columbia, 1988)
★★★	The Criminal Under My Own Hat (Columbia, 1992)

A terrific songwriter but a terrible sermonizer, T Bone Burnett—back in the days before he devoted himself to producing such rootsy soundtrack albums as *O Brother, Where Are Thou?* and *Cold Mountain*—made albums that offer an intriguing, sometimes maddening mixture of roots-oriented rock and high-minded rant. His first album, *Truth Decay,* is a solidly melodic, rockabilly-based outing that gets a little ham-fisted with its message (as in his the-devil-is-an-adman number, "Madison Avenue") but keeps the music light and lithe. Amazingly, *Trap Door* uses the same band but offers a completely different sound, which at its best—"Hold On Tight," say, or "I Wish You Could Have Seen Her Dance"—has all the chiming effervescence of a latter-day Byrds album. The production values are even higher on *Proof Through the Night,* which brings in a passel of high-profile guest musicians (Ry Cooder, Mick Ronson, Richard Thompson, Pete Townshend), but the high-gloss sound doesn't much help the material, which ultimately collapses under the weight of its bitterly pedantic lyrics.

Burnett throws a curve ball with *T Bone Burnett,* a conventional country album that's wonderfully well-sung but a tad too low-key. *The Talking Animals,* on the other hand, not only finds him returning to rock & roll but also regaining the ground lost with *Proof Through the Night* through wickedly funny songs such as "Image," a tango in four languages, or the dementedly Pirandellian "The Strange Case of Frank Cash and the Morning Paper." But *The Criminal Under My Own Hat* found his writing again falling prey to cleverness and studio gloss, which may explain his subsequent focus on production work. —J.D.C.

R.L. Burnside

★★★★	Mississippi Delta Blues (Arhoolie, 1967)
★★★★½	Raw Electric (Inside Sounds, 1979–80)

★★★★	Mississippi Hill Country Blues (Fat Possum, 1984)
★★★½	Bad Luck City (Fat Possum, 1991)
★★★★	Too Bad Jim (Fat Possum, 1994)
★★★★	A Ass Pocket of Whiskey (Fat Possum, 1996)
★★★½	Come On In (Fat Possum, 1998)
★★★★½	Wish I Was in Heaven Sitting Down (Fat Possum, 2000)
★★★½	Well Well Well (Fat Possum, 2001)
★★★★	Burnside on Burnside (Fat Possum, 2001)

After a 30-year career spent in near obscurity in small-time northern Mississippi juke joints, R.L. Burnside was "discovered" by Fat Possum Records in the late 1980s, for which he's recorded a series of traditional blues sides as well as rowdy, remarkably experimental works that are credited with inspiring all kinds of punk blues, from the Jon Spencer Blues Explosion to the White Stripes.

A farm laborer, Burnside learned the blues from his neighbor Mississippi Fred McDowell, and was first recorded in 1967 *(Mississippi Delta Blues)*. That record led to a string of festival appearances and the development of his first bona fide band, which included members of his large family on guitar. Burnside's growly intensity was first heard by rock audiences in 1991, when Fat Possum released *Bad Luck City*. The subsequent *Too Bad Jim*, recorded at the club of another important rural-blues belter, Junior Kimbrough, is even more intense—its droning modal harmonies providing the perfect backdrop for Burnside's hectoring, woeful-but-not-pitiful incantations.

Breakthrough comes with *A Ass Pocket of Whiskey*, recorded with the Jon Spencer Blues Explosion, and the subsequent blues-meets-loops odyssey *Come On In*, experiments that prove it's possible to expand even the most raw, primal blues. Along the way, Burnside has made several hauntingly spare acoustic records, including the uniformly good live document *Burnside on Burnside*. Since attaining a national profile, several reissues of work he did in the '80s have surfaced—among them *Mississippi Hill Country Blues*, recorded in 1984, and the incredibly energetic *Raw Electric*. —T.M.

Bush

★★★½	Sixteen Stone (Trauma/Interscope, 1994)
★★★½	Razorblade Suitcase (Trauma/Interscope, 1996)
★★	Deconstructed (Trauma/Interscope, 1997)
★★½	The Science of Things (Trauma/Interscope, 1999)
★★	Golden State (Atlantic, 2001)

Bush was the grunge heartthrob of 1995, an unlikely blend of punk guitars, perfect cheekbones, and the shakiest American accents to cross the Atlantic since Tim Roth in *Reservoir Dogs*. Nobody gave a toss for these Londoners at home, but millions of Americans inhaled the teen-spirit aroma emanating from lead singer Gavin Rossdale, a grunge sexpot with eyelashes you could hang Christmas tree ornaments on. Gavin had a bruised, boyish ache in his voice that made him sound gorgeously tormented, while his band plowed efficiently through the loud-quiet-loud Seattle songbook. Hipsters complained that Bush was just a mishmash of Nirvana and Pearl Jam, but if we had had any idea how much uglier rock radio was about to get, we all would have appreciated Bush for the excellent singles band it was, especially "Glycerine," "Mouth," and "Machinehead." "Swallowed," from the Steve Albini production *Razorblade Suitcase*, remains one of the '90s' great forgotten hits, an anguished power ballad wherein Gavin yowls, "I'm here with everyone/And you're not." The hits stopped coming, but Rossdale remained in the public eye as one of the few male rock stars of his time to trade on sex rather than violence, while also serving as elbow candy for No Doubt's Gwen Stefani. —R.S.

Kate Bush

★★★	The Kick Inside (EMI America, 1978)
★★	Lionheart (EMI America, 1978)
★★★	Never for Ever (EMI America, 1980)
★★★	The Dreaming (EMI America, 1982)
★★★	Kate Bush (EP) (EMI America, 1983)
★★★★	Hounds of Love (EMI America, 1985)
★★★★	The Whole Story (EMI America, 1986)
★★★★	The Sensual World (Columbia, 1989)
★★★	The Red Shoes (Columbia, 1993)
★★★★	This Woman's Work Anthology 1978–1990 (EMI import, 1998)

Eccentric and idiosyncratic, Kate Bush's work is an odd offshoot of English art rock, capturing much of its spirit while avoiding the worst of its instrumental indulgences. Despite an occasional flash of pop accessibility, her early efforts are easily dismissed. *The Kick Inside*, with its effusive arrangements and parade of dead lovers, seems almost a parody of rock romanticism; *Lionheart* was a rush job, and sounds it; *Never for Ever*, though stylistically adventurous, is undercut by uneven arrangements. Eventually, Bush discovered digital synthesis, and with it constructed a universe better suited to her songs. Unlike her early albums, the sound of *The Dreaming* and *Hounds of Love* is as focused as it is fantastic, lending credibility to her witches, sorcerers, and demon lovers. After *The*

Whole Story, a greatest hits collection, Bush jettisoned such juvenalia altogether; though her music maintained its sense of aural adventure, she addressed herself assiduously (if less affectingly) to more mature (and markedly feminine) material in *The Sensual World* and *The Red Shoes. This Woman's Work,* an import-only box set, surveys her pre-*Sensual World* output with the completist ardor of a devoted fan; objective, it is not. —J.D.C.

Busta Rhymes

★★★½	The Coming (Elektra, 1996)
★★★½	When Disaster Strikes (Elektra, 1997)
★★★½	Extinction Level Event (The Final World Front) (Elektra, 1998)
★★★	Anarchy (Elektra, 2000)
★★★★	Total Devastation: The Best of Busta Rhymes (Rhino, 2001)
★★★½	Genesis (J, 2001)
★★★½	It Ain't Safe No More (J, 2002)

Woo-hah! Busta Rhymes is hip-hop's Godzilla, a fire-breathing giant whose marketable cuddly side has kept him perpetually serialized in apocalyptic-themed blockbuster albums; no matter their overblown conceits, they always deliver a few of the spine-tingling moments that had attracted you in the first place. Rhymes was still a teenager when he moved from his Flatbush, Brooklyn, birthplace to Long Island, where he formed the group Leaders of the New School with high school chums Dinco D, Charlie Brown, and Cut Monitor Milo. The group delivered two albums: the exuberant *A Future Without a Past . . .* (Elektra, 1991), which featured Busta's pillowy ode "Feminine Fatt," and *T.I.M.E.* (Elektra, 1993), the darker, semi-sci-fi brainfreaker. Public Enemy's Chuck D was the one who gave Busta Rhymes the handle, and Busta's energetic rhyming and wacky chuckle were obviously inspired by Flavor Flav. When Busta stole the show with his dragon impersonation on A Tribe Called Quest's "Scenario" in 1993, solo stardom was a given.

With his Cheshire cat perma-grin and medusa head of dreads, Busta's manic microphone antics have proved impressively durable. Each of his albums spawned at least one hit single (though often more), from "Who-hah!! Got You All in Check" off *The Coming,* straight through to the ridiculous, lascivious "Make It Clap," from *It Ain't Safe No More.* His singles, which function like memorable action sequences from Hollywood blockbusters, burst with sonic special effects layered over classic grids of funky drums and tight bass loops. And then there's Busta, a sex-craved comedian nearly hyperventilating as he finds yet another catchy way of saying not much at all ("Hit you with no delayin' so what you sayin', yo? Silly with my nine milly, what the dilly yo?" from the 1997's "Put Your Hands Where My Eyes Could See"). An absolute master of the club-bangin' anthem (often to an absurd degree; the P. Diddy party jam "Pass the Courvoisier" took things to a new level of decadent product placement), Busta has stayed in microwave rotation on TV and radio for nearly a decade. As he once rapped, "Gotta listen to how radio be playin' us/30 times a day make you delirious." The Flipmode majordomo's presence was definitively captured in Hype Williams' clip for the Janet Jackson duet "What's It Gonna Be?" None of Busta's albums are essential, and while Rhino's 18-cut best-of is superior (it includes two Leaders of the New School tracks), his recent releases have rendered it out-of-date. —P.R.

Butthole Surfers

★★	Humpty Dumpty LSD (Latino Bugger Veil, 2002)

Gibby Haynes

★★★	Gibby Haynes and His Problem (Surfdog, 2004)

Actors often complain that comedy is hard and doesn't get much credit when it's time to pass out the awards. One can make the same case regarding the Butthole Surfers, a band beloved and much deciphered by those who got the joke (and got beyond the joke) while those who didn't went no further than the name. Beyond the joke, the Buttholes were always crazy in frightening, fractured ways reminiscent of folk art by some wacked-out peasant trying to warn his neighbors about the looming catastrophe of . . . what?

Beyond the psychosis, there was a unique amalgam of alienation from and affection for American culture. They pursued sensuous guitar tones and new noises with an acid-fueled fervor as their lyrics erased the coordinates of whatever cosmos you thought you were inhabiting. People who fit nowhere else in the world found a home at their unique live shows.

Many musicians have been Buttholes over the years. The center of the band has always been vocalist Gibby Haynes and guitarist Paul Leary, who became friends at Trinity University in San Antonio in the late '70s; King Coffey has laid down the tribal drumbeat under their psychedelic explorations almost from the beginning. Touring relentlessly on the punk circuit from their home base in Austin during the '80s, they plowed all their money back into the band, buying obsolete and bizarre electronics to record some of the most original music in rock history.

Their first and second EPs on Alternative Tentacles are now combined on *Butthole Surfers Live/PCPEP,* released on their own label, Latino Bugger Veil. Sometimes called *A Brown Reason to Live,* the first EP is still fall-on-the-floor funny, though slightly dated in its pop-culture references. The vision is there, the sound not quite in place yet. The second EP is sort of a joke as a live reprise of their first EP (it being a tad early for a greatest-hits collection), but it is interesting to hear Leary's Dionysian guitar come into its own in a club setting.

Their first full-length, *Psychic . . . Powerless . . . Another Man's Sac* (originally released on Touch and Go), is about as good as psychedelia gets this side of Hendrix. Haynes figures out what to do with his not-naturally-great voice by running it through a bullhorn and various effects boxes that add new dimensions of mystery to his surreal lyrics, while the band careens from chaos to grooved riff-bashing with occasional moments of crystalline beauty. If you're not hooked by "Cherub," a study in atmospheric feedback and psychotic ranting, you're probably just not going to get the Buttholes.

Rembrandt Pussyhorse (the CD also includes their EP *Cream Corn from the Socket of Davis*) has hilarious covers of "American Woman" (dig the supercompressed drums) and the theme from *Perry Mason,* two versions of their angst epic "Creep in the Cellar," and the tribute to demented old bluesmen "Movin' to Florida." *Locust Abortion Technician* opens with "Sweat Loaf," more and less a cover of Black Sabbath's "Sweet Leaf" that was always a frenzied high point of their live show and proceeds as a tour through all levels of metaphysical discombobulation. *Hairway to Steven* never spelled out the song titles, but you can sorta figure them out from the drawings and lyrics, and Gibby gets real intense about seeing an X-ray of a girl passing gas and reaches a peak with his wordplay in the mini-opera "Johnny Smoke."

The sound quality on *Double Live* is subpar, but the album does approximate the BHS concert experience. Leary's uniquely fluid guitar bashing and Haynes' hypersonic satire on popular culture (check out his obscene take on Jim Morrison at the beginning of "Sweat Loaf") will make your knees go weak if you heed the advice on the back cover, "VERY LOUD IT PLAY." As one of the biggest underground acts in the country, the Buttholes decided to go the overground, corporate route in the '90s, signing with Capitol in hopes of wider distribution. The results were varied. *Pioughed* has some good moments but doesn't quite reach the extremes of inspiration and surprise of its predecessors (best joke: "No, I'm Iron Man"). Produced by Led Zeppelin bassist John Paul Jones, *Independent Worm Saloon* is as close as the Buttholes ever came to producing a punk album. "Who Was in My Room Last Night?" was a high-velocity minor hit with a good video, but "Goofy's Concern" had the better chord progressions and made a rare political statement in the midst of a lot of nihilism ("I don't give a fuck about the CIA").

Electriclarryland contains the Buttholes' sole major radio hit, "Pepper," as close to a perfect song as they'd ever write: great hooks in verse and chorus, wonderfully eerie production (by Paul Leary), and Haynes doing a shell-shocked monotone rap about all his demolished and/or dead friends. After recording an aborted album, *After the Astronaut,* for Capitol, the Buttholes rerecorded much of it for Hollywood as a new album, *Weird Revolution.* The title track, a Malcolm X parody, calls for solidarity among the weird to resist the injustice of the straight man. "The Shame of Life," written with Kid Rock, is a dirge rap that sorta celebrates and sorta mourns the rock lifestyle. Funniest cut: "Shit Like That," a rant about your life falling apart. Big hit that somehow didn't get recorded right: "Intelligent Guy." Overall it was their best album since the '80s, but it didn't quite connect with the public as the band toured after 9/11.

The Hole Truth . . . and Nothing Butt! has live odds and ends; *Humpty Dumpty LSD* offers demos and recording-studio odds and ends. Both will make fans happy but aren't the place to begin if any of the above intrigues you. —C.M.Y.

The Buzzcocks

★★★★	Spiral Scratch (EP) (New Hormones, 1977)
★★★★	Another Music in a Different Kitchen (UA, 1978)

★★★½	Trade Test Transmissions (Caroline, 1993)
★★★	All Set (IRS, 1996)
★★	Modern (Go-Kart, 1999)
★★★★	Buzzcocks (Merge, 2003)

In Britpunk's class of '77, the Buzzcocks were the horny, goofy, slightly baffled guys sitting in the back of the room, unsure whether to hide their boners, show them to the person sitting next to them, play with them, or what. So they wrote razor-sharp pop songs about all the feelings (some complicated, some not) that brought said boners about, played 'em fast and rough (the songs, not the boners, but the brilliant "Orgasm Addict" is about both) and became punk's ultimate three-minute heroes, inventing and perfecting a catchy/fast dynamic that would inspire garage bands for decades.

Howard Devoto and Pete Shelley brought the Sex Pistols to Manchester in 1976, forming their own band with drummer John Maher and bassist Steve Diggle around the same time. This lineup lasted all of one EP, the iconic *Spiral Scratch,* one of the very first DIY, self-released punk singles. It's a hot and wired four-song blurt, but you can already hear brainiac Devoto's mind wandering. He soon split to form the also excellent but far artier Magazine. (*Time's Up* is a collection of Devoto-era sessions that finally saw legit release in 1991.) Guitarist Shelley started to sing, Diggle moved to guitar, some guy named Garth played bass and suddenly the Buzzcocks were a world-historical pop force. If you can buy only one Buzzcocks album, make it *Singles Going Steady,* an anthology of post-*Spiral* 45s. It's packed with twitching, tuneful song after twitching, tuneful song about human relationships in all their frantic glory; "Orgasm Addict," "What Do I Get," "Ever Fallen in Love (With Someone You Shouldn't Have)," and "Noise Annoys" (which became the name and anthem of roughly 8 trillion college radio shows) are only the most famous cuts. The 16 cuts offer the sound of a band knowing that punk was about articulating desires directly and playing them like it was all they could do to keep from, well, exploding.

Other albums aren't nearly as well-known as *Singles,* but they're nearly as good. *Another Music in a Different Kitchen* rants and raves about being "lost without a clue." On "Sixteen," Shelley can't decide if he remembers that age with fondness or irony even when he's making out with someone that age, and "Fiction Romance" wobbles between hope and despair. At the heart of it all is, of course, desire. "I need sex/I need love/I need drink/I need drugs/I need food/I need cash/I need you to love me back," sings Shelley in "I Need." Well, yes, that about sums it up. *Love Bites* is the not-as-great followup. Clearly a guy who spends a lot of time in his own head, maybe Shelley likes "The Real World" and maybe he doesn't. "Ever Fallen in Love" is the clear highlight, but the rest bops along nicely.

A Different Kind of Tension closes out the first part of their career with a slightly heavier sound, more complex songwriting, and Shelley's ever more bummed visions of the world. "You Say You Don't Love Me" and the anthemic "I Believe" ("there is no love in this world any more") pretty much speak for themselves. Nowhere near done, the band broke up over a label conflict in 1981. *Lest We Forget* is a powerful live album with typically dicey ROIR sound; *Entertaining Friends* also has some howl to it. The astounding *Product* box set is long out of print, but contains pretty much every studio track they ever made until 1981. Surely, this slice of heaven can be found on eBay. If you can't find it, *Operator's Manual* is a tidy best-of, not quite as concise as *Singles Going Steady,* but with more album tracks.

Shelley and Diggle got back together in 1989 and released *Trade Test Transmissions.* Picking up exactly where they had left off, the songs address masturbation ("Palm of My Hand"), sorrow ("Who'll Help Me Forget?"), and love of all sorts. Time and production values have made the guitars bigger, but the tunes still careen across the room and hurl you their heart. *All Set* is more of the same, but *Modern* slips badly. This is Buzzcocks as plastic new wave, with electronic beeps and synth drums sprinkled around the guitar power. There are still great hooks (witness "Thunder of Hearts"), but *Modern* might as well have been named *1983.* In 2003, iconic American indie rock label Merge Records—whose flagship band, Superchunk, clearly committed every Buzzcocks song to memory—released *Buzzcocks.* Astoundingly, it's the finest album of their postreunion career. Twenty-five years after throwing their first spitball at an object of desire, Shelley and Diggle retain their wit, their obsession, the heart, their riffs, and their roar, every boner a perfect hook. —J.G.

The Byrds were one of the great '60s bands, evolving from sure-footed pop craftsmen to astral travelers with their own innovative style of guitar glimmer. Roger McGuinn was a folkie who'd gotten turned on to rock & roll when he saw the Beatles in *A Hard Day's Night,* and his chiming 12-string Rickenbacker sound became a permanent part of rock's musical language from the opening notes of "Mr. Tambourine Man." The Byrds' first big hits were covers, so they've been consistently underrated as a songwriting band, but Gene Clark, who mostly just stood around and banged a tambourine onstage, wrote some of the best tunes of the '60s. McGuinn, Clark, the pre-Stills, pre-Nash folkie David Crosby, bluegrass-bred bassist Chris Hillman, and pouty-lipped drummer Michael Clarke were the very definition of folk-rock exuberance, five mod California boys high on guitar power.

Mr. Tambourine Man is one of rock's greatest debut albums, with the frail, kindly, and basically anonymous voices weaving together in folkish harmonies to float in the sound, submerging the lyrics in a rush of pure electric energy. The attention getters were the Bob Dylan covers (particularly the title hit and an ace "Spanish Harlem Incident"), but actually, the most vital songs on the album are the Gene Clark originals such as "Here Without You," "I Knew I'd Want You," and "I'll Feel a Whole Lot Better." Like all the early Byrds albums, *Mr. Tambourine Man* benefits from the superb Columbia/Legacy reissue series, which presents definitive versions of each album with outtakes and singles; the prize on *Mr. Tambourine Man* is "She Has a Way."

Turn! Turn! Turn! was a hasty followup, but the band had plenty of material on hand, going back to the well for more Clark songs: the almost Lou Reed–like ramble "Set You Free This Time," the devastated drone "If You're Gone," the morosely uptempo "The World Turns All Around Her." As a sign of things to come, the band also did the country standard "Satisfied Mind," and, for some reason, "O Susanna." The Legacy reissue adds the essential B side "She Don't Care About Time."

Fifth Dimension is the Byrds' most underrated album. Clark was gone by this point, but the band made up for the holes in the songwriting by turning up the guitars. It's an album of bold, expansive machine-head psychedelia, mixing ancient Celtic folk standards ("Wild Mountain Thyme," "John Riley") with the space-age electric charge of "I See You" and "2-4-2 Fox Trot (The Lear Jet Song)." The groundbreaking hit "Eight Miles High" is the band's highest of highs, blending Coltrane-influenced 12-string squiggles with eerie harmonies for a truly hypnotic sound. And the lyrics are about airplane travel. Right! There's filler (a weak "Hey Joe," the inept R&B instrumental "Captain Soul"), but David Crosby contributes the catchily mush-headed "What's Happening?!?!" *Younger Than Yesterday* is a smoother version, with Chris Hillman bringing a straightforward country influence to "Time Between" and "Have You Seen Her Face." Unfortunately, the songs trail off halfway through, with Crosby's "Mind Gardens" a real monstrosity.

The Notorious Byrd Brothers was Roger McGuinn's attempt to make his own *Pet Sounds* or *Sgt. Pepper;* he missed, but with producer Gary Usher, he came up with a unique and powerful elegy for '60s idealism, overlooked at the time yet recognized as a classic now. It's ethereal, mournful, beautiful, hardly ever rocking, with a touching sadness in spaced-out melodies such as "Natural Harmony" and "Dolphin's Smile." "Goin' Back" is a great old Goffin-King ballad, originally a hit for Dusty Springfield, here remodeled into a farewell to the Summer of Love; "Draft Morning" is a Vietnam song that ends with McGuinn playing "Taps" on guitar. It's a very comforting album to put on when you're hungover.

For *Sweetheart of the Rodeo,* the Byrds became a totally different band, exploring the new frontier of country rock. New member Gram Parsons was the catalyst, as the band cut back on the electricity to embrace a rootsy sound of fiddle, banjo, and pedal steel twang, doing reverent covers of Merle Haggard and Louvin Brothers songs. *Sweetheart* peaks with a great version of Dylan's scary "Nothing Was Delivered," as well as the Parsons ballads "Hickory Wind" and "One Hundred Years from Now." Unfortunately, much of Parsons' singing was erased because of legal conflicts; the 1997 reissue restores the complete Parsons vocals for a definitive edition of one of '60s rock's most influential albums.

Sweetheart was the last of the Byrds classics. Parsons and Hillman left to form the Flying Burrito Brothers, who brought the country moves of *Sweetheart* to fruition with the 1969 masterpiece *The Gilded Palace of Sin.* Meanwhile, McGuinn assembled a new band and started making de facto solo records under the Byrds name. *Dr. Byrds* has "Drug Store Truck Driving Man," a showcase for guitar picker Clarence White. *Easy Rider,* the best of the later Byrds albums, has the oddly funky long-hair Jesus-freak anthem "Jesus Is Just All Right" and a beautiful reading of Woody Guthrie's "Deportee." The last gasps: the largely live double album *Untitled,* the studio-slick *Byrdmaniax,* the tired *Farther Along,* the failed reunion *Byrds. Preflyte* was a collection of pre–*Mr. Tambourine Man* acoustic sessions, with top-notch originals such as "Boston" and "The Airport Song." *In the Beginning* has largely different versions of this material; the complete collection, a must for fans, is Sundazed's *The Complete Flyte. Never Before* and the box set *Byrds* introduced many rarities, most now best heard on the reissued original albums. *Greatest Hits* downplays the band's weirdness, with too many Dylan covers, but still makes an excellent introduction, especially the expanded 1999 edition with the key album tracks "Have You Seen Her Face" and "Set You Free This Time." —R.S.

★★★½	Colours (Mute/Plastex, 1991)

Part of the problem with pioneering electronic acts is that the music they produce is often more influential than it is listenable. Take Cabaret Voltaire as an example. This duo was among the first rock acts to tie electronic dissonance to trancelike rhythms, and also to lead the way in the use of "found sound"—that is, taped snippets of TV preachers or police announcements that would later be incorporated as ironic commentary into the group's recordings. In fact, most of what has since been done to death by avant-garde dance-music groups like Revolting Cocks or Front 242 was done first by Cabaret Voltaire.

So why are so many of Cabaret Voltaire's albums so excruciatingly dull? Part of the problem is that the Cabs were frequently more interested in musical method than compositional content, meaning that the "how" of their music frequently outweighed the "why." Thus, most of the group's early output, from the primitive singles and live tracks collected on *The Living Legends . . .* to the densely layered textures of *3 Crépuscule Tracks,* is gratingly monotonous; *Three Mantras* is interesting for its Eastern influences and *Voice of America* has a few intriguing soundbites, but that's about as far as it goes. Things begin to change, though, with *Red Mecca,* on which the interplay between the synths and the percussion lends an exotic flavor to the music on "A Touch of Evil" and its ilk. There are also some interesting touches on *2 x 45,* particularly the sparring saxophones on "Protection" and the subtle Middle Eastern groove behind "Get Out of My Face." Still, it isn't until *Micro-Phonies* that Cabaret Voltaire is able to convert its interest in static structures into anything resembling conventional dance music. Although the melodic interest remains fairly limited, there's a surprising amount of pop appeal in the way Stephen Mallinder's vocals play off Richard H. Kirk's churning electronics on "Do Right" and the slow-churning "Spies in the Wires." Both *Drinking Gasoline* and *The Covenant, the Sword and the Arm of the Lord* further the advances made by *Micro-Phonies,* but it isn't until the hard, mechanical pulse of *Code* that Cabaret Voltaire finds the ideal balance between accessibility and menace; between the hard-edged funk of "Sex, Money, Freaks" and the clanking pulse powering "Here to Go," this is perhaps the duo's most exhilarating work. Strangely, from there the Cabs coast into predictability with the house-influenced *Groovy, Laidback and Nasty,* which sounds almost pop-friendly on tunes like the buoyant "Keep On (I Got This Feeling)." But *Body and Soul* returns the group to the brittle minimalism of yore, while the nastier moments of *Colours* manage to turn the beat-driven colorism of acid house into the musical equivalent of a bad trip. —J.D.C.

The Cadillacs

★★★ The Cadillacs Meet the Orioles (Collectables, 1991)
★★★½ For Collectors Only (Collectables, 1992)

The Cadillacs were a golden-age-of-doo-wop group who made a far greater impact than might be presumed from the group's lone national hit, "Speedo," a rocking ode to the title character—spirited lead singer Earl "Speedo" Carroll—and his skill with the ladies. Of all the vocalists who wore Cadillacs accoutrement through the years (and there were some good ones, notably Earl Wade, who had been with the Crystals and Opals; and Jim Bailey, who fronted an Earl Carroll–less configuration of the group and sang a sweet lead on the exuberant "My Girlfriend," a doo-wop standard), Carroll's personable singing always defined the group. As a balladeer Carroll stood out in a doo-wop field rife with formidable romantic crooners such as the Harptones' Willie Winfield, the Flamingos' Nate Nelson, the Moonglows' Harvey Fuqua, and the Orioles' Sonny Til; in fact, Carroll is front and center on one of doo-wop's legendary ballads, the ethereal "Gloria," the prototype of all New York–style slow grinders. Fueled by Carroll's distinctive vocal presence, the Cadillacs cut several fine love songs—"Zoom," "You Are," the lush "Tell Me Today," the eerie "Wishing Well," among others—that ceded nothing to any other group in the way of heart and soul, as the lead singer demonstrated his impeccable sense of nuance and control, caressing the high notes just so at the right moment, coming back soft and tender in other passages. But as group harmony gave way to new musical trends in the late '50s–early '60s, so did the Cadillacs finally call it a day.

Collectables' three-CD *For Collectors Only* anthology tells the Cadillacs' story pretty much in its entirety, from the group's first recordings for the Josie label ("Wishing Well," "I Wonder Why") to Carroll's final masterpiece, 1960's "Tell Me Today," with of course the original versions of "Speedo," "Gloria," and the landmarks mentioned above, as well as a bopping rendition of "Rudolph the Red-Nosed Reindeer" for all the Yuletide music buffs. As with too many Collectables releases, though, the liner notes offer a thumbnail group history but give short shrift to dates, and no shrift at all to session information of any kind. The closest thing to a hits compilation still in print is another Collectables title, *The Cadillacs Meet the Orioles,* which features six Cadillacs sides ("Gloria" and "Speedo" among them, of course) and six Orioles sides (including "Crying In the Chapel"). —D.M.

Café Tacuba

★★★ Café Tacuba (WEA, 1992)
★★★★ Re (WEA, 1994)
★★★ Avalancha de Exitos (WEA, 1996)
★★★★ Reves/Yosoy (Warner Bros., 1999)
★★★★ Tiempo Transcurrido: The Best of Café Tacvba (WEA, 2001)
★★★ Vale Callampa (MCA, 2002)
★★★★½ Cuatro Caminos (MCA, 2003)

This Mexico City quartet isn't just one of the more daring and creative bands of the rock en español movement, it is one of the more daring and creative bands to come out of any country during the alternative-rock boom of the 1990s. Café Tacuba's idiosyncratic collision of modern pop styles (from rock to hip-hop and electronica) with Latin folk traditions (including mariachi, *ranchera, tejano, banda,* and samba) is unlike anything in rock's rich, colorful history. Despite Café Tacuba's eclecticism and innovative use of instrumental textures, this music doesn't come off as schizophrenic. The group's distinctive sound is funneled through the grainy vocals of dynamic frontman Rubén Albarrán, who sings with a bratty punk sneer at one moment and a gentle coo the next.

After forming in the late 1980s, Café Tacuba released its self-titled debut on WEA Latina. On that album, the band did what many Mexican rock acts of the time were doing: mixed elements of British and U.S. rock, new wave, ska, funk, and hip-hop with Latin styles and lyrics sung in Spanish. But Café Tacuba's interpretations of Anglo pop didn't sound as dated and copycatted as the music of fellow Mexican rockers such as Maná or Caifanes. *Re* was an ambitious leap forward for Café Tacuba. The band continued experimenting with musical textures inspired by rock pioneers such as the Beatles, PiL, the Pixies, and even Ministry. The sensational *Re* set the tone for the band's eclectic stretches on subsequent albums. *Avalancha de Exitos* is a transitional collection that pays cockeyed tribute to an array of Latin artists with inventive interpretations of some unlikely hits. Café Tacuba puts cello and a sizzling techno foundation to the Mexican rock band Botellita de Jerez's "Alármala de Tos," a bright violin to Dominican merengue superstar Juan Luis Guerra's "Ojalá Que Llueva Café," and a loopy indie-rock feel to "Cómo Te Extraño Mi Amor" by Mexican pop crooner Leo Dan.

As inventive as Café Tacuba had already proved to be, no one could have predicted the ambitious sound of the double-disc *Reves/Yosoy,* a gorgeous fusion of styles that includes one disc of song-based pop and rock and another of instrumental music. Collaborating with New York contemporary-classical ensemble the Kronos Quartet, the *Reves* disc flows from minimalist soundscapes that conjure the film scores of Ennio Morricone to clattering electronica and musique concrète.

When Café Tacuba switched from WEA to MCA, the band not only got better North American distribution but also delivered its most focused album to date. That's not to say *Cuatro Caminos* isn't equally as eclectic as anything the band had done before. Working with producers Dave Fridmann (Flaming Lips) and Andrew Weiss (Ween), as well as longtime cohorts Gustavo Santaolalla and Anibal Kerpel, *Caminos* careens from the brutish postrock swagger of "Eo" and "Recuerdo Prestado" to the hypnotic melodicism of "Eres" and the Beatles/Zeppelin–style Middle Eastern touches in "Hoy Es." An absolute beauty.

The four-song *Vale Callampa* is an odd but delightful tribute to the Chilean band Los Tres and includes the Brian Wilson–inspired harmonies of "Olor a Gas." *Tiempo Transcurrido: The Best of Café Tacuba* is the band's contract-ending compilation for WEA, collecting the Latin American hits from its first four albums; it's an excellent place to begin a journey into the music of this outstanding band. —M.K.

Cake

★★★½	Motorcade of Generosity (Volcano, 1994)
★★★½	Fashion Nugget (Volcano, 1996)
★★½	Prolonging the Magic (Volcano, 1998)
★★	Comfort Eagle (Columbia, 2001)

Whenever the music industry is at a loss for trends, novelty artists prosper. And so, the mid-'90s were predictably ripe with one-off jokes—still smarting from the emotional hangover of grunge, radio listeners wouldn't look a gag gift in the mouth. But despite Cake's quirky surface—singer John McCrea's deadpan delivery and Vince Di Fiore's oddball mariachi trumpet initially sounded like a put-on—the members of Cake weren't the one-dimensional wise guys their humorous singles suggested. As the surface of their songs became familiar, the humor faded to reveal a sense of pathos so strong, it was a wonder it remained concealed for so long.

That humorous sheen enabled Cake to discuss matters Modern Rock often ignored. *Motorcade*'s "Rock 'n' Roll Lifestyle," for instance, mocked trust-fund scenester rebels, surreptitiously examining class relations right there on the radio for all to hear. The album's lyrics also twisted clichés, as with "You think she's an open book/But you don't know which page to turn to." *Fashion Nugget* is better still, distinguished by a broad taste in covers: In addition to a moving cover of "I Will Survive," Cake also exhumes Willie Nelson's "Sad Songs and Waltzes" and anticipates the Cuban-music revival with the Havana dance-band standard "Perhaps, Perhaps, Perhaps."

The title of *Prolonging* was a good joke but a bad lie. The magic was gone, leaving competence in its wake. Offering fewer quirks, the newer songs seem emotionally overripe or intellectually strained. Yet Cake proved honorable even in its decline. The band could have dragged on forever as a novelty act. After all, Weird Al Yankovic hasn't told a half-decent joke since before Lil' Bow Wow was born, and it may take total nuclear annihilation, or at least an act of Congress, to stop him. —K.H.

★★★	Live (Narada, 2001)
★★★	In Session (Classic, 2003)
★★★★	To Tulsa and Back (Sanctuary, 2004)

In addition to Eric Clapton's slightly stodgy hit versions of "After Midnight" and "Cocaine," J.J. Cale has been covered by everyone from Lynyrd Skynyrd and Bobby "Blue" Bland to Spiritualized, a disparate array of acts encompassing British blues, Southern boogie, sweet soul, and space rock, reflecting the inherent adaptability of Cale's great songs. And although his star shines brightest as a songwriter, Cale's own studio work was often superior to the more popular cover versions of his songs. His mellow declaration "Call Me the Breeze" (covered by Skynyrd and Johnny Cash) is perhaps best described as a shuffle in loose shoes, exemplifying a narcotized, countrified state of being that sounds utterly effortless, Cale's trademark. Born

Jean-Jacques Cale (no relation to Velvet Underground's John Cale) on December 5, 1938, in Oklahoma City, J.J. soon moved to Tulsa, where he began playing in clubs in the 1950s with his own band, Johnny Cale & the Valentines.

Cale's early career included a three-year mid-'60s residence in Los Angeles, which included a brief stint playing with Delaney and Bonnie and a membership in California psychedelic band the Leathercoated Minds, whose album, *A Trip Down the Sunset Strip,* appeared in 1967. Cale returned to Tulsa in 1967. Clapton got hold of a Cale demo and turned "After Midnight" into a smash hit in 1970. With that boost, Cale made his debut, *Naturally* (an album whose cover depicts a grinning, top-hat-toting raccoon), inaugurating a career-spanning string of fine, stylistically similar albums. An especially good set of Tulsa-fied roots rock, 1979's *5* features the overdue-for-a-vacation groover "Let's Go to Tahiti" and "Mona," a gorgeous tune with great work from bassist Carl Radle (who also played on Clapton's *Layla* sessions). On songs like 1983's "Losers" (about the "exclusive club that we're in"), Cale's lyrics had something of the wry bonhomie of Warren Zevon.

In a somewhat peculiar turn in 1990, Cale landed with British label Silvertone, then home to Manchester's baggy champs the Stone Roses, and released *Travel Log,* a gem with lock-tight grooves courtesy of bassist Tim Drummond and drummer Jim Keltner. Cale underwent a subsequent unexpected renaissance when Widespread Panic began playing his songs, and if bemused by the jam band's noodlesome onanism, he appreciated the new fans.

To Tulsa And Back, from 2004, was Cale's first set of new songs in eight years. It was originally conceived as a collaboration with his original producer Audie Ashworth, but when Ashworth passed away, Cale made an album that retained the intended flavor: typically languid, typically excellent. —P.R.

John Cale/Brian Eno

★★★★	Wrong Way Up (Warner Bros., 1990)

John Cale/Lou Reed

★★★½	Songs for Drella (Sire, 1990)

With his classical training, devotion to the '60s avant-garde, and arty slumming in the Velvet Underground behind him, John Cale could put on imposing airs for an early-'70s fringe rocker. He soon made his mark as a producer, working with Nico, the Stooges, Patti Smith, and the Modern Lovers. He collaborated with minimalist Terry Riley. He recorded his own hip neoclassical music as *The Academy in Peril* and knocked off two albums of enigmatic songs, *Vintage Violence* and the often beautiful *Paris 1919.* He played everything from bass to harpsichord to viola and had a rare knack for building songs that seemed equally balanced around piano and guitar.

In 1974, he returned to England and hooked up with Brian Eno, performing a terroristic rendition of "Heartbreak Hotel" on the Island Records showcase *June 1, 1974.* He stuck with Eno and Island for three albums, which are his main claim to being a godfather of punk rock: the paranoid "Fear Is a Man's Best Friend," the extended guitar antics of "Gun," the nasty revelry of "Dirtyass Rock 'n' Roll," the fury of "Guts," and the unbridled hysteria of "Leaving It Up to You"—the last shocking enough for Island first to suppress the song, then to feature it on the *Guts* compilation. Those songs were last seen on *The Island Years,* a comprehensive two-CD set, but the period also fills up a quarter of Rhino's two-CD *Seducing Down the Door.*

Cale's '80s work wanders around a bit. The second CD of *Seducing* covers Cale's work up to 1990; out-of-print albums offer mostly slivers of past ideas, such as the exotic chant of "Chinese Envoy" and the live butchering of "Waiting for the Man." *Artificial Intelligence* is perhaps the best of the '80s albums, another set of oblique songs with arresting rhythm figures, like "Dying on the Vine" and "Satellite Walk."

And in the '90s, Cale wanders even more, working on soundtracks, dance music, tributes, collaborations (including a brief Velvet Underground reunion), and all sorts of odds and ends. The duet albums with Brian Eno *(Wrong Way Up)* and Lou Reed *(Songs for Drella)* are perhaps more reflective of Cale's partners but rank among his better work. In *Fragments of a Rainy Season,* Cale reprises his songbook, performing solo, most impressively on piano. *Eat/Kiss* is quasi–film music that Cale wrote for revivals of two Warhol films; the set is characteristically eclectic and includes one of Cale's spoken pieces performed in the tradition of "The Gift."

Cale's most interesting recordings are his least recent: a set of mid-'60s experiments that are mostly beatless, minimalist avant-garde noise. For instance, *Day of Niagara,* with La Monte Young, was built around an amplified viola drone that anticipated the Velvet Underground's sound, if none of the music; in retrospect, the album seems like an even less funky preview of Lou Reed's famous *Metal Machine Music.* The *Inside the Dream Syndicate* discs have far greater musical variety; *Stainless Gamelan* is rather enjoyable, starting with a 10-minute piece of percussive Cembalet, then devoting almost 30 minutes to a surrealist soundscape allegedly concerned with Mozart and Joseph Conrad, and spending eight minutes on a cha-cha with a soprano sax improvisation that sounds like something you might imagine Evan Parker and Han Bennink were doing when they were teenagers. In the end, Cale's attraction to the avant-garde was the same as his attraction to punk—he's made a career of subversion, and all that classical training has served him well. —T.H.

★★★½	12" Collection and More (Mercury, 1999)
★★	Sexy Sweet Thing (Universal/Private Eye, 2000)
★★½	The Millennium Collection (Mercury, 2001)
★★★★	Cameo Anthology (Mercury, 2002)

Cameo has been funking around since the mid-'70s, somehow stumbling into the sort of career in which hits anthologies have begun to outnumber studio albums. Starting out as 10-piece-plus, P-Funk-styled R&B band and ending up, many albums later, as a three-piece, techno-intense brain trust, Cameo parallels the evolution of R&B from show-oriented bands to studio-based recording projects.

Many of the band's early titles are out of print, and it's just as well: Only a hard-core funk fiend would find much interesting in the derivative grooves fueling *Secret Omen* (1979) or *Alligator Woman* (1982).

She's Strange is another story entirely. Although most of the album is given over to run-of-the-mill funk tunes, "Talkin' Out the Side of Your Neck" is brash, brassy, and angrily politicized (anti-Reagan), while "She's Strange" augments its groove with dreamy, atmospheric synths and vocals that walk the line between rap and soul. With its title tune, *Single Life* expands impressively on the synth-and-rhythm combination "She's Strange" introduced, building the verse around a tension-building six-note bass riff and grounding the chorus with a whistling synth hook swiped from Ennio Morricone's *The Good, the Bad and the Ugly.* From there, it's just a simple step to *Word Up!* and "Word Up!," which uses a strikingly similar rhythmic strategy—another bass-driven verse, the same Morricone lift—but ups the impact by tying it to a stronger melodic idea. More important, *Word Up!* doesn't come off as an album's worth of B sides surrounding one good single; between the rap-flavored "She's Mine" and the jazzy "Back and Forth," the album is irresistible from beginning to end.

That's hardly the case with *Machismo,* which seems too concerned with production technique to deliver much in the way of melodic interest. *Real Men . . . Wear Black* and *Emotional Violence* may find the band getting back to basics, but there isn't enough melodic interest to make its beefed-up grooves worth celebrating. After that, any album not involving a reissue isn't worth the bother.

So, on to the various hits compilations. Details matter; *The Best of Cameo* is worth owning, *Best of Cameo* is not. With two discs affording genuine career breadth, *Cameo Anthology* is by far the best value for money. The discs, seemingly predicated on the assumption that any given fan really wants only two of the band's hits, shuffle which two you're likely to get. —J.D.C.

Camper Van Beethoven

★★★	Telephone Free Landslide Victory (1985; spinART, 2004)
★★★★	II & III (1986; spinART, 2004)
★★★½	Camper Van Beethoven (1986; spinART, 2004)

★★★	Vampire Can Mating Oven (EP) (Pitch a Tent/Rough Trade, 1987)
★★★★½	Our Beloved Revolutionary Sweetheart (Virgin, 1988)
★★★★	Key Lime Pie (Virgin, 1989)
★★★	Camper Vantiquities (IRS, 1993)
★★★★	Camper Van Beethoven Are Dead: Long Live Camper Van Beethoven (Pitch a Tent, 2000)
★★★½	Cigarettes & Carrot Juice (spinART, 2002)
★★½	Tusk (Pitch-a-Tent, 2002)

Fond of unexpected juxtapositions, arcane musical styles, and lyrical non sequiturs, Camper Van Beethoven stands as proof that a band can get away with almost anything provided it has a sense of humor and a way with melody. Admittedly, the Campers' initial success had more to do with the former than the latter, thanks to the wacky "Take the Skinheads Bowling," from *Telephone Free Landslide Victory.* But what kept the group from succumbing to the sort of novelty-act status accorded the Dead Milkmen or Mojo Nixon was its ability to surround its punch lines with artful, intriguing numbers like "Vladivostock" and "Balalaika Gap."

The group's second album, *II & III,* sharpened the music's focus by tightly integrating the various influences, leading to a sound one song aptly describes as "ZZ Top Goes to Egypt." Again, there's plenty of wit in the writing, as in the suburban satire of "(Don't You Go to) Goleta," but the Campers' obvious affection for country and folk idioms kept things from getting too glib. That didn't help much with *Camper Van Beethoven,* however, a more audacious outing that added multi-instrumentalist Eugene Chadbourne to the lineup and augmented relatively conventional tunes like "The History of Utah" with experimental efforts like "Stairway to Heavan (sic)." That combination, unfortunately, isn't quite as interesting as it sounds. (Camper Van Beethoven, or members thereof, collaborated with Chadbourne on two albums for Fundamental records, *Camper Van Chadbourne* and the live *Eugene Van Beethoven's 69th Sin Funny.* Both alternate between arty deconstructions of country music and seemingly directionless free improvisation.)

After an EP's worth of odds and ends (*Vampire Can Mating Oven,* which was later reissued with additional tracks as *Camper Vantiquities*), CVB moved to the majors, signing with Virgin. The box set *Cigarettes and Carrot Juice* compiles all its recordings to this point. The band's introduction to the mainstream was *Our Beloved Revolutionary Sweetheart,* easily its best effort. Because the songs make the most of the band's melodic instincts while somehow finding room for its stylistic quirks, *Sweetheart* is an ideal showcase for the Campers' quirky charms. *Key Lime Pie* falls short of that mark, but not by much; although the album's mood is much darker, there's still plenty of sparkle to the likes of "When I Win the Lottery" and "All Her Favorite Fruit." Sadly, the band broke up soon after; singer David Lowery pursued a career with Cracker, while guitarist Greg Lisher, bassist Victor Krummenacher, and drummer Chris Pedersen continued with their side project, the Monks of Doom.

In 1999, Lowery and the others reunited to assemble *Camper Van Beethoven Are Dead: Long Live Camper Van Beethoven,* a heavy reworking of old and unreleased material that, while not quite amounting to new music, amounted to more than just a dip in the vaults. They also released *Tusk,* a cover of the Fleetwood Mac album the group recorded "as a joke" between sessions for *Revolutionary Sweetheart* and *Key Lime Pie.* Sadly, they forgot to dub in the laugh track. —J.D.C.

Cam'ron

★★	Confessions of Fire (Epic, 1998)
★★	S.D.E. (Epic, 2000)
★★★	Come Home With Me (Roc-a-Fella, 2002)
★★	Diplomatic Immunity (Roc-a-Fella, 2003)

Cam'ron has recently found the platinum-level success he's long coveted, but he's no overnight sensation. The Harlem native started rapping with neighborhood cronies Mase (who would later find fame with P. Diddy and the Bad Boy family) and Big L (the legendary late MC of the Diggin' in the Crates Crew). After a brief association with Bad Boy, Cam dropped his first album in 1998, *Confessions of Fire.* His debut and its followup, 2000's *S.D.E.* (which stands for sports, drugs, and entertainment and gives you an idea of Cam's priorities), contain several rap radio hits, such as "Horse & Carriage" and "What Means the World to You," as well as some workmanlike uptown crime rap, but his popularity remained regional, a New York radio celebrity.

After a two-year break due to label disputes, Cam'ron found himself under the patronage of fellow Harlem rap entrepreneur Dame Dash and his Roc-A-Fella records imprint. *Come Home With Me* featured the hits "Oh Boy" and "Hey Ma." Cam's flow evolved into a brutally simple conversational style, eschewing lyricism for easily understood boasts and threats. While he may not be the most thought-provoking MC in the world, Cam's style has a charm all its own due mostly to his unapologetically controversial sense of humor. The production on *Come Home With Me* is exceptional, with beats provided by Roc-A-Fella in-house beatmakers Just Blaze and Kanye West. That disc was quickly followed by the solid if overlong *Diplomatic Immunity,* a group album by Cam'ron and his uptown crew, the Diplomats. —C.R.

★★★	Sacrilege (Mute, 1997)
★★½	Can Box (Spoon/Mute, 1999)

When Can (then known as the Can) debuted with *Monster Movie,* they seemed like a particularly strange psychedelic band: four hard-jamming Germans (with backgrounds in avant-garde classical music and jazz), fronted by a sandpaper-voiced black American, Malcolm Mooney. Nobody knew yet that they'd become the godfathers of the German experimental rock movement. Can didn't write songs in the usual sense; instead, they'd improvise for hours on end, rooted by drummer Jaki Liebezeit's crisp, inventive patterns, and then bassist Holger Czukay would edit the results down to their good parts. Michael Karoli's wailing, atonal guitar parts are wilder than almost any other psych band dared at the time, but their specialty is hitting a groove and staying there, as on the 20-minute lust letter, "Yoo Doo Right."

Delay 1968, recorded around the same time, is so good it's hard to believe it stayed in the, er, can for another 13 years. It's Can's most raucous and insistent record, with Karoli riffing harder than he ever would again, and Mooney's hoarse, off-key cries suiting its avant-garage vibe. (Radiohead has been known to cover "Thief" in concert.)

Mooney left in 1970, partway through a series of movie-music sessions, and was promptly replaced by Damo Suzuki, an itinerant freak from Japan who integrated his voice into the band's improvisations more than Mooney had. Most of *Soundtracks* sounds like the transitional album it is—gentle psych in the vein of some of the things Pink Floyd was doing around the same time—but the band shines on the extended one-chord freakout "Mother Sky," and Mooney gets in a quiet, jazzy one, "She Brings the Rain."

Tago Mago is Can's masterpiece, a double album with seven long, trippy pieces that were years ahead of their time. The vicious, stealthy crack of "Mushroom" became a standard at post-punk-era clubs; "Aumgn," an echo-crazed bad-trip showcase for Karoli and keyboardist Irmin Schmidt, sounded right at home in ambient chill-out rooms two decades later. And "Halleluhwah" is almost 20 minutes of a rib-crushing Liebezeit beat, with Suzuki and the rest of the band percolating along at full strength. A terser, somewhat calmer variation on the sound and style of *Tago Mago, Ege Bamyasi* (named after a can of okra) consolidated Can's fan following with the singalong "Spoon," which became a hit in Germany. Elsewhere, the amorphous experimental piece "Soup" shows off Czukay's chops as an editor, and Suzuki delivers terrifying pronouncements that probably made sense to him ("You are losing your vitamin C!"). *Future Days* sets its sights a little lower. Suzuki mostly sticks to the background, aside from a peculiar attempt at a pop song ("Moonshake"); the rest of the album is three long, dreamy pieces that suggest Can had been listening to electric-era Miles Davis (and are the closest they ever got to their "krautrock" scenemates Neu! and Kraftwerk).

Suzuki departed before *Soon Over Babaluma,* and Can found itself without a singer for the first time—from then on, Karoli handled most of their relatively rare vocals. The album is mellow and almost timid in places; Karoli had started playing violin as well as guitar, and Liebezeit mostly holds himself back to tippy-tapping beats. The one great exception is "Chain Reaction," whose swift, slamming pulse anticipates techno records of 20 years later. *Landed* starts strongly with the proto–new wave "Full Moon on the Highway," maybe the most conventional pop song Can ever recorded (it's still pretty weird), and gradually loosens up until "Unfinished" disintegrates into blurs of industrial noise.

Unlimited Edition—an expanded version of a limited-edition record from a couple of years earlier—compiles weird little sketches and outtakes from 1968 to 1975, including a handful of vocals by Suzuki and Mooney (the latter's "Connection" is a brief, punchy rocker), and the first five installments in the band's intermittent "Ethnological Forgery Series." Its centerpiece is the sprawling "Cutaway," an 18-minute cross-section of instrumental doodles that never quite gets off the ground.

Flow Motion spawned an actual hit single in the U.K., "I Want More," a stab at disco graced with a fabulous Karoli tremolo riff. Otherwise, though, the album is something of a mess: It sounds as if they wanted both to make a slick, commercial record (partly inspired by reggae) and to sabotage the attempt with woozy atonality. Czukay stopped playing bass after *Flow Motion,* and drifted out of the band (although he continued to edit their records); he was replaced by bassist Rosko Gee and percussionist Reebop Kwaku Baah from Traffic. *Saw Delight* has a few more curious disco experiments, including a long instrumental jam called "Animal Waves" on which Czukay plays a shortwave receiver, but you can smell the desperation for crossover success, and it doesn't suit them.

The leaden, meandering *Out of Reach* is dismissed by the band as a ghastly mistake, and they're right. Remarkably, they pulled it together one last time for the second half of *Can* (sometimes known as *Inner Space*), featuring the tense, jagged postdisco groove "Aspectacle" and a hilarious cover of Jacques Offenbach's kick-line classic "Can Can." Johnny Rotten, a huge fan, wanted to become their singer, but by that point they'd decided to quit while they were ahead.

In 1986, the original lineup of Can—including Malcolm Mooney—reunited for the sessions that became *Rite Time,* but they don't seem to have been too excited about them; the album didn't appear for almost three years. It's identifiably Can, and not embarrassing, but the old magic is absent, and Mooney bellows away without much relevance to what the band is playing. Skippable. Since then, the members of Can have continued to make occasional appearances on each other's records, and Karoli and Liebezeit toured in Damo Suzuki's band in the late '90s. Michael Karoli died of cancer in 2001.

The first *Cannibalism* compiles tracks from Can's first six albums (including three of *Monster Movie*'s four songs), lovingly sequenced and reedited by Czukay—it's not exactly a greatest-hits, but it gives a good sense of what they were up to. *Cannibalism 2* carries the story up through *Delay,* with Czukay abridging nearly every piece he includes and throwing in a few previously unreleased scraps. The third disc in the series actually isn't by Can: It's a collection from the four core members' post-Can solo records, and (aside from Czukay's perverse take on the East German national anthem, "Der Osten Ist Rot") mostly reveals how lost they were without each other to curb their excesses.

Sacrilege, 1997's remix collection, is mostly an excuse for Can's disciples—Sonic Youth, Brian Eno, the Orb, Carl Craig, and others—to show respect for their forefathers. They have some fun with the source material, but they don't exactly improve on it. *Can Box,* released to commemorate the band's 30th anniversary, contains a book, a video, and two CDs; the latter are decent but slightly dull live recordings from 1972, 1975, and 1977. —D.W.

Candy Butchers

★★★½ Play With Your Head (RPM/Sony, 2002)
★★★½ Hang On Mike (RPM, 2004)

If the voice of Candy Butchers leader Mike Viola sounds familiar, that's probably because you've seen the 1996 Tom Hanks flick *That Thing You Do!,* for which Viola cowrote and sang the title song. His own music isn't quite as shamelessly retro as that of the movie's fictional group the Wonders, but at times it's not far off, matching the sunny melodicism of Squeeze and Marshall Crenshaw with the sour lyrical attitude of early Elvis Costello and Graham Parker. *Play With Your Head* covers the power-pop angle splendidly, with occasional cute asides like the sitar riff on "My Monkey Made a Man Out of Me." The sound has gotten sparser and the lyrics seem more personal on *Hang On Mike,* but otherwise, it's more of the same, and nothing's wrong with that. Two earlier, out-of-print Candy Butchers releases, *Live at La Bonbonniere* (1996) and *Falling into Place* (1999), are worth the hunt if you like what's here. —M.R.

Canibus

★★★½ Can-I-Bus (Universal, 1998)
★★★ 2000 B.C. (Before Canibus) (Universal, 2000)
★★ C True Hollywood Stories (Archives, 2001)
★★ Mic Club: The Curriculum (Babygrande, 2002)
★★½ Rip the Jacker (Babygrande, 2003)

Hip-hop is a fickle biz, and battle rappers make enemies at a faster clip than most. Still, few MCs have seemed so determined to arouse bad will as Canibus. From L.L. Cool J, whom he savaged in his career-making single, "Second Round K.O.," to Wyclef Jean, whose eccentric production on *Can-I-Bus* he quickly disowned, Canibus lashed out against every collaborator who'd given him a leg up. His ferocious skill actually hampered his career—his bad attitude is emphasized by a clipped, snide delivery that makes every jibe sound personal. At least his albums will never be bogged down with the redundant guest spots that spoil so many hip-hop albums.

Following Canibus' series of explosive underground singles, hip-hop tastemakers declared his 1998 debut the most eagerly anticipated hip-hop album of the year, and tossed that disc aside, upon its release, as one of hip-hop's greatest disappointments. This was undeserved: The mix of Wyclef's glossy production and Bus' loony sci-fi-inflected paranoia is an odd one—it makes the Fugee's pop moves sound weirdly avant-garde and the MC's complex rhymes sound simpler than they are. But from the rock guitar track to the Roxanne Shante sample, *Can-I-Bus* was as wide-ranging as any hip-hop album to emerge from the late '90s.

Keeping an ear to the streets, Canibus lashed out against Wyclef's production on *B.C.*, a less ambitious and fairly decent followup. But by the time of *True Hollywood Stories,* Bus' wit seemed embittered. When he rescues Eminem's fan Stan from his car crash and invites the kid on tour, his assault on the more successful rapper seems as desperate a plea for attention as Stan's plunge off the bridge. As does his jibe at Jay-Z, "The only difference between me and you is a budget." The frothing, antiterrorist "Draft Me" turned out not to be an empty boast: Canibus ended up enlisting in the Marines, but as *Mic Club* and *Rip the Jacker* attest, that didn't make for better music. —K.H.

Canned Heat

★★★½	Living the Blues (1968; Akarma, 2001)

with John Lee Hooker

★★★★½	Hooker 'n Heat (1970; Capitol, 1991)
★★½	Hooker 'n Heat Live (1987; Rhino, 1990)
★★★★	The Best of Hooker 'n Heat (Capitol, 1996)

Canned Heat was the brainchild of Bob "The Bear" Hite, Al "Blind Owl" Wilson, and Henry "Sunflower" Vestine, a trio of Los Angeles record collectors and blues fanatics who came together in 1966 to put their passion into practice. These serious young men fancied themselves purists—after all, Vestine had been among the first '60s blues-heads to rediscover Skip James, and Wilson had played guitar with Son House. But like most white blues bands of the era, their value was not in how close they came to the traditional sources, it was in their unconscious mutation of those traditions. The demo collection *Don't Forget to Boogie* is the group at its most restrained, probably because it was recorded by Johnny Otis not long after they formed in 1966. Signed by Liberty following their appearance at the 1967 Monterey Pop Festival, Canned Heat was positioned to be something like a West Coast equivalent of the Butterfield Blues Band—zealous white blues missionaries.

Three-hundred-pound frontman Hite was the lead singer, but it was two of Al Wilson's occasional vocal turns that provided the band with an unexpected breakthrough. Wilson, whose brilliant slide and harp playing were the soul of Canned Heat, set his shaky falsetto against Vestine's mildly psychedelic guitar drone for a reworking of "On the Road Again," a Memphis Jug Band tune from the '20s. It became a left-field hit in the summer of 1968, followed months later by the even bigger hit "Going Up the Country," with a flute line so resolutely cheerful that Madison Avenue continues to license it decades later. It graced the third Canned Heat album, the double *Living the Blues,* a fan favorite because of the 20-minute jam "Parthenogenesis" and all 40:51 minutes of the immortal "Refried Boogie," both now unlistenable to all but the most committed Heat-heads. The entire *Future Blues* album takes less time than "Refried Boogie," but it may be the band's best. Harvey Mandel replaces Vestine on lead guitar, and Bob Hite finally gets his own hit with their version of Wilbert Harrison's "Let's Work Together." Wilson died shortly thereafter, but not before taking part in Canned Heat's 1970 sessions with boogie master John Lee Hooker. *Hooker 'n Heat* is credited to the band but belongs to John Lee; the version of "Burnin' Hell," with only Wilson's harp for accompaniment, is a career highlight. When the full crew joins in for extended workouts on "Peavine" and (of course) "Boogie Chillen No. 2," their unfettered hippie spirit allows them to follow wherever Hooker's famously eccentric timekeeping leads. With *Hooker 'n Heat,* the archivists made some blues history of their own. Highlights from this double CD are available as *The Best of Hooker 'n Heat.* The live volume, unfortunately, is from a night when their gears never quite meshed.

Canned Heat lost a lot of flair with Wilson's passing, but not its sense of mission. *Historical Figures* (with a Little Richard cameo), *New Age,* and *Human Conditions* were workmanlike efforts that did their best to ignore the deepening '70s. Not even Bob Hite's death in 1981 could derail this boogie train; the band has continued under the leadership of drummer Fito de la Parra, often with Vestine (until his death in 1997) and bassist Larry Taylor. But when people remember Canned Heat, it will be the original incarnation found on the hits packages *Best of, Cookbook, On the Road Again,* and the more expansive *Very Best of.* The two-CD *Uncanned!* has the right size canvas to offer a definitive portrait, but its failure to include either "Fried Hockey Boogie" or "Refried Boogie" is not likely to be forgiven by the hard-core. *Far Out* is a double that collects alternate takes and rarities; another double compilation, *The Boogie House Tapes,* is often of bootleg quality but is a completist's wet dream. *Live at the Kaleidoscope 1969* (a.k.a. *Live at the Topanga Corral*) is the recommended live document—Henry Vestine stakes his claim as one of the era's most underrated guitarists with his manic solo bursts on "Bullfrog Blues," while Alan Wilson actually breathes life into the Elmore James warhorse "Dust My Broom," a minor blues miracle. Despite contributions from Roy Rogers, Taj Mahal, and John Lee Hooker, *Friends* doesn't ignite. —B.E.

Cannibal Ox

★★★★ The Cold Vein (Definitive Jux, 2001)

Vast Aire

★★ Look Ma . . . No Hands (Chocolate Industries, 2004)

Manhattan hip-hop duo Cannibal Ox made a startling debut in 2001 with their album, *The Cold Vein.* On it, the uptown crew accomplished the mighty task of creating a whole new way to view inner-city life. Produced entirely by Definitive Jux chief El-P, MCs Vast Aire and Vordul crafted a startling world that resembled an impoverished Harlem as imagined by sci-fi writer Philip K. Dick. Over jagged beats laden with thick keyboards, Vast and Vordul kick clear-eyed rhymes of hope ("Atom"), despair ("Iron Galaxy"), and fond nostalgia ("A B-Boy's Alpha"). *The Cold Vein* is a testament to the independent creative spirit that fueled the best of underground hip-hop.

Sadly, Can Ox has yet to make a followup. In 2004, Vast Aire released a rather underwhelming solo debut. Despite the presence of top-notch producers such as Madlib and RJD2, the MC seems to have abandoned the mixture of sensitivity and toughness that made him so special. —C.R.

Capone-n-Noreaga

★★★★ The War Report (Penalty, 1997)
★★★ The Reunion (Tommy Boy, 2000)

Noreaga

★★★ N.O.R.E. (Penalty, 1998)
★★ Melvyn Flynt—Da Hustler (Penalty, 1999)
★★ God's Favorite (Universal, 2002)

The career arc of Queens-based rappers Capone and Noreaga mirrors the transformation of New York City mainstream rap from gritty representation of crime-riddled streets to glossy fantasies of the good life. The duo immediately distinguished itself with Capone's nasal delivery and clear-eyed vision of street life, coupled with Noreaga's often hilarious and nonsensical rhymes ("I run laps around the English Channel," is one of his choice lines). Their 1997 debut, *The War Report,* proved an instant sensation with songs like "L.A., L.A.," in which the two threw themselves into the fray of the East Coast/West Coast rap battles that were raging at the time.

The group faced adversity early on, when Capone was sent to jail before *The War Report* was released. With his partner in rhyme turning to crime, Noreaga released his first solo album, 1998's *N.O.R.E.* Noreaga's union with then up-and-coming producers the Neptunes was a kind of rap alchemy, collaborating on anthems like "Superthug"—and many more in the future. *N.O.R.E.* made Noreaga a viable solo act, but his followup, *Melvyn Flynt—Da Hustler,* is an unfocused let down, offering little humor and no exhilarating club track, perhaps due to the passing of Noreaga's father. In 2000, Noreaga reunited with Capone for the forgettable *The Reunion,* which lacks the chemistry of their debut. Noreaga, rechristened N.O.R.E., released *God's Favorite* in 2002, reteaming with the Neptunes for two stellar cuts, "Nothin' " and "Grimey," though the album was plagued by too many guest appearances from some of N.O.R.E.'s less talented cohorts. —C.R.

The Cardigans

★★★½ Emmerdale (1994; Minty Fresh, 1999)
★★★★ Life (Minty Fresh, 1995)
★★★½ First Band on the Moon (Mercury, 1996)
★★ Gran Turismo (Mercury, 1998)
★★ Long Before Daylight (Koch, 2004)

From a distance, the Cardigans fit all the adjectives usually heaped upon Swedish pop groups: Bubbly. Perky. Winsome. Cute. But this lounge-pop fivesome's world isn't all sweetness and light. Frontwoman Nina Persson's breathy, girlish voice may seem carefree, but the words she sings often carry a uniquely Scandinavian gloom, shadowing the corners of an otherwise sunny vista.

Graced with delectable retro production by Tore Johansson and packed with clever arrangements featuring such nonrock instruments as bassoon and vibraphone, *Emmerdale* hits its peak on a gloriously bizarre disco reinterpretation of Black Sabbath's "Sabbath Bloody Sabbath." Lyrics like "Symptoms are so deep/Something here's so wrong/Nothing is complete/Nowhere to belong" ("Sick & Tired") are worthy of grunge's sulkiest angst merchants but somehow never break the prevailing chipper mood.

Even more musically upbeat, *Life* improves on *Emmerdale* by showing off the tightness of the Cardigans' playing. More than just catchy tunes, "Hey! Get Out of My Way," "Fine," and the Motown-influenced "Tomorrow" are great grooves too. Twee? Sure. But "light" pop has rarely sounded this excited, or exciting. Consumer note: The U.S. versions of *Life* and *Emmerdale* share six tracks, including "Sabbath Bloody Sabbath."

First Band on the Moon contains the Cardigans' biggest hit, "Lovefool," which, typically, disguises the desperate plea of a jilted lover as a lively neo-Blondie dance number. Elsewhere, the music takes on a harder edge. The macho riffs on "Been It" and "Losers" betray the group's fondness for metal without diminishing the delicacy of the melodies. And there's another goofy Sabbath cover—"Iron Man" this time.

Up to this point, the dark patches in the Cardigans' songs could be written off as fashionable ennui. But on *Gran Turismo,* the going gets well and truly somber. Replacing the vivacious beat-combo sound of old with icy layers of electronics, it's the least fun record in the band's catalogue, and that's not a good thing.

Regrouping after a lengthy hiatus for *Long Gone Before Daylight,* the Cardigans seemed to have completely forgotten what had once made them so special. The synthscapes are gone and the impeccable group playing is back, but the lugubrious, down-tempo songs just don't hold up. With a couple of lyrical tweaks, the opening cut, "Communication," could fit comfortably on a Faith Hill album—and that's *really* not a good thing. —M.R.

Mariah Carey

★★★	Mariah Carey (Columbia, 1990)
★★★	Emotions (Columbia, 1991)
★★	Music Box (Columbia, 1993)
★★★	Daydream (Columbia, 1995)
★★★★	Butterfly (Columbia, 1997)
★★	Rainbow (Columbia, 1999)
★	Glitter (Virgin, 2001)
★★	Charmbracelet (MonarC/Island, 2002)
★★★	The Remixes (2003, Columbia)

She wasn't exactly a child star, but Mariah Carey has grown up in public, reaching the charts first as a 20-year-old Whitney Houston copycat with a somewhat fictional "five-octave" vocal range, and emerging in the next century as almost-salty thirty-something hip-hop-loving pop diva who's been divorced, dropped from her label, rehabbed, and slagged off by both Eminem and *Us Weekly*—but now seems more human than she did at the start of her career. In the interim, she's become one of the top-selling pop stars of all time, and influenced a generation of female pop-R&B singers with her fluttering vocal trills.

Carey debuted with an album of uplifting dance pop and R&B ballads, each song's composition cocredited to Carey and each providing an opportunity to unleash her wide vocal range. Carey's strong, soulful voice served the sinewy R&B of "Vision of Love," her first #1 single, and the dance ballad "Someday." Carey had a number of essential and winning qualities—the novelty of her vocal top end, the tensile strength of her singing on the soulful verses, and the ability to convey a genuine joy behind the mike when she's let loose to romp through something as felicitous as "Emotions." Carey's followup to her top-selling debut finds the singer relaxing into her form, less self-conscious about her vocal tricks and hooked up with a sassier studio crowd, notably the postdisco superproducers David Cole and Robert Clivilles.

Carey softens her approach on *Music Box,* putting a damper on the just-for-fun disco of her previous records, and mainstreaming her lite soul into "uplifting" beauty-pageant ballad territory. "Hero" soared on wings of Carey's golden tone to the #1 chart slot and became an instant standard of weddings, funerals, auditions, and Miss Harvest Queen competitions. While there's nothing wrong with Carey singing relatively straight for 10 songs, there is a sore lack of power here: baleful soaring ballads, pop optimism along the lines of smiling through the tears and believing in yourself (or him, or Him), and hardly a decent tune in the lot. Clivilles and Cole roar back for the electro-synth dance number "Now That I Know," but neither Babyface nor frequent collaborator Walter Afanasieff can pull Carey out of this soft-rock slump.

Carey edges toward the harder end of the musical spectrum in baby steps on *Daydream.* She enlists Tina

Weymouth and Chris Frantz of the Tom Tom Club and the British producer Adrian Belew to rewrite Tom Tom Club's "Genius of Love" as her own love song "Fantasy," unleashing again the whiplike high register that made her famous. "Fantasy" is the kind of collaborative effort that retains its party atmosphere on record, as backup singers, snippets of the original tune, and a twiddling synth line weave in and out of Carey's vocals. Afanasieff returns to cowrite his strongest tunes yet, the sweet, bouncy "Underneath the Stars" and "One Sweet Day," a yearning R&B ballad on which Carey shares vocal duties with Boyz II Men. Aside from an ill-advised cover of Journey's "Open Arms," *Daydream* adheres to the classic radio-friendly diva format, alternating between frisky dance tunes and overscaled ballads.

Names like Puffy, Krayzie and Wish Bone, Missy Elliot, Timbaland, Q-Tip, and David Morales show up in the liner notes of Mariah Carey's *Butterfly,* and more interestingly, the sounds that made those names recognizable are all over the record as well. Carey doffs her trademark slit-sided miniskirts for denim hot pants and takes her considerable vocal range to the streets. And it works. The pulsing mid-tempo "Honey," cowritten by Puffy, doesn't sound much different from previous Carey singles except for asides from Mase and the Lox. Songs like "Butterfly," "Close My Eyes," and "Breakdown" speak indirectly of Carey's pending extraction from the tentacles of her powerful husband, then–Sony president Tommy Mottola.

But *Rainbow* is an uneasy exercise in hip-hop bombast, pumping up the jams to operatic lengths and complexity and declaring the singer's independence in a handful of braying ballads in which Mariah serenades "the light in me." Worse, she reprises the "Genius of Love" underpinnings for the lead-off single, "Heartbreaker," featuring Jay-Z, and this piece of desperate unoriginality is the best song on the album. Carey is credible as neither a diva nor a homegirl; her bloated "Can't Take That Away (Mariah's Theme)" is both self-indulgent and self-aggrandizing, and the spiteful "Did I Do That?," a nervy excoriation of her celebrity marriage, blames Mottola for making a fool of her. The harder-edged numbers paint the singer as a sassy, strong-spirited flirt, the slower ones as a wide-eyed little girl with big dreams. *Rainbow* left Carey at a crossroads, and the album's sales did not yield the expected pot of gold.

With the possible semi-exception of "Loverboy," there's nothing to recommend the infamous *Glitter* except its novelty status as the product of a dramatic public meltdown. Carey's career crashed and burned in a spectacularly center-stage fashion as she struggled to define herself post-Mottola and post-Columbia (she signed to Virgin and was notoriously bought out from her contract thanks to *Glitter*). Her voice is only getting stronger, and if *Rainbow* was Mariah's vocal peak, *Glitter* isn't quite a comedown—it's the songs and the production, the horrible sequencing and general lack of conviction among the players, that tarnished this bit of miscalculated tinsel.

Carey bounded back post-*Glitter* with a recording that isn't markedly unlike *Glitter* itself, which isn't to say it's bad. Questions of quality as regards her body of work become moot over time, because it's timing that creates the crests and dips in her success arc—if the hip-hop-inspired *Rainbow* wasn't substantially worse than *Butterfly,* which outsold it by miles, neither is *Charmbracelet* a substantial drop in quality or change in sensibility from her previous collections of lushly produced, trembling-lipped ballads of vulnerable romance. But *Charmbracelet* did its job—reestablishing the perception that she had reclaimed her career and her sanity. —A.B.

Wendy (Walter) Carlos

★★★½	Switched-On Bach (1968; East Side Digital, 2001)

★★★	A Clockwork Orange (1972; East Side Digital, 1998)
★★	Tron (1982; East Side Digital, 2002)
★★★	Digital Moonscapes (1984; East Side Digital, 2000)
★★★	Beauty in the Beast (1986; East Side Digital, 2000)
★★★	Switched-On Brandenburgs (1987; East Side Digital)
★★	Switched-On Bach 2000 (Telarc, 1995)
★★	Tales of Heaven and Hell (East Side Digital, 1998)
★★★½	Switched-On Boxed Set (East Side Digital, 1999)
★★★	Well-Tempered Synthesizer (East Side Digital, 2001)
★★★	Switched-On Bach II (East Side Digital, 2001)

Walter Carlos caused a stir in the late '60s with *Switched-On Bach,* a kind of Johann's "greatest hits" played exclusively on synth. Classical purists balked, but the record was trailblazing—no longer could the Moog machine be relegated to the role of a special effect; it could deliver "Jesu, Joy of Man's Desiring" as music, not as a series of squawks. Choosing Bach was smart; while the dynamics and tone of the music certainly lost something in translation into blips and bleeps, the mathematical precision of the composer's style lent itself to the fastidiousness of the electronic approach. And Carlos is a dazzling technician—he demonstrated the capabilities of the new instrument in ways that proved influential for years to come. After his '60s heyday, Walter, through means of a sex-change operation, became Wendy—and experimented with original music. Much less satisfying than that of such avant-gardists as Terry Riley, her work flashed more technique than imagination. *Beauty in the Beast* and *Digital Moonscapes* might now be filed under New Age—a genre Carlos largely pioneered—and they're pleasant. *Tales of Heaven and Hell* is basically a gothic joke. The *Brandenburgs,* obviously, are Bach, and they remain intriguing. *Well-Tempered Synthesizer* takes on Monteverdi and Haydn along with other high classical greats, and it's nearly as good as the Bach sets. —P.E.

The Carpenters

★	Lovelines (A&M, 1989)
★★½	From the Top (A&M, 1991)
★★★	Love Songs (A&M, 1998)

Hating the Carpenters was pretty much mandatory up until the '90s, when '70s nostalgia and the resurgence of lounge music made it okay for discerning listeners to enjoy the duo's crystalline productions and undeniable ear for bittersweet pop. In 1994, the *If I Were a Carpenter* tribute album found artists as diverse as Sonic Youth, the Cranberries, and Sheryl Crow covering the siblings' greatest hits without a hint of irony. Sure enough, there was much to love in the Carpenters' first few efforts. Songwriter/producer Richard Carpenter's clean-cut arrangements and good-humored ditties were beautifully complemented by his sister Karen's voice. Sweet and pure, the latter was able to express infinite amounts of longing, even while working the catchiest, most superficial of choruses.

The Bacharach/David medley on 1971's *Carpenters* is arguably the group's most impressive moment—light and breezy, slightly jazzy, the work of two young idealists who are still in love with life and its endless possibilities. A year later, "Road Ode," a meditation on the emptiness of show biz marked by a profoundly melancholy piano line and soaring vocal harmonies, brings *A Song for You* to a dramatic, almost painful finale.

The Carpenters' subsequent releases were less arty and subtle, but the bubbly hits kept coming at a rapid pace up until *Passage.* After that, the group was unable to adapt itself to the changing sounds of the late '70s. The music lost its old-fashioned loveliness, and Karen died of anorexia in 1983.

Selecting all the wrong tracks and seriously botching their sequencing, the Carpenters' four-disc set *From the Top* misrepresents the duo's legacy and is recommended only to obsessive-compulsive completists. Contrary to popular belief, the Carpenters were not necessarily a singles band. The many compilations available out there are mostly scattered collections of too-familiar tunes. The duo's early, semiconceptual records deliver a much more poignant picture of the hidden depth that lay beneath the smiley faces and saccharine hooks. —E.L.

James Carr

★★★½	The Complete James Carr, Volume One (Goldwax, 2000)
★★½	24 Karat Soul (Soultrax, 2001)
★★★★	The Complete Goldwax Singles (Kent, 2001)

James Carr's best-known single, "The Dark End of the Street," written by Dan Penn and Chips Moman, was covered by Linda Ronstadt, Aretha Franklin, and the Flying Burrito Brothers, among others. Carr's version, released in 1967, peaked at #10 on the R&B charts and stalled at #77 on the pop charts. Which is to say, Carr's influence has been more keenly felt among the players and the cognoscenti than among the record-buying public (remember them?). To be sure, James Carr never found the audience that Otis Redding and Percy Sledge did. But as a soul singer, Carr delivered some of the finest gospel-inflected music of his era. On that haunting song "The Dark End of the Street," Carr rendered his material sublime, making the song a kind of companion piece to the folk standard "Long Black Veil."

It is a measure of James Carr's undeserved obscurity that various U.S.-released compilations have gone out of print. Most recently, Razor & Tie's fine 1995 collection, *The Essential James Carr,* has been cut from their catalogue. Yes, the revived Goldwax label issued *The Complete James Carr, Volumes One and Two;* but these remain intermittently available and not as consistent as Razor & Tie's release. The 2001 Soultrax project, *24 Karat Soul,* thick with unflattering rerecordings of '60s material, is finally the U.S. release that, even if inadvertently, leads the listener to an important point: perhaps it's time to consider imports.

The U.K.'s reliable Kent Soul imprint offers very fine Carr albums. Most notably, *The Complete Goldwax Singles* brings together 28 sides from between 1964 and 1970, including the aforementioned classic and a number of other exceptional examples of what has come to be called "deep soul." Harlan Howard's "Life Turned Her That Way" is a natural for Carr, rightly suggesting that the singer is in his element with material like "The Dark End of the Street" that deals with fate's bitter theater. Indeed, lighter lyrics don't work as well with Carr's church-born singing style. Even on "A Man Needs a Woman," which features a beautifully urgent vocal performance, the credibility of the song almost collapses when Carr hits the unfortunate line, "Just like a hamburger needs a bun." By contrast, the unlikely Barry and Robin Gibb song "To Love Somebody" lands right in Carr territory, likewise the classic "Pouring Water on a Drowning Man." Do yourself a favor: pay the extra shipping and hear one of the unsung heroes of deep soul. —W.Z.

The Cars

★★★★½ The Cars (Elektra, 1978)
★★★★½ Candy-O (Elektra, 1979)
★★ Panorama (Elektra, 1980)
★★★½ Shake It Up (Elektra, 1981)
★★★ Heartbeat City (Elektra, 1984)
★★★½ Greatest Hits (Elektra, 1985)
★ Door to Door (Elektra, 1987)
★★★★ Just What I Needed: The Cars Anthology (Rhino, 1995)
★★★★ The Cars: Deluxe Edition (Rhino, 1999)

The Cars were never exactly rock stars, and they were never exactly anybody's favorite band. But everybody always liked them, and their cold, shiny guitar hooks are still in rock-radio rotation years after their 1987 breakup. The band were older pros who'd been kicking around Boston a while before hopping onto the new-wave thing, and their approach was sleek and ironic from the get-go, starting with their name—it wasn't their style to call themselves the Corvettes or the Trans Ams or anything else that might suggest they really cared about cars.

"Good Times Roll" kicks off *The Cars* and sets the tone for their whole career, an expertly engineered guitar/synth machine that tweaks clichés with self-conscious irony. Wobbly-voiced robot boy Ric Ocasek keeps threatening to "brush your rock & roll hair," and you'd best believe, when it comes to rock & roll hair, Ric *knows* what he's talking about. "Just What I Needed" complains about sexually insatiable girls who come around and waste all your time-time, while "My Best Friend's Girl" pines for a fickle teen seductress with nuclear boots, drip-dry gloves, and suede-blue eyes. Some deluded souls dismiss *Candy-O* as a synthed-up sophomore slump, but they are wrong, wrong, wrong. Every song was a massive hit in Boston, and many made it outside Route 128 as well; in "Dangerous Type," "Lust For Kicks," and "It's All I Can Do," Ric Ocasek and Ben Orr sing mournful high-tech tales of a teen romantic frustration that couldn't possibly be more theoretical. (Would a girl who was the "Dangerous Type" ever go out with one of the Cars?) The best song, "Double Life," explains the Cars' sexual philosophy: "When you idle at the stoplight/better get the signal right."

Panorama was Ocasek's art record, and not a very good one at all. *Shake It Up* went back for direct pop pleasure and got it right in the first three songs: "Shake It Up," "Since You're Gone," and "I'm Not the One." *Heartbeat City,* produced by future Shania svengali Mutt Lange, has more anonymous hits and a mushier sound; it's basically a Def Leppard album without the guitars. After the flop *Door to Door,* the Cars quietly pulled into that big garage in the sky. It should have been a snap to compile an undeniable best-of, but *Greatest Hits* bungles the job by picking the blandest items and muddling them up in nonchronological order. The two-disc *Just What I Needed* piles on more demos and rarities than even a hard-core fan could sit through, but it still somehow manages to leave out essential hits like "All Mixed Up," "Lust For Kicks," and "Bye Bye Love." The deluxe edition of *The Cars* packages the debut with a bonus disc of alternate versions. Ben Orr died of pancreatic cancer in 2000. —R.S.

Derrick Carter

★★★★ Mixmag Presents . . . The Cosmic Disco (DMC, 1997)
★★★★ About Now (611, 2001)
★★★½ Squaredancing in a Roundhouse (Classic, 2002)
★★★½ Choice: A Collection of Classics (Azuli, U.K., 2003)
★★★ Nearest Hits and Greatest Misses (Classic, 2003)

Luke Solomon & Derrick L. Carter

★★★ Thanks for Coming By . . . (Classic, 2001)

Derrick Carter is probably the most popular house DJ in Chicago as well as the United States. He began his career when he was nine, playing at family reunions, and began making his own records in the late '80s. His recording career stalled, however, until the mid-'90s, when he began releasing 12-inches on Organico, quickly becoming a draw on the Midwestern rave circuit. *Mixmag Presents . . . The Cosmic Disco,* his first major mix CD, is a cult classic among house fans for its shrewd showcasing of Chicago talent like DJ Sneak ("You Can't Hide From Your Bud"), Gene Farris ("Visions of the Future"), Green Velvet ("Answering Machine," "Land of the Lost"), and Carter himself, whose remix of Cajmere's "Only 4 U" closed out the set. Around the same time, Carter and British house DJ and Freaks member Luke Solomon started the Classic Recording Company. *Thanks for Coming By . . . ,* a label showcase, features a CD-length mix from each; Carter's mix is the more engrossing of the two, and Isolée's classic "Beau Mot Plage" is the highlight. Months later, Carter issued *About Now . . . ,* a sterling manifesto whose first half outdid *The Cosmic Disco* in its fierce joy. Even jazzy touches (the horns on Eddie & the Eggs' "Me & My Watermelon," the luxe keyboard riff of Kojak's "You Can't Stop It") feel less supper-club smooth than late-night jam-session nasty. Late 2002 saw the issue of Carter's playful, accomplished *Squaredancing in a Roundhouse,* his second full album (1995's *Pagan Offering* is out of print). Carter's volume of the *Choice* compilation series, in which various DJs select personal favorites, is an intriguing mix of rarities (the Staple Singers' "Slippery People") and house classics like Mr. Fingers' "Mysteries of Love (Dub Mix)," while the misleadingly titled *Nearest Hits and Greatest Misses* is another DJ set that brings together strange but surprisingly compatible bedfellows like postrockers Tortoise and ecstatic housemongers Roy Davis Jr. and Peven Everett. —M.M.

James Carter

★★★★	JC on the Set (DIW, 1994)
★★★★	Jurassic Classics (DIW, 1995)
★★★★★	The Real Quietstorm (Atlantic, 1995)
★★★★★	Conversin' With the Elders (Atlantic, 1996)
★★★★	In Carterian Fashion (Atlantic, 1998)
★★★★	Layin' in the Cut (Atlantic, 2000)
★★★★★	Chasin' the Gypsy (Atlantic, 2000)
★★★½	Gardenias for Lady Day (Columbia, 2003)
★★★★	Live at Baker's Keyboard Lounge (Warner Bros., 2004)

It's too late for anyone to return jazz to the golden age of Charlie Parker and John Coltrane, but if anyone could have in the last decade, it would have been James Carter. Taken as a group, it's now clear that the one and only purpose of jazz saxophonist James Carter's first three albums is to impress the hell out of the listener. He plays sax in four weight divisions, plus bass clarinet and bass flute. He's mastered just about every sound those horns can produce, from honks through squeals, and particularly enjoys those pops and clicks on the valves that make for self-accompanied percussion. He shows off his circular breathing. The only thing he doesn't do is human beat-box.

Carter also shows off his mastery of the history and lore of the saxophone, not only using Ellington and Monk standards as launchpads, but digging up Sun Ra, and resurrecting Don Byas and little-known Texas tenor John Hardee. The DIW albums careen between tradition and avant-garde, but Carter's real breakthrough comes in *The Real Quietstorm,* where he concentrates on ballads and lets the luscious melodies outshine the performance.

Having established himself as the most imposing young saxophonist since Sonny Rollins, Carter next moved to consolidate his reputation by *Conversin' With the Elders.* Of course, when you're as young as Carter, elders can be as modern as Hamiett Bluiett and Lester Bowie, or as ancient as Buddy Tate and Sweets Edison, and the juxtaposition, which lets Carter reprise "Moten Swing" (from the Robert Altman movie *Kansas City*), play reggae with Bowie, and do dueling baritones with Bluiett, is one of Carter's most broadly enjoyable albums.

Carter's major-label efforts are all concept albums. *In Carterian Fashion* is meant to be a tenor-organ showcase, but it defies all expectations: Carter has no desire to settle into a soul-jazz groove, so his pairing with three organists starts as jousts and quickly turns into a rout: his most out recording, but not an especially successful concept.

The next two albums represent Carter's first work with guitarists. *Layin' in the Cut* features two electric guitarists and funk bassist Jamaaladeen Tacuma working out of a groove perhaps a bit too reminiscent of Ornette Coleman's group Prime Time. Meanwhile, *Chasin' the Gypsy* uses two acoustic guitarists to reconsider Django Reinhardt's swing, with cousin Regina Carter playing Stephane Grappelli on violin, resounding evidence that everything old can be new again. Plus, it lets Carter show off his new bass saxophone.

After an unseemly hiatus, Carter switched to Columbia, and Warners flushed out a live album that Atlantic had been sitting on since 2001. *Gardenias for Lady Day* was overstrategized: Ostensibly a Billie Holiday tribute, half of the songs had nothing to do with her, the two vocals were hammed up by an Ella wanna-be, "Strange Fruit" was reconceived as a noise break, and much of the rest was buried in maudlin strings. On the other hand, the rhythm section was perfectly tuned for Carter's postmodern '40s jones, and Carter was incandescent. *Live* is another oddball, with a panoply of guest saxophonists who can hardly get a note in edgewise—Franz Jackson even resorts to a blues shout. Carter is bursting with talent and ideas; it's a shame that he doesn't get more opportunities to work out. —T.H.

The Carter Family

★★★★★ The Carter Family: Country Music Hall of Fame Series (MCA, 1991)
★★★½ On Border Radio, Vol. 1 (Arhoolie, 1995)
★★★½ On Border Radio, Vol. 2 (Arhoolie, 1997)
★★★ Country by the Carter Family (Vanguard, 1997)
★★★★ Best of the Best of the Original Carter Family (King Special, 1998)
★★★★★ On Border Radio, Vol. 3 (Arhoolie, 1999)
★★★★ Can the Circle Be Unbroken: Country Music's First Family (Sony Legacy, 2000)

The year 2027 will mark the 100th anniversary of the release of the first Carter Family recordings, and if history has taught us anything, it's that we'll still be talking about the enormous reach and influence the Carters' music continues to exert on roots musicians of all stripes. There will be a list of latter-day Carter Family acolytes joining the likes of Woody Guthrie, Bob Dylan, Doc Watson, Freakwater, The Be Good Tanyas, Dolly Varden, and others.

Here's where the history of modern country music begins, its ground zero being Bristol, TN, in 1927, when Victor A&R scout Ralph Peer came to town looking for new talent (and not least of all an effort to get a piece of what he hoped would be some lucrative publishing). As documented on the Country Music Foundation's essential *The Bristol Sessions* CD, Peer perhaps found more than he had bargained for, because a trove of outstanding artists committed their songs to vinyl, including the Stonemans (who had already been recorded), Blind Alfred Reed, and the feisty Kentucky preacher Alfred G. Karnes. But two artists leaped out of the Bristol sessions to change the course of music history: Mississippi's consumptive Singing Brakeman, Jimmie Rodgers, and Maces Springs, VA's Carter Family. In addition to his classic songs, Rodgers' forays into Hawaiian music and black blues expanded country's musical palette by a quantum leap. The dour, proper A.P. Carter, his wife, Sara, and her cousin Maybelle Addington (who had married A.P.'s younger brother Ezra and become a Carter herself) advanced a repertoire A.P. had gleaned from the hills and hollows of the region, hundreds of songs of British/Irish/Scottish/Appalachian origin that he retooled, refining the songs' ancient texts into plainspoken country poetry that reflected the traditions, trials, and mores of the rural South. A.P. was the model song-catcher; he had great affection for the haunting tales he heard in his own small part of the world and would tap any source for ideas, be it family, friends, or passing strangers. Where the original songs leave off and Carter's rewrites begin is now a moot point: The body of work has become, sui generis, Carter Family songs for all time, and many of them have entered into the lingua franca of American popular song: "Wildwood Flower," "Wabash Cannonball," "Worried Man Blues," "Will the Circle Be Unbroken," "Single Girl, Married Girl," "Little Log Cabin by the Sea," "The Storms Are on the Ocean," "Keep On the Sunny Side," "Little Darlin' Pal of Mine"—the list goes on and on. Their popularity aside, the early Carter Family recordings take on the aspect of monuments, both in the commitment and expressiveness of the performances and in terms of the repertoire's deep influence on succeeding generations of country, folk, and bluegrass musicians.

Prior to the Bristol sessions, country records were largely instrumental, string-band affairs. But by 1927, advances in microphone technology allowed the subtle harmonic blends of mountain singers such as the Carters to be distinguishable on record for the first time, and the keening alto of an untutored but instinctively gifted vocalist such as Sara Carter was heard with a clarity impossible to achieve in earlier years. As opposed to their progeny—A.P. and Sara's daughter Jeanette; Maybelle's daughters June, Helen, and Anita—the original Carter Family's voices were hardly great instruments from a technical standpoint, but the stark beauty of their blend, with baritone A.P. holding down the bottom as Sara and Maybelle carried the message, engendered a riveting immediacy. The very plainness of their singing became a thing of inestimable beauty, simply on the strength of the emotional punch their voices packed, sans embroidery. The X factor in their performances was the added rhythmic thrust provided by Maybelle's then-forward-looking guitar technique, which found her picking the melody lines on the bass strings as she strummed the rhythm on the treble strings. Her style, immediately emulated by other pickers, became one of the most influential ever.

The Carters recorded prolifically during the Victor years, from 1928 through 1935, when the bulk of their celebrated songbook was committed to disc. The Depression wreaked havoc on their concert appearances, limiting them to low-paying gigs in schoolhouses and such in Virginia, until the group parted ways for economic reasons, with A.P. moving to Detroit to seek work, and Maybelle and her husband following suit to Washington, D.C. Sara and A.P. separated in 1932, but the trio continued to gather for recording sessions, moving in 1935 from Victor to the American Record Company (ARC), then a year later signing with the Decca label. This coincided with their landing a handsome contract with radio station XERF, which beamed their broadcasts nationwide, thanks to a huge antenna built across the border in Mexico, and thus invulnerable to U.S. government regulations. The Decca years proved commercially and economically fruitful. A.P. and Sara split for good in 1939, but the band continued to perform and record together, returning to the ARC and Columbia labels briefly in the early '40s, then re-signing with Victor in 1941. These later recordings have their moments, but Sara sounds increasingly distracted in the post-Decca years, and finally plain bored.

The original Carter Family odyssey—from Maces Springs, in the shadow of Clinch Mountain, to national acclaim—ended in 1943, when Sara retired and moved to California with her new husband, who happened to be A.P.'s cousin, Coy Bayes. Maybelle continued, however, and incorporated her daughters into her road show; for his part, A.P. settled in Maces Springs and ran a country store, which today houses the Carter Family museum. In 1952, A.P. re-formed the Carter Family with Sara and their daughter Jeanette, who filled in for Maybelle; the group disbanded four years later. A.P. passed away in 1960; in 1966, Maybelle and Sara reunited and cut a memorable album (now out of print) for Columbia and played numerous folk festivals around the country. Sara then bowed out again, but Maybelle and her girls carried on, eventually providing haunting backing harmonies for Johnny Cash. Maybelle died in 1978, Sara a year later.

Domestically, the Carters' catalogue is once again in disarray, now that the eight-volume series from Rounder *(The Complete Victor Recordings)* is out of print. For the important Victor recordings, the best available option is King Special's budget-priced *Best of the Best of the Original Carter Family,* although at 10 songs, it's a skimpy overview of a lengthy, towering tenure. At least the 10 are prime-time numbers, including "Keep On the Sunny Side," "Wabash Cannonball," "Worried Man Blues," "Wildwood Flower," and "I'm Thinking Tonight of My Blue Eyes." The Carters' commercially and critically productive two years with Decca are summarized on MCA's splendid 16-track *Country Music Hall of Fame Series* entry. They cut 60 sides for Decca, so these 16 tracks do include a number of the finest songs in the catalogue. "In the Shadow of Clinch Mountain" is one of the sweetest evocations of the homeland ever set to music; the sprightly "My Dixie Darling" is as heartfelt as playful love sentiments come; and the eerie death ballad "Answer to Weeping Willow" contains some of the most vivid, haunting imagery in any Carter Family song. *Clinch Mountain Treasures: The Complete October 1940 ARC Recordings* documents their return to recording after A.P. and Maybelle's 28-month day-job hiatus. If this isn't the Carters' most inspired work, it nonetheless has its strengths. "Give Him One More as He Goes" shows off a seldom employed sense of humor about the human condition; "Meeting in the Air," "Look Away From the Cross," and "There'll Be No Distinction There" are powerful, unadorned gospel performances; and A.P.'s finest hour among his rare solo appearances is on his own mesmerizing love ballad, "I Found You Among the Roses," a genuinely affecting and deeply felt performance from the most unexpected source. Arhoolie's three-volume *On Border Radio* series captures the Family's entertaining shows from station XET in Monterrey, Mexico. And it is a family in the broadest sense: In addition to A.P., Sara, and Maybelle, Jeanette appears, as do Maybelle's daughters, in their earliest professional appearances. There are plenty of deep, moving moments here—A.P.'s tender reading of "My Virginia Rose" on *Vol. 3;* the original Carters' stirring rendition of "On the Sea of Galilee" on *Vol. 1;* Sara and Maybelle's delightful guitar duet on "Shortning Bread," June and Helen's playful rendition of "Polly Wolly Doodle All Day," and Jeanette's heart-tugging "I Never Will Marry," all on *Vol. 2.*

Like *On Border Radio, Country by the Carter Family* emphasizes the family aspect in its blending of 1940 recordings by A.P., Sara, and Maybelle with contemporary recordings made by the Carter Sisters and Mother Maybelle and contributions by Johnny and Rosanne Cash as well. Johnny's narration of the sentimental "A Song to Mama," with the Carter women singing background vocals, is one of the unalloyed highlights here, along with the Carter Sisters' haunting reading of Gordon Lightfoot's classic "For Lovin' Me." This is not the most essential of Carter discs, but its charms make it a winner all the way.

To get to the heart of Carter Family music, it's necessary to visit the import section. There, the fan will find a splendid two-volume, multi-CD collection from the British label JSP, *The Carter Family: 1927–1934* and *The Carter Family, Vol. 2: 1935–1941,* which contains virtually everything the trio recorded during the years in question; each volume boasts five CDs—the first volume weighs in with 126 songs, the second with 130 songs. Hard-core completists should consider Bear Family's 12-CD *In the Shadow of Clinch Mountain.* This rich box set contains nearly every recording the Carters made for their various labels, from Victor to Bluebird. Disc 12 is an interview with Mother Maybelle and Sara, conducted in 1963 by Pete Seeger's brother Mike and Carter Family historian Ed Khan. A dozen pricey discs may seem like a lot to get through, but the peculiar charm of Carter Family recordings, their music, and the stories they tell touch a fundamental part of almost anyone who crosses their path. —D.M.

Neko Case

★★★	The Virginian (Bloodshot, 1997)
★★★★	Furnace Room Lullaby (Bloodshot, 2000)
★★★★	Blacklisted (Bloodshot, 2000)

The Corn Sisters

★★★	The Other Women (Mint, 2000)

A teenage punk-rocker turned alt-country chanteuse, Neko Case was born in Alexandria, VA, and raised mainly in Tacoma, WA. She spent the mid-'90s attending art college in Vancouver, B.C., where she met Carolyn Mark, with whom Case would form the duo the Corn Sisters, whose *The Other Women* is a loose album consisting mostly of covers, and the future members of power poppers New Pornographers (see separate entry). On her own, though, Case is the most arresting female alt-country singer since the Mekons' Sally Timms. *The Virginian,* her debut, is heavy on covers, mostly country (Ernest Tubb, Loretta Lynn) but with a nod toward rock-hipster tastes with its version of Scott Walker's "Duchess." *Furnace Room Lullaby* is even more assured, and features the great "Thrice All American," a tribute to Tacoma ("I wanna tell you about my hometown/It's a dusty old jewel in the south Puget Sound") that's become a theme song of sorts for Case. *Blacklisted* turned down the twang and cranked up the noir, bringing to mind a more down-home k.d. lang or an updated, David Lynch-ian Patsy Cline, particularly on the two cover tunes, Ketty Lester's "Look for Me (I'll Be Around)," and Aretha Franklin's "Running Out of Fools." Just as impressive are Case's own songs, particularly the haunting "Deep Red Bells," written about the Puget Sound's infamous Green River Killer. —M.M.

When Johnny Cash died in 2003, he left behind a vast legacy of recorded music spanning half a century. Cash was a mythical figure who embodied much of what was good, bad, and sometimes contradictory about America. In his early days on Sun Records, he walked the line between rockabilly and country, demonstrating a common touch that appealed to both audiences. He was a born-again Christian whose gospel albums thundered with indignation over humankind's sinful ways. He was also a recidivist drug addict whose bad habits led to periods of ill health and rehabilitation. He espoused political stances and created an indelible persona. On 1971's *Man in Black,* which found him at peak popularity, he declared his intention to protest poverty, prejudice, and society's ills by cloaking himself in black until things changed. His seeming contradictions only underscored his complexity, and he continued to wear black until his death, at age 71.

To be sure, Cash's prolific discography—numbering over a hundred albums, not counting compilations, repackages, box sets, and greatest hits—includes its share of mediocrities. There are even some outright duds and follies. (*Mean as Hell!* and *Everybody Loves a Nut,* from the '60s, and *The Junkie and the Juicehead Minus Me* and *Look at Them Beans,* from the '70s, leap to mind.) Still, Cash moved fearlessly forward and kept at his calling with a righteous sense of mission. Much of the time, remarkable things happened when Cash hit the studio or stage. He cut one of the better (and more popular) albums of his career in 2002, with *American IV: The Man Comes Around.* Such things just don't happen to popular musicians at age 70. The secret: Johnny Cash stayed hungry and remained true to himself.

Signed to Sun Records in 1955, Cash was the most countrified artist in the label's original rockabilly class. The Cash sound was set with "I Walk the Line"; Marshall Grant slapped away at his bass and Luther Perkins picked simple riffs and lead lines on his guitar's lower strings while Cash strummed insistent rhythm. Their minimalist sound endures to this day as a template for rockabilly at its most stripped. Cash's deep baritone, which only deepened with age, was powerful and expressive. Its raggedness and oftentimes wobbly nature worked in Cash's favor, making him seem not so different from the average guy. He also happened to sing great songs, many of which he wrote himself. Invariably, the topics were love, murder, prison, and trains, and his flair for striking imagery and the cutting phrase elevated his material to the level of poetry. Some of his best Sun sides came from Jack Clement, the label's house producer and talent scout, and he gave Clement's songs—"Ballad of a Teenage Queen," "Guess Things Happen That Way"—definitive interpretations.

Considering the magnitude of his Sun recordings, it's sometimes difficult to believe he was with the label only two years before splitting for Columbia in 1958. Rhino's *The Sun Years* and Varèse Sarabande's *Essential Sun Singles* provide great single-disc overviews (with 18 and 25 tracks, respectively). For a deluxe overview, Varèse Sarabande's 40-track double-disc *The Complete Sun Singles* is the item to own. These discs demonstrate the evolution of Cash's sound from the spare trio arrangements of the early sides to the use of background choruses and additional instruments (piano, drums, fiddle, pedal steel) on the later ones. Varèse Sarabande has also reissued, with bonus tracks, the albums that came out on Sun from 1958 to 1960: *Johnny Cash With His Hot and Blue Guitar, Johnny Cash Sings the Songs That Made Him Famous, Greatest!,* and *Johnny Cash Sings Hank Williams. The Road Less Traveled: Sun Recordings* collects demos, alternate takes, and nonoverdubbed originals from the Sun years.

Throughout the '60s, Cash came on like the title of Sun's 1970 compilation, *The Rough-Cut King of Country Music.* His move to Columbia in 1959 inaugurated the populist-folksinger period of his career, aspects of which would largely define his musical persona from that decade forward. He kicked off his lengthy tenure at the label with *The Fabulous Johnny Cash,* which covered a lot of stylistic ground and yielded a few hits ("Don't Take Your Guns to Town," "Frankie's Man, Johnny"), plus the classic loner's lament, "I Still Miss Someone." It's been claimed that Cash left Sun because Sam Phillips wouldn't let him record gospel, and he did just that at Columbia with *Hymns,* which perhaps paved the way for fellow Sun exile Elvis Presley's run of gospel albums. *Ring of Fire* reprises Sun-era material, but it also finds Cash coming on tough and embattled on June Carter's title cut, which featured an inventive use of horns and a weary-as-sin vocal performance by Cash. In 2003, "Ring of Fire" ranked fourth on Country Music Television's elite list of the 100 Greatest Songs of Country Music.

The ever-ambitious Cash became a determined storyteller and chronicler of the American experience, exploring themes that ranged from trains and travelogues *(Ride This Train)* to Native Americans *(Bitter Tears: Ballads of the American Indian)* and rugged tales of frontier life (*Ballads of the True West,* a double album). He invested considerable research and effort in these concept albums, stamping himself as a champion of old ways and, in the process, a kind of American conscience.

Blood, Sweat and Tears introduced the Harlan Howard classic "Busted" and has more of a country-blues slant than other albums from this period. *Orange Blossom Special* is notable for Cash's interpretations of three Bob Dylan songs ("It Ain't Me Babe," "Don't Think Twice," "Mama, You Been on My Mind"). It was inevitable that Dylan and Cash—two of the greatest, gruffest outlaw voices—would become friendly. They duetted (rather awkwardly, it must be admitted) on "Girl From the North Country," televised on Cash's prime-time variety show in May 1969, and the symbolism of their union helped bridge musical generations.

Cash peaked in the '60s with a pair of concerts delivered behind prison walls. *At Folsom Prison* found him accompanied by wife-to-be June Carter and the Tennessee Three in a raucous, powerhouse performance at the notorious California penal institution. Many of the songs are about murder, prison, and life on the lam. The final moments of a convict on death row are chillingly detailed in "25 Minutes to Go." The Cash-Carter duet on "Jackson" is sassy and sexy, while the mighty "Folsom Prison Blues" roars disapproval of prisons and class disparity. Cash's other prison album, *At San Quentin,* was an even wilder ride, which took the incarcerated audience from near-riotous frenzy ("San Quentin") to gospel serenity ("Peace in the Valley"). Cash's rambunctious reading of Shel Silverstein's "A Boy Named Sue" became his biggest single, reaching #2 in 1969, and "Wanted Man," written by Bob Dylan, paid sly, salty tribute to the outlaw spirit. In their latest CD incarnations, *At Folsom Prison* and *At San Quentin* have been expanded by three and nine tracks, respectively, and both are essential documentaries of an outsider artist and audience bonding as never before or since.

Cash greeted the '70s with *Hello, I'm Johnny Cash* (1970), which found him writing and finding good songs by other writers. It has more of a country-folk feel than many of his records, thanks to the inclusion of Tim Hardin's "If I Were a Carpenter," Kris Kristofferson's "To Beat the Devil," and Cash's own folk-flavored "Southwind." Like much of his '70s output, *Hello, I'm Johnny Cash* remains out of print but is deserving of reissue. Returning to gospel, *Johnny Cash Sings Precious Memories* (1975) offered stately readings of well-known country hymns. *Five Feet High and Rising* (1974) is another notable album from this period, and *Johnny Cash and His Woman* (1973), a series of duets with June Carter Cash, has its pleasures, too. Although a lot of his '70s titles have gone missing, a couple of patriotic-themed albums, *America* and *Ragged Old Flag,* got a new lease on life in 2002.

Cash also hit his stride on *Strawberry Cake* (1975), a live album recorded in London. June Carter Cash and sister Helen performed a medley of Carter Family songs, and their high, keening mountain harmonies are simply exquisite. *The Last Gunfighter Ballad* (1977) is a somewhat half-baked concept album saved by the Carter Family's harmonizing on such extraordinary tracks as "Far Side Banks of Jordan" and "That Silver Haired Daddy of Mine." *The Rambler* (1977), another concept album, interspersed dialogue with songs about travel, and it worked to spectacular effect. All the songs were written by Cash, and some—"Hit the Road and Go," "Lady," "If It Wasn't for the Wabash River," "My Cowboy's Last Ride"—are among his best.

On *Gone Girl* (1978), he took stock of his life, and the wistful mood was immensely moving. His ragged cover of the Rolling Stones' "No Expectations" tells quite a story—to wit, Cash's own. "It Comes and Goes" paints a picture of a man bored with his station in life but lacking motivation to change it. The final track, a moving cover of Rodney Crowell's "A Song for the Life," finds Cash giving muted thanks for having learned to "listen to a sound like the sun going down." *Silver* (1979) continued in the vein of *Gone Girl:* strong tunes that reveal Cash's inner feelings and promote no cause save that of unburdening his soul. Produced by Brian Ahern (known for his work with Emmylou Harris), it is another standout from this resurgent period.

In the '80s, Cash reconciled with his past. It began with the Jack Clement–produced *Rockabilly Blues* (1980), which wasn't rockabilly per se, but hard country with rockabilly overtones. Nice cover choices included Nick Lowe's "Without Love," with Lowe and Dave Edmunds playing along, and Steve Goodman and John Prine's wise and witty "The Twentieth Century Is Almost Over." The Cash-penned title song recounted life on the road circa 1955. *The Survivors* (1983) captured a performance in Stuttgart, Germany, where erstwhile labelmates Carl Perkins and Jerry Lee Lewis showed up. If it wasn't exactly the Million Dollar Quartet (as Cash, Perkins, Lewis, and Elvis Presley were briefly dubbed back in the old days), it was good, nostalgic fun from three fourths of the crew many years later.

The Adventures of Johnny Cash (1982) and *Rainbow* (1986) teamed Cash with producers Clement and Chips Moman, respectively. The former disc's highlights include songs by John Prine ("Paradise"), Billy Joe Shaver ("Georgia on a Fast Train"), and Merle Haggard ("Good Old American Guest"). *Rainbow* is enlivened by a moving rendition of Creedence Clearwater Revival's "Have You Ever Seen the Rain," and a tender treatment of "Love Me Like You Used To."

Cash moved to Mercury in 1986, ending an association with Columbia that had lasted a quarter century. While at Mercury, he was produced almost exclusively by Jack Clement, and the partnership yielded some strong results. The must-have album from the Mercury years is *Water From the Wells of Home,* a towering effort that is tender, romantic, nostalgic, tough, and moving, with traditional instrumentation and crisp arrangements. A sleeper among them is the 1986 gospel album, *Believe in Him,* on which majestic country hymns are mostly given spare, acoustic arrangements, creating the intimate effect of a bunch of pickers bringing guitars, mandolins, and banjos over to Cash's place for a good old-fashioned round of praise. Two more albums from the Mercury years, *Johnny Cash Is Coming to Town* and *Boom Chicka Boom,* were paired on a 2003 reissue. Caveat emptor: *Classic Cash* (from Mercury's *Hall of Fame* series) consists of rerecordings of his early work at Sun and Columbia, and therefore has offended purists, though some of his vocal retakes are strong enough to merit an objective listen. You may also wish to avoid the skimpy *Millennium Edition* collection.

In the final chapter of a glorious career, Cash moved to Rick Rubin's American Recordings in the mid-'90s. Between 1994 and 2002, Cash released a quartet of studio albums for American that served as a kind of serial coda. Raw and unvarnished, often featuring just voice and guitar, these four titles—*American Recordings; Unchained; American III: Solitary Man; American IV: The Man Comes Around*—reestablished Cash as a formidable persona and a spiritual godfather to the grunge generation. *American Recordings* is indispensable; it's a stark, rough-hewn folk chiaroscuro whose simplicity is its strength. Subsequent volumes have been strong, too, and even though Cash's voice was frail and faltering on 2002's *American IV: The Man Comes Around,* the artist's truthful essence shone through. Of all improbable things, his rendition of Nine Inch Nails' "Hurt," and the artistic, unsparing, Grammy-nominated video that was made for it, helped to raise his profile one more time, even as his body was faltering at the end of his life.

In the midst of this stellar string of recordings came the soundtrack of a 1998 summit meeting between Willie Nelson and Johnny Cash for the *VH1 Storytellers* series. With no prior planning, these two country-music greats sat down with their guitars and played whatever came to mind, bantering easily and swapping stories.

There are numerous Cash retrospectives from which the casual or even devoted fan can choose. The 20-song retrospective *Johnny Cash: Columbia Records 1958–1986* hardly does justice to so much work over so long a time (though it does include Cash's spectral version of Bruce Springsteen's "Highway Patrolman"). However, *The Essential Johnny Cash (1955–1983),* the first box set devoted to Cash, squarely hit the mark. In 2002, the release of the double-disc *Essential Johnny Cash* (not to be confused with the earlier three-disc box set of the same title) coincided with Cash's 70th birthday. It offers a satisfying overview, and the CD booklet is filled with glowing testimonials from fellow artists. For those desiring more music and a thematic overview, the three-CD box set *Love, God, Murder* was organized disc-by-disc around the major themes that motivated and conflicted this grassroots folk legend. The three CDs were also released individually under their one-word titles. *At Madison Square Garden*—a previously unreleased concert from 1969, a year that found Cash at the height of his power and popularity—is a welcome addition.

In the mid-'90s, the German Bear Family label issued a series of box sets for hard-core fans. *Come Along and Ride This Train* (which focuses on Cash's American-history songs), *The Man in Black 1959–62,* and *The Man in Black 1963–69* fill four, five, and six discs, respectively. Completists will have a field day, but the average fan will fare well with Legacy's more affordable bounty.

Several collections of Cash's sacred music remain in print. *The Gospel Collection,* a 24-track disc from Legacy, compiles some of his most compelling early gospel recordings for Columbia. Another archival collection, *Just as I Am,* appeared on Vanguard in 1999. A year later, the Cash-financed *Return to the Promised Land*—the uncut soundtrack from a long-form 1994 video of the same name—appeared on the Renaissance label. It features unsyrupy gospel from Johnny Cash and June Carter Cash and heartfelt between-song testimonials.

Incidentally, the new millennium has seen the release of several fine Cash tribute albums from his legion of musical disciples. *Dressed in Black—A Tribute to Johnny Cash* (Dualtone, 2002) is raw, high-spirited fun, and the truest to Cash's early sound. *Kindred Spirits: A Tribute to the Music of Johnny Cash* (Sony, 2002) features bigger names, such as Bruce Springsteen, Bob Dylan, and daughter Rosanne Cash. *Johnny's Blues* (Northern Blues, 2003) finds such artists as Corey Harris and Maria Muldaur covering Cash with a bluesy slant.

In 2003, the year of his death, a pair of releases served to bookend Johnny Cash's remarkable career. *Live Recordings from the "Louisiana Hayride"* collects spunky performances from radio broadcasts dating back to 1955; though the fidelity is unsurprisingly rough in spots, Cash and company were in fine form. The five-disc set *Unearthed* culls buried treasure from the other end of his career: his final decade at American Recordings. The material on four of the discs (including one of spirituals) is of previously unreleased material, while the fifth, in this context, is a perhaps superfluous best-of from his tenure at American. *Unearthed* proves, as if further proof were needed, that Johnny Cash was a bottomless well of Americana. —P.P.

June Carter Cash

★★★	Press On (Dualtone, 1992; Dualtone, 2003)
★★★½	Wildwood Flower (Dualtone, 2003)

with Johnny Cash

★★★	Carryin' On With Johnny Cash and June Carter (Columbia, 1967)

If there is a royalty of American music, June Carter Cash spent her life in the high court, witness to its riches. She was the daughter of Maybelle Carter, niece to A. P. Carter and Sara Carter (these three the legendary Carter Family), mother of Carlene Carter and stepmother to Rosanne Cash, and lest we forget, wife of Johnny Cash.

She was also a formidable singer and songwriter in her own right, although June Carter Cash's music is not as readily available on CD as is the vast output of certain among her family members. But thanks to Dualtone Records, we do have some fine material by which to remember the singer and songwriter, who died in 2003.

Press On is a Grammy-nominated collection originally released in 1992. The recording finds June Carter Cash involved in something like a musical inventory, a reverential but hardly somber look backward at the music that was her native world. She draws from the Carter Family catalogue as easily as she moves ahead to the years in which country music saw certain among its bright lights returning to "traditional" sounds, Marty Stuart and Ricky Skaggs included. Highlights include a duet with Johnny on "The Far Side of the Banks of Jordan" and a moving version of "Ring of Fire," which she cowrote.

Wildwood Flower (2003) proves to be a worthy continuation of *Press On*'s musical memory project, done in the light of husband Johnny's remarkable—and not altogether foreseeable—emergence as an MTV emblem of hipness. Produced by son John Carter Cash, this recording, like *Press On,* features Norman Blake on acoustic guitar. The bulk of the material comes from the Carter Family catalogue. "Keep on the Sunny Side" kicks off the CD, but the more meditative, darker material such as "Storms Are on the Ocean" proves the most stirring. Her voice is frail at times and the performances sometimes loose, but June Carter Cash's *Wildwood Flower* reminds the listener of a time when music was something people played for one another, not simply a package shipped from an Internet warehouse.

For those who are hooked by these recordings, it's worth checking out *Carryin' On With Johnny Cash and June Carter.* Mostly from 1967, the *Carryin' On* material is marked by a very real willingness to get silly. Through these songs, such as "Long Legged Guitar-Pickin' Man" (on which June unleashes some Wanda Jackson-like growls) and "Jackson," the humor that was an important part of country music's "hillbilly" origins emerges again—and it's a breath of fresh air, even if this recording is a bit thin when put beside the best work of these two artists. —W.Z.

Rosanne Cash

★★★½	King's Record Shop (1987; Columbia, 1990)
★★★½	Hits, 1979–1989 (Columbia, 1989)
★★★★	Interiors (Columbia, 1990)
★★★★	The Wheel (Columbia, 1993)
★★★½	Retrospective (Columbia, 1995)
★★★½	Super Hits (Columbia, 1998)

Rosanne Cash's original songs are journeys of self-discovery; sometimes, as she revealed on *Interiors,* other people get in the way of that pursuit, and the resulting pain cuts deep. Since the outset of her career, Cash (the first-born daughter of Johnny Cash and his first wife, Vivian Liberto) has evinced a skeptical view of relationships, which often wind up not in the happily-ever-after realm but in moral, philosophical, and physical disintegration. Marriage (first to Rodney Crowell, then to John Leventhal, both of whom entered her professional life as producers) and motherhood seem to have only deepened her conviction that anything put together will fall apart. If all this sounds deadly serious, it is. Nevertheless, until *Interiors,* she always found a way to leaven her dark internal monologues with a dash of humor. In her two post-*Interiors* studio albums, the now out-of-print *10 Song Demo* (which is not a demo recording and contains 11 songs) and *The Wheel,* she has not shrunk from aiming a pointed barb at others—"I throw your roses in the fire/To make the flames a little higher/I watch your roses turn to dust/I know no man I can trust" is her reaction to someone sending her flowers in "Roses in the Fire," from *The Wheel*—but the focus has become ever sharper on self-analysis, and she's never easy on herself. Even in a song as melodically beautiful and atmospherically seductive as *The Wheel*'s "Sleeping in Paris," she can't help but admit, "No one sees behind the mask/No one knows I'm sinking fast," as she awaits the expected salvation of lying beside her lover when he arrives in the City of Light.

Although her first four albums are technically out of print, three anthologies hit many of the high points of those and later years. *Hits 1979–1989* contains most of the obvious chart entries, starting with 1979's captivating single "No Memories Hangin' Round," and concluding with 1988's "Black and White." Some of the choice tracks include a country take on Lennon and McCartney's "I Don't Want to Spoil the Party" (a nonalbum track); "Tennessee Flat Top Box," featuring a terrific guitar solo courtesy of Randy Scruggs; one of Cash's finest heartbreakers, "Blue Moon with Heartache," from *Seven Year Ache;* and a powerful, haunting country ballad penned by Crowell for *Right or Wrong,* "No Memories Hangin' Around," with Cash duetting with Bobby Bare, Ricky Skaggs getting all the ache possible out of his fiddle solos, and James Burton adding an astringent, affecting guitar solo. Bare's reading of the Crowell lyric "I ain't fakin' feelin' far away" alone is worth the price of this disc, as is the beautiful blending of his and Cash's voices, one grizzled and weary, the other young and tender. *Super Hits* is a bit short at 10 tracks, but there's no arguing with the song selections: "Seven Year Ache," "Blue Moon with Heartache," "The Way We Make a Broken Heart," "Tennessee Flat Top Box," "I Don't Want to Spoil the Party," and others—all first-rate performances and productions.

Retrospective comes highly recommended, even though it focuses heavily on latter-day albums, especially her masterpieces, *Interiors* and *The Wheel,* with nothing from the worthy but out-of-print *Right or Wrong* or *Seven Year Ache* ("to delve back further, you'll just have to buy those old albums," Cash advises in her liner notes). —D.M.

Cat Power

★★★ Dear Sir (Plain, 1995)
★★★ Myra Lee (Smells Like Records, 1996)
★★★★ What Would the Community Think (Matador, 1996)
★★★★½ Moon Pix (Matador, 1998)
★★★★ The Covers Record (Matador, 2000)
★★★★ You Are Free (Matador, 2003)

Cat Power is the Georgia-born indie-rock songwriter Chan Marshall, famed for her coldblooded, intimate voice; her shaky guitar; and her propensity for onstage meltdowns. Cat Power first gained notoriety in 1996 for "Not What You Want," the closing track of her second album, *Myra Lee.* For nearly six minutes, Marshall strums her guitar and wails the title phrase over and over, wistfully at first, and then desperately; by the end, she's moaning and screaming and banging her head against the wall. It's nails-on-chalkboard for nonfans, a sublime moment of hag-rock transcendence for true devotees, and Cat Power's entire career in a nutshell.

What Would the Community Think is leaner and tougher, powered by the rhythm section of Two Dollar Guitar guitarist, Tim Foljahn and Sonic Youth drummer Steve Shelley. Marshall intones a memorable cover of Smog's "Bathysphere," and rocks out in the vaguely creepy, definitely cathartic "Nude as the News," yelping "I still have a flame gun for the cute ones" with her own cryptic sort of menace. *Moon Pix* is even stronger, a long, bleak night of cold sweat scored for guitar, and it still holds up as one of the '90s great singer/songwriter triumphs. While musicians from the Dirty Three play atmospheric folk-punk background, Marshall sings raggedy, sorrowful ballads like "Metal Heart" and "Say," stretching her vowels out into forlorn moans. It's a quiet album, but the songs get more powerful the closer you listen, as Marshall testifies to her unbearable longing for an unbearable love.

You Are Free was even more expansive musically than *Moon Pix,* ranging further afield in terms of songwriting (with a few gaffes) but with a renewed sense of emotional urgency, bringing in flourishes of gospel and even disco uplift in great songs like "Free," "Speak for Me," and "Good Woman." In between, Marshall had her most eccentric success with *The Covers Record,* paying tribute to her personal hit parade with versions of songs by Lou Reed, Moby Grape, Smog, Michael Hurley, and Baptiste/Koury's "Sea Of Love." Best of all, Marshall strips down the Stones' "Satisfaction," ditching the chorus and wailing over just acoustic guitar. "Baby baby baby, come back," she pleads. "Can't you see I'm on a losing streak?" She waits a week. He doesn't come back. She still can't get no satisfaction. Scary shit, and a typical Cat Power bone chiller. —R.S.

★★★	Live, 1981–1982 (4AD, 1999)
★★★	John Peel Sessions (Fuel 2000, 2001)

Nick Cave wasn't the first punk with literary ambitions, nor was he the first rock singer to be fascinated and inspired by suffering, religion, or the gothic lore of the American South. But few have explored these themes with Cave's passion and determination, or lasted as long. Scholarly and tasteful, yet unafraid to plunge into genuinely disturbing territory, Cave's songs of dark romance and soulful pain are articulations of a worldview that champions any source of deep, honest emotion, be it love or hate.

Cave and his first group, the Birthday Party, moved from Australia to London in 1980 and took the post-punk scene there by storm. With frantic, explosive songs that seemed to barely hold together as they were played, and Cave's maniacal ravings ("Release the bats! Release the bats!/Pump them up and explode the things") delivered in a Mephistophelean baritone, the group—guitarist Roland S. Howard, drummer Mick Harvey, bassist Tracey Pew, and a rotating cast—set a post-Stooges standard for chaos in rock.

The band's sloppiness drained some of the music's force (the live set attests to this), but at its best, as in the late sessions collected on *Mutiny/The Bad Seed,* they summon fearsome demons. The Birthday Party was built to collapse, and in its wake Cave formed a new band, the Bad Seeds, with Birthday Party alumni (Harvey and *éminence grise* Anita Lane) and others of like minds (bassist Barry Adamson, guitarist and noisemonger Blixa Bargeld from Einstürzende Neubauten). From the first notes of *From Her to Eternity* Cave's new vision is clear: a group with the power and control to channel the morbid grandeur of his lyrics. A cover of Leonard Cohen's "Avalanche" and the title track are slow exorcisms, with brooding, bluesy mantras building into erotic floods; only the silly cover of Elvis' "In the Ghetto" breaks the spell.

With *The First Born Is Dead,* Cave confronted head-on the specter of the blues that had hovered over his work from the beginning. The album's eight songs are a baptism in the blues as a demonic force, an almost unbearably intense experience that moves from the mythic birth of Elvis Presley ("Tupelo") to a trip on the bluntly metaphoric "Train Long-Suffering" ("In the name of pain and suffering/There comes a train/ . . . Woo-woo! Woo-woo!") to a grisly death of strangled guitar ("Six Strings That Drew Blood"). Reinterpreting the blues for the merciless climate of the '80s, it is one of Cave's most unflinchingly powerful statements.

Kicking Against the Pricks is a missable collection of covers that merely codifies obvious influences (Johnny Cash, Velvet Underground), but *Your Funeral . . . My Trial* and *Tender Prey* break bold new ground. Barely three years since his howling days with the Birthday Party, Cave ably slides into the guise of an unsmiling crooner; with a few tricks borrowed from U2 and Tom Waits, the Bad Seeds supply subtle and atmospheric instrumentation. After *Your Funeral*'s haunted dreamscape, *Tender Prey* is a cold-eyed, all-too-real trip through hell on earth, beginning with an agonizing first-person narrative of death by electrocution in "The Mercy Seat" ("I think my head is smoking/And in a way I'm hoping/To be done with all these looks of disbelief"). "Up Jumped the Devil" and "Deanna," a love letter to a bad girl as only Cave can deliver it, are his first strong pop singles.

In 1989 Cave moved to Brazil and found new inspiration in the concept of *saudade,* a mixture of longing, sadness, and deep sensuality. *The Good Son* opens with a reverie sung partially in Portuguese, "Foi Na Cruz" ("It Was on the Cross"), and reintroduces Nick Cave as a compassionate, Christlike absorber of mournful emotions ("The Good Son," "Sorrow's Child," "The Weeping Song"). *Henry's Dream* takes those emotions and runs with them in quasi-conceptual narrative form. Henry (along with a series of other Cave-like characters) is man adrift in a cruel world, who struggles to express his woe ("Brother, My Cup Is Empty") but is always stymied ("Suspicion and dark murmurs surround me/Everywhere I go they confound me"). There isn't much of a literal plot, but the emotional narrative is painfully clear, and the songs—some of Cave's best, like "Papa

Won't Leave You, Henry" and "Straight to You"—are played with a masterly eloquence by the Bad Seeds, now sounding like true vets.

Let Love In is Cave and the Bad Seeds at a peak moment of songwriting and instrumental skill, every nuance played with total confidence and control (captured beautifully on *Live Seeds*). "Red Right Hand," written by the group as a whole, is a gothic masterpiece with a creeping rhythm and a creaking organ line, one of the band's most instantly catchy tunes. Cave is truly loving his sinister Elvis act throughout, but sings with a faith and earnestness in "Lay Me Low" and "Let Love In." *Murder Ballads* is a set of gimmicky duets sung with P.J. Harvey, Kylie Minogue, and Shane MacGowan; Cave's solo songs ("Stagger Lee," "O'Malley's Bar") show what he can do without such celebrity distractions.

Cave's '90s masterpiece is *The Boatman's Call,* a solemn and steady collection of introspective piano ballads. "Into My Arms," sung with just piano and bass, contemplates divine versus earthly love, as Cave says, "I don't believe in an interventionist God," and then hedges: "But if I did, I would kneel down and ask Him/Not to intervene when it came to you." In "People Ain't No Good," he struggles unconvincingly to hold on to his misanthropy. This is mature, confessional songwriting, vividly interpreted for the post-goth age. *No More Shall We Part* treads similar but more maudlin ground; the highlight is a deliciously vicious jab at paranoid fundamentalism, "God Is in the House." *Nocturama* is more of the same, and though it's beautiful stuff, like *No More* it lacks the bare emotional force of its predecessors. (Though you might forget that listening to the 15-minute ode to passion and obsession, "Babe, I'm on Fire.") —B.S.

Kasey Chambers

★★★½ The Captain (EMI, 2000)
★★★½ Barricades & Brickwalls (EMI, 2002)

Australian Kasey Chambers is proof that you don't have to be an American hillbilly riding a losing streak to convincingly sing country music. Growing up, Chambers heard her mom and dad (and older brother Nash, now her producer) sing folk tunes nightly around a campfire—the family lived a nomadic existence on Australia's Nullarbor plains. Returning to civilization when Kasey was nine years old, the Chambers family launched a career as the Dead Ringer Band, and their brand of New Australian country caught on, leading to a string of seven successful albums.

Kasey Chambers began her solo career in 1998, after her parents separated. She recorded her solo debut, *The Captain,* in a frenzied, two-month live-recording binge on remote Norfolk Island, but word of her blunt, unsparingly direct songs soon spread to Nashville. Among her early fans were Buddy and Julie Miller, who contributed backing vocals to four of the album's songs.

The Captain, released in 1999 in Australia and 2000 elsewhere, established Chambers as a talent to watch: It won best country album at Australia's version of the Grammy Awards, and, as an opening act on several tours, the body-pierced Chambers earned the respect of some of the feistiest women in American country, among them Emmylou Harris and Lucinda Williams, who guests on *Barricades & Brickwalls'* trenchant "On a Bad Day."

Where *The Captain* brilliantly negotiates a balance between country and rock, *Barricades & Brickwalls* is more of a roots-music thoroughbred: Buoyant, fiddle-driven reels alternate with sour drinking songs, and rock guitars turn up as an occasional spice, not the primary ingredient. This keeps the focus on Chambers, whose laconic, down-to-earth singing style makes everything she sings sound like wisdom learned the hard way, lessons that could apply equally in the Tennessee hills and the Aussie outback. —T.M.

Gene Chandler

★★★½ 20 Greatest Hits (Collectables, 1994)
★★★ Live at the Regal (Collectables, 1994)
★★½ Rainbow '80: A Golden Classics Edition (Collectables, 1994)
★★½ Just Be True (Collectables, 1996)
★★★½ The Duke of Earl—The Best Of Gene Chandler (Collectables, 2000)

Gene Chandler's 1962 single "Duke of Earl" is a magnificent record, a blend of doo-wop background choruses and pop-soul lead vocals that was writ large in rock & roll history by the conviction of Chandler's performance: He digs into the lyric as if he believes every word of the tale about a man become royalty by dint of his romantic illusions. He promises to take his paramour—identified as the "Duchess of Earl"—on a walk through "my Dukedom, and a paradise we will share," all under the protection of the invincible Duke ("nothing can stop me now/because I'm the Duke of Earl"). Then he swoops into a keening falsetto wail and really gets his swerve on. This was a soul man whose macho bluster never subsumed his sensitive side. On "The Duke of Earl" the pose worked brilliantly, giving Chandler a chart-topping hit, and a career-defining one at that.

Chandler was never again to impact the culture so dramatically, but he carved out a solid career over the course of nearly three decades of recordings. The critical Vee Jay and Constellation recordings of the '60s can be found on two first-rate collections, *The Duke of Earl—The Best of Gene Chandler* and *20 Greatest Hits,* whereas 1980's *Rainbow '80—A Golden Classics Edition* is a 17-track overview of Chandler's late-career Chi-Sound years in the '70s. —D.M.

Tracy Chapman

★★★★½	Tracy Chapman (Elektra, 1988)
★★★★	Crossroads (Elektra, 1989)
★★★	Matters of the Heart (Elektra, 1992)
★★★½	New Beginning (Elektra, 1995)
★★★½	Telling Stories (Elektra, 2000)
★★	Let It Rain (Elektra, 2002)

One of those rare talents who seem to have sprung full-grown, Chapman found instant success with her 1988 debut. For a while, singers like Suzanne Vega and Rickie Lee Jones had been making the world safe for sharp, no-nonsense women singers, and the climate was right for Chapman's arrival. Still, no one was prepared for the depth and breadth of the album—for its dignity, seasoned musicality, or thematic reach.

"Fast Car" was the first marvel, a folk song real enough to acknowledge the existence of convenience stores and a woman's thirst for speed. And it sounded great, too: Drum heavy and tough, its efficiency allowed Chapman's voice to glide and slur. Then there was "Talkin' 'Bout a Revolution," its '60s spirit revamped by a Reagan-era urgency (and by the fact that Chapman was no countercultural vet, but a young black woman). "For My Lover" showed that she could also handle the intimate revolution: A hip defense of loving however you want to love, it alluded to both a Virginia jail and psychoanalysis, encapsulating Chapman's neat blending of archetypal folk references and the talk of today.

Chapman's followup, *Crossroads,* was also fine. Again, she offered folk's perennial philosophy—working-class solidarity, a yearning for independence and release—alongside newer ways of thinking: woman power, African-American pride, and self-help stubbornness. With violin played by ex-Dylan accompanist Scarlet Rivera, "This Time" revealed the writer's new capacity for elegance; Neil Young, reprising the childlike piano of "Helpless," added grace to "All That You Have Is Your Soul." And throughout the record, Chapman's knowing vocals sounded wise beyond her years. *Matters of the Heart,* an introspective album, didn't break any new ground; none of its atmospheric songs really stood out. *New Beginning* was subtler and richer, and its Grammy-winning single, "Give Me One Reason," spurred a Chapman revival. *Telling Stories* was strong and steady—clear-eyed, poetic folk/funk of the kind that first got Chapman noticed. On *Let It Rain* Chapman seems a little stuck, both stylistically and emotionally: there are no revelations here. But stay tuned. —P.E.

Charlatans U.K.

★★	Some Friendly (1990; Beggars Banquet, 1998)
★★★	Between 10th and 11th (Beggars Banquet, 1992)
★★★	Up to Our Hips (Beggars Banquet, 1994)
★★★½	The Charlatans U.K. (Beggars Banquet, 1995)
★★★★	Tellin' Stories (Beggars Banquet, 1997)
★★★★	Melting Pot (Beggars Banquet, 1998)
★★★	Us and Us Only (MCA, 1999)
★★	Wonderland (MCA, 2001)
★★★	Songs From the Other Side (Beggars Banquet, 2002)

The Charlatans had the misfortune to hail from Manchester, England, during roughly the same period as groups like the Stone Roses and the Happy Mondays, and have spent the better part of their career living down the association. The fact that their 1990 debut, *Some Friendly,* was a derivative ode to dippy, Hammond-happy psych-pop didn't help. On their darker second effort, the Charlatans (who would soon add the "U.K." to their American releases to avoid confusion—and litigation—with the '60s Bay Area psychedelic group of the same name) first demonstrated their growing fascination for classic rock of the Doors/ *Exile on Main Street* variety. Though there's nothing much memorable here (except for the fine, if workmanlike, "Tremelo Song") and not a hook in sight, it was nevertheless a strong step forward from their debut.

In 1994 *Up to Our Hips,* a comparatively uncomplicated pop record mostly notable for containing the great semi-hit "Can't Get Out of Bed," ushered in an era of intra-band turmoil that would play out over the next few records and included lineup changes, the embezzlement conviction of the band's accountant, and the armed robbery conviction of keyboard player Rob Collins, who would later be killed by a drunk driver. The albums from this period—1995's *The Charlatans U.K.* and 1997's *Tellin' Stories*—are the group's finest, charting their progression from Mancunian faux-pop hedonists to England's most assured purveyors of soulful Brit-rock. Tracks like "North Country Boy" and "Here Comes a Soul Saver" suggest a growing fondness for country-folk and blues-rock that, all previous evidence to the contrary, oddly suits them, and the psychedelic flourishes are no longer laid on with a trowel.

The greatest hits/odds and sods compilation *Melting Pot* followed, offering all of the band's hits and a track remixed by the Chemical Brothers, with whom the Charlatans often collaborated. *Us and Us Only* served mostly as a showcase for the group's growing Bob Dylan fascination, with the usual pop and psychedelia sprinkled throughout. Released September 11, 2001, and quickly forgotten (stateside, at least) *Wonderland* mixes electronica, pop, rock, and disco grooves in a not entirely satisfying way. Though singer Tim Burgess adopts a passable falsetto on tracks like "I Just Can't Get Over Losing You," and the record-opening "You're So Pretty—We're So Pretty" is atypically witty, this is the group's most disjointed effort since their debut. Though not as essential as *Melting Pot,* 2002's *Songs From the Other Side* collates seven years' worth of Beggars Banquet B sides, and includes several remixes and instrumentals. —A.S.

One of popular music's most protean talents, Ray Charles tried almost every imaginable style in his 40-odd years as a recording artist, building a body of work that includes not only classic R&B and rock numbers, but also forays into country, jazz, and even middle-of-the-road pop. His heartfelt eclecticism has resulted in some astonishing music, but it has also led to enough misguided and mediocre work to make even the most sympathetic listener wish that the singer's judgment was as sterling as his talent.

Charles made his first recordings in 1947 and 1948 and began releasing singles on the Downbeat label (which eventually became Swingtime) in 1949. These sides have been assembled in low-cost packages of varying content and quality; to that extent, *The Early Years* is typical, offering minimal fidelity and little or no recording information, though habitués of bargain bins and used-record stores will surely find others. Musically, the value of these collections is marginal, as Charles' earliest singles owe much to the sound of Charles Brown or Nat "King" Cole. But the singer's maturity is immediately apparent, even if his future greatness is not.

As such, the Ray Charles story begins, for all intents and purposes, in 1952, when his contract with Swingtime was purchased by Atlantic Records. Atlantic was where Charles' sound finally came into focus, and where he recorded his first, and in many ways his most influential, R&B hits, although it took a few years for him to build up to that point. Those interested in a chronological view of his progress should proceed directly to the triple-album *The Birth of Soul,* which finds the young singer/pianist starting with more or less conventional blues ("The Sun's Gonna Shine Again") and jump tunes ("Mess Around," "Jumpin' in the Morning") before hitting on the formula that would beget "I Got a Woman," "Hallelujah I Love Her So," and other breakthrough singles. What makes these singles so affecting is the way they fuse jump-blues rhythm work to a gospel-inflected vocal, an approach that electrified pop fans (but scandalized churchgoers, who felt its marriage of secular and spiritual was nothing short of sacrilege). "I Got a Woman," "Mess Around," and "Hallelujah I Love Her So" are all on *Ray Charles,* though lesser tunes like "Funny but I Still Love You" and "Losing Hand" are just as interesting, if only for Mickey Baker's growling guitar work. *Yes Indeed!!* adds Charles' first Top 40 hit, "Swanee River Rock (Talkin' 'Bout That River)," as well as the similarly soulful "Leave My Woman Alone" and "Lonely Avenue," while *What'd I Say* delivers the singer's first Top 10 pop hit, the supercharged call-and-response number "What'd I Say," as well as the churchy "Tell All the World About You" and a surprisingly swinging version of the Scottish folk song "My Bonnie." "I Believe to My Soul" and "Hard Times" are the highlights of *The Genius Sings the Blues,* but the album flanks those performances with lesser numbers from Charles' earliest sessions for the label. (*The Birth of Soul* includes everything on these four albums, which have been deleted but are widely available on import.) *Live* augments the 1958 recording *Ray Charles at Newport* with six selections recorded a year later (and originally released on *Ray Charles in Person*) and is a stunning testament to the power of Charles' live band, particularly Margie Hendrix of the Raeletts.

Even though his commercial success was strictly with R&B tunes, Atlantic considered Charles a jazz musician as well as a pop star; indeed, his Atlantic discography contains almost as much instrumental work as vocal. Unfortunately, his Atlantic jazz sessions have been packaged and repackaged so many times over the years that it takes some work to sort it all out. Even the easy, one-stop double-disc sampler of such sides, *Blues + Jazz,* is now out of print. Several titles have been reissued by Rhino as twofers, often joining a weaker set with a stronger one.

Whether it's worth sifting through these titles is, of course, another issue entirely. Charles isn't a bad jazz pianist, but he isn't an especially inspiring one, either, being more adept at rhythm work and accompaniment than strict improvisation. Then again, these aren't terribly demanding jazz dates, tending more toward the sort of soul-jazz groovesmanship of Ramsey Lewis or Ahmad Jamal, with only the Milt Jackson collaborations pushing the playing beyond the pedestrian. Some of that can be chalked up to the fact that *Soul Brothers* and *Soul Meeting* find Charles collaborating with a better class of musician (Oscar Pettiford, Connie Kay, Kenny Burrell), but both recordings feature Charles on alto saxophone, an instrument that brings out much of the same soulful passion that informs his singing.

Perhaps the most important of his albums for Atlantic is *The Genius of Ray Charles*—not because it's full of hits (it isn't) or contains his best work for the label (it doesn't), but because it introduces the musical approach he would follow for much of the '70s. Although *The Genius of Ray Charles* puts him in front of a big band, the sound he pursues is nothing like that of the swing-era bands, or even the jazzy, large-ensemble sound that singers like Frank Sinatra and Dean Martin went for; instead, what Charles comes up with is a curious hybrid of the brassy R&B of his pop-oriented recordings and the showy schmaltz favored by the era's middle-of-the-road acts. Hence, Charles bounces from the powerhouse blues of "Let the Good Times Roll" or "Two Years of Torture" to overblown, gimmicky renditions of fare like "Alexander's Ragtime Band," although at times, he's able to incorporate elements of both ("Come Rain or Come Shine"). (Be aware, however, that the album is abysmally recorded, with frequent overmodulation muddying its brasher moments.)

By the dawn of the '60s, Charles had jumped to ABC Records, negotiating a deal that gave him, among other things, full ownership of the master tapes of the recordings he made for the label. Ironically, Charles' control of these recordings is part of the reason most of his albums from this era have been out of print for years, despite the fact that this period produced his biggest hits, including such singles as "Hit the Road Jack" and "Unchain My Heart." Granted, most of Charles' Top 40 hits from this period have been collected on the two Dunhill CDs, *His Greatest Hits, Vol. 1* and *Vol. 2,* but considering Charles first began to think in terms of albums instead of singles and planned his recordings with that in mind during this phase, serious listeners have little choice but to seek out the used-record market.

Still, it helps to shop carefully, for in the early '60s, Charles had an unfortunate fondness for conceptually organized albums, an approach that often led to trouble. His first album, for instance, was a collection of place-name songs called *The Genius Hits the Road,* which on the one hand boasts "Georgia on My Mind," perhaps his greatest ballad performance ever, and on the other drags in such dreck as "Moon Over Miami" and an appallingly gimmicky "Deep in the Heart of Texas." *Dedicated to You* focuses on songs featuring women's names in their titles; *Sweet and Sour Tears* offers songs about crying; *Have a Smile With Me* goes for allegedly funny songs like "Two Ton Tessie" and "The Man With the Weird Beard"; and so on. Most seem a trifle forced, but when Charles gets hold of a theme that grabs him—say, "Let's Go Get Stoned"—the results are amazing.

Nowhere is that more the case than on *Modern Sounds in Country and Western Music,* an album of country songs performed Ray Charles–style. This wasn't unknown territory for a singer who had grown up listening to country music and had even played piano in a hillbilly band, but what makes the album work is his ability to transform these songs. Consider, for instance, the way he turns Floyd Tillman's twangy "It Makes No Difference Now" into a jaunty, horn-driven blues or adds a jazzy edge to Hank Williams' "Hey, Good Lookin'." But it was his sturdily straightforward reading of the Don Gibson hit "I Can't Stop Loving You" that struck a strong chord with the pop audience. Even more stunning is his soulful take on "You Are My Sunshine," from *Modern Sounds in Country and Western Music, Vol. 2* (and added as a bonus track to Rhino's CD version of *Modern Sounds in Country and Western Music*), which treats it as a groove tune, with solid rhythm work and scintillating interplay with the Raeletts. But then, Charles' second *Modern Sounds* album is generally superior to the first because of its smoother balladry (his version of Williams' "Your Cheatin' Heart") and because the blues tunes rock harder (his smouldering rendition of Gibson's "Don't Tell Me Your Troubles").

As he had done at Atlantic, Charles continued to make jazz albums for ABC. *Genius + Soul = Jazz* is by far the best of the lot, since its big-band-and-organ arrangements retain much of the sound of his pop albums. But the low-key and swinging *Ray Charles and Betty Carter* also shines, particularly when the two genially spar through "Baby, It's Cold Outside." There are also a few jazzy moments on *Live in Concert,* much as there were on his Newport album for Atlantic. But his self-indulgent '70s jazz albums are easily ignored, apart from the funkier moments of *My Kind of Jazz* ("Booty Butt").

By the mid-'60s, much of Charles' output was solidly middle-of-the-road, with a heavy emphasis on string-laden ballads. That's not to say he had abandoned the soul side of his sound, just that it grew ever more compartmentalized. And by the mid-'70s, Charles was better known for what he'd done than for what he was doing. That didn't stop him from making good records, of course—the *Porgy & Bess* he recorded with Cleo Laine is easily one of the best pop performances those songs have seen, at times surpassing even the legendary Louis Armstrong/Ella Fitzgerald version—but the good ones were becoming increasingly rare. He returned to Atlantic in 1977 and released four albums, none of which particularly demand hearing, though they have their moments: his "Oh, What a Beautiful Morning," from *True to Life,* for instance; the quasi-disco "You 20th Century Fox," from *Love & Peace,* is a genuine hoot; the way he rephrases the Dobie Gray hit "Drift Away" on *Ain't It So.*

There was worse to come, however. Charles jumped to Columbia in 1983, where he proceeded to turn himself into a country singer. It wasn't a complete transformation, of course; *Just Between Us* is mostly blues and features a rollicking "Save the Bones for Henry Jones," recorded with Lou Rawls and Milt Jackson, while *The Spirit of Christmas* reverts to the MOR/R&B formula that served him so well in the '60s. When Charles did sing country for Columbia, though, he sang it straight, without any of the R&B overtones that marked his first C&W experiments. And frankly, the music gains nothing from his fidelity. If anything, the reverse is true, as most of these albums are indistinguishable from the Music Row hackwork Charles' producer, Billy Sherrill, churned out for his other clients. Granted, the singer does occasionally rise above the production-line predictability of his material, as when he breathes life into "3/4 Time" on *Wish You Were Here Tonight,* or joins Merle Haggard in savoring the loneliness of a "Little Hotel Room" on *Friendship.* Still, saying these albums aren't entirely bad hardly counts as a recommendation. The indefatigable Charles followed his first, ragged Warner Bros. release, *Would You Believe?,* with a Pepsi commercial that proved more popular than any of his contemporary recordings. And the clever, enjoyable repackaging of *Sings for America* confirms that Charles has repertoire for all circumstances and sensibilities. Part of his genius is that he can never be counted out for good.

Given the breadth of Charles' output, it might seem that the best introduction would be a well-balanced best-of album. *A 25th Anniversary in Show Business Salute* is perhaps the best singles package ever assembled, inasmuch as its 35-song selection draws from his Atlantic and ABC recordings; the trouble is, the set has been long out of print. Nowadays, *Definitive Ray Charles* makes a very decent substitute. The five-CD *Genius & Soul: The 50th Anniversary Collection* attempts to be the definitive update of the *25th Anniversary* set, though the quality wobbles on the later discs. Still, it remains the Charles box for those who want a big one. *Standards* concentrates on Charles' pop-soul proclivities, as do the well-organized *Greatest Hits* volumes on Rhino, which add welcome energetic cuts. Rhino's *Anthology* is an excellent collection that includes the ABC hits and other recordings of interest. Perhaps the most satisfying way to celebrate the ongoing legend of Ray Charles is through a pair of vivid performance DVDs: *In Concert* (Image, 2001) and *Live at Montreux Jazz Festival* (Geneon, 2002). Before his death in June 2004 at the age of 73, Charles finished an album of duets, released as this book goes to press. —J.D.C./M.M.

★★★	Cheap Trick (Red Ant, 1997)
★★½	Special One (Big 3, 2003)
★★★★	The Essential Cheap Trick (Epic/Legacy, 2004)

From bar band could-be's to arena rocking superstars, from bargain bin has-beens to objects of hipster rediscovery, Cheap Trick has always been, well, Cheap Trick. Playing Beatlesque melodies with the might of Kiss or Nugent, they're humorous, hook-filled, bracingly loud, and subtly sensitive. Coming out of the Midwest bar-band scene in the mid-'70s, the band debuted with *Cheap Trick,* a sharp collection of power pop with an almost metallic edge. Songs like "He's A Whore" displayed all the band's weapons: Rick Nielsen's savage yet melodic guitars, Bun E. Carlos' seemingly multilimbed fills, Tom Petersson's driving bass, and Robin Zander's archetypal rock & roll voice (capable of an earthy, raw tone as well as sugar-sweet cooing). The band went on a three-album run to start their career, with *In Color* and *Heaven Tonight* following up the debut. These albums contain more anthems ("Surrender" being the absolute zenith of their art) than you can pump a fist at. The seminal *Live at Budokan* is a testament to both their tremendous power as a live act and the near maniacal devotion of their Japanese fans. Riding high off the success of one of the great live records of all time, the band made *Dream Police,* which drops a bit in consistency and sadly ups the sheen to the production end of things (though the title track remains a classic).

The band continued to pursue ill-fitting production when they teamed with Beatles producer George Martin on *All Shook Up.* Power-pop Svengali Todd Rundgren helped the band adjust to new-wave sonics on the underrated *Next Position Please,* which contains the gorgeous "I Can't Take It."

The group saw both their commercial rewards and their aesthetic standards take a dip for much of the '80s until 1988's *Lap of Luxury,* which features two of that year's most ubiquitous hits: "The Flame" and the Elvis Presley cover "Don't Be Cruel." When Cheap Trick finally got paid it was almost too late; they were thought of as senior members of the hair-metal movement, and one-hit wonders at that.

The band had a quiet first half of the '90s with two forgettable albums, but their second self-titled release was a return to form, shedding much of the glossy production that had hampered so many of their records. *Special One* was a case of forgettable self-parody, but with the reissue of several of their early albums, Cheap Trick nonetheless earned the respect they deserved. —M.C./C.R.

Chemical Brothers

★★★	Exit Planet Dust (Astralwerks, 1995)
★★★★	Dig Your Own Hole (Astralwerks, 1997)
★★★	Surrender (Astralwerks, 1999)
★★½	Come With Us (Astralwerks, 2002)
★★★½	Singles 93–03 (Astralwerks, 2003)

Manchester, U.K., duo Tom Rowlands and Ed Simons put the arena-rock bombast in Britain's rave scene by blending power-chord guitars with old-school house, hip-hop breakbeats, and soul dusties. Little wonder that the Chemical Brothers translate to mainstream American audiences far better than some of their more adventurous and esoteric U.K. peers.

Exit Planet Dust sets the template for what became known as Big Beat, an offshoot of techno that turns the four-four kick drums of house into a battalion of virtual John Bonhams, augmented by screeching sirens and shape-shifting sound effects that doubled as a soundtrack for ecstasy trips. Tim Burgess (Charlatans U.K.) and a then-unknown Beth Orton add cameo vocals, but the album never quite matches the peaks of the duo's live sets.

Dig Your Own Hole refines the formula and becomes a defining record for the new rave generation: a mix of cameo vocalists, walloping drum loops, and disco psychedelia that crushes barriers between genres. "Block Rockin' Beats" sets the tone, driving Nine Inch Nail–sized beats through a Schooly D hip-hop sample, while "Setting Sun" channels the Beatles' "Tomorrow Never Knows" through Oasis' Noel Gallagher, whose melodic instincts balance the Chems' AC/DC-like penchant for turning everything up past eleven.

The electro-beat high starts to wear off on *Surrender,* which plays like a series of homages to the duo's influences: Kraftwerk on "Music: Response," *Revolver*-era Beatles on "Let Forever Be" (with Gallagher again on vocals), and New Order on "Out of Control" (with New Order's Bernard Summer on vocals). *Come With Us* is a return to a more "underground" sound; that is to say, it owes more to house than rock. But only the tripped-out, nearly beatless atmospherics of "Hoops" qualify as innovative.

Singles 93–03 nicely summarizes the Brothers' decade-long run while reflecting their decline; the latter-day tracks seem gimmicky and uninspired compared to the early rave classics. —G.K.

Clifton Chenier

★★★★ Louisiana Blues and Zydeco (1965; Arhoolie, 1990)

★★★ Clifton Chenier & Rockin' Dupsie (Flyright, 1989)
★★★ Live at St. Mark's (Arhoolie, 1990)
★★★★★ Zydeco Dynamite: The Clifton Chenier Anthology (Rhino, 1993)

Clifton Chenier wasn't just the King of Zydeco—he pretty much invented zydeco as we know it. Although he came up playing the same Creole party music as his father and grandfather, the young accordionist began to incorporate blues elements into his sound in the mid-'50s, and in so doing redefined zydeco. Although Chenier made his first recordings for the tiny Elko label in 1954, his earliest work in print at this writing are his 1955 sessions for Specialty, collected on *Bayou Blues:* tracks like "I'm On My Way" and "Eh, Petite Fille" are typical of his blues-fueled style. His only other recordings from this period to have made the transition to digital can be found on the first eight tracks of *Clifton Chenier & Rockin' Dopsie,* but as much as these sessions capture the sweaty enthusiasm of his playing, their heavily distorted sound makes them of interest only to dedicated fans.

Chenier's recordings thereafter simply refined the style he'd developed in the '50s. *Bon Ton Roulet* shows how well he could rock it, while the solidly traditional two-steps and waltzes included on *Louisiana Blues & Zydeco* are proof that Chenier was by no means just a rocker. Still, perhaps the best of Chenier's albums is *Bogalusa Boogie,* a near-flawless recording that vividly captures the accordion-and-washboard interplay between Clifton and his brother Cleveland as well as the solidly soulful groove of their Red Hot Louisiana Band.

A diabetic, Chenier's health began to fail in 1979, but that hardly slowed his recording schedule; if anything, it increased. Unfortunately, of the albums recorded between 1979 and his death in 1987, only *I'm Here* manages any consistent degree of quality; the rest, though generally superior to most of his competition, lack the sparkle of his earlier output. —J.D.C.

Cher

★★ Gypsies, Tramps & Thieves (MCA, 1971)
★★★ Cher (Geffen, 1982)
★★ Half Breed (MCA Special Products, 1992)
★★½ It's a Man's World (Reprise, 1996)

★★ Believe (Warner Bros., 1998)
★ Bittersweet: The Love Songs Collection (MCA, 1999)
★★½ The Millennium Collection—The Best of Cher (MCA, 2000)
★★★ Song for the Lonely (Warner Bros., 2001)
★★★½ The Very Best of Cher (Rhino, 2003)

Everybody knows Cher. In the '60s, she was the taller half of Sonny & Cher, singing "I Got You, Babe," "The Beat Goes On," and other showbiz-hippie hits with her shaggy husband, Sonny Bono. As early as 1965, she'd commenced what has become her unthinkably long string of solo hits, first scoring heavily when "Bang Bang (My Baby Shot Me Down)" went to #2 on the 1966 pop charts.

Between then and now, much has gone on in the life of Cher: TV shows, the break-up of her marriage to Bono, an acting career that yielded a Best Actress Oscar in 1987 for *Moonstruck,* several husbands and boyfriends; the death of Sonny; controversy concerning her relationship with her outspoken lesbian daughter, Chastity; beauty products sold on cable TV; face-lifts; megashopping—everything reported on in the media with the care, consistency, and detail usually reserved for the ongoing chronicling of popes. Cher never goes away. When she wrote her autobiography a few years back, she implied, in her unfailingly straightforward yet kindhearted way, that it was easy being a rock-identified female icon like Chrissie Hynde or Debbie Harry—but that, as a proud child of Hollywood, it was rather more of a feat to do it in feathers.

As a singer, she's always been a great celebrity, but that's not to say Cher hasn't had her grand moments in recorded sound. She has definitely had a way of making people want to hear her, over the course of decades and in several styles, at least in three-and-a-half-minute shots. Her sense of rhythm is nothing special, and her enunciation is often notably poor, but what Cher has is a rich, deep throb in her voice, usually at the lower end of her upper range, that she keeps returning to, keeps lavishing sound upon, keeps climbing upward into; at times, she sings more like someone trying to do an impersonation of a classy guitar soloist. This bent makes *Bittersweet,* a collection of standards, unlistenable, especially given Bono's goofy arrangements and his earless production of Cher's singing, which is horrible here. But her weird power makes throttle-heavy baroque '80s rock numbers such as "I Found Someone" or "We All Sleep Alone" (from *Cher*) seriously kick.

Gypsies, Tramps & Thieves and *Half Breed* are the original-release albums named for the enormous-selling hits, from 1971 and 1973 respectively, of their titles, and both pure stirring junk; spotty as collections, these albums indicate that Cher has usually worked best as a singles artist. The *20th Century Masters* anthology goes a way toward collecting her various hits from different record companies—a nice, long, musically chewy mix of "Take Me Home," Cher's 1979 disco debut; "The Way of Love," a signature ballad the size of Arizona. The job, however, didn't really get done until recently, when Rhino released *The Very Best of Cher.* It entered the pop album charts at #7.

The first track on that collection was "Believe," Cher's 1998 electronicized pop stroke that turned out to be her biggest record ever, a piece of music beloved by everyone from grocery store moms to Damon Albarn of Blur, who pronounced it brilliant. In 1995, she'd tried a proper adult pop album of the sexy and considered sort that Tina Turner, say, excels at. *It's a Man's World,* it was called, and Cher sang well enough, particularly on songs as important and well chosen as Paul Brady's "Paradise Is Here" and "The Sun Ain't Gonna Shine Anymore," the Walker Brothers' old '60s 45-rpm aria. Expensive, intelligently produced and conceived, the album was still only a little better than okay.

What Cher needed was a big fat hit—she just couldn't compete with Tracey Thorn—even if the producer did wildly alter her voice electronically. "Believe" was that tune. In her 50s, Cher had done an iconistic variation on her own iconhood. After September 11, 2001, she released "Song for the Lonely," a no-holds-barred dance-music prayer believably concerned about heroes, tragedy, people with recently broken hearts, and hope. Cher's transformation into the world's all-purpose kindhearted rock-identified female icon seemed complete. It was the triumph of feathers. —J.H.

Neneh Cherry

★★★★ Raw Like Sushi (Virgin, 1989)
★★★ Homebrew (Virgin, 1992)

A former punk singer and the daughter of jazz cornet player Don Cherry, Neneh Cherry won accolades for her unclassifiable debut from hip-hop, pop, R&B, and dance partisans alike. *Raw Like Sushi* focuses her ferocious energy on an honest treatment of social ills—specifically their effect on women—and witty takes on boy-girl culture. The music is refreshingly diverse, transforming the inoffensive R&B-inspired British dance music of the time into a delivery system for hard beats, rhymes, and rock instrumentation. The album's hit, "Buffalo Stance" (a cover of an obscure new-wave

B side), turned Cherry into a feminist star both hip-hoppers and popsters could love.

Sidelined for three years, Cherry finally followed up her acclaimed debut with *Homebrew,* a measured study of the same subjects covered on *Raw Like Sushi. Homebrew* goes further with the rock sound, particularly on the fierce "Money Love" and "Trout," the latter a duet with R.E.M.'s Michael Stipe. The rest is pride and optimism, up-from-the-ghetto stories and better-do-right demands, connected by the complex web of syncopated beats and arcing trip-hop lines of sound that give the record a mellow, loungey feel. Cherry's social idealism remains impeccable, but her earnestness is a bit of a letdown for those inspired by the sassy, keen-eyed commentator she so cleverly played on *Raw.* —A.B.

Vic Chesnutt and Mr. and Mrs. Keneipp

★★★	Merriment (Backburner, 2000)

"I'm not an optimist/I'm not a realist/I might be a subrealist," sings Vic Chesnutt on *About to Choke*'s "Myrtle," a darkly comic, self-effacing riddle in a career filled with dark comedy, self-deprecation, and poetic riddles. Chesnutt, who was confined to a wheelchair after a car crash at age 18, has been one of the most prolific and enigmatic songwriters of his generation, writing in a simple style that nonetheless communicates immediate sensitivity and pain. His best songs capture, in the same breath, hope and disappointment, escape and self-destruction, love and pity—stories without a plot so much as a "subrealist" attention to detail.

Chesnutt was discovered in Athens, GA, by Michael Stipe, who produced his first two albums with a light hand. *Little*'s instrumentation is, for the most part, just Chesnutt and his guitar, which lends stark power to the album's most dramatic points. Chesnutt the poet appears fully formed here. "Gepetto" pictures Pinocchio's lonely creator left behind after his creation outgrows him, while closer to home, he tells of the anxiety of catching an opossum and a kitten in a rabbit trap and the relief when "we all three escaped safely." *West of Rome* expands the sound with a band but doesn't touch Chesnutt's outlook.

On *Drunk* and *Is the Actor Happy?,* Chesnutt delves deep into his psyche with portraits of a man bent on slow self-annihilation. "Sleeping Man" contemplates inactivity, while elsewhere on *Drunk,* he pictures cowardice of a more painful sort: "When I ran off and left her/She wasn't holding a baby/She was holding a bottle/And a big grudge against me." Chesnutt never says whether it's a bottle of formula or beer, but he makes his disappointment with himself quite clear. The reissues of the first four albums add more than 30 bonus tracks and telling essays by Stipe, Ian MacKaye of Fugazi, and other admirers.

Although Chesnutt's strong poetic voice is a constant—as is his thin, wavering little wail of a singing voice—his albums are a zigzag of varying instrumentation. *About to Choke* and *The Salesman and Bernadette* offer his most solid backing, as well as his most disciplined songwriting. "Degenerate" encapsulates *Choke*'s death-feeds-life theme with a prayer on the beauty and tragedy of ruin and transformation. "I am a rough ball of twine," he says. "But now I am frazzled and aloof/Degenerate, disintegrate the tight knots." The character sketches on *Bernadette* are easier to take, and the breezy accompaniment by the alt-country ensemble Lambchop is a delight. Chesnutt's wry humor, always present but usually smothered, gets a chance to shine: "She said her father looked like Woodrow Wilson. I saw him once and thought he looked a little bit like Truman. I know for a fact he has an Eisenhower ashtray." *Left to His Own Devices* was recorded by Chesnutt solo, and even though it features some outstanding songs, such as "Deadline," a chilling nursery rhyme about pressure, its unevenness can be irritating. The two albums he made under the name Brute, with the bland jam band Widespread Panic backing him, are anything but uneven—but also anything but memorable. That cannot be said, however, for *Merriment,* an unpolished yet utterly charming collaboration with Kelly and Nikki Keneipp, a couple in the Chesnutt circle who have also worked with Jack Logan. They wrote all the music, which is played clunkily but with heart. "Bless the idiot/That makes us split a gut" is one of the many brilliantly tossed-off lines that makes one wonder if there's any limit to Chesnutt's creativity.

Silver Lake, recorded in a Los Angeles mansion with a large, expert band, is warm, commodious, and a bit too slick. Many of the songs are not up to his usual standard, though that's slightly forgivable once you get to "In My Way, Yes," a rare glimpse of joy: "I never thought/I'd ever have a life like this/I never dreamed/I'd be alive." —B.S.

Chic

★★★	Chic (Atlantic, 1978)
★★★★	C'est Chic (Atlantic, 1978)
★★★★	Risqué (Atlantic, 1979)
★★★★½	Dance Dance Dance: The Best of Chic (Atlantic, 1991)
★★	Chic-ism (Warner Bros., 1992)
★★★	The Best of Chic, Vol. 2 (Rhino, 1992)
★★½	Live at the Budokan (Sumthing Else Music Works, 1999)
★★★★	The Very Best of Chic (Rhino, 2000)

Formed by New York session men Nile Rodgers and Bernard Edwards, Chic presided over the end of the disco era with a string of hits that celebrated the decadent high life with razor-sharp funk arrangements and classic pop hooks. Eschewing drippy orchestration and big-band anonymity, their style was slightly out of step with the times, or perhaps ahead of them: Chic's 1979 megahit "Good Times" formed the basis of both the Sugarhill Gang's joyously inventive "Rapper's Delight," a seminal hip-hop hit, and Queen's bloodless introduction to the materialistic rat race of the '80s, "Another One Bites the Dust."

With slick costumes, runway poses, and sophomoric French catchphrases ("Le freak/C'est chic"), the early albums exude a faux sophistication that is completely at odds with the band's tight grooves and all-American cheer-along vocals. Guitarist Rodgers and bassist Edwards reached to James Brown for the funk licks, but applied them to simple, hummable tunes, leaving plenty of negative space for you to get out there and dance. When it works, it's pop magic of the highest order: "Le Freak," "Good Times," "Dance, Dance, Dance (Yowsah, Yowsah, Yowsah)," and "I Want Your Love" are some of the most irresistible dance songs of all time. And when it fails, it's only disco. (Four later albums that dabbled in electro-funk thankfully are out of print.) *Dance Dance Dance* has all the essentials, and *The Best of Chic, Vol. 2,* making no pretense about delivering any more hits, mines the occasionally dazzling album cuts ("Hangin'," "Stage Fright"). The later Rhino set is skimpy and omits some essentials ("Chic Cheer," "Savoir Faire").

Rodgers and Edwards, who became two of the most sought-after producers in the business, reunited in 1992 for *Chic-ism,* a mostly dry run that only gets going on the last track, "M.M.F.T.C.F. (Make My Funk the Chic Funk)." Edwards died of pneumonia in 1996, at age 43, shortly after the Tokyo concert that resulted in *Live at Budokan.* —B.S.

★★★	Best of Chicago (Rhino, 2002)

Doing for Roman numerals what Kiss did for lipstick, Chicago was the quintessential hippie-dad band of the '70s. These furry-headed guys employed a lot of horn players and dabbled in jazz-fusion schlock, but they were never as slimy as Blood, Sweat and Tears. Their forte was harmlessly groovy soft-rock hits like "Make Me Smile," "Does Anybody Really Know What Time It Is?," and everyone's favorite, "Saturday in the Park." They saved the indulgent flute-and-bongo solos for their album tracks, and rocked out in "25 or 6 to 4." They didn't have a star frontman: just a logo, goopy ballads, a little R&B grit now and then, smooth '70s lingo ("Can you dig it? Yes, I can!"), whimsical shots like "Harry Truman," and a name that disguised how totally L.A. they were. It was a version of hippiedom for people who had to get up in the morning, although the quadruple-vinyl monstrosity *Live at Carnegie Hall* proved that Chicago could also sell to the burnout crowd. Robert Lamm sang the best hits, but Peter Cetera sang their best ever, 1977's enigmatic and slightly scary "Baby, What a Big Surprise."

Chicago actually gave its twelfth album a title, *Hot Streets,* clearly the act of desperate men in the throes of a crisis. "Alive Again" was a perky hit, but the verbal-album-title gambit was soon abandoned, and it was a transitional period for the band after guitarist Terry Kath accidentally killed himself playing with a handgun. By the next big hit, "Hard to Say I'm Sorry" in 1982, Chicago was barely recognizable: horns and Roman numerals gone, synthesizers and Arabic numerals here to stay, Peter Cetera's whine up top. The Chicago of the '80s was an easy-listening franchise that really could have used a stoned clarinet solo or two to liven things up. In the '90s, as the radio hits disappeared, the band continued to have success as a live oldies act. *Night and Day* was a big-band tribute; *25,* a Christmas album. The best '70s hits are on 1975's *Chicago IX,* with the let's-paint-the-logo-on-the-wall cover. Most of the same songs appear on the *Group Portrait* box, the 2002 Rhino *Best of Chicago* (although in some inferior edits), and the 1983 *If You Leave Me Now,* which confusingly came out between *Chicago 16* and *Chicago 17.* Predictions that Chicago could kick Boston's ass have yet to be tested empirically. —R.S.

Alex Chilton

★★★★	Like Flies on Sherbert (Peabody, 1979)
★★★★	Bach's Bottom (Razor & Tie, 1981)
★★	Live in London (Aura, 1982)
★★★½	Document (Aura, 1985)

★★½	1970 (Ardent, 1996)

Alex Chilton is your basic professional cult legend. Barely ever inspired to work, famously surly, musically brilliant, commercially nonexistent, he's bounced around the edge of the music business for over thirty years, the picture of dapper wastedness. The first phase of his strange career was in the mid-'60s, when as a 16-year-old Memphis boy, Chilton sang the manfully gruff lead vocals on the Box Tops' huge hit "The Letter." By the time he returned with his own group, Big Star, he had a completely different voice, high and sweet. But when Big Star collapsed, Chilton began the third and most durable phase of his career: the charismatic, self-destructive Southern grifter scamming his way to musical glory.

Chilton's discography is a complete mess. In the late '70s, he spent his famous "lost decade" coughing up material for scattered indie and import quickies. His first proper solo album, *Like Flies on Sherbert,* is a generously lubricated assault on any notion of production values, with pop gems like "My Rival" and "Hey! Little Child" falling apart at every chord change. The covers range from a ragged "I've Had It" (Ceroni/Bonura) to KC and the Sunshine Band (a damn fine "Boogie Shoes"). The only real musical parallels are the Lindsey Buckingham basement tapes included on Fleetwood Mac's *Tusk,* and the early Pavement singles that came out years later. *Like Flies on Sherbert* sank like a stone, which only added to Chilton's growing legend. *Live in London* was even messier. Eventually, his recordings appeared on cult collections such as *Lost Decade* and the well-titled *Dusted in Memphis.* The 1994 edition of *Bach's Bottom* is the best place to hear these songs, especially his eternal cry of physical love, "Take Me Home and Make Me Like It." "Free Again" is off-the-cuff country, "Bangkok" is off-the-cuff rockabilly, and the incoherent acoustic ramble "Walking Dead" is so far off the cuff it's rolling across the floor.

Chilton dropped out for a while, working as a dishwasher in New Orleans, but in the mid-'80s, with young bands like R.E.M. and the Replacements tooting his horn, he made one last stab at a steady career. He came back as a New Orleans soul hipster, with a funny voice and a half-assed rhythm section. Specializing in EPs, presumably because they're easier than real albums, he did great covers of R&B obscurities (Eve Darby's "Take It Off," Willie Tee's "Thank You John") beside occasional originals ("Lost My Job," "Thing For You"). *High Priest,* an actual full-length album, has a hilarious version of "Volare." *Black List* was his best retro EP, with Furry Lewis's "I Will Turn Your Money Green" and the nasty original "Jailbait" ("Every time I turn my back/Jailbait's driving my Cadillac"). Since then Chilton has mined the same vein with diminishing returns (*A Man Called Destruction, Set*), although he does a nice "My Baby Just Cares for Me" on *Clichés. Stuff* is the closest thing to a coherent introduction, which isn't to say it's terribly coherent. *19 Years* is easier to find than *Stuff* but not as good; the 1985 summary *Document* is premature; the early solo recordings released as *1970* are even more chaotic than *Bach's Bottom.* Currently touring the oldies circuit with the reunited Box Tops, Chilton may never sing "Take Me Home and Make Me Like It" again in his life, but a fan can dream. —R.S.

Chocolate Genius

★★★★ Black Music (V2, 1998)
★★★★ Godmusic (V2, 2001)

Marc Anthony Thompson, a.k.a. Chocolate Genius, relishes the fact that he's an African-American artist making music that recalls white indie rockers like Paul Westerberg and Mark Eitzel, and he named his debut *Black Music* just to underline that point. Still, the album title has less to do with the color of Chocolate Genius' skin than with the content of his compositions, which are about as morose as you can get: "Half a Man," "Don't Look Down," "A Cheap Excuse," "Hangover Five," "Hangover Nine," "Stupid Again." As rendered by Thompson in a husky near-whisper, this is gripping stuff, turning despair into ghostly beauty. The album's centerpiece, "My Mom," about a parent's slow fade into the depths of Alzheimer's disease, is a guaranteed tearjerker.

Godmusic is marginally more positive. A few of its early songs mine modern R&B grooves, in marked contrast to its very "white"-sounding (despite the moniker) predecessor. But the cocktail turns out to be subtly spiked; sure, Thompson sounds a lot like Al Green on "For One More Look at You," but would the good reverend ever lend his voice to lines such as "Born by fire and bred with weasels/Flex up accordingly, my child"? By the record's midpoint, the Genius has moved on to spacier, almost psychedelic terrain, and the results—"Bossman Piss (In My Lemonade)," "To Serve You," "Infidel Blues"—are simply sublime.

Back in the 1980s, before he was Chocolate Genius, Thompson recorded two albums of Prince-style soul-pop for Warner Bros. under his own name. Both *Marc Anthony Thompson* (1984) and *Watts and Paris* (1989) are out of print but well worth hunting down. —M.R.

Chuck D

★★★ Autobiography of Mistachuck (Mercury, 1996)

The sole solo album by the great, booming voice of Public Enemy isn't so much an autobiography as a catalogue of what pisses him off, although for this dissenter-for-life, that may indeed constitute his story. Over bare, soulful backing tracks that avoid an overload of samples or Flavor Flav, the former Carlton Ridenhour—that's "the commissioner" to you, kid—takes aim at hip-hop's violent infighting and coldhearted materialism, exploitive media, drugs, and those "modern-day Stepin Fetchits" ignorant of the heritage of black radicalism. One track is a simple list: "No Land Cruisers, no drug users/ . . . No Negroes with egos/No mo' shows callin' women bitches and hos." Easy targets, maybe, but what is he going to talk about, finding renewable energy sources? —B.S.

Chumbawamba

★★★ Tubthumper (Republic/Universal, 1997)
★★★½ Uneasy Listening (EMI [UK], 1999)
★★★★ WYSIWYG (Republic/Universal, 2000)
★½ Readymades (Republic/Universal, 2002)

The first that most of the world heard of Chumbawamba was its 1997 worldwide hit, "Tubthumping," an inescapable party classic about drinking and singing. By that point, though, they'd already been a band for almost 15 years—an anarchist punk collective from Leeds, England, with a handful of traditional close-harmony folk tunes mixed into its repertoire and a sweet tooth for the pop charts. The band's first six albums are usefully condensed into the import collection *Uneasy Listening.* It's got Chumbawamba's angriest songs, and some of its funniest and most tuneful: broadside slams on homophobia, the British poll tax, nouveau riche architecture, and everything else that's not specifically anarchist. Best line: "Nothing ever burns down by itself/Every fire needs a little bit of help."

Once that I-get-knocked-down-but-I-get-up-again chorus connected, though, the group had all the help it needed. Considered as the populist agitprop it was meant to be, *Tubthumper* is an abject failure: It's perfectly possible to listen to it without getting a hint of its politics beyond polite up-with-people-ism, and releasing it on a major label made Chumbawamba come off as a multinational corporation's declawed pet anarchist. As a party record, though, it's swell, with thickly layered hooks and harmonies everywhere, and enormous choruses popping up every minute or so.

WYSIWYG solves the problem by making its politics a lot more blatant, and the band seems a lot more enthusiastic laying into planned communities, Microsoft, and, ultimately, itself ("Dumbing Down"). Its 22 songs and splinters flow like a single suite, produced with the allusive high-density gloss of a TV commercial and sung with tongue nailed into cheek—the deadpan irony of "Celebration, Florida" hits harder than a full-volume rant possibly could. The shenanigans pause only for a lovely near–a cappella take on the Bee Gees' "New York Mining Disaster 1941." *Readymades,* on the other hand, is a vacant, hookless dud: folk-song samples and bland singing pasted onto prefab dance grooves. Skippable. —D.W.

Cibo Matto

★★★★ Viva! La Woman (Warner Bros., 1996)
★★★½ Super Relax (Warner Bros., 1997)
★★ Stereo Type A (Warner Bros., 1999)

Butter 08

★★★ Butter 08 (Grand Royal, 1996)

Cibo Matto were bright lights in the anything-goes days of the mid-'90s, two crazy-sexy-cool Japanese women hooking up in the East Village to dance this mess around with thrift-shop funk, punk-rock fashion, third-hand hip-hop beats, and lyrics about sex and food. (Their name is garbled Italian for "food madness.") Yuka Honda and Miho Hatori released their excellent indie debut single "Birthday Cake" in 1995, chanting "Extra sugar! Extra salt! Extra oil and MSG!" The flip side was a very strange cover of Soundgarden's "Black Hole Sun," slowed down to a dirge and sung in French. After that aperitif, *Viva! La Woman* was the full-course feast: "Know Your Chicken," "White Pepper Ice Cream," "Artichoke," "Beef Jerky," and for dessert, a disturbingly erotic version of "The Candy Man." The Cibos mixed up hip-hop, dub, lounge, and Japanese pop, while dropping multilingual science into their Beasties-style raps: "Spare the rod and spoil the chick/Before you go and shit a brick."

Viva! La Woman brought Cibo Matto surprisingly broad success—*Time* magazine even named it one of the 10 best hip-hop albums of all time, presumably on a day when there were a lot of paint fumes drifting through the office. But *Stereo Type A* was a bland flop, despite the single "Sci-Fi Wasabi." Hatori has sung with many other artists, including the Beastie Boys ("Start!"), Air ("Wonder Milky Bitch"), and the Gorillaz ("19–2000"). The *Super Relax* EP is worth finding for goofball versions of the Stones' *Satanic Majesties* oddity "Sing This All Together" and the bossa-nova standard "Aguas de Marco," a duet between Hatori and Russell Simins of the Jon Spencer Blues Explosion. Hatori and Honda also joined Simins in the East Village supergroup Butter 08. The group's sole album, 1996's *Butter 08,* holds up surprisingly well as one of the great indie-rock flukes of the '90s, summing up its time and place in the high-spirited grooves "Butter of 69," "Mono Lisa," and "Butterfucker." —R.S.

Circle Jerks

★★★ Group Sex (Frontier, 1980)
★★½ Wild in the Streets (Faulty Products, 1982)
★★½ Golden Shower of Hits (LAX, 1983)
★½ Wönderful (Combat Core, 1985)
★★ VI (Relativity, 1987)
★★★½ Gig (Relativity, 1992)
★★★ Oddities Abnormalities and Curiosities (Mercury, 1995)

Circle Jerks' cartoon punk logo tells you everything you need to know: a blond punk, close-cropped hair, ripped jeans, spike armbands, big boots, chain around the waist, in mid-mosh. First and foremost and possibly only, this is dumb, funny music for running into one other. If Beavis and Butt-Head listened to hardcore instead of metal (and were, like, ten years older), they would both be slavish Jerks fans.

Former Black Flag singer Keith Morris recruited former Redd Kross guitarist Greg Hetson to form the joyously, fearlessly, speedily obnoxious Jerks around 1980. *Group Sex* is an iconic SoCal skate-punk album: 16 whole minutes of real fast, kinda tuneless, kinda tasteless, self-explanatory hardcore whomp, complete with titles like "I Want Some Skank" and "World Up My Ass." *Group Sex* was witty and rude where other bands from the time period come off as self-obsessed and cranky.

Wild in the Streets is not as wasted as the debut, but that cover of "Put a Little Love in Your Heart" is pretty genius. *Golden Shower of Hits* sports one of the all-time great album covers and a couple of classics, "Coup d'État" (also heard on the fabulous soundtrack to *Repo Man*), "When the Shit Hits the Fan," and the fairly stupid "Jerks on 45," which Jerks-izes such hits as "Along Comes Mary," "Close to You," and "Love Will Keep Us Together."

Wönderful isn't, it's just the sound of a silly hardcore band trying to figure out where all the punks went. *VI* is more focused, confident, and powerful, but it's still miles less interesting than most of the noise rock that Morris' peers were making. The band went on an extended hiatus soon after, with members moving on to other projects (Hetson joined punk-lifers Bad Religion, for example). *Gig* chronicles a solid reunion show, with rip-snorting energy, and Morris' obnoxious charisma adds some juice to even the later, *Wönderful* and *IV* songs.

The Jerks ended up on a major label for *Oddities, Abnormalities and Curiosities,* and the result is a perfectly respectable hard-rock album that neither betrays old glories nor breaks significant new ground, a record that in no way diminishes the timeless advice they gave us: "We all have to duck/when the shit hits the fan." —J.G.

★★½	Riding with the King (Duck/Reprise, 2000)

Eric Clapton may have earned his reputation with his guitar, but he owes his solo career to his voice. It's his singing that has carried his best work, from the frenetic gospel groove of "After Midnight" to the pained melancholy of "Tears in Heaven." In fact, his least interesting recordings tend to be those that most emphasize his solos—an irony, perhaps, but also a testament to the fact that Clapton is at the end of the day more than just another guitar hero.

Eric Clapton, the album that launched his solo career, was recorded with musicians he'd met while a part of Delaney & Bonnie & Friends (he was a featured player on the duo's 1970 release, *On Tour*) and boasts similar blues-and-gospel overtones. Although his lithe, understated vocals make the most of "Blues Power" and a cover of J.J. Cale's "After Midnight," Clapton seems somewhat overwhelmed by the size of the band here; perhaps that's why he grabbed the rhythm section—Bobby Whitlock, Carl Radle, and Jim Gordon—and ran off to form Derek & the Dominos. But that band fell apart in 1971, and Clapton, beset by depression and a heroin problem, wasn't heard from until 1973, when Pete Townshend organized the star-studded (but generally forgettable) *Eric Clapton's Rainbow Concert.*

Joining forces with producer Tom Dowd, Clapton went to Florida to record *461 Ocean Boulevard,* the album that first showed his pop-star potential. Although the material isn't obviously commercial, being given mainly to blues (Robert Johnson's "Steady Rollin' Man"), oldies (Johnny Otis' "Willie and the Hand Jive"), and reggae ("I Shot the Sheriff," by the then unknown Bob Marley), Clapton's affectless delivery is almost irresistible, cutting to the heart of the blues while avoiding the sort of guttural mannerisms most pop listeners found off-putting. The album was a massive success, but its standard wasn't easily maintained. *There's One in Every Crowd,* for instance, virtually duplicates its predecessor's approach, but with considerably less success, commercial or artistic. Mostly, the difference was the writing, as no amount of reggae groove is going to make Clapton's "Don't Blame Me" as memorable a song as "I Shot the Sheriff."

After a passable live album, *E.C. Was Here,* Clapton returned to the studio in search of a new direction. *No Reason to Cry* wasn't quite it; despite a duet with Bob Dylan ("Sign Language") and a backing band that includes Ron Wood, Robbie Robertson, and Georgie Fame, the only track that really works is the amiable, calypso-tinged "Hello Old Friend." So Clapton ditched the all-star tack, and took a low-key approach to *Slowhand.*

Bingo—the best album of his career. Working with his own band and once again relying more on the songs than the groove, Clapton seems utterly at home here, from the wistful balladry of "Wonderful Tonight" to the stoned shuffle of "Cocaine" (yet another Cale composition) to the jauntily lustful "Lay Down Sally." And though there's plenty of blowing room—check the slide work on his version of Arthur Crudup's "Mean Old Frisco"—it's the strength of the material that gives the solos a worthwhile starting point.

Backless tries hard to re-create that balance but falls short in spite of a few lovely songs ("Tell Me That You Love Me" in particular) and some inspired rhythm work (especially on the Marcy Levy feature, "Roll It"). As had by then become customary, it was time for another live album, but *Just One Night* improves on the usual, thanks to a crack new band that keeps Clapton on his toes through the extended versions of "Double Trouble" and "Cocaine." Unfortunately, that dynamic didn't quite translate to the studio, and apart from the quietly dramatic title tune, *Another Ticket* is a disappointment.

Clapton changed labels soon after, a switch that prompted a predictable round of best-ofs. Apart from a non-LP version of "Knockin' On Heaven's Door," *Timepieces* boasts few surprises (though some fans may object to its preference for the live version of "Cocaine"), but *Timepieces, Vol. II: Live in the Seventies* is easily ignored. *The Cream of Clapton* justifies a third dip into this repertoire by padding his solo hits with singles by Cream, Blind Faith, and Derek & the Dominos, yet inexplicably manages to overlook "Lay Down Sally."

Meanwhile, Clapton's new deal was already producing impressive changes. Although *Money and Cigarettes* stumbled commercially, it's hardly a disappointment musically, thanks to a comfortable collection of songs and a backing band that includes slide virtuoso Ry Cooder and Stax session man Duck Dunn. Charming and unassuming, it's classic Clapton. *Behind the Sun,* on the other hand, is perhaps the guitarist's most daring effort, a (mostly) Phil Collins–produced project that finds him gamely trying everything from guitar synthesizer (on "Never Make You Cry") to what can best be described as 12-bar art rock (on "Same Old Blues"). Unfortunately, not everyone appreciated such risk-taking, and Warner Bros. honchos Ted Templeman and Lenny Waronker later added three tracks—including the tepid but radio-friendly "Forever Man"—to increase the album's commercial appeal. Perhaps that's why *August,* also produced by Collins, backs off a bit from its predecessor's innovations and does nothing more radical than adding a layer of synths to its version of Robert Cray's "Bad Influence." (It does, however, include "Tearing Us Apart," a raucous, sexually charged duet with Tina Turner that ranks among Clapton's finest vocal performances.)

Any such failings, however, were completely forgotten with *Crossroads,* a career-spanning, 73-song retrospective that included all of Clapton's most memorable recordings, from his days with the Yardbirds to the *August* sessions. It's an absolutely stunning collection, and goes a long way toward demonstrating that Clapton is, indeed, the greatest of all rock-guitar heroes. Unfortunately, *Crossroads 2: Live in the Seventies* is a shabby followup that isn't even entirely live (four selections are unreleased studio leftovers). Although most of the previously unreleased recordings have their moments, as in a Santana-ish run through "Eyesight to the Blind/Why Does Love Got to Be So Sad," the set's relative lack of scope and consistency makes it of interest only to completists.

Journeyman, the studio album following *Crossroads,* seems by the very nature of its title to shrug off intimations of greatness, and as such turns out to be a remarkably relaxed and satisfying album. After that minor success, however, Clapton's output becomes maddeningly diffuse, with the guitarist moving in several different directions artistically without making great progress in any of them. The concert recording *24 Nights* was an early symptom, with Clapton offering blues-themed sets, standard pop/rock fare, and even a set of tunes performed with an orchestra conducted by composer/arranger Michael Kamen.

Kamen (who later collaborated with Metallica on their album *S&M*) was no stranger to Clapton, having previously worked with the guitarist on the soundtracks for *Homeboy* and *Lethal Weapon II.* Clapton seemed to enjoy his work in Hollywood, and did the writing himself for his next soundtrack, *Rush.* But the dramatic instrumentals weren't what people noticed; instead, it was a dolorous ditty dubbed "Tears in Heaven" that drew all the notice. Reportedly inspired by the death of his infant son, Connor, the song was already a minor hit when Clapton recut it—along with an assortment of blues and classic rock chestnuts—for an episode of MTV's *Unplugged.* Released as an album, the Grammy-winning *Unplugged* reinvented Clapton yet again, and proved one of the biggest hits, commercially or artistically, of his later career.

Typically, Clapton responded to this burst of popularity by retreating into the blues. *From the Cradle* finds him diligently rerooting himself in the material that was his earliest inspiration, underplaying the solos and stressing the vocal element in the songs. As such, the best moments—whether in his swinging remake of Freddie King's "I'm Tore Down" or his impassioned run through the upbeat "Motherless Child"—stress the songs above all.

Clapton laid low for a few years after that, offering only a lame attempt at techno under the pseudonym T.D.F. (which may have meant "to die for" but should be taken as "to definitely forget"). Embarrassing as it was, the album marked the beginning of a long collaboration with former Climie Fisher keyboardist Simon Climie. *Pilgrim,* which Climie coproduced with Clapton, made some interesting inroads into smooth soul with "My Father's Eyes," no doubt in hopes of capitalizing on the success of the Babyface-produced "Change the World," which appeared on the soundtrack to the flick *Phenomenon,* starring John Travolta. But apart from the beautifully sad "Circus" and boogie-fueled "She's Gone," *Pilgrim* is a turkey.

Failure though it was, it sold well enough for Clapton and Climie to repeat the formula, with minor variations, on *Reptile,* a pleasant but inconsequential effort typified by the light soul of "I Ain't Gonna Stand for It" and the smooth jazz aspirations of the title tune. The rock-gospel harmonies of the Impressions are a particular annoyance. The polished but not especially passionate *One More Car, One More Rider* offers a live run through much of this material; it's also available (and somewhat more entertaining) on DVD, or as a CD/DVD combo.

On the whole, though, Clapton's fans were more interested in seeing him as a grizzled—if genteel—bluesman, hence the unexpected success of *Riding With the King,* a collaboration with B.B. King that involves more coasting than actual riding. The oily cover of Sam & Dave's "Hold On, I'm Coming" is particularly embarrassing. Still, that hasn't deterred Clapton, whose next venture into the blues was *Me and Mr. Johnson,* a tribute to Robert Johnson that somehow completely sidesteps the unearthly dread that once made these blues so compelling to young Brit rockers. Instead, the arrangements emphasize the songs' boogie bounce, to such an extent that even "Hellhound on My Trail" seems oddly upbeat. If that seems a betrayal of Clapton's youthful blues purism—a perspective neatly framed by the early recordings, with collaborators ranging from John Mayall to Duane Allman, compiled on *Martin Scorsese Presents the Blues*—it's worth remembering that the blues have been very, very good to Eric Clapton. Who can blame him for feeling good about that? —J.D.C.

Petula Clark

★★★	The Other Man's Grass Is Always Greener (Warner Bros., 1968)
★★★	Memphis (Warner Bros., 1970; Sequel, 1996)
★★	Today (1971; Sequel, 1997)
★★★	Live at the Copacabana (Sequel, 1994)
★★★	International Collection (Bear Family, 1999)
★★★	Downtown: The Greatest Hits of Petula Clark (Buddha, 1999)
★★★½	Anthology: Downtown to Sunset Boulevard (Uptown/Universal, 2000)
★★★	A Sign of the Times (Castle, 2001)
★★	Jumble Sale: Rarities and Obscurities (Sequel, 2002)

In a flourish of threatened, institutional antihipness, the Grammy Awards committee voted Pet Clark's "Downtown" Best Rock and Roll Recording of 1965. The ditty's nice bounce, of course, had nothing to do with Elvis or Little Richard—but Clark's Brit appeal, coinciding with the Beatles' advent, together with the relative assertiveness of the song's drum track, must have tricked fogies into thinking that this wasn't merely MOR given a mild Phil Spector–ish production. Actually, Petula's cool, clipped delivery proved that while she was no Dionne Warwick, her orchestral fare wasn't retread Doris Day either. A showbiz pro from age 11, Clark was canny enough to read the signs of the times, and her choice of material carefully avoided the ultrasunniness of pre-'60s pop. "The Other Man's Grass Is Always Greener," "Don't Sleep in the Subway," and "I Know a Place," all included on the Buddha *Greatest Hits* and the more comprehensive *Anthology,* gave her fairly spirited successes nearly into the '70s—and they remain enjoyable. For Clark maniacs, *International Collection* is a treat: 108 lush pop tunes, in German, French, Italian. *A Sign of the Times* is Pet on tour circa 2001, still in very fine voice. —P.E.

★★	Cut the Crap (Epic, 1985)
★★½	The Story of the Clash (Epic, 1988)
★★★★½	1977 Revisited (Relativity, 1990)
★★★½	Clash on Broadway (1991; Sony, 2003)
★★★★	Super Black Market Clash (Epic, 1993)
★★★½	Live: From Here to Eternity (Sony, 1999)
★★★★	The Singles (Legacy, 2000)
★★★★½	The Essential Clash (Epic, 2003)

The Clash were the romantics of the London 1977 punk explosion. They were the ones who took the noise to heart, who pushed hardest to see how far the new freedoms could go. They were also the ones who wrote the best songs, burning with political rage and mean guitars. Joe Strummer ranted in his guttersnipe slobber, while guitarist Mick Jones shaped the noise into high-speed anthems. They sounded friendly and scary at the same time, mixing up the punk anger of "Complete Control," the street aggression of "London's Burning," the urban loneliness of "Up in Heaven (Not Only Here)," and the jolly laughs of "Safe European Home." They were inspired by Nicaragua's Sandinista revolutionaries, but they weren't above a little art-for-art's-sake—after all, Sandino himself was a Wordsworth man, and the Clash made dramatic music out of their garageland politics.

The raw, messy U.K. debut is still the toughest punk album ever, so full of fury and passion and humor it sounds like it's going to burst into flames every time Mick lights up the coda to "Remote Control," every time Joe rasps, "I hate all the brightness/I hate all the cops" at the end of "Hate and War." The Clash sounds like young men wrestling with monsters, but not turning into monsters themselves—maybe even finding their humanity. But the record company deemed *The Clash* too rude for U.S. release and shelved it for two years. The belated, reshuffled American version deleted four great songs but added three not-bad ones, one great one ("White Man in Hammersmith Palais"), and maybe the greatest punk anthem ever, "Complete Control." The 35-minute U.K. version and the 43-minute U.S. version are both now separately available; apparently it's too much goddamn trouble for Sony to put all 19 songs on one 52-minute CD, so you'll have to do it yourself. While you're at it, add "Groovy Times" and "Gates of the West," two amazing songs from the bonus seven-inch that originally came with the U.S. version, for an incomparable 60-minute Clash buzz.

Give 'Em Enough Rope has cleaned-up sound and too much easy military shtick, despite killers such as "Safe European Home" and "Guns on the Roof." Like Martin Scorsese's *Raging Bull,* the double-vinyl *London Calling* dropped just in time to welcome the new decade, and wound up topping many critics' best-of-the-'80s lists. Also like *Raging Bull*—a film Scorsese directed while constantly playing *The Clash* at top volume for inspiration—it's an expansive portrait of doomed wiseguys, working-class anger, and American mythology, aiming for a grandiose death-or-glory scale. The Clash dabbles in reggae, ska, rockabilly, even New Orleans R&B, stretching out for classics like "London Calling," "Spanish Bombs," and the huge hit "Train in Vain (Stand by Me)."

Some fans liked *Sandinista!* even better: It's a big triple-vinyl mess, deliberately provocative and offensive from its title on down to the kiddie-chorus version of "Career Opportunities." The Clash's dub, hip-hop, and art-funk experiments get pretty dodgy, but even the many spliffed-out failures are fun to hear once, and that still leaves 14 or 15 great songs. The geopolitical stuff—"The Call Up," "Washington Bullets," "Charlie Don't Surf"—is dense, lyrical, informative, dreamlike, unlike any other protest-rock before or since. "Up in Heaven (Not Only Here)" is a shout-out from the London slums that produced punk to the New York projects that were producing hip-hop. "Hitsville U.K." has a nifty xylophone solo. *Combat Rock,* even artier than *Sandinista!* yet cleverly packaged as a pop move, had some excellent tunes ("Rock the Casbah," "Ghetto Defendant"), but the cover looked stupid and the band was audibly falling apart. Strummer kicked out Jones and replaced him with two handsome nobodies for the career-killing *Cut the Crap* (alternate title: *Contra!*), which offered only the bitter "This Is England" and the proto–Andrew W.K. synth-metal chant "We Are the Clash." Six people bought it, five actually played it all the way through, and everyone else was content to applaud the Clash for resisting reunion gigs after that.

Like the Doors, ABBA, and any other band that checks out, leaving a hungry corporation to feed, the Clash has been repackaged way past any point of dignity. The best compilations are *1977 Revisited, Super Black Market Clash,* and the first disc of the pricey gyp *Clash on Broadway,* which all collect the essential early singles that aren't on *The Clash*—don't get stuck without "Gates of the West," "Groovy Times," "Armagideon Time," or "Bankrobber." *The Singles* is a straightforward collection that hits a few bumps ("Know Your Rights," ugh) but gets the highs and lows of their music right; from the rebel swagger of "White Riot" and "Complete Control" to the arty exuberance of "This Is Radio Clash" and "Rock the Casbah," *The Singles* makes the Clash's whole career sound like a risk worth taking. Joe Strummer died suddenly of a heart attack in December 2002. The music world mourned for both the man and the old-fashioned idea that a rock star could ever try so hard to understand the world around him. His epitaph was from one of his greatest songs, "The Call Up": "There is a rose I want to live for/Although, God knows, I may not have met her/There is a dance an' I should be with her/There is a town—unlike any other." R.I.P. —R.S.

Jimmy Cliff

★★★½ Wonderful World, Beautiful People (A&M, 1970)
★★★ Struggling Man (Mango, 1973)
★★★ In Concert: The Best of Jimmy Cliff (Reprise, 1976)
★★ Special (Columbia, 1982)
★★½ The Power and the Glory (Columbia, 1984)
★★ Cliff Hanger (Columbia, 1985)
★★ Hanging Fire (Columbia, 1988)
★★★½ Ultimate Collection (Universal, 1999)
★★★ We Are All One: The Best of Jimmy Cliff (Columbia/Legacy, 2002)
★★★½ Anthology (Hip-O, 2003)
★★★½ 20th Century Masters (Universal, 2004)

Jimmy Cliff's two best performances—both groundbreaking reggae classics—are included on the soundtrack of *The Harder They Come* (see ANTHOLOGIES). Twice. Apart from "You Can Get It If You Really Want

It" and "The Harder They Come," the rest of Cliff's career has been devoted to a frustrated, one-sided affair with the American pop-soul mainstream. *Wonderful World, Beautiful People* contains his only other true contender—"Vietnam," a searingly melodic and rhythmically bold interpretation of the reluctant draftee blues. But the title track of this 1970 album exhibits the shallow sentimentality that sinks his subsequent efforts. At least "Wonderful World, Beautiful People" is catchy enough to get your attention for three minutes; Jimmy Cliff's later albums don't even get that far. Avoid the slick remakes of earlier material on *In Concert: The Best of Jimmy Cliff,* and stick with *The Harder They Come.* —M.C.

★★★½	25 All-Time Greatest Recordings: The 4 Star Sessions 1955–1960 (Varèse Sarabande, 2000)

Time has been Patsy Cline's greatest ally. Not that she had that much of it in her brief life, which ended in a plane crash near Camden, TN, on March 5, 1963, when she was 30. At her death, she'd had a handful of hit singles, three of them crossing over from country to reach the pop chart's Top 20, but she wasn't yet a commercial or artistic force in either genre. But the hits endured, growing in stature as the years progressed; and as other recordings became available posthumously, Cline became everything her career had portended before tragedy struck—her albums started selling and haven't stopped yet. The secret of Cline's undiminished appeal is not dissimilar to Elvis Presley's: Hers are great songs, performed with conviction and passion, telling simple stories people understand about love and longing and all the varieties of experience embraced by those two conditions.

Cline's first work, recorded in the late '50s, was with the Pasadena, CA–based 4 Star Music Sales. Critics have not always been kind to the 4 Star material, but in fact those five years produced some good work—not the monumental efforts that were to come, of course, but some good, solid traditional country; even the stillborn experiments in a pop direction have an adventurous quality that makes for interesting listening. The 1958 "I Can See an Angel" has a loping, country beat and supple pop background vocals from the Anita Kerr Singers supporting Cline's bright vocal. The upbeat shuffle "I Don't Wanta," recorded in 1956, features a whooping, unidentified female background chorus and guitar licks lifted from Scotty Moore's solos on Elvis' "Mystery Train." The standout from these years is "Walkin' After Midnight" and its B side, the evocative "Poor Man's Roses (Or a Rich Man's Gold)" (from the pens of pop songwriters Bob Hilliard and Milton Delugg), a #12 pop single in 1957. The allure of "Walkin' " is in its foreboding atmosphere—although there's a full combo behind her, Bob Moore's steady, loping bass line and Don Helms' swirling pedal steel lines dominate the soundscape, falling in beautifully behind Cline's bluesy, bone-weary vocal.

The 4 Star recordings take up most of the first two discs of MCA's gold-standard, absolutely essential box set, *The Patsy Cline Collection,* which contains all of her studio recordings from June 1, 1953, through February 7, 1963, and one stunning live cut recorded at the Ryman Auditorium (home of the Grand Ole Opry), the spiritual "Just a Closer Walk with Thee." Unlike the other collections of 4 Star recordings, those in the MCA box are sequenced chronologically, so it's possible to hear Cline gaining confidence as a vocalist, phrasing with more assurance and attitude as the years pass, adding nuance to her readings, shading lyrics, adding blues phrasings, and generally letting her feelings flow freely as her self-consciousness in the studio fades away.

Laserlight's *Great American Legends: The Patsy Cline Collection* collects the 4 Star material on three discs, but it's a typically skimpy Laserlight package: no liner info whatsoever. Still, it's 39 cuts of Cline in her formative years at a price point below the MCA box. Varèse Sarabande's *25 All Time Greatest Recordings: The 4 Star Sessions 1955–1960* is really 26 takes with the inclusion of an alternate take of "I Don't Wanta," but the disc is misleadingly titled anyway, since these are hardly all-time greatest recordings. The most essential supplement to the MCA box in rounding out the 4 Star years is Razor & Tie's excellent live album, *The Birth of a Star.* Assembled here are 17 performances from Cline's regular appearances on Arthur Godfrey's taste-making national TV show in 1957–58. Again, the material is not the classic Cline of 1960–63, but it's generally top-notch anyway, as are all of Cline's performances.

Come late 1960, Cline's 4 Star contract was winding down. Cline's producer Owen Bradley brought in a song for her first post–4 Star session cowritten by two fellows who would go on to carve out a substantial name for themselves in country music: Harlan Howard and Hank Cochran. Their song, "I Fall to Pieces," was a measured, dramatic, blues-tinged ballad recounting the singer's soul-shattering inability to get on with life in the wake of a failed romance. Cline sang as if she were barely able to maintain emotional ballast, her voice rising and falling, at times sounding so wounded she seemed near tears. Few country records, even great ones Patsy made after this, were so perfectly realized in every component as "I Fall to Pieces."

For the next three years Cline didn't do anything much different from what she had been doing at 4 Star—that is, assaying a wide range of tunes in and out of the country genre—but the quality of her material improved markedly, her performances matured, and Bradley's production intuition remained infallible. Along with Chet Atkins, Bradley had pioneered a new era in country music—the Nashville Sound—and successfully broadened country's appeal much as Roy Acuff had done upon his debut at the Grand Ole Opry in 1938. The classic songs—"Sweet Dreams," "Back in Baby's Arms," "Crazy," "Strange," "Heartaches," "You're Stronger Than Me," "Leavin' On Your Mind," "Faded Love," "Always," "Crazy Arms," and "Why Can't He Be You"—plus a host of nonsingle album tracks that sound like hits today, were written by people like Willie Nelson, Hank Cochran, Harlan Howard, Bob Wills, Carl Perkins, Don Gibson, Hank Williams, Cole Porter, Bill Monroe, Irving Berlin, Mel Tillis, Wayne Walker/Webb Pierce, and Floyd Tillman, among the most prominent.

The last eight of 27 cuts on Disc 2 of the MCA box, all 28 cuts on Disc 3, and all 22 cuts on Disc 4 chronicle the legacy Patsy Cline left. It doesn't get any better than that, but it does get more concise and cheaper for those desiring mostly the prime cuts.

A sure winner is the original 1967 release, *Patsy Cline's Greatest Hits,* containing a dozen certified classics—"Walkin' After Midnight," "Sweet Dreams," "I Fall to Pieces," "Back in Baby's Arms," and "Crazy"—the choice stuff. On the other hand, *20th Century Masters: Classic Patsy Cline* is an odd collection of nonhits such as "Half as Much," "Have You Ever Been Lonely (Have You Ever Been Blue)," and others that hardly substitute for the most famous tracks; ditto for Curb's *Best of Patsy Cline,* a shoddy package inside and out.

Note also three live albums, one being a volume of songs recorded at the Grand Ole Opry between 1956 and 1962 that shows Cline every bit as compelling a performer as she was a singer. *Live Volume Two* is actually a series of studio cuts with canned applause recorded in 1956 and transcribed for broadcast on shows sponsored by the Armed Forces. In some ways the most vital of the live albums—because it shows Cline giving a terrific performance under tough conditions—is MCA's *Live at the Cimarron Ballroom.* This 1961 performance at the Tulsa, OK, venue where Bob Wills and the Texas Playboys held forth every Saturday night for years marked Cline's return to the stage following a near-fatal car accident. She jokes about her condition between songs, but gets down to business when it's time to sing. The set list is interesting in that it includes hard country fare that a Tulsa audience would have eaten up at that time—"Lovesick Blues," "San Antonio Rose," "Walkin' After Midnight," "I Fall to Pieces," "Foolin' Around"—and some curveballs on the order of "Shake, Rattle & Roll," "Stupid Cupid" (the 1958 Connie Francis chart smash that Patsy performed at an army show that same year, preserved as a radio transcription on Disc 2 of *The Patsy Cline Collection*), and "When My Dreamboat Comes Home," which had been a Top 20 hit for Fats Domino in 1956. Given that she was still banged up from the car wreck, Cline's performance is remarkable for its energy and enthusiasm, as well as for the quality of the music she offered.

The one absolute must-to-avoid in the Cline catalogue is Island's abysmal and infuriating *Duets,* on which some industry types decided to wipe off Owen Bradley's arrangements, dub "contemporary" arrangements in behind Cline's original vocals, and then further dub in duet voices with Patsy's. Other than "Walkin' After Midnight," the song selection is lesser fare from the 4 Star years, but the newly recorded "duet" partners don't do justice to the project. Glen Campbell on "Too Many Secrets" is unlistenable, which might be said for everyone else involved as well. —D.M.

Clinic

★★★ Internal Wrangler (Domino, 2000)
★★★★ Walking With Thee (Domino, 2002)
★★★ 3 EPs (Domino, 2002)
★★ Winchester Cathedral (Domino, 2002)

Donning surgical masks in concert, Clinic takes a back-to-the-lab approach to postpunk. On its first album, *Internal Wrangler,* the Liverpudlian group mixes and mismatches the styles of krautrock, the Fall, U.S.-servicemen-turned-bizarro-beat-group the Monks, reggae dub, and Pere Ubu into tracks made out of ambling rhythms that are both shambling and hypnotic. The song "Internal Wrangler" is Roky Erickson's 13th Floor Elevators reinterpreted by a surf band, and "DJ Shangri-La" is a hilarious 58-second parody of every self-important mixmaster from Rza to Shadow. Clinic has more than a little in common with Scotland's Beta Band. They both will steal whatever is lying around and reconfigure it for optimum aesthetic pleasure no matter how little sense is made, or whether words come out wrong or are made up on the fly. The group's core setup of garage organ, muddy bass, overmiked drum beats, weedy free-associative singing, melodica, and sloppy postpunk guitar leaves plenty of room for experimentation. This is great news for lovers of adventurous stereo trickery. For the straight and narrow fan of alt rock, Clinic will probably be met with raised eyebrows and the universal gesture for the smoking of intoxicating substances.

To say that the followup, *Walking With Thee,* is a more polished album than *Internal Wrangler* is to say that it sounds like it took the musicians longer than half an hour to record it and that they spent more than a dollar on the process. The basic elements are the same, but there is an opening up and airiness to the tracks that give them a less unfinished feeling. There is a wholeness and consummation of intent. With a band like Clinic you wouldn't want anything too slick, or it would lose that element of risk that makes the best songs sound so vital. Nonetheless, it's telling that the first line on the opening track, "Harmony," is "I believe in harmony." All the instrumentation on *Walking With Thee* fits together naturally. This results in a quieter record with fewer sudden shifts or disorienting tonal juxtapositions. In the end, sound and technique end up taking a backseat anyway, because the songs are so damn good, a string of memorable melodies and vocal tics. Less bombastic or self-consciously weighty than a Radiohead, Clinic uses rock to push against warmth and groove to create beautiful noises that are not only fun but fun to think about. A collection of earlier EPs is recommended to fans who want their Clinic uncut, unhinged, and decidedly unclean.

Winchester Cathedral strikes a bit closer to the debut's Radiohead-on-benzedrine feel, but much of the time it sounds like the band members are just playing around with their noisemakers and not having much fun. Although "The Magician" and the guitar-driven "WDYYB" get by on typically high-strung grooves, atmospheric slow-burners such as "Home" and "Falstaff" sacrifice oddball charm for dull moodiness. Ade Blackburn's half-intelligible slur renders the songs more annoying than memorable, and *Winchester Cathedral* proves Clinic has finally succumbed to that which *Internal Wrangler* fended off so well: art rock. —S.S.

Clipse

★★★★ Lord Willin' (Star Trak/Arista, 2002)

Clipse—Virginia Beach siblings Malice and Pusha-T—began rhyming in the mid-'90s, back when they were high school friends with Pharrell Williams and Chad Hugo. After a 1998 album, *Exclusive Audio Footage,* went unreleased, their future seemed uncertain—until Williams and Hugo, a.k.a. super-producers the Neptunes, came to the rescue. *Lord Willin'* is unrepentant playa-rap, a guided tour of a day in the life of a coke dealer. Though the duo's matter-of-fact delivery is hardly original—Mobb Deep is an obvious influence—they offer so much gripping detail and action-packed forward motion it doesn't matter. And the Neptunes' beats never miss, from the ravey, tuned-static synth hook of "When the Last Time" to the grunting James Brown sax of "Young Boy" to the shockingly austere drum-theory-as-groove of "Grindin'." It's the most consistent, and best, album they've ever produced. —M.M.

The Clovers

★★★★½ Down in the Alley (Atlantic, 1991)
★★★★ The Very Best of the Clovers (Rhino, 1998)
★★★★ The Clovers/Dance Party (Collectables, 1998)

The first rock & roll vocal group, the Clovers racked up 21 Top 100 singles, including "Ting-A-Ling," "Don't You Know I Love You," and "From the Bottom of My Heart." Formed in 1946 as a pop-influenced, Ink Spots–style trio, the group was led by Harold "Hal" Lucas, who was joined in the venture by a couple of his friends from Washington, D.C.'s Armstrong High School, tenor Thomas Woods and bass singer Billy Shelton. Next into the fold was John "Buddy"

Bailey, a gifted lead vocalist whose soaring, plaintive tenor became a signature for the Clovers. Renamed the Four Clovers, the quartet in 1949 replaced Woods with second tenor Matthew McQuarter, and Shelton was replaced by Harold Winley. The Four Clovers officially became the Clovers with the addition of guitarist Bill Harris, also in 1949. Atlantic's *Down in the Alley* and Rhino's *The Very Best of the Clovers* are both first-rate overviews of the Clovers' important contributions to the style of R&B that evolved into soul music in the '60s. At 21 tracks, the Atlantic disc has more to offer than Rhino's 16, but both titles cover the ultimate, essential recordings. For added perspective, Collectables' single-disc *The Clovers/Dance Party* offers two complete early albums. Of these, *The Clovers* is by far the more interesting, with "Lovey Dovey," "Ting-A-Ling," "Blue Velvet," and "Devil or Angel" among its featured tracks, making it something of an essential primer on postwar R&B. —D.M.

The Coasters

★★★½ The Ultimate Coasters (Warner Bros., 1990)
★★★★★ 50 Coastin' Classics: The Coasters Anthology (Rhino/Atlantic, 1993)
★★★★ The Very Best of the Coasters (Rhino, 1994)

The story of the Coasters is the story of two songwriter/producers, two groups, and two labels. It's also the story of brilliant record making in low-tech times and a body of work with depth, humor, feeling, and some sly social commentary.

As a concept, the Coasters were born in the fertile imaginations and driving ambition of Jerry Leiber and Mike Stoller, two white, East Coast, R&B fanatics (Leiber a native of Baltimore, Stoller of New York City) who had migrated to the West Coast and become friends, often double-dating with their black girlfriends. Stoller was a talented piano player, familiar not only with current styles in black popular music, but also conversant with jazz harmonic structure and well versed in contemporary classical music. No musician he, Leiber had aspirations as a writer for the legitimate theater but carried around a notebook in which he penned original blues lyrics, its contents betraying his playwright's sensibility—he didn't write songs, he wrote minidramas, minicomedies, and created characters.

The pair took their mutual interest in R&B to the next level and began working out songs of their own. Their first bite came in 1951, when they sold "That's What the Good Book Says" to the Robins, who were recording for the Modern label. Over the next couple of years, their songs were recorded by Ray Charles, Big Mama Thornton (the original "Hound Dog"), Little Willie Littlefield ("K.C. Loving," later retitled "Kansas City"), and Charles Brown, among the most prominent. In 1953, they paired with music-business veteran Lester Sill and founded their own label, Spark Records, and made the Robins one of their first signings.

The third Spark release was the Robins' first single, "Riot in Cell Block #9," and it was a gem. The Robins boasted a terrific lead tenor singer in Carl Gardner, and Bobby Nunn, a bass singer who could be as emotive as the Ravens' Jimmie Ricks, also had a comedic flair that set him apart from the competition. Nevertheless, neither of these resources suited Leiber and Stoller's ideal for the lead vocal, so they brought in another R&B singer, Richard Berry (now best remembered as the man who wrote "Louie Louie"), to add the proper degree of menace to their tale of a prison uprising told by an inmate serving time for "armed robb-er-y." Berry's unrepentant performance—he sounds like one of those scary psychos who dispassionately recount dismemberments on A&E's *Justice Files*—was buttressed by the sound of sirens wailing; tommy guns firing; a tough, bluesy arrangement punctuated by stop-time figures lifted from Muddy Waters; and wailing, protesting, down-and-dirty blues saxophone riffing by Gil Bernal. And in a quintessentially Leiber literary touch, the riot ends with the prisoners back in their cells after being teargassed, as Berry closes out the tale with an ominous aside, "but every now and then . . ." and the song fades out over the course of nearly 30 seconds of stop-time riffs and gutty sax solos.

With "Riot in Cell Block #9," a mold had been cast. Not only did the Robins sound different, thanks to Stoller basing their harmonies on a jazz approach, but as a lyricist, Leiber was laying down some sly social commentary. "Riot" didn't fool anyone in radio, where it was deemed too controversial, as was the followup single, "Framed." In this story, Bobby Nunn tells of "walking down the street, minding my own affairs" when he is picked up by the cops, put in a lineup, and framed for a liquor store robbery by a stool pigeon. From the cops to the DA and the judge, every authority figure is corrupt to the bone; when the song fades out with Nunn repeating "I was framed" until he is no longer audible, the implication is clear that this character will not quietly accede to the injustice he's experienced any more than the prisoners in cell block #9 had been rendered impotent by tear gas. This was heady stuff for 1953, but it was in the air. In 1950, Percy Mayfield had applied the velvet hammer to racial prejudice in his beautiful chart-topping hit, "Please Send Me Someone to Love," and here was Leiber daring to say the American system was flawed, that everyone was not equal in the eyes of the law. The Robins' singles weren't hits, and Spark, like small labels then and now, had distribution problems that made their releases difficult to find even in the "race music" market. Still, these recordings were part of the first, small intimations of great social change on the horizon in postwar America.

Come 1955, and another sort of change was spurred by Spark's release of the Robins' "Smokey Joe's Café." This Leiber lyric, concerning a knife fight over a woman in the establishment named in the title, was bolstered musically by a captivating, twangy guitar solo by jazz stalwart Barney Kessel and a smoldering, slightly stuttering sax solo from Gil Bernal, which prefigured the King Curtis sound signature of later recordings. "Smokey Joe's Café" made the national R&B charts—a first for a Spark release—and caught the attention of the Ertegun brothers and Jerry Wexler at Atlantic Records in New York. They made an offer Leiber and Stoller couldn't refuse: sell Spark to Atlantic and come to New York to make records for Atlantic as independent producers (a first in the music industry, since labels had always had in-house artists and repertoire personnel to scout and sign artists, shape their material, and then produce it in the studio). The deal split the Robins, with Billy Richards, Roy Richards, and Ty Tyrell opting to sign with their manager's new label, and Gardner and Nunn joining Leiber and Stoller in New York, where they were teamed with Leon Hughes and Billy Guy and dubbed the Coasters, in honor of their West Coast origins. Atco, an Atlantic subsidiary, re-released "Smokey Joe's Café" and sold 100,000 copies of the single, a respectable number in those days.

The Coasters got off to a good start at Atco with 1956's "Down in Mexico," a slice-of-life set in a Mexican honky-tonk, driven in part by the Latin percussion provided by conga player Chico Guerrero. In 1957, though, they crossed over from R&B to pop with smashing results, and for two solid years could do no wrong, racking up six consecutive Top 10 hits and topping the pop chart in 1958 with "Yakety Yak," a resonant, rocking bit of anti-authoritarian teen humor that featured the debut of King Curtis and his stuttering sax solos as regular features of the group's soundscape and of late-'50s rock & roll. The 1959 followup to "Yakety Yak," "Charlie Brown," an unabashed celebration of the school misfit, topped out at #2 for three weeks and was followed into the Top 10 later in the year by the minidrama of bad versus good "Along Came Jones" (featuring a hilarious, overwrought comic turn by Carl Gardner as the melodramatic narrator), and then by "Poison Ivy," a Latinized warning about a woman who is nothing but trouble, intentionally subverted by Nunn and Gardner's lusty lead vocals, which do everything but announce, "For a good time, call. . . ."

The Coasters were Top 40 staples through 1961 as they continued to cut rich, sub-three-minute playlets provided by Leiber and Stoller. "Run Red Run," from 1960, tells the story of a monkey who gets educated, realizes how he's been exploited, and in Leiber's words, "becomes a revolutionary." The exotic 1961 single, "Little Egypt," the group's final appearance in the Top 40, uses a carny sideshow come-on, King Curtis' smoldering, stuttering sax, and Stoller himself adding a "chipmunk" voice on the fade-out to conjure a seductive portrait of an exotic dancer. "Soul Pad," a non-charter from 1967, describes an offbeat cast of characters populating "a room with a feeling," its funky ambience heightened by some pungent piano and Hammond-organ interjections by one of New Orleans' greatest piano players, James Booker.

All of these career highlights and more are contained on the essential Rhino double-CD set, *50 Coastin' Classics.* Among the more obscure tracks are the original version of "D.W. Washburn," which was a hit not for the Coasters but, in a 1968 cover version, for the Monkees, and a 1959 New Orleans–style rocker, "That Is Rock & Roll," featuring Jerry Leiber adding a gravel-voiced lead vocal in the style of Clarence "Frogman" Henry. An accompanying booklet reprints critic Robert Palmer's liner notes from a 1982 double-vinyl Coasters retrospective, *Young Blood,* and includes song-by-song annotation by Leiber and Stoller, plus complete sessionography and release dates. The photos of the group with L&S in the studio are priceless.

Lower-priced, single-disc retrospectives from Rhino and Warner Bros. touch all the commercial high points for those interested in only the essential documents and minimal annotation. Beware of a disc on the Prime Cuts label titled *The Coasters—Greatest Hits.* The group featured is not the original Coasters, but rather a 1996 incarnation rerecording the originals' best-known songs. —D.M.

Eddie Cochran

★★★	Greatest Hits (Curb, 1990)
★★★★	Somethin' Else: The Fine Lookin' Hits of Eddie Cochran (Razor & Tie, 1998)

Acknowledged as one of the most gifted of the early rock & roll artists, Eddie Cochran died in a car accident in 1960, leaving unsettled his standing in relation to other first-generation rockers. Between 1957 and 1959, he had only three Top 40 hits, the biggest being the classic "Summertime Blues," which peaked at #8 in 1958. While Buddy Holly and Ritchie Valens had established strong individual identities by the time of their deaths, leaving open to speculation only the question of how their careers might have evolved, Cochran died only having released some spirited sides but without establishing a point of view distinctively his own. On balance, the tracks on the 1998 near-definitive anthology *Somethin' Else* simply don't measure up to the best work of Cochran's peers. True, "Summertime Blues" and "Twenty Flight Rock" remain among the very best singles of the '50s, and have proven to be inspirational touchstones for succeeding generations of unreconstructed rockers who find in Cochran the essence of early rock & roll's rebel spirit. But many of Cochran's recordings sound more like blueprints made by an artist searching for his voice. While he's barely on the radar in his home country, the fact that his death took place during a U.K. tour with Gene Vincent brought Cochran legendary status there, and his slim body of work is more fully represented on Brit collections. —D.M./B.SC.

Cocteau Twins

★★★	Garlands (1982; Capitol, 1991)
★★	Lullabies (EP) (1982; Capitol, 1991)
★★★	Head Over Heels (1983; Capitol, 1991)
★★½	Peppermint Pig (EP) (1983; Capitol, 1991)

Punk's embrace of inspired amateurism has been responsible for many musical surprises, but none so delightful as the Cocteau Twins. This Scots combo—Robin Guthrie, Elizabeth Fraser, and, eventually, Simon Raymonde—doesn't write songs so much as shape sounds into some semblance of a verse-chorus construction, after which Fraser appends her otherworldly melodies and inscrutable lyrics. It's not the most musicianly way of doing things, and the band's early efforts, *Garlands* and the EP *Lullabies,* flail more than they fly. But when the Cocteaus hit their mark, as they do on *Garlands'* "Wax and Wane," the result is deliriously tuneful, like a snippet from some fairy melody or a song heard in a dream.

That's the sort of magic the Cocteaus worked best; trouble is, it took them—that is, Fraser and Guthrie—a while to get good at it. Apart from the strident "Musette and Drums" and the rattletrap "When Mama Was Moth," *Head Over Heels* is too noisily primitive to cast much of a spell, while *Peppermint Pig* presents an unseemly brusqueness. Then, almost unexpectedly, comes the luscious, shimmering beauty of *Sunburst and Snowblind,* which includes a much-improved "Sugar Hiccup" (a coarser cousin can be found *on Head Over Heels*) and the gorgeous, moody "From the Flagstones." Raymonde joins up in time for *Pearly-Dewdrops' Drops,* which introduces the tasty title song. *Treasure* continues the Twins' ascent into aural bliss, thanks to such infectious concoctions as "Lorelei" or the hauntingly sibilant "Aloysius." Highlights from those records, along with the otherwise-unavailable "Millimillenary," may be found on the compilation *The Pink Opaque.*

With *Aikea-Guinea,* the degree of craft that went into the group's soundscapes began to increase while the melodic content declined. That doesn't exactly work against *Aikea-Guinea, Tiny Dynamite,* or *Echoes in a Shallow Bay,* as each eloquently conveys its own individual sense of atmosphere, but it does diminish the band's pop appeal. *Victorialand,* recorded without Raymonde, goes even further in its pursuit of the ineffable, as the aptly titled "Lazy Calm" and "Fluffy Tufts" make clear. Yet the duo could still summon its melodic gifts if so moved, as demonstrated by the slippery refrain to "Whales Tails," as well as the classic lines of "Love's Easy Tears" and the quirky choruses of "Orange Appled," both from the *Love's Easy Tears* EP. Even *The Moon & the Melodies,* a collaboration with minimalist composer Harold Budd, manages to deliver tuneful gems like "Sea, Swallow Me" and the slow, deliberate "She Will Destroy You."

Blue Bell Knoll inaugurated the group's association with Capitol Records in the U.S., and though the album can hardly be considered "commercial," it does boast an added sense of sparkle, from the giddy arabesques of Fraser's vocal on "Carolyn's Fingers" to the implied funk of "A Kissed Out Red Floatboat."

Iceblink Luck enhances that sense of groove to near dance-single strength, offering a prelude of sorts to *Heaven or Las Vegas,* wherein the Cocteaus ground their soft-focus soundscapes with low-key, bass-driven rhythm tracks, a strategy that nicely enhances the music's appeal. *Four Calendar Café* continues in the same vein, although particularly with impassioned singing from Fraser and a more lustrous sense of studio polish. *Otherness,* released two years later, is a bit of a red herring, as the looped abstractions of "Feet Like Fins" seem to suggest a retreat into arty opacity. That was hardly the case, though, as the semi-acoustic *Twinlights* EP finds the Cocteaus sounding more conventional than ever, especially on "Half-Gifts," which owes more than a little to Leonard Cohen's "Suzanne." As such, *Milk & Kisses* makes an appropriate farewell, neatly balancing the textural detail of the group's early work with a sophisticated and accessible sense of melody.

Although the Cocteaus were able to approximate their studio sound onstage, the fact that it's only an approximation makes *BBC Sessions* an album for hard-core fans only. The boxed set *Cocteau Twins* is a collection of the group's EPs (at least, up until 1990, anyway), plus a bonus disc containing several non-LP and previously unreleased tracks. —J.D.C.

A legend in his own mind, country artist David Allan Coe is a shameless self-promoter whose propensity for name-dropping is as much a trademark as his tattoos and long-haired redneck rebel image. And almost in spite of it all, he also happens to be a genuinely gifted songwriter, albeit a frustratingly inconsistent one.

The Ohio-born Coe emerged on the Nashville scene in the early '70s, calling himself the Mysterious Rhinestone Cowboy and boasting he had served nearly two decades in prison, including a stint on death row for murder. As it turned out, he had served time—primarily in various juvenile reformatories—but the murder rap turned out to be a product of Coe's imagination. Undaunted by this revelation, Coe maintained a rough and rugged public persona and promptly aligned himself with the outlaw movement, scoring an early hit as a songwriter with Tanya Tucker's cover of his "Would You Lay With Me (In a Field of Stone)." The song's success helped land him a Columbia deal (following his long-out-of-print 1969 Plantation debut, *Penitentiary Blues,* and the followup, *Requiem for a Harlequin*), and both *The Mysterious Rhinestone Cowboy* and *Once Upon a Rhyme* (which features his own version of the Tucker hit) were highly enjoyable showcases for Coe's rich, Merle Haggard–like voice, strong originals, and great taste in covers; Steve Goodman's "You Never Even Called Me by My Name," from *Once Upon a Rhyme,* would become Coe's signature anthem. Both albums—now compiled as part of Germany's Bear Family Records' reissue series of Coe twofers—stand as exemplary examples of mid-'70s country at its best. After that, his recordings have been considerably less consistent, reeling from the rock-solid, bare-knuckled, blue-collar bravura of "If That Ain't Country" (from *Rides Again*) and "Take This Job and Shove It" (*Tattoo*) to the obnoxious, full-blown self-mythologizing of "Willie, Waylon and Me" (*Rides Again*) and the title track of *Longhaired Redneck,* in which the only name he drops heavier than Johnny Cash's and Merle Haggard's is his own. The redneck shtick hit its nadir with a pair of late-'70s/early-'80s independent "X-rated" albums Coe peddled through a biker magazine; songs like "Little Suzie Shallow Throat" and "Nigger Fucker" earned him a rep as a sexist racist which still dogs him, though he has since denounced the records (both out of print). The superslick Billy Sherrill–produced albums of the same period—*Human Emotions, Invictus Means Unconquered,* and *Castles in the Sand*—were another matter entirely. Although Coe turned out an above-average song here and there, this is more *Urban Cowboy* fare than outlaw, as safe as milk even when Coe likens himself to Bob Dylan ("Castles in the Sand"). Grab the *Rhinestone Cowboy/Once Upon a Rhyme* disc if you can find it, or stick with the solid *For the Record: The First 10 Years* anthology.

By the beginning of the '90s, Coe was bankrupt and eking out a living by constant touring. A brief return to the majors (Sony's Lucky Dog) yielded 1997's *Live: If That Ain't Country . . . ,* a satisfyingly rowdy affair bolstered by lead-guitar work from Allman Brothers/Gov't Mule axeman Warren Haynes, and *Recommended for Airplay,* an exceptional studio album showcasing some of Coe's best originals since the early '70s—and a sense of humor, to boot. The refreshing "Song for the Year 2000," with its "it takes all kinds of people to make the world go round" hook, seemed a sincere and heartfelt (but not sappy) apology for some of his more offensive slurs in the past, while "A Harley Someday" poked gentle fun at a wanna-be "weekend warrior" biker before concluding, "We all started out just like that."

The even stronger *Songwriter of the Tear* skips the humor and goes right for the heart, with devastating results. In the span of 11 mostly terrific new originals, Coe proves that a world-class songwriter still lurks deep underneath all the layers of buffoonish self-parody. Unfortunately, he's still a risky gamble. The two most recent live albums—both featuring a handful of clunkers cowritten with Coe fan (natch) Kid Rock—are warts-and-all affairs, though *Live at Billy Bob's* sounds a lot better and features another outstanding new original in "Heaven Only Knows." The TeeVee and King compilations are uniformly awful, featuring either inferior new recordings of his best-known songs or pointless "tributes" to his heroes—er, close, personal friends—like Haggard and Cash. —D.M./R.SK.

★★★★	Ten New Songs (Columbia, 2001)
★★★★	The Essential (Columbia, 2002)

Leonard Cohen is the Jewish Bryan Ferry. In the excellent liner notes of his 1975 *The Best of Leonard Cohen,* he explains the suave cover photo: "I rarely ever look this good, or bad, depending on your politics." That sums the man up. Running for the money and the flesh, especially the flesh, Cohen was the literary rogue who strummed his acoustic guitar and croaked of love and its torments. He emerged from Montreal in the 1960s, an acclaimed poet and novelist well into his thirties before he even made his first album. Yet for all his poetic angst and folkie sorrow, Cohen could never hide the fact that he was getting more rock-star booty than any Canadian before or since. Whispering in his glamorously tattered voice, he still makes his songs sound like sinful confidences shared over bottles of bloody-red wine.

He already had his style down on *Songs of Leonard Cohen.* No one has ever accused him of being a real guitarist, but for some reason, you can always tell it's him playing. In "Suzanne," "Master Song," and the peerless "So Long, Marianne," he sounds bemused by his own romantic travails, inventing what critic Robert Christgau called "his tuneless, grave, infinitely self-mocking vocal presence." His songs are strictly verse-chorus-verse, with hardly any bridges or fancy bits. Robert Altman used three of the tunes in the soundtrack to *McCabe & Mrs. Miller,* adding to Cohen's legend.

Songs From a Room is thin and sparse, weighed down by "Bird on a Wire," which became a schlock standard. But *Songs of Love and Hate* is the gangsta shit—even the one with the children's choir is so intense you can't turn it off. Cohen sings about jealous rivals ("Famous Blue Raincoat"), demon lovers ("Avalanche"), cold and lonesome virgin warrior goddesses ("Joan of Arc"), and God knows what else ("Let's Sing Another Song, Boys"), bursting with wit and imagination. *New Skin for the Old Ceremony* is almost as great, featuring the boho romance "Chelsea

Hotel No. 2." Note: Oral sex on unmade hotel beds is almost always a bad idea, since those bedspreads are laundered usually about once every five years, but songs about it are still cool.

Since then, Cohen has recorded sporadically—he apparently has the novel idea that before you make an album, you should wait until you have an album's worth of good songs. The only total waste is the Phil Spector collaboration *Death of a Ladies' Man. Recent Songs* has "Came So Far for Beauty." (Next line: "And I left so much behind.") *Various Positions* has "Hallelujah," which unexpectedly became Cohen's signature song after Jeff Buckley revived it in the 1990s. *I'm Your Man* perversely adds cheesy Eurodisco synths and disco-girl vocals to some of his bleakest tunes: "Everybody Knows," "First We Take Manhattan," "Tower of Song." *The Future* has a hilarious eight-minute send-up of Irving Berlin's "Always," plus political/spiritual statements along the lines of "Anthem" ("There is a crack in everything/That's how the light gets in").

By now, Cohen was bigger than ever, inspiring doom disciples such as Kurt Cobain, Trent Reznor, and Nick Cave. He spent most of the 1990s on a mountaintop Zen Buddhist retreat, while Cobain was down in Seattle singing, "Give me a Leonard Cohen afterworld/So I can sigh eternally." *Ten New Songs* offered "Alexandra's Leaving," "In My Secret Life," and "You Have Loved Enough," the epitaph Cohen has been writing for himself throughout his career. Of his three live albums, the good one is *Field Commander Cohen.* Cohen's record company has released three best-of anthologies, but bizarrely, none of them include "Joan of Arc." —R.S.

Coldplay

★★★½	Parachutes (Nettwerk, 2000)
★★★★½	A Rush of Blood to the Head (Capitol, 2002)

At first, Coldplay was burdened—along with Travis, Doves, Muse, and a few other young bands busting out of post–*OK Computer* Britain—by various media types with the dreaded designation "the new Radiohead." You can hear why: The widescreen melancholy of their first two albums wears the influence of Thom Yorke and company like a comfortable old overcoat, without shame or apology. But the influence of Jeff Buckley and U2 is nearly as strong, and singer Chris Martin's empathetic, often falsetto vocals are all his own.

Gangly, awkward, and charming as only hypersensitive teenagers can be, the Coldplay of *Parachutes* obviously had some growing-up issues to deal with. Both the songs and the playing here can sound tentative at times. But that just makes the great bits all the more magical, and there are plenty of those: the ambient guitar textures of "Don't Panic," the swooning chorus of "Shiver," and the U2-style singalong special "Yellow," to name but three.

A Rush of Blood to the Head delivers on the promise of *Parachutes* and then some. Tracks like "Politik," "God Put a Smile Upon Your Face," and "Warning Sign" are exhilarating epics that ache with beauty. And yet even as the music's ambition balloons, there's still something pleasantly unassuming at its heart. Coldplay knows it's good but doesn't want to get bigheaded about it—a refreshing attitude that may well make it one of the new millennium's prime contenders. —M.R.

Lloyd Cole & the Commotions

★★★★	Rattlesnakes (Capitol, 1984)
★★★	Easy Pieces (Capitol, 1985)
★★★★	Mainstream (Capitol, 1987)

Lloyd Cole

★★★★	1984–1989 (Capitol, 1989)
★★★½	Lloyd Cole (Capitol, 1990)
★	Bad Vibes (Ryko, 1993)
★★★	Love Story (Ryko, 1995)
★★★★	Collection (PolyGram, 1998)
★★★	The Negatives (March Records, 2001)
★★★	Etc. (XIII Bis, 2001)
★★	Plastic Wood (XIII Bis, 2001)
★★★	Music in a Foreign Language (One Little Indian Records, 2004)

Formed at the University of Glasgow, Lloyd Cole & the Commotions made their debut in 1984 with the single "Perfect Skin," a U.K. hit and an American college radio fave that arrived amid a wave of smart guitar-pop bands (Aztec Camera, Prefab Sprout, the Smiths). But it is just one of numerous highlights on their charming debut, *Rattlesnakes.* Painfully romantic and teeming with lovelorn bohemian characters, literate references (Simone de Beauvoir, Leonard Cohen), and guitarist Neil Clarke's exquisite playing, it remains a high-water mark in Cole's yeoman's career. The followup, *Easy Pieces,* suffers slightly from rushed second-album syndrome and synth-heavy '80s production but remains a fan favorite due to such classics as "Why I Love Country Music" and "Lost Weekend." Cleanly produced and oft-overlooked, Cole's third and final Commotions album, the cynically titled *Mainstream,* is also his most well-rounded. After critical comparisons to Morrissey, Lou Reed, and Dylan, Cole finally finds his own voice on tracks such as the cheeky, upbeat "Sean Penn Blues" and gorgeous, melancholic "These Days."

Something of a love letter to his new hometown, New York City, *Lloyd Cole* was fueled by his late-night lifestyle and a band that included former Voidoids/ Lou Reed players Fred Maher (drums) and Robert Quine (guitar). The songs rock harder than Cole ever had before—or has since. It has aged well and finds balance in its gentler moments, such as the quietly resigned "To the Church," wherein he begs, "Driver, can't you drive me a little more slowly . . . can't you find me some George Jones on your radio?"

Dropped by his label as part of a massive housecleaning and left to his own devices and home studio, Cole resurfaced with the limp, glam rock–dabbling *Bad Vibes*. A new deal with U.S. indie label Ryko (which finally gave *Bad Vibes* a U.S. release) resulted in a mid-'90s comeback of sorts with the effervescent *Love Story*, a pleasant return to the Cole style of old (including guitar contributions from former Commotion Neil Clarke). *The Negatives* announced another rebirth of sorts with Cole this time hooking up with a younger group of NYC musicians (including Jill Sobule and ex-Dambuilder Dave Derby) and delivering another set of solid and upbeat, if familiar, songs. A pair of low-key "catch-up" releases followed: *Etc.* is a surprisingly good collection of outtakes/demos/extras (including a Dylan cover) from the late-'90s that any fan will love, while *Plastic Wood* is a less engaging foray into ambient instrumentals. Either of the best-of collections are decent starting points, but newcomers would also do well to just head straight for the classic *Rattlesnakes*. —D.S.

Ornette Coleman & Joachim Kühn

★★★	Colors (Harmolodic/Verve, 1997)

Most jazz greats sweep you along with them. Ornette Coleman sits himself down, defiantly, in your path, and demands you reckon with him. In almost 45 years' worth of recording, his music has ranged from challenging to difficult to teeth-gnashingly impossible. But his great albums have changed the path of jazz, and even the worst are noble failures, rarely less than intriguing. His concept of "harmolodics" is central to his work, and nearly impossible to grasp, although the gist of it seems to be freeing improvisation from the exclusive command of chord changes, and giving melody, harmony, rhythm, and mood equal importance.

From the first notes of his debut, *Something Else!!!*, blared out on a plastic alto saxophone and longtime partner Don Cherry's trumpet, it's clear that Coleman has a genuinely original voice. His tone is a rough, dry blues honk, and his compositions are freakishly structured tunes with chords that never go where you expect them to. The presence of pianist Walter Norris normalizes things a little—"The Blessing" could pass for ordinary jazz of the time—but Coleman's clearly straining at the bar lines. *Tomorrow Is the Question!* yokes Coleman and Cherry to the aggressively straightforward rhythm section of bassists Red Mitchell and Percy Heath and drummer Shelly Manne. The themes are even wilder 16th-note barrages, and Coleman and Cherry revel in the chance to play literally fast and loose with them.

Later in 1959, Coleman signed to Atlantic Records, who let him record with his actual quartet: Cherry (on cornet), bassist Charlie Haden, and drummer Billy Higgins. The result, *The Shape of Jazz to Come*, lives up to its title—more than 40 years later, jazz musicians still sound ahead of the curve when they follow its example. Perfectly attuned to each other's quirks, the quartet stretches and compresses notes, phrases, and whole structures, systematically splintering every rule of theme-and-variations jazz. And if Coleman has a single "greatest hit," it's the album's opener, "Lonely Woman," a slow, luscious theme that proceeds at its own uneven pace while Higgins plays like it's an uptempo number.

Cherry switched to pocket trumpet for *Change of the Century,* but the album's pretty much an extension of *Shape,* even if the band doesn't sound quite as desperate to prove itself. Haden gets to stretch out on "The Face of the Bass," and the title track's theme unfolds itself like a string of high explosives. Ed Blackwell takes over on drums for *This Is Our Music,* on which the quartet plays around a little with typical jazz forms in much the same way that a leopard plays with its prey. "Blues Connotation" is a jaunty blues track that promptly goes off somewhere else entirely; "Embraceable You" is an elegant but edgy reading of the Gershwin standard that hints at Coleman's days as an R&B honker.

Free Jazz was a leap into the unknown, years ahead of its time. The "double quartet"—Coleman's regular group, plus Higgins, Eric Dolphy (on bass clarinet), bassist Scott LaFaro, and trumpeter Freddie Hubbard—plays a frenetic little head, holds a few long notes, and then throws away the map and puts the pedal to the floor for 37 minutes. It could be cacophony, and it's not—this is a lively discussion, not an argument, and the eight musicians track each other's improvisations closely. How many albums get a genre named after them, anyway?

Recorded a month later, with LaFaro taking over for Haden in the new edition of the quartet, the four long tracks of *Ornette!* are casual but masterful. Coleman and Haden get to take long, spiraling solos, reeling out what Robert Palmer rightly calls "a series of dependent clauses": Every phrase is an improvisation on the one before it. Yet another bassist, Jimmy Garrison, appears on *Ornette on Tenor,* which is just that, though switching horns doesn't appreciably alter Coleman's barbed rasp. By this point, the group had their pattern down: gnarled high-speed head, open-ended solos for a while, repeat head, end. Nonetheless, the mock "false start" and unaccompanied Coleman free-association that open "Cross Breeding" still sound crisp and shocking.

The Art of the Improvisers is a series of outtakes from the 1959–61 period; nothing especially revelatory, but this is a fine band at the top of its form. Every track from the Atlantic period (including six previously unreleased compositions) is anthologized in chronological order on the six stunning discs of *Beauty Is a Rare Thing,* one of the finest and richest jazz box sets ever released.

Coleman has dabbled in fully scored music for decades, and the live *Town Hall 1962* is the first sign of that—one of its four pieces is a not-so-hot composition for string quartet. The other three, with a trio including bassist David Izenson and drummer Charles Moffet, are distinctively Ornettish, but he doesn't seem to have adjusted to playing without Cherry yet: There are a lot of open spaces where the two horn players used to harmonize. The same trio sounds much stronger on the Swedish gigs documented on the two *Golden Circle* albums. Coleman's left the stylistic double-dares of his Atlantic period behind him—in part because the jazz world, originally violently divided over his work, has started to catch up with him—and he's concentrating on swinging. His improvisations are still knotty and free-flailing: *Vol. 2*'s "Snowflakes and Sunshine" finds him alternating between violin and trumpet, neither of which is exactly his specialty. Still, compositions like "Dee Dee" (on *Vol. 1*) are as close to hummable as he's gotten since "Lonely Woman."

A strange one even by Coleman's standards, *The Empty Foxhole* is a trio date with Haden and a new drummer—very new. The leader's son, Ornette Denardo Coleman, was 10 years old and still very clearly learning how to play drums. His dodgy sense of rhythm, though, was a welcome challenge to Coleman and Haden: You can hear them having fun working around it on "Good Old Days" and the waltzlike title track. The amateur spirit only really gets out of hand on "Sound Gravitation," on which Dad attempts to play violin again. (Daaaad!)

Coleman's last two Blue Note albums, *New York Is Now!* and *Love Call,* were recorded simultaneously, with John Coltrane's old rhythm section of bassist Jimmy Garrison and drummer Elvin Jones (Coleman had played at Coltrane's memorial service), as well as tenor saxophonist Dewey Redman. They're transitional records, and they sound like it: They've got a peculiar lineup, with Coleman pretending he's a multi-instrumentalist again, and he's not making any particular breakthroughs.

Many of Coleman's albums from the late '60s and early '70s, like the ferocious *Crisis,* have been out of print for ages. *Friends and Neighbors* from 1971 is particularly worth digging up, though, for its bizarre title track: a near-funky groove, recorded live at his New York storefront Artists House, with Ornette torturing a fiddle and everyone in the neighborhood chipping in on vocals.

Coleman's next move was both backward and forward. *Science Fiction,* originally released in 1971, reunited him with Cherry, Haden, Higgins, Redman, and Blackwell, and pieces like "Civilization Day" are stylistic throwbacks to the Atlantic years, if more precise sounding. But then he goes way out on a limb: Two songs have vocals by Indian pop singer Asha Puthli, and the title track's big-band noisefest features overdubbed baby noises and David Henderson reading a poem one word at a time. Weird and fabulous. The 2000 CD reissue augments it with the outtakes that became 1982's *Broken Shadows,* including the cyclonic "Happy House," Webster Armstrong singing a dissonant jump blues, and "School Work," the earliest recording of a singsong melody Coleman's listeners would come to know well.

Skies of America was originally intended as a concerto for jazz quartet and the London Symphony Orchestra; for various reasons, it turned into a sprawling orchestral work with Coleman playing saxophone in places. His harmonic sense is splendid, lush, and tartly dissonant, although the arrangements actually sound better here when he's not playing than when he is. "The Good Life," incidentally, is just "School Work" in orchestral drag.

Possibly Coleman's most irritating album, *Dancing in Your Head* gives us 26 exasperating minutes of "Theme from a Symphony"—which is, yes, "School Work" 's nagging eight-note hook again. This time, it's accompanied by two electric atonal guitars, bass, and drums, playing the kind of funk you can't actually dance to. The album's filled out by a brief, misfiring collaboration with the Master Musicians of Joujouka. The next year's *Body Meta* keeps the electric band and the wonky funk vibe, but does a bit better by them, even though everyone occasionally seems to be playing entirely different songs. The distorted free-for-all "Home Grown" even anticipates New York's no-wave sound. And just as dissonant, arty funk was taking off, what did Ornette release? Why, *Soapsuds, Soapsuds,* of course—an album of relaxed acoustic duos with Charlie Haden, opening with a cover of the theme from *Mary Hartman, Mary Hartman.*

The electric band of *Dancing in Your Head* and *Body Meta* became the seven-piece Prime Time, who released several now-out-of-print albums before *In All Languages* paired 13 performances by them with 10 by the reconvened Cherry/Haden/Higgins quartet (eight of them the same songs). Advantage: oldsters, in almost all cases—they're tighter and terser than ever. And "Peace Warriors" is a fabulous two-and-a-half-minute honk-bam-boom.

Following a fine collaboration with Pat Metheny, *Song X,* Coleman returned to the studio with Prime Time. *Virgin Beauty* features Jerry Garcia on three tracks, although it's not terribly Grateful Dead–ish. Its hints of Afro-pop ("Happy Hour") hold up better than its ersatz Prince beats ("Singing in the Shower"), but the production and showoffish slap 'n' pop bass date it badly. *Tone Dialing,* the final Prime Time record to date, is even more confused (hint: a rapper on an Ornette album is just not a good idea). It attempts to apply harmolodic principles and Ornettian eclecticism to contemporary R&B, but ends up meandering listlessly.

The two *Sound Museum* albums, *Hidden Man* and *Three Women,* are simply alternate takes on a nearly identical set of songs, including a couple of old favorites like "Home Grown" and "Mob Job." The sympathetic acoustic quartet includes Denardo Coleman, Charlie Moffett's son Charnett, and pianist Geri Allen. It's fairly lively, if not nearly as fiery as classic Ornette, but the harmolodic lack of hierarchy seems more like an excuse to sell the same record twice to the same people. (It doesn't help that Coleman's liner notes make no sense at all.) *Colors,* an assured, ungimmicky live duo with German pianist Joachim Kühn, presents Coleman with more of a challenge—he even lets Kühn outplay him a couple of times, as on the hyper-dense "Three Ways to One." —D.W.

Collective Soul

★★½	Hints, Allegations, and Things Left Unsaid (Atlantic, 1994)
★★★	Collective Soul (Atlantic, 1995)
★★★	Disciplined Breakdown (Atlantic, 1997)
★★½	Dosage (Atlantic, 1999)
★★	Blender (Atlantic, 2000)
★★★½	7even Year Itch: Greatest Hits, 1994–2001 (Atlantic, 2001)

The typical Collective Soul song has a one-word title, runs between three and five minutes, prosecutes a catchy '70s-style melody over warm, burbling '90s-style guitars, frets about the human condition, and dominates rock radio for months at a time. These mellow Georgia boys have never been anywhere near fashionable, but they have enjoyed a longer and more fruitful run than most of their flashier grunge-era peers, despite one of the sorriest names any worthy band has ever saddled itself with. Ed Roland, a Southern preacher's kid who was forbidden to listen to rock & roll growing up, is the singer, songwriter, guitarist, and producer whose spiritual concerns and studio perfectionism define the band, and each of Collective Soul's albums has its share of smartly crafted hits. The best are on *Collective Soul,* which features the rumbling ballad "December" (you remember, it's the one that goes, "Turn your head now, baby, just spit me out"), and *Disciplined Breakdown,* which has the gorgeous "Listen." "December" sounds a bit like Nirvana, "Listen" sounds a lot like Three Dog Night, and those parameters pretty much sum up the band's sound. Both of these high points appear alongside "Gel," "Heavy," "Run," and other hits on Collective Soul's stellar best-of collection, which is recommended despite the extremely regrettable title *7even Year Itch.* —R.S.

Bootsy Collins

★★	Play With Bootsy: A Tribute to the Funk (EastWest/WEA Germany, 2002)
★★	Play With Bootsy (2002; Thump, 2004)

Zillatron

★★	Lord of the Harvest (Rykodisc, 1993)

Bootsy's Rubber Band was the most entertaining and longest-running spin-off of George Clinton's eternal P-Funk circus, and that's because Bootsy is a true star, the clown prince of comic, psychedelic, good-times funk—if he weren't such a genius of the bass, you'd think he was Jimmie Walker in a sequined costume, star-shaped mirrored shades included. His career is like a Horatio Alger story based in Chocolate City: Plucked from teenage obscurity in 1969 to play with James Brown, the former William Collins of Cincinnati brought a slap-happy zest to JB's sound, then hooked up with Clinton and was reborn in his image, with a little help from LSD.

The groove flows free on a string of six albums for Warner Bros. from 1976 to 1982 (of which four remain in print), with Bootsy ably leading a top-notch band of mostly P-Funk vets, including his brother Catfish Collins on guitar, Bernie Worrell on keyboards, and a horn section including Fred Wesley and Maceo Parker. Though Clinton produced the albums and cowrote most of the material, Bootsy emerges as a character all his own. At first he's "Casper" ("not the friendly ghost/but the holy ghost"), the benevolent black spirit that was his alter ego in P-Funk. But before long his personae grow so numerous—like Bootzilla, the funkiest wind-up toy on the market, "equipped with stereophonic funk-producin', disco-inducin', twin-magnetic rump receptors"—that he's simply Bootsy, an indefinable.

The flash and goofiness can obscure Bootsy's formidable chops, as well as the quality of the songwriting. Clinton let some gems get away, like *Stretchin' Out*'s impossibly sweet "I'd Rather Be With You" and the second album's "The Pinocchio Theory" ("don't fake the funk or your nose will grow"). The melodies are smooth and rich, and Bootsy's bass admirably unobtrusive; unlike some P-Funk discs from this period, the sound is focused and uncluttered, more akin to carefree disco than Clinton's utopian head trip.

The '80s were a transitional time for Collins. As disco died, he sought to modernize his groove with *Ultra Wave* and, after a hiatus of several years, the hip-hop-influenced *What's Bootsy Doin'?,* which was one of the first of many collaborations with bassist and avant-ish producer Bill Laswell. One of them, Zillatron (others are Praxis and Axiom Funk), has Bootsy assuming the monstrous guise of Fuzzface and muttering nonsense through a distorted microphone. Not quite as amusing as his Bootzilla adventures, although it does take Clinton's "space funk" concept to a new level of some sort.

As the '90s dawned, Bootsy was happily trading in nostalgia. After his appearance on Deee-Lite's 1990 party anthem "Groove Is in the Heart" put him back in the public eye, he established a New Rubber Band (with Catfish, Worrell, and some other holdovers) and hit the studio. *Blasters of the Universe,* a double that needn't be a double, finds him back in his grand '70s game with disco ballads and spunky crowd-rousers. The live *Keepin' Dah Funk Alive* (another double) is his standard set: 75 percent oldies from the *Stretchin' Out* era, 20 percent P-Funk faves ("One Nation Under a Groove," "Night of the Thumpasorus Peoples"), and maybe something recorded past 1979, if he's feeling frisky. Bootsy's later albums are quickies involving a lot of wide-eyed guest stars (Snoop Dogg, Fat Boy Slim, Fat Joe), but they keep him on the road, where he belongs.

Despite impressive packaging (including a Bootsy pop-up centerfold) on the *Glory B* two-disc set, the leaner and more selective *Back in the Day* is the Bootsy anthology of choice. The blistering live take on "Psychoticbumpschool" is worth the sticker price alone. —B.S.

Phil Collins

★★★	Face Value (Atlantic, 1981)
★★½	Hello, I Must Be Going (Atlantic, 1982)

★★★½	No Jacket Required (Atlantic, 1985)
★★½	12"ers (Atlantic, 1988)
★★½	Buster (soundtrack) (Atlantic, 1988)
★★½	. . . But Seriously (Atlantic, 1989)
★★★½	Serious Hits . . . Live! (Atlantic, 1990)
★★★	Both Sides (Atlantic, 1993)
★★	Dance into the Light (Atlantic, 1996)
★★★★	. . . Hits (Atlantic, 1998)
★★★	A Hot Night in Paris (Atlantic, 1999)
★★½	Tarzan: Original Soundtrack (Disney, 1999)

For a time, Phil Collins was nearly inescapable on the radio, and enormously popular with the listening public—something that made him an obvious target for critics. Despite his *lumpen*-pop appeal, however, Collins is an incisive songwriter and resourceful musician. Of all his albums, *Face Value* sounds most like his work with Genesis. "I Missed Again" and "If Leaving Me Is Easy" carry the same mournfulness of *Duke*, while "In the Air Tonight" condenses *Wind and Wuthering*'s musical dramatics to a five-minute mini-epic. With *Hello, I Must Be Going*, Collins begins to find his own voice, flirting with soul (although soul didn't always flirt back, as his remake of "You Can't Hurry Love" demonstrates) and sharpening his skills at ballad-writing (which finally paid off in 1984, with "Take a Look at Me Now," from the *Against All Odds* film soundtrack). Collins pulled it all together with the aggressively likeable *No Jacket Required*, which had solid rockers, great ballads, and a pleasantly silly rewrite of Prince's "1999" ("Sussudio").

Unfortunately, the peripatetic Collins was unable to sustain that momentum. *12"ers* was an unconvincing collection of dance remixes, the *Buster* soundtrack squandered "Two Hearts" (cowritten with Motown auteur Lamont Dozier) on what was otherwise an oldies album, and . . . *But Seriously* put more emphasis on its message than its music. *Serious Hits Live!*, however, is a delightful surprise, a live album that actually improves on its material.

With the home-recorded *Both Sides*, Collins turns serious and socially conscious, a move that should have been commercial suicide but instead revealed hidden depths (as well as a tendency to preach). Perhaps in compensation, the worldbeat-flavored *Dance Into the Light* is almost willfully frivolous, sounding at times as if Collins were trying to channel Lionel Richie. *A Hot Night in Paris* goes for something completely different, as Collins drives a jazz big band through arrangements of Genesis oldies and his own tunes. A Buddy Rich album this isn't. Likewise, *Tarzan* isn't exactly a Phil Collins album, as his characteristically jaunty originals share space with Mark Mancina's more conventionally Disney-fied film music. Still, it does include Collins' long-awaited duet with 'N Sync on "Trashin' the Camp." —J.D.C.

For most of the '50s, John Coltrane was merely a first-rate jazz saxophonist. (He recorded a mountain of albums during that time, which aren't included in the discography above.) On or about March 2, 1959, he abruptly became God, and that's where we pick up the story. Between Coltrane's first session for Miles Davis' *Kind of Blue* (taped that day) and his death from liver cancer at the age of 40 on July 17, 1967, he recorded a massive, brilliant, perpetually evolving, and staggeringly influential body of work.

If you're just starting to listen to Coltrane, the sheer mass of stuff out there can be paralyzing (our discography omits most of the zillion or so compilations and best-ofs currently in print). It's useful to bear a few things in mind, though. First of all, parts of Coltrane's early-'60s records now seem like fairly normal jazz, but if anything he did is a cliché, it's because everyone after Trane has copped his ideas. At the time, in fact, his playing seemed shockingly radical, and he was called "the most avant-garde of the avant-garde." Second, as far out as Coltrane could get, he loved tunes. There's the pure melodic sense of the American popular song tradition hiding in the core of almost all of his work, and if you get lost in any period of it, you can always orient yourself by the simple waltzes he played right up to the end—especially, believe it or not, "My Favorite Things." Yes, the "raindrops on roses" one.

Giant Steps, the first album Coltrane released on Atlantic, was where he declared that everyone had to sit up and pay attention to him. It includes three stone classics: the light-speed title track (which burns through chords so fast that pianist Tommy Flanagan famously can't keep up in his solo—Coltrane swoops in and rescues him), "Mr. P.C.," and an exquisite slow tribute to Trane's then wife, "Naima." (*Bags and Trane,* a collaboration with vibraphonist Milt Jackson, was actually recorded four months earlier; it's one of those solid but unexceptional jazz discs Trane piled up in the '50s.) As occasionally happens in his discography, Coltrane followed up a radical album with an attempt to prove he wasn't so radical as all that; *Coltrane Jazz* is nicely played, but disappointingly straight-ahead, aside from some freaky blowing on "Harmonique."

The Avant-Garde, credited to Coltrane and trumpeter Don Cherry, is a fascinating diversion, recorded in 1960 but not released for another six years. Three of its five tracks are Ornette Coleman tunes, and a fourth is by Coleman's associate Cherry; the rhythm section is Coleman's, too. Normally a tenor saxophonist, Coltrane tries out soprano sax for the first time. He's not entirely at home in the harmolodic maze, but you can hear him trying to open himself up to its possibilities.

The next time he recorded, he played the soprano again, and scored a hit with the title track of *My Favorite Things:* a brilliant 13-minute-plus reimagining of the singalong from *The Sound of Music* as a waltz-time framework for modal improvisation. His racing scales and trills are neatly accompanied by the block chords of pianist McCoy Tyner and the simpatico swing of drummer Elvin Jones; both became part of his group for almost the rest of his life. The three standards that make up the rest of the album are pretty nifty, too, including a tweaked variation on George Gershwin's "Summertime." The same three days' worth of sessions that produced *My Favorite Things* also yielded two more albums, *Coltrane Plays the Blues* (what it sounds like) and *Coltrane's Sound* (smoother originals and another couple of standards)—the former, particularly, has some entertaining twists on basic blues structures.

In early 1961, multi-instrumentalist Eric Dolphy—sort of the Brian Jones of jazz—joined Coltrane's group and became his creative foil, and in May and June they recorded two albums with expanded lineups. *Olé Coltrane* is loose and casual—the two spur each other on over the two-chord Latinate vamp of "Olé," featuring a seven-piece band, and bat around a simple blues and a calm Tyner original. *Africa/Brass,* on the other hand, sounds like a Major Project; built around Dolphy's big-band arrangements, it features "Africa," a hulking, dramatic piece featuring African-inspired rhythms and bass drones. It's also got the first of Coltrane's many versions of "Greensleeves," another modal waltz on which he plays soprano. (He was contractually unable to rerecord "My Favorite Things" for a few years after he left Atlantic, but he treats "Greensleeves" basically the same way.) The currently available version is *The Complete Africa/Brass Sessions,* which pads the album out to two discs with five alternate versions and outtakes.

For all he could do in the studio, though, Coltrane's real wizardry happened onstage, where he could solo as long and intensely as he pleased, and the tapes of his performances at a New York club from early November 1961 were his next big breakthrough. *Live at the Village Vanguard,* in its original incarnation, is three long, astonishing tracks—most notably "Chasin' the Trane," 15 minutes of Coltrane blazing away without a theme at all. A couple of infamous reviews subsequently accused Coltrane and Dolphy of "musical nonsense . . . being peddled in the name of jazz" and called "Chasin' the Trane" "one big air-leak." More nonsense and air-leaks, please: Two more stormers from the Vanguard tapes, "Impressions" (a variant of Miles Davis' "So What") and the drone-based "India" supplement the original three on the current CD version (*The Master Takes*); they also make up the bulk of *Impressions,* along with two brief studio tracks (including the exquisite ballad "After the Rain"). *The Complete 1961 Village Vanguard Recordings* is the motherlode: 22 tracks on four discs, some even more daring than the familiar versions, like a take on "India" with Trane's usual crew supplemented by an extra bassist, Dolphy on bass clarinet, Garvin Bushell playing oboe, and oud player Ahmed Abdul-Malik! It's a splendid opportunity to hear how Coltrane's music could evolve over the space of a few days.

Dolphy left the group in the spring of 1962, and the "classic quartet" was solidified: Coltrane, Tyner, Jones, and bassist Jimmy Garrison. Their first studio project, *Coltrane,* is slightly tamer than the Vanguard tapes. It's basically an attempt to show off all the saxophonist's specialties: long, discursive solos ("Out of This World"), polite balladeering ("Soul Eyes"), the "My Favorite Things"/"Greensleeves" routine ("The Inchworm"), bluesy modal struts ("Tunji"), and formal experiments ("Miles' Mode," based on a 12-tone row—a trick from European classical music). The "deluxe edition" appends a disc of unsurprising outtakes and alternates.

By this point, Coltrane had a reputation as a radical bomb-thrower, so his next three albums were essentially an image-rehabilitation program. *Ballads* is jukebox-length renditions of eight tunes from his slow-dancing days, all done up for a night in at the bachelor pad—only a few, like "You Don't Know What Love Is," even hint at his "sheets of sound." (The "deluxe edition" is recommended to those who crave five consecutive alternate takes of "Greensleeves," followed by seven of "It's Easy to Remember.") *Duke Ellington & John Coltrane* is effectively an endorsement from jazz's Old Guard: Duke contributes most of the songs, Trane plays gracefully but conservatively (he stretches out just a little on "Angelica"), and nobody feels threatened. An anomaly in the Coltrane catalogue, *John Coltrane and Johnny Hartman* finds the classic quartet backing up a smooth torch singer on half a dozen more ballad standards. It's one of Coltrane's least innovative records, but impeccably dignified and elegant.

All this time, though, the group was honing its less restrained art on stage, night after night. They toured Europe several times between 1961 and 1963; those performances have been widely bootlegged, and seven discs' worth of them are collected on *Live Trane: The European Tours* (parts of which had previously appeared as *The Paris Concert, Bye Bye Blackbird, The European Tour,* and *Afro Blue Impressions*). The sound quality's a little murky, but the band is gliding on air, finding new perspectives on its central repertoire over and over. (The set includes no fewer than six versions of "My Favorite Things," totaling over two hours.) Note, though, that Coltrane discographers believe that the box's recording information is seriously flawed—three tracks even appear to be from New York!

Elvin Jones was incarcerated for a while in mid-1963, and the somewhat splashier Roy Haynes filled in for him on drums. *Newport '63* is the altered quartet's three-song plumage-display from that July's Newport Jazz Festival (including a radiant, trilling "My Favorite Things"), plus another piece from the 1961 Vanguard tapes. Coltrane celebrated Jones' return with *Live at Birdland.* Only the first three tracks were actually recorded at the New York club in question, and as virtuosic as they are (particularly Trane's unaccompanied coda for "I Want to Talk About You"), they're basically a status report. The real gem of the set is a devastating, elegiac studio track, "Alabama," which became a classic of the civil rights movement. (The album's initial pressing included a long false start by accident; eventually, everyone decided they liked it that way.)

Crescent shows off Coltrane's rhythm section: "Lonnie's Lament" and "The Drum Thing," respectively, let Garrison and Jones stretch out. The title track swoops elegantly, though the album as a whole drags a bit. *A Love Supreme,* on the other hand, is a hands-down masterpiece of ensemble musicianship: a four-part suite in which the quartet moves as with a single mind. Intended as a piece of sacred music, it's one of the most eloquent prayers of the 20th century. "Acknowledgement," a masterful exegesis of a four-note call to God, appears on virtually every Coltrane anthology, and with good reason.

Recorded in February and May of 1965, *The John Coltrane Quartet Plays* was the last gesture Coltrane made toward the pop audience; from there on out, they'd have to come to him. Its covers of "Chim

Chim Cheree" (another soprano waltz) and Nat "King" Cole's "Nature Boy" are bases from which the quartet locks together and heads for terra incognita, and the two originals are dense, bold, and painterly. The posthumously released *Transition* and *Living Space,* both recorded over the following month, are beautifully played (the experimentally overdubbed extra saxophone part on the latter's title track is a bracing, original idea), but suffer from underdeveloped material—*Transition*'s "Suite" can't quite let go of its more conventional jazz passages, and three of *Living Space*'s five tracks never got real titles.

At the end of June, Coltrane took his next giant step. *Ascension,* recorded with an 11-piece mob including the up-and-coming tenor saxophonists Archie Shepp and Pharoah Sanders, bypasses the elegant modal techniques Coltrane had mastered for a howlingly intense 40-minute free-improv monsoon. (The originally released version was immediately supplanted by an alternate take; the CD includes both.) Over 35 years later, it still blows the roof off.

The classic quartet's days were numbered by then, but they still recorded two more albums' worth of material on August 28 and September 2. *Sun Ship,* an album-length exploration of rhythm with rudimentary, raw thematic material, plays with opened-up time. Jones' drumming is the hardest he ever recorded with Coltrane; sometimes there's a regular tempo, usually there's not, and the group surges forward eloquently, alternating tenderness and force. The session issued as *First Meditations* is a suite on the model of *A Love Supreme,* but much more abrasive in places—you can hear Coltrane trying to push the rest of the group toward the shriekadelic extremes of *Ascension* in "Consequences," and they're clearly more used to the smoother waters of "Love" and the cheerful bop of "Joy."

Pharoah Sanders, whose specialty in those days was screeching, growling extended sax techniques, joined the group as a second saxophonist, and the two-disc *Live in Seattle* documents the expanded group (also featuring bassist/bass clarinetist Donald Rafael Garrett) at the end of September. The ruckus-raising of "Cosmos" and "Evolution," and the way "Out of This World" veers away from its theme and into the wilderness, are what you might expect; the free-sailing but respectful and relaxed 21-minute rendition of "Body and Soul" is more of a surprise.

By the middle of October, it'd been almost a month since Coltrane's last radical move, so the sextet hooked up with singer Juno Lewis and percussionist Frank Butler for the 18-minute title track of *Kulu Se Mama* (which was filled out with two long quartet pieces from June). Heavily influenced by African music, especially in its multiple percussion parts, it often seems more Lewis' show than Coltrane's, and anticipates some of the Afro-pop of the following decade—except when Sanders starts pulling bubbling demons out of the dark corners of his tenor sax.

November's breakthrough was *Meditations,* in which the quartet (plus Sanders and drummer Rashied Ali) revisits its suite from a few months before in much freer, more chaotically energetic style. The highlight, though, is the all-new opener, "The Father and the Son and the Holy Ghost," on which Coltrane and Sanders blow so hard they practically splatter the rest of the group against the walls. It's not pretty, and not much like *A Love Supreme,* but it's undeniably powerful.

Elvin Jones and McCoy Tyner both left Coltrane's group after *Meditations;* Garrison and Sanders stayed on, Ali joined full-time, and Alice Coltrane (John's wife) took over on piano. The new group's sessions from early 1966 are currently unavailable, so the earliest music we have from them is May's extraordinary *Live at the Village Vanguard Again!* Even in the middle of the free-music vortex, Trane never gave up his love of tunes, and the album consists of extended cruises through, above and around two of his favorites: "Naima" and "My Favorite Things." Sanders slashes the melody of "Naima" to ribbons and then tears the ribbons into confetti, Alice imitates Tyner's style as well as she can, and John keeps gravitating back toward the themes as if they were the North Star.

Live in Japan, a four-disc set from two July dates, is even more expansive—this time "My Favorite Things" goes on for almost an hour, though the first quarter is a bass solo. Coltrane and Sanders had been given alto saxophones on the tour, and they gave their new instruments a workout. The group was thinking on a grand scale by this point, and it can be exhausting to wait out their leisurely free ruminations, but if you've got the patience for it, there's some gorgeous, challenging music here.

Expression, recorded in February and March of 1967, was the last album personally approved by Coltrane. It's a bit scattered: "Ogunde" is built around a stately fanfare, and "Offering" and "Expression" work up some free-improv steam, but "To Be," featuring Coltrane on flute (!) and Sanders on piccolo (!!), churns on far too long. On the other hand, *Stellar Regions,* recorded at the first of those sessions but unreleased for 28 years, is a gem, jagged as a rock-lined shore but as lyrical as anything in Coltrane's catalogue. The new quartet (without Sanders) runs the tiniest of thematic ideas (like the fragmentary head of "Tranesonic") through the improvisational mill, and they emerge sparkling and razor-sharp. A week later, Coltrane and percussionist Ali recorded *Interstellar Space* as a duo. They match each other's frantic energy—"Leo," which had been in the quartet's repertoire for the better part of a year, emerges at hardcore speed and intensity. Trane has picked up some of Sanders' blatantly abrasive tone on the tenor, but he's still thinking—and playing—at a million notes per minute.

A private tape of one of Coltrane's final performances, from April 23, 1967, surfaced recently as *The Olatunji Concert,* and it sounds like the statement the other 1967 recordings were heading toward. The recording is rough and bristly, but thankfully, so is the performance: The new quartet (plus Sanders and an extra percussionist or two) lunges into half-hour-long savagings of "Ogunde" and, what else, "My Favorite Things," and it's a marvel that the Olatunji Center's walls were still standing when it was all over. By ten minutes into the show, the group has become a screaming white-noise machine. The rest is silence: Three months later, Coltrane was dead.

The Heavyweight Champion collects every extant bit of music Coltrane recorded for Atlantic on seven discs, including one that's all alternate takes and false starts (nine of "Giant Steps" alone)—and he's one of those artists where every scrap counts. *The Classic Quartet: Complete Impulse! Studio Recordings* is an eight-disc monster that could singlehandedly justify Western civilization: all of *Coltrane, Ballads, Crescent, A Love Supreme, Quartet Plays, Sun Ship, First Meditations, Transition,* and *Living Space,* plus odds and ends and a disc of "works in progress." *The Major Works of John Coltrane* is fantastic but misleadingly titled; it might better be called *The Major Works of John Coltrane That Used an Expanded Ensemble During a 15-Week Period in the Middle of 1965.* It's got both versions of "Ascension," as well as "Kulu Se Mama," "Selflessness" (from the "Kulu" session), and a shrieking half-hour-long blowout called "Om," recorded the day after *Live in Seattle,* that's possibly the most difficult track of Coltrane's original albums—but still influential in the noise world.

Dear Old Stockholm compiles five studio tracks on which Roy Haynes substitutes for Elvin Jones in the classic quartet; all good stuff, but as a set it has no real reason to exist. The unbalanced two-disc anthology *The Last Giant* spends rather a lot of time on Coltrane's formative years (as early as 1946!), lingers over the Atlantic era, throws in a live 1961 "My Favorite Things," and then vaults straight over the Impulse! period to 90 seconds from 1967. *A John Coltrane Retrospective: The Impulse! Years* is three discs' worth of Trane's more accessible and tuneful stuff from the '60s, mostly in studio renditions (with a few *Village Vanguard* treats). Impulse!'s *Very Best of* likewise plays up his smoother side; its bait is an otherwise unavailable studio version of "Impressions." —D.W.

Combustible Edison

★★	I, Swinger (Sub Pop, 1994)
★★	Schizophonic! (Sub Pop, 1996)
★★½	The Impossible World (Sub Pop, 1998)

After the dissolution of their rock band Christmas, Liz Cox and Michael Cudahy renamed themselves Miss Lily Banquette and the Millionaire, formed Combustible Edison, and hurled themselves into cocktail-lounge retro hell. Fun for a single or two, the band rarely transcended kitsch; it could do a perfectly good impression of '50s exotica, but it had nothing new to add to it. "Our host is a real scene-maker," Miss Lily croons on *I, Swinger*'s "The Millionaire's Holiday"—she may have been serious about it, but that's still no reason not to cringe. Only creditable covers of "Cry Me a River" and Kurt Weill's "Surabaya Johnny" are entirely unembarrassing.

In 1995, Combustible Edison provided most of the soundtrack to Quentin Tarantino's *Four Rooms*—the remainder being by easy-listening O.G. Esquivel, who outclasses them by a million tiki-decorated bar lengths. *Schizophonic!* is more of the same: entirely fluent in its idiom, entirely uninspired, and unnecessary in a world where Martin Denny records can be found at garage sales. Their farewell, *The Impossible World,* breaks the mold a bit with postproduction touches by electronic voyeur Scanner that bring their space-age bachelor-pad doodles into the post–space age. Cox gets to sing the genuinely strange "Tickled to Death," and her scat-vocalizing elsewhere is graceful. —D.W.

Commodores

★★★	Machine Gun (Motown, 1974)
★★★	Commodores (Motown, 1977)
★★★½	Commondores Live! (Motown, 1977)
★★★	In the Pocket (Motown, 1981)
★★★	Nightshift (Motown, 1985)
★★★★	The Ultimate Collection (Motown, 1997)
★★★½	The Millennuim Collection (Motown, 1999)
★★★★	Anthology (Motown, 2001)

Formed at the Tuskegee Institute in Alabama, this versatile septet signed to Motown in the early '70s—just as the funk movement began to gather steam. The Commodores brought a graceful Southern lilt to its plunking bass lines and sharp horn punctuations. Balancing that party-hearty attack with lead singer Lionel Richie's penchant for soft-soul balladry, the Commodores rode out the '70s on a hot crossover streak. *Commodores* (1977) and out of print albums such as *Caught in the Act* (1975), *Movin' On* (1975), *Hot on the Tracks* (1976), and *Natural High* (1978) all feature seductive après-disco moods along with the overheated dance-floor attitudes. *The Ultimate Collection* sums up the group's heyday quite well; it begins with the flawless thumper "Brick House" and ends with the borderline-unctious "Three Times a Lady." In between those extremes come equally funky throwdowns and considerably less cloying love songs. Just compare the Commodores' sweet, soothing "Easy" to one of Lionel Richie's solo bubble baths—if you dare. *In the Pocket* includes Lionel Richie's last one-two punch with the Commodores: the soaring "Lady (You Bring Me Up)" and the schlocky "Oh No." The out-of-print *Nightshift* is the best Commodores album with replacement singer J. D. Nicholas, mostly due to its hit title track: "Night Shift" is a subtly synthesized, beautifully understated tribute to the late Marvin Gaye and Jackie Wilson. —M.C.

Common

★★½	Can I Borrow a Dollar? (Relativity, 1992)
★★★★	Resurrection (Ruthless, 1994)
★★★½	One Day It'll All Make Sense (Relativity, 1997)
★★★★	Like Water for Chocolate (MCA, 2000)
★★★½	Electric Circus (MCA, 2002)

Originally based in Chicago, back when he went by Common Sense and before a ska band of that name sued him, this quirky hip-hop artist showed quite a bit of promise on his first two albums. But only after relocating to Brooklyn, NY, would he begin his most artistically fertile period. *Can I Borrow a Dollar?* saw the South Side–born rapper emerge as a post–Native Tongues anti-gangsta rapper, and on his breakthrough second album, *Resurrection,* his profile rose nationally. *Resurrection* sports a trio of killer tracks: the title song, "Book of Life," and "I Used to Love H.E.R.," another in a long line of clever allegories that documented hip-hop's creative decline (like Jeru the Damaja's "One Day," released around the same time). While a few hip-hop faithful grumbled sellout after the release of *One Day It'll All Make Sense,* it wasn't the sort of artistic treason that some saw in Nas' *It Was Written.* Both albums, incidentally, contain singles featuring Lauryn Hill. Common's collaboration with Hill, "Retrospect for Life," subtly interpolates Stevie Wonder's achingly melancholy "Never Dreamed You'd Leave in Summer" into a sad story about the abortion of a couple's child.

Like Water for Chocolate marked yet another shift in direction, as he teams here with kindred spirits the Roots. Featuring excellent guest turns on the mike—like Goodie Mob's Cee-lo and the Roots' Black Thought, as well as a moderately successful single with Macy Gray—the album was much more of a musical affair. *Electric Circus,* in 2002, took the black-rock fusion even further, and was alternately hailed as either a work of genius or dull and boring. Giving Common the benefit of the doubt, it falls more on the genius side, though it does suffer from meandering arrangements and grooves that sometimes spin their wheels. On the other hand, part of what makes the album so remarkable is the hypnotic noodling that steered hip-hop into new directions. —K.M.

Company Flow

★★★½	Funcrusher Plus (Rawkus, 1997)
★★★	Little Johnny From the Hospitul: Breaks and Instrumentuls, Vol. 1 (Rawkus, 1999)

El-P

★★	Fantastic Damage (Definitive Jux, 2002)
★★★½	Fantastic Damage Plus: Remixes & Instrumentals (Definitive Jux, 2002)

Company Flow became heroes to hundreds of alternative rap fans when they released their *Funcrusher* album at the tail end of the '90s. The grimy lo-fi production, simple beats, and unobtrusive samples thrilled underground hip-hop-heads, as did the front and center rhyming skills of verbose white boys El-Producto and Big Jus, who battled furiously to out-mystify their audience. The lack of hooks, choruses, or a musical motif that would somehow separate one track from another made the words of these chaotic, integrity-obsessed, science-fiction-spouting, mainstream-rap-hating MCs paramount. Underneath their surreal stream of words they seemed to value above all else the days of old when rap was a simpler world of battles, b-boys, DJs, and lyrical prowess. The one thing missing from their equation was that old-school rap was also a helluva lot of fun to listen to.

More interesting, and more fun to listen to, is the all-instrumental *Little Johnny From the Hospitul.* Reminiscent of DJ Shadow in its overcast stoner ambience, it's also a beat junkie's delight. In the hands of El-P and Co Flow DJ Mr. Len, sound effects, vocal snippets, and low-riding bass become the stuff of dreams, nightmares, art, and the soundtrack to a late-night ride down pitch-black streets.

After the members of Company Flow went their separate ways, El-P started a label, Definitive Jux, giving a home to like-minded souls who believed that going back to the future was the best way to wrest rap from the hands of pedestrian gangstas and bling-bling wanna-bes. *Fantastic Damage* goes a long way toward cementing El's reputation as a masterful creator of noisy, industrial, clanging, and decidedly radio-unfriendly sonic landscapes. El-P's bullying tone matches the sounds, but unless you're a conspiracy theorist or a Philip K. Dick fan, his mile-a-minute verbal deluges get old real fast. For enthusiasts of mostly excellent metallic buzzing noises and fractured sound collages, El-P was kind enough to release an instrumental version of his album as well. —S.S.

Ry Cooder

★★½	Ry Cooder (Reprise, 1970)

★★★	A Meeting by the River (Waterlilly, 1993)
★★★½	Mambo Sinuendo (Nonesuch, 2003)

To say that Ry Cooder is an extremely gifted musician is not only an understatement, but misleading as well. Certainly, Cooder has achieved an extraordinary level of technical proficiency in his playing, but what truly makes his music exceptional is the degree of stylistic expertise he has attained. Simply put, Ry Cooder can play damn near anything, from slide guitar to mandolin to banjo, saz, or tiple, or any style, be it gospel, folk, blues, calypso, Tex-Mex, or Hawaiian slack-key guitar. But if Cooder's ability is unquestionable, his taste is not. Despite credentials that include studio work with Taj Mahal, the Rolling Stones, Captain Beefheart, and Eric Clapton, Cooder's own work ranges in quality from the intriguingly experimental to the utterly embarrassing.

Why this is the case isn't entirely clear, but it must have to do with the guitarist's willingness to try anything. That seems to be the undoing of his debut, *Ry Cooder.* Although the album has its moments, including Randy Newman's acrid "Old Kentucky Home" and a delightfully unadorned mandolin version of Sleepy John Estes' "Goin' to Brownsville," it also ends up lumbered with the overwrought arrangements of "One Meatball" and Leadbelly's "Pig Meat." Fortunately, Cooder scales back for *Into the Purple Valley,* and the music improves immensely. Cooder still can't help tinkering with the arrangements, but this time around, the unexpected touches—for instance, the celesta in "Denomination Blues"—work in his favor. But the best moments, like the traditional "Billy the Kid" or his slide guitar rendition of Woody Guthrie's "Vigilante Man," are generally straightforward, presenting each song with minimal ornamentation.

Both *Boomer's Story* and *Paradise and Lunch* proceed in a similar vein, with minor variations and occasional cameos. Cooder brings in Sleepy John Estes for a version of "President Kennedy" on *Boomer's Story,* although that album's highlight is probably Cooder's slide guitar treatment of "Dark End of the Street." For *Paradise and Lunch,* Earl "Fatha" Hines is on hand to add stride piano flourishes to "Ditty Wah Ditty." But *Chicken Skin Music* takes this guest-star strategy to new levels by bringing in two exceptional and distinctive players: Tex-Mex accordion legend Flaco Jimenez and Hawaiian slack-key guitar whiz Gabby Pahinui. It's marvelous enough when the music is geared to their specialties, but when Cooder changes the context—by using Jimenez for a rendition of Ben E. King's "Stand By Me," say—the results are stunning. Sadly, *Jazz* (1978) doesn't quite meet *Chicken Skin Music*'s standard. Even though it includes tunes by Jelly Roll Morton and Bix Beiderbecke, *Jazz* isn't a jazz album. Nor does Cooder intend it to be, since he's far more interested in showing parallels between Morton's *habañiera* and the Bahamanian guitar style of Joseph Spence. And it makes for a fascinating lesson, if a tad too pedantic to be truly entertaining.

With *Bop Till You Drop,* Cooder makes a serious wrong turn, applying his rootsy eclecticism to material culled from rock and R&B. It's not a particularly novel approach for him—*Purple Valley,* for instance, included a version of the Drifters' "Money Honey"—but it brings out the worst in his music. *Bop,* at least, is able to balance its excesses with refreshingly rootsy instrumentals like "I Think It's Going to Work Out Fine"; *Borderline,* on the other hand, goes completely off the deep end. "Down in the Boondocks," "634-5789" and "Crazy 'Bout an Automobile (Every Woman I Know)" are songs that barely needed to be remade, much less reinvented as false nostalgia. Cooder downplays that tendency on *The Slide Area,* offering a blues shuffle treatment of "Blue Suede Shoes" but otherwise sticking with more modern material like the Little Feat–ish "I'm Drinking Again" or "UFO Has Landed in the Ghetto." But *Get Rhythm* finds him fiddling with the oldies again, slogging through an overblown boogie makeover of "All Shook Up" and a version of Johnny Cash's "Get Rhythm" done as imitation doo-wop.

Uneven as those albums are, Cooder was still making great music during this period—he just happened to be doing it for movie studios instead of record companies. Cooder was no stranger to soundtrack work, having contributed to both *Performance* and *Candy* before cutting his first solo album, but it wasn't until he provided some Southwestern atmosphere for Walter Hill's *The Long Riders* that his soundtrack career truly got into gear. Ironically, Cooder actually wound up making better rock records for movies than he did for himself; compare *The Border* to *The Slide Area* or *Get Rhythm,* and it's obvious that the focused demands of film-scoring bring out the best in his playing. *Alamo Bay* is impressively protean, with selections ranging from the sweetly harmonized "Quatro Vicios" (featuring David Hidalgo and Cesar Rosas from Los Lobos) to the punkish "Gooks on Mainstreet," while *Paris, Texas* is eloquently atmospheric, conveying a palpable sense of the town's barren landscape. Neither *Blue City,* which tends to predictable rock & roll, nor *Crossroads,* which is too heavy on overstuffed blues, are terribly impressive, but *Johnny Handsome* gets everything right, from the ominous quiet of the "Main Theme" to the jaunty good mood of "Clip Joint Rhumba." *A Meeting By the River* is a fruitful collaboration with Indian multiinstrumentalist V. M. Bhatt. Much of Cooder's work in the late '90s was dominated by one of his most commercially successful projects, *Buena Vista Social Club* (see ANTHOLOGIES). *Mambo Sinuendo* is another old-time Cuban music project in the same vein with Buena Vista alumnus Manuel Galbán. —J.D.C.

Sam Cooke

★★★★	The Best of Sam Cooke (1962; RCA, 1990)
★★★★	The 2 Sides of Sam Cooke (1970; Specialty, 1990)

★★★★	Keep Movin' On (ABKCO, 2002)
★★★★	The Complete Specialty Recordings of Sam Cooke (Specialty, 2002)

One of the towering figures in postwar American popular music, Sam Cooke emerged from the gospel world already a full-blown star, young, handsome, graceful as a ballet dancer, and blessed with a degree of onstage charisma and sensuality that had previously been confined to secular heartthrobs. As with Elvis Presley, his image and the sex appeal threatened to obscure the powerful artistry underneath it all, but ultimately the music triumphed. In Cooke's case, his move to the pop field laid the foundation for modern soul music, not only in his forward-looking blend of gospel, pop and R&B, but also in his songwriting, which revealed a burgeoning social conscience informed by gospel's shouts of struggle, peace, and freedom. For Cooke, the political was personal, as he embraced the ideal of economic and political self-determination with the same fervor with which he infused his gospel performances. To that end, he set himself apart in a white-dominated industry by taking control of his career both as an artist and as a businessman. Thanks to the skills of the accountant who became his manager, Allen Klein, Cooke gained creative control of his music, past and present, and moved aggressively to shape a future that would enable him to fully realize his artistic vision. He formed his own label (SAR/Derby), music publishing firm (Kags Music), and management company, and set out to be as much a factor behind the scenes as he was in the spotlight. "My future lies more in creating music and records than in being a live performer," he told *Billboard* magazine in 1964. That same year he also told the British publication *Melody Maker,* "Real gospel music has got to make a comeback," a prediction he did his best to make come true at SAR, where he made gospel, mostly through the Soul Stirrers, the cornerstone of the label.

As a pioneering black businessman in the music industry, Cooke's achievements remain significant, but in the decades since his death in 1964, when he was shot to death in a Los Angeles motel by a woman who claimed he had attacked her, it is the music that remains the brightest beacon for ensuing generations. In the gospel world he became the star attraction of the genre's most popular and influential group, the Soul Stirrers, whose venerable lead singer, R.H. Harris, took the 19-year-old Cooke under his wing and helped him develop an individual style. Cooke took it from there: Once he was in front of audiences, the word got out and soon hordes of adoring teenage girls were flocking to the Soul Stirrers' shows, worshipping the young Adonis more than the word he was espousing. His work in the gospel realm is well documented and still resonant: *Sam Cooke With the Soul Stirrers, Jesus Gave Me Water, The Last Mile of the Way, The 2 Sides of Sam Cooke,* his *Earliest Recordings,* and *The Complete Specialty Recordings of Sam Cooke* chart this exhilarating journey in Cooke's story, from a 1951 recording of Thomas A. Dorsey's "Peace in the Valley" to his entry into the secular realm in 1956 via "Lovable," on which he was billed as Dale Cooke so as to avoid offending his gospel constituency. Some observers feel Cooke was never better than he was in his gospel days, and the performances on these discs give their argument a potent charge. A Cooke original, "Touch the Hem of His Garment," is two minutes of vivid narrative and restrained emotional perfection, but the readings of "Jesus Gave Me Water," the old Baptist hymn "Were You There," and James Cleveland's "One More River" are close behind.

Upon being released from his Specialty contract, Cooke signed with the Keen label, founded by the enterprising talent scout, producer, and would-be mogul Bob Keane, who was soon to discover and produce Dick Dale and Ritchie Valens. Cooke's first Keen single, the lilting love ballad "You Send Me," was leased from Specialty and had a three-week run atop the pop charts in 1957. That success began an eight-year run of hits that included 28 Top 40 pop singles and 30 Top 40 R&B entries.

At Keen from 1957 through mid-1960, Cooke recorded material that was light and upbeat and in a pop vein, barely revealing the artist's deep involvement with gospel and R&B. When he signed with RCA in 1960, and subsequently gained control of his work, Cooke went back to the source, to gospel and blues, for inspiration and added depth. Many of the songs from this period are built on the life experiences he understood as a black man in a segregated world in upheaval, and spoke nearly as directly to his black audience as had his music with the Soul Stirrers. There was always room for a bright, soaring love song such as "Cupid" or a double-edged dance tune on the order of "Having a Party," but Cooke also covered harder blues such as the Howlin' Wolf–Willie Dixon cowrite "Little Red Rooster" and sophisticated classic pop on the order of the Gershwins' "But Not for Me" and the Sammy Cahn–Jimmy Van Heusen classic "All the Way." His first significant record in a harder vein was 1962's "Bring It On Home to Me," a soulful plea enlivened by an urgent gospel call-and-response section featuring Cooke sparring with his backup vocalist, Lou Rawls, as if they were back in church working up the congregation to full lather. By most standards his shining hour on RCA came with the posthumous release "A Change is Gonna Come" (1965), a #31 pop single that has taken on a life far greater than any chart position could reveal. Attuned to the temper of the times—after a president had been assassinated, after Bull Connor had sicced his dogs and trained his hoses on black protesters in Birmingham, after George Wallace had intoned "segregation now, segregation tomorrow, segregation forever" in his gubernatorial inaugural address, after Governor Wallace had stood in the doorway at the University of Alabama to block the admission of black students—"A Change is Gonna Come" was a somber, determined message, in keeping with the Movement's early embrace of Gandhian pacifism, that communicated the certainty of a new day dawning even as Cooke's world-weary vocal accepted the truth of a long, hard journey ahead.

The mainstream Cooke is easily accessible. For those who prefer the chart hits with a minimum of side trips, the enduring title remains 1962's *The Best of Sam Cooke,* which features 11 familiar tunes—"Cupid," "You Send Me," "Only Sixteen," "Having a Party," "Bring It On Home to Me"—and only one, a version and alternate take of the Gershwins' "Summertime," that failed to chart. *Greatest Hits* includes not only the hits on *The Best of* but adds, in its 21 tracks, lesser-known Top 20 items such as his versions of "Little Red Rooster" and "Frankie and Johnny." The deepest and most meaningful look at the man's secular career comes via the four-CD box set, *The Man Who Invented Soul,* which omits only the gospel tracks and songs cut during the final year of his career. These latter are owned by Allen Klein's ABCKO label, and are being reissued separately. One entire disc is given over to Cooke's Keen recordings, thus constituting the most thorough overview of those years on disc. The remaining discs offer a vivid look at the RCA years, including, on Disc Four, the entire, extraordinary *Night Beat* album from 1963, and another gritty live performance from 1963 issued in 1985 as *Live At the Harlem Square Club.* Needless to say, this is as essential a box set as any around, even without the formidable gospel recordings.

A focused, exciting look at Cooke's artistic growth is provided on the single-CD overview from ABKCO, *Keep Movin' On,* which centers on the studio recordings from 1963–64 and quite simply showcases some of the finest, most gripping singing Cooke ever committed to tape. The songs range from his own ebullient hit "Good News" to "A Change Is Gonna Come," with stops at a beautiful, haunting take on an Appalachian ballad, "The Riddle Song," a lovely "Tennessee Waltz," the exquisitely observed "When a Boy Falls in Love," and several other Cooke originals from this period. Best of all, Peter Guralnick, currently at work on a biography of Cooke, provides detailed annotation that places this period and the music it yielded in the proper context of Cooke's development. *Night Beat* belongs in any proper Cooke collection, as it is the sole album-length treatise featuring Cooke backed only by a small combo, which has the agreeable effect of heightening the impact of that glorious voice by keeping it way out front and center, unadorned and mesmerizing in its natural beauty. Apart from the spirited renditions of "Little Red Rooster" and "Shake, Rattle and Roll," the repertoire here is moody blues, some, such as "Mean Old World" and "You Gotta Move," being Cooke originals; others, such as the traditional "Nobody Knows the Trouble I've Seen" and "I Lost Everything," are of a piece with the introspective nature of the originals, lending the entire affair the feel of listening in on an intimate interior dialogue being conducted by one of the great artists of the 20th century. *The Rhythm and the Blues,* from 1995, is something of a companion volume to *Night Beat* in its focus on bluesier material performed in pared-down arrangements; *Night Beat* is far superior, but Cooke's readings of "Cry Me a River" and Rodgers and Hart's poignant "Little Girl Blue," as well as Duke Ellington's bittersweet "Don't Get Around Much Anymore," are worth the price of admission. Two live albums offer contrasting views of Cooke. *Live at the Harlem Square Club* finds Cooke working the largely black audience in gritty, get-down fashion with a backing band that includes the red-hot sax work of King Curtis to bump up the intensity a couple of notches. The songs are all familiar—"Chain Gang," "Twistin' the Night Away," "Having a Party," "Bring It On Home to Me," "Cupid"—but the down-home feel of the set gives the listener an idea of the energy to which the young gospel audiences must have responded with such gusto back in the early '50s. By contrast, the slick, big-band performance captured at the Copa in New York City on July 8, 1964, and issued as *Sam Cooke at the Copa* is genial and even a bit cheesy in a jivey, Vegas kind of way, but nonetheless spirited in its own right. It's the canapés to the *Harlem Square Club*'s collard greens. Cooke doesn't drive the band as hard as he does in the *Harlem Square* performance, nor they him, but he still digs in for a nice take on "Nobody Knows You When You're Down and Out," and the love ballads, especially "When I Fall in Love," are warm and tender in a way only Sam Cooke could be warm and tender. Finally, to get an idea of where Cooke was heading, check out the two-disc box set *Sam Cooke's SAR Records Story 1959–1965,* which features Cooke's productions of Soul Stirrers tracks featuring lead singers Paul Foster and Jimmy Outler, and four cuts (two produced by Cooke) of R.H. Harris' post–Soul Stirrers group the Gospel Paraders, as well as Cooke-produced gospel tracks by the Womack Brothers (featuring Bobby Womack). On the secular side, featured SAR artists include Cooke (a demo of "You Send Me" is here, as well as other studio tracks), Mel Carter, post–Soul Stirrers Johnnie Taylor, Billy Preston, the Womack Brothers recording as The Valentinos, and others. As with *Keep Movin' On,* this box includes detailed annotation by Peter Guralnick, again an authoritative, informed guide through this critical chapter in an important career. —D.M.

Coolio

★★★½	It Takes a Thief (Tommy Boy, 1994)
★★★★	Gangsta's Paradise (Tommy Boy, 1995)
★★★½	My Soul (Tommy Boy, 1997)
★★★½	Fantastic Voyage: The Greatest Hits (Tommy Boy, 2001)

In the mid-'90s, several actions were undeniably not cool in hip-hop: lifting obvious R&B samples for your hit singles; regular participation in MTV sporting events; calling yourself Coolio. Artis Leon Ivey Jr. committed all these sins, and had not only his biggest hit but his hairstyle parodied by Weird Al as punishment. And yet without Coolio's trailblazing efforts, Puffy might have never had the gumption to rip off Diana Ross, a reputed MC like Method Man would have never showed up on *Rock n Jock* to drop an easy pop fly, and Beavis would have had one less weird mantra to obsess over when he OD'd on sugar.

But though you made Coolio's acquaintance on the radio or MTV, don't go reaching for that greatest hits just yet, even if it is the only Coolio disc where you can find his fun contribution to the Nickelodeon network, "Aw Here It Goes (Theme From Kenan & Kel)." The original albums carefully place those party jams in a sometimes desperate urban context, most effectively on *Gangsta's Paradise.* Once the mood is set by the high gothic tone of the title track, LV's harrowed vocal straining for release as Coolio's slow burn sinks deeper into paranoia, the primarily upbeat remainder of the album sounds less like R&B frivolity and more like a collection of momentary escapes from despair. Coolio's sales slumped with *My Soul,* but his music remained consistent—"C U When U Get There" is one of the few hip-hop elegies to rise above maudlin self-pity.

Coolio's visual legacy shouldn't be ignored, either—and I'm not just talking about the hair. The videos for "Fantastic Voyage" and "1,2,3,4 (Sumpin' New)" document the downside of California dreamin' from a pedestrian's perspective. From Brian Wilson to Dr. Dre, after all, that West Coast fantasy has always rested on the mobility that comes from a sharp ride. But no matter how he got there, Coolio's parties always seemed worth the effort—way more fun that those Snoop Dogg snoozers where everyone gets comatose on cheap weed and lounges around playing Gameboy while bored strippers give them head. —K.H.

Chris Cornell

★★½ Euphoria Morning (A&M, 1999)

The crooner lurking inside Chris Cornell through countless screamfests with Seattle grunge-metal pioneers Soundgarden finally comes out to play on the singer's solo debut. *Euphoria Morning* preempts comparisons to his former band by turning down the volume and upping the variety, with straight blues, acoustic folk, and Beatles-like psychedelic pop. In contrast to Soundgarden, Cornell's voice is way up front in the mix, and he swoops, swoons, and sweats through these ballads with enough conviction to make explicit his debt to the late Jeff Buckley. But it's an influence that he never quite transcends. —G.K.

Cornershop

★★★ Hold On It Hurts (Merge, 1994)
★★★½ Woman's Gotta Have It (Luaka Bop, 1995)
★★★★ When I Was Born for the Seventh Time (Luaka Bop, 1997)
★★★½ Handcream for a Generation (Luaka Bop/Virgin 2002)

One of the few '90s acts embraced by both rock critics and antirock club kids, Cornershop embodies all the possibility and spectacular excess of the global cut-and-paste culture. Although the British five-piece first established itself with conventional alt-rock songs, it has gone on to incorporate all kinds of noise into ambitious collage-style productions: The sweet Punjabi singing of leader Tjinder Singh's heritage, the scattershot crunch of sample-based beats, the idyllic sitar of Anthony Saffery, and the blistering funk of James Brown.

The initial Cornershop efforts, *Hold On It Hurts* and several out-of-print EPs, showcase a band with a taste for energetic pop and strident antiracist rhetoric. By the second full-length disc, the taut rock structures were overrun by sounds from the world bazaar: *Woman's Gotta Have It* is primarily an Indian pop record with wry English lyrics and an inclusive musical sensibility reflective of the burgeoning Asian Underground movement among British musicians and DJs of Indian ancestry.

The band's breakthrough came in 1997 with the hit "Brimful of Asha," a worshipful tribute to Bollywood singer Asha Bhosle that heralded the uniformly tremendous *When I Was Born.* A showcase for the beatific talk-singing of Singh, that single and other more assertively funky bits (including "When the Light Appears Boy," a collaboration with poet Allen Ginsberg) established Cornershop alongside Beck and others as purveyors of a new kind of hybrid pop, one that treated ethnicity as something to be messed with, explored, and exploited, not treated with kid gloves.

It took years for Cornershop to put together a formal followup—there were several EPs and a lo-fi side project called Clinton, which debuted the chant "People Power in the Disco Hour"—and when *Handcream for a Generation* finally arrived, in 2002, some considered it a faint echo of *When I Was Born.* Talkier and less rhythmic, it lacked an accessible single but instead offered several sprawling experiments, including the gospelly "Staging the Plaguing of the Raised Platform," bolstered by a children's choir, and the sample-heavy philosophical treatises "Motion the 11" and "Lessons Learned From Rocky I to Rocky III." —K.M.

The Corrs

★★ Forgiven, Not Forgotten (Atlantic, 1995)
★★½ Talk on Corners [Special Edition] (Atlantic, 1999)
★★★ Unplugged (Atlantic, 1999)
★★★½ In Blue (Atlantic, 2000)
★★★½ VH1 Presents the Corrs: Live in Dublin (Atlantic, 2002)
★★★ Borrowed Heaven (Atlantic, 2004)

With their sparkling, sisterly harmonies and knack for breathless pop, the sibling act the Corrs come off somewhat like Ireland's belated answer to ABBA—or, given their respectable instrumental chops and photogenic looks, a Gaelic Dixie Chicks (albeit with a dude, brother Jim, on guitar). Unfortunately, while there seems to be much potential here, too often the music slips into forgettable adult contemporary mush—making the occasional lovely instrumental (showcasing Sharon Corr's fiddle, lead vocalist Andrea's tin whistle, and drummer Caroline's bodhran) or indelibly catchy pop jewel (like *In Blue*'s hit "Breathless") almost frustrating. *Forgiven, Not Forgotten* is immaculately sung, forgettable fluff, like Wilson Phillips without the hooks. Said hooks start to come out of hiding on *Talk on Corners*—released stateside as a remix-heavy "Special Edition"—which dispenses with the instrumental interludes almost entirely in favor of unadulterated high-gloss pop. It's still fluff, but giddy trifles like "So Young" are not without some charm.

But be forewarned—the Corrs' otherwise harmless cover of Fleetwood Mac's "Dreams" is presented here as a numbing dance mix.

In Blue, buoyed by the near-flawless "Breathless" and two other sugar bombs produced by hit maestro Robert John "Mutt" Lange in the same dare-you-to-resist-this style of Shania Twain (one is actually called "Irresistible"), is far and away the Corrs' most consistent studio effort. The two live albums, however, are the better value. *Unplugged* isn't quite the lively Irish reel showcase one might expect (there are only two instrumentals), but the sisters' crystal-clear harmonies soar over the stripped-down arrangements, and the closing cover of R.E.M.'s "Everybody Hurts" is a nice touch. Inspired—if not quite definitive—covers also light up *Live in Dublin.* Pretty but featherweight versions of Neil Young's "Only Love Can Break Your Heart," Jimi Hendrix's "Little Wing," and the Stones' "Ruby Tuesday" all float away without much impact (despite help from guest Ron Wood), but U2's Bono—in typical spotlight-hogging form—lends genuine soul and weight to the proceedings by singing with Andrea on alt-country brat Ryan Adams' gorgeous "When the Stars Go Blue" and the old Lee Hazlewood/Nancy Sinatra hit "Summer Wine."

Bono pops up again (as a songwriter) on the studio set *Borrowed Heaven* via "Time Enough for Tears," a ballad cowritten with Gavin Friday and Maurice Seezer, though it's the Corrs' own slowly percolating "Hideaway" that really evokes shades of prime U2. Too much of the rest of the album seems to be trying a little too hard, though. There's no denying the catchiness of songs such as the single "Summer Sunshine," but the insistent hooks seem to pander and force their way into the head rather than charm with the polished-but-endearing finesse that carried "Breathless." *Borrowed Heaven*'s most memorable and engaging melodies are all packed into the closing "Silver Strand," the album's sole instrumental—proof that the Corrs are at their best when it sounds like a hit single is the last thing on their minds. —R.SK.

★★	North (Deutsche Grammophon, 2003)

"Don't put your heart on your sleeve/When your remarks are off the cuff," Elvis Costello once warned, and like the great rock & roll romantic he is, he's spent a whole career betraying his own good sense. Costello emerged from the London punk explosion of 1977 as the resident singer-songwriter, using his smart mouth to turn sexual and political troubles into musical outrage. Elvis has gone through many changes since then, often coasting on mere craft, or the memory of it. But his key to greatness has always been his passion—his "Let It Bleed" means more than his "Lush Life." A wit, a blackguard, a moralist, a poet, a bitch, a Celtic folk ranter, a grinning pop tunesmith, a radio sweetheart with a sullen punk stare, he's a true original whether he's rocking on out or just trying to look Italian to the musical Valium.

Costello made a big splash right off with *My Aim Is True,* an attack on pop romance in all its guises, with the kind of venom that could only come from a true believer in spite of himself. With backup from a fluffy California bar band, Costello sneers about sex ("Watching the Detectives"), politics ("Less Than Zero"), and religion (the bad-Catholic-boy classic "Waiting for the End of the World")—although the one he'll be stuck singing for the rest of his life is the reluctant love ballad, "Alison." Elvis really found his voice when he got the Attractions together, souping up the music into the Stones/*Nuggets* garage-band racket of every teenage rock geek's dreams, with Steve

Nieve's nagging headache of an organ standing in for the brutal guitar Costello couldn't play. *This Year's Model* is the peak of the angry young Elvis, channeling the rage into the furious hooks of "Lip Service," "Lipstick Vogue," and "No Action."

Armed Forces soon followed—too soon, probably, since it suffers from a heavy case of road fatigue. The shrill, cluttered keyboards, almost all treble, suit the paranoia of the politically charged lyrics ("She's my self-touch typewriter/And I'm the great dictator"). *Get Happy* loosens up for a tour de force of 20 tracks imitating Booker T and the MG's at Ramones velocity, although "Opportunity" and "Riot Act" showed what a supple ballad singer Elvis had become. *Trust* has always been underrated because there's no real angle—just 14 brilliantly barbed pop tunes about men paying the wages of masculinity and suffering for their sins, with Pete Thomas's punchiest drumming and Steve Nieve's glossiest piano. In great songs such as "Watch Your Step," "New Lace Sleeves," and "You'll Never Be a Man," Elvis finally comes clean about his woman problems, with enough wit to suggest a way out: "Shot With His Own Gun," indeed. Not as epochal as *This Year's Model* or *King of America, Trust* still marks Elvis's summit as a singer, songwriter, and miserable-Irish-bastard pin-up boy.

Costello spent the next few years stretching out stylistically, starting with the well-chosen, miserably sung country covers of *Almost Blue*. The Cole Porter homage *Imperial Bedroom* buries a few excellent songs ("Beyond Belief," "Man Out of Time") under too many layers of vocal overdubs, strings, horns, harpsichords, guitar solos, and *Sgt. Pepper* studio gimmicks. *Punch the Clock* and *Goodbye Cruel World* imitate Top 40 radio, actually more of a stretch for Elvis than country or Cole Porter, with rare successes like the anti-Thatcher protest "Shipbuilding" and the fabulous real-world hit "Every Day I Write the Book."

By the mid-'80s, Costello was sounding a bit redundant: His thunder had been stolen by look-alike Steve Albini, who took the smoldering geek rage of *This Year's Model* to new sonic heights with Big Black. But Elvis roared back in 1986 with two of his best albums, both clearly influenced by his work producing the Pogues. *King of America* is where Costello harkens to his folkie roots, busting out the acoustic guitar, hooking up with T Bone Burnett and an unlikely passel of grizzled session dudes for a masterpiece. *King of America* gets off to a mighty slow start, but once you hit "Indoor Fireworks" at track six, settle in for one gem after another (okay, not "The Big Light" or "Eisenhower Blues"), from hoarse political rants like "Little Palaces" and "Sleep of the Just" to soulful love ballads like "Jack of All Parades." The Attractions returned for *Blood & Chocolate*, completing the one-two punch with one of Elvis's loudest, funniest records. Although the songs have the rugged acoustic strum of *King of America*, the Attractions' ham-fisted garage rock animates the Celt-folk passion of "Tokyo Storm Warning," "Poor Napoleon," and "Crimes of Paris." Best line: "She hit him with that paperweight Eiffel Tower."

Since then, Elvis has kept busy, but with only occasional moments of interest on his new records. *Spike* features more all-star help (from Paul McCartney to the Dirty Dozen Brass Band), but except for the righteously Thatcher-bashing "Tramp the Dirt Down," it's pretty words and no action; *Mighty Like a Rose* is less of the same. *The Juliet Letters* is—get this—a classical song cycle about Romeo and Juliet, with none of the literary merit of "Mystery Dance." *Brutal Youth* is a lightweight Attractions reunion; *All This Useless Beauty* offers muted balladry like the poignant "I Want to Vanish." But the covers collection *Kojak Variety*, with sharp versions of Mose Allison's "Everybody's Crying Mercy" and Randy Newman's "I've Been Wrong Before," was shaping up to be Elvis's best '90s album until his Burt Bacharach collaboration, *Painted From Memory*. What could have been a camp joke becomes a magnificently bittersweet career summary for both gentlemen—the heartbreaking "Toledo" is, if anything, too good for Dionne Warwick to sing. *When I Was Cruel*, a belated and gratuitous return to guitar rock, finds Elvis thriving again on his commitment to tricky hooks, funny lyrics, and the head-scratching career moves that will keep his fans on their toes for the rest of his days.

Costello's greatest-hits albums don't flow very well, since he puts his heart and soul into his discrete concept albums. *Girls Girls Girls* is a bulky and eccentric set annotated by the maestro himself, who's always worth reading (the opening of his liner notes to the 1994 reissue of *Goodbye Cruel World* is "Congratulations! You have just purchased our worst album!"). *Taking Liberties* and *Out of Our Idiot* collect some of the stray B sides and outtakes Costello was leaving in his wake; most of these songs appear as bonus tracks on the various CD reissues of the Costello catalogue. Ones to keep an eye out for: "Black Sails in the Sunset," "Hoover Factory," "Talking in the Dark," and his ragged cover of Sam Cooke's "Get Yourself Another Fool." In the late '90s, Elvis began a strange new career appearing as himself in movies, such as *Spice World, 200 Cigarettes*, and *Austin Powers: The Spy Who Shagged Me*, in which he appears with Burt Bacharach to sing "I'll Never Fall in Love Again." It's the funniest thing in the movie. *North* is a return to jazz ballads, with

Costello sounding a little stiff and dusty, but any guy who can write songs such as "Episode in Blonde," "Alibi," and "When I was Cruel" while pushing 50 is in no danger of burning out. —R.S.

Counting Crows

★★★½ August and Everything After (DGC, 1993)
★★ Recovering the Satellites (DGC, 1996)
★★ Across a Wire—Live in New York City (DGC, 1998)
★★★ This Desert Life (DGC, 1999)
★★★ Hard Candy (Geffen, 2002)
★★ Films About Ghosts: The Best of . . . (Geffen, 2003)

August and Everything After instantly established erstwhile coffeehouse folkie Adam Duritz and his San Francisco–based band as the latest heirs to the Van Morrison/Bob Dylan/Bruce Springsteen songwriting tradition; Duritz even subbed for Morrison when the Irish soul troubadour failed to show for his Rock and Roll Hall of Fame induction. The ambitions are spelled out in the breakthrough single "Mr. Jones," which mimics Morrison's "sha-la-la" and name-checks Dylan. The Crows bridge the worlds of rock, folk, and soul with an emphasis on living-room intimacy, thanks to T Bone Burnett's transparent production. The tunes are direct, melodic, uncluttered. The same can't be said for Duritz, whose wordy introspection is marred by a voice that whines as much as it wails.

These flaws are exacerbated on *Recovering the Satellites,* a more ambitious album with stabs at string orchestration and Memphis soul. The color gray, phones that don't ring, "the smell of hospitals in winter"—Duritz sounds as self-obsessed as Morrissey, without the humor. He sings about the malaise of being a rock star in a voice that wanders the octaves in perpetual discomfort, even as the band compensates with its hardest rocker yet, "Angels of Silences," and the buoyant Eagles-like twang of "Daylight Fading."

The self-indulgence becomes insufferable on *Across a Wire,* a premature live double CD. "Angels of Silences" is reconfigured as an inspired jug-band blues, but Duritz sounds even mopier than usual. How ironic that while many of his songs struggle with life as a pop icon, the album prominently displays the MTV and VH1 logos and contains laudatory liner notes written by a VH1 executive.

Duritz snaps out of it on the best portions of *This Desert Life,* which comes out bustling with his gotta-get-out-of-town answer to "Born to Run" ("Hangin' Around") and follows it with "Mrs. Potter's Lullaby," which just keeps on rollicking through verse after verse with barely a pause, the guitars knifing through for air. Duritz loosens up just enough to join the rest of the Crows in the joy of the moment, rather than marching them down to the whipping post. For the self-proclaimed "king of the rain," the sky is beginning to clear ("I'm doing alright these days," he declares on "I Wish I Was a Girl") and the melancholy tunes mostly soar instead of wallow.

Though not particularly more optimistic than previous efforts, *Hard Candy* gives listeners a lot more to sing along with, even, as on "Black and Blue," when the singer imagines writing a suicide note. Rather than framing the singer's pain as on previous albums, the Crows' music counterbalances it. The abundant melodies are more instantly apparent, buffed into concise packages that take the Crows outside of their roots-rock cradle and into a more overtly pop realm, where sonic continuity matters less than the unique character of each song: dreamy piano balladry on "Butterfly in Reverse," new-wave keyboards for "New Frontier," Drifters-meet-Springsteen orchestrations on "Miami," the Mamas and Papas vocal vibe that pervades "Why Should You Come When I Call?" It's the most consistently tuneful of all the Crows albums, and it makes Duritz's moping almost tolerable.

Films About Ghosts is a skimpy career overview fleshed out with two tossed-off new tracks, one of which is a Grateful Dead cover. —G.K.

Don Covay

★★★★ Mercy!/See-Saw (Atlantic, 1964, 1966, Koch, 2000)
★★★ Adlib (Cannonball, 2000)

Don Covay and the Lemon Jefferson Blues Band

★★★½ House of Blue Lights (Atlantic, 1969; Sepia Tone, 2002)

At a time when soul veterans with less-than-high profiles, like Solomon Burke, are getting some respectful dues, Don Covay may be the most neglected old master out there. Born in 1938, the son of a Southern Baptist minister, Covay grew up in Washington, D.C., where he became a protégé of Little Richard. By the early 1960s, he was writing the songs and recording the singles for Atlantic that established him as among the most clever inheritors of the Sam Cooke style. His tunes included hit classics like Aretha Franklin's "Chain of Fools" and little-known should-be classics like Little Richard's "I Don't Know What You've Got (But It's Got Me)." As a songwriter Covay has a knack for dramatizing very plain, down-home situations and attaching an indelible phrase, as in his tale of motel infidelity "I Was Checkin' Out (She Was Checkin' In)." Although out of print, his exceptional career overview *Mercy Mercy: The Definitive Don Covay,* particularly valuable for including singles before and after his Atlantic years, can still be found used. A worthy substitute is the combination release of his first two Atlantic LPs, *Mercy!/See-Saw.* Covay had as much blues bark as church shout in his vocals, which made him a prime inspiration for Mick Jagger and Peter Wolf of the J. Geils Band, among others. *House of Blue Lights,* his third Atlantic, is a rough-and-ready response to the heavy-blues fashions of the late '60s and now sounds only a bit more earthbound than his celebrated earlier sides. Covay was not the most consistent stage act, and he spent long stretches away from music.

Though few noticed, *Adlib* was a sharp, well-paced comeback album boosted by help from Wilson Pickett, Huey Lewis, and Lee Konitz. Recovering from a stroke, Covay reined in his voice a bit, but whether he was anguished or exultant, he remains what the geezers call a solid sender. —M.MI.

Cowboy Junkies

★★★	Whites Off Earth Now (1986; RCA, 1990)
★★★★	The Trinity Sessions (RCA, 1988)
★★	The Caution Horses (RCA, 1990)
★★	Black-Eyed Man (RCA, 1992)
★★★	Pale Sun, Crescent Moon (RCA, 1993)
★★	200 More Miles: Live Performances 1985–1994 (RCA, 1995)
★★★	Lay It Down (Geffen, 1996)
★★	Studio: Selected Studio Recordings 1986–1995 (RCA, 1996)
★★	Miles From Our Home (Geffen, 1998)
★★	Rarities, B-Sides and Slow, Sad Waltzes (Valley, 1999)
★★★	Open (Latent/Zoe, 2001)
★★	Best of Cowboy Junkies (RCA, 2001)
★★	The Radio One Sessions (Strange Fruit, 2002)
★★	One Soul Now (Zoe, 2004)

The Toronto quartet Cowboy Junkies have made a career out of its soft-focus sound, initially emphasizing the drowsily pretty vocals of Margo Timmins, with brother Michael Timmins' droning guitar leads gradually assuming a bigger role. They've maximized that rather limited approach by evincing exquisite taste, particularly on the covers-heavy early albums, and by playing off the tension between Margo's lullaby voice and the frequently dire imagery of Michael's lyrics. The maelstrom-beneath-the-calm subtext was broached on the debut album, *Whites Off Earth Now,* notably on a Robert Johnson blues, in which Margo Timmins vows, "I'm gonna beat my man/Until I get satisfied."

Armed with a single microphone, the Cowboy Junkies took 14 hours to record the followup: *The Trinity Sessions.* The songs were recorded in a church, and the band takes the notion of "hushed atmosphere" to a glorious and mesmerizing extreme on what remains its signature album. *The Trinity Sessions* is so seamless it makes the songs of Hank Williams, Patsy Cline, and the Velvet Underground sound like long-lost companions.

The deceptively tough female persona that first glimmered on *Whites Off Earth Now* is coaxed to the surface by Michael Timmins' ambitious songwriting on *The Caution Horses* and *Black-Eyed Man,* but the drowsy arrangements sound somehow less compelling with fuller production. The band's streak of ace covers ends on *Caution Horses* with a lukewarm version of Neil Young's "Powderfinger."

Young-like guitar feedback plays a more prominent role on *Pale Sun, Crescent Moon,* signaled by an unlikely cover of Dinosaur Jr's "Post." *Lay It Down* slips back into old habits, the most stripped-down recording since *Trinity,* with a greater sense of groove, thanks to Alan Anton's rubbery bass lines. The band concentrates on honing its strengths, exploring absence (of a lover, or of feeling itself) with uncommon empathy and insight—and it gives the album the feeling of a small but noble achievement.

Desperation sets in on *Miles From Home,* with producer John Leckie (Radiohead, Verve) on board to beef up the sound. He does, but what distinctiveness the Junkies once had is lost in an avalanche of post–Lilith Fair orchestration and backing vocals. *Open* marks a more palatable progression; Michael Timmins' Southern-gothic tales of death and betrayal have never sounded creepier, and his acid-washed guitar provides a suitably menacing counterpoint to his sister's ghost-walking vocals. *One Soul Now* picks up on these sonic cues, but the songs aren't distinctive enough to exploit them. —G.K.

Carl Cox

★★★½	F.A.C.T. Vol. 2 (Moonshine, 1997)
★★★★	The Sound of Ultimate B.A.S.E. (Moonshine, 1998)
★★	Phuture 2000 (Moonshine, 1999)
★★★½	Mixed Live (Moonshine, 2000)
★★	Global (ffrr/Strictly Rhythm, 2002)
★★★★	Mixed Live, 2nd Session (Moonshine, 2002)

Carl Cox's funky techno and hard-hitting house is as big and gregarious as he is, which may explain why his muscular music has earned him legions of fans worldwide. The British jock has been repeatedly crowned "World's Best DJ" in a career that's spanned decades: He put the bang in Brixton's acid-house explosion and has incited jump-up fervor at many a "Summer of Love" massive. It was at a 1988 Sunrise rave outside London that Cox hooked up a third turntable *and* his signature sound, earning him the moniker "3 Deck Wizard" and an album deal with Paul Oakenfold's Perfecto label. But while Cox's music crossed into the mainstream—his 1992 "Does It Feel Good to You" broke the Top 40—he spent the rest of the decade mining a more underground sound geared at jacking sweaty dance floors.

The 1995 *F.A.C.T.* ("Future Alliance of Communication and Technology") mix sold a stunning quarter million copies, and its followup, 1997's *F.A.C.T. 2,* alerted Americans to how tremendous in scope Cox's techno triptych could be. Obliterating popular tracks by dance dons Fatboy Slim, Cajmere, and Underworld, *F.A.C.T. 2* churns funk, house, tribal, breaks, and beyond into an unyielding techno tirade. The turntable trickery continues on *The Sound of Ultimate B.A.S.E.* Drawing upon his U.K. club night of the same name, it's an ass-shaking assault of dark, mutant house, and the clever changeups on tracks like Freq.'s "Xirtam 2" cut furiously before pummeling the listener with aggressive beats and basslines. Soon after, Cox released his second artist album, *Phuture 2000,* a ho-hum hodgepodge of Latin flava, patois rap, and jungle fury that spawned a couple of forgettable hits. Recorded live at Chicago's Crobar club, you can't help but wish you were hearing *Mixed Live*'s top-of-the-hour techno and progressive house on a thumping Phazon sound system. *2nd Session* fares better on home stereos: Recorded in Detroit on the Area2 tour, a frisky Cox digs heavily from his own Intec label, but the results are surprisingly eclectic and, in typical Cox fashion, unrelenting. It's a far superior sound for him: Coming from big, bad Cox, the mediocre house of *Global*—released the same year—sounds plain wimpy. —C.S.

Cracker

★★★	Cracker (Virgin, 1992)
★★	Kerosene Hat (Virgin, 1993)
★★	The Golden Age (Virgin, 1996)
★★	Gentleman's Blues (Virgin, 1998)
★★★	Garage D'Or (Virgin, 2000)
★★	Forever (Back Porch, 2002)
★★	Hello Cleveland! Live from the Metro (Cooking Vinyl, 2002)
★★★★	Countrysides (Artist Direct, 2003)

If only David Lowery really had been as giddy about selling out as he seemed, Cracker might have been the big slobbery raspberry in the face of alt-rock sanctimony he pretended it was. Cracker's rootsy backbeat thrust swaggered with a populist immediacy supposedly more democratic than the collegiate whimsy of Lowery's old band, much-lauded eclectic absurdists Camper Van Beethoven. Lowery declared, "I don't know what the world needs now/But I'm sure as hell that it starts with me" on his first single ("Teen Angst") with the commitment of a long-overlooked talent finally commandeering the spotlight.

But belated success didn't dilute the sourness of a dude who has felt unjustly ignored for the better part of a decade. Rockers have sneered their way to genius many a time, but *Kerosene Hat* drowns in the world-weary whininess Lowery diagnosed as indie rock's terminal condition back on Camper Van's "Life Is Grand." Bitch slaps like "Get Off This" sound more strident than the indie purists it chided for securing Perkins Loans, piercing their nipples, and knowing all the words to "Where the Hell Is Bill?" Lowery sounds as clueless as Mark Knopfler dissing pop stars with earrings back in 1985. The curdled resentment of *The Golden Age*'s "I Hate My Generation" stunk so rankly of old-fartism that if you didn't check Lowery's birth certificate, you might suspect that the contemporaries Lowery was lashing out at were pushing 60.

Recently, Lowery has made peace with his past, reuniting the Campers, even resuscitating his old indie label Pitch-A-Tent. But neither the Spice Girls, Puffy Combs, nor Bobby Brown could get away with calling a record *Forever,* and though he'll outlast them all, neither can David Lowery. *Countrysides* includes songs from writers as varied as Merle Haggard, Terry Allen, and Bruce Springsteen. Lowery unexpectedly recovers his sense of humor here—he kicks off Hank Williams Jr.'s "Family Tradition" with an absurd "Alternative country singers have always been a real close family." Collecting 16 of Cracker's wisest cracks, *Garage D'Or* is probably your best bet, if just for the fondly sardonic "Eurotrash Girl." —K.H.

The Cramps

★★★½	Gravest Hits (IRS, 1979)
★★★½	Songs the Lord Taught Us (Illegal, 1980)
★★½	Psychedelic Jungle (IRS, 1981)
★★½	Smell of Female (Enigma, 1983)
★★★★	Bad Music for Bad People (IRS, 1984)
★★★	A Date with Elvis (1986; Enigma, 1990)
★★½	Stay Sick! (Enigma, 1990)
★★★½	Look Mom No Head! (Restless, 1991)
★★	Flamejob (Medicine, 1994)
★★	Big Beat from Badsville (Epitaph, 1997)
★★★★	Greatest Hits (BMG Special Products, 1998)

Holing up at the corner of rockabilly raunch and sick psychedelia, the Cramps gleefully embody all of early rock's sleaziest impulses. Their first release, *Gravest Hits,* (which has since been released on CD with *Psychedelic Jungle*) contrasts the itchy anxiety of "Human Fly" against an earnest cover of the Trashmen classic "Surfin' Bird." A similar dichotomy can be found on *Songs the Lord Taught Us,* where Lux Interior's Gene Vincent–meets–Fred Schneider delivery generates maximum friction against the brittle edges of the band's punkabilly instrumental attack. (*Bad Music for Bad People* combines the best of *Songs the Lord Taught Us* with highlights from *Gravest Hits* and *Psychedelic Jungle*). Sadly, neither the low-key *Psychedelic Jungle* nor the live *Smell of Female* is able to match that edgy chemistry, but the unrepentant sexism of *A Date With Elvis* almost makes up the difference; after all, where else are you likely to hear songs as tastelessly titled as "The Hot Pearl Snatch" or "Can Your Pussy Do the Dog?" *Stay Sick!* adds a few kinks to the Cramps' lyrics (e.g., "Journey to the Center of a Girl"), but musically, the group seems to have shot its wad, as the album's only original move is the rheumy cover of "Muleskinner Blues." But *Look Mom No Head!* not only picks up the tempo on most tunes, but brings in Iggy Pop for the thoroughly demented "Miniskirt Blues," then one-ups it with the single-entendre rocker "Bend Over, I'll Drive." If only *Flamejob* and *Big Beat From Badsville* could match their bad impulses with a similar sense of style. —J.D.C.

Cranberries

★★★★	Everybody Else Is Doing It, So Why Can't We? (Island, 1993)
★★★½	No Need to Argue (Island, 1994)
★½	To the Faithful Departed (Island, 1996)

★★★	Wake Up and Smell the Coffee (Universal, 2001)
★★★½	Stars: The Best of 1992–2002 (Universal, 2002)

The Cranberries sugary debut could have been merely another wispy bit of dream pop, as effervescent and forgettable as a Sundays album. But rather than aiming for ethereal lightness, singer Dolores O'Riordan was one of the first singers to rework Sinead O'Connor's swoop for her own purposes; unlike pretty-poo thrushes such as Sarah McLachlan, however, O'Riordan also inherited O'Connor's self-determination and even a bit of her righteousness.

For its desired effect, *Everybody Else* required a glossy coat, and Stephen Street, who'd produced the Smiths and the Psychedelic Furs back when, supplied it. This is music that delights in its own sound—"Linger" isn't so much a broken heart's lament as a celebration of how it feels to sing that particular word over and over. *No Need to Argue* was just as luxurious, but with a harsher undertone. The antiwar fury of "Zombie" was a shocker—it was almost as if Karen Carpenter had released a single skewering Henry Kissinger. Sharp and deeply felt, this foray into the political was also the beginning of the end for O'Riordan's development as a lyricist.

The titles on *To the Faithful Departed* say it all: "I Just Shot John Lennon," "Bosnia," "War Child." "Free to Decide" was a proud statement of autonomy, but the rest of the album was practically an argument against allowing such unchecked freedom for clumsy songwriters such as Dolores. Someone must have talked some sense into somebody before they went back into the studio: *Bury the Hatchet* was a giant leap backward, and not a moment too soon. *Wake Up and Smell the Coffee* is even more modest and gentle in its melodicism. The age of tuneful modern rock has passed, and adult contemporary is the smart way to go. After all, everybody else is doing it. —K.H.

Cream

★★★	Fresh Cream (Polydor, 1966)
★★★★	Disraeli Gears (Polydor, 1967)
★★★★	Wheels of Fire (Polydor, 1968)
★★★	Goodbye (Polydor, 1969)
★★	Live, Vol. 1 (Polydor, 1970)
★★	Live, Vol. 2 (Polydor, 1972)
★★★★★	Strange Brew: The Very Best of Cream (Polydor, 1983)
★★★★	Those Were the Days (Polydor/Chronicles, 1997)
★★★★	The Millennium Collection (Uni/Polydor, 2000)

Cream was rock's first power trio, its first significant psychedelic blues band, and the first to make a fetish of instrumental virtuosity. Its success catapulted Eric Clapton, Jack Bruce, and Ginger Baker to superstardom, and inspired several generations of hard-rock heroes, from Grand Funk to Van Halen. Even 20 years after the trio called it quits, Cream remains a staple of AOR radio. Yet for all that, it's easy to overestimate the value of the Cream's recorded output. Sure, the group cut some astonishing singles—"Badge," "Sunshine of Your Love," "White Room"—but it also made some incredibly misdirected and embarrassing live albums. It was almost as if Cream existed with two distinct identities, one a pithy singles act, and the other a self-indulgent jam band.

Although neither side completely emerges on *Fresh*

Cream, it's easy enough to see the shape of things to come. "I Feel Free" and "I'm So Glad" were slick and tuneful, handily showing off the group's ability to pull pop from the blues, while "Toad" and "Rollin' and Tumblin' " bore witness to the trio's propensity for showboating. Things on the pop side tightened up considerably when producer Felix Pappalardi came aboard; not only did he dress up *Disraeli Gears* with odd instruments and exotic sounds, but he kept the band's instrumental interplay in check, so that even a song as seemingly heavy as "Sunshine of Your Love" came across as singles fodder.

Wheels of Fire brought further refinements in Pappalardi's pop eclecticism. It added such exotic sounds as cello, marimba, and tonette, expanded his studio role from producer to player, and offered the first recorded example of Cream's concert approach; from the focused fury of "White Room" to the rambling, 16-minute version of "Toad," it remains the most representative slice of the Cream legacy. Sadly, things went downhill soon after, and *Goodbye,* recorded in the band's death throes, balances some of the band's most exquisite studio work ("Badge" in particular) with so-so concert recordings; it barely seems a complete album. *Strange Brew* is essentially a singles compilation and holds up well to repeated listening, but the two volumes of *Live Cream* are muddled leftovers released solely to cash in on the band's enduring popularity. *Those Were the Days* is a box set that compiles all of Cream's output, both live and in the studio, in a single package. —J.D.C.

Creed

★★½	My Own Prison (Wind-Up, 1997)
★★★	Human Clay (Wind-Up, 1999)
★★½	Weathered (Wind-Up, 2001)

At their best, Creed resembled a ham-handed version of early Pearl Jam: the same vague, portentous lyricism and Zeppelin-style riffage married to melodic Top 40 hooks. But Creed replaced the '80s punk sensibilities of its Seattle grunge influences with an extra dollop of *Spinal Tap*–worthy bombast. The Florida-based band's debut, *My Own Prison,* unapologetically embraced '70s-style stadium rock, moving between thundering metallic tracks and sweeping ballads, yielding four hit singles ("Torn," "One," "What's This Life For," and the title track) that pretty much served as album highlights as well.

Prison, which the band originally released themselves before signing with the then-obscure label Wind-Up, turned Creed into superstars, and the group's subsequent discs followed roughly the same template. The 10-times-platinum *Human Clay,* while covering little new sonic ground, was a satisfying hunk of post-grunge cheese; the immediacy of monster hits like "With Arms Wide Open" was hard to deny. Lead singer Scott Stapp's Eddie Vedder–like mannerisms—the great, emotive growl, the hair-tossing solemnity—seemed to grow in direct proportion to the band's success; by the time they released their third major label disc in 2001, Creed's utter lack of either humor or self-awareness had become its most distinctive trait. *Weathered* boasted several decent songs ("One Last Breath," "Stand Here With Me"), one great guilty pleasure ("My Sacrifice"), and more filler than either the band's fans or even its many critics had come to expect. The band called it a day in the summer of 2004. —A.S.

Creedence Clearwater Revival

★★★½	Creedence Clearwater Revival (Fantasy, 1968)
★★★★	Bayou Country (Fantasy, 1969)

★★★★½	Pendulum (Fantasy, 1970)
★★★	Mardi Gras (Fantasy, 1972)
★★★★	Creedence Gold (Fantasy, 1973)
★★	Live in Europe (Fantasy, 1973)
★★★	More Creedence Gold (Fantasy, 1973)
★★★★★	Chronicle (Fantasy, 1976)
★★★	Creedence 1969 (Fantasy, 1978)
★★★	Creedence 1970 (Fantasy, 1978)
★★½	The Concert (Fantasy, 1980)
★★★	Creedence Country (Fantasy, 1981)
★★★★½	Chronicle, Vol. 2 (Fantasy, 1986)
★★★	At the Movies (Fantasy, 1998)

They say when you get lost in the woods, you should walk downhill until you find the river, and then follow it to town. But for Creedence Clearwater Revival, America was never that simple, and its songs endure as a map of the country's traps, terrors, treasures, and pleasures. CCR was a classic hippie guitar band, soaking in the Northern California air, but it stood apart from the San Francisco psychedelic bands, partly because of its blue-collar earthiness, and partly because its drummer didn't suck. John Fogerty's spit-and-growl voice was the purple mountain majesty above the fruited plain of phenomenal rhythm section Doug Clifford and Stu Cook, California's answer to Wyman and Watts. The guys rambled their tamble while Fogerty ran down the road, chased by a tombstone shadow under a bad moon rising.

The first two albums show that Creedence could jam and get loose with any of the ballroom acid rockers, but with a much tougher sound honed during its years playing swamp blues, country, and rockabilly as an East Bay bar band—they had been playing together, for the sheer love of it, ever since they met in junior high school. Even at its rootsiest, the music was full of mystery and menace: The apocalyptic guitar riff of "Walk on the Water" was scary enough to inspire the Clash's "London Calling." But Creedence truly arrived with *Green River,* from the pastoral beauty of "Green River" to the sexy nightmare of "Sinister Purpose." John Fogerty sings about a river, pure and unpolluted, with the power to "let me remember things I don't know." But his green river is alive with the noise of all the drowned souls it carries—the ghost cries of flatcar riders and cross-tie walkers, pharaohs and Israelites, husbands and gamblers. Absurdly underrated as a lead guitarist—just listen to his terrifying one-note solo in "Tombstone Shadow"—Fogerty sings his hairy ass off, whether his struggles are personal ("Lodi") or political ("Wrote a Song for Everyone").

Willy and the Poor Boys is Fogerty's songwriting peak, with the sharp working-class anger of "Fortunate Son," "Don't Look Now," and "It Came Out of the Sky" (one of rock's first attacks on "Ronnie the Popular"). *Cosmo's Factory* shows off in two fantastic jams, the seven-minute "Ramble Tamble" and the 11-minute "I Heard It Through the Grapevine." Fogerty waxes world-weary in "Lookin' Out My Back Door" and "Long as I Can See the Light," while breathing fire in the demented raveup "Travelin' Band." *Pendulum* is spottier but peaks high with a couple of pensive farewells to the '60s, "It's Just a Thought" and "Have You Ever Seen the Rain?" At this point, Creedence had just released four all-time classic albums in 16 months; arguments over which one's the best will be going on for as long as those big wheels keep on turnin', but my quarter's down on *Green River.* Or maybe *Cosmo's Factory.* Hmmm . . . side two of *Willy*?

The band was falling apart by *Mardi Gras:* Rhythm guitarist Tom Fogerty, John's older brother, had quit, while Clifford and Cook started taking equal shares of the songwriting, although the best they could do was Clifford's "Need Someone to Hold." CCR split bitterly, and it's been depressing to watch the grudge fester over the years—in the late '90s, Fogerty even sued to keep Clifford and Cook from touring as Creedence Clearwater Revisited. All four band members kept recording, but without the old Creedence magic—the closest any of them came was "Rock and Roll Girls," from John Fogerty's only solo hit, 1985's *Centerfield.* The label kept putting out redundant compilations and weak live albums; the 20-song *Chronicle* is a superb place to start, the greatest hits of a band populist enough to put its greatness into its hits. Unlike so many of its peers, CCR was staunchly committed to the public pleasures of rock & roll, making music anyone could love at first listen, which is why its songs have been sung by everyone from Richard Hell to Pavement, from Bonnie Tyler to the Minutemen, from the halls of Tina Turner to the shores of Bon Jovi. In short, for a couple of years there, Creedence was as great as any rock & roll band could ever be. —R.S.

Marshall Crenshaw

★★★★	Marshall Crenshaw (1982; Warner Archives/Rhino, 2000)
★★	Field Day (Warner Bros., 1983)
★★★	Downtown (Warner Bros., 1985)
★★	Mary Jean and 9 Others (Warner Bros., 1987)
★★	Good Evening (Warner Bros., 1989)
★★★	Life's Too Short (Paradox/MCA, 1991)
★★	Marshall Crenshaw Live . . . My Truck Is My Home (Razor & Tie, 1994)
★★★	Miracle of Science (Razor & Tie, 1996)
★★	The 9 Volt Years: Battery Powered Home Demos & Curios (1979–198?) (Razor & Tie, 1998)
★★	No. 447 (Razor & Tie, 1999)
★★★★	The Best of Marshall Crenshaw: This Is Easy (Warner Archives/Rhino, 2000)
★★	I've Suffered for My Art . . . Now It's Your Turn (King Biscuit Flower Hour, 2001)
★★★	What's in the Bag? (Razor & Tie, 2003)

Power-pop fanatics—the children of Big Star and Cheap Trick's *In Color*—still genuflect in the direction of *Marshall Crenshaw,* an album whose only crime was to come out at about the same time as synth pop was usurping the place of guitar-based songwriting on the charts. The melodies and arrangements are so clean, plain-spoken, and punchy that it's possible to take their make-it-look-easy brilliance for granted. Most of the songs were recorded by a boisterous trio, though the hard-rocking "Cynical Girl" is a Crenshaw one-man-band tour de force.

That Crenshaw has never quite equaled his debut isn't so much a slight on him as an indication of just how completely he realized his ambitions, fusing hillbilly twang, Motown's tambourine-inflected groove, and brisk Beatles-by-way-of–Everly Brothers melodies. His recordings all inevitably are distinguished by his concisely inventive guitar playing, boyish tenor vocals, and songs addressing love's post-adolescent gray areas. Their charm lies as much in what he steadfastly leaves out: cleverness, earnestness, sanctimony.

That said, he has tried to shake up his formula by trying a variety of production approaches. *Field Day* remains his most divisive recording for that reason;

Steve Lillywhite swamps Crenshaw's fresh-faced tunes in echo and bombast. *Downtown* is something of a baroque roots-pop album, with session pros giving Crenshaw's short, sharp tunes a walloping directness. But his late-'80 struggles to widen his audience included the covers-dominated *Good Evening,* on which he resorts to covering schlock-mistress Diane Warren. *Life's Too Short* marks an attempt to revisit the smart, sparse turf of the first album, but with an arena-rock sense of proportion: Ed Stasium's slamming production, and Crenshaw fronting an all-star power-trio that includes Kenny Aronoff on drums and Fernando Saunders on bass.

In the '90s, his recording pace slowed, and even his studio albums are padded with filler: *#447* includes no less than three instrumentals. But, as usual, his choice of covers is astute, in particular Grant Hart's "Twenty-Five Forty-One," from *Miracle of Science.* Midlife reckoning and melancholy songs dominate *What's in the Bag?,* even as Crenshaw's pop sensibilities remain acute and his guitar work continues to astonish. Never an artist burdened by conceptual designs, Crenshaw and the enduring charms of his three-minute she-done-me-wrong jingle-jangles are better heard on the career-spanning compilation *This Is Easy.* —G.K.

Crosby, Stills and Nash

★★★★	Crosby, Stills and Nash (Atlantic, 1969)
★★★	CSN (Atlantic, 1977)
★★★	Replay (Atlantic, 1980)
★★	Daylight Again (Atlantic, 1982)
★	Live It Up (Atlantic, 1990)
★★★	CSN (Atlantic, 1991)
★★	After the Storm (Atlantic, 1994)

While dominated instrumentally by Stephen Stills, founder of the pioneering folk rockers Buffalo Springfield, CSN's impressive debut album reflected three distinct sensibilities. Enraptured at the time with Judy Collins, Stills led with "Suite: Judy Blue Eyes"; the seven-minute mini-epic conveyed his easy mastery of a number of styles (folk ballad, light rock, Latin-inflected rhythm), highlighted his sharp guitar work, and introduced the soaring ensemble harmonies that would become the group's trademark. Nash's slight but charming "Marrakesh Express" extended from the fluid pop he'd perfected with the Hollies. Ex-Byrd David Crosby turned in the loosely structured ballad "Guinevere"—all drifty atmosphere and wide-eyed poetry, it exemplified his hippie mysticism. Of as much sociological as musical interest, the album exactly captured the spirit of the last high moment of the American '60s. Exhausted by Vietnam, embarked upon mind expansion and lifestyle rebellion, the CSN generation found in the band both spokesmen and representatives; the singers' slightly weary utopianism, their bucolic fantasies, and their songs about love and its losses reflected the inward turning of an aging youth culture, the movement away from public struggle to self-examination.

By the time of *CSN,* the moment that lent intensity and credibility to the trio's songs had passed, and its music had become nice, bland, and comfortable. Perhaps unsurprisingly, Nash's simple popcraft produced the most dependable of *CSN*'s mild pleasures. *Daylight Again* was no great shakes, either, even if Crosby's voice sounded stronger than his years of highly publicized hard living might suggest. "Might As Well Have a Good Time" underscored the album's air of drastically lowered expectations—and the song wasn't even an original. *Live It Up* was an embarrassment; overreliant on outside writers for inspiration, the group sounded tired and confused, and a techno-happy production, full of synthesizer rhythm tracks, didn't help. *After the Storm,* one more attempt to rekindle the fire, was also disappointing. *Replay* is a compilation of material from the debut and the singers' solo projects. With 25 of its 77 selections being alternate takes or previously unreleased rarities, the *CSN* box set not only documents the group's history thoroughly, but it unearths quite a few pleasant surprises. —P.E.

Crosby, Stills, Nash and Young

★★★★	Déjà Vu (Atlantic, 1970)
★★½	4 Way Street (Atlantic, 1971)
★★★	So Far (Atlantic, 1974)
★★★	American Dream (Atlantic, 1988)
★★	Looking Forward (Reprise, 1999)

Enlisting the aid of Stephen Stills' Buffalo Springfield collaborator (and rival), Neil Young, proved a risky move on the part of Crosby, Stills and Nash—Young's urgency and depth would make any CSN record that featured him gain immensely in power; his absences from their other albums, however, would equally resound. Contributing "Helpless," one of his loveliest and leanest ballads, as well as the gorgeous three-song suite "Country Girl" to *Déjà Vu,* Young also added jagged guitar work that counterbalanced Stills' more technical grace—and his keening, wise-child vocals lent haunting dimension to the trio's harmonies. Though Young's songs were the strongest, the other band members rose to his challenge.

It is the juxtaposition of CSN&Y's individual styles, in fact, that makes *Déjà Vu,* released in 1970, an even more accurate time capsule than *Crosby, Stills & Nash*—the tension of the band's fitful union reflects the restlessness that pervaded the end of the '60s, and each member's songs capture a facet of the countercultural experience. With Crosby's melodramatic "Almost Cut My Hair," the communal rebellion of the protest era is reduced to an individual, symbolic gesture; Nash's "Teach Your Children" and "Our House" express the urge toward domesticity on the part of former rebels; Stills' strong, electric reworking of Joni Mitchell's "Woodstock" takes on, in retrospect, the air of a last hurrah. The Stills-Young collaboration "Everybody I Love You" is so sweeping as to now sound a bit desperate, and Crosby's reincarnation saga "Déjà Vu" hints at the New Age e-z mysticism that would eventually preoccupy many survivors of the CSN generation.

Unsurprisingly, CSN&Y soon came apart—Young's forward-looking vision being antithetical to the air of comfort that inflated *CSN.* The live *4 Way Street* distinctly lacked team spirit; and a best-of set, *So Far,* seemed perfunctory. *American Dream* was still stronger than any Crosby, Stills and Nash record—even if Young's four songs were hardly standouts, the trio sounded more vital with Neil on board. The record's most touching number, however, was Crosby's "Compass," an apologia for his years of substance abuse. On that graceful note of redemption, this edgy brotherhood temporarily retired. They resurfaced with 1999's *Looking Forward,* a pleasant-enough disc that, however, signaled no real advance. —P.E.

Sheryl Crow

★★★	Tuesday Night Music Club (A&M, 1993)
★★★★	Sheryl Crow (A&M, 1996)
★★½	The Globe Sessions (A&M, 1998)
★★	Sheryl Crow and Friends Live From Central Park (A&M, 1999)
★★★★	C'mon, C'mon (Interscope, 2002)
★★★★½	The Very Best of Sheryl Crow (A&M, 2003)

On first hearing, Sheryl Crow's songs sound charmingly loose and off-the-cuff. But take a closer listen and you'll realize that countless hours went into creating this incredible simulation of rootsiness. Not just a talented songwriter and an excellent '70s-style rock & roll singer—sort of a cross between the younger Stevie Nicks and the older Bonnie Raitt—Crow's also a master of production craft. The only problem is that sometimes her perfectionist impulses get in the way of the emotions she's trying to express.

After several years spent as a songwriter and backup vocalist, Crow commenced her solo career with *Tuesday Night Music Club.* The airheaded "All I Wanna Do" scored big on the charts, but the real jewels here are more serious numbers like "Strong Enough" and "No One Said It Would Be Easy." Enjoyable as the album is, it's obviously a committee project. Eight different songwriters besides Crow contribute, making it hard to decipher the personality behind the music.

Crow's second release is a different story. Producing herself and cutting down on the collaborators, she comes up with a record that's classy and full of character. "Everyday Is a Winding Road" and "A Change Would Do You Good" are irresistible pop, while "If It Makes You Happy" (with its almost inevitable followup line "Then why the hell are you so sad?") is the quintessential Sheryl Crow song, capturing the hurt and world-weariness underneath the studio veneer.

The Globe Sessions gets off to a splendid start with the alluring "My Favorite Mistake," but except for the lovely Celtic-flavored folk of "Riverwide," few of the other originals measure up, and even the cover of Bob Dylan's "Mississippi" is surprisingly shallow. The star-studded live album that followed is no great shakes and, unless you've been dying to hear Crow duet with Eric Clapton on "White Room," easily skippable. *C'mon, C'mon* is a welcome return to form, though, offering sassy rock ("Steve McQueen"), buoyant bubblegum ("Soak Up the Sun"), and heart-on-sleeve balladry ("Weather Channel") with equal flair. —M.R.

Rodney Crowell

★★★★	Ain't Living Long Like This (Warner Bros., 1978)
★★★★	Diamonds & Dirt (Columbia, 1988)
★★★	Keys to the Highway (Columbia, 1989)
★★★★	The Rodney Crowell Collection (Warner Bros., 1989)
★★★	Life Is Messy (Columbia, 1992)
★★★★	Greatest Hits (Columbia, 1993)
★★★	Let the Picture Paint Itself (MCA, 1994)
★★★	Jewel of the South (MCA, 1995)
★★	Super Hits (Columbia, 1995)
★★★★	The Houston Kid (Sugar Hill, 2001)
★★★★	Small Worlds: The Rodney Crowell Collection (Raven, 2002)

Taking his cues from the rock & roll primitivism of such late-'70s British power-popsters as Nick Lowe and Dave Edmunds, Rodney Crowell became an important link between the hippie-era country rock of Gram Parsons and the post-punk Americana of Lucinda Williams and Ryan Adams; Crowell even did time in Emmylou Harris' Hot Band. His style of singing and songwriting owes more to the playfulness of Buddy Holly and the sublime beauty of Roy Orbison than to the chaos and crackle of Jerry Lee Lewis or Johnny Cash. As a songwriter, Crowell's written a handful of classic country-pop tunes ("Till I Gain Control Again," "Leaving Louisiana in the Broad Daylight"), and delivered hits for artists as varied as the Oak Ridge Boys and Bob Seger.

In the decade following his excellent debut—a country-rock hybrid that updates the late Parsons' so-called Cosmic American Music—Crowell floundered, putting out a couple of now-deleted albums for Warner Bros. and one for Columbia. But on *Diamonds & Dirt,* he developed the sound he's cultivated since then: that of a cosmopolitan neorockabilly singer/songwriter whose heart-tugging ballads and uptempo dance tunes set the standard for Nashville's New Traditionalist movement. Crowell's songs aren't based so much on old-school cliché and wordplay as on real-life pathos served up with a hip sense of humor—kind of like Parsons'. And country fans ate it up; *Diamonds* produced five #1 hits, bringing Cosmic American Music squarely into the Nashville mainstream.

On *Keys to the Highway,* Crowell's songwriting became more confessional. "Things I Wish I'd Said," inspired by the death of his father, and the folky "Many a Long and Lonesome Highway" are among his strongest songs. But the album was a commercial disappointment, and Nashville turned its fickle back on Crowell. His follow-up, *Life Is Messy,* is lyrically bleak, with music that brings much more of a rock edge to the songs. Crowell was coming out of a divorce from Johnny Cash's singer/songwriter daughter Rosanne, and his feelings bleed through nearly every track. When Crowell switched record labels for *Let the Picture Paint Itself* and *Jewel of the South,* he ventured further into pop-rock singer/songwriter territory, but his writing had lost much of its sting.

After a six-year sabbatical, Crowell returned in 2001 with the best album of his career. *The Houston Kid,* released on the independent country-folk label Sugar Hill, is straight-up autobiography. Plaintive, laid-back, and utterly honest, this raw, cinematic song cycle tells Crowell's story through snapshots, extended scenes, confessions, and anecdotes. It's a songwriter's masterpiece, and at its center is a rewriting of his former father-in-law's classic "I Walk the Line," with a spoken story about the impact it made on Crowell the first time he heard the song.

The Rodney Crowell Collection is a solid overview of his Warner Bros. years, and *Greatest Hits* compiles his best Columbia material. *Super Hits* overlaps with *Greatest Hits,* but leaves off important songs. —M.K.

The Crystal Method

★★★	Vegas (Outpost, 1997)
★★	Tweekend (Outpost/Geffen, 2001)
★★	Community Service (Ultra Records, 2002)
★★★½	Legion of Boom (V2, 2004)

The Crystal Method are a pair of basement beat scientists rocking out in suburban Los Angeles, techno kings as comfortable on the dance floor as on rock radio, and just as wildly uneven. At their best, partners Ken Jordan and Scott Kirkland match power and hooks in dance tracks that throb with raw inspiration and intense sexual energy. Its early reputation built on the strength of furious 12-inch singles ("Now Is the Time"), the Crystal Method finally stepped beyond the rave scene with *Vegas;* "Busy Child" was a medium hit that momentarily busted open the '90s mainstream in league with Prodigy and the Chemical Brothers. Aggressive beats, found voices, and desperate hooks collide and tumble at a brutal pace. If only it all rocked this hard. "High Roller" is like a metal drum solo that won't end, and "Comin' Back" hasn't progressed much beyond the most disposable '70s Eurodisco. The revolution won't survive on filler alone.

What followed had just as much padding, minus the hard-hitting club rockers. The groove on *Tweekend* is hopelessly adrift, resorting to the same big-time rock excesses that techno was supposed to replace—tracks of endless noodling and simplistic beats. The Method hadn't learned the lessons every metal band must eventually grasp: A riff is not a song, and a hot beat is not nearly enough. *Community Service* is an inessential gathering of cluttered remixes that take too long to ignite (Orbital, P.O.D., Rage Against the Machine) or go nowhere at all. *Legion of Boom* is a sudden return to relevance. The beat still reigns supreme, but the Method is finally bored with simple repetition, incorporating live vocals and guitars (Limp Bizkit's Wes Borland) without surrendering the techno flag. There is no career-defining "Busy Child," but *Boom* is easily the duo's most consistent collection, all slash, burn, and bounce, and an energetic commitment to the concept of electronics as rock & roll. —S.A.

The Cult

★★	Dreamtime (Beggars Banquet, 1984)
★★½	Love (Sire, 1985)
★★★½	Electric (Sire, 1987)
★★★½	Sonic Temple (Sire, 1989)
★★★	Ceremony (Sire/Reprise/Beggars Banquet, 1991)
★★★½	The Cult (Sire/Reprise/Beggars Banquet, 1994)

★★★★ High Octane Cult (Reprise/Beggars Banquet, 1996)
★★★★ Pure Cult: The Singles 1984–1995 (Beggars Banquet, 2000)
★★★ Rare Cult (Beggars Banquet, 2000)
★★★½ The Best of Rare Cult (Beggars Banquet, 2000)
★★★ Beyond Good and Evil (Lava/Atlantic, 2001)
★★ Rare Cult: The Demo Sessions (Beggars Banquet, 2002)

Ian Astbury

★★★ Spirit\Light\Speed (Beggars Banquet, 1999)

Although one imagines principals Ian Astbury (vocals) and Billy Duffy (guitar) bristling at the thought, at the end of the day, the Cult boils down to a really great singles band. The virtually identical *High Octane Cult* and *Pure Cult* collections make a solid case for this, distilling an often lugubrious catalogue down to one airtight disc of dark but undeniably danceable and fist-pump-worthy hard rock, from the early goth anthems "Spiritwalker" and "Rain" (from *Dreamtime* and *Love*, respectively) to the arena-rock bombast of "Lil' Devil" and "Sweet Soul Sister" (*Electric* and *Sonic Temple*) and 1992's terrific techno experiment, "The Witch" (from the movie *Cool World*). The actual albums are more hit than miss, but the hits pack a wallop. (*The Best of Rare Cult,* a single-disc sampler of the exhaustive, for-diehards-only box set *Rare Cult,* is also better than most of the studio albums.)

Essentially a heavy-metal band for folks who think they're above such things, the Cult built its sound from equal parts postpunk guitar aggression and neo-hippy mysticism, a combination that quite naturally results in some of the silliest, most pompous music rock has seen since the heyday of the Doors. Typically, it was some time before the band got even that good, as *Dreamtime* never quite gets up a head of steam, while the frenzied, unfocused playing on *Love* squanders the melodic potential of its best songs ("She Sells Sanctuary" and the overlong "Brother Wolf, Sister Moon").

With producer Rick Rubin on hand to tighten and toughen the group's sound, *Electric* manages to kick ass even when its lyrics make no sense, as on the relentless "Love Removal Machine." (Note to the band: There's a difference between "trippy" and "stupid.") But when it found a formula, the Cult wasted no time in hammering it into the ground. *Sonic Temple,* the band's bestseller, may attempt an epic sweep on some songs—most notably the hit "Firewalker" and the power ballad "Edie (Ciao Baby)"—while *Ceremony* tries a sort of hard-rock transcendentalism, but neither disc adds enough variation to the music to necessitate further distinction. The underrated *The Cult* jacked up the band's sound with a liberal dose of the techno-rock approach that distinguished "The Witch" and produced "Coming Down," the band's last great single. Following an extended hiatus that found Duffy collaborating with the Alarm's Mike Peters in the band Colorsound and Astbury fronting the short-lived Holy Barbarians and releasing a better-than-average electrorock solo album (*Spirit\Light\Speed*), the Cult reconvened for its heaviest record, 2001's relentlessly rocking but charmless *Beyond Good and Evil.* Better that, though, than Astbury's inevitable-in-hindsight portrayal of the Lizard King alongside Robby Krieger and Ray Manzarek in the nostalgia outfit the Doors of the 21st Century. —J.D.C./R.SK.

Culture Club

★★★ Kissing to Be Clever (Virgin, 1982)
★★★ Colour By Numbers (Virgin, 1983)
★★ Waking Up With the House on Fire (Virgin, 1984)
★ From Luxury to Heartache (Virgin, 1986)
★★★★ At Worst . . . The Best of Boy George and Culture Club (Virgin, 1993)
★★½ 12" Collection Plus (Caroline, 1997)
★★★ VH1 Storytellers/Greatest Moments (Virgin, 1998)

Should anyone ever doubt the amount of charisma Boy George once exuded, the fact that Culture Club was able to generate such extraordinary popularity on the basis of such utterly ordinary music ought to be proof enough. Listening to them now, it seems incredible that these albums produced six Top 10 singles (eight in Britain); one can only wonder what sort of national delusion would have resulted in such success.

Yet it wasn't delusion, really, it was charm, pure and simple. Just listen to George's tremulous tenor imploring, "Do You Really Want to Hurt Me" on *Kissing to Be Clever;* how could anyone resist a voice so guileless? Never mind that the rest of the album is chockablock with bleached funk and bland reggae, offering only the denatured carnival rhythms of "I'll Tumble 4 Ya" as inducement (or that "Time [Clock of the Heart]," which Epic eventually appended to the album during its original run, has since been deleted by Virgin); sheer force of personality was what carried the day back then. And the same goes for *Colour By Numbers;* outré as the metaphor in "Miss Me Blind" might have been, outright silly as the chorus to "Karma Chameleon" truly was, the point remains that Boy George made us believe, if only for a moment.

So what happened? Well, sad to say, the Boy turned serious. *Waking Up With the House on Fire* opens with the overwrought "message" of "Dangerous Man," and goes straight downhill from there, through the insufferable sanctimony of "The War Song" to the sheer inanity of "Crime Time" and "Mistake No. 3." Worse, the closest to catchy any of the above gets is "The War Song," which is overstuffed to the point of making "Hair" sound like a Dylan tune. By *From Luxury to Heartache,* the slide into irrelevance was so complete that the album's only real virtue was Boy George's voice—an obvious case of too little, too late. Nonetheless, Boy and the lads reunited in 1998 for the inevitable wallow in nostalgia, the apex of which was the band's appearance on VH1's *Storytellers* (conveniently available in album form for those who forgot to set the VCR). —J.D.C.

The Cure

★★★½	Three Imaginary Boys (Fiction, 1979)
★★★½	Boys Don't Cry (Elektra, 1980)
★★★½	Seventeen Seconds (Elektra, 1980)
★★★	Faith (Elektra, 1981)
★★★	Pornography (Elektra, 1982)

★★★★	Galore (Elektra, 1997)
★★★	Bloodflowers (Elektra, 2000)
★★★★	Greatest Hits (Elektra, 2001)
★★★★½	The Cure (Geffen, 2004)

The Cure's Robert Smith is one of the most significant sex symbols rock has ever produced, all wet and disheveled in the throes of an angst that only makes him so wonderfully, wonderfully pretty. He was the cool older sister you never had, with his big sticky hair, his pear-shaped body, his eyelashes for hours, his voice shaking like milk as he sings his tales of adolescent torpor and dolor. All swirled up in lipstick and rouge, wearing more face than his face could even hold, he smeared his cosmetics with a conspicuously unmothered flair that made him look like he'd eaten his way through the Clinique counter. He's the biggest lesbian rock star ever, even if he's technically a straight guy. He bridged the gap between goth and new wave, between gloom and glamour, becoming a figure of fascination for millions of depressive '80s kids. Maybe you've never been in love with Robert Smith, and maybe you've never even made out with anybody who's in love with Robert Smith, but you've definitely made out with someone who's made out with someone who's in love with Robert Smith, and that means he's under your skin whether you like it or not.

The Cure began as an arty postpunk trio, doing skewed guitar tunes about reading Camus ("Killing an Arab") and not crying ("Boys Don't Cry"). But Robert Smith was just warming up for the deluge of protogoth gloom rock that he would unleash over the next few years. *Seventeen Seconds, Faith,* and *Pornography* hold up smashingly well, offering motionless slabs of lavishly textured angst, often decorated with gorgeous synths, as Smith sobbed and sniffled his tormented poetry. But it was the 1982 single "Let's Go to Bed" that introduced the Robert Smith we know and love today. The miserable sob was still there, but now it was playing around with witty lyrics that accurately summed up at least 20 percent of any real-life romantic relationship ("The two of us together again/It's just the same, a stupid game") and a bouncy, humalong synth-pop melody that made the situation sound more funny than hopeless.

The Cure had hit upon a perfect musical formula, shaping all its depressive moods into actual songs, and the band started to attract increasingly worshipful legions of fans in black nail polish and eyeliner. Smith also joined Siouxsie and the Banshees as a guitarist, doing double duty for two great big-hair bands, which increased his cool quotient immeasurably. His melodies got richer with *The Walk, Japanese Whispers,* and *The Head on the Door,* his king-of-the-mopey-Brits smackdown, as he proved he could outdo New Order ("In Between Days") and Depeche Mode ("Close to Me") at their own games. Best of all was the single "The Love Cats," a brazen piano ditty that revealed that making out could be kind of fun. "Should we have each other for dinner?/Should we have each other with cream?"—mee-*yow!*

Standing On A Beach put the Cure on a roll, and *Kiss Me, Kiss Me, Kiss Me* had the Cure's best-known, best loved, and just plain best song ever, "Just Like Heaven." Smith sings about spinning on that dizzy edge with a dream muse, and then waking up the next morning feeling alone—no, make that alone, *alone*—above the raging sea, one alone little dude indeed.

Disintegration is the Cure's high point for most fans, especially male ones born in the late '70s; according to the kids on *South Park,* it's the greatest album ever made. Although it's dark and depressive, it spawned the hit "Love Song." *Wish* is lighter and frothier, a valentine to the band's younger girl fans, with bubblegoth love ditties like "High," "Friday I'm in Love," and "A Letter for Elise," which nicked the melody from Bon Jovi's "Never Say Goodbye." Smith had a long dry spell in the '90s; he even stopped wearing makeup around the time of *Wild Mood Swings* and *Bloodflowers.* But *The Cure* had the band's most passionate music since *Disintegration,* hitting an all-time peak in the twisted romantic devotion of "Before Three": "Whispering dreams, so fucked and high/It's hard to hold this night inside."

Galore collects the best of the late '80s/early '90s Cure, plus a load of late filler. *Greatest Hits* has seven songs from *Standing On a Beach*—the seven best, for that matter—plus "Just Like Heaven," so it's a bargain. But who wants a Cure album with a title like *Greatest Hits*? *Join The Dots* is a cult collection of rarities; *Galore* is a feeble remix album; *Show* and *Paris* are weak live albums. These days, Robert Smith is coasting on a wave of good will from a new generation of fans who weren't even born for "Boys Don't Cry," inspiring high-profile bands such as Interpol, Franz Ferdinand, Mogwai, and the Rapture. He remains one of rock's most beloved figures—a love cat with nine lives. —R.S.

Cypress Hill

★★★★½	Cypress Hill (Ruffhouse/Columbia, 1991)
★★★	Black Sunday (Ruffhouse/Columbia, 1993)
★★	Cypress Hill III: Temples of Boom (Ruffhouse/Columbia, 1995)
★	IV (Ruffhouse/Columbia, 1998)
★	Skull and Bones (Columbia, 2000)
★★	Till Death Do Us Part (Columbia, 2004)

Cypress Hill's formula has been imitated so much, it's easy to forget how shocking it originally sounded: crazy Latino voices, Spanglish gangsta threats, blunted '70s funk beats that made you laugh out loud. B-Real and Sen Dog come on as a hip-hop Cheech and Chong, praising the sweet leaf with a devotion rarely seen beyond the parking lot at a Phish show. While the rappers twist their "Latin Lingo" into *vato* rhymes about blunts, guns, and 40 oz., DJ Muggs pumps bongloads of bass into paranoid sound collages like "Hand on the Pump," and when you turn it up loud, the beat goes boo-ya. The combination of whiny singsong flow and low-riding bass made the album hugely influential, most notably on Dr. Dre, but nobody quite duplicated that perfect balance of humor and horror—not even Cypress Hill themselves. The followup, *Black Sunday,* was jokier, with the hit "Insane in the Brain" and the definitive "I Wanna Get High." Subsequent releases reflect poorly on the relationship between cannabis intake and creative inspiration. —R.S.

Dd

Da Brat

★★½ Funkdafied (Chaos, 1994)
★★½ Anuthatantrum (Sony/So So Def, 1996)
★★★ Unrestricted (Sony/So So Def, 2000)
★★½ Limelite, Luv & Niteclubz (Arista, 2003)

The first female MC to go platinum, Da Brat (a.k.a. Shawntae Harris) became the protégé of Jermaine Dupri after being discovered by *Yo! MTV Raps* in the early '90s. Her debut, the snappy, energetic *Funkdafied,* was a smash thanks largely to its title single. Though Da Brat was initially positioned as a female Snoop Dogg (her unapologetic love of herb didn't hurt), by the time her sophomore effort was released in 1996, she had honed her rapidfire delivery to such an extent that comparisons to the terminally mellow Snoop no longer applied.

Anuthatantrum made it painfully evident that Da Brat, who relied heavily on uninspired samples and reheated get-the-party-started grooves, didn't have much to say beyond the usual recitation of her likes (weed, stretch limos, the occasional reggae groove, weed) and dislikes (haters).

By the time Brat released *Unrestricted* in 2000, she was facing assault charges, a sagging film career (which would, unfortunately, later include a costarring role in *Glitter*), and worse, the emergence of flashier and more shameless female rappers like Lil' Kim. While Ja Rule, Kelly Price, and Mystikal make pro forma appearances, Da Brat doesn't need the help: *Unrestricted* is her best album to date. Tracks like "What' Chu Like" and "Runnin' Out of Time" are stunners, showcasing her newfound appreciation for NC-17 wordplay and R&B respectively, while the title of the club anthem "Fuck You" pretty much says it all.

Limelite, Luv & Niteclubz, from 2003, followed mostly the same formula as its predecessor, with slightly diminished returns. Showcasing a mixture of R&B and club beats, but this time with an eye toward *TRL* (indeed, the almost freakishly catchy "In Love wit Chu" became one of Brat's most successful singles), *Limelite* featured guest turns from Mariah Carey and Anthony Hamilton and included frequent references to church that were, you have to figure, probably metaphorical. —A.S.

Daft Punk

★★★ Homework (Virgin, 1997)
★★★½ Discovery (Virgin, 2001)
★½ Alive 1997 (Virgin, 2001)

The French duo Daft Punk's essential, career-defining insight is that the problem with disco the first time around was not that it was stupid but that it was not stupid enough. After an abortive career in rock as Darlin', Thomas Bangalter and Guy-Manuel de Homem Christo renamed themselves after a review and recorded *Homework,* the 4/4 whomp of house music slowed down to bumping speed, then duct-taped to squelchy acid noise and strutting synthesizer themes straight out of the Giorgio Moroder songbook. Its audacity is a hoot, and the robot two-step of "Around the World" (and its video) became a club perennial.

Daft Punk took its time recording the followup; meanwhile, Bangalter and some friends, as Stardust, made a glorious and much-compiled straight-up disco single "Music Sounds Better With You." *Discovery* follows the same path, throwing in vocoders and vintage analog synths: Who needs a song if you have a hook? The dance hit "One More Time" leads the march of the boogying cyborgs, and the more they dumb the album down, the funkier it gets. House-cleaning music all night long!

Alive 1997 is an extended rehash of four *Homework* tracks with a bit of crowd noise. It's great if you have a billion-watt sound system and a mountain of drugs at home, but it's not too useful otherwise. —D.W.

The Dandy Warhols

★★★	Dandys Rule OK? (1995; Dandy Warhols Music, 2000)
★★★	. . . The Dandy Warhols Come Down (Capitol, 1997)
★★★★	Thirteen Tales From Urban Bohemia (Capitol, 2000)
★★★½	Welcome to the Monkey House (Capitol, 2003)

Their wacky name made people think the Dandy Warhols were a hipster novelty act when they first appeared in the mid-'90s—an impression reinforced by titles like "Lou Weed," from their 1995 indie debut album, and "Not If You Were the Last Junkie on Earth," their first single for Capitol, two years later. It soon became apparent that the Portland, OR–based quartet wasn't a joke, though leadman Courtney Taylor (or Taylor-Taylor, as he later renamed himself) purveys a distinctive brand of irony-laced humor, which is part of the Dandys' recipe. First album *Dandys Rule OK?* establishes a tone of subterranean artiness that draws in equal measure from the dry-ice cool of the Velvet Underground and the droning space-rock of the Byrds—along with a touch of the Cars in their use of loopy analog-synth lines (provided by producer Tony Lash), but it's the style, not the material, that leaves the deeper impression. While much of the subsequent *Come Down* seems obscured under a layer of psychedelic haze, the momentum and wit of "Last Junkie" and "Cool as Kim Deal" burst through the murk, setting the stage for the band's strongest album, 2000's *Thirteen Tales From Urban Bohemia.* Here, the spaghetti Western soundscapes of "Godless" and "Mohammed" and the rock-symphonic "Nietzsche" combine to form a mesmerizing 16-minute opening suite, clearing the air for the signature tracks "Get Off," "Cool Scene," and—best of all—"Bohemian Like You," which combines a particularly wry sociocultural vignette with what may be the most muscular Stones guitar riff of the last 20 years. If *Bohemia* is a total delight, *Welcome to the Monkey House* is at best an intermittent one. The premise is pure Taylor-Taylor: He brought in Duran Duran synthesist Nick Rhodes to play on and produce the album, which re-creates the robotic feel of '80s synth pop in such a way that it's unclear whether the move is a send-up or an homage. Most of the tracks seem stuck between the two extremes, the exceptions being the killer single "We Used to Be Friends" and "You Were the Last High," which comes across with the world-weary romanticism of Roxy Music circa *Country Life.* The Dandy Warhols are a heady band, to be sure, but it remains to be seen whether they turn out to be an important one. —B.SC.

Craig David

★★★	Born to Do It (Wildstar, 2000; Atlantic, 2001)
★★★	Slicker Than Your Average (Wildstar/Atlantic, 2002)

The British dance genre two-step (a.k.a. U.K. garage) rose out of the clubs and blew up across the British Isles at the end of the '90s, combining elements of pop, R&B, and dance music over a quickened, jagged breakbeat. Craig David was among the scene's first personalities and certainly its first bona fide superstar—while still in his teens, no less. Two-step producers the Artful Dodger featured David's vocals on two of their biggest hits, "Re-Rewind" ("The crowd say Bo! Selectah!") and "Woman Trouble." A solo career followed and his slick debut, *Born to Do It,* featured two of the year's best singles, "Fill Me In" and "7 Days." Both tracks featured David's playfully smooth vocal flow and dealt playfully with the single life. The young, sexy star also struck a chord with America's R&B audience, ultimately selling over 7 million copies. Followup *Slicker Than Your Average* found David both trying to defend his street cred while also making a more obvious stab at mainstream pop/R&B. As on his debut, among the best tracks are the production/writing collaborations with the Artful Dodger's Mark Hill. Less interesting is the album's one duet, featuring (gulp) Sting. —D.S.

Dick Dale & His Del-Tones

★★★	Greatest Hits (1975; GNP Crescendo, 1992)
★★★★½	King of the Surf Guitar: The Best of Dick Dale & His Del-Tones (Rhino, 1989)
★★★½	Tribal Thunder (Hightone, 1993)
★★★	Territory (Hightone, 1994)
★★★	Calling Up Spirits (Beggars Banquet, 1996)
★★★★	Better Shred Than Dead: The Dick Dale Anthology (Rhino, 1997)
★★★½	Spacial Disorientation (Sin-Drome, 2002)

Dick Dale is the one true king of surf guitar, the ne plus ultra, the sine qua non, alpha and omega, everyone else pack up and go home. The least of his accomplishments is documented in his appearances in '60s beach movies in which the renegade picker sports a hoop earring—placing him about a decade ahead of the cultural curve with regard to male fashion accessorizing. With the release of his first single in 1961, "Let's Go Trippin'," he created an entire genre, surf music, as well as one of the most unique and influential guitar styles in rock & roll history. Among Dale's notable acolytes was Jimi Hendrix, who, as a guitarist in Little Richard's band, caught one of Dale's shows in the early '60s and, according to reports, spent a great deal of time afterward questioning Dale about his sound and style. In "Third Stone From the Sun," on *Are You Experienced?,* Hendrix signs off one poetic interlude with the words, "You'll never hear surf music again." That quote has been widely interpreted by critics as Hendrix's way of kissing off a moribund genre, but in fact it was an homage to Dale, whom everyone at the time (except Dale, apparently) thought was in the terminal stage of rectal cancer.

Dale's achievements are measured in far more than hot licks, though. Hendrix is acknowledged as having given birth to the guitar-effects industry, but Dale's sonic innovations of the early '60s set the stage for everything to come. Working closely with Leo Fender, founder of the Fender Electric Instrument Company, Dale, insisting he needed a "louder, thicker sound" for the crowds he was playing to in spacious ballrooms, pushed the development of an amplifier that would break all known sonic barriers. After Dale had tested and blown up dozens of prototypes, Fender made the first 85-watt output transformer ever used in an amp, and dubbed it the "Dick Dale Transformer." All that was needed, then, was a speaker that wouldn't disintegrate under the assault. Fender and Dale struck up an alliance with J.B. Lansing (of JBL speakers), who, after some initial skepticism, took Dale's specs and developed a 15-inch speaker that was the marquee component of the legendary Showman amplifier. Impressed but still pushing the envelope, Dale had another 15-inch speaker built into the cabinet, and thus was born the Dual Showman, one of the most popular amplifiers in history. When Dale unapologetically refers to himself as "the king of loud," it's hard to argue with his assessment. He was also one of the pioneer end users of the legendary Fender Reverb Unit, which he used initially on his vocals; later he plugged his Strat into it, producing a steamroller effect on audiences.

A multi-instrumentalist and first-rate surfer, Dale was in the vanguard of a sport beginning to attract a new, younger generation of fanatic hodads and gremmies, as well as civilian hangers-on who emulated the real athletes' fashions, language, and carefree attitude toward everything but surfing. The music Dale played and the culture he was immersed in were separate but equal entities until the late '50s, when he and his father reopened the grand Rendezvous Ballroom in Balboa, CA, formerly a big-band palace, and began drawing thousands of teenagers there and to similar venues he played in other areas of Southern California. In 1961, Del-Tone released the instrumental single "Let's Go Trippin' " (the title was slang for "going to see someone"), and it not only made *Billboard's* Top 100 singles chart, it stayed there for nine weeks. Its dominant features were a chorus shouting, "Let's go trippin'!" at the start, Dale's trebly, glissando-rich guitar lines spitting out the melody, and a wailing saxophone solo from one of the Del-Tones, Dale's backing band. In November 1962, Del-Tone released an album, *Surfer's Choice,* recorded live in the studio, that cemented Dale's image and sound. "He's the choice of surfers all over Southern California and all over the world because he's one of them. He plays their kind of music and surfs right along side of them," say the uncredited liner notes; the cover and two photos on the back of the album depict Dale riding a wave with the same panache he brings to his musicianship. Then the music speaks: It's a relentless, unforgiving assault, full of exuberant war whoops; ferocious drumming; razor-edged, double-picked guitar, heavy on treble; piano interludes that have a honky-tonk feel; and ballsy sax retorts to Dale's guitar juggernaut. *Surfer's Choice* contains Dale's most famous song, but in a version quite different from the one that found new life as the vibrant opening track of Quentin Tarantino's 1994 film *Pulp Fiction.* "Misirlou Twist" features violins screaming in response to Dale's breakneck picking, surging orchestral sections that add a Wagnerian grandeur, and a chorus of horns blaring in the background. The "Misirlou" of *Pulp Fiction* fame was released as a single in May 1962 and became a #1 single in Los Angeles in early 1963. In "Let's Go Trippin' " and *Surfer's Choice,* surf music found its genesis; in "Misirlou," its instrumental masterpiece.

Dale's second album, *King of the Surf Guitar* (not to be confused with the Rhino overview listed in the above discography), includes a swinging take of Leiber and Stoller's "Kansas City" and a rough-and-ready workout on Ray Charles' "What I Say." For the folkies, Dale delivered a tender reading of "Sloop John B" on *Surfer's Choice;* his country roots began showing on *King of the Surf Guitar*—"You Are My Sunshine" and "Riders in the Sky" are on the same album that featured one of his fiercest vocals, on Hoyt Axton's "Greenback Dollar," another folk standard, and a brisk rendition of "Hava Nagila," a "Misirlou"-like exploration of Middle Eastern melody.

Dale's audience was a niche group—he never sold albums or singles in numbers even remotely comparable to the Beach Boys and Jan and Dean. In 1965, after five albums and diminishing commercial appeal in the wake of the British Invasion, Dale walked away from the music business. A year later, he was diagnosed with rectal cancer and given only a few months to live. Surviving against all odds, he set out on a program of personal growth—embracing issues such as environmentalism and endangered species while also nourishing his own burgeoning spirituality—and eventually began performing again, in 1970, with a new group of Del-Tones backing him. In 1975, he rerecorded some of his early classics for GNP Crescendo, on an album released as *Greatest Hits*. Having lost nary a step during his self-imposed retirement, Dale's playing was rich and expressive as ever. However, he was more than 10 years past the original recordings of many of the songs, and had retooled several of them with radically new arrangements. The "Misirlou" here, for example, bears little resemblance to the original single or album-track cuts from 1961, and Dale's singing is a bit more restrained than it had been; "Sloop John B." sounds fairly tepid in comparison to the *Surfer's Choice* version.

Two excellent compilations of the classic Dale performances from the '60s are available on Rhino. *King of the Surf Guitar: The Best of Dick Dale & His Del-Tones* from 1989 offers 16 tracks covering the 1961–1964 era; throws in a rare promotional-only 12-inch track from 1986, "One Double One Oh!"; and closes with a spectacular version of "Pipeline," the Chantays' surf classic, that Dale recorded with the late Stevie Ray Vaughan in 1987 for the *Back to the Beach* soundtrack. Otherwise, the fare is strictly vintage, from *Surfer's Choice* and *King of the Surf Guitar,* primarily: "Let's Go Trippin'," "Misirlou," "Surf Beat," "King of the Surf Guitar" (with background vocals by the Blossoms, whose membership included Darlene Love), "Hava Nagila," "The Wedge," "Mr. Eliminator"—the lingua franca of surf music, in short.

In 1997, Rhino released a more ambitious Dick Dale overview via *Better Shred Than Dead: The Dick Dale Anthology.* Featuring 39 cuts on two discs plus a detailed booklet recounting Dale's life and career and valuable session info, the set includes, from the early years, the Del-Fi demo that became his first Del-Tone single, "Ooh-Whee Marie," and two other rare early Del-Tone singles; and from the later years, several choice cuts from Dale's '90s studio albums for High Tone and Beggars Banquet, along with some cuts from the now-deleted 1983 live album, *The Tiger's Loose,* and an album-closing treat by way of "In-Liner (Surf Beat '97)," a song Dale wrote and recorded for the CD-ROM game *Rocket Jockey.*

A year before *Pulp Fiction* revived his career, Dale made some noise on his own with a formidable return to the recording studio for *Tribal Thunder;* his work for the past decade has been remarkably consistent. As Dale himself would say: Pray for surf! —D.M.

Evan Dando

★★ Live at the Brattle Theatre/Griffith Sunset (Modular, 2001)
★★★ Baby I'm Bored (Bar None, 2003)

A grievous, grievous angel is he. When the Lemonheads' final record, *Car Button Cloth,* converged with alt-rock's 1996 nosedive, our erstwhile Lemonhead was well on his way to becoming a legendary crackhead. Fans of his sweet, deceptively simple (some say just simple, or even saccharine) melodies worried about him the same way fans of Elliott Smith's doomed love poems rightly doubted their hopeless troubadour's ability to say when. For much of the latter half of the decade, Dando was nowhere to be found. When he showed up on a New York stage with Giant Sand and Vic Chesnutt in 2000, many in the audience gasped. That night, Dando treated the crowd to a rusty but still sexy baritone, moving tentatively through some tunes from his upcoming record, whose title would mock the glamour of fame, the mystery of his absence, and the Dionysian promise of drugs: *Baby I'm Bored.*

His first official release, though, was a live-show recording, 2001's *Live at the Brattle Theatre/Griffith Sunset,* which contained a few Lemonheads favorites, some works-in-progress, and covers like Victoria Williams' "Frying Pan" and the Louvin Brothers' "My Baby's Gone." On *Bored,* released in 2003, the songs—lushly midwifed by producer Bryce Goggin—can be quite lovely, though anyone who was expecting the alt-pop of yore probably had his own boredom issues to contend with here. The disc drifts into Elliott Smith solipsism on fragments like "Why Do You Do This to Yourself?" But the twisty narcissism of songs with titles like "The Same Thing You've Thought Hard About Is the Same Part I Can Live Without" prove that Dando's own brand of wicked deprecation is still in effect. The collaborations with Ben Lee, "Hard Drive" and "All My Life," have a kind of mundane grace that nods to both the serenity and teetering frustration of life off the pipe. —L.S.

D'Angelo

★★★★ Brown Sugar (EMI, 1995)
★★★★ Voodoo (Virgin, 2000)

D'Angelo seemed like the perfect R&B loverman for a generation raised on rap music. The Virginian had the voice of a Sam Cooke or a Donny Hathaway, yet delivered his songs with considerable swagger. A classicist, in other words, cloaked in the guise of a hip-hop roughneck. "Brown Sugar," for example, passed itself off as a love ode, even though it was actually serenading weed, an old hip-hop trick. For most of his debut album, D'Angelo sticks to genuine love songs, a genre in which he's stunningly fluent. "Lady," "Cruisin'," and the imaginatively titled "Me and Those Dreamin' Eyes of Mine" are masterpieces, eyes-shut pleas for a romance that good, and oh, so bad.

D'Angelo's second album, *Voodoo,* isn't a collection of songs so much as one elongated mood piece. It's a fitting result, considering that the album was the product of more than a year of late-night sessions at New York's legendary Electric Lady Studios, during which D'Angelo collaborated with a who's who of '90s soul music: drummer Ahmir "?uestlove" Thompson, bassist Pino Palladino, songwriter/guitarist Raphael Saadiq, producer James Poyser (other guests include Roy Hargrove, Charlie Hunter, and Q-Tip). Apart from "Left & Right," which features guest verses from Method Man and Redman, *Voodoo* is seamless. From the DJ Premier–produced "Devil's Pie" and the fiery, nasty "Chicken Grease" (where D comes off like a minimalist Prince) to the deliciously understated "Untitled (How Does It Feel)," D'Angelo achieves through nuance what some singers with decades of experience and training never achieve: a throbbing, vital presence that demands attention, even as it shuns it. —J.C.

Olu Dara

★★★½	In the World: From Natchez to New York (Atlantic, 1999)
★★★	Neighborhoods (Atlantic, 2001)

For more than 20 years, the trumpet player and singer Olu Dara was a fixture on the New York cutting-edge jazz scene: Recording only sporadically under his own name, he contributed to important works by Henry Threadgill and David Murray. Dara's bell-ringing tone and intense melodic sense separated him from all others in the frenetic world of free jazz.

And then in 1999, the Natchez, MS, native recorded a different kind of album with the band he'd quietly led for years, the Okra Orchestra: *In the World* celebrates all kinds of African-American music, from chanting Delta blues to tony cocktail-lounge swing. It was musically vital and extraordinarily sensual—in one much-heard refrain, Dara proclaims, "Your lips, your lips are juicy"—and helped Dara to establish a broader audience, one that wanted to hear him sing more than play trumpet. The followup, *Neighborhoods,* mined similar territory, but despite several spirited performances (notably the title track and the Latin-flavored "Massamba"), it proved to be less uniformly engaging. —T.M.

Terence Trent D'Arby

★★★½	Introducing the Hardline According to Terrence Trent D'Arby (Columbia, 1987)
★★★½	Neither Fish Nor Flesh (Columbia, 1989)
★★★★	Symphony or Damn (Columbia, 1993)
★★½	Vibrator (Work, 1995)
★★★	Wild Card (Compendio, 2001)

It's tough to recall just how famous Terence Trent D'Arby was supposed to be. He was the great post-everything soul hope, a black American living in England with a Napoleonic sense of pop destiny, Eurotrash pretensions, and really amazing plaited braids. Packaged as a shiny new Prince at a time when one didn't seem nearly enough, this dude was slated to be more popular than Jesus. You might have noticed this didn't really come to pass, although the guy is no less (but no more) brilliant now than he was then.

Columbia probably suspected something was up with his first album title, *Introducing the Hardline According to Terence Trent D'Arby.* A pastiche of Europop slickness, soulman croon, and mild funk, *Introducing* is just dripping with look-ladies-no-hands ambition. In fact, the ambition is all you hear in spots; his Sam Cookeish voice is spotless, but most of songs ("If You Let Me Stay," "Rain") bounce right past. Ballsy enough to include a five-minute a cappella tune called "As Yet Unnamed," an excellent Smokey Robinson cover ("Who's Lovin' You"), and two terrific singles. "Wishing Well," with its sex-shuffle rhythm and whistling hook, is a keeper, but the man's finest hour is "Sign Your Name," a slow burner that smolders like Sade and that got hands under blouses at middle school dances the nation over.

Unimpressed with market validation and looking to make an even grander statement, D'Arby turned his ambitions up to deafening levels and released the semibaffling *Neither Fish Nor Flesh* two years later. An overtly experimental, cranky mishmash that makes the Beatles' White Album look precision-tooled, *Neither Fish* can't concentrate D'Arby's obvious talents on a single musical idea for more than one tune. Song by song, the uneven collection has aged fairly well, considering the drubbing it took at the time. But as an album, *Fish* meanders, moving from unfortunate Staxish soul ("I'll Be Alright") to a sharply realized schoolboy R&B tune about AIDS ("Billy Don't Fall") to rockabilly riffs and "To Know Someone Deeply Is to Know Someone Softly," a frictionless slice of bedroom soul R. Kelly has clearly listened to about a million times. Some critics found his scope visionary if diffuse, and his voice still aces, but most of *Hardline*'s fan base were flummoxed by the thing and moved on with their lives.

D'Arby took some time off to figure out where it all went horribly wrong and returned with *Symphony or Damn.* Neither a techno-fish nor entirely flesh, less ditzy yet still diverse, *Symphony* hangs together quite well, finding voice and focus for his neon messiah complexes. "Penelope Please" holds on to 17 as long as he can, "Turn the Page" uses the Funky Drummer break in the service of blissful Britpop, and he even scored a minor hit with the glammy is-he-talking-about-a-blowjob-or-what? rocker "She Kissed Me." And yet, the masses stayed away in droves.

1995's *Vibrator* is dedicated to Muhammad Ali and "all the underappreciated giants still in our midst like for example Todd Rundgren, Bobby Womack, and Kate Bush," rendering reviews pretty much moot. It's more of *Symphony*'s chromium soul rock—the guy's pretty much found a sound he likes—but for the first time a D'Arby album sounds samey and indistinct; *Vibrator* swings the pendulum of eclecticism too far back. *Symphony* if you do or damned if you don't, I guess.

Unless someone figures out how to get people to shell out for his often limitless talents—or he starts producing albums for other, hipper people, preferably young women—all that's left for TTD is a *Behind the Music* and a box set. And one final thought: Lauryn Hill, pay very close attention to how this man's career has played out. Consider yourself warned. —J.G.

with Johnny Mercer

★★★	Two of a Kind: Bobby Darin & Johnny Mercer (1961; Atco, 1990)

On its surface, Bobby Darin's is one of the strangest, saddest stories in popular music. Restless and driven, the man born Walden Robert Cassotto in the Bronx hit the upper reaches of the pop charts in 1958 with the novelty ditty "Splish Splash" and stayed on the charts steadily through 1967. His only #1 came in 1959, and stayed at the top for nine weeks straight, with a swinging interpretation of Brecht-Weill's "Mack the Knife" that exuded Rat Pack ring-a-ding-ding brio. That hit provided his entrée into adult pop and the Vegas circuit, where he became one of the town's most popular draws through the remainder of the ensuing decade. When Ray Charles fused country and R&B on his 1963 LP, *Modern Sounds in Country & Western Music,* Darin followed suit with a #3 single in the same vein, "You're the Reason I'm Living," and his own experiment with various fusions involving country music. But that same year, he positioned himself in the vanguard of the folk-rock movement, assembling a band that included future Byrds founder Roger McGuinn on guitar.

Given the temper of the times—with the civil rights movement hitting its apex, a growing awareness among the general public of a debacle brewing in Southeast Asia, and more musical artists dissenting in song—Darin, who was seen in some critical quarters as an opportunist with regard to his stylistic flip-flopping, was genuinely moved by the day's rampant suffering, intolerance, and violence (an early supporter of Rev. Dr. Martin Luther King Jr., he participated in the 1965 march from Selma to Montgomery, AL; and he stood a seven-hour vigil at the grave of the assassinated Robert F. Kennedy). In response, he turned inward musically, his repertoire blossoming with spirituals, protest songs, and literate, sensitive songs about love and relationships. Bob Dylan's "Blowin' in the Wind" and "I'll Be Your Baby Tonight" were in the mix, as well as Oscar Brown Jr.'s "Work Song," several stirring Tim Hardin songs (one of which, 1966's "If I Were a Carpenter," was Darin's last Top 10 hit), John Sebastian's "Lovin' You" and "Darling Be Home Soon," and not least of all, a clutch of his own well-crafted folk-pop originals, including, in 1969, one of the most effective and subtle topical songs of the era, "Simple Song of Freedom."

On record, Darin was tremendously effective, no matter what style he was into at the time. But in public, his frequent image changes made him seem not so much authentic as desperate for attention. As the protest movement heated up in the '60s, he ditched his suits, ties, and clean-cut mien for long hair, facial hair, blue jeans, paisley shirts, and beads. He wasn't old—he was only 30 in 1966—but in his new guise, he gave off the desperate air of an aging hipster willing to endure any humiliation for one more crack at the charts. Eventually he returned to his original incarnation as a classic pop singer, donned the stylish suits once more, signed with Motown, and in 1973, landed his own short-lived TV variety series. Afflicted with a rheumatic heart since childhood, Darin died in 1973, during open-heart surgery. Posthumously, friends have said that if Darin's career drive sometimes veered into desperation, then it was because his heart condition had made him more aware of his own mortality and the need to make the most of what he was sure would be a short life. Indeed, Bobby Darin was only 37 years old at the time of his passing.

A Musical Anthology, the companion disc to the A&E network's biography of Darin, features a good sampling of the artist in his many guises, the highlights being live versions of "18 Yellow Roses" and "If I Were a Carpenter," a bit of soul strutting in "(Your Love Keeps Lifting Me) Higher and Higher," and some classic pop forays into "The Good Life" and "Call Me Irresponsible." *Swingin' the Standards* announces its content and approach in its title, but the actual songs are something else again: a stunning reading of the Tom Jones–Harvey Schmidt evergreen from the off-Broadway play *The Fantasticks,* "Try to Remember"; Leslie Bricusse's "Talk to the Animals"; Sammy Cahn and Jimmy Van Heusen's "Everybody Has the Right to Be Wrong," and others of this caliber. The material is from the Atlantic years.

And not least of all—in fact, most definitively—is the superb four-disc box set from Rhino, *As Long as I'm Singing: The Bobby Darin Collection,* which is divided into one disc from "The Rock & Roll Years," two volumes of "The Pop Years," and a fourth focused on "The Folk & Country Years." It's an exhilarating look at the entirety of Darin's career, with all his label associations (save Motown) represented, demo and live versions of "Simple Song of Freedom," and a live version of Dylan's "I'll Be Your Baby Tonight," along with the usual impeccable and thorough annotation common to Rhino boxes. Seven years after the box set's release, Rhino issued the 20-track *Hit Singles Collection,* which, along with Warner Bros.' *The Ultimate Bobby Darin,* comprises two concise overviews of Darin's hit recordings for Atlantic. In the end, it says a lot about Darin's artistry to observe that a listener could cherry-pick from his current discography and not find a mediocre album. Darin always brimmed with confidence, but if he were still with us, even he might be surprised at how good he was through all those years and styles. —D.M.

The Darkness

★★★½ Permission to Land (Atlantic, 2003)

The Darkness burst out of Norfolk, England, in 2003 with a party-hearty anthem called "I Believe in a Thing Called Love," a slightly retro barn burner full of huge-ass guitars and Justin Hawkins' Tiny Tim–worthy falsetto shrieks. Like many turn-of-the-century hard-rock revivalists, this British quartet is immersed in the one-two punch of AC/DC and early Queen, but *Permission to Land* is no irony-damaged novelty. Songs such as "Get Your Hands Off My Woman" and "Givin' Up" display industrial-strength riffs, vigorous hammer-on guitar solos, and a rhythm section that swings like a wrecking ball. —R.K.

Dashboard Confessional

★★★★ The Swiss Army Romance (Drive Thru/Fiddler, 2000)
★★★★ The Places You Have Come to Fear the Most (Vagrant, 2001)
★★★ MTV Unplugged 2.0 (Vagrant, 2002)
★★★ A Mark, a Mission, a Brand, a Scar (Vagrant, 2003)

Dashboard Confessional is a band, but it's easy to use the name to cover the cult of personality of just one man: singer/songwriter Chris Carrabba. Taking cues from the more confessional and personal vein of '90s indie punk, known somewhat derisively as "emo," Carrabba turned the idea into a one-man cottage industry of sad-boy folk-punk numbers. His debut, *The Swiss Army Romance,* is an intimate, almost claustrophobically tight album. The odd background vocal disrupts Carrabba's reverie, but it's almost exclusively his therapy session. Clearly, Carrabba's never met a woman he didn't alienate, or whom he wasn't alienated by, or both. "You're dying to look cute in your blue jeans," he gripes on the title track, "but you're plastic just like everyone/You're just like everyone." And so it goes. Carrabba sings with a piercingly clear whine, infecting all his ramblings with an accent of desperation, whether it's getting overwhelmed by the detritus of love lost ("Living in Your Letters") or driving home, stewing in his own pain ("The Sharp Hint of New Tears").

With the addition of Sunny Day Real Estate bassist Dan Bonebrake to the lineup, Dashboard Confessional sounded more powerful on its second album, *The Places You Have Come to Fear the Most.* And thanks to the breakout single "Screaming Infidelities" (reworked from the debut), people outside the band's dedicated, Internet-centric emo fan base were able to channel Carrabba. What they found was even more fatal femmes—women who lie, cheat, and run away without explaining why. On "The Good Fight," "The Best Deceptions," and "Saints and Sailors," Carrabba bleeds anguish, creating some of the most plainspoken and effective music for catharsis in recent memory.

Dashboard Confessional's music is nothing short of fanatical in nature, so it's not surprising that the band has fostered an unusually fervent fan base of disaffected teens. Those acolytes came out in full force for Dashboard Confessional's taping of MTV's *Unplugged,* creating easily the most interactive session the program has ever seen. On the recording, a wailing Carrabba encourages the audience members to shout their pain along with him, and on many of the songs, they chant along so loudly that Carrabba steps away from the mike. Their hurt matters just as much as his.

The adoration of scores of lovelorn teens didn't guarantee major-label success for Carrabba, though. *A Mark, a Mission, a Brand, a Scar,* the first fruit of a strategic alliance between his label Vagrant and Interscope, traded his earlier albums' intimacy for radio-ready soundscapes. "Hands Down," which scored big on an earlier EP, sounds drowned in feedback here, as does much of the album. The quiet tunefulness that had been Carrabba's stock-in-trade was mostly gone, and while songs like "Carry This Picture" and "Ghost of a Good Thing" sport his trademark wordy-yet-effective melodies, they're not enough to keep the album afloat. —J.C.

Inarguably one of the two or three most important jazz musicians who ever lived, Miles Davis started out at the top and managed to stay there for the rest of his 46-year career. As a soloist, his ideas were startlingly original and his tone utterly unmistakable; as a leader, he often recognized talent well before anyone else, and knew how to get the most out of almost any sideman.

But it was as a stylist that Davis had his greatest impact. Most jazzmen are lucky if they can be linked to even a single formal breakthrough; Davis can be credited with several. After the teenage trumpeter graduated from Charlie Parker's groundbreaking quintet, he turned bebop's frenetic virtuosity on its head with an acerbic series of small-group recordings introducing what came to be known as "cool" jazz. A few years later, he and his quintet had swapped cool's languid lyricism for a tougher, more intense sound, and were acknowledged leaders in the hard-bop movement. Next came his embrace of modality, which shifted his improvisational emphasis from the chord-based approach of bebop to a scale-based strategy similar to that of Indian classical music. And then, after being among the first to incorporate electric instruments in a jazz rhythm section, he abandoned the music's traditional dependence on swing and began working with rock- and funk-based rhythms, thus setting the groundwork for such fusion bands as Weather Report, Return to Forever, and the Mahavishnu Orchestra.

Like Louis Armstrong and Charlie Parker, his importance was as much social as it was musical. The son of a St. Louis dentist, Davis was born into the African-American professional class, and brought a sense of purpose and intellectual rigor to jazz that made it easy for listeners and critics to see the music as being just as "serious" as the symphony. At the same time, Davis never shied away from the coarser, "street" aspects of African-American culture, and would happily show off his newest Italian suit with a practiced pimp strut. This duality—for instance, being as obsessed with Stockhausen as he was with Sly & the Family Stone—made Davis both an inspiration and an enigma to generations of musicians.

Like most jazzmen, Davis began his career as a sideman. He had played in Billy Eckstine's big band and Charlie Parker's quintet before making his recording debut in 1945 with saxophonist Herbie Fields, a session that would likely have been forgotten had Davis not become so famous later (it may be found on the import collection *The Complete Vocalist Sessions*). The first sides issued under Davis' own name are to be found on *Timeless.* Cut with Parker and a rhythm section featuring John Lewis and Max Roach, its basic form is straight bebop, but the young trumpeter's voice can already be heard in its adventurous writing and measured phrasing. It's far preferable to *Bopping the Blues,* a sideman date finding Davis blowing blues obbligatos behind singers Earl Coleman and Ann Baker.

Still, the sessions that made Davis' reputation as a leader are the ones collected under the title *Birth of the Cool.* Using either an octet or nonet, Davis and arranger Gil Evans generated a sound that conveys the coloristic range of a big band while maintaining a chamber music sense of dynamics. Moreover, because the playing manages to employ all the harmonic sophistication of bebop while trading instrumental flash for a more leisurely, contemplative approach to soloing, it produced jazz that was far closer to the depth and consideration of art music than anything that had gone before. Although the recordings hardly marked a commercial breakthrough on Davis' part, their influence was incalculable, as groups ranging from the Modern Jazz Quartet to the Gerry Mulligan/Chet Baker quartet to Stan Kenton and his Orchestra all learned from them.

Ironically, the Davis nonet existed only for the *Cool* project, which, like most of his early-'50s output, was the product of one-off recording sessions. The same is true of the boppish Blue Note dates compiled as *Volume One* and *Volume Two,* and the deliciously unconventional *Blue Haze,* recorded with Charles Mingus. Even Davis' recordings for Prestige, the label that was more or less his home in the early '50s, were varied and episodic. That had its advantages, though. Given the tension between Davis and Thelonious Monk evident on the sessions they cut together (included, variously, on *Bags Groove, Miles Davis and the Jazz Giants,* and various anthologies over the years), it would be difficult to imagine them coexisting in a working band, but the fire in these recordings will make most listeners glad the two got together at least once. The all-inclusive *Chronicle* is perhaps the best way to tackle Davis' days with Prestige, since it includes all his sessions as a leader as well as four tunes recorded under Lee Konitz's name, and spares listeners the occasional redundancies that occur when buying the albums individually.

Those interested only in the highlights, however, should seek out *Dig,* recorded with the redoubtable Sonny Rollins on tenor, and then skip ahead to 1955, when Davis introduces saxophonist John Coltrane into his hard-bop quintet. Although Coltrane's contributions are relatively low-key on *The New Miles Davis Quintet,* his aggressive, questing solos offer a dynamic contrast to the acerbic economy of the trumpeter's own playing. Add the wry elegance of the rhythm section (Red Garland, Paul Chambers, and the incomparable Philly Joe Jones), and these albums—*Cookin', Relaxin', Workin',* and *Steamin'*—constitute the best of his work for that label.

This version of the quintet followed Davis when he moved to Columbia Records and can be heard on the lovely *'Round About Midnight.* But the album that truly introduces Davis' Columbia period is *Miles Ahead,* which featured a large ensemble under the direction of Davis' old *Birth of the Cool* collaborator Gil Evans. Theirs was an uncommonly sympathetic pairing, for Evans' coloristic approach to arranging brought out the best in Davis' dark, warm tone (particularly when the trumpeter switched to flugelhorn), while Evans' inventive voicings seemed to inspire Davis to ever more brilliant improvisations. Together, they produced material for a half-dozen albums, and, apart from the halfhearted bossa nova of *Quiet Nights,* it's uniformly excellent. *Porgy and Bess,* a setting of selections from the Gershwin opera, was particularly popular in its time, but their masterwork is undoubtedly *Sketches of Spain,* a work of unparalleled grace and lyricism. (A concert rendition of its "Concierto de Aranjuez" appears on *Miles Davis at Carnegie Hall.*) *Miles Davis/Gil Evans: The Complete Columbia Studio Recordings* augments the original albums with exquisite outtakes, plus enough rehearsal material to underscore just how exacting a bandleader Evans could be.

Davis continued his small group work, of course, adding alto saxophonist Cannonball Adderley on *Milestones* and *At Newport 1958,* and replacing Kelly and Jones with, respectively, pianist Bill Evans and drummer James Cobb for the *'58 Sessions.* (Davis also appears as a sideman on Adderley's *Somethin' Else* at this time.) Splendid as these albums are, though, they seem minor when compared to *Kind of Blue,* perhaps the greatest jazz album of its era. To begin with, Davis conceived the session as an act of revolution, moving away from the chord-based improvisation that had served him (and almost everyone else in jazz) since the birth of bebop. In its place, he introduces the concept of modal improvisation, in which the soloist works from a predetermined set of scales (a method not unrelated to the raga system of Indian classical music). But it isn't the theoretical breakthrough that makes this worth hearing—it's the charged spontaneity and elegant lyricism of the performances that makes the album so continually rewarding. Even after a thousand replays, *Kind of Blue* remains startlingly vital.

Coltrane would spend the rest of his life refining the concepts introduced on that album, but he'd do it without Davis' help; the swinging and incisive *Someday My Prince Will Come* was his last album with the trumpeter, as Hank Mobley was added on tenor at that point (and he is the only saxophonist on the two *In Person* albums). *Miles Davis & John Coltrane: The Complete Columbia Recordings 1955–1961* is a deserved monument to what is generally considered Davis' "first" great quintet.

His second great quintet was on the horizon, but took some time to assemble. With *Seven Steps to Heaven* Davis replaced Mobley with the fleet-fingered George Coleman on tenor, and also brought in a new rhythm section, with Ron Carter on bass and either Victor Feldman and Frank Butler or Herbie Hancock and Tony Williams on piano and drums. It was the latter pair who stuck. Although much younger than Davis' previous cohorts (Hancock was 23, Carter 25, and Williams just 18), these three played with astonishing energy and insight, and the sheer physicality of their live work—as evinced by *Miles in Europe* and *The Complete Concert 1964: My Funny Valentine and "Four" & More*—is breathtaking.

Coleman's input was less consistently dazzling, although his best work recalls the fire of Coltrane. Saxophonist Sam Rivers added an interesting twist to *Miles in Tokyo,* but it wasn't until Art Blakey alumnus Wayne Shorter joined, on *Miles in Berlin,* that Davis found a saxophonist whose harmonic imagination matched his own. *Live at the Plugged Nickel* shows how Shorter fits into the format established with Coleman, though *The Complete Live at the Plugged Nickel*—which spreads two full nights of music over seven CDs—offers an excellent picture of how he and the others were more than happy to push those boundaries. From there, the music grows ever more daring, from the angularity of *E.S.P.* through the moody eloquence of *Nefertiti,* until it seems to tug at the very seams of mainstream jazz.

For some listeners, and indeed many musicians, this was as good as it got, and the fire and style delineated by these albums—and offered in chronological order in *The Miles Davis Quintet, 1965–68: The Complete Columbia Studio Recordings* box—has since been imitated by many others, from early Wynton Marsalis to Hancock's own *V.S.O.P.* recordings (with Shorter, Carter, Williams, and various trumpeters).

By the end of the '60s, however, Davis was eager to move on, and in particular to explore the possibilities posed by electric instruments and funk rhythms. *Miles* *in the Sky, Filles de Kilimanjaro,* and *Water Babies* mark the first steps, as electric guitar (courtesy of George Benson on *In the Sky*) and electric piano (played both by Hancock and the young Chick Corea) are added to the lineup, while the trancelike rhythmic patterns explored on *Nefertiti* are elongated. Davis wasn't the only one in the quintet itching to go electric: Williams (who was known as the band's resident Beatles fan) was also toying with rock instrumentation in his own band, Lifetime, while Hancock toyed with rock ideas in the music he contributed to the soundtrack for Michelangelo Antonioni's epochal meditation on swinging London, *Blow-Up*.

But Davis, as ever, was searching for something different. For *In a Silent Way,* he borrowed the young English guitarist John McLaughlin from Williams' Lifetime, and had the Austrian keyboardist Joe Zawinul (who had come to notice through Cannonball Adderley's combo) on electric organ. He replaced Carter with another Englishman, Dave Holland, and had both Hancock and Corea on electric piano. It was a big band, but the music wasn't especially loud, as its rambling, riff-based approach to composition was as prone to pastoral grace as to funky grooves. Moreover, as *The Complete In a Silent Way Sessions* make plain, Davis had also begun to take a more pop/rock approach to the recording studio. Where once his albums were more or less unvarnished documents of how his current group sounded, the sessions for *In a Silent Way* found him recording what were essentially experiments in sound, which his producer—composer Teo Macero—would then splice into album tracks. By pop standards, this was a totally reasonable way to make records, but it seemed near heretical by jazz standards.

In that sense, the contemporary listener has an enormous advantage over those who bought Davis' albums in the early '70s. They had only the finished albums to deal with, and at times, what Davis delivered—abrupt shifts in texture, odd electronic effects, an almost episodic sense of melody—seemed nearly impossible to apprehend by the normal rules of jazz. Tellingly, although the various "complete sessions" sets make it possible to hear the music as it was originally recorded, the full-length versions of pieces are seldom as compelling as the versions that were edited and spliced into existence by Macero.

In any case, there was no turning back for either Davis or his audience after *Bitches Brew.* Where *In a Silent Way* merely flirts with funk, *Bitches Brew* openly courts its rhythmic insistence. Naturally, the jazz community was in an uproar over the album, with some of the more conservative fans condemning Davis for having "abandoned" jazz. Yet even though *Bitches Brew* was a commercial breakthrough for the trumpeter (it peaked at #35 on the *Billboard* album chart), it is by no means a pop record. Despite the funk grooves, Davis' compositions remained melodically oblique and harmonically challenging. (The import-only *1969 Miles: Festiva de Juan Pins,* recorded a month before the *Bitches Brew* sessions, is markedly more conservative.)

With *Bitches Brew,* Davis' career splits into two paths. On the one hand, there are his studio recordings, which involved a wide variety of musicians and which ranged from kaleidoscopic epics to texturally intriguing miniatures. On the other hand, there was his live band, which involved a relatively stable cadre of players and specialized in marathon performances of varying abstraction. As such, his studio albums of the early '70s—*A Tribute to Jack Johnson, Live/Evil, On the Corner, Big Fun, Get Up With It*—seem wildly experimental, portraying Davis as a musical chameleon. *Jack Johnson,* powered by drummer Billy Cobham and featuring an unusually aggressive McLaughlin, draws from R&B and hard rock, while *Live/Evil* presents the psychedelic side of Davis' band (just compare Keith Jarrett's gospel-schooled piano on "What I Say" to Bruce Hornsby's work with the Grateful Dead). *On the Corner* was abstract funk, like a 23rd-century Sly & the Family Stone, while *Get Up With It* found him viewing Africa and the Caribbean through the lens of electronic music. Only *Big Fun*—compiled from *Bitches Brew* leftovers and twice the length on CD that it was on LP—defies easy categorization, although its dark, moody tracks boast a strong undercurrent of Indian classical rhythms in addition to the expected swathes of rock and funk.

Live, Davis' bands were less inclined to groove and more apt to burn, which made their recordings considerably less commercial than his studio output. Indeed, half (*Black Beauty, Dark Magus,* and *Pangaea*) weren't even released domestically until well into the CD era, consigning hard-core fans to expensive Japanese imports. The three Fillmore albums were all recorded in 1970, and draw largely from the *Bitches Brew* songbook. *Live at the Fillmore East (March 7, 1970),* with Shorter on saxophone, is considered a sort of "missing link," as it represents the last connection between Davis' last hard-bop quintet and his subsequent electric bands. *Black Beauty,* recorded the following month on the opposite coast, finds Steve Grossman in the sax chair, and takes a much more aggressive approach, with the distortion on Corea's electric piano cranked to the max (although there is a touchingly gentle dip into "I Fall in Love Too Easily" midway through the first disc). Back in New York two months later, *At Fillmore* adds Jarrett to the proceedings and trades its predecessors' lyricism for a frenzied, clangorous approach.

Two years later, when *In Concert* was recorded at Philharmonic Hall in New York, Davis had a whole new band and an entirely different approach, drawing heavily from the worldbeat fusion of *Get Up With It.* Although occasionally fascinating, the busily churning rhythms often seem oddly static, as if the band were laboriously treading water. *Dark Magus,* recorded in 1974 with mostly the same rhythm section but with three guitars instead of one, not only makes more sense of the band's roiling rhythms but manages to balance the eagerness to improvise with a willingness to rock. *Pangaea* and *Agharta,* culled from a single show the following year in Osaka, Japan, pares the guitarists down to two: the post-Hendrixian Pete Cosey and the slyly soulful Reggie Lucas. The music—alternately audacious, poetic, hypnotic, and abrasive—has held up better than much of his '70s concert recordings.

They were also his last recordings of the decade, thanks to medical problems that sent him on a downward spiral of ill health and chemical dependence. His return to music-making, in 1981, seemed to play more on his celebrity than his musical imagination. With only drummer Al Foster held over from his last combo, Davis' '80s bands eschewed the rhythmic exoticism of his '70s work, opting instead for a more straightforward fusion approach. That seemed frankly dull on his overarranged and underadventurous studio comeback, *The Man With the Horn.* Onstage, however, the playing was more lively and inventive, as can be heard on either the import-only *Miles! Miles! Miles! Live in Japan* or the domestic release *We Want Miles.* But apart from *Aura*—an adventurous and pointedly non-pop-oriented big-band suite conceived by Danish jazzman Palle Mikkelborg—his final studio recordings for Columbia lacked the insight and daring that marked his prior efforts, although *You're Under Arrest,* which found him covering tunes recorded by Michael Jackson and Cyndi Lauper, came reasonably close to balancing his need for pop relevance with his jazz inclinations.

Davis left Columbia for Warner Bros. in 1985, and his first album for the label was *Tutu,* a one-on-one pairing with producer/multi-instrumentalist Marcus Miller (who, in addition to having played bass in Davis' comeback band, coproduced a number of Luther Vandross' albums). Although its automated hermeticism rubbed jazz purists the wrong way, *Tutu* holds up well, both compositionally and improvisationally. It was followed by the more assured soundtrack album *Siesta,* which marvelously updates the Iberian groove of *Sketches of Spain.* The vaguely African *Amandla* returns to full-band format for the studio, but apart from Foster and saxophonist Kenny Garrett, relies mostly on session players and as such tends toward conservatism. Davis made one last stab at pop with *Doo-Bop,* a much-reviled but ultimately worthy attempt at fusing hip-hop and jazz. Had Davis teamed with MCs less hackneyed than J.R. and Easy Mo Bee, the album could have been a classic.

Dingo, Davis' other Warners soundtrack, released shortly after his death in 1991, is also intriguing, in part because it includes his first attempts at traditional, bop-derived jazz in 23 years, but its significance is diminished by the fact that half of what we hear is actually the work of trumpeter Chuck Findley. Still, it neatly set the stage for his final album, *Live at Montreux,* in which he and a Quincy Jones–led ensemble revisited the glory of his Gil Evans collaborations. He died three months later.

Perhaps the greatest failing of Davis' Warner Bros. years was that its emphasis on work created for the studio left no sense of what his touring band sounded like. The posthumous *Live Around the World* showed that what Davis did onstage during this period was far more daring than his pop-striving studio work, but the best evidence that Davis' final years have been woefully underrated comes with *The Complete Miles Davis at Montreux, 1973–1991.* Although its 20 CDs make a heavy demand on any listener, the consistent daring of his later bands—and the occasionally stunning contributions of such otherwise overlooked sidemen as keyboardist Kei Akagi and drummer Ricky Wellman—suggests that the trumpeter's final years were wrongly written off by most jazz critics.

Since his death, Davis' work has been anthologized in every manner imaginable, from straightforward best-ofs to specially themed compilations. There are also a number of box sets, organized by label or by project. Nearly all have something to recommend them; the issue is, how much?

Of the best-ofs, only *Ken Burns Jazz* attempts to cover the whole range of Davis' career; it's not a bad representation of his acoustic work, but it reduces his output after 1970 to a single track. *Jazz Profile* draws nicely from *Birth of the Cool* and Davis' earliest sessions as a leader, while *Miles Davis and the Jazz Giants* offers the best sampling of his recordings for Prestige. But the bulk of his career—some 30 years—was spent with Columbia, and summing that up in a single disc seems near impossible. *The Best of Miles Davis* is as close as you'll get, a brisk run through the classics that covers most of the essentials; even so, you're better off spending a little extra and getting the double-disc *Essential Miles Davis,* which conveys a better sense of the scope of his output. As for the theme-oriented collections, *Love Songs* is actually quite sweet. *Bluing* is an attempt at showing his approach to the blues, while *Blue Moods* offers more mood than blues, acting more as high-class background music than an introduction to jazz classics. *Panthalassa: The Remix Collection* is as disappointing as it is ambitious, while *This Is Jazz #38: Electric* woefully misrepresents that aspect of his catalogue by opting for short pieces instead of the more typical long workouts.

With the box sets, it's worth remembering that more is sometimes less. *Chronicle: The Complete Prestige Recordings* is a wonderful resource but a less enjoyable listening experience than the original albums. But that's the problem with many of the Davis box sets. If you're interested in the history—the process of the music-making—and patient enough to sit through the alternate takes and rehearsal snippets, then such sets as *Chronicle* or *Miles Davis & Gil Evans: The Complete Columbia Studio Recordings* or *The Complete Live at the Plugged Nickel* are worth the investment of time and money. If not, then stick with the original albums.

The Columbia Years would seem an obvious analogue to *Chronicle*, but hardly attempts to match the latter's completism; instead, this four-CD set culls most of the obvious highlights but shortchanges both Davis' electric period and his Evans albums. *Miles Davis & John Coltrane: The Complete Columbia Recordings* is, surprisingly, a less confusing way of absorbing the later recordings of that first great quintet than a march through the original albums would be; likewise, *The Miles Davis Quintet, 1956–68: The Complete Columbia Recordings* is a very handy way of dealing with the second quintet—and, oddly, makes the group's dissolution seem a natural outgrowth of its experimentation. But neither is as illuminating as *The Complete In a Silent Way Sessions*, which actually starts at *Filles de Kilimanjaro*, and makes Davis' transition from acoustic to electric music seem almost obvious, while *The Complete Bitches Brew Sessions* feeds the ongoing hunger for unheard Davis, as well as providing a better sense of how Macero's editing process worked. A grateful nation gives its thanks. —J.D.C.

The Spencer Davis Group

★★½	Funky (Date, 1968; One Way, 1997)
★★★	The Best of the Spencer Davis Group (EMI America, 1996)
★★½	I'm a Man (1967; Sundazed, 2001)

Two triumphant singles, "Gimme Some Lovin'" (1966) and "I'm a Man" (1967), featuring Steve Winwood's earliest (and some of his best) singing, made this Birmingham quartet one of Britain's classiest and toughest R&B outfits. A trad-blues fan, Davis had the luck to discover the 16-year-old Winwood, and the smart modesty basically to hand over the band to the precocious soulster. Winwood obviously came through—had the rest of this band been even half so tough, the Spencer Davis Group would've rivaled the Animals. *I'm a Man* collects material from the group's second English album of bluesy rock. Davis went on to found other incarnations of his group: *Funky* is a strong representative of the music after Winwood left. The band's early original albums are out of print or hard to find, but EMI's greatest-hits album is a good summation of the high points. —P.E.

Dead Boys

★★★★	Young Loud and Snotty (Sire, 1977)
★★	We Have Come for Your Children (Sire, 1978)
★★	Night of the Living Dead Boys (Bomp!, 1981)
★★★	Younger Louder & Snottier (1989; Bomp!, 1997)
★★	All This & More (Bomp!, 1998)
★	Liver Than You'll Ever Be (Pilot, 2002)

Compared to the piranha bite of vintage Sex Pistols or the Ramones' goony joie de vivre, the Dead Boys sound like borderline-competent heavy metal. But on *Young Loud and Snotty*—led by Stiv Bators' self-destructive, hate-filled, sexist explosions—the band makes up for lack of chops with plenty of nasty, vicious attitude. The Dead Boys' only other studio effort, *We Have Come for Your Children*, offers more of the same though with less effect. The shtick had worn thin. Before they became Dead Boys, Cheetah Chrome (guitar) and Johnny Blitz (drums) were in the groundbreaking Cleveland proto-punk band Rocket From the Tombs, along with Pere Ubu founders Peter Laughner and David Thomas. In fact, many of the best cuts on both Dead Boys albums are Rocket holdovers: *Young Loud and Snotty*'s rousing antianthem "Sonic Reducer" (notably sampled by the Beastie Boys on their 2004 track "Open Letter to NYC") is cowritten by Thomas, while *We Have Come for Your Children*'s morose and compelling "Ain't It Fun" is the late Peter Laughner's unsparing elegy for himself (cowritten with Chrome). So much loutish behavior and public indecency has been committed in the name of punk, but few went further than the Dead Boys. Live, Stiv Bators took Iggy Pop's daredevil stage antics three cocky steps forward into utter anarchy. Not surprisingly, the various live albums—all of which sound to varying degrees like muddy fan bootlegs—capture more chaos than music. For anybody who witnessed Bators' simulation of hanging himself while broken glass rained down onstage, his snarling tagline on the Stooges soundalike "All This and More" (on *Snotty*) was no joke: "I'll die for you if you want me to." Bators did, in fact, meet his maker after being hit by a bus in Paris in 1990. —R.A.

Dead Kennedys

★★★★	Fresh Fruit for Rotting Vegetables (IRS, 1980)
★★★★	In God We Trust, Inc. (Alternative Tentacles, 1981)
★★★	Plastic Surgery Disasters (Alternative Tentacles, 1982)
★★★	Frankenchrist (Alternative Tentacles, 1985)
★★★	Bedtime for Democracy (Alternative Tentacles, 1986)
★★★★	Give Me Convenience or Give Me Death (Alternative Tentacles, 1987)

The Dead Kennedys' confrontational politics and total scorn for the status quo led many to consider this pioneering California hardcore band the only American punk act on par with the Sex Pistols. Most of the Kennedys' impact derived from the inspired vitriol of Jello Biafra's lyrics, not the music behind him. Indeed, where the Sex Pistols' semi-metal roar seems threatening even when Johnny Rotten isn't singing, the DKs' frenetic rave-ups usually substitute speed for power, noise for intensity.

The most lasting material on *Fresh Fruit for Rotting Vegetables* is its most conventional—post-Ramones rockers like "Kill the Poor" or "California Über Alles"—although there is a certain nasty glee to be found in the likes of "Let's Lynch the Landlord." There's even more righteous rage (or is it rage against righteousness?) on *In God We Trust, Inc.*, but even the ferociously catchy "Nazi Punks Fuck Off" sacrifices some of its musical power to the lyrics' occasionally awkward cadences. Much the same can be said of *Plastic Surgery Disasters, Frankenchrist,* and *Bedtime for Democracy,* where the group's increasingly didactic material seems to exist more as political commentary than as rock & roll. In that respect, it's almost ironic that the group's undoing wasn't its often scabrous assault on the establishment, but an obscenity suit prompted by a poster (of H.R. Giger's "Landscape #XX") included in *Frankenchrist.* Although the band eventually won that battle, it lost the war, disbanding not long after *Bedtime for Democracy;* its final release, *Give Me Convenience or Give Me Death,* is a compilation album collecting many of its most listenable songs.

The band itself had an ugly denouement: In the late '90s, the group became embroiled in litigation, with Biafra and other members of the band suing one another over management and royalty issues. —J.D.C.

Dead Prez

★★★★	Let's Get Free (Loud, 2000)
★★★½	Turn Off the Radio: The Mixtape Vol. 1 (Holla Black/Full Clip, 2002)
★★★	Turn Off the Radio: The Mixtape Vol. 2: Get Free or Die Tryin' (Landspeed, 2003)
★★½	RBG: Revolutionary But Gangsta (Columbia, 2004)

In an era when hip-hop had all but forgotten its political obligations, Brooklyn's Dead Prez stepped up to the challenge. Rappers M-1 and stic.man were Afrocentric activists nonpareil, and their debut, *Let's Get Free,* was one of the finest examples of agit-rap since Public Enemy's *It Takes a Nation of Millions.* "They Schools" was a vicious skewering of the American educational system; "Be Healthy" advocated the benefits of a holistically inclined lifestyle; "I'm a African" contended just that. And not only were Dead Prez excellent rappers, but their choice of beats was open-minded—as on the mildly conspiratorial, yet truly crunk "Hip-Hop"—opting for bottom-heavy bass that hinted at the time the two spent living in the South.

The next two albums, the independently released *Turn Off the Radio* mixtape series, found the insurgent MCs rapping over urban-radio-standard instrumentals—Aaliyah's "We Need a Resolution" ("We Need A Revolution"), Black Rob's "Whoa" ("Like War"). They kept up the firebrand lyrics, too, rapping "The only free ride I get is the one with a siren" on "Tallahassee Days" and pressuring the pols on "Know Your Enemy": "You want to stop terrorists?/Start with the U.S. imperialists/Ain't no track record like America's." By the time their Sony debut, *RBG,* was released, their agit-rap momentum had dimmed somewhat. The album is strangely dour, filled with stories about crime in the name of struggle, the need to politically organize, and the corruptive influence of media. But unlike *Let's Get Free,* the new songs stagnate, and without the bounce, the didactic messages are hard to swallow. —J.C.

Death Cab for Cutie

★★★	Something About Airplanes (Barsuk, 1999)
★★★	We Have the Facts and We're Voting Yes (Barsuk, 2000)
★★★★	Forbidden Love E.P. (Barsuk, 2000)
★★★★½	The Photo Album (Barsuk, 2002)
★★	Stability EP (Barsuk, 2002)

★★★ You Can Play These Songs With Chords (Barsuk, 2002)
★★★½ Transatlanticism (Barsuk, 2003)

No one made prettier postmillennial indie rock than Bellingham, WA, foursome Death Cab for Cutie. Smarter and more sensitive than almost any of his studiously introspective peers, singer/songwriter/guitarist Benjamin Gibbard formed the band—with bassist Nicholas Harmer, guitarist-organist Christopher Walla, and, eventually, crack drummer Michael Schorr—after the tape of his solo cassette EP, *You Can Play These Songs With Chords,* suggested there was a market for charming little photocopies of Built to Spill's quieter, reverb-warped tunes. (Barsuk's 2002 reissue bundles these with later, equally charming alternate takes and rarities.)

On *Something About Airplanes,* DCFC took a baby step toward what would become its defining sound, smoothing over Built to Spill's jittery bombast with Gibbard's salve of a voice (previously a squeak) and slow builds. The five rerecorded cuts from *You Can Play These Songs With Chords,* subtly streamlined, showcase the band's new emphasis on delicacy over dissonance. The critical breakthrough *We Have the Facts and We're Voting Yes* applied the same principle, plus a smattering of psychedelia, to a new batch of songs with better melodies. But the best of that album's tracks, "Company Calls Epilogue" and "405," are fully realized as simple strummers on *The Forbidden Love E.P.,* which came out later that year.

While sometimes nostalgic, as its brilliant name suggests, *The Photo Album* showcases Gibbard's most scathing, not to mention most beautiful, songs to date. The urgent yet dreamy "Why You'd Want to Live Here" joins rock's long tradition of ripping into L.A.—"You can't swim in a town this shallow/You will most assuredly drown tomorrow"—and barrels into a break that's smoggy with fuzz and shot through with sunbursts of chiming guitar. In "Styrofoam Plates," gorgeously gentle but for its broken, unrelenting beat, Gibbard addresses his "bastard" father as he spreads the man's ashes, the weariness in his voice giving way to anger: "You're a disgrace to the concept of family/The priest won't divulge that fact in his homily/And I'll stand up and scream if the mourning remain quiet/You can deck out a lie in a suit but I won't buy it." And how does he end the song? "La la la la la-la/la la la la-la."

Transatlanticism is whipped cream to *The Photo Album*'s curdled milk, smooth but rarely stunning. Gibbard plants a land mine in the gently rippling guitar reverb of "Tiny Vessels," recounting, for once, a one-sided romance in which "she was beautiful/but didn't mean a thing to me." Tracks like this and "Title and Registration" show the band at its best, pushing lovely melodies with borderline-restive rhythms. But elsewhere, particularly the almost eight-minute-long title track, the band's slack with melancholy—perhaps a little too full of themselves. —N.C.

Deee-Lite

★★★★ World Clique (Elektra, 1990)
★★★ Infinity Within (Elektra, 1992)
★★ Dew Drops in the Garden (Elektra, 1994)
★★★½ Sampledelic Relics and Dancefloor Oddities (Elektra, 1996)
★★★★ The Very Best of Deee-Lite (Rhino, 2001)

Too far ahead of their time to have been accorded the respect they deserved, Deee-Lite not only presaged the crotch-level charm of post-house dance pop, but co-opted enough of the '60s peace-and-love aesthetic to fool mainstream media into thinking their music was wholesome and innocent.

Instead, Deee-Lite's deceptively frothy dance pop, with its deep grooves and strong sense of soul, eased the way for electronica's brief stand as the Next Big Thing. Of course, because Deee-Lite's music emphasizes song structure as much as rhythm tracks, the group was never pigeonholed, and as such had more pop appeal than most dance acts.

Even so, whatever inroads "Groove Is in the Heart"—the big hit from *World Clique*—might have made, Deee-Lite's moment in the spotlight was relatively short. *Infinity Within* did an admirable job of expanding on the post-hippie optimism of the debut, but *Dew Drops in the Garden*—recorded after the departure of DJ Towa Tei—seems more dippy than hippie.

Sampledelic Relics is a nice collection for hard-core fans, but is ignorable otherwise. *The Very Best* is an apt single-disc summation of the group's efforts, but those interested in further examination would do well to acquire DJ Towa Tei's *Sound Museum.* —J.D.C.

Deep Dish

★★★½ Junk Science (Deconstruction/Arista, 1998)

Since the early '90s, Washington, D.C.'s progressive house emissaries Deep Dish have blown ecstasy-besotted minds from Moscow to Ibiza and along the way remixed the likes of Madonna and the Rolling Stones.

Deep Dish released their first mix CD, 1995's *Penetrate Deeper,* on Tribal America. But it was the duo's massive mix of De'lacy's "Hideaway" the same year that jammed open the remix floodgates as Michael

Jackson, Tina Turner, and even Beth Orton lined up for the pair's beat-mining skills. In 1998 they dropped the masterful and eclectic *Junk Science,* a joint that cuts its house with jazz, techno, funk, and assorted ambient chasers. "The Future of the Future (Stay Gold)" became an instant dance-floor classic with Everything But the Girl's Tracey Thorn's golden voice soaring high above techno beats and watery synth lines. They released five rather indistinguishable mix CDS between 1999 and 2003 under banners like Global Underground, Yoshiesque, and Renaissance that don't come close to *Junk*'s originality. —A.G.

Def Leppard

★★★½	On Through the Night (Mercury, 1980)
★★★	High 'n' Dry (Mercury, 1981)
★★★★½	Pyromania (Mercury, 1983)
★★★★★	Hysteria (Mercury, 1987)
★★★★	Adrenalize (Mercury, 1992)
★★½	Retro Active (Mercury, 1993)
★★★★★	Vault—Greatest Hits, 1985–1990 (Mercury, 1995)
★★½	Slang (Mercury, 1996)
★★★	Euphoria (Mercury, 1999)
★★½	X (Mercury, 2002)

It may be hard to believe, but Def Leppard came up in the same late '70s scene that produced Iron Maiden and Motörhead, the so-called new wave of British metal. At that time, no one could have imagined that the scene's reborn ferocity would lead to a sound as carefully crafted or pop-friendly as Def Leppard's. Neither would anyone have predicted that the plucky teens who recorded *On Through the Night* would end up as the era's most popular metal band or that the group would overcome unimaginable tragedy on its way to the top.

On Through the Night, after all, was a fairly modest start for the band, offering tuneful if formulaic songs played with more competence than fury. *High 'n' Dry* stuck with that approach, though as "Bringin' On the Heartache" demonstrates, the writing grew more intricate and involved.

The rules changed for good with *Pyromania.* Not only is the band's traditional heavy-rock instrumentation—twin guitars, bass, drums—augmented by digital keyboards and state-of-the-art special effects, but that sound-shaping technology often becomes part of the song. Consequently, the backward snare and carefully contoured backing vocals don't just add depth and texture to "Photograph," they actually change the way the music flows and the melody develops. And that's as true of "Rock of Ages," "Foolin'," and most of the other songs on the album.

Hysteria is even more techno-intense, yet the obviously painstaking production never gets in the way of the music. If anything, from the processed vocals in "Animal" to the multiple layers of echo that sheathe the groove in "Pour Some Sugar on Me," the overload of aural detail enhances the album's melodic allure, underscoring the material's pop appeal without dulling its metallic edge.

During the making of *Hysteria,* drummer Rick Allen lost an arm in an auto accident, but he continued to record and perform with the band. While the band was working on the followup, *Adrenalize,* guitarist Steve Clark died from drug and alcohol abuse. Despite the double tragedy, neither the band's sound nor its lyrical concerns changed; singles such as "Let's Get Rocked" furthered the band's carefree, good-time reputation.

After releasing a best-of *(Vault)* and a rarities collection *(Retro Active),* Def Leppard updated its sound, outfitting *Slang* with industrial vocals on "Truth" and shimmering U2-style guitar on "Where Does Love Go When It Dies." Although it was interesting, the album flopped, and the Leps reverted to formula, filling *Euphoria* with power ballads ("It's Only Love") and fist-pumping rockers (the Gary Glitter–ish "Back in Your Face"). Nothing endures forever, so by its 10th album, *X,* Def Leppard seemed creatively tapped out, able to offer only deftly arranged echoes of its once glorious past. —J.D.C.

The Deftones

★★	Adrenaline (Maverick, 1995)
★★	Around the Fur (Maverick, 1997)
★★★½	White Pony (Maverick, 2000)
★★★	Deftones (Maverick, 2003)

The multiracial, multicultural, multimusical Deftones have the strange distinction of being perhaps the least critically maligned band associated with new metal. Maybe that's because their breakthrough, *White Pony,* showed signs that they were as familiar with the Cure's *Disintegration* and things that girls might like as with downtuned bass, chunk style riffs, and screaming about their various aches and pains. Or maybe it's because the songs are built around singer Cheno Moreno's voice in ways other "heavy music" acts are not. Whatever it is, Deftones' *Adrenaline* is one thud after another, but even on the monochromatic debut, you can tell there's a depth of focus lurking just out of reach. Moreno has a charisma lacking in other new metal frontmen; you get the sense he would have beer with you without trying to talk to you about serial killers.

Around the Fur focuses their sound into overt aggression. This is pure rock fury, the sound of guys who are smarter than you give them credit for, trying to prove to themselves that they're as tough (and horny) as everyone thinks. Songs like "Be Quiet And Drive (Far Away)" wants to fuck the pain away, but there's never any satiation, never any true release.

But the smarts eventually won out, with impressive results. *White Pony* strikes a remarkable balance between the raw and the cooked, between beat science and rock dynamics, between metal overkill and quieter moments, between mecha and orga. The pure bulldozer metal on "Elite" gives way to atmospheric, percussive near-balladry on "RX Queen." "Teenager" is as close to warm as new metal gets, while "Korea" shows just how well bassist Chi Cheng and guitarist Stephen Carpenter lock up when called upon to throw down. Through it all, DJ Frank Delgado never lets the beats pull focus away from the songs, providing color without the "hey, we have a DJ!" antics that plague their peers. Perhaps most impressively, Moreno gets off on lyrical nuance and his voice actually signifies passion, instead of the atonal warble that most new metal thinks means they mean it, man. A great leap forward and one of the few new metal albums that wholly justifies the genre.

After three years, *Deftones* sounds born-again hard even while incorporating *White Pony*'s generic expansiveness. Moreno tears his voice to shreds on songs like "Hexagram," while Carpenter's riffs have gotten more compact and focused, and Delgado's scratching has become more musical. "Lucky You" floats into the sunset, while the epic shimmer of "Minerva" is their loveliest moment. Apparently, the Deftones hear things in new metal that most bands wouldn't dare acknowledge. —J.G.

Desmond Dekker

★★★½	Desmond Dekker and the Aces (Trojan, 1985)
★★★	King of Ska (Trojan, 1991)
★★★	Music Like Dirt (Trojan, 1992)
★★★★	Rockin' Steady: The Best of Desmond Dekker (Rhino, 1992)
★★★	King of Kings (Trojan, 1995)
★★★	Moving Out (Trojan, 1996)
★★★	Intensified (Lagoon, 1997)
★★★½	First Time for a Long Time: Rarities (Trojan, 1997)
★★★	Writing on the Wall (Trojan, 1998)
★★★	Halfway to Paradise (Trojan, 2000)
★★★½	Israelites: Anthology 1963–1999 (Trojan, 2001)

In 1969, straight out of Kingston, Jamaica, Desmond Dekker scored a Top 10 hit with the reggae single "Israelites," paving the way for stronger talents like Bob Marley. Although in the U.S. Dekker remained a one-hit wonder, his influence in Britain was more substantial. Championing the outlaw ethic ("Rude Boy Train"), Dekker's early work was low-tech and punchy; but even with slicker fare, like his cover of Jimmy Cliff's "You Can Get It if You Really Want," his sly vocal style cuts through. The Rhino set is the fabulous '60s stuff (check out "007 [Shanty Town]") and *Desmond Dekker and the Aces* is also vintage excellence, especially the brilliance of the Aces, D.D.'s backup vocalists. The later work is heartening, if not quite so strong. *King of Kings* pairs Desmond with the Specials, the next generation of ska heroes and perhaps Dekker's greatest fans. —P.E.

Delaney & Bonnie

★★★★½	On Tour With Eric Clapton (Atco, 1970, 1989)
★★★★	The Best of Delaney & Bonnie (Rhino, 1990)

In their toughest, 1969 incarnation—an 11-piece revue—Delaney & Bonnie made Southern soul-rock with scorching expertise. Honing her R&B chops as history's only white Ikette, powerhouse vocalist Bonnie Bramlett and husband Delaney, an ace picker and country-tinged singer, had the talent and charisma to attract breathtaking sidemen: Leon Russell, Bobby Keys, Carl Radle, Rita Coolidge, Jim Keltner—and, at various times, Eric Clapton and Duane Allman. As one of the best bands in rock & roll, they make *On Tour* a triumph: Clapton tears up Steve Cropper's "Things Get Better," D&B exult the funk on "I Don't Want to Discuss It." The acoustic "Motel Shot" is another kind of wonder: traditionals like "Going Down the Road Feeling Bad" and "Will the Circle Be Unbroken" played with a casual, loving freedom. The Rhino collection starts off with *Accept No Substitute,* which formulated D&B's synthesis of Stax/Volt, gospel, and hard country and then gives us the career highlights of a duo who created genuinely credible big-band rock. Their sound remains exciting and groundbreaking: The musicians they introduced are also featured on Clapton's first solo album and Joe Cocker's *Mad Dogs and Englishmen.* —P.E.

De La Soul

★★★★★	3 Feet High and Rising (1989; Tommy Boy, 2001)
★★★★½	De La Soul Is Dead (Tommy Boy, 1991)
★★★★½	Buhloone Mindstate (Tommy Boy, 1993)
★★★★	Stakes Is High (Tommy Boy, 1996)
★★★½	Art Official Intelligence: Mosaic Thump (Tommy Boy, 2000)

★★★ AOI: Bionix (Tommy Boy, 2001)
★★★★★ Timeless: The Singles Collection (Tommy Boy/Rhino, 2003)
★★★½ Live at Tramps, NYC 1996 (Tommy Boy/Rhino, 2004)
★★★★ De La Mixtape: Remixes Rarities and Classics (Tommy Boy/Rhino, 2004)

When you're a group of minds way out of time, you invent your own era. That's just what Long Island, NY, teenagers De La Soul did for their 1989 debut, *3 Feet High and Rising.* In their hip-hop, there were no drug dealers; no gangsters; no hoodlums. Just Posdnuos, Mase, and Trugoy, a triumvirate of psychedelically dressed boho would-bes—and their equally eccentric producer, Prince Paul—with more ideas than they could ever hope to confine to a simple audio record. They certainly did try on *3 Feet,* a cluttered classic crammed wall-to-wall with bizarro concepts that set De La apart from almost all of their contemporaries. Songs touched on the social issues of the day ("Say No Go," "Ghetto Thang"), teenage lust ("Jenifa Taught Me," "Buddy") and an assertive individuality ("Me Myself & I"). In every case, the production was boisterous, teeming with whimsical samples from a range of genres, and demonstrating facility with everything from television commercial jingles to the club music pastiche. Just as fascinating were the skits, in which a collection of increasingly preposterous characters competed in mock game shows. Not only did these brief, absurd interludes help give *3 Feet* a narrative arc, they also helped establish De La as quirky artists with heart, willing to poke fun at themselves.

The exuberance, sadly, was short-lived. Most artists are loath to become pigeonholed, but accept that path as a means to an end. Not De La, though. *3 Feet* was so widely accepted, and so broadly caricatured in the popular sphere, that on their followup, they abandoned its ethic almost completely. Whereas they'd coined their movement the D.A.I.S.Y. Age on *3 Feet,* the cover of *De La Soul Is Dead* featured an overturned pot of daisies. The group was still outré by hip-hop standards, but the whimsy was all but gone. The single "Ring Ring Ring (Ha Ha Hey)" was a classic music industry lament, and the best songs were deeply pessimistic: "Millie Pulled a Pistol on Santa," a story about sexual abuse, remains one of the genre's most moving tracks, followed closely by "My Brother's a Basehead," allegedly based on Posdnuos' true-life experiences. Relatively speaking, *Dead* was a commercial flop, and the group's third album, *Buhloone Mindstate,* didn't do much better, even though it reclaimed some of *3 Feet*'s vitality on tracks like "Breakadawn" and the classic "Ego Trippin' (Part Two)."

Given their creative track record, it would have been easy to think that De La just wasn't much interested in commercial success. With that in mind, the group's fourth album, *Stakes Is High,* was a brilliant gambit, the crew's answer record to hip-hop's increasing commercialization. From a group that had made three brilliant concept records, it was stunningly straightforward, almost a conscious attempt to retrofit the group as part and parcel of the genre they'd been trying to inject with life for several years. On songs like "The Bizness," "Itzsoweezee (Hot)," and "Supa Emcees," their production was more straightforward than it ever had previously been. The same could be said of the title track, although a listen to the lyrics revealed a skepticism as thorough as that evinced on *De La Soul Is Dead.*

In 2000, the group released the first in what was to be a triptych of albums, the *Art Official Intelligence* series, which they hoped would gain them a wider audience, deliberately aiming for the mainstream with a retinue of well-known guests—Xzibit, Busta Rhymes, Redman, Slick Rick. As usual, the songs were musically accomplished, but they lacked the passion of the group's early work. Due to label difficulties, the third part of the series wasn't released, although the first two installments proved that De La's best moments were behind them. After years of cult status—it would take *3 Feet* over a decade to go platinum—they'd eased into the role of hip-hop's cranky uncles: respected by everyone, but just a step or three out of sync with the times. —J.C.

The Delfonics

★★★ La-La Means I Love You (1968; Buddha/BMG, 2001)
★★★ The Sound of Sexy Soul (1969; Buddha/BMG, 2001)
★★★★ The Delfonics (1970; Buddha/BMG, 2001)
★★★★★ La-La Means I Love You: The Definitive Collection (Arista, 1997)
★★ Forever New (Volt, 2000)

The Delfonics were the agents by which producer Thom Bell crafted a new subgenre of soul. Blending lush, pop-influenced orchestrations with a group harmony approach (complete with soaring, romantic tenor leads) updated from the '50s doo-wop aesthetic, Bell and the Delfonics were the pioneers who blazed the trail in the late '60s for the Philly Soul explosion of the '70s.

Formed in Philadelphia, the Delfonics were high-school buddies who came together as the Orphonics in the early ’60s, led by Washington, D.C.–born vocalist-songwriter William “Poogie” Hart. The original lineup included lead vocalist Hart, his brother Wilbert singing baritone, Ricky Johnson singing bass, and second tenor Richard Daniels. In 1965, Daniels and Johnson left, and the Harts added tenor man Randy Cain and moved on as a trio.

In 1968 Bell and the Delfonics cut William Hart’s “La La Means I Love You” (the title sentiment was inspired by a phrase Hart heard his young son utter one night), a song that combined Bell’s symphonic soul arrangement, the trio’s close-knit harmonizing, and Hart’s smooth, seductive lead vocal. “Ready or Not Here I Come (Can’t Hide from Love)” put the trio back on the charts in 1969, in advance of its defining, and monster, hit, 1970’s “Didn’t I (Blow Your Mind This Time),” a Top 10 pop single that was even bigger than its chart position, or its Grammy Award for Best R&B Performance of 1970, indicated. It was most certainly the first pop hit to put the phrase “blow your mind” into a romantic context, free of even the most remote drug connotations, and Hart’s gently pleading, soft-as-satin reading of the lyric “I gave my heart and soul to you, girl/Now didn’t I do it, baby, didn’t I do it, baby.”

The group’s eponymous fourth album, led by “Didn’t I (Blow Your Mind This Time),” yielded no less than five hit singles (out of only 10 cuts), and stands as the definitive statement of the Delfonics–Thom Bell collaboration. For one, the trio was at its absolute vocal peak in these sessions, love men to the hilt on the ballads, and testosterone-fueled go-getters on frantic uptempo fare such as “Funny Feeling,” a soul workout spiced with psychedelic flourishes. Even nonsingle tracks that may have been intended as filler reveal the trio’s pride in craftsmanship and ability to wring all the emotion out of a lyric—witness the breathtaking flight of William Hart’s falsetto on “Delfonics’ Theme (How Could You),” a rather drab title masking a potent performance.

Long after the Delfonics disbanded, William Hart resurfaced in 1990, along with Major Harris and another vocalist, Frank Washington, and returned to the studio to cut the album *Forever New* for the Volt label. Harris, and especially Hart, were in good form vocally, but the album sounds dated. Producer Fred Pittman, who also cowrote a number of the songs, seemed ready to relegate the reconstituted Delfonics to the Vegas lounge circuit with his and Preston Glass’s stillborn, simplistic arrangements and melodramatic lyrics better suited for a Hallmark greeting card than for vocalists of Hart’s and Harris’ stature.

One could do worse than to buy *The Delfonics* and leave it at that. But then, the Buddha/BMG reissues of the group’s other two Bell-produced early albums, *The Sound of Sexy Soul* and its debut, *La La Means I Love You,* merit close inspection as well. The latter contains Top 40 hits (“I’m Sorry,” “Break Your Promise”) and a couple of interesting covers of Hal David/Burt Bacharach songs (“Alfie” and “The Look of Love”) that seem to be Bell’s way of tipping his hat to one of his primary influences. Like the other Buddha/BMG reissues, new liner notes bring the listener up to speed on the course of the Delfonics’ career and the music at issue, and complete discography info is published as well.

The Sound of Sexy Soul, the group’s second album (the third was a greatest-hits album), contains a few more crossover hits in “Somebody Loves You” and “Ready or Not Here I Come,” and some inspired cover choices among its dozen tracks. Marvin Gaye’s “Ain’t That Peculiar” is done close to the Motown style of Gaye’s original single, oddly enough, whereas “Scarborough Fair” finds Bell and the trio dabbling in psychedelia, albeit less effectively than they would on *The Delfonics’* “Funny Feeling.” Finally, for those who prefer their Delfonics straight, no ephemera, Arista’s aptly titled *La-La Means I Love You: The Definitive Collection* is the winning ticket. All the hits are here, supplemented by the cream of the album tracks, including “Delfonics’ Theme (How Could You).” —D.M.

The Dells

★★★★	There Is (1968; Chess/MCA, 1989)
★★★½	The Dells vs. the Dramatics (1974; Chess/MCA, 1997)
★★★½	Music From the Motion Picture: The Five Heartbeats (Virgin, 1991)
★★★	Passionate Breezes: The Best of the Dells 1975–1991 (Mercury, 1995)
★★★½	Oh What a Night: The Great Ballads (MCA, 1998)
★★★★	Anthology (Hip-O, 1999)
★★★½	The Millennium Collection (MCA, 2000)
★★★½	Ultimate Collection (Hip-O, 2004)

In 1956, this Chicago harmony quintet scored with the elegant, sexy “Oh, What a Night.” The Dells’ followup hit came twelve years later; “Stay in My Corner” is a standard-issue lover’s plea lifted by its dynamic vocal arrangement and Marvin Junior’s warm baritone. When the group reemerged on Chess later in the ’60s, after knocking around on several independents, its bold new sound left that classic street-corner casualness far behind. A full quotient of strings and horns contrast and emphasize the play of voices. When everything falls into place, as it does on the heaven-bound “There Is,” the Dells’ harmonies rumble and flash like an approaching storm. *There Is* duplicates the original Cadet LP. The leaner sound of early '70s soul nuggets like "Give Your Baby a Standing Ovation" and "Bring Back the Love of Yesterday" offsets the remade earlier hits: The Dells explain doo-wop to people too young to remember the real thing.

For a pickup match, *The Dells Vs. the Dramatics* never lapses into hot-dog tricks. Sensitive arrangements carry the day: "Love Is Missing From Our Lives" is clearly a duet between two harmony groups, not two lead singers. Dramatics main man Ron Banks erupts with gruff, joyous Stax soul on "Choosing Up On You," but the Dells' Marvin Junior invests "Strung Out Over You" with tragic, helpless beauty. This battle royal comes out a draw—everyone's a winner. The Dells' more recent—and far less necessary—efforts on Mercury and Private have fallen out of print. But once again, this veteran group rebounded: "A Heart Is a House for Love," taken from the *Five Heartbeats* soundtrack, sounds comfortable and assured on the 1991 R&B charts. The best available compilation, *Anthology,* collects all the essential Cadet sides as well as their fine later singles onto two discs. —M.C./G.F.

The Dell Vikings

★★★★ For Collectors Only (Collectables, 1992)
★★★★ 1956 Audition Tapes (Collectables, 1993)
★★★½ Golden Classics (Collectables, 1993)

One of the first interracial groups in rock & roll history, the Dell Vikings assembled in 1955 when all five of its original members were stationed at the same air force base in Pittsburgh. Signed to the local Fee Bee label, the group notched 15 charting hits, the most enduring being two Top 10 hits from 1957, "Come Go With Me" and "Whispering Bells," both featuring complex vocal parts, driving rhythms, imaginative production, and the plaintive, soaring lead vocals of tenor Kripp Johnson. When the group tried to jump to the greener pastures of a major-label affiliation with Mercury (which had been scoring big with the Platters), Johnson, who was of legal age when the group signed with Fee Bee, couldn't get out of his contract; his mates, on the other hand, had all been underage and were free to go. Johnson then formed a new Dell Vikings, which included Chuck Jackson, who would find greater success as a solo artist in the early '60s with "I Don't Want to Cry" and "Any Day Now," two of the decade's finest pop-soul singles. A court ruling allowed Mercury's group to use the Dell Vikings name, so Johnson changed his group's name to the Versitiles. Not that it mattered in either case: Neither Mercury's Dell Vikings nor Johnson's Versitiles had a hit, and by 1960, both were history.

The original Dell Vikings left behind some wonderful recordings—wonderful then and remarkable still for their exuberance, energy, and sheer musicality. For a total immersion in all things Dell Viking, try Collectables' two-disc overview, *For Collectors Only,* which includes not only the two indelible hits, but outtakes, a couple of alternate takes, the audition tape of "Come Go With Me," and an a cappella rendition of the delightful group-harmony bopper, "Cry Baby." The less ambitious *Golden Classics* also includes the two essential hits, and a number of lesser-known gems such as a heartrending version of "Over the Rainbow."

The most curious Dell Vikings entry is *1956 Audition Tapes,* which may or may not be a true audition tape (there's no credible evidence in either direction). On the other hand, even demos are expected to show some professional polish, and this one does: The voices are rich and personable, the arrangements note-perfect but not lacking vitality or youthful zeal; there's nary a false note or ragged edge anywhere, and the harmonies are intricate and layered, worked out to their final form. A disc jockey who identifies himself as Barry Kay of WJAS in Pittsburgh introduces the tape and crops up between songs with brief commentary on the next tune's origins; at the end of the disc he advises, "This is just an audition tape; we used only drums and electric guitar. Now it's up to you."

Well, drums and electric guitar do show up, but the instruments are often mixed so low that the vocalists sound as if they're performing a cappella. What these performances do show, indisputably, is a group rooted in a close, sweet harmony sound far less percussive than the approach that made their Fee Bee recordings irresistible. Although *1956 Audition Tapes* isn't the Holy Grail of doo-wop, it is a fascinating document of some formative experiments in adapting the doo-wop ethos to a pop sensibility. —D.M.

Del tha Funkee Homosapien

★★★★ I Wish My Brother George Was Here (Elektra, 1991)
★★★★ No Need for Alarm (Elektra, 1994)
★★★½ Both Sides of the Brain (Red Urban, 2000)
★★★ Deltron 3030 (75 Ark, 2000)
★★★½ The Best of Del tha Funkee Homosapien: The Elektra Years (Rhino, 2004)

With his lip ring, sweat-crusted baseball cap, and taste for mushrooms and video-game marathons, Del tha Funkee Homosapien was a prime couch-potato candidate. And while Del's indulgences contributed to his sketchy rep as a live performer and probably factored into his extended '90s hiatus, the rapper born Teren

Delvon Jones is a funny, socially conscious iconoclast who nearly single-handedly presented an alternative to the gangsta rap that ruled the West Coast when he emerged. Del even had some gangsta connections. His cousin Ice Cube (Del appeared for about three seconds in "Turn Off the Radio" on *AmeriKKKa's Most Wanted*) helped produce Del's debut album, *I Wish My Brother George Was Here,* which rolled along on fat Funkadelic samples. No other P-Funkcentric rapper embodied George Clinton's mix of social consciousness and scatological hilarity quite like Del. With a voice seemingly suffering from slight sinusitis, Del laid down nonsensical character-sketch classics such as his classic single, "Mistadobalina" ("The way you're on my dick must really hurt your knees"), "Dr. Bombay," slacker send-off "Sleepin' on My Couch," and Donald Byrd–sampling "Ya Lil' Crumbsnatchers," making a truly timeless debut that was playful and serious. (As he said on "Ahonetwo, Ahonetwo": "It pays to steal a groovy sample from the archives/ Use my mental staff to eliminate apartheid").

The underrated followup *No Need for Alarm,* with tracks like "Wack MC's" and "Booboo Heads," came ready to battle; it lacked the debut's crossover appeal, which was cool with Del but not so agreeable with his record company. Dropped by Elektra, Del indulged in a five-year "lost weekend" (sightings placed him working as a stock boy at a record store in Berkeley), commiserating with his fellow Hieroglyphics crew members Casual and Souls of Mischief, who'd undergone their own major-label horror stories.

In 1998, Del surfaced on the cassette-only *Future Development,* released in-house on Hiero Imperium. The new millennium saw Del reemerge big-time with the bugged-out self-produced *Both Sides of the Brain* (guests include El-P and Casual) and with Dan the Automator and Kid Koala in the group Deltron 3030. And in 2001, Del had the biggest hit of his career with Gorillaz, a project headed by Britpop stalwart Damon Albarn, of Blur, whose creeping dubby single "Clint Eastwood" featuring Del was a #1 hit in the U.K. While Del's *Best* mines only his Elektra era, it excavates "Undisputed Champs," on which Del and Q-Tip trade great verses, giving fans cause to exalt, in the words of Bob Dobalina, "Glory Hallastoopid!" —P.R.

Iris DeMent

★★★½ Infamous Angel (Philo, 1992; Warner Bros., 1993)
★★★★ My Life (Warner Bros., 1994)
★★★ The Way I Should (Warner Bros., 1996)

The youngest of 14 children born to an Arkansas farm family, Iris DeMent makes music that reflects those humble origins, bridging the gap between old-timey mountain soul and the lyricism of contemporary singer/songwriter folk rock. Her first two albums are luminous, bare-bones affairs, with a drummerless string band framing DeMent's songs, which celebrate the commonplace with uncommon eloquence. On *Infamous Angel,* she avoids the drinkin' and romancin' songs of country clichés to celebrate faith, love, rural simplicity, and singin' along to the country radio. But this yearning for clarity is muddled by doubt: "Let the Mystery Be" brings an agnostic's skepticism to DeMent's Pentacostal upbringing, and in "Our Town" she assumes the perspective of a much older woman forced to move on because of economic hard times. DeMent's voice—a heartbreakingly pure soprano—embodies that sense of lost innocence.

Even though its stripped-down acoustic arrangements are nearly identical to the debut's, *My Life* digs even deeper into the metaphysical with songwriting that is more consistently strong. DeMent's originals ring with timeless longing, even when stacked alongside a couple of beauties drawn from Maybelle Carter, an obvious inspiration, and Lefty Frizzell.

The Way I Should casts off the pristine, highly introspective tone—and the prerock string-band sound that accompanied it—for a more world-wise approach, but the results are mixed. The musical accompaniment is more varied and punchier, thanks in part to the first-time appearance of a drummer on a DeMent record. The more aggressive sound is matched by a new sense of freedom in DeMent's singing, whether she's bringing a hymnlike ardor to "There's a Wall in Washington" or trading bluesy yowls with Delbert McClinton on "Trouble." But the socially conscious themes of "Quality Time" and "Wasteland of the Free" come off more as complaints, and introduce an unseemly element of finger-pointing into DeMent's lexicon. —G.K.

Sandy Denny

★★½ Fotheringay (Island, 1970)
★★★ The North Star Grassman and the Ravens (1971; Hannibal, 1991)
★★★★ Sandy (A&M, 1972)
★★★ Like an Old Fashioned Waltz (1973; Hannibal, 1991)
★★★ Rendezvous (1977; Hannibal, 1991)
★★★★ The Best of Sandy Denny (Hannibal, 1987)
★★★ Sandy Denny and the Strawbs (Hannibal, 1991)
★★★ Gold Dust: Live at the Royalty Theater (PolyGram, 1998)
★★★★ No More Sad Refrains (A&M, 2000)
★★½ Listen, Listen (PolyGram, 2000)

★★★	The Original Sandy Denny (Trojan, 2001)
★★	The Millennium Collection (Universal, 2002)

One of the finest singers England has ever produced, Sandy Denny was a linchpin of the original Fairport Convention. Delivering, alongside Richard Thompson and Ian Matthews, a radical mixture of Dylan covers and Renaissance music, she helped make Fairport leaders of Britain's '60s Olde Musik revival. Her earliest recordings, issued now as *The Original Sandy Denny,* are straight-folk workouts with mostly just voice and guitar digging into a revealing selection of cover tunes ("Pretty Polly," "Last Thing on My Mind"). Some may prefer its simple purity to Denny's next batch of work, from when she was briefly a member of a sort of lesser Fairport, the Strawbs.

Hannibal's *Sandy Denny and the Strawbs,* a 1991 reissue of their unreleased 1967 tapes, captures exactly her early promise—on assured folk numbers by Dave Cousins, she sings with unerring precision, her bell-like delivery coming across as a very natural gift. *No More Sad Refrains* includes selections from her Fairport work—and while the individual albums represented *(Unhalfbricking, Liege and Lief)* remain essential—the compilation's choices do her justice.

After Fairport, she formed Fotheringay, whose style continued along the lines of lutes 'n' flutes. *The North Star Grassman and the Ravens* is her final triumph of the style, making way for the fine modern folk of *Sandy* and *Like an Old Fashioned Waltz* (the latter features a deft remake of Cahn-Chaplin's "Until the Real Thing Comes Along," suggesting a never-developed jazz direction). Casting her as pop singer didn't quite work on *Rendezvous*—the album is dogged by a busy "Candle in the Wind" and a merely capable "Silver Threads and Golden Needles." Although a classy single-disc distillation is available as an import, Denny's glorious three-CD retrospective, *Who Knows Where the Time Goes?,* is now out of print, which leaves the double-CD *No More Sad Refrains* to present her work with the Fairport and Fotheringay as well as solo recordings (including some demos and rarities). The PolyGram import *Listen, Listen* gets its survey onto one disc, but the pure-solo-career selection doesn't do Denny justice. Avoid the cheap but shamefully brief *Millennium Collection.*

In a tragic accident, Denny died in 1978 after falling down a flight of stairs. *Gold Dust: Live at the Royalty Theater* draws on her last concert, when she was fighting a cold and with wobbly sound quality. With some parts now rerecorded and the tapes cleaned up, it's a treasure for committed fans, because so little live Denny is available. Today's neofolkies owe her a debt, and all those enthralled by Eva Cassidy should pounce posthaste onto *No More Sad Refrains.* —P.E./M.M.

Depeche Mode

Ask average people about Depeche Mode, and they might give you responses such as "synthesizers," "gloom," "doom," "depressed," and "my soul is a sea of sin." But the most common reply will be, "Jesus, are they still around?" The answer is yes, and always will be. Depeche Mode has outlived its logical career span by more than 20 years now, still bringing the 1980s-style heat for their devoted cult. Black leather? Stylish hair? White jeans? Synth beats? All there.

Original mastermind Vince Clarke departed after just one album, *Speak and Spell,* which included the immortal hits "Dreaming of Me," "New Life," and "Just Can't Get Enough." Clarke went on to found Yaz and Erasure, remaining one of pop's top songwriters. But against all odds, Depeche Mode rolled on with Martin Gore composing and David Gahan singing. "See You," their first hit without Vince Clarke, was a masterpiece of Bowie-style new-wave erotics, longing for an invisible lover to heal the pain of getting ignored by physical heartbreakers. The hits kept coming, dividing roughly into songs about decadent sex rituals ("Work Hard," "More Than a Party") and songs about needing a good cry ("Somebody," "Blasphemous Rumors").

The Depechies scored a big U.S. crossover hit in the summer of 1985 with "People Are People," despite the fact that other Brit synth boys were going down like lambs to the slaughter. The band still wasn't getting any respect, but it packed arenas with black-clad Catholic schoolgirls who could sing all the words to "Master and Servant." It was time for an artistic statement: the trilogy of *Black Celebration,* *Music for the Masses,* and *Violator.* Even Modephobes have to admit how brilliant these albums are. *Black Celebration* answers "A Question of Lust" with the New Romantic power ballad "Stripped," on which Dave Gahan seethes over and over, "Let me see you stripped down to the bone." *Music for the Masses* amps up the kinky/morbid fun for "I Want You Now," "Little 15," and "Pleasure Little Treasure," which apparently inspired the hook of Sonic Youth's "Teen Age Riot." The songs are mostly about heavy-breathing, trouser-swapping car adventures—and judging from the king-size whomp of "Never Let Me Down Again" and "Behind the Wheel," Dave was getting some serious mileage. *Violator* was an even bigger hit, featuring the rock-guitar shuffle "Personal Jesus." It was crazy to leave "Sea of Sin" and "Happiest Girl" off the album (both are stuck on the essential *World in My Eyes* 12-inch), but at least there's the closeted paranoia of "Policy of Truth." It's a lot, it's a lot, it's a lot like life.

The band had to retreat after Gahan almost drugged himself to death. But Depeche Mode's still-devoted cult embraces the recent records, including solo albums Gahan and Gore released in 2003. Of all the group's compilations, the sentimental fave is still the first, the 1985 *Catching Up With Depeche Mode,* but you can't go wrong with either *Singles '81–'85* or *Singles '86–'98.* Unfortunately, neither includes "But Not Tonight," the closing theme from the classic '80s Valley Girl flick *Modern Girls,* which you can still catch on late-night basic cable. The best recent Depeche is the Freelance Hellraiser's 2002 bootleg mash-up of "Just Can't Get Enough" and D-12's "Purple Pills"; Eminem sounds right at home over that perky synth beat, rapping, "Oh shit, now I started a mosh pit!" Depeche Mode's legendary *101* concert film finally came out on DVD in 2004, complete with extra performance footage and brand-new interviews with the group. Personal to Martin Gore: Love the new teeth! —R.S.

Derek and the Dominos

★★★★★	Layla and Other Assorted Love Songs (Uni/A&M, 1970)
★★★★	In Concert (RSO, 1973)
★★★★	The Layla Sessions (Uni/Mercury, 1990)
★★★★	Live at the Fillmore (Uni/Mercury, 1994)

An astonishing evocation of unrequited love, "Layla" is almost as celebrated for its real-life circumstances as for its emotionally involving sound. Written for the most part by Eric Clapton and inspired by the classical Persian love poem "Layla," the song sprung from a love triangle between Clapton, his best friend (George Harrison), and the best friend's wife (Patti Boyd). Heavy stuff, to be sure; indeed, Clapton later admitted that "being Derek was a cover for the fact that I was trying to steal someone else's wife." Of course, everyone knew Derek was Eric, just as they knew that the Dominos were the rhythm section Clapton had picked up through his association with Delaney & Bonnie. But it was just as obvious that the pain and longing expressed in the single was real, and that the genuine show of emotion put an edge on Clapton's vocals and fire in his guitar playing, helping his churning rhythm work throw sparks against the tart counterpoint of Duane Allman's slide. But it's Jim Gordon's stately, pastoral piano figure that has the final word, adding an air of hope and transcendence that seems almost to answer the pleas of the opening verses. Rarely do tragic love songs provide such a sense of redemption.

That isn't the only place such anguish comes across on *Layla and Other Assorted Love Songs*—"Have You Ever Loved a Woman" and "Why Does Love Got to Be So Sad" spring to mind—but the album isn't just an exploration of love denied. Instead, what *Layla* is ultimately about is the transformation of the blues, a process Clapton and his band mates manage through a variety of means. "Bell Bottom Blues," for instance, distills the pop-blues approach of Blind Faith and Cream into a memorable chorus and exquisite metaphor; "Tell the Truth" brings the white-soul groove Clapton mastered with Delaney & Bonnie to its fruition; while the exquisitely arranged "Little Wing" pulls a pathos (that even Hendrix missed) from the song.

As with any masterpiece, it wasn't easy to achieve such clarity of vision, and anyone wishing to hear just how much mediocre music had to be thrown away in making the album need only listen to the almost two and a quarter hours of outtakes and jam sessions included in *The Layla Sessions.* Although this 20th-anniversary-issue box set will doubtless be of interest to guitar fiends (thanks to more than an hour's worth of Clapton/Allman jams) and Clapton collectors, the sheer volume of material seems almost to lessen the original album's achievement. Great albums, it seems, are like sausage—you really *don't* want to know how they're made.

Live at the Fillmore expands on *In Concert,* and at least it has the advantage of a slightly different set list (one that includes Blind Faith's "Presence of the Lord" and three songs from Clapton's first solo album), but that isn't quite enough to overcome the interminable solos and often rambling playing. —J.D.C.

Descendents

★★★	Fat (SST, 1981)
★★★★	Milo Goes to College (SST, 1982)

★★★	Bonus Fat (SST, 1985)
★★★★	I Don't Want to Grow Up (SST, 1985)
★★	Enjoy (SST, 1986)
★★★	All (SST, 1987)
★★½	Liveage (SST, 1987)
★★★★	Two Things at Once (SST, 1988)
★★	Hallraker: Live! (SST, 1989)
★★★★	Somery (SST, 1991)
★★	Everything Sucks (Epitaph, 1996)
★★★	Cool to Be You (Fat Wreck, 2004)

As they say in *Spinal Tap,* it's such a fine line between stupid and clever. Los Angeles punk band Descendents knew exactly where that line was, and was always happy to cross it. At its best, the group was uniquely able to be silly and smart at the same time, turning childish rants about food, fucking, parents, and girls into tales of adolescent ennui. In a scene where you could only be cool if you were an outcast, vocalist Milo Auckerman easily occupied the role Angus Young fills in AC/DC; both band member and band mascot, whose persona is a pissed-off geek with a perpetual hard-on. Most of the band's album covers include a Bart Simpson–looking doodle that caricatures Auckerman, a cartoonishness well-suited to the band's extremes.

With their 1981 debut EP, *Fat,* Descendents established their ongoing MO—hyperspeed punk songs with lyrics like, "I like food, food is good." The original version of that record did not include the group's first single, "Ride the Wild" b/w "It's a Hectic World," recorded before Auckerman joined the group. Although those two cuts appear on *Bonus Fat,* they can't be considered much of a bonus. *Milo Goes to College* is all straight-ahead punk—15 songs in less than a half hour, each full of metally riffs and lightning-speed plucking by bassist Tony Lombardo, who was always the band's secret weapon. Much like the Who, Descendents often used the bass for melodies and the guitar to bash out a steady rhythm. *Parents* shows a British punk influence, with Auckerman spitting the complaint: "They don't even know I'm a boy/They treat me like a toy, but little do they know that one day I'll explode." Both *Fat* and *Milo Goes to College* were later repackaged as *Two Things at Once,* an essential introduction to the group.

After Milo really did go to college, Descendents regrouped in 1985, and the resultant album, *I Don't Want to Grow Up,* featured the most singable tunes the band had ever written. "Good Good Things," "In Love This Way," and "Can't Go Back" were positively sunny by Descendents standards; the Beach Boys–gone-punk vibe was an obvious precursor to Weezer. The real advance was their ability to give strong melodies to thrash songs: "My World" and "Silly Girl" border on heavy metal but leave out the goofy excess and include way more self-pity.

Enjoy is weak overall, due in part to Lombardo's departure, though mostly because of the scatological humor on the title track. ("Sniff my ass while I pass gas," goes but one pearl.) The album is rescued by a cover of the Beach Boys' "Wendy" and the band's own "Sour Grapes," on which Auckerman gets rejected by a snooty new-wave girl. *All* is often underrated because of the strange pseudo-arty instrumental tracks on its second half; nonetheless, the album features three of the band's best songs, "Cameage," "Coolidge," and "Clean Sheets." The subjects are perennial, but Auckerman's sophistication as a lyricist has grown. "Coolidge" is about accepting one's uncoolness, and "Clean Sheets" talks of being forced to sleep on the floor after a lover's infidelity sullies the sheets.

Given its superior selection of songs, *Liveage* is the better of the band's two concert recordings; but Descendents weren't the kind of band to switch things up in concert, and these albums are for completists only. By contrast, the 1991 anthology, *Somery,* is the only Descendents record to qualify as must-have. It's got virtually all of the winning songs, from the goofy hardcore tunes like "Kids," "Weinerschnitzel," and "My Dad Sucks" to the more commercial-sounding rockers like "Hope," "Silly Girl," and "Sour Grapes."

For some unforgivable reason, the band reformed in 1996 with *All* bassist Karl Alvarez and guitarist Stephen Egerton. Their new album, *Everything Sucks,* lived up to its name. *Cool to Be You* (2004), on the other hand, finds the band sticking their toes into more adult themes (divorce, dead parents, complaints that "punk rock won't pay my bills"), amid some formidable hooks. —J.E.

Jackie DeShannon

★★★	The Very Best of Jackie DeShannon (Collectables, 1996)
★★	You Know Me (Jag/Varèse Sarabande, 2000)
★★★½	Best of Jackie DeShannon, 1958–1980; Come and Get Me (Raven, 2000)
★★★	Classic Masters (Capitol, 2002)

Jackie DeShannon scored massive hits in 1965 and 1969 with Burt Bacharach and Hal David's "What the World Needs Now Is Love" and her own "Put a Little Love in Your Heart"—but despite possessing a terrific, sexy-hoarse singing style, and releasing a number of instrumentally impressive albums (which have all fallen out of print), she has remained a behind-the-scenes wonder, best known for her songwriting.

DeShannon was born in Kentucky but moved to L.A. when she was 16, and began churning out hits for Brenda Lee and collaborating with Randy Newman and Phil Spector cohort Jack Nitzsche. Her early singles were orchestral-rock gems such as "When You Walk in the Room," which was a hit for the Searchers. For a while she turned out note-perfect Supremes homages ("Love Is Leading Me," "Are You Ready for This") before going the singer/songwriter route in the late '60s. In the early '70s she produced top-notch country rock, and in 1975 cowrote "Bette Davis Eyes," the song that made Kim Carnes a star. DeShannon's solo albums aren't easy to find; *You Know Me* is fine later work. The Raven collection is nice: nearly 30 cuts of prime popcraft; the Capitol best-of only scratches the surface. —P.E.

Destiny's Child

★★★	Destiny's Child (Columbia, 1998)
★★★★	The Writing's on the Wall (Columbia, 1999)
★★★½	Survivor (Columbia, 2001)
★★	8 Days of Christmas (Columbia, 2001)

Beyoncé

★★★★	Dangerously in Love (Sony, 2003)

Trying to keep track of who's in Destiny's Child is almost as hard as trying to get "Say My Name" out of your head. The Houston R&B gals aren't just a pop group, they're a soap opera, each hit single another chapter in their ongoing saga of lineup changes, lawsuits, sex, shopping, gossip, and all-around fabulousness. The star is Beyoncé Knowles. Her father is the manager, and her mother is the stylist. With her oft-nervous-looking band mates, Michelle (formerly Tenetria) Williams and Kelly (formerly Kelendria) Rowland, she rules the radio with fluid R&B harmonies, skitter-skatter beats, and more floss than the American Dental Association. Their message to the world is a simple one: Bounce, baby, bounce! Shake, baby, shake! Twist, baby, twist! Oh, and stay in school!

Destiny's Child first appeared as a quartet with the 1998 hit "No, No, No," which wiggled seductively while begging the question, Since there are four ladies in the group, shouldn't that be "No, No, No, No"? Or is one still making up her mind? The first hit from *The Writing's on the Wall,* "Bills, Bills, Bills," took the same three-out-of-four-divas approach as "No, No, No," for a lackluster rip of TLC's "No Scrubs." But "Say My Name" (seething paranoia!) and "Jumpin', Jumpin' " (way, *way* down with O.P.P.!) were catchy enough to turn any no-no-no scrub into yeah-yeah-yeah paying customer. By the time of their *Charlie's Angels* theme, "Independent Women," the D-Child ladies were down to three, with some lovely parting gifts for the other contestants (thanks for the memories, Farrah; keep in touch, LaTavia; don't ever change, Toya). They were also on a major roll, saluting the kind of "Independent Women" who require an army of hair stylists, nail techs, and publicists just to clear their throats.

"Survivor" should have been called "Survivor, Survivor, Survivor." The ladies kissed off their former band mates with the immortal words, "I'm not gonna dis you on the Internet/'Cause my mama taught me better than that." But mama didn't teach them a thing about jelly, so it was time for "Bootylicious," an absolutely filthy sugar-walls anthem set to a Stevie Nicks guitar sample. All that remained to establish Destiny's Child as an American institution was (1) a pathetic performance at George W. Bush's inauguration, and (2) a Christmas album, both of which were accomplished in 2001. Overall, *The Writing's on the Wall* is a little catchier than *Survivor,* and remains the one to get until the inevitable greatest-hits album, which will be a doozy. Recommended title: *Beyoncé, Beyoncé, Beyoncé!*

Beyoncé finally made her solo debut in the summer of 2003, *Dangerously in Love,* and although she didn't have any other songs as great as "Crazy in Love," she didn't need any. "Crazy in Love" made Beyoncé the most important person in the world for a few months, a position she will no doubt continue to hold intermittently for the rest of her life. —R.S.

Devo

★★★★	Q: Are We Not Men? A: We Are Devo (Warner Bros., 1978)

★★★½	Pioneers Who Got Scalped (Warner Bros., 2000)

Devo was a highly elaborate and pretty good joke. Embarking on a furious, mystic mission to redeem rock of its signature "excesses"—passion, rhythm, tunefulness, and aspirations to meaning—these '80s postmodernists dubbed themselves "suburban robots here to entertain corporate life forms." The product of a sensibility spun from William Burroughs, Andy Warhol, Kraftwerk, and drive-in sci-fi, Devo's vigorous embrace of technology paid off in hilarious, deadpan videos, daffy futuristic uniforms, and a neat mythology: With its mascot/idol the Kewpie-freak Booji Boy, the Devo shtick celebrated "de-evolutionized" blankness, as the corporation replaces love and family, and the microchip fills in for the soul.

Like most radical gestures, Devo was best in its first flexing. *Q: Are We Not Men? A: We Are Devo* was a brilliant hoot, with the fearsome five clinically deconstructing the Stones' "Satisfaction" and, in "Mongoloid" and "Jocko Homo," penning anthems to hail the victory of aliens over animals. The group's snappiest single was *Freedom of Choice*'s "Whip It"; its danceability seemed almost to subvert the tight-hipped Devo ideology, or to suggest that even androids sometimes like to funk it up. "Through Being Cool," off *New Traditionalists,* is swift; it celebrates sheer wimpery. The album also boasts one of the band's patented, debunking covers: Lee Dorsey's "Working in the Coalmine," done with an assembly-line sense of swing. The rest of *Devo* is the same gestalt, funny but monochromatic. Devo's overall cultural significance remains significant, however—they unleashed computer-nerd chic. —P.E.

The Jewish Elvis achieved his greatest artistic transcendence on the cover of his live album *Hot August Night.* Look at him: Neil Diamond, at one with the music. His head bows in reverence and his hair forms a halo above his silver-studded blue-denim jumpsuit, as yet another classic Neil tune explodes from his lungs. The soft-rock balladeer has earned his reputation as a master of crowd-pleasing showmanship. He is Brother Love, he is love at the Greek, he is love on the rocks. He is the sun, he is the moon, he is the words, and we are his tune. Reaching out. Touching me. Touching you. And no matter what he does, Neil Diamond exudes that raw sexual magnetism that never fails to keep Rosie cracklin', Holly holy, and Caroline sweet.

Diamond began in the '60s as a New York singer/songwriter; he was already on the charts himself by the time the Monkees had a #1 hit with his "I'm a Believer." His early Bang records output was a lean, mean run of catchy folk-rock hits like "Cherry Cherry," "Girl, You'll Be a Woman Soon," and "Red, Red Wine." He had a weird side from the beginning, manifested by lesser-known tunes such as "Two Bit Manchild" and "Crunchy Granola Suite." By the late '60s, he had recorded standards like "Sweet Caroline" and the genuinely demented "Brother Love's Traveling Salvation Show." He got more serious in the '70s, beginning with the over-the-top talking-chair soliloquy "I Am . . . I Said." His double-live *Hot August Night* is the triumph of Neilness; musically, it's a bit lax compared to the studio work, but it's festive, and the audio experience is considerably enhanced by the excellent back-cover notes ("ELECTRIC . . . his audience falls like plums at his feet!").

The hits rolled on: the ominous, mysterious "If You Know What I Mean," a sex-and-death torch song worthy of Nick Cave; "Desiree," where Neil confesses, "I became a man at the hands of a girl almost twice my age"; "Forever in Blue Jeans," with the line "Honey's sweet/But it ain't nothin' next to baby's treat" defining a new Neil lyrical sublime. By all accounts one of the true gentlemen in the music biz, Diamond keeps on keeping on. It would be ideal to have a succinct two-CD summary of his early hits, but none exists yet; the deceptively titled *Greatest Hits (1966–1992)* includes 13 inferior live remakes. If you're willing to shell out box-set money, the three-disc *In My Lifetime* at least keeps it strictly business with the real versions of the right songs; good to bear in mind for when your mom is having a bad day. Otherwise, 1983's *Classics: The Early Years* has the great Bang material; the 1999 *Collection* takes you from 1968 to 1972, with *Glory Road* a more expansive two-CD version; 1982's *12 Greatest Hits, Vol. 2* tells the rest of the story. His film work includes *The Last Waltz* (why he was there has never been explained), *The Jazz Singer* (featuring the hit "America"), and *Saving Silverman.* —R.S.

The Dictators

★★★★	Go Girl Crazy! (1975; Norton, 2003)
★★★	Manifest Destiny (East West, 1977)
★★★	Bloodbrothers (1978; Dictators Multimedia, 1998)
★★★	New York, New York (1981; ROIR, 1998)
★★★½	D.F.F.D. (Dictators Multimedia, 2001)

These hard-partying wrestling fans from the Bronx—singer "Handsome" Dick Manitoba, bassist-singer Andy Shernoff, and guitarist Scott "Top 10" Kempner, principally—never quite fit in with the NYC punk scene they helped create. Like the New York Dolls pumped with testosterone and laughing gas, the Dictators swaggered through three albums of sloppy, catchy-as-fuck novelty tunes, then disappeared, only to release one of their best discs 20 years later. *Go Girl Crazy!* set the template with its ironic, offensive, but never nihilistic lampoon of white urban culture. There are two types of songs: beach-life fantasies lifted straight from the '60s—"(I Live for) Cars and Girls," with its sunny drive and faux–Beach Boys harmonizing, and crass surf shouter "California Sun"—and rousing, square-baiting goofs like "Master Race Rock" and "Back to Africa." There's also a deadpan—and actually very pretty—cover of "I Got You Babe." The best thing about *Manifest Destiny* is the scorching cover of the Stooges' "Search and Destroy." On *Bloodbrothers,* "Handsome" Dick Manitoba maintains his brilliantly ragged bluster. But the album suffers from the ponderous influence of late '70s metal, and the jokes, while mostly warm and good-humored, aren't always silly enough to sustain themselves. For *D.F.F.D.,* their postmillennial comeback, the Dictators wisely ditched the over-the-top gags in favor of airtight blasts of early punk attitude buoyed by shout-along melodies and hilariously acid put-downs. The only hint of nostalgia is on "Who Will Save Rock and Roll?"; for the band's no-nonsense worldview, skip to the canonworthy "I Am Right!" and "Pussy and Money." Hint: The latter's "What's it all about?" is a rhetorical question. You'd have to ask them why they reunited when there's so little money to be made. —N.C.

Bo Diddley

★★★★	Bo Diddley/Go Bo Diddley (1958, 1959; Chess, 1987)
★	Live (1975; Triple X, 1994)
★★½	The Mighty Bo Diddley (1985; Triple X, 1994)

★★★★	Superblues: Bo Diddley, Muddy Waters and Little Walter (Chess, 1986)
★★★★	The Chess Box (Chess, 1990)
★★	This Should Not Be (Triple X, 1992)
★★½	Promises (Triple X, 1994)
★★	A Man Amongst Men (Code Blue/Atlantic, 1996)
★★½	Mona (Drive, 1996)
★★★★	His Best (Chess, 1997)
★★★½	The Millennium Collection: The Best of Bo Diddley (MCA, 2000)

In the beginning, Bo Diddley took a simple shave-and-a-haircut-six-bits rhythm and covered it with layer upon layer of rhythmic variation, courtesy of Jerome Green's maracas and his own tremolo-heavy guitar, on which he played two different rhythms simultaneously. Having created form, he added complexity in myriad harmonic and textural conceits. Then he brought his world to life in song by blending gospel and blues, and spicing these bedrock ingredients with quotes from black street-corner culture ("Say Man" being an early example of Diddley's use of "the dozens," ritualized insults, boasts, and dares). Bringing it all home in a deep, confident baritone vocal strut, the fellow born Ellas McDaniel in McComb, MS, became the absolute ruler of his dominion, an artist whose sound remains a touchstone for rock & roll guitarists and percussionists, and whose standing as "500 percent more man," as he asserted in one of his memorable lyric flights, remains unassailed four decades after "Say Man" became his sole Top 40 hit.

The logical place to begin assessing Diddley's work is *The Chess Box,* two CDs containing 45 tracks recorded between 1955 and 1968, including all the best-known songs—"Who Do You Love," "I'm a Man/Bo Diddley," "Mona," "Say Man," an extended version of "Signifying Blues"—as well as a host of alternate takes, B sides, and previously unreleased tracks. In the set's accompanying booklet, critic Robert Palmer offers a rigorous, authoritative dissection of Diddley's music, demanding the artist's oeuvre be reconsidered in serious musicological terms.

The Chess Box may be the alpha and omega of Diddley's output, but anyone inspired by Palmer's essay to look for further justification of Diddley's genius will find ample rewards in the catalogue (despite the white-hot *Bo Diddley Is a Gunslinger* having been deleted). Near the top of the A-list is *The Super Super Blues Band,* teaming Diddley with Muddy Waters and Howlin' Wolf on a fabulous set of raw, electric blues, with all three participants toasting each other at every turn. For sheer drive, few albums approach the jiving, juking, incendiary summit meeting heard on *Superblues.* Diddley, Muddy Waters, and Little Walter Jacobs play like men on a mission, talking trash and spurring each other on to more resonant performances. The version of Diddley's "Who Do You Love" included here is the model for the raging, near-meltdown performance of the tune that Diddley delivered on the *La Bamba* soundtrack. Jacobs blows low and mean behind Diddley and Waters on "I'm a Man," as the two guitarists spar instrumentally and verbally. Diddley's first two album releases, *Bo Diddley* and *Go Bo Diddley,* are now available in a twofer CD and represent in 24 tracks prime early Diddley; this is a good alternative to the more expensive box set for anyone on a limited budget or with only a casual interest in Diddley's work, as it contains a number of the best-known sides as well as scintillating items such as "Diddy Wah Diddy" and "Before You Accuse Me." By far the best single-disc summation of Diddley's Chess years is the 20-song *His Best,* a 1997 release that speaks the Diddley lingua franca from its first essential cut—"Bo Diddley," of course—to the final heated notes of the last cut, "Ooh Baby." A more concise but less satisfying overview of the most familiar material is provided on the 12-song *The Millennium Collection: The Best of Bo Diddley,* which includes "Bo Diddley," "I'm a Man," "Say Man," "Mona," and "Can't Judge a Book by Its Cover" among its marquee songs. Drive's *Mona* long player is even skimpier, but the 10 tracks are choice, among them the title cut, another Jerome Green showcase in "Bring It to Jerome," and a couple of tenderhearted Diddley paeans in "I'm Sorry" and "Tonight Is Ours."

In the early '90s, Diddley found a home on Triple X Records, with fair to middling results. At the desultory end of the scale, *Bo Diddley Live,* originally released in 1975, is five tracks of pointless jamming over steadily percolating P-Funk-influenced rhythms. At no point does Diddley distinguish himself on guitar in this mess, and one can only imagine how dreary a night it must have been for the audience as the noodling went on ad nauseam, rarely broken up by flashes of the headliner's lyrical wit or hilarious self-aggrandizement. This album comprises five songs, the shortest running slightly under 10 minutes, the longest a shade over 12 minutes. Later Diddley released *Mighty Bo Diddley,* a stronger effort in that it features some good new original songs and a few instrumental sparks from Diddley himself. Lascivious as ever, Diddley busts a move on the now-aging Mona's sister, in "Mona, Where's Your Sister," and gets in the face of an imagined competitor in "I Don't Know Where I've Been," an uptempo 12-bar blues effort that would have been right at home in Muddy Waters' repertoire. Before taking off on a stinging solo turn, Diddley warns, "I'm gonna make my guitar fit yo' head like a baseball cap!" One of the real treats on any Diddley album comes here, near the end, in a slow, deep, eight-bar blues, "Evil Woman," featuring a shouting, exasperated lead vocal—all B.B. King in style—and a series of tight, crying guitar solos, tart and angular with nary a superfluous note, that demonstrate the depth of feeling sometimes lost in the guitarist's customary flash. Caveat emptor: At this point, Diddley began displaying a social conscience in his lyrics, and these efforts, while well-meaning, are uniformly embarrassing. "Ain't It Good to Be Free" would like to have been Diddley's take on Merle Haggard's "Fightin' Side of Me," but it has nothing of the latter's wit or sense of purpose; "Gotta Be a Change" and "I Don't Want Your Welfare" ("If you wanna give me something/Give me a job," Diddley declares in the chorus) might have been compelling in third-person anecdotal form rather than first-person invective.

Over swirls of anthemlike electronic chords, Diddley's first words on the 1992 release, *This Should Not Be,* sound prescient post-9/11: "People of America/Our great nation is under attack/In this country/This should not be." He goes on to catalogue the social ills he sees around him—singling out hunger and homelessness—and extends the message of "this should not be" to every nation in the world. Prescience suddenly evolves into stridency, hardly whetting the appetite for what's ahead. Yet his other ventures into topicality are more measured and thus more convincing. "U Don't Look So Good" addresses a friend whose irresponsible behavior lands him behind bars; "Mind Yo Business" rails against invasions of privacy by casting the villains in the roles of nosy neighbors; hip-hop and gospel meet in "My Jesus Ain't Prejudice," Diddley's spoken-sung testimony of faith in a God whose love transcends racial boundaries and opposing philosophies. Elsewhere, Diddley gets down with some gutbucket rock & roll on "The Best," a vintage bit of manly bluster proclaiming his superior cocksmanship; makes a stylish foray into contemporary R&B love balladry in "Let Me Join Your World"; and gets with some Prince-inspired grooving on "U Ugly" (Prince seems to have influenced Bo's spelling of late, too). However effective these performances, though, Diddley the guitarist is buried beneath the electronic grooves, almost to the point of being inaudible. And what is a Bo Diddley album without Bo Diddley's guitar?

The title of his 1994 album, *Promises,* keyed to the song of the same name about a woman's duplicity, is more directly related to the overall theme of the rewards life holds for those who keep their heads on straight and stay straight at the same time. The title cut kicks off the set in sizzling fashion, with Tuck Tucker's soaring lap-steel lines adding some country funk to the foot-stomping Diddley beat. Diddley the writer delivers one of his strongest melodies ever and Diddley the singer accommodates it with a powerful, rocking vocal as the band wails behind him.

While retooling his signature rhythm for the electronic age in the swaggering (some might add "obnoxious") "I'm Gonna Get Your Girlfriend," Diddley addresses the younger generation in blunt terms on two songs inveighing against the lure of the street ("Kids Don't Do It" and "Hear What I'm Sayin' "), then closes the album with a troubling nightmare scenario suggested by the national colloquies on date rape (the cases of William Kennedy Smith and Mike Tyson spring to mind when Diddley plays out an imagined courtroom diatribe). In "She Wasn't Raped," Diddley the defendant declares to the jury, "That girl wasn't raped/She gave it up," and proceeds to plead his case over a wash of thumping electronic drums and angry, foreboding synthesizer retorts. Once again, the guitar is conspicuous by its absence. None of this amounts to much, though "She Wasn't Raped" has a certain brutal power in the righteous passion fueling Diddley's monologue. It's hard to fault the man for being engaged by the issues, but on this one he doesn't get it. Considering his own sexual posturing over the years, the "she gave it up" line in "She Wasn't Raped" is chilling in its insensitivity. She was asking for it, she wanted it—all those repugnant, disingenuous formulations meant to excuse irresponsible, sometimes criminal behavior. Such simplistic thinking is what caused the problem in the first place, Bo. —D.M.

Dido

★★★½	No Angel (Arista, 1999)
★★★	Life for Rent (Arista, 2003)

It is no coincidence that *No Angel* sounds surprisingly mature for a debut album. Before becoming an "overnight" global diva, the London-born Florian de Bounevialle Cloud Armstrong had already honed her musical skills with her brother Rollo's band Faithless. But it was *No Angel* that struck a universal chord with lovers of sophisticated, catchy dream-pop songs with trip-hop undertones (think Portishead-lite with a dash of Beth Orton charm and a hint of Sinéad O'Connor mysticism). Even Eminem liked "Thank You" enough to sample its first verse on his subsequent megahit "Stan." Dido's mellow approach and pretty melodies are a bit too laid-back to qualify as groundbreaking. But it would be cynical to altogether dismiss the *chanteuse*'s sincere intentions and gorgeous voice. In 2003, Dido avoided the sophomore slump with *Life for Rent,* a polished followup that reflected on her breakup with her fiancé while delivering dark pop gems such as the atmospheric "See the Sun." —E.L.

Ani DiFranco

★★★½	Ani DiFranco (Righteous Babe, 1990)

★★½	Educated Guess (Righteous Babe, 2004)

Ani DiFranco/Utah Phillips

★★★★ The Past Didn't Go Anywhere (Righteous Babe, 1996)
★★★½ Fellow Workers (Righteous Babe, 1999)

Ani DiFranco learned early to live by her wits. As a teenager, she worked her way around Buffalo, NY, folk clubs and relocated to NYC before she turned 20. Two things made her become a folksinger: It was cheap (all the overhead she needed was an acoustic guitar), and it didn't get in the way of her saying her piece. And she had a lot to say—when she cut her first homemade tape, something to sell at the clubs she played, her guitar wasn't much more than a prop that she assaulted between breaths, but her words were fully formed, deeply personal, and rigorously political, and there were a lot of them. But she wasn't a folkie, and despite her looks, she wasn't a punk, either—she was a complete, irreducible original.

Her first two albums were just girl with a guitar, and possibly the most arresting piece on them was "Not So Soft," where she laid the guitar down and just spoke her poem. But she already had all the mouth she would ever need, and she exuded enough presence to make you hang on her every word. A few years later, on *Like I Said,* she returned to those early songs, fleshing them out with newfound musical skills, but the improvement is minor. However, on *Imperfectly,* she starts working with other musicians, most notably drummer Andy Stochansky. This adds powder to the explosive "What If No One's Watching." But DiFranco's own musicianship had also made a great leap forward, as on "If It Isn't Her," with just Ani playing quirky guitar and singing, "I have been playing/Too many of them boy-girl games/She says honey you are safe here/This is a girl-girl thing."

The albums that followed—*Puddle Dive, Out of Range, Not a Pretty Girl, Dilate*—are full of sharply observed lyrics and increasingly innovative music; it's a remarkable series of albums. Meanwhile, DiFranco's intense fan base grew large enough to put her self-released albums on the charts, leading to the inevitable two-CD *Living in Clip,* an extraordinary career summation selected from various concerts with her trio (Stochansky on drums, Sara Lee on bass). The set works both as a greatest-hits and as a performance showcase—DiFranco's guitar, especially on "Out of Range," has the same urgency and definition that she's long demonstrated with her voice.

The next series of albums might be considered her progressive period: While the lyrics continue to reflect her political concerns, they are less clearly anchored in her personal life (or perhaps her personal life as a record-company exec just isn't interesting enough), but her expanding musical skills often make for compelling listening. *Little Plastic Castle* starts out with horns and a Latin beat, and winds up with the meditative "Pulse," with Jon Hassell on trumpet. *Up Up Up Up Up Up* is looser and jazzier, while *To the Teeth* meanders into rap ("Swing") and ska-punk ("Freakshow") and hard to say what else. The sprawling two-CD *Revelling/Reckoning* is less successful, its lyrics hiding behind the music instead of jumping out. The second live double, *So Much Shouting, So Much Laughter,* is a lot more fun, partly because it recycles a familiar songbook under the guise of documenting her new band with all the snazzy horns. But the set also restores some bite to her political songs, especially "Self-Evident," though even there she seems to have outgrown her early, intense fusion of the personal and the political, relegating her political impulses to the more conventional realm of protest songs. Another long protest-song poem, "Serpentine," adds topical relevancy to *Evolve,* but for once, the fancy music gets the best of the muted messages.

On the other hand, her all-solo move, *Educated Guess,* contorts her elegant wordplay over a sharply stinging acoustic guitar, then tortures both with birdlike vocal overdubs. The only pleasure here is when she just recites, or just plays.

The two Utah Phillips albums comprise a fascinating side project. *The Past Didn't Go Anywhere* starts with Phillips saying, "What I do is I collect stories," but then you notice that he's been sampled and looped—folk music as mix tape. The music is decidedly unfolkie synth drums and New Age guitar, which Phillips talks and lectures and hectors over. Fascinating stories, too, especially the ones about deserting from the Korean War and finding pacifism as a 12-step program. And he's observant enough to quote an old geezer on his wife's New Age bookstore: "No matter how New Age you get, old age's gonna kick your ass." *Fellow Workers* dispenses with the trip-hop for tales of Mother Jones and Joe Hill and some old-fashioned labor struggle sing-alongs. Which just serves to remind us that one of DiFranco's most important innovations has been to build her own record label—a rare case of a worker who owns the means of production. —T.H.

Digable Planets

★★★½ Reachin' (A New Refutation in Time and Space) (Pendulum, 1993)
★★★★ Blowout Comb (Pendulum, 1994)

In the early 1990s, while Suge Knight's Death Row records dominated hip-hop with artists like Dr. Dre and Tupac, Digable Planets chose the same high road that De La Soul and A Tribe Called Quest had already taken—they all but ignored gangsta culture. MCs Doodlebug, Butterfly, and the sweet-voiced Ladybug combined a positive vibe with jazz samples to create ultra-laid-back joints that provoked head bobbing rather than drive-bys. Their debut, *Reachin'*, invaded college boom boxes and birthed the Top 20 hit and Grammy winner "Rebirth of Slick (Cool Like Dat)." While *Reachin'* preached self-belief, it also waxed political with cuts like the pro-choice narrative "La Femme Fétal" and avoided substance altogether on the nonsensical "Appointment at the Fat Clinic." Some of the tracks on *Reachin'* follow Tribe's blueprint to the letter, but by the time they released their second record, *Blowout Comb*, the Digables had clearly found their own sound. *Blowout* plays like a treatise for good living, an ethic that includes real live instruments and seven-minute epics such as the Afrocentric "Black Ego." "The Art of Easing" picks up where "Rebirth of Slick" left off, and "Borough Check," which features Gang Starr's Guru and a Roy Ayers sample, is a territorial pissing that you can dance to. Although it contained no obvious single, *Blowout* still cracked the Top 40. The group wasn't as lucky, though, and the Digables disbanded in 1995 due to creative differences. —D.MA.

Digital Underground

★★★★	Sex Packets (Tommy Boy, 1990)
★★★★	Sons of the P (Tommy Boy, 1991)
★★★★	The Body-Hat Syndrome (Tommy Boy, 1993)
★★★½	Future Rhythm (Tommy Boy, 1996)
★★★½	Who Got the Gravy? (Tommy Boy, 1998)
★★★★	No Nose Job: The Legend of Digital Underground (Tommy Boy, 2001)
★★★★	Playwatchalike: The Best of Digital Underground (Rhino, 2003)

George Clinton is second only to James Brown as the originator of hip-hop's musical language—the beats with which California seized the airwaves from New York in the early '90s would be unthinkable without Parliament Funkadelic's blueprint. But unlike their g-funk peers, who replaced P-Funk's wacked-out sexiness with smug misogyny, Oakland's Digital Underground remained true to Clinton's original sensibility, celebrating sex as something squishy, giggly, and mutually pleasurable, and using comedy, with Shock-G, a.k.a. Humpty Hump, as lascivious ringleader.

The terrifically goofy "The Humpty Dance," emerging at the height of *Yo! MTV Raps*, defined the group's image, but the pansexual free-for-all "Doowhatchalike" was their true statement of purpose. The first two albums are solid, but their third was the most accomplished. The Humpty Hump showcase "Return of the Crazy One" is one of the all-time fabulous raps; the rest of the disc is hooked to a fittingly Parliamentary concept: The world is full of so many evil ideas, you need a condom for your brain. Too bad it was released at a moment when their giddiness was too pop and too weird for a hip-hop world defined by the monochromatic retreads of Dre and his cronies.

When the history of hip-hop is written, these inventive goofballs may be remembered as novelty footnotes whose biggest gift to the music was first bringing Tupac Shakur into the studio. That would be a crime. For all its sexual boasting, rap has produced only a few MCs—L.L. Cool J, Notorious B.I.G.—who sound like they'd actually be any fun in bed; Humpty is freakier than any of them. Like Uncle Jam before them, their commitment to the groove was enough to keep even their minor efforts from going soft. Ice Cube, Snoop, and, yes, Tupac—none of Cali's most honored MCs can say the same. —K.H.

Dinosaur Jr

★★	Dinosaur (Homestead, 1985)
★★	You're Living All Over Me (SST, 1987)
★★	Bug (SST, 1988)
★★★½	Green Mind (Blanco y Negro/Sire, 1991)
★★★	Where You Been (Blanco y Negro/Sire, 1993)
★★½	Without a Sound (Blanco y Negro/Sire, 1994)
★★★	Hand It Over (Blanco y Negro/Sire, 1997)
★★½	The BBC Sessions (Varèse, 2000)
★★★	Ear-Bleeding Country: The Best of Dinosaur Jr (Rhino, 2001)

After getting it together on three explosive but uneven indie records (*Bug* is the best) and five years of touring, Massachusetts' Dinosaur Jr released a bang-up masterpiece in 1991: *Green Mind.* For guitar maniacs only, this crunching, thunderous happy stuff recalls Neil Young at his Crazy Horse rawest; at other times, the ghost of Hendrix grins. Mainly, however, it's to the early Replacements that Dinosaur owes a heavy nod. Mastermind vocalist/axeman J Mascis writes raveups recalling the amphetamine melodies of the Mats; his voice doesn't sound dissimilar to Paul Westerberg's, and even the persona behind his songs is reminiscent of Westerberg, with its bad-boy-with-a-big-heart charm. Giddily entertaining, Dinosaur can even redeem a title like "Puke + Cry," and "How'd You Pin That One on Me" is the glorious noise every garage band dreams of making. Mascis gradually began to turn down the volume after *Green Mind;* his songwriting, however, remained powerful. The Rhino collection is comprehensive and makes a convincing argument for the band's significance. —P.E.

Dio

★★ Holy Diver (Warner Bros., 1983)
★½ Last in Line (Warner Bros., 1984)
★ Sacred Heart (Warner Bros., 1985)
★½ Dream Evil (Warner Bros., 1987)
★★ Lock Up the Wolves (Warner Bros., 1990)
★ Strange Highways (Reprise, 1994)
★★ Diamonds—The Best of Dio (Reprise, 1994)
★ Angry Machines (Mayhem, 1996)
★ Inferno: Last in Live (Mayhem, 1998)
★½ Magica (Spitfire, 2000)
★★ The Very Beast of Dio (Rhino, 2000)
★ Killing the Dragon (Spitfire, 2002)
★★★ Stand Up and Shout: The Dio Anthology (Rhino, 2003)

A real traditionalist, Ronnie James Dio makes heavy-metal albums the old-fashioned way, with plenty of sludgelike guitar, dime-store satanism, and the sort of vocal vibrato usually found in aging Salvation Army workers. Granted, none of that offers enough to distinguish *Holy Diver, Last in Line,* or *Sacred Heart* from one another (though *Heart* was recorded live, and therefore has a somewhat flatter sound), but if foolish consistency is your favorite heavy-metal hobgoblin, the albums should be right up your alley.

Astonishingly, *Dream Evil*—recorded after guitarist Vivian Campbell had left to join Whitesnake—alters the formula, as "Sunset Superman" possesses an almost-catchy melody. But that would soon pass, and *Lock Up the Wolves* merely reinvents the old sound with (apart from Dio himself) an entirely new cast of players. Apparently having learned his lesson, Dio and crew continue to flog the same old formula—slow-grinding riffs and howling vocals with occasional spurts of mock-orchestral synths—for another half-dozen albums. Guess you *can't* teach an old devil new tricks. —J.D.C.

★★★★ Greatest Hits (Capitol, 2003)

Dion DiMucci was one of the greatest singers of the late-'50s, early-'60s rock period before the Beatles arrived in the U.S. Born July 18, 1939, in the Bronx borough of New York City, Dion came on the scene at the tail end of the doo-wop era, in 1958, bringing with him a solid musical foundation that found him conversant not only with pop music and R&B, but with country and blues as well. By suggesting (in his wonderfully nuanced phrasing as well as in the words he sang) vulnerability and a tender, even sentimental heart quite at odds with the confident swagger definitively associated with this former member of the Fordham Baldies street gang, Dion challenged his listeners in ways few of his less daring contemporaries could.

Dion's recording career began in 1957 with two singles for the Mohawk label. For the second single, he recruited for support his Bronx buddies Angelo D'Aleo, whose tenor voice was nearly as beautiful and expressive an instrument as Dion's; second tenor Fred Milano; and bass singer/drummer par excellence Carlo Mastrangello. Dion dubbed the group the Belmonts, in honor of Belmont Avenue, in the guys' Italian neighborhood in the Bronx.

Considering how the very mention of their name causes doo-wop aficionados' hearts to flutter, Dion and the Belmonts had only a brief fling together on record—brief but memorable, to the tune of seven Top 40 hits between 1958 and 1960—before Dion went solo. Their second single, "I Wonder Why," launched them onto the charts, peaking at #22, and introduced not a trademark sound but a striking one: Mastrangello kicks it off with a forceful rat-a-tat-tat attack of nonsense syllables before the other three voices come in, one after another, until they're all in harmony and singing the intro setup for Dion's soaring, plaintive entrance: "I-I wonder why/I love you like I do . . ."; it's one of the all-time great singles in rock & roll history. Two followup singles, "No One Knows" and a downbeat ballad, "Don't Pity Me," hit #19 and #40 in 1958 and early 1959, respectively, setting the stage for the group's breakthrough hit, "Teenager in Love," from the pens of the formidable songwriting team of Doc Pomus and Mort Shuman. "Teenager in Love" peaked at #3 and was followed in short order by another #3 single, a version of Rodgers and Hart's pop standard "Where or When," done in the close harmony style of early '50s pop vocal groups such as the Ames Brothers and the Four Aces. At the moment "Where or When" reached its chart apex, Dion was in a hospital trying to kick his drug habit. Two more charting singles followed in 1960—"When You Wish Upon a Star" and "In the Still of the Night"—but by that time, the group had already performed its final shows together. Dion and the Belmonts' brief, incandescent history is documented best on Collectables' reissue of the 1959 Laurie album, *Presenting Dion and the Belmonts*. Disc one of the *King of the New York Streets* box set, titled "The Wanderer," contains six Dion and the Belmonts tracks, among them four of the seven charted singles ("I Wonder Why," "Don't Pity Me," "A Teenager in Love," and "Where or When"). The group reunited in 1972 to play a reunion show for 20,000 fans at New York's Madison Square Garden, and it turned out to be a great night, as preserved on Rhino's *Reunion: Live at Madison Square Garden 1972* CD.

As a solo artist on Laurie, Dion hit the Top 20 right off the bat with 1960's "Lonely Teenager." What happened next created a rock & roll legend. On his first 1961 single, "Runaround Sue," Dion unleashed the persona that had only been hinted at in his work with the Belmonts, and it was credible enough to ensconce the 45 at #1 for two weeks. It was followed immediately by "The Wanderer," a #2 single whose title—and a swaggering, bravura lyrical interpretation that bestowed an autobiographical feel on the song's account of inveterate, heartless womanizing (the guys in the old neighborhood must have loved it)—gave Dion a nickname he still answers to professionally. Over the next three years, he cut a succession of singles that reinforced his image as a tender-tough street kid. "Coming from that Italian macho background, with the gangs and everything," he comments in the updated liner notes on the reissue of his first solo album, 1961's *Runaround Sue*, "you couldn't express loneliness or compassion, any kind of empathy, directly. But when you sang about those things, guys would say, 'That's great!' . . . That was an okay way of saying 'I'm lonely and I'm frightened." *Runaround Sue* also documents Dion's nascent forays into well-crafted '60s teen pop, though the results are mixed. A weird version of Bobby Darin's "Dream Lover" finds Dion adding "mmm" and "yeah" to the end of several lyric lines and working to an arrangement of no particular distinction, save that common to a smarmy lounge singer. An album-closing take on Goffin and King's "Take Good Care of My Baby," which had been a #1 single for Bobby Vee only three months before Dion's album was released, features a nice, low-key reading appropriate to the singer's plea for reconciliation, but neither the vocal performance nor the arrangement would make anyone forget why the Snuff Garrett–produced Vee single topped the chart. Nevertheless, *Runaround Sue* is a portrait of Dion at a particular moment in his career and in rock history, and as such, it provides an interesting perspective on the options he felt were open to him at that juncture.

Options appear to be the point of Dion's move to Columbia in 1962. In the same way labelmate Johnny Cash was leaping stylistic boundaries in search of material and selflessly championing other songwriters' work even while developing his own writer's voice, so did Dion use the Columbia years to delve deeper into the roots music that had first influenced him back in the Bronx, gradually supplanting the odes to teen misery with more mature musings on the state of the heart and the world. His first Columbia hit single was both familiar and new: "Ruby Baby," which lodged three weeks at #2 in early 1963, was a tough, grinding Leiber-Stoller blues for the Drifters, but Dion's uptempo treatment featured de rigueur background hand claps and a solid backbeat supporting a loose, swinging vocal. At the same time this evolution was under way, Dion remained true to the street, cutting some fine pop/doo-wop singles, including "Can't We Be Sweethearts" (one of his best) and "This Little Girl," the latter peaking at #21. As 1963 wound down, he landed on the charts twice more with remarkable performances. The best of the two, "Donna the Prima Donna," is a big, deep production keyed by insistent hand claps, woodblock percussion, rich background voices alternately singing the titular girl's name and settling into smooth "ooohhhs" as Dion wails the verses.

Peaking at #6, "Drip Drop" was Dion's last chart appearance until 1968, when he returned to Laurie. But he never stopped recording, and for the next three years, he made some of the best music of his career, even though the general public heard little of it. In 1965, he cut a scorching version of an obscure Bob Dylan song, "Baby, I'm in the Mood for You," with a full rock & roll band; that same year, he also delivered a fierce rendition of Willie Dixon's "Spoonful" in an arrangement that echoes the murky, sinister ambience of Bo Diddley's records. No doubt his worsening drug problem and his diminishing commercial fortunes played into his mind-set. His anxiety and insecurity produced some beautiful moments, though, such as 1964's "The Road I'm On (Gloria)" and 1965's "Time in My Heart for You." The Columbia years are now well represented on two releases: The first was 1990's *Bronx Blues: The Columbia Recordings,* a collection of 20 tracks including the chart hits and eight songs that do not appear on the other Columbia overview, 1997's two-disc *The Road I'm On: A Retrospective.* Among the essentials on *Bronx Blues* is a little-heard Pomus-Shuman gem, "Troubled Mind," a terse, shuffling blues with gospel overtones a la "Nobody Knows the Trouble I've Seen," and the recording of Dylan's "Baby, I'm in the Mood for You." A less satisfying Columbia package is the ill-conceived *Super Hits,* a skimpy 10-song long player with no discernible conceptual glue.

In 1966, Columbia dropped Dion and he wound up briefly on ABC, where he reunited with the Belmonts for a few engaging rock & roll sides, one of which, "My Girl the Month of May" (the final track on disc one of the *King of the New York Streets* box) is a monstrous recording with a Brit-pop feel. Finally, though, he dropped out of sight to overcome his drug addiction, and when he returned sober and focused to Laurie Records in 1968, he was fully engaged in folk, blues, and folk rock. His first release, "Abraham, Martin and John," written by Dick Holler (nom de plume for country songwriter Dick Feller), caught the zeitgeist and rejuvenated his career. A somber, orchestral, folk-based tribute to three slain leaders came on like a soothing balm to a nation rocked by violence and internal strife centered on the civil rights movement and the undeclared war in Vietnam. As illustrated on *Dion,* his now-out-of-print album for Laurie.

On signing with Warner Bros. in 1969, Dion went full-tilt into folk rock on five intimate, introspective albums, all now out of print, though representative tracks from that period comprise the bulk of disc two of *King of the New York Streets.* Despite beautiful, affecting songs such as "Sanctuary," the Warners period produced no commercial hits; to make matters worse, a dream project with Phil Spector was deemed such a dud that the label declined to release it domestically, though it was available in England.

Moving to Lifesong in 1979, Dion remained on the upswing aesthetically, if not commercially, with *Return of the Wanderer.* A single, "I Used to Be a Brooklyn Dodger," is one of his most poignant vocals, finding him looking back in fondness and with regret at his youth and what he has lost over time. Rejected by the secular market, Dion turned to gospel and recorded several first-rate albums for the Word label, all extolling his newfound faith in God. One of those, *I Put Away My Idols,* won a Dove Award and earned a Grammy nomination in 1983.

But the journey was far from over; in fact, it continues to the present day. Dion returned to the secular field following the publication of his autobiography in the late '80s; and in 1989, he teamed up with producer Dave Edmunds for the inspired *Yo Frankie* on Arista. Edmunds keeps Dion front and center, while surrounding him with a guitar-heavy wall of sound and lush backup vocals. Although the album trades some on the artist's nostalgia value with "King of the New York Streets," "Written on the Subway Wall," and "Little Star," the blending of new and vintage themes inspired impassioned performances, serving notice that work remained unfinished here.

Nineteen ninety-three saw the release of a delightful Christmas album, *Rock n' Roll Christmas. Déjà Nu,* released in 2000, combines two songs Dion wrote for the film *The Wanderer* with more recent recordings in tribute to, as he writes in his liner notes, "Cars, Girls, Love." It gets a bit deeper than that, thanks to two moving covers of Bruce Springsteen songs: "Book of Dreams," done reverently, with a doo-wop-style close harmony chorus in the background; and "If I Should Fall Behind," which closes the album on an a cappella note, with the Wanderers providing a classic, bopping backdrop, complete with burbling bass and wailing falsetto, as Dion sings the vows of devotion with stirring sensitivity. However retro its sensibilities (even the Springsteen songs, evocative and eloquent though they be, are of a piece with a romantic's idealistic view of the world), *Déjà Nu* is a solid effort that shows 61-year-old Dion DiMucci forever young and in command, in voice and in spirit. —D.M.

Rockers like to imagine that this Quebeçoise thrush embodies all that is Not Rock—mushy soundtrack ballads, windswept weepers for your girlfriend's mom, cloying Hallmark poesy. We should be so lucky—unfortunately, rock makes plenty of space for those qualities. In fact, Dion is harder than most chart-topping gangstas, and her sentimentality is bombastic and defiant rather than demure and retiring. "My Heart Will Go On" wasn't a doormat's plaint, after all; it was a threat of incommutability as ferocious as any crap metal band's profession of dominance.

Though she always used her voice as a club with which to bonk listeners, her earliest hits—"Beauty and the Beast" with Peabo Bryson, "If You Asked Me To"—were as harmless as they were dreadful. Unless you'd accidentally preprogrammed a Lite FM station onto your car stereo or spent too much time in the grocery store, you could safely avoid repeated exposure. Until 1996, that is, when an anonymous "house" rhythm was grafted onto "It's All Coming Back to Me Now" (written by Jim Steinman, the Meatloaf accomplice), granting Dion entrée into the cheesier clubs and pop stations. But her ambitions were both grander and more crass than that, and were well served by the confluence of interests that brought her into contact with both Diane Warren and James Cameron.

In a way, Dion's attention-getting appearance on VH1's *Divas* was sadly appropriate—she stands at the end of the chain of drastic devolution that goes Aretha-Whitney-Mariah. Far from being an aberration, Dion actually stands as a symbol of a certain kind of pop sensibility—bigger is better, too much is never enough, and the riper the emotion the more true. —K.H.

Dire Straits

★★★½	Dire Straits (Warner Bros., 1978)
★★★½	Communiqué (Warner Bros., 1979)
★★★	Making Movies (Warner Bros., 1980)
★★★★	Love Over Gold (Warner Bros., 1982)
★★★	Twisting by the Pool EP (Warner Bros., 1983)

★★★★	Money for Nothing (Warner Bros., 1988)
★★★★	On Every Street (Warner Bros., 1991)
★★	On the Night (Warner Bros., 1993)
★★★	Live at the BBC (Warner Bros., 1995)
★★★★	Sultans of Swing—The Very Best of Dire Straits (Warner Bros., 1998)

Dire Straits was originally a band, a four-piece whose singer and lead guitarist, Mark Knopfler, happened to do the bulk of the writing. Over time, however, the group slowly became less a unit than Knopfler plus backing players. On one level, this had a certain Darwinian inevitability to it; being both a winningly acerbic tunesmith and virtuoso guitarist, it was only natural that Knopfler would come to the fore.

But it's a mistake to assume that Dire Straits was little more than the Mark Knopfler show because, as their recordings make plain, this was clearly a case of the parts exceeding the whole. Regardless of what Knopfler's songwriting and fancy picking brought to the party, the feel of the performances made the music click. In other words, Dire Straits was nothing if not a groove band.

That's not the same thing as calling it a soul or funk band, of course; the group's sense of rhythm has more in common with the swampy, low-key blues of J.J. Cale and later Eric Clapton. That much was made clear with the quartet's first success, an insinuating bit of bar-band mythmaking called "Sultans of Swing." Even though Knopfler's lyrics paint a vivid picture of an overlooked and underappreciated pub combo, what ultimately reels the listener in is the laid-back insistence of the band's rhythm work, a quality abundant throughout *Dire Straits,* from the Dylanesque flavor of "Wild West End" to the galloping groove of "Down to the Waterline." (*Live at the BBC,* recorded in 1978, illustrates that groovesmanship was also very much a part of their live show.)

Communiqué continues in that fashion for the most part, but expands the scope of Knopfler's storytelling through the moody, elegiac "Once Upon a Time in the West." With the departure of rhythm guitarist David Knopfler (Mark's brother), the band's size is scaled down, but the music on the aptly titled *Making Movies* moves in the opposite direction, toward sprawling story songs like the sweet, Springsteenian "Romeo and Juliet," although, as "Skateaway" indicates, the band's pursuit of musical drama sometimes comes at the expense of the melody. Fortunately, the band regains its focus for *Love Over Gold,* on which the Straits—now a quintet—easily sustain the mood and melodic structure of the 14-minute megawork "Telegraph Road." Even better, they're able to augment such epics with material as sharply funny as the wry character number "Industrial Disease" or the lighthearted title tune from *Twisting by the Pool.*

Alchemy, an ambling, long-winded live album, focuses almost exclusively on the band's larger works, offering some flashes of instrumental brilliance but little insight into the material, something that makes the radio-friendly brevity of *Brothers in Arms* all the more surprising. It may be easy to find parallels to the album's biggest hits in the band's early output—for instance, the way "Walk of Life" seems to cross "Sultans of Swing" with "Twisting by the Pool," or how "Money for Nothing" taps the same satiric vein as "Industrial Disease"—but the reality is that *Brothers* is the exception to Dire Straits' sound.

Perhaps that's why Knopfler and company waited so long to deliver that album's followup, *On Every Street.* (*Money for Nothing,* like *Sultans of Swing: The Very Best of,* is simply a hits collection.) Although the album has its lighter moments, such as the dead-Presley "Calling Elvis" or the consumerist sarcasm of "Heavy Fuel," the bulk of its songs find Dire Straits doing what it does best, stretching dry, reflective words and tunes over moody, effortlessly maintained grooves. But that was it; after releasing *On the Night,* a live album culled from the *On Every Street* tour, Dire Straits quietly disbanded as Knopfler pursued the solo career most fans thought he was already leading. —J.D.C.

Dirty Dozen Brass Band

★★★	My Feet Can't Fail Me Now (George Wein Collection, 1984)
★★★	Live: Mardi Gras in Montreux (Rounder, 1986)
★★★½	Voodoo (Columbia, 1989)
★★★★	The New Orleans Album (Columbia, 1990)
★★★★	Open Up: Whatcha Gonna Do for the Rest of Your Life? (Columbia, 1992)
★★★	Jelly (Columbia, 1993)
★★★½	This Is Jazz #30 (Columbia, 1997)
★★★	Buck Jump (Mammoth, 1999)
★★★★½	Medicated Magic (Rope a Dope, 2002)

In classic New Orleans tradition, the Dirty Dozen Brass Band started out as an all-acoustic ensemble in which everyone but the drummers played wind instruments. Things have changed over the years—the group's recordings include guitarists and keyboard players—but the group's marching-music roots remain so strong that almost everything it records uses a sousaphone instead of a string bass.

The term "classic New Orleans tradition" makes sense only if you accept the notion that progress is a natural part of the city's heritage. Hence, applying the "roots" label to both George Clinton and Ferdinand "Jellyroll" Morton is patently obvious to the band, even if it isn't always clear to the listener. *My Feet Can't Fail Me Now* finds the group starting off with a fondness for jazz that its subsequent output doesn't support; *Mardi Gras in Montreux* covers similar territory but with more humor and greater energy (not to mention a killer revision of *The Flintstones* theme). *Voodoo,* though, is much more ambitious, augmenting the group's usual groove with cameos by Dizzy Gillespie, Dr. John, and Branford Marsalis. And even though *The New Orleans Album* continues that vein with an Elvis Costello feature, its emphasis on such guests as Dave Bartholomew and Eddie Bo makes it closer in spirit to the insider cool of the Big Easy's annual Jazz and Heritage Festival than the calculated glitz of Mardi Gras.

Whatcha Gonna Do for the Rest of Your Life? needs no outside help to stretch the limits of the band's sound—the Dirties do it themselves, through the sassy funk of "Use Your Brains" and the eloquent lament of "The Lost Souls (of Southern Louisiana)." Sadly, *Jelly*—a well-meaning but overtly studious tribute to Mr. Morton—puts the group in a far more serious mood than necessary.

On *Buck Jump,* the Dirties try hard to balance their jazz ambitions with their street-funk roots and succeed more than half the time. But *Medicated Magic,* with its feel-good emphasis on Creole R&B classics, ultimately proves the combo's mettle. With guest stars ranging from Dr. John and Norah Jones to DJ Logic, its groove-conscious renditions of "Cissy Strut," "Junko Partner," and "Walk on Gilded Splinters" elevates the Dirty Dozen to the status of Crescent City Classics. —J.D.C.

Dirty Vegas

★★½	Dirty Vegas (Capitol, 2002)

Dirty Vegas Sound System

★★½	A Night at the Tables (Ultra, 2003)

In a sense, South London suburbanites Paul Harris, Steve Smith, and Ben Harris got the usual order of things backward. As Dirty Vegas, the trio achieved notoriety when its first single, "Days Go By," had already been included in a television ad (for Mitsubishi's Eclipse), rather than waiting until it had become a club hit, or at least included on an album, first. Unfortunately, *Dirty Vegas* has little beyond that song (quite seductive even minus the visual appeal of a popping-and-locking girl) to recommend it, though the hit does pretty much indicate what the rest of the disc's contents sound like. Not quite so with *A Night at the Tables,* a mix CD that the trio rushed out a few months after their first album, which is more likable than you might expect from such a pushy group of tracks. Sure, the synth glides are bombastic, but occasionally—as on Underworld's "2 Months Off" or a mix of Frankie Knuckles featuring Nicki Richards' "Keep On Moving (King Unique Re-Edit)"—they generate an appealingly rocklike push. —M.M.

Dismemberment Plan

★★★	! (DeSoto, 1995)
★★★	Dismemberment Plan Is Terrified (DeSoto, 1997)
★★★★	Emergency & I (DeSoto, 1999)
★★★	The Dismemberment Plan/Juno (DeSoto, 2001)

★★★★ Change (DeSoto, 2001)
★★★★ A People's History of the Dismemberment Plan (DeSoto, 2003)

By the time the Dismemberment Plan broke up in early 2003, the Washington, D.C., foursome had become among the most influential bands in underground emo. But, while they deserved every bit of the credit they got, singer-guitarist Travis Morrison, drummer Joe Easley, bassist Eric Axelson, and guitarist Jason Caddell (all but Easley also played keyboard) did not represent their subgenre so much as twist it into a pretzel, crossing punk, funk, new wave, and smarty-pants pop.

! could not have been better titled. Morrison rants, screams, and even sings prettily over a mish-mash of sounds that draws from D.C. punk's long history: Minor Threat's jittery hardcore, Rites of Spring's fractured emo, Jawbox's majestic melancholy, and Fugazi's own dub-influenced hodge-podge. Easley, one of indie rock's best drummers and the Dismemberment Plan's purest talent, hadn't even joined the band yet. Morrison's oddball sense of humor even cut through all the racket; an otherwise dark number features the chorus (also its title), "Onward, Fat Girl."

In a reversal as sudden as the band's time-signature changes, *The Dismemberment Plan Is Terrified* ditched in-your-face punk in favor of brainy anything-goes indie. Morrison squeaks most of "That's When the Party Started" in a playful falsetto, as if he's just huffed helium, and guitar and keyboard intertwine in a woozy, screeching breakdown. In one of the best emo songs ever, "The Ice of Boston," Morrison delivers a deadpan spoken-word narrative over a cool lounge-rock groove, and breaks into an anthemic but still lovely chorus. Relating a shitty New Year's Eve, he describes "two million drunk Bostonians/singing 'Auld Lang Syne' out of tune," stripping and pouring champagne on his head as his mother calls on the phone, and confronting a former lover: "So I guess the party line is I followed you up here/Well, I don't know about that/Mainly because knowing about that would involve knowing some pathetic, ridiculous, and absolutely true things about myself/that I'd rather not admit to right now." More than just another indie rocker fixated on romantic dysfunction—and there are plenty of them—Morrison was admitting absolutely true things about himself, and unearthing as much joy as disappointment.

In 1998, the Plan released an EP, *The Ice of Boston,* on Interscope, but were soon dropped from the label. (The disc is no longer in print.) Their distinguished return to the indie world, *Emergency and I,* includes a frantic meditation on what would happen if the sun simply went out, named for how long it takes sunlight to reach the earth: "8½ Minutes." That space of time, when feelings would be not only bared but driven to extremes, dramatizes what the album is all about. "Memory Machine," an ironic fantasy about someday being able to erase "longing" ("Poetry, Aldous Huxley—yeah, yeah, yeah, it'll be a relief"), sounds like a mechanical failure, with Easley's spectacularly stuttering beat, almost random bursts of bass, and alarm bells of guitar and keyboard, but the song also captures the chaos of emotion. The frenetic, inventive rockers and borderline-creepy ballads here begin to make sense of that chaos.

The exceedingly tender and exquisitely tense *Change,* on the other hand, hums like a car cruising down a lonesome highway. Even at the end of "Superpowers," where one pounding guitar chord gives way to astringent, off-key notes, the inexorable pull of the desire—to return to the past for a better future, for anything other than the here and now—cannot be shaken. In the live staple "Time Bomb," Morrison quavers, "I lay forgotten at the bottom of your heart/I'm fine, ticking away the years, until I blow your world apart." Having exploded the conventions of emo and indie rock itself, the Dismemberment Plan left behind a catalogue of music that will surely continue to change the inner worlds of young romantics. —N.C.

Disturbed

★★ Sickness (Giant, 2000)
★★½ Believe (Warner Bros., 2002)

Drawing equally on thudding new-metal riffology and the gothic industrial disco of their hometown of Chicago, Disturbed was part of the first wave of post-Korn new-metal bands. On *Sickness,* singer Dave Draiman—he of the spiky hair, chin stud, and surprisingly solid voice for a new-metal vocalist—bellows and rants about pain he's felt (whisper-to-scream rage on "Stupify") and radio hits he loved as a youth (Tears for Fears' "Shout" gets an appropriately thudding cover). The "Don't hit me, Mommy" crap at the end of the oddly danceable "Down With the Sickness" could be sick-joke funny if you let it, but much of *Sickness* feels like hollow formula.

That didn't stop it from selling 2 million copies, and making the followup, *Believe,* one of 2002's more hotly anticipated new-metal albums, on which they turn up the industrial brattle and gothic melodrama. Draiman makes a deal with God on the clattering "Prayer," but you can practically hear the walls bleed on "Rise" and "Intoxication." And they can't seem to avoid the inadvertently hilarious. The album closer

"Darkness" finds Draiman getting his croon on, singing for the laughter and singing for the tears, because with any luck, maybe tomorrow the Good Lord will take him away. —J.G.

The Divine Comedy

★★★	A Short Album About Love (Setanta, 1997)
★★★	Fin de Siècle (Setanta, 1998)
★★★★	A Secret History: The Best of the Divine Comedy (Tristar, 1999)
★★★	Regeneration (Nettwerk, 2001)
★★★★	Absent Friends (Nettwerk, 2004)

Neil Hannon, the Northern Irish singer, songwriter, and multi-instrumentalist who bills himself on record as the Divine Comedy, is the kind of musical personality they just don't breed in America. Equal parts Scott Walker, Burt Bacharach, Michael Nyman, and Noël Coward, Hannon pokes fun at all aspects of modern life and culture in his lushly, sometimes kitschily arranged pop ditties. His lyrics rarely fail to display erudition with a nod and a wink, but it's his dramatic baritone and knack for writing unshakable tunes that make the Divine Comedy more than just a chucklesome novelty act.

Recorded live with a full orchestra, *A Short Album About Love* isn't consistently brilliant, but "In Pursuit of Happiness," "Everybody Knows (Except You)," and the gorgeous "Timewatching" are top-notch examples of Hannon's craft. *Fin de Siècle* charms with "National Express," "Commuter Love," and "Eric the Gardener," then overindulges in smarmy grandiosity. *Regeneration* finds Hannon working with Radiohead producer Nigel Godrich and adopting a more restrained tone. The laugh quotient is down, unfortunately, but the melodies are as sweet as ever. On *Absent Friends,* Hannon reconnects with his wit and his love of lushness (the orchestra's back); he also allows himself a new, plainspoken emotionalism that, at its deepest ("Leaving Today," "Charmed Life"), is surprisingly touching.

A Secret History does a decent job of compiling Hannon's '90s work, though several tracks lack for the context of their original albums. "Your Daddy's Car," "The Summerhouse," and "Becoming More Like Alfie" are standouts. Still, the best introduction to the Divine Comedy can be found only in the import racks, via three British Setanta releases: *Liberation* (1993), *Promenade* (1994), and *Casanova* (1996). Each of these discs is a witty chamber-pop tour de force, worthy of at least four stars. —M.R.

Dixie Chicks

★★★½	Wide Open Spaces (Monument, 1998)
★★★½	Fly (Monument, 1999)
★★★★	Home (Sony, 2002)
★★★½	Worldwide Live (Sony, 2004)

All through 2000, country radio was flooded with "Goodbye Earl," a song about how a battered wife and her high school pal decide to off the abusive husband with a bowl of "special" black-eyed peas. Some stations ran public-service announcements following the Dixie Chicks' "Goodbye Earl" about how to properly report spousal abuse. Sure, they were increasing community awareness, but it almost seemed as if they also feared a rash of Chick-related poisonings. And who could blame them for worrying? Not only did the women make the operation sound rational, but the giddy menace with which Natalie Maines inflected "Earl had to *die*" was infectious.

Sisters Martie Maguire (fiddle) and Emily Robison (banjo) had three dull traditional records to their name before enlisting Maines' nasally pinched sass. Things changed quickly. The title track of *Wide Open Spaces* follows a young girl who leaves home because she needs "room to make big mistakes." On "Let 'Er Rip," Maines growls at a lover to dump her now rather than take all night to break it to her gently. And a closing romp through Bonnie Raitt's "Give It Up or Let Me Go" showcases Maguire's and Robison's chops in a taut band context.

Fly finds the trio flexing its autonomy that much more brashly. "Ready to Run," which makes fear of commitment an equal-opportunity affliction, is a genuine stroke of idiosyncratic freedom. In this context, the pathetic "Cowboy Take Me Away" is an unforgivable sentimental evasion. Still, even if the Chicks never fully wriggled out of the corset Nashville laced them into, they at least got a good start on loosening a few of the stays. *Home* was in many ways a feint toward authenticity, invoking the ladies' acoustic and bluegrass roots, so timely in the era of *O Brother, Where Art Thou?* But in song after song, from the defiant "Long Time Gone" to the heartbreaking "Travelin' Soldier" (the latter a hit even after Natalie foolishly exercised her right to free speech and criticized President George W. Bush), the album title referred sharply to that place you can never go back to. The live album is as redundant as most, of course, but full of verve regardless, and a decent introduction for civil libertarians, Toby Keith–haters, and other latecomers to the Chicks' camp. —K.H.

Willie Dixon

★★★★	Willie's Blues (1959; Bluesville/Prestige, 1990)
★★★★	I Am the Blues (1970; Columbia Legacy, 1993)
★★★	The Original Wang Dang Doodle (MCA/Chess, 1995)

★★★★★ The Chess Box (Chess/MCA, 1988)
★★★½ Poet of the Blues (Sony, 1998)
★★★½ Mr. Dixon's Workshop (Fuel, 2001)
★★★★ In Paris: Baby Please Come Home/Memphis Slim (Original Blues Classics, 1996)

Without ever establishing a style as distinctive as those of the artists with whom he worked, Willie Dixon became one of the architects of urban blues on the strength of his skills as a songwriter, bandleader, musician, arranger, producer, and diplomat. In these roles, Dixon reigned supreme at Chess Records in the 1950s and early 1960s, when he worked in one capacity or another with every significant artist on a label blessed with an abundance of them. Even a cursory listing of his many songwriting credits indicates the breathtaking scope of his contributions to American music and to the language of the blues: "My Babe," "You Shook Me," "Back Door Man," "Little Red Rooster," "Spoonful," "Wang Dang Doodle," "I Can't Quit You Baby," "I'm Your Hoochie Coochie Man," "You Can't Judge a Book By Its Cover," "The Seventh Son," "I Just Want to Make Love to You." Muddy Waters, Howlin' Wolf, Little Walter, Bo Diddley, Lowell Fulson, and Jimmy Witherspoon are only the most prominent of the musicians in Dixon's debt. They and others are heard on the two-CD *The Chess Box* collection, which is an essential blues overview. It's impossible to listen to the 36 tracks and then understate Dixon's stature—even the abused term *giant* seems insufficient considering the magnitude of the man's achievements. Other examples of Dixon's early postwar blues work can be found on *Mr. Dixon's Workshop.* This disc is less focused on Dixon's classics than on rare and obscure sides that showcase some terrific performances and outstanding artists. Jessie Fortune's "Too Many Cooks" features a young Buddy Guy on guitar, along with Big Walter Horton on harp; Guy turns up again on "Sit and Cry the Blues," a solo recording from 1958. "My Babe" is here, not in its classic Little Walter version but in a furious rockabilly reading by Jerry Lee Lewis's cousin Mickey Gilley, years before he found success as a mainstream country artist.

Oddly, Dixon's solo work was the least of his accomplishments. As a musician and producer, he was beyond reproach. Vocally, his was a genial, even moving, voice on occasion, but he never sounded as completely immersed in or defined by his material as did, for example, Muddy Waters or Howlin' Wolf. The zone these and other artists inhabited, in which passion, pain, and technique came together in one explosive package, is one Dixon visited in other capacities, but not on his own releases.

That said, it should be added that Dixon's recordings have some stirring moments. The earliest of these, Columbia's *Big Three Trio,* finds Dixon near the outset of his career, joined by Leonard Caston and Ollie Crawford in a trio purveying blues-tinged popular music in the style of the Mills Brothers. Among the interesting tracks is the Dixon-Caston-penned "If the Sea Was Whiskey," the first verse of which has shown up in countless songs, most notably "Rollin' and Tumblin'." *Poet of the Blues* takes a then-and-now look at Dixon's career in 16 tracks, nine featuring the Big Three Trio (actually a quartet, with Charles Sanders on drums) from the late '40s through the early '50s and seven of Dixon's monuments ("Back Door Man," "I Can't Quit You Baby," "Spoonful") recorded in 1970 in Chicago and issued on the *I Am the Blues* long player. His band, the Chicago Blues All-Stars, included Sunnyland Slim on piano, Johnny Shines on guitar, and Clifton James on drums.

Bluesville/Prestige has reissued Dixon's first album as a bandleader, *Willie's Blues,* recorded in 1959 and featuring the redoubtable Memphis Slim on piano. Imbued with a dark, after-hours ambience, the album is by far Dixon's strongest solo recording. His stuttering vocal on "Nervous" is one of his most effective on record; one of the better tracks is the loping "Youth to You," a thinly disguised reworking of "I Just Want to Make Love to You." Dixon's fruitful if short-lived association with Memphis Slim is further documented on the fabulous live disc *Baby Please Come Home,* recorded in Paris in 1962 with Phillipe Combelle joining the duo on drums and adding vocal support on the rousing set-closer, "All By Myself."

I Am the Blues features Dixon's own interpretations of nine of his best-known songs, and for this reason alone it becomes a good companion volume to the Chess box and the other extensive MCA overview, *The Original Wang Dang Doodle,* with tracks cut between 1954 and 1990. "The blues is about life," he once said. "If it ain't about life, it ain't the blues." When death brought an end to his remarkable career, in 1992, Willie Dixon had walked it like he talked it, staying true to his own maxim right up to the end of his days. —D.M.

Dizzee Rascal

★★★★ Boy in da Corner (Matador, 2004)

When 19-year-old Londoner Dizzee Rascal debuted in 2004 with the excellently unorthodox *Boy in da Corner,* he seemed like a gangsta from another planet, with a high, wound-up, desperate voice that sometimes sounds like Eazy-E, Shabba Ranks, and Gary Numan, all stuck inside the same body. *Boy in da Cor-*

ner presents a phantasmagoric vision of the future of hip-hop and techno, as Dizzee stays clear of assembly-line beats and backs his Cockney-accented flow and streetwise lyrics with jungle and techno drones. The signature tracks are "I Luv U" and "Wot U On": Dizzee used a PlayStation 2 to make some of the martial beats in the former, and the slutbot vocals, 2D melodies, and hardcore techno pound of "Wot" sound like the inside of a bloody video game. Just as N.W.A once captured the realities of the hood, Dizzee evokes 21st-century street life—the real, the virtual, and the violent. —P.B.

DJ Jazzy Jeff and the Fresh Prince

★★★	Rock the House (Jive, 1988)
★★★½	He's the DJ, I'm the Rapper (Jive, 1988)
★★	And in This Corner (Jive, 1989)
★★★	Homebase (Jive, 1991)
★	Code Red (Jive, 1993)
★★★½	Greatest Hits (Jive, 1998)

Before Will Smith got jiggy in blockbuster films like *Men in Black,* he called himself the Fresh Prince and seemingly spent a good portion of the '80s picking up girls at the local food court with homeboy Jeff Townes (a.k.a. DJ Jazzy Jeff). Sporting a high-top fade and acid-wash jeans, Smith wove comic coming-of-age tales to Townes' considerable scratch skills. Their corny highjinks translated into sitcommy skits and MTV hits that foreshadowed Smith's successful acting career and nabbed him a hit TV show, *The Fresh Prince of Bel Air,* predicated on his nonthreatening street style. Instead of boasting about ho's and libidos, Smith's raps showcase a self-deprecating humor—he's scared of Freddy Krueger; he's laughed at in school for rocking Zips, not Adidas.

The Philadelphia duo's debut, *Rock the House,* featured the sophomoric hit "Girls Ain't Nothing But Trouble," in which boy-next-door Smith is preyed on by sirens to an *I Dream of Jeannie* sample. Their best work, though, is on the 17-track followup, *He's the DJ, I'm the Rapper,* since it spotlights both Smith's likable lyrics ("Parents Just Don't Understand," "Nightmare on My Street") and Townes' mixing mettle ("As We Go," "Pump Up the Bass"). Smith's schlock wears thin on *And in This Corner* and his Chuck D impression on *Code Red* is plain embarrassing. *Homebase,* on the other hand, is buoyed by Townes' disco-electro-funk beats, and contains 1991's breezy beach anthem "Summertime." That hit was remixed and rereleased on 1998's *Greatest Hits,* a laid-back list sometimes overshadowed by megastar Will Smith's solo efforts ("Men in Black," "Just Cruisin' "). —C.S.

DJ Quik

★★★★	Quik Is the Name (1991; Arista, 1998)
★★★	Way 2 Fonky (1992; Arista, 1998)
★★★	Safe + Sound (1995; Arista, 1998)
★★	Rhythm-Al-Ism (Arista, 1998)
★★★	Balance & Options (Arista, 2000)
★★★	Under tha Influence (Ark 21, 2002)

As a teenager in the '80s in the Los Angeles suburb of Compton, David Blake was a member of the notorious Treetop Piru Bloods street gang. When Blake took a construction job, a coworker introduced him to the delights of that famous hip-hop accessory, the SP-1200 sampler. Blake became DJ Quik and at age 20 he saw his debut album go platinum on the strength of the hit single "Tonite." N.W.A had put Compton on the map, and the hardworking Quik took full advantage of the national attention. His G-funk–heavy, danceable, melodic music worked in clubs and on radio, and like Dr. Dre, Quik was a triple threat who could write, produce, and bust rhymes. Quik has always had notable hair, whether the fully-activated Jheri curl of his early days or his more recent shoulder-length relaxed locks. He's also known for his longstanding beef with MC Eiht (of Compton's Most Wanted); Quik once goofed Eiht all the way to the spelling bee as "having no G in him." None of this would matter if Quik wasn't a durable innovator. *Balance & Options* (2000) led off with the chugging chant "Change da Game," a track featuring sizzling synthesizers and a talented Quik-discovered MC named Mausberg (who was shot and killed in Compton in July 2000 at age 21). "Roger's Groove" was a talkbox tribute to the late great Roger Troutman of Zapp. The album also included "U Ain't Fresh!" (featuring EPMD's Erick Sermon), in which Quik mocked an unnamed producer as an ecstasy-popping homosexual. The track was assumed to be about Dr. Dre, but the hatchet was buried in time for Dre to produce "Put It on Me" on 2002's *Under tha Influence* (the track also appeared on the *Training Day* soundtrack). While he has never stopped wearing Blood colors, Quik has moved beyond celebrations of the gang-banging lifestyle. Partying remains his favorite subject in his crudely humorous sex rhymes, which is why it's noteworthy that intellectual and highly lyrical East Coast MCs such as Talib Kweli and Pharoahe Monch guest on *Under tha Influence.* Since 2000, Quik has also produced tracks on albums by Xzibit and Dre protégé Truth Hurts. —P.R.

DJ Shadow

★★★★★	Endtroducing (Mo' Wax/FFRR, 1996)
★★★★	Preemptive Strike (Mo' Wax/FFRR, 1998)
★★★★	The Private Press (MCA, 2002)

DJ Shadow is one mad scientist who obviously doesn't get out of the lab much. Shadow, otherwise known as Northern California beatmaster and vinyl fetishist Josh Davis, became one of the leading lights of DJ culture with a string of head-spinning singles in the '90s, weaving more obscure rare-groove samples than any lawyer could trace into an expansive new style of headphone funk. He defined the tripping, hopping Mo' Wax sound, so that by the time he got around to releasing his debut album *Endtroducing,* in 1996, it already sounded not just familiar but inevitable. *Endtroducing* mixed countless samples and special effects into a hypnotic pastiche, especially in the cinematic crawl of tracks like "Midnight in a Perfect World" and "Building Steam With a Grain of Salt." All slow-motion tension and release, Shadow's grooves evoked a late night in the heart of the city, with your body poised right on the edge of utter fatigue.

DJ Shadow kept a low profile over the next few years. In 1998 he masterminded the U.N.K.L.E. project *Psyence Fiction,* a botched attempt at an all-star supergroup. *Preemptive Strike* was a collection of early work, including the excellent spaghetti Western soundtrack "High Noon." He also made some of his wildest, most entertaining music with Cut Chemist, especially 2001's *Product Placement,* which kicked off with a sample from Oscar the Grouch's "I Love Trash." *The Private Press* was his first proper solo album since *Endtroducing,* mixing beats, sound effects, machine hums, and found voices into mock-symphonic patterns of robot noise. As on *Endtroducing,* the best tracks take their time to let the momentum build: "Fixed Income," "Meets His Maker," "You Can't Go Home Again." And since Radiohead freely admit how much they've been influenced by DJ Shadow, it's only right that "Giving Up the Ghost" should sound like primo Radiohead, with nerve-rattling guitar and a lonesome violin howling away. —R.S.

DMX

★★★★	It's Dark and Hell Is Hot (Ruff Ryders/Def Jam, 1998)
★★★½	Flesh of My Flesh, Blood of My Blood (Ruff Ryders/Def Jam, 1998)
★★★½	. . . And Then There Was X (Ruff Ryders/Def Jam, 1999)
★★½	The Great Depression (Ruff Ryders/Def Jam, 2001)
★★★	The Grand Champ (Ruff Ryders/Def Jam, 2003)

Former stick-up kid DMX emerged from Yonkers, NY, to become a multiplatinum hip-hop phenom who rhymed about blood and grime at a time when the status quo was champagne and diamonds. Using Jekyll-and-Hyde rhyme flows, a manic-depressive persona, and, when words won't do, barks, snarls, and yelps, the Dark Man X laid out his formula on his first LP. *It's Dark and Hell Is Hot* features odes to crew ("Ruff Ryders' Anthem"), deals with the devil ("Damien"), conversations with God ("The Convo"), detailed scripts from the underworld ("ATF," "Crime Story"), and good old-fashioned shit talking ("Fuckin' wit' D," "Get At Me Dog"). The production—by Swizz Beatz, Dame Grease, and Irv Gotti—is brooding and ominous, with gothic underpinnings. Built around shards, chunks, and crashes of smoking, aggressive noise, the album sounds like a burned-down cathedral in a post-apocalyptic ghetto.

DMX's next two albums were released in rapid succession. *Flesh of My Flesh, Blood of My Blood* came out the same year as his debut, making X the first artist to debut at the top of the *Billboard* charts twice in the same calendar year. Despite his prodigious success with *Flesh* and *. . . And Then There Was X,* DMX continued to spit his pavement poetry with the same desperation that made him a blue-collar hero. While the production is a bit more polished—most notably on *. . . And Then There Was X*'s Dru Hill team-up "What These B*****s Want"—nothing ever comes off rehearsed, fabricated, or disingenuous.

Perhaps because he released three albums in two years, DMX didn't take stock of his celebrity until his fourth album, *The Great Depression.* There he taunts his competition: "15 million, nah-nah-nee-nah-nah," and he assumes the role of guardian of the hip-hop game, deriding the music's rampant materialism and excess. He also forays into rock ("Bloodline Anthem") and party music ("Trina Moe") and, of course, he prays, raps with God, deals with the devil, writes a letter to his dead grandmother, and barks every now and then. *The Grand Champ* is more of the same, but tracks such as "Where the Hood At" show that DMX can still deliver exhilarating fight music. —K.X.

The D.O.C.

★★★★	No One Can Do It Better (Ruthless, 1989)
★★	Helter Skelter (Giant, 1995)
★★★	Deuce (Red Urban, 2003)

A native of the West Dallas projects, the D.O.C. (real name Tracy "Tray" Curry) came up as a member of the Dallas rap group Fila Fresh Crew. In 1988 the group's minor hit "I Hate to Go to Work" appeared on *The Posse—Chapter 2,* a compilation on the small but influential Los Angeles–based Macola label that also included early tracks by Ice T and Digital Underground. The D.O.C. came to the attention of a young Dr. Dre, who invited him to come to Compton. Thus, the D.O.C. became involved—writing lyrics primarily—for infamous early Ruthless Records albums like N.W.A's *Straight Outta Compton.* (Ice Cube allegedly referred to the D.O.C. as N.W.A's "unsung hero.") Dre then produced *No One Can Do It Better,* the D.O.C.'s excellent debut album. With an assertive, astringent voice not unlike DMC from Run-D.M.C. and Big Daddy Kane, the D.O.C. devoted himself to lyrical boasting, not gangsta tales. The album included some of Dre's best productions to date (except for the tinny heavy-metal track, "Beautiful But Deadly"). In retrospect, although the D.O.C.'s flow is old school, his facility at relentlessly fast rapping on "Portrait of a Masterpiece" remains impressive. Prospects looked good for the D.O.C. when in November 1989 his larynx was crushed in a car accident. Five years would pass before he recuperated enough to record again, and his comeback album *Helter Skelter*—dominated by resurrection imagery—began with a skit reenacting the accident. Lead track "Return of da Livin' Dead" recycled the beat from his first album's big hit "It's Funky Enough" and was the best beat on the album (with Dre absent, production was handled unexceptionally by the D.O.C. and Erotic D). With his voice reduced to an ineffective rasp, the D.O.C. virtually disappeared for the rest of the '90s. Apparently the D.O.C. maintained ties with his old buddies, however, as his protégé Six Two appeared on "Xxplosive" on Dre's *Chronic 2001.* Having returned to his original stomping ground of Dallas, the D.O.C. formed his own record label and released his third album, *Deuce,* the highlight of which is "Tha Shit," a posse cut featuring Ice Cube, MC Ren, and Snoop. —P.R.

Dr. Dre

★★★★★	The Chronic (Death Row, 1992)
★★	Dr. Dre Presents . . . The Aftermath (Aftermath/Interscope, 1996)
★	First Round Knock Out (Triple X, 1996)
★	Back N Tha Day (Blue Dolphin, 1996)
★★★★	2001 (Interscope, 1999)
★★★★	Chronicle: Best of the Works (Death Row, 2002)

With its late-'80s Cali-thug breakthrough albums, N.W.A basically told East Coast hip-hop to take its jazz-rap and shove it. And its preachy politics, too. After the group disbanded, producer Dr. Dre founded Death Row records and took that flipoff to the next level. His 1992 solo smash *The Chronic* features system-busting Funkadelic beats designed to rumble your woofer while the matter-of-fact violence of the lyrics blows your smoke-filled mind. On top of it all, Dre's trademark snaky keyboard twists give tunes like "Nothin' But a G Thing" an ominous melodic elegance. Dre's secret weapon, of course, was the young Snoop Doggy Dog, who graces several tracks with his behind-the-beat drawl. The duo brilliantly played off their home region's escalating gang tensions, mythologizing their alliance with Godfatherlike gravity—"Compton and Long Beach together now you know you're in trouble." The album's release dovetailed with the palpable rage surrounding L.A.'s Rodney King riots, becoming in retrospect a de facto soundtrack of unrest. Dre and Snoop inspired many imitators but no real duplicators of their patented ability to give pure voice to the numb genius of a cannabis high amid solutionless chaos.

Dre produced Snoop's *Doggystyle* in 1993 and, among other projects, worked up tracks for Mary J. Blige and put the dig in Blackstreet's "No Diggity." Dre also worked with Death Row's recent acquisition Tupac, supposedly heralding a new dynastic era with the chummy "California Love," but soon ditched the label and its mounting legal problems to form Aftermath, releasing the uneven guest-artist compilation *Dr. Dre Presents . . . The Aftermath.* The only hit from that record was the good-riddance-to-bad-rubbish kiss-off "Been There Done That." Dre's next big move was discovering his next Snoop in white rapper Eminem. The two fell easily into fruitful collaborative mode. Again Dre played the cool, collected voice of wisdom to a burgeoning young talent. But where Snoop was a burnout savant, Eminem was a speed-freak hothead poet. Dre introduced the character of Slim Shady to the world on the comer's debut single "My Name Is." And in case anyone forgot about Dre's own rhyme skills (quite easy to do), his protégé stepped up the props on "Forgot About Dre," the single off his mentor's 1999 album, the confusingly titled *2001,* which also includes monster gangsta-pop trades such as "The Next Episide" and "Still D.R.E." There has yet to be compiled a best-of that harnesses the full force of Dre's career highlights, but 2002's *Chronicle: Best of the Works* at least favors the Snoop years over lesser hits from his pre-N.W.A work. —L.S.

★★ Afterglow (GRP, 1995)
★★★ The Very Best of Dr. John (Rhino, 1995)
★★½ Anutha Zone (Pointblank/Virgin, 1998)
★★★ Duke Elegant (Blue Note, 2000)
★★★½ Creole Moon (Blue Note, 2001)
★★★★ The Essentials (Elektra, 2002)
★★★★ Dr. John Plays Mac Rebennack: The Legendary Sessions, Vol. 1 (Clean Cuts, 2002)
★★★ N'Awlinz: Dis, Dat or D'Udda (Blue Note, 2004)

Mac Rebennack began his musical career in the '50s as a teenage guitarist and pianist on the New Orleans R&B scene, eventually following Earl Palmer, Harold Battiste, and other N.O. session players to Los Angeles in the mid-'60s. And the musical persona Rebennack assumed for much of his solo career—that of Dr. John Creaux, the Night Tripper—was a product of the collision between Louisiana creole funk and West Coast hippie mysticism. Take, for instance, the way *Gris-Gris* parlays the imagery of voodoo magic (the historical Dr. John Creaux was proclaimed the King of Voodoo in 19th-century New Orleans) into the hallucinatory groove of "I Walk on Gilded Splinters," ending up with a sound that draws equally on bayou funk and psychedelic rock.

That fusion didn't always take, of course. *Babylon* quickly dissolves into hippie foolishness, and while *Remedies* has its moments—for instance, the joyful "Mardi Gras Day"—moments just aren't enough. Dr. John didn't really hit his stride until he returned to roots with *Gumbo,* which offers funky updates of such classic New Orleans R&B numbers as "Iko Iko," "Junko Partner," Professor Longhair's classic "Tipitina," and a medley of Huey Smith hits. From there, it's an easy jump to the second-line funk of *In the Right Place,* which was recorded with the Meters and produced by Allan Toussaint; it contains Dr. John's only Top 10 single, "Right Place Wrong Time." There's more of the same on *Desitively Bonnaroo,* thanks to the irresistible rhythms of "(Everybody Wanna Get Rich) Rite Away" and "Quitters Never Win." *The Ultimate Dr. John* compiles highlights from *Gris-Gris, Gumbo, Remedies,* and *Desitively Bonnaroo,* but not necessarily the tunes every fan would have chosen; *Mos' Scocious* is a far more complete and representative anthology.

But the voodoo shtick was just that—a gimmick—and eventually Dr. John decided to try a bit of straight-up rock & roll with *Hollywood Be Thy Name,* a mostly live album that offers mildly spiced renditions of "The Way You Do the Things You Do" and "Yesterday" along with a few Dr. John originals; it's second-rate rock despite his first-rate band. With *City Lights,* he makes a bid for light-jazz respectability, but not even the sympathetic backing of New York studio aces Steve Gadd, Will Lee, and Richard Tee can completely overcome the pedestrian nature of the material; perhaps that's why *Tango Palace* resorts to the jivey insincerity of "Disco-Therapy" and "Fonky Side."

Yet just when it seemed Dr. John was finally played out, he brought his skills back into focus with *Dr. John Plays Mac Rebennack,* a solo piano session that brings him back home to the New Orleans piano stylings he cut his teeth on; essential listening, if only for the rollicking "Memories of Professor Longhair." *The Brightest Smile in Town* broadens the music's scope some with such standards as "Come Rain or Come Shine," but that turned out to be a dangerous precedent, as *In a Sentimental Mood* turned that interest in standards into syrupy pop, despite a coy "Makin' Whoopee" cut with Rickie Lee Jones.

From there it's mostly ping-pong, as Dr. John bounces among light jazz (the *Bluesiana* discs), Mardi Gras revivalism (the touristy *Going Back to New Orleans* and the slightly better *N'Awlinz: Dis, Dat or D'Udda*), empty pop (*Television* and *Afterglow*), and tepid jazz (the well-meant but generally useless *Duke Elegant*). Of his recent albums, *Creole Moon* puts enough spunk into its iteration of N.O. funk to make the tired familiarity of the material forgivable. —J.D.C.

★★★★★	Walking to New Orleans (Capitol, 2002)
★★★★	Essential Fats Domino (EMI, 2003)
★★★	Legends of New Orleans: Fats Domino Live! (Shout Factory, 2003)

Conservative of dress, mild of manner, and unfailingly polite, New Orleans native Antoine "Fats" Domino carried himself with a dignity that made it virtually impossible for critics of early rock & roll to lump him in with the rogues' gallery that included the salacious Presley, the perverted Berry, the crazy Jerry Lee, and the androgynous Little Richard. No, Fats didn't have much in the way of flamboyance going for him; rather, he pushed the music, period. In one of the most fertile producer-artist relationships in history, Fats' recordings were shaped by bandleader, songwriter, arranger, musician, and producer Dave Bartholomew, a genius and visionary whose labs were the J&M and Cosimo recording studios, where he melded the sounds and styles of the Crescent City's multicultural musical heritage into a singular and furiously propulsive branch of rock & roll, every bit as distinctive and exciting as that of Memphis (Sun Records) or Chicago (Chess Records). "I didn't invent the New Orleans sound," Bartholomew once noted. "I just took it off the streets." Between 1950 and 1963, Domino's Imperial recordings (most written by Domino-Bartholomew) sold 63 million copies, and 23 of them went gold, which rivaled Presley's numbers to that time. And one of those singles that didn't go gold, his 1950 debut, "The Fat Man" (a #2 R&B single), is among the contenders for the first rock & roll record. When Domino signed with ABC-Paramount in 1963, he had fashioned not merely an imposing body of work, but a dynasty. It couldn't have happened to a nicer guy.

Domino's influences were many and varied, encompassing all the important names in New Orleans music in the '40s and the R&B stars of his youth. Professor Longhair and Champion Jack Dupree are the touchstones of his piano style; powerful vocalists such as Big Joe Turner, Roy Brown, and Amos Milburn pointed the way vocally with their clever phrasing and forceful personalities. But above these stood Louis Jordan, whose music rocked mightily before the term "rocked" was even in vogue and who further brought to the table a pronounced joie de vivre, which turned out to be true of Fats as well.

Having been dominant on the R&B charts since the release of "The Fat Man," Domino cracked the pop charts in 1952 with "Goin' Home" and didn't leave until 1963. His first pop Top 10 single came in 1955 with "Ain't That a Shame" (which became a #1 pop hit in a sedate Pat Boone cover version); two years later "Blue Monday" topped the R&B chart, and peaked at #5 in pop, and thereafter Fats was a mainstay in the Top 10 and Top 20 through 1962. Oddly, for having sold so many records, he never had a #1 pop hit; "Blueberry Hill," at #2 in 1957, was as close as he got. Which means nothing at all, because Fats has plenty of other numbers he can roll out, but more than that he has history on his side: His music endures, long after a lot of other #1 records have been forgotten. "Blueberry Hill," "Ain't That a Shame," "I'm Walkin'," "Walking to New Orleans," "Whole Lotta Lovin'," "Blue Monday," "I'm Gonna Be a Wheel Someday," "Valley of Tears," "Wait and See," "Sick and Tired"—as Little Richard would say, "Shut up!"

Capitol's four-CD box set, *Walking to New Orleans,* a repackaging of EMI's late-1991 four-CD box set, *They Call Me the Fat Man,* tells the whole glorious Imperial story in one outstanding package. Domino is reported to have cut some 260 sides for the label, and 100 of those are in the box set. Only one track, "Darktown Strutters' Ball" from 1958, is previously unreleased; only three tracks are alternate versions. The set also comes with an entertaining and informative biography by veteran New Orleans music historian Jeff Hannusch that is further buttressed by complete discographical and session details (although the lack of personnel credits on the sessions is an unfortunate oversight). Finally, a great American artist, whose most important work had fallen largely out of print save for a couple of hits collections, was given his just due. As a low-cost alternative to the box set, *The Fat Man: 25 Classic Performances* distills four CDs' worth of material to one vital disc of Imperial monuments, with abridged but essential annotation; a further distillation of essential hits comes from the same label via the 20-track *Fats Domino Jukebox.* The Imperial years have been further rounded out by four wonderful twofer discs from Collectables, comprising eight Imperial albums, plus two bonus tracks per disc, for a total of 104 cuts, not all of which are on the EMI box set. This is the Domino-Bartholomew team in its prime: The four CDs contain a wealth of their song collaborations that were either single B sides or album cuts only, making each disc essential for appraising the evolution of the team's artistry. Amazing, overpowering, life-affirming music, this. Curb's *All-Time Greatest Hits* disc distills Domino's catalogue even further, down to a dozen choice tracks. Although the liner copy notes erroneously that Domino was discovered playing in Dave Bartholomew's band, the disc is otherwise a solid, albeit abridged, document of the glory years.

After leaving Imperial, Fats recorded into the early '70s for ABC, Mercury, and Reprise, without commercial success but not for lack of quality music. Little of this period remains in print, but one interesting artifact from 1968, the Richard Perry–produced *Fats Is Back,* has been returned to print on the Bullseye Blues label. Perry became one of the most successful producers of the '70s and '80s on the strength of his work with Barbra Streisand, Leo Sayer, Ringo Starr, Carly Simon, Art Garfunkel, the Pointer Sisters, and others, but the Fats project came at the start of his estimable career, following his first production, Captain Beefheart's *Safe as Milk.* Perry would become famous for his big, state-of-the-art productions later, but he wisely kept it close to the bone with Fats, and like Bartholomew before him let the artist lay his personality on a set of solid songs, including a vibrant reading of Barbara George's "I Know" and two powerhouse covers of Lennon-McCartney songs, "Lady Madonna" and a smokin' rendition of "Lovely Rita." The nicest touch is at the end, with the wistful, bluesy "One More Song for You," sung with sincerity and grace by an artist who was always ready to play another song for the fans who had made an international star of the youngest of nine children born in 1928 to a poor family in New Orleans' Ninth Ward. The performance resonates with the weight of his history.

Tomato/Rhino's two-disc *Antoine "Fats" Domino* collection is credited as a live recording, although no audience is heard on the discs. Recorded in 1979 in Galveston and Houston, TX, with a band that featured a number of Domino's stalwart hands from the Imperial years—Herb Hardesty leading the orchestra and wailing on tenor sax; Fred Kemp on tenor sax; Lee Allen on tenor sax—Fats is in a genial mood on 34 mostly familiar tracks heavy on hits (how many artists can release 34 tracks and have them be described accurately as "heavy on hits"?) and the band is simply outstanding, blowing wild and hard on the uptempo numbers and deeply melancholy on introspective songs such as the instrumental version of "Misty" included here. Fats, of huskier voice but with his sly phrasing intact, still brings the passion and presence of his younger years to each number. A better live album choice would be Atlantic's *Live at Montreux,* recorded in 1973 in Montreux, Switzerland, at the Golden Rose Television Festival. The 14 songs Fats pumps out with his band are mostly familiar Domino monuments, and he barely takes a breath between songs. But he's in great voice, high spirits, and is playing his tail end off on piano—it's the best live capture of Domino's exceptional keyboard artistry. After a rousing version of "When the Saints Go Marching In," Domino closes out the set by adding a little New Orleans gumbo to spice up an instrumental version of the old pop standard "Sentimental Journey," sending the crowd home happy.

Fats' latest studio effort came in 1993 with his self-produced yuletide gem, *Christmas Gumbo* (originally released as *Christmas Is a Special Day*). This one finds Fats in a reflective mood for the most part, which makes the long player more suitable for late-night chilling out in a room illuminated only by Christmas-tree lights. That said, the album opens on a bopping note, with "I Told Santa Claus"—an appeal for a woman to be left under his Christmas tree—and Fats takes "Jingle Bells" and "Frosty the Snowman" at a brisk pace, but he closes out the album with "White Christmas," "Please Come Home for Christmas," and a somber "Amazing Grace," to wind things up on thoughtful note. The electronic keyboards don't do a lot for Fats' sound, but his New Orleans twist on the seasonal standards makes for a warm, engaging outing nonetheless, one that could only have come from a man as big-hearted as Fats Domino. —D.M.

The Donnas

★★	The Donnas (1996; Lookout, 1998)
★★	American Teenage Rock 'n' Roll Machine (Lookout, 1998)
★★★	Get Skintight (Lookout, 1999)
★★★	The Donnas Turn 21 (Lookout, 2001)
★★★	Spend the Night (Atlantic, 2002)

Like obvious inspirations the Ramones and AC/DC, the Donnas couldn't care less about reinventing themselves with every album. They're four sugar-and-spite femme fatales cruising for boy toys in their lemon-scented rides and pretending they're mini-mart punk's answer to Kiss, circa *Destroyer,* over and over again. At their best, the Donnas offer a guileless take on adolescent alienation; they traffic in kicks, not catharsis, fun rather than rage, and they absolutely, positively, do not do ballads.

Together in various incarnations since grade school in Palo Alto, CA, the four Donnas initially performed songs written for them by producer Darin Raffaelli, who played Kim Fowley to the girls' underage Runaways. On the debut, they sing juvenile-delinquent anthems such as "Everybody's Smoking Cheeba" and "I Wanna Be a Unabomber" at blitzkrieg-bop tempos. *American Teenage Rock 'n' Roll Machine* gives the quartet a twist of glam-rock, but it's with *Get Skintight* that the quartet finds its voice: the suburbia-in-excelsis worldview of a John Hughes flick transplanted to a post–Green Day world. The production by Steve and Jeff McDonald of California kitsch-pop maestros Redd Kross slows down the tempos just a notch and fattens the melodies into arena-rock bad-girl singalongs. *The Donnas Turn 21* is *Skintight* Part 2; it reshuffles the same five chords, lives to "party like Cheech and Chong," and substitutes a faithful cover of Judas Priest's "Living After Midnight" for the previous album's take on Mötley Crüe's "Too Fast for Love." On *Spend the Night,* the sound and themes haven't changed, but the skills of the musicians have improved markedly, particularly Donna R.'s Ace Frehley-inspired guitar work. —G.K.

★★★	Donovan in Concert (Epic, 1968)
★★★½	Hurdy Gurdy Man (1968; Epic, 1986)
★★★	Barabajagal (1969; Epic, 1987)
★★★★★	Donovan's Greatest Hits (Epic, 1969)
★★½	Open Road (Epic, 1970)
★★	Cosmic Wheels (Epic, 1973)
★★½	Essence to Essence (Epic, 1974)
★★★	7 Tease (Epic, 1974)
★★½	Slow Down World (Epic, 1976)
★★★★	Troubadour: The Definitive Collection, 1964–1976 (Epic/Legacy, 1991)
★★★	Sutras (American, 1996)
★★★★	The Essential Donovan (Sony Legacy, 2004)

Epitomizing flower power, Donovan's trippy musings are redeemed from '60s nostalgia not only by his belief that there's nothing funny about peace, love, and understanding, but also by the sheer pop charm of his songs. Coming on as Bob Dylan's breathlessly sincere Scots twin, Donovan was a quintessential folkie—acoustic guitar, harmonica, story songs, benign rebellion, and, making him distinctive, a Celtic romanticism. Dewy with hope, confident and ambitious, the title track of *Catch the Wind* and "Ramblin' Boy" radiated mythic, wide-eyed yearning.

As Dylan had, Donovan then went electric. But if Bob's rock was tough and bluesy, Donovan's was pop, spun from the sassy tunefulness of his mod peers. And it was psychedelic. Indeed, "Sunshine Superman" bounced along as a wry, ultrahip manifesto, its winking delivery hinting at all manner of illicit pleasures. "Mellow Yellow" (supposedly about the arcane high of smoking banana peels) outright broadcast the theme of blow-your-mind wisdom.

With its cover shot of the maharishi and swooning ditties like "Wear Your Love Like Heaven," *A Gift From a Flower to a Garden* delivered the Donovan persona to the max—a troubadour Saint Francis who filed his lyrics with exotic poetry that promoted a bliss straight out of William Blake's *Songs of Innocence.* After a string of late-'60s hits, produced fancifully by Mickie Most, celebrating a private wonderland—"Jennifer Juniper," "Hurdy Gurdy Man," and "Barabajagal" (with Jeff Beck)—Donovan's moment had passed. Such later work as *Open Road* and *Cosmic Wheels* showed occasional strength, but compared to the golden-hour singles, the music was less remarkable.

Troubadour collects all his best work; the strong liner notes help put it in context. In 1996, the singer teamed up with Rick Rubin in an attempt to present a lean, essential Donovan (somewhat in the way Rubin had presented the older Johnny Cash). The resulting *Sutras* was fine, accomplished folk with Buddhist shadings, but it didn't catch fire. —P.E.

★	Sibling Rivalry (Pyramid, 2000)
★★★★	Greatest Hits (Rhino, 2001)
★★½	Doobies' Choice (Rhino, 2002)

The quintessential biker-meets-hippie California band, Doobie Brothers yielded a succession of soft-rock hits in the mid-'70s that have come to symbolize the complacent but irresistible charms of the era. Moving from mellow boogie to slick blue-eyed soul, this long-running group actually improved along the way. The Doobies began as a bar band in Northern California, earning a following among the Hell's Angels for their Sunday-afternoon jam sessions. The group's debut floated away to oblivion, but the Doobies honed a couple of sharp hooks on *Toulouse Street,* and bagged a winner. The formula was set—toe-tapping power chords ("China Grove"), a strum-along buzz ("Listen to the Music"), high group harmonies, and choruses repetitive enough to drill their just-groovin'-on-it platitudes into listeners' skulls—and would serve them well for much of the decade. Laid-back to the point of appearing blank, the Doobies come on like a slightly heavier Eagles—or a slimmed-down Bachman-Turner Overdrive. *The Captain and Me* belies the extent of the group's vision: "Rockin' Down the Highway" and "Long Train Runnin' " are virtual clones of the previously mentioned songs, though that didn't stop them from becoming just as popular.

By the fourth album, lead guitarist and chief composer Tom Johnston starts to seem tapped out. Rhythm guitarist Patrick Simmons supplies the ersatz country-rock hit "Black Water," but the rest of *Vices* barely stays afloat. *Stampede* is led by Jeff "Skunk" Baxter, a studio guitarist for Steely Dan: Centered around a sluggish Motown cover ("Take Me in Your Arms"), the thundering charge never quite gains sufficient momentum. Exit Baxter, enter singer Michael McDonald, another Steely Dan alumnus. His luxurious tone and grain of soulfulness turned the Doobie Brothers' beat around. The 1976 hit "Takin' It to the Streets" steers clear of the funky gutter, reaching instead for a loftier veneer: MOR&B. "Takin' It to the Streets" also revolves around McDonald's vocals, electric piano, and a mildly syncopated beat—the guitars and mellow country-rock gait are conspicuously absent. The Doobies quickly became Michael McDonald's franchise. Johnston left in 1978, and the Brothers went on to release one of their best. *Minute by Minute*'s title cut and the hit single "What a Fool Believes" flaunt McDonald's suave vocal mastery quite effectively, though this elegant penthouse heartbreak is certainly a far cry from the group's origins.

The inevitable reunion (sans McDonald) came in 1989 with *Cycles,* and, God, it's awful. Save for "The Doctor," a vapid sing-along ("Music is the doctor/ Makes you feel like you want to") that became a Top 10 hit, the Brothers seem unable to recapture any of their old magic for simply putting words and music together in an appealing way. Ditto for *Brotherhood,* minus the hit. McDonald joined in for a series of concerts in 1996 benefitting the Wildlife Conservation Society. The resulting live double album, *Rockin' Down the Highway,* is slick to the point of anonymity, and a long haul even for diehard fans; *The Best of the Doobie Brothers Live* trims it down to one palatable disc. When last heard from, on *Sibling Rivalry,* the Doobies were still struggling vainly to put their formula to work again, with hideous consequences. (How's this for hypocrisy: a band named after pot singing "Down on every corner/We got children sellin' dope/Who's gonna send a message/And try to give 'em hope.") McDonald wisely stayed far away.

The Doobies were essentially a singles band; taste more than the hits and you're courting heartburn. *Long Train Runnin',* a four-disc, 79-track box set, is the definitive, if burdensome, anthology. The various stocking-stuffer collections are preferable, but of them, only the Rhino set fully bridges the Johnston and McDonald eras. Avoid *Doobies' Choice,* cuts supposedly chosen by the band: It makes weird choices and pushes the new stuff hard. —M.C./B.S.

★★★★	Bright Midnight: Live in America (Bright Midnight, 2002)

★★★½ Live in Hollywood, Aquarius (WEA, 2002)
★★★★★ Legacy: The Absolute Best (Rhino, 2003)

Three great American '60s bands rendered versions of the California myth. For the Beach Boys, it was sun, surf, and teenage blondes. The Grateful Dead embodied hippie utopianism, the acid love-in, and the endless, mystic jam. The Doors' California was a construct of the darker psyche; it was L.A. crash pads and needle fever, Hollywood bungalows and film-noir threat. At its far limits were the surrounding hills—rich with the threat and promise of Indian burial grounds and natural mysteries—and the ocean, surging deep into oblivion and release. The Doors were originals—Robbie Krieger, a competent guitarist who sounded best when he kept things either elegant or bluesy; the steady John Densmore on drums; and Ray Manzarek, an organist and electric piano player whose semiclassical turns added a touch of the baroque.

The Doors ultimately, however, were Jim Morrison. He was dangerous, raw, beautiful, half-erect in his skintight leather pants, and fatefully self-destructive. By the end of his life, he was tragic and pathetic. It was no wonder that he cited the French Symbolists—especially Rimbaud and Baudelaire—as inspiration. At their best, his suggestive lyrics were clipped and cinematic, either bursts of street talk or snatches at myth. Calling himself an "erotic politician," Morrison was preoccupied with urge, rebellion, and release—if some of his work now sounds melodramatic or forced, his intensity remains compelling, and his acknowledgment of night, pain, and loneliness comes off as riveting and real.

Although the abbreviated, 45 version hit harder, "Light My Fire" neatly introduced the Doors' effect: vocals alternately commanding and stoned, swirling organ and the message that sex could mean deliverance. "Break on Through," however, is the debut album's better song and the essential Doors statement. "The End" attempted an epic—the song served notice that this band was going deep. With the exception of the hard blues "Love Me Two Times" and the rock tango "Moonlight Drive," *Strange Days* didn't have the power of *The Doors;* it sounded instead like twilit, ominous carnival music. "People Are Strange," "Strange Days," and "I Can't See Your Face in My Mind" obsessively examined disconnection and the sense of drifting; "Horse Latitudes" was an early example of sheer atmosphere.

Waiting for the Sun featured "Hello, I Love You," a jagged Kinks ripoff in which Morrison comes on like a rapist; "Five to One" was revolutionary sloganeering. The rest of the record was considerably subtler: Krieger's flamenco guitar on "Spanish Caravan" is stirring, "Summer's Almost Gone" is remarkably tender, and the chanted "My Wild Love," with its affecting, cracked-voice vocal, works well at re-creating an air of primitive folk power.

The Door's shakiest album, *The Soft Parade,* was cluttered with horns and strings. While not at all music for the band's hard-rock followers, Krieger's "Touch Me" and "Tell All the People" are intriguing; they're pop songs, basically, but sifted through the Doors' sensibilities, they take on a surreal quality. "Wild Child" is Morrison parodying himself, and the long concept title song doesn't work.

A return to form, *Morrison Hotel* was their most cohesive record; aside from the throwaway grunter "Maggie McGill," every song was masterful—and the band swings tougher and easier than they ever had before. Morrison's voice is almost shot, but its strain lends grit to the rockers ("Roadhouse Blues," "You Make Me Real") and poignancy to the ballads ("Blue Sunday," "Indian Summer"). The lyrics are some of Morrison's finest; "Queen of the Highway," in particular, neatly fuses contemporary reference and myth.

"Riders on the Storm," "Love Her Madly," "L'America," and the title track were the standouts of the final album, *L.A. Woman.* Inventive playing characterizes every song, but so does a heavy air of psychic exhaustion. Morrison's voice is a ghost of its former glory—doom, heartbreak, and frustration sound in his every note. Difficult and sad, the record has some of the power of Neil Young's *Tonight's the Night:* It's a straining for catharsis.

The Doors are a bit overrepresented by compilations and live albums, but most casual fans will be well served by *Greatest Hits,* which covers most of the bases. Fanatics will want to find the four-CD box set that came out in 1997; almost every cut had been previously unreleased. The three surviving band members fill one CD with their personal favorites—we can only imagine which songs Jim would have selected.

But the very best collection of Doors material is 2003's *Legacy,* a two-CD set that expands the basic greatest-hits format. It features 34 of the Doors' best album tracks in chronological order. Hard-core fans will bemoan the omission of "Love Street," but the span of this collection is wide enough to capture the band in various modifications, yet narrow enough to make most tracks familiar even to casual fans. The previously unreleased "Celebration of the Lizard" renders this an essential set for collectors.

There are a number of anomalous Doors releases, including *An American Prayer,* which belongs in the books-on-tape category. It features Morrison reading his poetry over atmospherics from the band; it's intriguing but suitable mainly for Morrison fanatics.

Bright Midnight is the band's odds-and-sods release, material that was left off the box set. The sound quality is fantastic: One can hear the powerhouse live show that was the Doors at their prime. Also noteworthy is *Live in Hollywood,* which culls 16 songs from two shows at the Aquarius Theatre in July 1969, more evidence that Morrison was a remarkable performer.

The band reunited in 2002, with Ian Astbury (the Cult) filling in for Morrison. Original drummer John Densmore chose not to reenlist and in 2003 he sued, seeking restrictions on the use of the name "the Doors." —P.E./C.R.C.

Doves

★★★½ Lost Souls (Astralwerks, 2000)
★★★ The Last Broadcast (Capitol, 2002)

Rising from the ashes of completely forgettable dance outfit Sub Sub, Manchester's Doves surprised some people by combining goth-tinged melodrama, pop smarts, and dance-floor energy and sonics. *Lost Souls* evokes Fatboy Slim–style big beats and Beatlesque harmonies on a track like "Here It Comes"; on others, a dollop of '60s psych, some '80s techno, or even the Pink Floyd–inspired headphone rock of the '70s. "Sea Song" sounds suspiciously like *Hurting*-era Tears for Fears, but for the most part, Doves do a good job of masking specific influences to create a general mood of Brit sad-boy loneliness. It's striking how at odds Jimi Goodwin's mundane and homely vocals are with the pyrotechnics erupting around him. And Goodwin's deadpan, some would say dreary, melancholic crooning isn't for everyone. You may not necessarily buy a word of what he's selling, but in the end, it doesn't matter because Doves are so adept at erecting vast FM radio towers of approximated warmth and passion. Real confessions can make you squirm, but *Lost Souls* only touches on what it means to be human, without ever reminding you that life is seldom so pretty or grandly realized.

Their followup, *The Last Broadcast,* is stylistically quite similar to their debut, and just as expansive and ambitious. Lyrically, it's even vaguer than its already kind of emotionally vague predecessor, as if this time around, all attention was put into the aural fireworks. Doves have an amazing ability to write a lilting, harmonious pop song, such as "Words," augmented by the right amount of discordant guitars that rub against the rest of the instruments until the whole construction starts to tilt. Flourishes on *The Last Broadcast* include the Brazilian carnival drums that end "There Goes the Fear," but the disc's highlight is "N.Y.," featuring stately horns, Link Wray–style slash guitars, and Pink Floyd pathos culminating in an exhilarating blast of electro-punk noise that trails off slowly into a watercolor English sunset. They pile on the sound via traditional instruments and electronics, along with Goodwin's warbling and sudden changes in mood and tempo, but in the space of a four-minute song, the technique becomes unwieldy. It's hard to fault the band, though, for having too many ideas or for trying so hard to turn a verse/chorus/verse pop confection into something that is twisted and ingeniously crafted. —S.S.

Doug E. Fresh

★★★★ Oh, My God! (Reality, 1987)
★★★ The World's Greatest Entertainer (Reality, 1988)
★★½ Play (Gee Street, 1995)
★★★★ Greatest Hits, Vol. 1 (Bust It, 1996)

Unquestionably one of the greatest beat-boxers of all time, Doug E. Fresh capably created an extraordinary palette of rhythmic and musical noises with his mouth, often in a nimble, giddy mode instantly distinguishable from the booming, raspy tones of the Fat Boys' Human Beat Box (may he rest in peace). Born Doug E. Davis on September 17, 1966, in Barbados, Fresh moved to New York and made his 1983 recording debut on the 12" single "Pass the Budda" with Spoonie Gee on the Spotlight label. Spoonie was the nephew of legendary Harlem record-store and label owner Bobby Robinson, who had issued hits like Bobby Marchan's 1960 R&B #1 "Something on My Mind," a protorap classic. He also released "Just Having Fun" by Douge [*sic*] Fresh with DJ's Chill Will and Barry Bee on his Enjoy label in 1984, a hard-rocking electro jam that showcased Fresh's stunning beat-box talent.

Fresh's 1985 single "The Show/La Di Da Di," on the Reality label, made him one of hip-hop's biggest stars and launched the career of Slick Rick (then known as MC Ricky D). "The Show" was exactly what its title suggested, both a showcase for Fresh's Get Fresh Crew and a narrative tale leading up to Fresh rocking a live show; most hip-hop fans at the time memorized it verbatim. In fact, Fresh's vitality was due to his ability to rock a crowd (a skill that has unfortunately lost currency as hip-hop has aged), and his debut album, *Oh, My God!,* translated his stage-tested routines superbly to the studio. Although Fresh's popularity had faded by the '90s, he received a memorable name-check on A Tribe Called Quest's track "What?" when Q-Tip wondered, "What is hip-hop if it doesn't have violence? Chill for a minute, Doug E. Fresh said silence." His 1995 comeback album *Play* was an entertaining reinvigoration of old-school styles. Fresh maintains a profile on the hip-hop scene, hosting old-school events in New York's Central Park and elsewhere. In 2002, Fresh authored *Think Again,* the first book in Scholastic's Rap & Read series of children's books, which came with a CD single of Fresh rapping the story over a Prince Paul beat. —P.R.

Nick Drake

★★★★★	Five Leaves Left (1969; Island, 2003)
★★★★	Bryter Layter (1970; Island, 2003)
★★★★★	Pink Moon (1972; Island, 2003)
★★★½	Time of No Reply (Hannibal, 1986)
★★★★	Fruit Tree (Hannibal, 1986)
★★★★	Way to Blue: An Introduction to Nick Drake (1994; Hannibal, 2003)
★★★	Made to Love Magic (Island, 2004)

Nick Drake climbed to the top of the hot-dead-English-guy charts in the late '80s, when the boxed set *Fruit Tree* first exposed America to this gentle, mystical singer-songwriter. Dead of an accidental prescription drug overdose in 1974, Drake recorded barely two hours' worth of music in his entire career, but he had a warm, intimate voice and acoustic guitar to flesh out his frail love-and-death ballads, and decades after the fact, practically everyone who hears *Pink Moon* still flips for its lunar beauty. Taller than Marc Bolan, foxier than Brian Jones, just plain deader than Syd Barrett, Nick Drake would enjoy a cult following even if he hadn't been a genius, and yet as a cursory listen to "Cello Song" or "Place To Be" should convince anyone, a genius is what he was.

Five Leaves Left (a rolling-paper reference) has long, gorgeous folkie ruminations like "Time Has Told Me," "Saturday Sun," and "The Thoughts Of Mary Jane," with piano and strings to expand on Drake's guitar. *Bryter Layter* has flatter songs and fluffier production, despite the highlights "Fly," "Northern Sky," and the much-maligned "Poor Boy." But *Pink Moon* is perfect: 28 minutes, just Drake murmuring over acoustic guitar and occasional piano, stripped-down songs, most over in two minutes or so, all of them unforgettable. The title song offers a chilly prayer about death, while cryptic fragments like "Ride," "Road," and "Know" have an eerie sensuality to go with that melancholic late-night ambience. Greener than the hills but darker than the deepest sea, modulating from a whisper to a slightly louder whisper, *Pink Moon* is Orpheus wooing Eurydice with a guitar, and "Place To Be" remains one of the most seductive love songs ever written.

Although totally unheard at the time, Drake's songs have kept circulating via soundtracks, commercials, mix tapes, and indie/college radio, not to mention by inheritors like Elliott Smith, Cat Power, and Belle and Sebastian. *Time of No Reply*'s outtakes are for cultists; the compilation *Way To Blue* decently selected; the complete-works box *Fruit Tree* overly pricey (two CDs' worth of music spread over four CDs) but something you won't get tired of any time soon. The rarities collection *Made to Love Magic* unearthed a previously unheard song, "Tow the Line." It also has a few alternate versions, including a solo acoustic "River Man" and heinous orchestral remixes. The 48-minute documentary *A Skin Too Few* is worthwhile, though, unfortunately, no performance footage exists. Much more famous, beloved, and influential today than during his lifetime, Nick Drake continues to reach listeners' hearts, finally finding his own "Place to Be." —R.S.

The Drifters

★★★★★	All-Time Greatest Hits and More 1959–1965 (Atlantic, 1988)
★★★★	The Very Best of the Drifters (Rhino, 1993)
★★★★★	Rockin' & Driftin': The Drifters Box (Rhino, 1996)
★★★★	The Legendary Group at Their Best (Collectables, 2000)
★★★★	Clyde McPhatter & The Drifters/Rockin' & Driftin' (Collectables, 1998)
★★★★	Up on the Roof/Under the Boardwalk (Collectables, 1998)
★★★★	Save the Last Dance for Me/The Good Life With the Drifters (Collectables, 2000)

As Billy Vera points out in his excellent liner notes to the essential box set, *Rockin' & Driftin': The Drifters Box,* the only sensible way to approach this story is to think of the group as a franchise, a trademark name with an ever-shifting lineup rather than a single stable entity that produced stellar music from 1953 into the late '60s. In fact, Atlantic's legendary house engineer Tom Dowd recalls working with "30 to 35 different Drifters over the years. Nobody could pinpoint who sang on what." If the Drifters had become wealthy men for their endeavors, they could be called "the best team that money could buy." That none of them ended up with fat wallets is another infuriating, oft-told tale of music-business chicanery by unscrupulous management in a day when artists were regularly taken to the cleaners financially. Instead, they were simply the best team, in all their incarnations, and their legacy is monumental.

Start with an unbelievable roster of great lead singers, beginning in 1953 with group founder Clyde McPhatter, who passed the torch to Johnny Moore, who passed it to Benny Nelson (better known as Ben E. King), who passed it to Rudy Lewis, who passed it to Charlie Thomas, who passed it back to Johnny Moore and then took it back again. Then reflect on the other group members who would occasionally step out for a memorable lead vocal, such as Gerhardt "Gay" Thrasher, whose stunning performance on 1955's "Your Promise to Be Mine" is an R&B classic, and Bobby Hendricks, whose swaggering take on 1958's mid-level chart entry "Drip Drop" was the blueprint for Dion's #6 pop hit in 1963. They were the vocal equivalent of every banjo hitter on a championship baseball team who suddenly starts knocking the cover off the ball in the World Series. And that's not even counting longtime group member Bill Pinkney, who had a few choice moments of his own in the lead role, including a colead with McPhatter on the group's plaintive rendition of Irving Berlin's "White Christmas," a #2 R&B hit in 1954. These vocalists emerged from long shadows and cast substantial ones of their own: McPhatter links the soulful, falsetto moans of gospel great Claude Jeter to the signature styles developed by Smokey Robinson and Al Green; Ben E. King's muscular, masculine vocalizing is the bridge from the frenetic brio of the Sensational Nightingales' Julius Cheeks to the macho posturing of Wilson Pickett.

From there, consider the masters behind the scenes. The Drifters' first producers at Atlantic Records were a team comprising label founders Ahmet Ertegun and Jerry Wexler, with Ertegun's brother Nesuhi sometimes sitting behind the board on his own; all were aided further by Dowd, whose degree of peer respect in the recording industry surpasses that of almost any other engineer who has ever set foot in a studio. In 1958, Ertegun and Wexler handed the production reins to Jerry Leiber and Mike Stoller, whose personal "lab," the Coasters, already had placed three consecutive singles in the Top 10, including one chart-topper in 1958's "Yakety Yak." When Leiber and Stoller moved on in 1963 to devote their time to starting the Red Bird label, Bert Berns, who'd been coming up with solid chart hits at a time when the New York studio scene was stagnating, signed up for the Drifters' final chart run. Not the least but perhaps the least-known of this cast was arranger/conductor Stan Applebaum, who was responsible for the emotionally charged string arrangements on the great '60s hits (strings being a first on a rock & roll record when Applebaum introduced them on the luminous "There Goes My Baby," the 1959 #1 R&B [#2 pop] hit that introduced Ben E. King as lead singer, along with an entire new supporting cast of Drifters). Session musicians included formidable instrumentalists such as Big Al Sears on saxophone, drummer Panama Francis, and guitarist Mickey Baker—players who had deep roots in jazz and small-combo R&B.

Then there were the songwriters. Apart from a few questionable copyrights credited to a man Wexler recalls as "a greasy accountant" and partner of the band's despised manager, along with some other one-shots (not that these were undistinguished folk: Atlantic's house arranger Jesse Stone, an accomplished songwriter, penned the group's first hit, the classic "Money Honey"), the lineup responsible for writing the Drifters' timeless hits includes McPhatter himself ("Honey Love," a #1 R&B hit in 1954), Leiber and Stoller, Doc Pomus and Mort Shuman, Gerry Goffin and Carole King, Barry Mann and Cynthia Weil, Burt Bacharach and Hal David—the cream of the crop of the Brill Building school.

Born and raised in Durham, NC, where he sang in the Mount Calvary Baptist Church choir, McPhatter was 12 when his family moved to Harlem. While in high school he joined the Mount Lebanon Singers, whose membership included author James Baldwin's brothers David and Wilmer. In 1950, McPhatter and his Mount Lebanon cohort Charlie White auditioned for and were hired by Billy Ward for a new R&B group he was assembling. Signed to the Federal label, Billy Ward & His Dominoes, with McPhatter singing lead, became a popular R&B attraction. But after two years, McPhatter was getting restless, and Ward, impatient with his singer's increasing individuality, fired him.

McPhatter was holed up in a Harlem tenement when Atlantic founder Ahmet Ertegun tracked him down and convinced him to sign with his fledgling label. Before his first session, McPhatter assembled a backing group with some of his Mount Lebanon mates, including David Baldwin. A quintet dubbed Clyde McPhatter & the Drifters cut its first session in June 1953, but the session went so poorly that only one track, "Lucille," was ever released, and only as a B side a year later. In early August, McPhatter went back to the studio with a new Drifters lineup: Bill Pinkney, Andrew "Bubba" Thrasher, Gerhart "Gay" Thrasher, and Willie Ferbie. From that session came "Money Honey," which hit #1 shortly after release in August 1953, and the Drifters' saga was officially under way. The group hit #1 once more, with "Honey Love," before McPhatter was drafted into the Army in 1954.

The Drifters continued without him, with Johnny Moore joining as lead singer for 1955's chart-topping "Adorable" and 1956's #10 R&B hit "Ruby Baby" (another Drifters song later done to near perfection by Dion). McPhatter returned from his Army hitch in 1956 and went solo, topping the R&B chart out of the box with "Treasure of Love," again in 1957 with

"Long Lonely Nights," and in 1958 with "A Lover's Question," which also crossed over to #6 pop. In 1956, he also landed at #4 R&B with the towering love ballad, "Without Love (There Is Nothing)." His #7 pop hit from 1962, Billy Swan's "Lover Please," was his last chart appearance before alcoholism destroyed his career and eventually cost him his life. He died of a heart attack in Teaneck, NJ, in 1972.

The Drifters had begun to drift artistically after "Long Lonely Nights." With Bobby Hendricks singing lead, 1958's "Drip Drop" failed even to chart R&B, but it had a weak #58 showing pop. Internal strife between the group members and their manager, George Treadwell, boiled over, and Treadwell fired the entire group. He replaced them with a Harlem vocal group that had been performing as the Crowns. Its personnel included lead singer Benny (Ben E. King) Nelson, Charlie Thomas, James Clark, Dock Green, and Elsbeary Hobbs.

With Leiber and Stoller now producing and Stan Applebaum arranging and conducting, the reconstituted Drifters, with King singing lead, made their debut in 1959 with "There Goes My Baby." Thus began a run of 16 Top 40 singles that lasted five years, into 1964. From that 1959 starting point through 1963, when they moved on to Red Bird, Leiber and Stoller framed great songs from Pomus-Shuman and others with Applebaum's lush orchestrations and arrangements that incorporated a pronounced South American *bailon* rhythm—stylistic flourishes previously unheard in American pop. It was also the template for the soul-pop fusion on which the Motown dynasty was built.

Come 1960, and King exited for a solo career—which would yield two indisputably great singles: his self-penned 1960 Top 10 poetic masterpiece, "Spanish Harlem," and 1961's haunting plea, "Stand By Me," written by King in collaboration with Leiber and Stoller (it peaked at #4 pop and topped the R&B chart)—shortly after the group topped the pop chart with one of the most monumental of all Pomus-Shuman songs, "Save the Last Dance for Me." Enter then, by way of the Clara Ward Singers, Rudy Lewis. Three more years of hits followed, including two Top 10 entries, Goffin-King's "Up on the Roof" in 1962 and Weil, Mann, Leiber, and Stoller's evocative "On Broadway," in 1963. In a history studded with so many highlights, one of the most memorable moments came in 1964, when Lewis died of a heroin overdose on the day of a recording session. Johnny Moore, who had been with the group from 1955 to 1957, following McPhatter's departure, had rejoined in 1963. He stepped up to take the lead on the Bert Berns–produced "Under the Boardwalk," and in the midst of mind-numbing grief, Moore delivered one of the most nuanced and poignant performances in rock & roll history.

Under Berns' guidance, the Drifters cut some good singles in the mid-'60s—Mann and Weil's "Saturday Night at the Movies" (#18 pop, 1964); "I've Got Sand in My Shoes" (#33 pop, 1964); Jeff Barry and Ellie Greenwich's "I'll Take You Where the Music's Playing" (#51 pop, 1965)—but the run was over. Another configuration of the group recorded in England in the early '70s and made the Top 10 several times in 1974 and 1975, but America never heard those songs.

There's only one place to go to get the unexpurgated Drifters story, and that's the Rhino box mentioned above, *Rockin' & Driftin': The Drifters Box.* This three-CD collection includes all the important Drifters sides—not only hits, but B sides that illustrate the group's stylistic evolution as new singers entered the picture—from the beginning to the quiet end in England, as well as McPhatter's and King's solo hits, 79 cuts in all. Supplementing those are Vera's abovementioned liner notes, literate and accessible, which not only keep the record straight with regard to the exhausting personnel changes but also provide vital insight into the sessions that produced this amazing body of work. As a record collector and historian, Vera drew on his knowledge of the band as well as his personal friendship with many of the key players to offer a fascinating inside look at history in the making. Additional perspective on the group is provided by a brief excerpt from Wexler's autobiography, *Rhythm and the Blues: A Life in American Music* (Alfred A. Knopf, 1993), and via an overview of group harmony's development in the essay "Drifting Into Doo-Wop" by Peter Grendysa. Toss in a well-annotated track listing and a full page of small-print lists of every Drifters iteration along with photographs of each and . . . whew! This is the real deal, a box set with a wealth of vital information and a mother lode of timeless tracks.

Less ambitious (and cheaper) single- and double-disc collections offer viable alternatives to the box set. Foremost among these is Atlantic's double-CD *All-Time Greatest Hits and More,* which hits all the high points of the various Drifters generations and has sharp annotation as well. Ditto for Collectables' double-CD *The Legendary Group at Their Best,* another broad overview of the hits and more but lacking the Atlantic collection's informative liner notes. Rhino's single-disc package, *The Very Best of the Drifters,* supplants Atlantic's out-of-print *The Drifters' Golden Hits,* adding four tracks but still boiling down the history to five years, beginning in 1959 with "There Goes My Baby" and ending with 1964's "Saturday Night at the Movies." It ignores about six years of stellar recordings that came before 1959, so caveat emptor. Completists cannot do without the twofers released by Collectables—three individual discs containing two complete Drifters albums. *Clyde McPhatter & The Drifters/Rockin' & Driftin'* are the group's earliest efforts, and the ones most deeply rooted in R&B: *Clyde McPhatter & The Drifters* features, obviously, Clyde McPhatter on lead vocals (and also includes some of his solo hits); *Rockin' & Driftin'* (not to be confused with the box set) features Johnny Moore on lead. The nonsingle album tracks paint an impressive portrait of a group that brought the same high standard to every song it sang—*filler* is hardly an apt term to describe these cuts when the performances are consistently engaging and emotionally compelling. That's why the Drifters were the Drifters. —D.M.

Drive-By Truckers

★★★★	Gangstabilly (Soul Dump, 1998)
★★★½	Pizza Deliverance (Soul Dump, 1999)
★★½	Alabama Ass Whuppin' (Second Heaven, 1999)
★★★★	Southern Rock Opera (Soul Dump, 2001)
★★★★	Decoration Day (New West, 2003)
★★★½	The Dirty South (New West, 2004)

Though blessed with literary talent, punk values, and a Muscle Shoals pedigree, the Drive-By Truckers are also unreconstructed rednecks, embodying "the duality of the Southern thing" long before they sang about it on *Southern Rock Opera.* And like true Dixie rebels, their fierce loyalty to their cause has often courted tragedy before glory. On *Gangstabilly,* leader Patterson Hood thanks friends and family for persevering through "the 12 years or so leading up to it." But the band's righteous DIY ethic guaranteed that mostly just friends and family would hear this tour-de-force debut, a taut collection worthy of the Bottle Rockets, Ass Ponys, or Waco Brothers.

Thanks to slightly better distribution and clearer production, *Pizza Deliverance* finally garnered the Truckers some wider attention. If the disc suffers from traditional second-album padding, swaggering rockers like "Nine Bullets" and sweeping ballads like "Bulldozers and Dirt" are as sharp as *Gangstabilly*'s best. The rowdy-to-sloppy *Alabama Ass Whuppin'* proves padding has nothing to do with the band's live sound. Still, despite Hood's wonderful stories, few numbers improve on the studio versions. Instead, the guitar-heavy attack (and brief cover of "Gimme Three Steps") just clears the way for the Truckers' masterpiece. The title *Southern Rock Opera* is partly a joke, but the complexity of this two-disc set rivals the Who's *Quadrophenia,* comprising historical, cultural, and autobiographical story lines that eventually cohere in a deeply affecting portrayal of Lynyrd Skynyrd's final flight. And, more than *Quadrophenia,* the project is strengthened by the tension between the band's lofty ambitions and their commitment to an earthbound sound. It finally won the Truckers the attention of bigger labels, but the excellent new *Decoration Day* shows how their rebel pride has matured, not mellowed. The cut entitled "Do It Yourself" is actually about suicide, which they now scorn with the fury of street survivors. Slow, somber, and perfectly titled, *The Dirty South* is another tuneful evocation of the dark side of Southern life. Over alternately jangly and sludgy guitars, Hood, Mike Cooley, and young gun Jason Isbell lament Reagan-era poverty ("Puttin' People on the Moon"), reminisce about their moonshine-swilling daddies ("Where the Devil Don't Stay"), and memorialize a legendary workin' man ("The Day John Henry Died"). Older fans will miss the Truckers' Skynyrdesque raveups, but the gritty self-pity and gin-u-wine gravitas of these tragic vignettes still make for the best new-school Southern rock you can buy. —F.S.

Dru Hill

★★★	Dru Hill (Island, 1996)
★★★	Enter the Dru (Island, 1998)
★★★★	Dru World Order (2002, Def Soul)

With its first release, this Baltimore quartet turned New Jack Swing inside out. Instead of R&B vocal harmonies with hip-hop flavor, Dru Hill fronted like a hip-hop outfit before revealing its crushed-velvet soul. The group negotiated its persona through mere sound, balancing the rich and the real for surefire chick-bait. Keith Sweat's production is plush on the cheap, and the singers' homeboy-next-door vocals are always sincere, never intimidatingly professional. The single "Tell Me" went Top 5 and proved that chicks, indeed, digged on the Dru. *Enter the Dru* continued the streak (still without explaining the band's attachment to martial-arts/mythical-animal imagery), with enough chart oomph to allow Dru member Sisqo to begin releasing solo projects. After the success of Sisqo's summer novelty "The Thong Song," and the relative disappointment of his album sales, Dru Hill regrouped stronger than ever for *Dru World Order,* folding Sisqo back in and adding sad-eyed Skola, a singer with an expansive gospel vibe. Tamir "Nokio" Ruffin (the "N-Tity") does the production honors, piling on the strings, decelerating the syncopation to a slow tease, and piling the men's voices atop one another like the towering platter of bedroom-cakes they are. If there's a cuter contemporary seduction number than "I Should Be . . . ," Boyz II Men sure didn't record one. —A.B.

D12

★★★	Devil's Night (Shady/Aftermath, 2001)
★★★	D12 World (Shady/Aftermath, 2004)

Imagine an Eminem album without the guided tours of his fucked-up head, the razor-sharp characterizations, or the handful of sensitive moments. Then take away half of his rhymes and substitute some fair-to-above-average MCs, and you have a D12 record. If the *Slim Shady* and *Marshall Mathers* albums were slapstick trips into one man's psychosis and alienation—like the Marx Brothers starring in *Taxi Driver*—then D12's approach is a lot simpler: It's *Friday the 13th,* or maybe a Farrelly brothers version of *Henry: Portrait of a Serial Killer.* On *Devil's Night,* Eminem and his five buddies are stuck in a peer-pressure spiral of trying to outdo each other, with D12 irregulars Kon Artis, Proof, Kuniva, Swifty, and the supremely disturbed Bizarre dropping shock raps that range from silly ("I let my dogs out on the Baha Men") to annoyingly over-the-top ("Smacked this whore for talking crap/So what if she's handicapped?"). Despite all this, *Devil's Night* has more than its share of decent moments, thanks mostly to Eminem. Tracks such as "Shit Can Happen" jump to life when he takes the mike. A few songs pick up where he had left off on *The Marshall Mathers LP:* "Ain't Nuttin' but Music" is a sequel to "The Real Slim Shady," down to Dr. Dre's bouncy synth line and the Britney Spears jokes. Almost every track has a tight concept, a chorus that sticks, and a groove that carries a melody. Songs like the creeping "Pistol Pistol," the woozy "Purple Pills," and the bumping "Blow My Buzz" are just more musical than your average rap song, but don't call attention to the fact.

Much of *D12 World* simply repeats the debut's blend of rote horror-core rhymes, "offensive" humor, and dumb skits. But compared with *Devil's Night, D12 World* boasts less shock for the sake of shock, better rhymes, and tales of violence that seem, if not realistic, at least less ridiculous. Cuts like the opening "Git Up" and the Dre-produced "American Psycho II" get by on hooky beats and nimble flows, as D12's members boast of their skills, take target practice, and mostly eschew lame jokes. *D12 World* is still undoubtedly Eminem's show, but the album's best moments find all six MCs dropping rhymes that play off one another—like a group of hoodlums working together to steal your hubcaps. On the bright stoopid single "My Band," everyone contributes solidly comic verses, poking fun at one another while pretending not to understand why the media is so interested in their leader; on the title cut, which is buoyed by an excellent Kanye West beat and a Cypress Hill–sung chorus, everyone speed-rhymes his way through a laundry list of the best stuff in the "world": bitches, hot lead, and liquor, in particular. It's still shock rap, and all too perfunctory at times, but if D12's goal is to establish an identity that anyone over 16 can take seriously, it's getting closer. —N.B./C.H.

Duran Duran

★★★★	Duran Duran (1981; Capitol, 2003)
★★★★½	Rio (1982; Capitol, 2001)
★★★½	Seven and the Ragged Tiger (1983; Capitol, 2003)
★★	Arena (1984; Capitol, 2004)
★★★	Notorious (Capitol, 1986)
★★	Big Thing (Capitol, 1988)
★★★★	Decade (Capitol, 1989)
★★	Liberty (Capitol, 1990)
★★½	Duran Duran (Capitol, 1993)
★★	Thank You (Capitol, 1995)
★★	Medazzaland (Capitol, 1997)
★★★★	Greatest (Capitol, 1998)
★★	Pop Trash (Hollywood, 2000)

Duran Duran represents a turning point in the sexual history of new wave: Girls pulled their hair and screamed, while boys complained that they were fascist pop puppets taking up valuable airtime that rightfully belonged to Black Flag. But the girls were right, as they always are. The Fab Five combined New Romantic synths, disco bass lines, flash guitar, wedge haircuts, and a host of art-glam pretensions into some of the '80s' juiciest pop trash.

Duran Duran's first three albums are butter: Simon Le Bon sings of love and fashion, his mouth alive with juices like wine, while Nick Rhodes presses brightly colored keyboard buttons and all three Taylors boogie down. The debut has the insanely catchy "Planet Earth," the lecherous "Girls on Film," and the nuclear-war-pondering "Is There Something I Should Know?" *Seven* has "Union of the Snake" and "New Moon on Monday." But *Rio* is definitely the one to get—even filler like "Hold Back the Rain" has lipstick cherry all over the lens. The title tune evokes a mysterious femme fatale with a fetish for dancing on the sand, and when she shines she really shows you all she can (huh?). "Save a Prayer" is a drippily suggestive slow jam raising the hermeneutic conceit "Some people call it a one-night stand/But we can call it . . . paradise." "Hungry Like the Wolf" is lycanthropic disco madness, complete with orgasmic moans from some lucky she-wolf or another, culminating as

Simon gets all Romulus on your Remus by the moonlight tide. A classic.

Although their imminent demise has been predicted many times, the Durannies have hung around long enough to age into the despot dowagers of the new-wave empire. Indeed, even a devoted fan has to be puzzled by their staying power. After the live *Arena,* and a lull with the side projects Arcadia and the Power Station, they returned as a trio (minus Roger and Andy) on the Nile Rodgers–produced *Notorious*—and yes, that's 16-year-old Christy Turlington posing seductively on the back cover. The later albums are spottier, but the hits kept coming every couple of years or so, and *Greatest* rounds them up (with a little too much '90s stuff). The earlier best-of *Decade* has an ugly cover and no "New Moon on Monday." *Thank You* was a popular, though not very good, 1995 album of covers, including a version of Grandmaster Flash's "White Lines" that became a fluke urban-radio hit. By *Medazzaland* and *Pop Trash,* John Taylor had dropped out of the group, surely just a temporary glitch. Not until the last Duran Duran fan passes from the earth shall its name go unhonored. And Duran Duran fans shall never, never pass from the earth, not as long as there is sand somewhere upon which Rio can dance. —R.S.

Ian Dury & the Blockheads

★★★½	Sex & Drugs & Rock & Roll: The Best Of (Rhino, 1992)

The late Cockney-accented singer Dury (and his trusty collaborator, keyboardist Chaz Jankel) wittily bridged the gap between the British skinny-tie crowd and the American disco mob (with a touch of vaudeville thrown in) during his 1977–80 heyday. Most of his records' energy came from the tension between Dury's awkward, blustery delivery and the Blockheads' slicked-up grooves, and they milked it for all the charm it was worth. *Sex & Drugs & Rock & Roll,* basically an expanded version of their better-sequenced *Juke Box Dury* compilation, includes all of their dance crossover hits: the deadpan-anthemic title song, "Reasons to Be Cheerful, Part 3," and the funky *and* goofy "Hit Me With Your Rhythm Stick." —D.W.

Dust Brothers

★★★★	Fight Club Soundtrack (Restless, 1999)

They have produced but one twitching, energized album under their own name, but cutting-edge production team the Dust Brothers (John King and Mike Simpson) are responsible for a couple of the most important sampledelic albums of the '80s (Beastie Boys' *Paul's Boutique*) and '90s (Beck's *Odelay*) and even produced one of each decades' most indelible pop songs (Tone-Lōc's "Wild Thing," Hansons' "Mmmbop"). The soundtrack to *Fight Club*—also known as "The Dust Brothers's Long-Awaited Debut Album"—blends whip-crack drum and bass, electro thud and razor wire rock guitar into a kinetic stew that mirrors the film's strung-out anxiety. —J.G.

Look on his works, ye mighty, and despair. After 40 years on the job, Bob Dylan still makes all other songwriters sound like scared kittens, and in terms of sheer volume, he's built the largest body of work worth listening to in rock & roll. He's the American song-and-dance man, the sleight-of-hand man, mixing up folk roots, beat poetry, Chuck Berry, Baudelaire, Texas medicine, railroad gin, and his own psychedelic mutations of the blues, singing it all in that intense Book-of-Deuteronomy howl of his. By now, Dylan's failures are as mythic as his successes, but even though he has journeyed through the Valley of Suckdom (and has even rested there for years at a time) he also remains rock's longest-running font of vitality, a mystery tramp with his boot heels wandering all over the map of American music. His career is one rock archetype after another: the arrogant young protest singer in the Huck Finn cap; the mod Chelsea-booted hipster of the mid-'60s, singing the third verse of "I Want You" with all the deadly hip-twitching swing of Chuck Berry's guitar; the grizzled old con man of *Love and Theft,* croaking biblical blues and Tin Pan Alley valentines out of the side of his mouth while keeping one eye on the exit.

After growing up in rural Minnesota, a teen rockability guitarist who idolized Elvis and James Dean, the young Robert Zimmerman discovered Woody Guthrie and ran off to New York to become Bob Dylan. His debut album showed his raw talent and brash singing, with covers like "Baby, Let Me Follow You Down" and "You're No Good" reflecting his apprenticeship in the Bleecker Street folk scene. But he pulled ahead of everybody else on *Freewheelin',* a virtuosic burst of original songs that combined bitter political protest ("Masters of War"), poetic dread ("A Hard Rain's a-Gonna Fall"), introspection ("Bob Dylan's Dream"), romance ("Girl From the North Country"), and a viciously witty fare-thee-well ("Don't Think Twice, It's All Right").

Still armed with just his acoustic guitar, harmonica, and ragged voice, Dylan became the king of the freewheelin' folk rogues, even as his punk rage and blues rhythms suggested the rock moves to come. *The Times They Are a-Changin'* had straighter protest songs—some great ("The Lonesome Death of Hattie Carroll"), some simpy (the title track)—that were overshadowed by two out-of-place but excellent breakup songs, "One Too Many Mornings" and "Boots of Spanish Leather." *Another Side* showcased his tormented love/hate ballads, suggesting that Dylan was starting to outgrow acoustic simplicity. It also suggested that Dylan—swooning in the erotic intoxication of "Spanish Harlem Incident" and then begging for a serious bitch-slap in "It Ain't Me Babe"—was maybe not the guy you'd want to set up with your sister.

After getting his mind blown by the Beatles over the radio, Dylan finally bid a restless farewell to folk orthodoxy, plugging in his guitar for a controversial electric performance at the Newport Folk Festival that scandalized old fans. "The only place where it's happening is on the radio and records," he told an interviewer. "That's where the people hang out." Dylan mixed up the medicine to invent a whole new breed of rock & roll on *Bringing It All Back Home.* On the electric first side, Dylan sneered his absurdist, word-drunk rambles over lean, jittery garage rock, brimming over with wild humor, while side two had four brain-frazzling acoustic ballads that made *The Times They Are a-Changin'* sound like kid stuff. "Mr. Tambourine Man" is surely the friendliest of all drug songs, maybe because it's not so much a drug song as a music song; "She Belongs to Me" and "Love Minus Zero/No Limit" are devotional love songs; "Bob Dylan's 115th Dream" takes a riotously funny cruise through American history and ends the way Dylan once claimed all his songs secretly ended: "Good luck."

Highway 61 Revisited perfected the sound that Dylan dubbed "thin wild mercury music," with a jagged guitar groove, swirling organ, fluid piano, and Dylan's madcap snarl up top, all doomy menace and hallucinatory wit, packing a career's worth of rock & roll innovation into each of the nine songs. He got on the radio with the loud, mean anthem "Like a Rolling Stone," a #2 hit in 1965. But every song here is a classic: the adrenaline-crazed "Tombstone Blues," the raucous "From a Buick 6," the spiteful "Ballad of a Thin Man," the epic "Desolation Row." For all the poetic complexity, the best line is one of the simplest: "I've been up all night, leaning on the windowsill."

Rolling faster than anyone could follow, Dylan moved on to the double-vinyl *Blonde on Blonde.* Dylan freaks still love to argue over whether *Bringing It, Highway 61,* or *Blonde* is the absolute pinnacle of Zimmerdom; unlike *Highway 61, Blonde* has weak spots, especially the god-awful opening hit "Rainy Day Women #12 & 35," but it's his greatest album anyway, a surreal fever dream of a record, racing through his sharpest, slickest, scariest, and most seductive songs at breakneck speed. Recorded in Nashville with session cats who sound juiced by the chance to cut loose, *Blonde* has "I Want You," "Visions of Johanna," "Stuck Inside of Mobile With the Memphis Blues Again," and ends with the bleary 11-minute love ballad "Sad Eyed Lady of the Lowlands," cut in one long take a few minutes after Dylan finished writing it. *Blonde on Blonde,* released just 15 months after *Bringing It All Back Home,* climaxed the amphetamine rush of Dylan's mid-'60s glory. Wired, fried, the ghost of electricity howling in the bones of his face, Dylan was caught up in the most intense burst of creativity any rock & roller has ever had.

You can see the pace taking its toll in the Dylan documentaries *Don't Look Back,* where he's a fidgety coquette sucking in his cheeks for the camera, and *Something Is Happening,* where he's the vanishing American hidden behind steely shades in the limo with John Lennon. But you can hear Dylan at peak fury on *Live 1966,* the famous Manchester, England concert of May 17, 1966, bootlegged for decades but not officially released until 1998. Dylan foams at the mouth in "Baby, Let Me Follow You Down" and "Tell Me, Momma," as the Band flails ferociously behind him; at the finale, an outraged folkie yells "Judas!," goading Dylan into a positively evil "Like a Rolling Stone." At this point, Dylan was recording gems faster than he could keep track of them, and it took years before essential cuts like "If You Gotta Go, Go Now," "Can You Please Crawl Out Your Window?," "I'll Keep It With Mine," or "She's Your Lover Now" got properly released.

But the frenetic pace came to a halt in July 1966: The official (and possibly fictional) excuse was a motorcycle crash. Dylan retreated to Woodstock, NY, to detox, recover, and plan his next move. While there, he gathered with his friends in the Band to cut the legendary "Basement Tapes," home recordings of a new style of stoner folk music. Songs like "You Ain't Going Nowhere" and "Million Dollar Bash" were loose, offhand, and deeply strange, funny on the surface but mysterious below; after years of bootlegging, the official *Basement Tapes* finally appeared in 1975. Much of the finest Basement Tapes work—"I'm Not There (I'm Gone)," "I Am a Teenage Prayer," "Get Your Rocks Off," "Sign of the Cross"—still has yet to be released; see Greil Marcus' book *The Old, Weird America* for the full story. For his next public move, however, Dylan shocked everyone with the stark simplicity of *John Wesley Harding;* in the era of flower power, he suddenly went all Jewish-cowboy prophet on everybody's ass. It's one of his best albums, 12 ancient-sounding country-rock tunes, mostly just drums, bass, and acoustic guitar spinning fabulist yarns that could be hilarious ("Drifter's Escape"), terrifying ("I Dreamed I Saw St. Augustine"), or both ("The Ballad of Frankie Lee and Judas Priest"), and finally brightening up for "I'll Be Your Baby Tonight."

Dylan dipped deeper into country for *Nashville Skyline;* he even temporarily quit smoking to sweeten his voice. It has a seductively light touch, especially in "I Threw It All Away" and "Tonight I'll Be Staying Here With You." It also has a great cover photo: Dylan tipping his hat before he sets a spell to sing you some right purty songs. But *Self Portrait* was a disaster that nobody has really ever explained: a double album of deliberately bad throwaways, most of them grumpy covers. Dylan took a while to fully recover—his voice grew phlegmy and his songwriting absentminded; his clothes were dirty, but his hands were too clean. *New Morning* was a lighter, stronger *Nashville Skyline;* his *Pat Garrett* soundtrack had the hit "Knockin' on Heaven's Door"; *Planet Waves* was a modest reunion with the Band. *Dylan* was a set of *Self Portrait* outtakes, released against his will and notable for a hilariously bad "Can't Help Falling in Love." *Greatest Hits, Vol. 2* is an ideal introduction—much more fun than the lightweight 1967 *Greatest Hits*—with superbly chosen album tracks and rarities, especially the soulful new acoustic versions of "I Shall Be Released," "You Ain't Going Nowhere," and "Down in the Flood."

It took marriage troubles to shake Dylan up, and he found his rugged new adult voice in the acoustic heartbreak of *Blood on the Tracks.* It was such a stunning comeback that for years afterward, anything half decent he ever did would get praised as "his best work since *Blood on the Tracks.*" Dylan found himself "Tangled Up in Blue," brooding over lost love with bitterness ("Idiot Wind"), generosity ("If You See Her, Say Hello"), and cheer ("You're Gonna Make Me Lonesome When You Go")—a jack of hearts getting kicked around by the simple twists of fate. "Lily, Rosemary, and the Jack of Hearts," the longest but least-loved song on the album, is nonetheless a great one, a sly shaggy-dog story about how love screws you over even when you don't get your hopes up—so you may as well get your hopes up.

Back in the ring, Dylan knocked off *Desire* in one night, with first-take arrangements full of floppy drums, lazy violin, plenty of tequila, and Emmylou Harris' harmonies. He mourned his broken marriage in "Isis," "One More Cup of Coffee," and "Sara," where he recalled "staying up for days in the Chelsea Hotel writing 'Sad Eyed Lady of the Lowlands' for you." But he also had 20 pounds of headlines stapled to his chest, rambling about current events in "Hurricane" and "Joey." According to Dylan legend, *Desire* was the first album he ever wrote with the aid of a rhyming dictionary, and boy can you tell, especially in the ridiculous gangster epic "Joey," which boasts quite possibly the dodgiest lines of Dylan's whole career: "One day they blew him down/At a clam bar in New York/He could see them coming through the door/As he lifted up his fork."

Having thus reconstituted the shattered fragments of American poetry, Dylan moved on to religion. He started out on Genesis, but soon hit the harder stuff, with a fundamentalist conversion that remains one of the oddest episodes of his career. *Street Legal* was the turning point, a turgid set of pulp-mystic dirges with occult lyrics; it's a musical failure, but it has its own fanatical following, a cult within the Dylan cult. By *Slow Train Coming,* Dylan was a Bible-thumping, born-again Christian who was hearing from the Almighty on a regular basis. You'd think God would have been in a pretty cheerful mood—after all, not only was He omnipotent, He got to hang with Dylan. But no: Apparently, all He did was complain, and so for the next few years, Dylan dutifully passed on the Lord's harangues against heathens, pornographers, and harlots. Not sweethearts, though—sweethearts were okay. *Slow Train* benefited from Mark Knopfler's guitar and "I Believe in You"; *Saved* had the underrated "Solid Rock"; *Shot of Love* had the overrated "Every Grain of Sand."

Dylan briefly returned to form with 1983's *Infidels,* an altogether more worldly batch of songs ("Jokerman," "Sweetheart Like You") lifted high by the Sly & Robbie rhythm section and guitarist/producer Knopfler. It's Dylan's best work of the lost years between *Desire* and *Time Out of Mind,* exploring the human side of his spiritual concerns, even if the jingoistic "Neighborhood Bully" suggested that the album could have been called *Intifada.* The finale "Don't Fall Apart on Me Tonight" added a strange autobiographical detail when Dylan confessed, "I wish I'd been a doctor." A scary thought to be sure, but back home in Minnesota, his mother was presumably pleased.

Like everything else, Dylan sucked in the '80s. He locked into a game of chicken with Neil Young, battling to see who could release more bad albums before the decade was out. (Dylan won, eight to seven.) For years Dylan fumbled around like a complete unknown, lost in *Miami Vice* threads and synth drums, trying to conform to a pop scene that had nothing to do with him. On *Empire Burlesque,* he sounded lucky just to be employed, though "Tight Connection to My Heart" went into the all-time canon of great Dylan songs on lousy Dylan albums. *Knocked Out Loaded,* the absolute bottom of the Dylan barrel, has the *Carol Burnett Show*–style production number "Brownsville Girl," with one classic Dylan line: "I didn't know whether to duck or run, so I ran." *Down in the Groove* has a sing-along goof, "Ugliest Girl in the World," though it's not as funny as the genius self-parody of "Tweeter and the Monkey Man," buried that same year on the Traveling Wilburys' *Volume One. Oh Mercy* and *Under the Red Sky* were studio-slick mush, while *Dylan and the Dead* made one Deadhead friend lament, "I never thought I'd see the day when Jerry Garcia would have to bail someone out vocally."

His best performance of the '80s was hidden on side two of the mostly terrible, completely ignored 1984 concert album *Real Live:* a new version of "Tangled Up in Blue," with just Dylan and his guitar, playing around with the chord changes and improvising new words, using the crowd as an instrument to rewrite one of his classics as a whole new song. Hardly anyone paid attention, not even Dylan himself, but he would eventually revisit this playful spirit in the '90s to make some of his finest music. He hit the road for his Never Ending Tour, and recorded a couple of overlooked oddities, *Good as I Been to You* and *World Gone Wrong,* which comprise solo acoustic renditions of old blues and folk songs. It was now official: Dylan had finally blown out his voice. But that turned out to be good news, because after those last creaky floorboards gave way, the man had to come up with a whole new songwriting style for the voice he was left with, the sinister rusted-muffler growl he introduced on *Time Out of Mind.* Dylan's biggest success in years, *Time Out of Mind* shocked the world because it didn't even echo past glories—it was a ghostly, beautiful new sound, yet another side of Bob Dylan. If he'd trained for *Nashville Skyline* by quitting cigarettes, *Time Out of Mind* sounded as though he'd been sucking exhaust pipes, which perfectly suited the bleak, world-weary wit of "Not Dark Yet," "Standing in the Doorway," and the 17-minute finale, "Highlands."

He hit even harder with *Love and Theft,* a full-blown tour of the American songbook in all its burlesque splendor, veering into country blues, ragtime, vaudeville, cocktail-lounge corn, the minstrel show, and the kind of rockabilly he used to bash out with his high school band. *Love and Theft* is a musical autobiography that also sounds like a casual, almost accidental history of the country. The old man faces the apocalypse in "High Water (For Charley Patton)," finds twisted romance in "Moonlight" and "Bye and Bye," even cracks a knock-knock joke in the borscht-belt blues "Po' Boy." ("Freddy or not, here I come"—oy, gevalt!) Relaxed, magisterial, utterly confident in every musical idiom he touches, Dylan sings in a voice that sounds even older than he is.

Dylan's reissues are a tangled mess already, and we ain't seen nothing yet. *Biograph* was the 1985 box set, spiking the hits with choice rarities from 1963's "Lay Down Your Weary Tune" to 1981's "Groom's Still Waiting at the Altar." The prize is the *Blood on the*

Tracks outtake "Up to Me," with the line, "She's everything I need and love, but I can't be swayed by that." *Biograph* is a sprawl, and you can argue all day about the selections (that's part of the fun), but it's still an excellent way to turn on a new fan, or to become one. The three-disc *Bootleg Series* collects unreleased treasures like "She's Your Lover Now," "Let Me Die in My Footsteps," "Call Letter Blues," and "Blind Willie McTell," as well as the unheralded baseball classic "Catfish." It has hardly any Basement Tapes material, though, undoubtedly because that's getting saved for the inevitable *Basement Box.* The 1995 *Greatest Hits, Vol. 3* reaches all the way back to the early '70s, which is just crazy. The two-CD, 30-song *Essential* is a handy sampler, despite some dubious picks ("Rainy Day Women," that means you). *Live 1966* is the best live album by far. The 1974 *Before the Flood* is crude, rough fun with the Band; *Live 1975* has windbag Rolling Thunder performances; *Hard Rain* and *Unplugged* are naps; and the Vegas-style revue *Bob Dylan at Budokan* is immaculately frightful. *Live 1964* is the famous October '64 solo acoustic show at Carnegie Hall, long bootlegged as *Halloween Masque,* and prized as his definitive pre-electric live set. "Don't let that scare ya. It's just Halloween," Dylan tells the crowd as he fiddles with the intro to "If You Gotta Go, Go Now." "I have my Bob Dylan mask on." But wherever you start exploring, Dylan's body of work is one to luxuriate in; this is what salvation must be like after a while. —R.S.

★★★	Hotel California (Elektra/Asylum, 1976)
★★★	The Long Run (Elektra/Asylum, 1979)
★★★★	Eagles Greatest Hits, Vol. 2 (Elektra/Asylum, 1982)
★★	Hell Freezes Over (Geffen, 1994)
★★★	Eagles 1972–1999: Selected Works (Elektra/Asylum, 2000)
★★★★	The Very Best of the Eagles (Warner Bros., 2003)

One of the best-selling bands of all time, the Eagles were an anomaly in the L.A. country-folk-rock scene that they came out of: They didn't expand the great country and folk hybrids of the '60s proffered by Buffalo Springfield, the Flying Burrito Brothers, and Gram Parsons so much as provide a template for the Nashville pop of the '90s, as epitomized by Garth Brooks, Travis Tritt, and Brooks & Dunn (fittingly, several major country stars repaid the debt on the 1993 tribute album *Common Thread: The Songs of the Eagles*).

Eagles is anchored by one of the band's signature songs, "Take It Easy," cowritten with Jackson Browne. It defines their sound: breezy tunes outfitted with golden harmonies about rambling and womanizing in the posthippie hangover days of '70s California. It put the Eagles—particularly cocaptains Don Henley and Glenn Frey—at the center of the burgeoning California rock and singer/songwriter movements. It was also blessed with some virtuoso instrumentalists; Burrito Brothers alumnus Bernie Leadon brings a bluegrass feel to portions of the debut.

The Eagles strain to turn *Desperado* into a concept album, and begin exploring the darkness that would imbue much of their later work, but they present their Old West outlaw conceits as a series of dirges. *On the Border* rocks harder, bolstered by the addition of a new producer (Bill Szymczyk) and a guitarist (Don Felder) whose fills and solos are like miniature songs in themselves. *One of These Nights* is the band's most musically adventurous outing yet, flirting with disco on the title song, a waltz on "Take It to the Limit," and bluegrass psychedelia on Leadon's "Journey of the Sorcerer."

Hotel California is widely regarded as the band's masterpiece, and as a snapshot of '70s decadence and jadedness it'll do nicely: It's resplendent pop music about a spiritually bankrupt age. But the album is mighty thin after the twin peaks of the reggae-tinged title song—easily the band's finest moment—and "Life in the Fast Lane," which boasts a tougher sound and a greater sense of humor than ever before, thanks to the addition of former James Gang guitar slinger Joe Walsh.

Walsh's presence also gives *The Long Run* a rougher edge, while bassist Timothy B. Schmit's "I Can't Tell You Why" just may be the mellowest gold in the Eagles' canon. But the album also marks the beginning of the end. The Eagles scold their critics ("we'll find out in the long run"), even as the title song recycles the melody from Otis Clay's R&B cult classic "Tryin' to Live My Life Without You." A quintessential singles band, the Eagles are best represented by their hits collections; *Their Greatest Hits 1971–1975* focuses on the country-tinged early years, *Vol. 2* nails the more varied and adventurous approach of the late '70s, and the two-disc *The Very Best of the Eagles* provides the most comprehensive career overview. *Hell Freezes Over* includes 11 songs from an *MTV Unplugged* performance, which paved the way for the band's $100-a-seat comeback tour and four new, unremarkable studio recordings. *Selected Works: 1972–1999* repackages older material, devoting one of its four discs to the band's Millennium Concert, which proves they're still experts at stiffly re-creating their studio recordings onstage. —G.K.

with the Del McCoury Band

★★★★	The Mountain (E-Squared, 1999)

In the sin-and-redemption sweepstakes, few life stories in rock compare to Steve Earle's, and few musical artists can match the depth and power of the body of work he has produced during his journey. Beginning with 1995's acoustic "comeback" album, *Train a Comin',* Earle has been predictable only in the high quality of his work; otherwise, each album has found him challenging himself and his listeners, either with an unexpected concept (teaming with the redoubtable Del McCoury Band on *The Mountain,* a one-album experiment in bluegrass that caught the roots boom on its upward arc) or a bold dive into genre-bending (*Transcendental Blues,* with its pronounced echoes of pre–*Sgt. Pepper's* Beatles production flourishes in the midst of largely traditional country formulations). His early albums are dotted with stories of working-class folks struggling to make a place for themselves in a society of haves and have-nots. Since then he's only sharpened his polemics: His longtime opposition to the death penalty has moved him to write a devastating chronicle of a killer's final hours ("Billy Austin," on *The Hard Way*).

Earle's debut album, *Guitar Town,* was his breakthough. The album-opening title track is rich with a furiously strummed acoustic guitar, electric guitars twanging Duane Eddy–style, a steady humming B3 organ, and a propulsive rhythm section fueling Earle's swaggering recollection of the music's siren song in his life. The beautiful rockabilly breakup song "Think It Over" offsets a rather bitter lyric with a gorgeous melody in a song that could have come out of Buddy Holly's catalogue. "My Old Friend the Blues" starts as a gentle, acoustic-driven paean to the comforting powers of the blues and gradually opens up into a languorous honky-tonk ballad. "Good Ol' Boy (Gettin' Tough)" is a template for numerous Earle narratives to come: bristling Southern rock with an acoustic guitar way up in the mix, and a story about an embattled outsider frustrated in his efforts to get his fair share of the American Dream.

Exit 0 picked up right where *Guitar Town* left off, with "Nowhere Road," a story of a desolate Oklahoma road that serves as a metaphor for policies designed to keep the disenfranchised in their place while seeming to hold out the prospect of opportunity ahead. But it's only a prelude to the masterwork of Earle's MCA years, *Copperhead Road.* Released in 1988, it was the most powerful example of the rock-influenced spectrum of the New Traditionalist movement, which was then cresting commercially in the wake of the mainstream breakthroughs of Dwight Yoakam, the Judds, Randy Travis, and Rodney Crowell, among others. The title song leading off the album details an antiauthoritarian legacy handed down to succeeding generations by his bootlegger granddad, for whom violence is one revenue agent's visit away from erupting. For the remainder of the album's first half, the narrator—a Vietnam vet damaged physically and spiritually by his experience in Southeast Asia—lives a hard-luck life that leads him into chicanery ("Snake Oil"), gunplay (the searing "Devil's Right Hand"), isolation, and paranoia ("Back to the Wall"). Finally, disillusionment with the future sets in on the epic "Johnny Come Lately." In a bit more than four minutes, Earle offers a powerful summation of the personal price a generation paid for serving its country during an unpopular, undeclared war.

Small wonder that Earle couldn't top *Copperhead Road* with its followup, *The Hard Way.* It's not as consistently inspired as its predecessor, but in a few spots it's every bit as potent. The surging, dense atmospherics of "The Other Kind" are an ideal complement to the lyrics' story of an unreformed outsider whose life is on the road, and Earle's snarling delivery makes it apparent how much he identifies with his self-penned sentiments. The centerpiece of the album is the above-mentioned "Billy Austin," a somber, riveting acoustic ballad about a Native American, 29 years old, on Death Row for killing a gas station attendant in a botched robbery attempt.

A live album, *Shut Up and Die Like an Aviator,* marked the end of Earle's MCA tenure. In 1993, the label released its official Steve Earle overview, *The Essential Steve Earle,* a 13-track collection that includes "Guitar Town," "The Devil's Right Hand," "Good Ol' Boy (Gettin' Tough)," "Copperhead Road," and "Nowhere Road," as well as two non-album cuts, the truckin' classic "Six Days on the Road" and "Continental Trailways Blues" (both from the movie *Planes, Trains & Automobiles*). A better option is Hip-O's double-CD, 28-track *Ain't Ever Satisfied: The Steve Earle Collection,* which includes six songs from *Copperhead Road* and "The Other Kind" from *The Hard Way.*

Following a two-year sabbatical during which he underwent treatment for his drug addiction, Earle, thin and gaunt, began popping up in Nashville clubs, playing solo acoustic shows. In 1995 he released *Train a Comin'* on the Winter Harvest label. In an all-acoustic affair, Earle is accompanied by two unassailable masters of stringed instruments, Norman Blake and Peter Rowan, plus the formidable acoustic bass player Roy Huskey (now deceased), and on harmony vocals, Emmylou Harris. Earle's next album, *I Feel Alright,* is both a spit-in-the-eye retort to those who wrote him off and a return to his rock-hard style of days gone by, with harmonicas, twangy guitars, and a powerhouse rhythm section present and accounted for. *El Corazón* features a full-blown, regulation bluegrass number, "I Still Carry You Around," teaming Earle with one of bluegrass music's finest groups, the Del McCoury Band. Thus was the stage set for 1999's collaboration, *The Mountain,* a masterful bluegrass album that featured stirring tracks such as "Harlan Man" and "The Mountain."

Bluegrass is a distant memory on *Transcendental Blues,* which opens with the sound of synthesizer drones and tabla riffs on the title song and features other Beatles touches such as backward orchestral riffing on "The Boy Who Never Cried" and serpentine guitar licks and a stop-time effect right out of *Revolver*'s "Tomorrow Never Knows." A between-albums stopgap, *Sidetracks* is billed as "a collection of unreleased or underexposed songs."

Owing to the controversy sparked by "John Walker's Blues"—a song written from the perspective of "American Taliban" John Walker Lindh—the whole of *Jerusalem* was never fairly addressed. It arrived not with a statement supportive of terrorists—as some conservative critics claimed—but rather with a sensible explanation of Lindh's unsettling odyssey and a pervasive sense of history in four other powerful songs addressing the events of September 11 and their aftermath. —D.M.

Earth, Wind & Fire

★★	The Promise (Kalimba, 2003)
★★★	That's the Way of the World: Alive in '75 (Columbia/Legacy, 2002)

It wasn't until Earth, Wind & Fire's fourth album, second label, and umpteenth personnel change that Maurice White and company began their metamorphosis into the quintessential African-American hit band of the '70s. They did it by following the advice of the album's erstwhile title track, "Keep Your Head to the Sky." For the next decade, the group's insistent optimism and spirituality helped EWF rival the accomplishments of its greatest detractor, George Clinton, leader of the Parliament-Funkadelic empire. EWF's black-music synthesis spanned pop, soul, jazz, funk, gospel, African music, and rock (and it glanced off salsa). But no matter the style, nearly every hit got the same treatment, padded and polished with smooth vocal harmonies and horn charts and elevated with exuberantly positive lyrics and Philip Bailey's stratospheric lead vocals. Avoiding the twisted pleasures of deep funk and gritty soul, this enhanced high was a natural correlative to disco, thus winning over a huge multiracial audience. But it also may explain why, after the triumph of gritty hip-hop in the 1980s and '90s, even the group's greatest collection—the 1978 *Best* *of*—has proven less influential, and sounds more dated, than Clinton's funked-up P-Funk sound.

White had been a session drummer at the Chess studios in Chicago during the '60s before he forged a pack of young local players into the new group in 1969. The Warner Bros. albums lean toward the softer end of jazz-rock fusion, peppered by the occasional R&B-flavored horn chart; the initial Columbia albums are caught in the same muddle, although White had assembled a new band.

Gradually, singer Philip Bailey emerges as the point man for White's cosmic vision and commercial ambition. But although the trademark soaring vocals, catchy platitudes, and buttery melodies start to peek out from under the spacey jams and Africa-spiced percussion on *Head to the Sky,* it was still scant preparation for *Open Our Eyes.* Newly focused songwriting and the ensemble's responsive playing result in uplifting dance strokes ("Mighty Mighty"), convincing soul testimony ("Devotion"), sweet mid-tempo melancholy ("Feelin' Blue"), and an intriguing whiff of the Third World ("Kalimba Story").

That's the Way of the World boils that down to a potent, nourishing pop formula. "Shining Star" and the title track launched EWF's run on the pop charts, while the slow-simmering "Reasons" (Bailey's definitive ballad), the funky "Yearnin', Learnin,' " and "Africano" add balance and depth to a landmark album. *Gratitude* devotes three vinyl sides to EWF live, and the band lives up to its onstage rep. *Spirit* keeps it up, pretty much, though the tone of party anthems such as "Saturday Nite" is noticeably light. So is the beat. Slowly but surely, superefficient disco rhythms and automatic-pilot song material weakened EWF's impact, so despite some encouraging peaks—especially the tough-minded regrouping *Touch the World,* featuring the clear-eyed hit "System of Survival"—the only necessary album from the group's second decade is *Best of Earth, Wind & Fire Vol. II.* It was followed by the group's last Columbia outing, *Heritage,* dragged down by an unnecessary reliance on hammy guest appearances by currently hot rappers.

A career capping three-CD box set, *The Eternal Dance* offers a lovingly annotated and sequenced collection of greatest hits and smoothly integrated obscurities that still doesn't quite merit its extravagant length. If the middle disc rivals the high of either *Best of* volume, the group's confused early jams and synth-logged '80s fare drag the other two. Surprisingly, EWF came back again in 1997 with a fatter, funkier bottom on *In the Name of Love,* convincingly updating their trademark sound throughout the album's first half, though the second slips away on generic light jams. Unfortunately, generic light jams provide most of the highlights on the group's fourth-decade offering, *The Promise,* which returns to the basics so doggedly, the crew sounds like a bland contemporary gospel group heavily indebted to Earth, Wind & Fire. —M.C./F.S.

The Easybeats

★★★	Live—Studio and Stage (Raven, 1995)
★★★	Gonna Have a Good Time (Retroactive, 1999)

"Friday on My Mind" was a terrific 1967 hit. The Aussies behind its cheerful thunder were the Easybeats' main men, Harry Vanda and George Young (brother of AC/DC's Angus and Malcolm). Never a great stateside success, and defunct by 1970, the Easybeats, on the strength of a crack rhythm section and consistently sharp songs, wear better than much British Invasion pop. Their late-'60s work sounds like the big-ballad Bee Gees. Which isn't bad. Even there, however, an intriguing oddness peeks through. The Raven disc offers tough, punchy rarities; the generous Retroactive collection is for completists. —P.E.

Eazy-E

★★★	Eazy-Duz-It (Ruthless, 1988)
★★★½	It's On (Dr. Dre) 187um Killa (EP) (Ruthless, 1993)
★★★	Str8 Off tha Streetz of Muthaphukkin Compton (Relativity, 1995)
★★★	Eternal E (Ruthless, 1995)

The rapper born Eric Wright was negligibly taller than Gary Coleman, sported a Jheri curl greasier than cheap pizza, and rapped about being a hardcore gangsta in a laughable pipsqueak monotone—yet as Eazy-E, the N.W.A member became a bona fide hip-hop icon. Eazy got by more on charisma and pottymouthed humor than by actual rapping talent or creative inspiration, which made for some spotty solo albums. *Easy-Duz-It,* recorded with Dr. Dre, is a quickie N.W.A spinoff, but Dre keeps the quality level up, most notably on the thundering remix of "Boyz in the Hood." Money disputes and mistrust of Eazy's Ruthless Records' partner Jerry Heller led to N.W.A's dissolution and a falling-out among its members; Dre subsequently sniped incessantly at Eazy on *The Chronic,* and the beef inspired the best music of Eazy's career, the *It's On* EP. *Str8 Off tha Streetz of Muthaphukkin Compton* came out shortly after Eazy died of AIDS in March of 1995; its monochrome thuggish lyrics posed a bizarre contrast to the poignant reality of Eazy's death. His legacy is the gangsta rapper archetype, as well as the artists he discovered: both Bone Thugs-N-Harmony and the D.O.C. owe him their careers. —P.R.

Echo and the Bunnymen

★★★½	Crocodiles (1980; Sire/Rhino, 2003)
★★	Heaven Up Here (1981; Sire/Rhino, 2003)
★★★½	Porcupine (1983; Sire/Rhino, 2003)
★★★½	Ocean Rain (1984; Sire/Rhino, 2003)
★★★★	Songs to Learn and Sing (Sire, 1985)
★★½	Echo and the Bunnymen (1987; Sire/Rhino, 2003)
★	Reverberation (Sire, 1990)
★★½	Evergreen (London, 1997)
★★	What Are You Going to Do With Your Life? (London, 1999)
★★★★	Crystal Days: 1979–1999 (Rhino, 2001)
★★	Flowers (SpinArt, 2002)
★★½	Live in Liverpool (SpinArt, 2002)

"Am I singing the blues?" intones Bunnymen singer Ian McCulloch on "Rescue." Well, no, but his band soundtracked a million blue moods. For most of the late '80s, before Sonic Youth and Nirvana exploded indie rock into the mainstream, the Bunnymen served as one of the unofficial bands of large-coiffed, limey-identified high school literary magazine editors. The Bunnymen catered to folks who thought themselves too tough (or too hetero) for, say, the Human League but secretly swooned at Mac's flawless lips and bedroom eyes. The Bunnymen's tasteful neopsychedelia gained fans from Courtney Love to Pavement.

Folks blanch at the arrogance of Oasis' Beatles worship, but at least the Gallaghers kept it on their island. On *Crocodiles,* the Bunnymen swagger like they're the rightful heirs to the Velvets and the Doors, but the results betray their startling lack of familiarity with pale blue eyes or L.A. women. Give 'em this: The debut embodies that strain of Morrison's apocalypse-now pretension that just refuses to die. Weak production doesn't help, but the songs are mighty tasty. Guitarist Will Sergeant knows his way around a swirling hook, and his chord eddies on "Simple Stuff" and "Villiers Terrace" sold as many trenchcoats as the Cure or Joy Division. *Heaven Up Here* has a stronger sound, but the gothy, plodding arrangements smother the indistinct songs.

Though disliked by many hard-core fans, *Porcupine* is the Bunnymen's strongest songwriting effort. "The Back of Love" and "The Cutter" are bold, catchy strokes, proving they could sell a dumb rock ditty when they found one. Unfortunately, it was the atmospheric stuff they loved, and *Ocean Rain* took those popcorn hooks and poured on the production butter. At its best, the album showed that they had finally learned how to arrange their pomposity to serve a great hook, so when McCulloch sings "Fate/Up against your will" on the "The Killing Moon," the song lets him sell it. This was the Bunnymen at the peak of their foppish power. Depending on whether you were a black-clad ponce or said ponce stole your squeeze, the shimmering single "Bring On the Dancing Horses" was either the '80s' most romantic fluff-pop moment or one of the most overwrought. An A-sides collection, *Songs to Learn and Sing,* soon followed, which collects this underrated singles band's finest moments to date.

Echo and the Bunnymen was too little too late. Its stripped-down, slicked-up pop was indistinguishable from the era's other dancey British rock albums. ("Bedbugs and Ballyhoo" might as well have shown up on the Cure's *Kiss Me Kiss Me Kiss Me.*) But, with "Lips Like Sugar" as its single, this was the album that broke 'em stateside.

Rightly sensing that the Bunnys' dark days were done, McCulloch split in August of 1988. The other guys elected to soldier on with the name, and the 1989 death of drummer Peter DeFreitas simply delayed the inevitable: a Bunnymen album without Ian. *Reverberation* would have been a perfectly respectable followup to a remarkable career had they simply used another band name. Suffice it to say, the riffs were a little more psych, but nobody cared about an Echo record with someone named Noel Burke singing.

After his solo career stiffed, McCulloch and the remaining Bunnys patched it up when it became clear they (and their landlords) needed one another. On *Evergreen,* McCulloch's voice is incapable of the soaring that made him famous, though it seems Sergeant can write these sorts of psych-pop riffs until the end of time. *What Are You Going to Do With Your Life?* from 1999 sounds exactly like a McCulloch solo album; no wonder founding member and bassist Les Pattinson split in the middle of recording the thing.

Crystal Days: 1979–1999 is a flattering four-disc overview. The first three have album tracks, singles, rare material, and demos. Disc four is mostly live covers, including the inevitable stabs at VU tunes, a "Soul Kitchen" that X wouldn't dignify with a glance, a touching run at Television's "Friction," and the funniest and least soulful version of "In the Midnight Hour" ever recorded. A lovely career retrospective, except the career refuses to be over. The year 2001 saw the release of *Flowers,* which felt more like a fans-only Bunnymen album, and 2002 produced a powerful live record, *Live in Liverpool.* —J.G.

Duane Eddy

★★½	Have "Twangy" Guitar Will Travel (1958; Jamie/Guyden, 1999)
★★	Twangin' the Golden Hits/Twang a Country Song (1965; One Way, 1998)

★★★	Twang Thang: The Duane Eddy Anthology (Rhino, 1993)

Twang is the word most closely associated with guitar legend Duane Eddy, and certainly that sound best summarizes his personality on record. But Eddy wasn't all lower-register melodies, liberal tremolo, and omnipresent whammy bar. His instrumentals were the original music-minus-one exercises—only the vocalist was missing. This emphasis on song construction separated Eddy from inspired '50s primitives such as Link Wray and set a standard for the rock instrumental that flowered in the '60s when the Ventures came on the scene, and later with the advent of surf music. As well as his overpowering lyricism—evident from his first hit single, "Rebel Rouser," from 1958—Eddy was supported by outstanding musicians. The sax especially was a key element of Eddy's sound, and on songs such as "Ramrod" and the "Peter Gunn Theme," Eddy's twanging was clearly subservient to the impassioned honking that gave both songs a rugged edge.

Eddy was consistently in the Top 40 between 1958 and 1963, making it as high as #4 in 1960 with the lush theme for the film *Because They're Young,* a vehicle designed to make Eddy a movie star. It bombed, but he kept on twanging. His best recordings were on the Jamie label, with his debut, *Have "Twangy" Guitar Will Travel,* the standout LP release. As the years went on, Eddy rerecorded his most celebrated tunes in various settings. The most restrained and thoughtful were on RCA, with the twofer *Twangin' the Golden Hits/Twang a Country Song,* a useful supplement to his straight-rocker sides, with apt material. The only career-spanning collection with original recordings currently available is the sumptuous and enjoyable double disc *Twang Thang,* which shows how Eddy could handle pop and country, but maybe not electronic dance beats. —D.M./M.MI.

Dave Edmunds

★★★	Rockpile (1972; Repertoire, 2001)
★★★	Subtle as a Flying Mallet (1975; One Way, 1998)
★★★½	Get It (Swan Song, 1977)
★★★½	Tracks on Wax 4 (Swan Song, 1978)
★★★★	Repeat When Necessary (Swan Song, 1979)
★★★½	Seconds of Pleasure (Columbia, 1980)
★★★★	The Best of Dave Edmunds (Swan Song, 1981)
★★★	I Hear You Rockin' (Columbia, 1987)
★★★½	The Dave Edmunds Anthology (1968–90) (Rhino, 1993)
★★★½	A Pile of Rock: Live (Castle, 2001)
★★	Rockpile (1972; Repertoire, 2002)
★★★★½	From Small Things: The Best of Dave Edmunds (Columbia/Legacy, 2004)

Dave Edmunds was one of the first people to look for the future of rock & roll in its past. As the '70s started to look like the decade of singer/songwriters, Edmunds wasn't much more than a guy who loved Chuck Berry and George Jones and played a guitar that owed more to Ike Turner than to Eric Clapton. Edmunds' only claim to fame back then was that he had taken a couple of pieces of classical music, Khatchaturian's "Sabre Dance" and Bizet's "Farandole," and turned them into high-speed guitar romps. But as the '70s unfolded, Edmunds caught two breaks. The first was that he cut a guitar-heavy cover of the Smiley Lewis hit "I Hear You Knocking" that turned into a freak Top 10 single. The second was that he matured as a studio wiz, emerging as the producer of choice for English pub-rock bands Brinsley Schwarz and Ducks Deluxe—bands that played his kind of newfangled old-time rock & roll and gave him the collaborator he needed to relaunch his solo career. Although Edmunds could sing, play guitar, and produce a dense, slightly metallic rockabilly sound, Nick Lowe gave him new songs to go with the oldies that Edmunds expertly picked.

The Edmunds-Lowe collaboration starts with *Get It* and extends through their jointly led band, Rockpile. These are basically high-powered nouveau rockabilly albums: fast, hard, with a taste of country. *Get It* and *Tracks on Wax* are about half originals/half covers, with Edmunds' own songs more firmly in a country vein ("Worn Out Suits, Brand New Pockets," "A. 1. on the Jukebox"), while Lowe's songs tended to be hard rockers ("I Knew the Bride," "Heart of the City").

Repeat When Necessary differed in two respects: The album was played by a real band, Rockpile, and none of the songs was written by the band. But the songs were exceptionally strong ("Girls Talk," "Queen of Hearts"), and it turned out to be Edmunds' best album.

Meanwhile, Rockpile recorded their own album, *Seconds of Pleasure.* For their brief moment together, Rockpile had the reputation of being the best live band in the world, but the album didn't quite live up to the band's reputation, probably because the new songs didn't quite live up to the repertoire that Edmunds and Lowe had accumulated. The original LP came with a bonus EP of Everly Brothers covers, which has been appended to the CD, giving it a rather odd denouement. After an acrimonious split with Lowe, Edmunds continued to record albums in a similar vein, each weaker and less focused than the last. *The Best of*

Dave Edmunds is a solid survey of the period, with only two songs post-*Repeat.*

The two-CD Rhino *Anthology* covers the major arc of Edmunds' career, with about half of its cuts from the prime period with Lowe. Edmunds' earliest work hasn't worn well: *Anthology* includes six cuts from his first band, Love Sculpture, including the instrumentals and a sludgy version of "Summertime." The first solo album, *Rockpile,* has reverb-heavy oldies, including a couple of Chuck Berry tunes and Fats Domino's "Blue Monday." *Subtle as a Flying Mallet* was a one-man-band studio exercise, where Edmunds' falsetto does all the voices on "Da Doo Ron Ron": good practice, and more Chuck Berry tunes. *Anthology* does pick up some good songs from Edmunds' later records—the bluegrassy "Warmed Over Kisses (Leftover Love)," the ballad "One More Night," and the Carlene Carter duet "Baby Ride Easy"—but it runs out of ideas way before it ends. More to the point is Edmunds' *A Pile of Rock: Live,* which reprises his songbook in flat-out mode. *From Small Things* is even more determined to represent Edmunds at his most feverish, which, when all is said and done, definitely is the point. —T.H.

Eels

★★★	Beautiful Freak (DreamWorks, 1996)
★★★½	Electro-Shock Blues (DreamWorks, 1998)
★★★	Daisies of the Galaxy (DreamWorks, 2000)
★★★	Souljacker (DreamWorks, 2001)
★★★½	Shootenanny (DreamWorks, 2003)

After a couple of song-rich, keyboard-dominated albums released under the Man Called E moniker, Mark Everett morphed into the trio Eels with *Beautiful Freak.* At its best, the debut gives a trip-hop twist to the California singer/songwriter tradition; at its worst, it suggests one more bummed-out wise guy's take on Beck's collage-style rock.

With a sense of humor that skews toward cynicism that's alleviated occasionally by bouts of sincerity, Everett is not the likeliest subject to make a transcendent album about death. But he nearly pulls it off on *Electro-Shock Blues.* The music is somber but not sedate, with bursts of saxophone, off-kilter orchestration, and outright noise evoking the turbulence beneath the deadpan vocals. The singer battles not only depression but also his penchant for irony, and his struggle to move beyond them makes for a fascinating if sometimes morbidly downcast listen.

On *Daisies of the Galaxy,* Eels replace the sprawling sound experiments of the first two albums with a more direct folk-rock approach. "Me, I'm feeling pretty good, as of now," Everett sings, which passes for euphoria in the Eels' world, and the music's easygoing charm affirms him. *Souljacker* plunges back into the darkness, this time with fuzz-coated guitars and a rudimentary blues-punk attack. It's a suitable backdrop for Everett's favorite subjects—loneliness, alienation, and despair, this time told through the perspective of assorted freaks and misfits such as the "Dog Faced Boy" and the troubled high school student in "Soul Jacker Pt. 1."

The scrappy guitars and just-rolled-out-of-bed vocals return on *Shootenanny.* Surprisingly warm childhood memories ("Saturday Morning") collide with the "Agony" of adulthood, while irony gives way to more resilient traits, summed up by a lyric that might've been unthinkable a decade earlier: "Somebody loves you, and you're gonna make it through." —G.K.

E-40

★★★½	Federal (Sick Wid It/Jive, 1994)
★★★★	The Mailman (Sick Wid It/Jive, 1994)
★★★½	In A Major Way (Sick Wid It/Jive, 1995)
★★½	Tha Hall of Game (Sick Wid It/Jive, 1996)
★★★½	The Element of Surprise (Sick Wid It/Jive, 1998)
★★★½	Charlie Hustle: The Blueprint of a Self-Made Millionaire (Sick Wid It/Jive, 1999)
★★★	Loyalty & Betrayal (Sick Wid It/Jive, 2000)
★★★★	Grit & Grind (Sick Wid It/Jive, 2002)

One of hip-hop's most prolific voices, E-40 has worked in relative obscurity for much of his career. A resident of Vallejo, CA, 40 is best known in the Bay Area. And like his fellow Bay man Too Short, 40 launched his career without the benefit of a major label, hawking tapes one by one on the streets of his hometown. 40's first two albums, *Federal* and *The Mailman,* were minimalist affairs doused in bass-heavy funk, some of the earliest street rap to emerge from the Bay. But despite his comfort with the dark side, 40 set himself apart as a humorist, as on Mailman's "Captain Save a Hoe," a lighthearted Lothario-as-superhero romp.

40 is one of hip-hop's most unique voices: perpetually bemused and nasal; rapping at a fascinatingly quick clip; consistently inventing new lingo and watching as the mainstream catches on years later. 40 steadily churned out an album a year through the late '90s, and they're impressively consistent. Over increasingly esoteric postfunk, 40 toasted inebriation, recounted days on the sinister streets, and generally kept up good humor. From the game-spitting "Sprinkle Me" (from *Major Way*), to the jubilant "Big Ballin' With My Homies" (from *Charlie Hustle*), to the soultastic tale of penitence "Hope I Don't Go Back"

(from *Element*), to the universal hip-hop anthems "The Slap" and "Rep Yo City" (from *Grit & Grind*), 40 has steadily proved himself to be a hip-hop original. And over the years, dozens of hip-hop's finest—including Tupac, Fat Joe, Busta Rhymes, Juvenile, and Fabolous—have guested on 40's albums, a testament to his widespread influence. —J.C.

8Ball & MJG

★★★★	Comin' Out Hard (Suave, 1993)
★★★½	On the Outside Lookin' In (Suave, 1994)
★★★★	On Top of the World (Suave, 1995)
★★★	Lyrics of a Pimp (TAM/OTS, 1999)
★★★½	In Our Lifetime, Vol. 1 (SuaveHouse/Universal, 1999)
★★★	Memphis Underworld (TAM/OTS, 1999)
★★★★	Space Age 4 Eva (JCOR, 2000)
★★½	Living Legends (Bad Boy, 2004)

8Ball

★★★	Lost (SuaveHouse/Universal, 1998)
★★★	Almost Famous (JCOR, 2001)
★★½	Lay It Down (Draper Inc., 2002)

MJG

★★★½	No More Glory (SuaveHouse/Universal, 1997)

When Southern rap was far from fashionable, 8Ball & MJG—from the unlikely locale of Orange Mound, TN—gave the burgeoning subgenre brash bravado and a strong identity that would influence the stars who would make the genre enormously popular a decade later. *Comin' Out Hard,* their debut, was a minimal affair: electro-influenced, the beats were stark, and the lyrics—street bravado with a wry Southern perspective—were just as unadorned. Songs like "Armed Robbery" (which interpolates the *Mission Impossible* theme) and "The First Episode" are classics of the genre, just as potent as anything by the Geto Boys (who were at that time the most highly regarded rap group in the South).

The pair stuck to their tried-and-true themes of pimping and drug hustling on their next two albums, which included such influential songs as "Break-A-Bitch College," "Crumbz 2 Brixxx" and "Space Age Pimpin'." (The pair also released solo albums. 8Ball's debut *Lost* was, like the man himself, notable for its heft: it was a whopping triple CD.) *Space Age 4 Eva* (2000) proved the duo had aged well, despite being relegated to hip-hop's margins. On songs like "Buck Bounce" and "Pimp Hard," they showcased nimble lyricism over cutting-edge production. After a few years of label difficulties, the duo signed to P. Diddy's Bad Boy Records for 2004's *Living Legends,* a not-quite-up-to-snuff statement of their importance to the game, though next-generation stars like Ludacris and T.I. appeared to pay their respects. —J.C.

Elastica

★★★★½	Elastica (DGC, 1995)
★★	6 Track EP (Deceptive [UK], 1999)
★★★	The Menace (Atlantic, 2000)
★★½	The Radio One Sessions (Koch, 2003)

Elastica would've been the finest punk-pop album of 1979, had it not been recorded 16 years later. In fact, songwriters Justine Frischmann and Donna Matthews raided their favorite records of that era for attitude, speed, energy, and, very often, riffs—the hit single "Connection" is basically Wire's "Three Girl Rhumba" with new words, and other songs borrow ideas from Blondie, New Order, and the Stranglers. But there's not a wasted second on the album. Sexy, vicious, and hilarious at the same time (especially the debut single "Stutter," a roaring swipe at a lover who can't get it up), it rocks like a banshee.

It was a mighty hard act to follow, and Elastica basically couldn't. Almost five years later, they coughed up the half-assed *6 Track EP:* a live track, some demos, and a couple of collaborations with the Fall's Mark E. Smith. Most of its songs turned up on *The Menace,* a patchwork assemblage that includes four tracks by the now-departed Matthews, a rewrite of another Wire song, and a cover of Trio's "Da Da Da." Even so, it holds together surprisingly well: The party of *Elastica* turned into a cotton-mouthed hangover, trying to rouse itself with some hair of the dog.

The 21-track, live-in-the-studio *Radio One Sessions,* recorded between 1993 and '99, lacks the fire of Elastica's proper albums, but adds seven songs to their catalogue, including some crisp early rockers and the Christmastime Fall parody, "I Wanna Be a King of Orient Aah." —D.W.

Electric Light Orchestra

★★★	No Answer (Jet/Epic, 1972)

★★½	Afterglow (Epic, 1990)

★ Part Two (Scotti Bros., 1991)
★ Moment of Truth (Edel, 1994)
★★★ Flashback (Epic, 2000)
★★★ Zoom (Epic, 2001)
★★★½ The Essential Electric Light Orchestra (Epic, 2003)

An unabashed late-period Beatlemaniac, Jeff Lynne turned his *Sgt. Pepper's* fixation into a workable pop formula for the '70s. The aspiring guitarist-singer-composer-producer founded Electric Light Orchestra with Birmingham homeboy Roy Wood, who'd led the Move during the late '60s. When Lynne joined the Move in 1970, the seeds for ELO were germinated. Their debut, *No Answer,* strives for an unlikely fusion of rock & roll and classical music; unsurprisingly, only the haunting "10538 Overture" really takes hold. That single sounds more like the Move's dense rock studiocraft than ELO's subsequent hits; Wood soon left ELO to pursue his own eccentric orchestral muse. Though it was a commercial success, *ELO II* didn't bode well for Lynne's artistic future; with its snatches of Beethoven and ham-handed Chuck Berry–isms, "Roll Over Beethoven" quickly became an FM radio irritant—like hearing a one-line joke over and over. Lynne continued to hone his approach, and with *On the Third Day* his knack for hummable tunes and subtle hooks is revealed. Oh, there's still a Grieg-inspired tune to deal with, but the vaguely funky and overtly catchy "Showdown" indicates that Lynne was still keeping an ear trained on the competition. *Eldorado* sustains the glossy Beatles hommage of "Can't Get It Out of My Head" over the course of an entire album—ELO's most consistent and cohesive. Nevertheless, for all the band's ambitions, the evidence insists that ELO is at heart one hell of a singles band. Hits off *Face the Music* ("Strange Magic,") and *New World Record* ("Telephone Line," "Livin' Thing") mark Lynne's creative and commercial apex. *Olé ELO* is an acceptable though incomplete compilation, while the superlative *Greatest Hits* delivers the goods.

Out of the Blue shows Lynne's expansiveness clouding ELO's vision once again; its two discs map incredible peaks ("Turn to Stone") and bottomless valleys (the sidelong "Concerto for a Rainy Day"). After that, the ELO spark fades to an occasional flicker: "Hold on Tight" (from *Time*) and "Rock 'n' Roll Is King" (from *Secret Messages*) foreshadow the sleek roots-rock groove Lynne later perfected with the Traveling Wilburys, Roy Orbison's final sessions, and his own 1989 solo album. Led by veteran Move-ELO drummer Bev Bevan, the short-lived, early '90s ELO "comeback" was a robotic simulation of the original group's sound; not even campy, just depressing. Lynne's own 2001 ELO revival was a solo record in everything but name, but at least it delivered the goods the few remaining fans were still pining for: The Beatles-like harmonies and classical tendencies were as peppy as ever, with contributions by George Harrison and Ringo Starr. The indisputable glow of ELO's best shots is dimmed somewhat by the clumsily structured *Afterglow.* Yet another three-disc box set, *Flashback* corrects the omissions of its predecessor thanks to Lynne's judicious examination of the band's quirky, uneven, but always melodious output. The single-disc comp *The Essential Electric Light Orchestra* should please all but the hardcore fans. —M.C./E.L.

Eleventh Dream Day

★½ Prairie School Freakout (Amoeba, 1988)
★★ Beet (Atlantic, 1989)
★★ Lived to Tell (Atlantic, 1991)
★★ El Moodio (Atlantic, 1993)
★★½ Ursa Major (City Slang/Atavistic, 1994)
★★★ Eighth (Thrill Jockey, 1997)
★★★ Stalled Parade (Thrill Jockey, 2000)

Indie rockers rightly flaunted their distaste for the failings of the mainstream during the '80s and '90s, but their ranks produced plenty of mediocrity too. These Chicago scenesters are a case in point, with little to distinguish them besides the trends of the times that have bookended their career thus far. A heavy Sonic Youth influence lingers over the jangly and repetitive (and amateurish) first few albums, also recalling X in the howling double vocals of founders Rick Rizzo (guitar) and Janet Beveridge Bean (drums). But hard as they try, the group has neither Sonic Youth's transcendent power nor X's frenzied emotional depth. The guitars strum endlessly because they don't know what else to do, the drums beat out a wobbly shuffle, and the songs go nowhere. How they ended up on a major for *Beet* through the impossibly dreary *El Moodio* is anybody's guess.

Back in indieland, the group's next three were produced by John McEntire, the Brian Eno of '90s Chicago. He remade the band in the image of his group Tortoise by peeling away the wallpaper of open-chord guitars and building focused, articulate arrangements with a minimum of sounds. From the very first notes of *Ursa Major*'s instrumental opening, "History of Brokeback," a new Eleventh Dream Day emerges, with a strong, unhurried rhythm section and clear melodic patterns on guitar. The sound is under control and even interesting. But once the singing begins, they revert back to their old tricks and all advancements disappear. *Eighth* and its successor find the group falling more in line with late-'90s Chicago postrock, which is an improvement over their sloppy beginnings but only leaves them somewhere near the middle of a more up-to-date horse race. —B.S.

Missy Elliott

★★★★★	Supa Dupa Fly (Elektra, 1997)
★★★	Da Real World (Elektra, 1999)
★★★★	Miss E . . . So Addictive (Elektra, 2001)
★★★★½	Under Construction (Elektra, 2002)
★★★★½	This Is Not a Test! (Elektra, 2003)

Missy "Misdemeanor" Elliott rolled out of Virginia Beach in 1997, with the coolest name, hair, sneakers, album cover, and sound in pop music. *Supa Dupa Fly* made her an instant star, along with producer Timbaland, her partner in crimes against sonic conformity. Ever since then, Missy has ruled everything around music. She sings, she raps, and she drops the bomb of the year, every damn year. Who else keeps us all glued to our radios to hear pop music updated one giant step at a time, in the style of Prince and Madonna in the '80s or the Beatles and Motown in the '60s?

Elliott introduced her recipe on *Supa Dupa Fly.* Her albums always have unbelievably sexy beats and vocals, Virginia swamp-funk hip-hop production from Timbaland, plenty of filler, a couple of terrible R&B slow jams, and Elliott talking wild shit between songs. "Supa Dupa Fly (The Rain)," "Izzy Izzy Aah," and "Sock It 2 Me" were stoned-to-the-bone psychedelic soul, the kind that techno and trip-hop composers had always promised but never delivered so intensely. The avant-garde sound of *Supa Dupa Fly* made Elliott and Timbaland the hottest writer/producer team around, scoring hits such as Nicole's 1998 "Make It Hot" (a Missy single in all but billing, and one of her best) and Aaliyah's "Are You That Somebody?"

Da Real World was the one time Elliott got caught short of material. But *Miss E . . . So Addictive* had the smash "Get Ur Freak On," which sounded like Timbaland playing tabla on your frontal lobes while Missy yells "Holla!" until everybody who doesn't want to party drags that dead ass home. She got unexpectedly personal with *Under Construction,* reaching out to old-school '80s hip-hop in a spirit of playful nostalgia. Missy responds to grief and terror, including the death of her friend Aaliyah, by taking a fantastic voyage through the past in her double-Dutch bus, rocking it from the Dre Day to the Suge Knight. "Work It" was her most bizarre, futuristic, and undeniable hit yet, although fans also loved the slow jam with the chorus, "Pussy don't fail me now."

This Is Not A Test! is almost as great, with Elliott trying everything from gospel to electro to a romantic ballad for her vibrator ("Toyz"). In "Pass That Dutch," she and Tim set off car alarms, whistles, hand claps, kettledrums, heavy breathing, and party people chanting "Hootie-hoo!" It's an all-nighter at the sweatiest club in town, compressed into three and a half minutes. Elliott's made the single of the year at least three times—four if you count "Make It Hot"—and yet she still sounds as hungry and driven as ever. She refuses to repeat past successes, pushing on to newer and weirder realms while everyone else is catching up to what she was doing years ago. And after all these years, Missy and Timbaland still save their best stuff for each other. Holla! —R.S.

Eminem

★★★★	The Slim Shady LP (Interscope, 1999)
★★★★★	The Marshall Mathers LP (Interscope, 2000)
★★★★	The Eminem Show (Interscope, 2002)

There's a 71-second stretch near the end of "Stan," a track on Eminem's second album, that is impossible to ignore. Stan, a deranged fan played by Eminem himself, sends a final message to his hero before barreling over a cliff: "Dear Mr. I'm-Too-Good-to-Call-or-Write-My-Fans," he begins, working up a psychotic rant that strings together threats against his doomed girlfriend, a sarcastic quotation of an early Eminem line, and the rather unsettling declaration that he and Em "should have been together." The message ends as Stan goes over the edge, committing a murder-suicide inspired by the fictional killing of Eminem's wife in " '97 Bonnie & Clyde." Backed by a creepy sample from the British songstress Dido, it showcases just about everything great about Eminem: a penchant for arresting detail; a remarkable ability to switch between conversational flow, left-field role-playing, or rage-fueled torrents at a moment's notice; and bouts of surprising self-awareness.

From the moment "My Name Is" hit the airwaves, in spring 1999, Eminem galvanized a white suburban audience that had been waiting quietly for a white rapper who had the skills, tenacity, and shamelessness to be a new kind of rock star. Born in Kansas City to an absent dad and an unstable mom, he moved to a racially integrated part of Detroit, lived in a trailer, and proved himself not particularly good at anything except rhyming. His early recordings (some of which are collected on the now out-of-print *Infinite* album), show a distinctly less badass Em trying to find his voice and sounding a lot like the rapper Nas. After he invented his Slim Shady persona, however, a demo tape found its way to Dr. Dre, who was duly blown away by the immensely talented white kid.

The pair soon put together *The Slim Shady LP,* which found Em turning out a series of amazingly deft shock raps that ranged from comic to downright psychotic, often in the same verse: "Well since age 12, I've felt like I'm someone else/'Cause I hung my original self from the top bunk with a belt/Got pissed off and ripped Pamela Lee's tits off/And smacked her so hard I knocked her clothes backwards like Kris Kross." The album's hooky, low-affect G-funk—courtesy of Dre and a handful of lesser-known producers—gives Em plenty of room to maneuver, and he flat out demands your attention on "My Fault" and "'97 Bonnie and Clyde," horror-core tales in which Em watches one female companion OD on 'shrooms and dumps his wife's body in a lake, respectively. From class clown and workaday outcast to race trickster and a "guilty conscience" reminding his producer of his N.W.A past, *The Slim Shady LP* demonstrated that Shady was both an unavoidable pop creation and a rhymer talented enough for hip-hop heads to take seriously.

Besides establishing Eminem as a Major Talent, *The Slim Shady LP* confirmed that his greatest subject was himself—even if he did make up at least half the shit he said. *The Marshall Mathers LP* delved much deeper into personal pain, and the result was a minor masterpiece that merged iller-than-ill flows with a brilliant sense of the macabre. "The Real Slim Shady" is the obligatory insult-filled single, complete with disses of Christina Aguilera and Will Smith and shout-outs to his growing legion of angry teenage followers. The shock raps were still there ("I'm sorry, Puff/But I don't give a fuck if this chick was my own mother/I'd still fuck her with no rubber," he says of J. Lo on "I'm Back"), but on "Stan," "Marshall Mathers," and the awesomely angry "The Way I Am," Em revved up his already supercharged flow with real-life angst, decrying his celebrity, claiming he was misunderstood, and calling out his momma, who had already filed suit for defamation. "Kim" was another wife-killing fantasy filled will truly disturbing hate-spew; the record's misogyny, casual violence, and homophobia earned the ire of various watchdog groups, many of which had never listened to an Eminem record. Although the controversy has faded, the album's sound is still as unmistakable now as it was during the summer of 2000, when you couldn't run to the mailbox without hearing an album track pouring from someone's boom box or car stereo. The production is darker and more full-bodied on this LP, and while he's always been consistent, Em had never sounded so confident or inspired, employing six different voices in one song alone, constantly switching up his rhythms, and flinging disses with a quotability quotient unmatched in hip-hop history.

After a surreal "Stan" duet with Elton John at the 2001 Grammys, an arrest for brandishing a concealed weapon, and a so-so posse album with his homeboys in D12, Em and Dre reconvened for *The Eminem Show.* Except for another diss-filled lead single, "Without Me," Em completely abandoned the Slim Shady persona and made a concept album about how much it sucks to be a highly controversial rap star. The production's arena-rock bombast and Em's hyperserious lyrics threaten to sink the album, but on "White America," "Till I Collapse," and "Sing for the Moment" (which samples Aerosmith's "Dream On"), Em gets the most out of his anger-addled rant raps. "Cleanin' Out My Closet," a surprisingly tender track on which Em decides to run away from his mom, is as close to soft as anything he's ever done. The album's only truly bizarre moment is "My Dad's Gone Crazy," which begins with his daughter, Hailey, walking in on Daddy as he snorts a couple lines of coke, then uses a loop of Hailey's toddlerspeak for the song's chorus. Much of the album rocked plenty hard, but there were more duds than on any other Eminem record, particularly "Drips," "When the Music Stops," and the annoying sex fantasy "Superman." Less than six months after *The Eminem Show* was released, Eminem proved himself to be a surprisingly agile dramatic actor in the bio-pic *8 Mile* and won an Oscar for the amazing soundtrack cut "Lose Yourself." To date, he has not been arrested again. —C.H.

English Beat

★★★★★	I Just Can't Stop It (London/Sire, 1980)
★★★	Wha'ppen? (London/Sire, 1981)
★★★★	Special Beat Service (London/Sire, 1982)
★★★★★	Beat This—The Best of the English Beat (Sire, 2001)

To call the English Beat a ska band would be like calling the Beatles a Merseybeat act—accurate as far as it goes, though hardly going far enough. One of the few bands in the 2-Tone movement to extend its integrationist approach to matters of musical style, the Beat (as the band was known in Britain) drew equally from Motown, '60s rock, music hall, and punk to develop a sound that was rich and allusive but always put the songs first.

All of which makes *I Just Can't Stop It* compelling from first to last. It isn't just the ease with which the band recasts "Tears of a Clown" as insinuatingly supple ska or fills its remake of "Can't Get Used to Losing You" with sweet regret; what pushes the album over the top is its authority and ingenuity. Despite the lyric's sarcastic wit, the true power of "Mirror in the Bathroom" is its snaky, obsessive groove, a sound that says more about narcissism than words ever could.

But that sort of aural authority is typical of the album, filling in the bluster behind "Hands Off . . . She's Mine" and adding a sense of withering contempt to the anti-Thatcher "Stand Down Margaret."

After such a strong start, *Wha'ppen?* is a good question; although the band's musical skills are still strong, the songs are disappointingly forgettable. But *Special Beat Service* returns the group to form, escalating the Caribbean influence on the retro-skank of ska to dubwise reggae, as "Pato and Roger a Go Talk" (with Pato Banton) illustrates, and adding instrumental luster to pop gems such as "I Confess." But the writing cinches it for the group—from the catchy, clever "Jeannette" to the irrepressible "Save It for Later," the Beat's music is never less than irresistible. *Beat This* succeeds previous best-ofs with a near-perfect sampling of the band's hits, plus suitably laudatory liner notes. —J.D.C.

A brilliant conceptualist, a founding member of Roxy Music, and a self-described "nonmusician," the appallingly prolific Brian Eno is probably best known as a producer—he was behind the boards for some of the best albums made by David Bowie, Talking Heads, Devo, and U2—and for having coined the phrase "ambient music." A pity, that; Eno has also made wonderful music of his own, recording entrancing tunes with ingenious countermelodies that should have been hits, but weren't.

Pop content is just one component in the Eno catalogue and melody doesn't seem to interest him half as much as sound itself. Consequently, trawling through the Eno catalogue can be as frustrating as it is rewarding, especially as his later albums tend more toward music that seems airy, empty, and maddeningly diffuse.

In that sense, perhaps the best way to approach the Eno oeuvre is by forgetting chronology and diving in with the box sets. *I: Instrumentals* is a delightful omnibus of sound sketches, studio experiments, and sonic art. Some of it is from collaborations with Bowie, avant-pop trumpeter Jon Hassell, minimalist composer Harold Budd, King Crimson guitarist Robert Fripp, or the German electro group Cluster; some is from solo work using his own keyboards or session musicians. Invariably, Eno finds a certain idiosyncratic element in the sounds produced, and tickles them out. When his teasing tends toward atmospheric stasis, the results are generally dubbed "ambient"—sort of like New Age gets an MFA. But not everything there falls into that category; some tracks, such as "Energy Fools the Magician" or "Chemin de Fer," are as catchy and well-crafted as any pop single.

The second box, *II: Vocals,* has far more of that, and relies heavily on Eno's early albums. Applying what he learned about pop subversion from his tenure in Roxy Music to the revisionist aesthetic of new-wave rock, songs such as "Baby's On Fire," "King's Lead Hat," and "Here Come the Warm Jets" boast all the hook-driven appeal of hit singles, yet without the heard-it-before predictability of conventional pop. Eno rarely took the conventional give-the-singer-the-melody approach, however, and on a number of tracks, the vocal—which may be song, or speech, or some "found" bit of a movie or radio broadcast—is just part of the overall sound, often almost incidental to the instrumental parts.

For fans of his vocal music, the key Eno albums are *Here Come the Warm Jets, Taking Tiger Mountain (by Strategy),* and *Before and After Science.* It may be easy to hear both an anticipation of punk and an echo of Roxy Music in the arch clangor of *Here Come the Warm Jets,* but what shines brightest is the offhand accessibility of the songs. It hardly matters whether he's playing with style (as with the doo-wop undercurrent to "Cindy Tells Me") or fooling with form (the portmanteau construction of "Dead Finks Don't Talk"); the melodies linger on. Listening to it now, the album seems almost a blueprint for the pop experiments Bowie (with Eno producing) would conduct with *Low.*

Taking Tiger Mountain (by Strategy) is just as pop-friendly and eclectic, but shies away from the abrasive textures of its predecessor, swapping distortion and dissonance for blurred edges and open-ended harmonies. Not that the album is entirely without teeth, as there's an itchy aggression to the breathless "Third Uncle" and an ominous urgency to the latter half of "The True Wheel." But Eno keeps such snarls on a tight leash; far more typical is the dry wit of "Back in Judy's Jungle."

But it's *Before and After Science* that stands as the greatest of Eno's "pop" albums. A nearly perfect album, it frames Eno's melodic instincts in every imaginable way, from the chilly funk of "No One Receiving" to the irrepressible vigor of "King's Lead Hat" (an anagram for Talking Heads), to the dreamy cadences of "Here He Comes."

After sitting out the '80s, Eno returned to the pop form in 1990 with the brittle, uneven *Wrong Way Up.* Recorded with John Cale, it's a good attempt at recapturing the old magic, but frankly Cale's intense artiness undercuts Eno's instincts. *My Squelchy Life* was originally intended as the followup, but after making advance copies available to the press, Eno withdrew the album (which is now available only on bootleg). Instead, the unexpectedly funky *Nerve Net* became his next pop effort, and it mostly fizzles. Perhaps sensing the tenor of the times, Eno puts more effort into making good grooves than in writing memorable melodies, and while the resulting tracks are full of good energy and interesting sounds, they lack the hooky good nature of *Before and After Science.*

Then again, after Eno's having spent most of the previous decade releasing album after album on which texture was king, what were we to expect? Although some critics have derided his instrumental albums as being a sort of high-concept mood music, it wasn't mood he was interested in; it was atmosphere. On these discs, he took an almost functional approach to music, manipulating its sonic power in the same way a painter or interior designer might manipulate the power of light, color, and form.

Eno began moving in that direction with *Another Green World.* Here, he uses the studio itself as an instrument, molding directed improvisation, electronic effects, and old-fashioned songcraft into perfectly balanced aural ecosystems such as "Sky Saw" or "St. Elmo's Fire." Initially, he referred to these quiet soundscapes as "discreet" music, and on *Discreet Music* (a wry deconstruction of Pachelbel's Canon in D) demonstrates his basic tools: minimal melodies, subtle textures, and variable repetition. Around this time, he had also been collaborating with the German synth duo Cluster on a pair of moody, coloristic electronic albums, selections from which may be found on the *Begegnungen* and *Begegnungen II* compilations. But it was *Music for Airports* that finally codified these experiments into an aesthetic, and even provided a label for the sound: ambient music.

As much as Eno understands about psychoacoustics and the relationship between what is heard and what is merely sensed, the largely functional (and mostly tuneless) nature of the music limits the listening pleasure of subsequent ambient releases, such as *On Land, Apollo,* and *Thursday Afternoon.* (Eno also produced albums by other artists for his ambient series: both Harold Budd's rich, moody *Plateaux of Mirror* and Laraaji's shimmering *Day of Radiance* are slightly more energetic and engaging than Eno's own efforts.)

There were, of course, releases that didn't carry the ambient tag but seemed part of the same musical subspecies. The three volumes of *Music for Film* work very much on the same principle as the ambient albums, and feature some of the same collaborators. Likewise, there's an extreme emphasis on atmosphere in the spacey *Shutov Assembly,* the contemplative *Neroli,* and the delicately textured *Drop.*

Meanwhile, Eno continued to collaborate with others. *My Life in the Bush of Ghosts,* which takes its title from Amos Tutuola's novel, was recorded with Talking Headman David Byrne, and offers some insight into the cut-and-paste approach to groove the two applied while making Talking Heads' *Remain in Light.* Its "found art" approach to vocals (however scrupulously footnoted) is an acquired taste, but in hindsight it sounds like a true forerunner of hip-hop sampling. *Spinner,* recorded with former Public Image Ltd. bassist Jah Wobble, boasts gently insistent grooves and strongly Middle Eastern flavors, elements Eno had flirted with on the earlier *Ali Click.* More recently, Eno has been working with the German DJ Jan Peter Schwalm. Their first collaboration, the Japanese-only *Music for Onmyoji* (literally, "Music for the Fortune-teller"), is a double album combining one disc of conventional, deftly crafted synthscapes with a disc of manipulated and collaged recordings based on *gagaku,* the ancient traditional music of the Japanese Imperial Court. *Drawn From Life* is rather less exotic, relying on Western instrumentation and household sounds to generate a rich, surprisingly evocative sonic tapestry celebrating the rhythm of day-to-day life (hence the title).

There's a third stream to Eno's catalogue that isn't represented by a box, and that's his "installations." These are sound sculptures created for specific environments; usually instrumental, they are not compositions in the traditional sense, with a beginning, middle, and end, but are open-ended constructions designed to go on indefinitely without looping or intentionally repeating the material. (Opal is Eno's own label, and these discs are available online from *www.enoshop.co.uk.*) Some, such as *Kite Stories* or *Compact Forest Proposal,* for instance, come from environmental pieces in which multiple CD players, loaded with multiple discs, provide layers of music from varied locations. Obviously, the CD experience can only approximate the installation. Others, such as *Lightness* and *I Dormienti,* are more conventional ambient pieces. Perhaps the most interesting is *January 07003: Bell Studies for the Clock of Long Now,* which treats, toys with, and manipulates the sound of bells, a wonderfully transformative piece that provides new insight into everyday chiming.

More Blank Than Frank and *Desert Island Selection* are best-of albums emphasizing material from *Warm Jets* through *Science.* Of the two, the CD version *(Desert Island)* is preferable, since it offers a slightly more balanced overview. Finally, *Curiosities, Vol. 1* is essentially a collection of leftovers, tracks deemed by Eno too interesting to discard, but too singular to be included elsewhere. Completists only. —J.D.C.

En Vogue

★★★	Born to Sing (Atlantic, 1990)
★★★	Remix to Sing (Atlantic, 1991)
★★★★	Funky Divas (Atlantic, 1992)
★★★½	Runaway Love (Atlantic, 1993)
★★½	EV3 (Elektra, 1997)
★★★½	Best of En Vogue (Elektra, 1999)
★★	Masterpiece Theater (Elektra, 2000)
★★★★	Very Best of En Vogue (Rhino, 2001)

Arriving during an era in which the girl-group mantle had been inherited by the thin-voiced likes of Exposé and the Cover Girls, En Vogue's full-throated sound immediately set them apart, making them seem the gold standard for R&B pop. Never mind that the quartet was every bit a producer's toy—the group, comprised of former session and background singers, was assembled by Timex Social Club masterminds Denzil Foster and Thomas McElroy—the mere fact they could sing was enough to ensure they'd be revered as soul revivers.

Even so, what carried *Born to Sing* wasn't the vocalizing so much as Foster and McElroy's slick New Jack grooves. It wasn't until *Funky Divas* that the foursome got songs to match the power of their voices (not to mention the persuasion of the beats). Thanks to such singles as "My Lovin' (You're Never Gonna Get It)" and "Free Your Mind," En Vogue was very much in style—and the group's glamour-puss videos only added sizzle to the package.

Following through on such success, however, turned out to be beyond their abilities. The remix-heavy *Runaway Love* recycled *Divas* much in the same way that *Remix to Sing* redid the first album (although "Whatta Man," with Salt-n-Pepa, almost makes the redundancy worthwhile), and by the time En Vogue returned with a full album, the four were reduced to a trio. But it wasn't the lack of a fourth so much as the absence of strong material that left *EV3* wanting; not even contributions from Babyface and Dianne Warren could rekindle the spark of *Divas.* Three years later, the three tried again with *Masterpiece Theater,* but judging from the sound, the title appears to have been meant ironically. —J.D.C.

Enya

★★★	Enya (Atlantic, 1988)
★★★½	Watermark (Geffen, 1988)
★★½	Shepherd Moons (DGC, 1991)
★★★	The Memory of Trees (Reprise, 1995)
★★★½	Paint the Sky With Stars: The Best of Enya (Reprise, 1997)
★★★	A Day Without Rain (Reprise, 2000)

Throughout the '90s, all things Celtic enjoyed a vogue (James Horner's pipe-laden *Titanic* soundtrack, for one). That vogue began with Enya. Her first U.S. release, *Enya,* is postmodern Gaelic music, strong and lovely, consisting of pleasures that perhaps initially seemed too arcane for all but Yeats fanatics or the most catholic followers of world music. All the more suprising, then, is the fact that this ex-Clannad member and keyboard whiz has become a platinum success. *Watermark*—more accessible than her debut—is the remarkable record that established her. Some of the songs are sung in Irish (and one in Latin), but the pristine strength of Enya Ní Bhraonáin's voice—and the cinematic sweep of her songs' arrangements—translates into an aural landscape of spare ecstasy that carries you away. "Storms in Africa," "Evening Falls," and "Orinoco Flow (Sail Away)" achieve nearly mythic resonance—and her startling fusion of passion and severity make Enya a true original. *Shepherd Moons,* however, is a bit of a comedown, but its inward-looking, lunar intensity continued to win Enya enough adherents that she was soon on her way to releasing a greatest-hits collection. Both *The Memory of Trees* and *A Day Without Rain* are embellishments of *Watermark*—and they're sonically gorgeous. —P.E.

EPMD

★★★★★	Strictly Business (Priority, 1988)
★★★★	Unfinished Business (Priority, 1989)
★★★★	Business as Usual (Def Jam, 1990)
★★★½	Business Never Personal (Def Jam, 1992)
★★½	Back in Business (Def Jam, 1997)
★★	Out of Business (Def Jam, 1999)
★★★★	Greatest Hits (Def Jam, 1999)

De La Soul and Public Enemy got all the press at the time, but EPMD influenced the shape of '90s hip-hop as much as any late-'80s artist except for N.W.A and Kool G. Rap. They were regular guys who made the hottest tracks: No elaborate concepts here, just one or two funk samples looped to death, and some imperturbably cool, deadpan rhymes on top, courtesy of Long Island guys Parrish Smith and Erick Sermon.

Strictly Business relies on deep funk, usually taken from the catalogue of the J.B.s or George Clinton. On classics like "You Got's to Chill," and "You're a Customer," Sermon's mushy-gravy delivery and Smith's smoother, tightly wound flow trade barbs and brags; the choruses, such as they are, are usually Erick or Parrish speaking the title of the song. It's an incredibly simple formula, but like Rakim's *Paid in Full,* it's a landmark of hip-hop cool—an album that can both wash over you and make you dance.

Unfinished Business is more professional. Still strictly breaks and beats, their sophomore album isn't much of a departure, but it does find them settling into their lyrical personas, Smith the straight-faced heavy and Sermon the comic relief. "The Big Payback" chugs along at such a furious tempo that you forget that James Brown did the music. "So Watcha Sayin' " is an uptempo masterpiece. *Business as Usual* is the bridge to new-school hip-hop. The music becomes more dense, more layered, incorporating more than just a break and a loop. Smith and Sermon are at the top of their game, dissing fake girls ("Gold Digger") and any rappers who would challenge their supremacy ("I'm Mad," "Rampage").

Business Never Personal has its supporters, and its hot tracks ("Crossover"), but more than anything, it marks the point where Smith and Sermon's partnership started to sour creatively. After a falling-out over money that caused a five-year break between the two, Smith and Sermon reunited for 1997's forgettable *Back in Business.* While the album is far from embarrassing, it's nowhere near the standard of their peak work. Perhaps they knew it, trying to capture some of the old magic on "You Got's to Chill 2."

EPMD took a victory lap in 1999, releasing the swan song *Out of Business* and a best-of compilation. *Out of Business* has its moments, especially a passing-of-the-torch track with Method Man and Redman ("Symphony 2000") but is ultimately unworthy of comparison with their earlier classics. —C.R./N.B.

Eric B. & Rakim

★★★★★	Paid in Full (4th & Broadway/Island, 1987; 1996)
★★★★½	Follow the Leader (UNI, 1988)
★★★★	Let the Rhythm Hit 'Em (MCA, 1990)
★★★★	Don't Sweat the Technique (MCA, 1992)
★★★★★	Paid in Full: The Platinum Edition (PolyGram, 1998)
★★★★	The Millennium Collection (Universal, 2001)

Eric B. & Rakim's debut 1986 single, "Eric B. Is President," b/w "My Melody (Zakia)," was one of the two or three biggest moments in hip-hop, and the revolution it began continued with their debut album. *Paid in Full* was the first hip-hop album to foreground sampled drumbeats as the primary rhythm bed instead of using them as drop-ins, stabs, and accents. More important, Rakim was the first MC to cross the bar line and let his rhymes scan in idiosyncratic, rhythmic clumps, just like Thelonious Monk had done years before. But that's not why he's the greatest MC of all time. The dark, scratchy-smooth voice is one reason; the ability to compress dignity, humor, and drama into a few words is another: "I need money/I used to be a stick-up kid/so I think of all the devious things I did/I used to roll up/this is a hold up/ain't nothing funny/stop smiling/be still/don't nothing move but the money." Most of all, he swung so hard that a new word entered the hip-hop vernacular when he arrived: flow. If any one MC embodies flow, it's Rakim.

Paid in Full is one of hip-hop's perfect records, from the thumbnail hood ethos of the title track to the dance-floor monster "I Know You Got Soul," which single-handedly resuscitated James Brown in 4:44. Tough guys were thick on the ground, but Islamic philosopher-poets with cowboy equilibrium were something new. *Follow the Leader,* maybe hip-hop's best sophomore album, speeds up their bare bones on the galloping galactic funk of the title track, the epitome of New York sangfroid, "Microphone Fiend," and the perfectly named "Lyrics of Fury." *Let the Rhythm Hit 'Em* opened up the duo's sound, as Rakim attempted a loverman routine in "Mahogany," while mostly sticking with their newly uptempo default position on the title track and "No Omega." (Few groups in pop get faster as they get older, but Eric and Ra did.) The final album before the group split, *Don't Sweat the Technique,* is usually rated lower, but for no apparent reason. "Pass the Hand Grenade," "Know the Ledge," "Casualties of War," and the title track are classics in the fast rap style that they actually spent more time doing than in their first LP mode. *Paid in Full: The Platinum Edition* is more than just marketing hokum: The remixes disc contains Coldcut's version of "Paid in Full," the most influential remix ever, as well as an early version of "Massive Attack," "The Wild Bunch," remixing "Move the Crowd" and Derek B remixing "Paid in Full" with a quote from John Mellencamp's Jack and Diane. Who said mash-ups were new? —S.F.J.

Roky Erickson

★★★½	The Evil One (1981; Pink Dust, 1987)
★★★½	I Think of Demons (Edsel UK, 1987)
★★★	Don't Slander Me (Pink Dust, 1986)
★	Gremlins Have Pictures (Demon, 1986)
★★★★	You're Gonna Miss Me: The Best of Roky Erickson (Restless, 1991)

As with Syd Barrett, Roky Erickson's reputation has as much to do with his acid-casualty notoriety as with the flashes of brilliance that run through his music. As a member of the 13th Floor Elevators, Erickson is widely credited with having invented psychedelic rock—indeed, the quintet's 1966 debut, *The Psychedelic Sounds of the 13th Floor Elevators,* predates both *Grateful Dead* and Pink Floyd's *The Piper at the Gates of Dawn.* But Erickson's interest in mind expansion inevitably took its toll. He was arrested for marijuana possession in 1968; pleading insanity, he spent almost four years ensconced at the Hospital for the Criminally Insane in Rusk, Texas.

Erickson resumed his musical career in the late '70s, cutting a couple of singles before forming the Aliens, with whom he recorded an album's worth of demented material in 1980. Originally released as *Roky Erickson and the Aliens* on CBS UK in 1980, expanded versions of the album have since been released under the titles *The Evil One* and *I Think of Demons.* Unlike the showbiz satanism heavy-metal bands dabble in, this is truly disturbing material, as Erickson delivers the likes of "Don't Shake Me Lucifer," "Night of the Vampire," and "Two Headed Dog" with the creepy conviction of one whose demons are a little too real.

Sadly, the novelty of such dementia dissipates rather quickly. Apart from the paranoid title tune, *Don't Slander Me* doesn't seem quite so fascinating, returning Erickson to the blues-based grooves that were the Elevators' meat and potatoes. *Gremlins Have Pictures,* recorded in haphazard sessions with various lineups, is merely a document of Erickson's musical deterioration. *You're Gonna Miss Me: The Best of Roky Erickson* draws from all of the above as well as a smattering of concert recordings, and offers the most representative overview of his solo career. —J.D.C.

Alejandro Escovedo

★★★★½	Gravity (Watermelon, 1992; Texas Music Group, 2002)
★★★★	Thirteen Years (Watermelon, 1994; Texas Music Group, 2002)
★★★	With These Hands (Rykodisc, 1996)
★★★½	More Miles Than Money: Live 1994–1996 (Bloodshot, 1998)
★★★½	Bourbonitis Blues (Bloodshot, 1999)
★★★★½	A Man Under the Influence (Bloodshot, 2001)
★★½	By the Hand of the Father (Texas Music Group, 2002)

with Buick MacKane

★★★	The Pawnshop Years (Rykodisc, 1997)

By the time he released his debut solo album, Alejandro Escovedo had already spent more than a decade playing punk (with the Nuns); cow punk (Rank & File); and full-tilt, triple-guitar rock & roll (True Believers). But the San Antonio–born artist really came into his own with *Gravity* and its equally stunning followup, *Thirteen Years.* Both albums—smartly produced by guitarist Stephen Bruton—were born out of tragedy, as Escovedo struggled to come to grips with the suicide of his first wife. From the chilling opening couplet of "Paradise" ("Did you get your invitation/ There's gonna be a public hanging") to the sadder-than-Tom-Waits-at-closing-time "Broken Bottle" and the ghostly "She Doesn't Live Here Anymore," *Gravity* plays out like one long, cathartic sigh of grief, even when it rocks out with Faces-worthy abandon ("One More Time"). The air of melancholy lingers through most of the more richly orchestrated *Thirteen Years,* but the Tex-Mex-flavored swell of violins, cello, and harp in "Ballad of the Sun and the Moon" hints at a break in the clouds. Across both albums, Escovedo's triple-threat strength as a writer, singer, and arranger is in full display, his songs alternately evoking shades of the moody romanticism of Nick Drake, the experimentalism of the Velvet Underground, and the unruly, street-poet glam of Mott the Hoople's Ian Hunter. (Both *Gravity* and *Thirteen Years* have been reissued with bonus discs featuring instrumental and live tracks; his cover of Hunter's "I Wish I Was Your Mother" is a highlight on both.)

Escovedo's output for the rest of the '90s fell short of that staggering opening salvo of bitter-sweet pathos, though the uneven *With These Hands* and *The Pawnshop Years* (featuring his endearingly sloppy garage band Buick MacKane) are not without their charms, particularly the former's Willie Nelson duet, "Nickel and a Spoon." The live *More Miles Than Money* makes for a fine introductory set, complemented with wicked viola- and cello-driven covers of the Rolling Stones' "Sway" and the Stooges' "I Wanna Be Your Dog." Smart covers (Hunter's "Irene Wilde," Lou Reed's "Pale Blue Eyes") also carry the weight on *Bourbonitis Blues,* a half-live/half-studio affair. But with *A Man Under the Influence,* Escovedo delivered his most satisfying and fully realized batch of originals since his debut. Among the highlights: "Castanets," his best—and rowdiest—rocker to date; "Velvet Guitar," which channeled *Ziggy Stardust*–era David Bowie; and the darkly atmospheric "Wave," which towers above everything else in his canon. A more restrained version of "Wave" is reprised on *By the Hand of the Father,* a soundtrack to a play about the plight of Mexican immigrants inspired in part by Escovedo's music. It's a moving but imperfect concept album—all the spoken narrative discourages repeated listening. Escovedo's songs get their message across just fine without such extrapolations. —R.S.K.

Melissa Etheridge

★★	Melissa Etheridge (1988; Island, 2003)
★★	Brave and Crazy (Island, 1989)
★★	Never Enough (Island, 1992)
★★★½	Yes I Am (Island, 1993)
★★★½	Your Little Secret (Island, 1995)
★★★	Breakdown (Island, 1999)
★★½	Skin (Island, 2001)
★★½	Lucky (Island, 2004)

Melissa Etheridge has, over the course of eight albums, transformed herself from an issues-oriented feminist folkie to a love-song-slinging blues rocker.

On the heavily acoustic *Melissa Etheridge,* her songs are less about lust than loss, running the gamut from *Why don't you want me?* to *You used to want me, why don't you want me now?* (A deluxe 2003 reissue augments the original album with such fans-only fare as demos and live recordings.) With the overly ambitious *Brave and Crazy,* she leavens the spurned-lover stuff with attempts at poetry, resulting in such cringe-worthy choruses as "Shame, shame but I love your name/And the way you make the buffalo roam." Ouch. *Never Enough* toughens her sound slightly, but it's not until *Yes I Am* that Etheridge finds her formula. With the bluesy grind of "Come to My Window," Etheridge found not only a hard-rock approach suited to her big, bluesy voice, but also a subject—sexual desire—to which everyone could relate.

Your Little Secret expands on that breakthrough, bringing an almost Springsteenian majesty to some of the songs. Even better, she truly understands the allure of illicit desire, and through the likes of "Such an Unusual Kiss" and "I Want to Come Over" makes it very easy to see the good side of bad love. *Breakdown* tends to prefer heartbreak melodrama to lubricious longing, which isn't as much fun but is nearly as entertaining. "Angels Would Fall" may try to be the pop equivalent of *The Thorn Birds* as Etheridge's protagonist longs to lead a devout lover off the prayerful path, but it serves up its soapy saga with enough musical oomph to make the lyrical excesses forgivable.

The rough and rambunctious *Skin* is less ambitious and much more uneven, but when it works—as on the rousing "I Want to Be in Love"—it shows that Etheridge has lost none of her bite. A pity, then, that *Lucky* keeps coming up boxcars. While there's plenty of desire on display in the lyrics, the music itself seems neither hungry nor horny, while "Tuesday Morning," dedicated to gay 9/11 victim Mark Bingham, seems slightly gratuitous in comparison with songs such as Neil Young's "Let's Roll." —J.D.C.

★★	Savage (RCA, 1987)
★★	We Too Are One (Arista, 1989)
★★★★	Greatest Hits (Arista, 1991)
★★	Live 1983–1989 (Arista, 1993)
★★½	Peace (Arista, 1999)

On one level, Eurythmics was a perfect musical marriage, balancing the full-throated passion of singer Annie Lennox with the studio-savvy popcraft of guitarist/keyboardist/producer Dave Stewart. But at the same time, what worked best about the duo's musical chemistry wasn't necessarily in line with what the two most wanted to do, meaning that their best albums were inevitably based on compromise.

That certainly is the case with *Sweet Dreams (Are Made of This),* the group's first American album. Although its predecessor, the import-only *In the Garden,* used its electronics mainly as a means of fleshing out standard-issue new wave arrangements, *Sweet Dreams* built a significant portion of its sound around synthesizers. While that added poignancy to "Love Is a Stranger" and the title tune, Lennox truly cuts loose on the duo's cover of the Sam & Dave hit "Wrap It Up." *Touch* not only reprises *Sweet Dreams'* synths-plus-voice formula, but one-ups it with "Here Comes the Rain Again." Unfortunately, *1984,* the soundtrack for Michael Radford's film of the George Orwell novel, uses its musical technology almost too well, lending an oppressive chill to the music.

With *Be Yourself Tonight,* Eurythmics expand from duo to full band, and while that shift doesn't entirely displace the group's electronics—"There Must Be an Angel (Playing with My Heart)," for instance, still relies heavily on synths for its instrumental flavor—it does shift the emphasis. "It's Alright (Baby's Coming Back)," "Would I Lie to You?," and the Aretha Franklin duet "Sisters Are Doin' It for Themselves" take a soulful tack that makes the most of Lennox's delivery. Lennox aside, though, Eurythmics' credibility as R&B stylists is fairly limited, and cracks begin to show in their façade as early as *Revenge,* on which the bluesy bluster of "Missionary Man" sounds dishearteningly hollow. Chastened, Eurythmics return to a techno-intense sound for *Savage,* but by this point the group's sound is too mannered to have much impact; at best, songs like "I Need a Man" and "Beethoven (I Love to Listen To)" come across as little more than academic exercises. Still, that's better than *We Too Are One,* which is unable to eke even the slightest melodic interest from the band's empty professionalism.

Lennox announced she was going on sabbatical shortly after *We Too* was released, and returned as a solo artist in 1992; Stewart, by that point, had two solo projects under his belt. The duo reunited for the lush-but-insubstantial *Peace* in 1999. —J.D.C.

Faith Evans

★★★ Faith (Bad Boy, 1995)
★★★ Keep the Faith (Bad Boy, 1998)
★★★½ Faithfully (Bad Boy, 2001)

Known best in hip-hop circles as the Notorious B.I.G.'s widow, Faith Evans matured as an artist only after the murder of her (in)famous husband, from whom she was separated at the time. In fact, she likely made her most lasting impression as a prominently featured vocalist on "I'll Be Missing You," Puff Daddy's tribute to his late friend and business partner. Released in 1995, *Faith* was a decent example of '90s R&B—thoroughly produced and somewhat formulaic—but it only hinted at the depth of her artistry. It wasn't until the release of *Keep the Faith* that Evans began to show the kind of promise that separated her from an army of other R&B vixens (Brandy, Deborah Cox, Kelly Price, Monica, etc.). *Faithfully,* her 2001 release, was by far her best album, with its lush backing arrangements and smooth (but not slick) grooves that recall the '70s soul of Philadelphia International artists such as Harold Melvin and the Blue Notes, the O'Jays, and Billy Paul. —K.M.

Eve

★★★ Let There Be Eve . . . Ruff Ryder's First Lady (Interscope, 1999)
★★½ Scorpion (Interscope, 2001)
★★ Eve-olution (Interscope, 2002)

Philadelphia native Eve Jihan Jeffers is a competent if unexceptional MC whose commercial success has largely been spun from her streetwise brand of flapper glamour. Lacking the outrageousness of Lil' Kim or the lyrical roughness of Lady of Rage, Eve is an easy-to-digest artist as au courant as the musically thin Swizz Beats–produced tracks she often rhymes over. Even after listening to an entire Eve album, it's tough to recall any particularly clever couplets or memorable turns of phrase, and the self-described "pitbull in a skirt" remains best known for her exotic hairstyles and the pawprint tattoos on her chest. Yet due to some well-plotted collaborations, Eve can lay claim to appearing on a couple of truly great tracks.

Eve first drew major attention for the Dr. Dre–produced cut "Eve of Destruction" on the soundtrack for the film *Bulworth,* but it was her appearance on "You Got Me," the classic single from the Roots' 1999 album *Things Fall Apart,* that boosted anticipation for her debut album. *Let There Be Eve* was indeed an enjoyable release, but it displayed a self-aggrandizing lyrical preoccupation with dissing haters that Eve has yet to grow beyond.

Her sophomore effort, *Scorpion,* included "Blow Ya Mind," a Dr. Dre–produced duet with No Doubt's Gwen Stefani that deservedly won a Best Rap/Sung Collaboration Grammy. But what distinguished

"Blow Ya Mind" was Dre's fatback beat (one of his post–*Chronic 2001* best) and Stefani's slinky, catgirl chorus—not Eve's rapping. *Scorpion* was otherwise disappointing, reaching a nadir on the Damien Marley duet "No, No, No," a karaoke-type retread of Dawn Penn's ubiquitous dancehall reggae hit.

Eve's third album featured "Gangsta Lovin'," a duet with Alicia Keys, but while the single went into microwave rotation on MTV, it failed to duplicate the thrill of "Blow Ya Mind." *Eve-olution*—ostensibly a document of spiritual and artistic growth—did not deliver the goods. On "What," she summed up her strength (head-turning looks) and weakness (mundane rapping) with the couplet "Tired of my voice/ Plug your ears/Outrageous by choice/Love the stares." In late 2002, Eve made the transition to the big screen with a small role in the Vin Diesel vehicle *XXX* and a larger part in the Ice Cube flick *Barbershop.* —P.R.

Eve 6

★★½	Eve 6 (RCA, 1998)
★★	Horrorscope (RCA, 2000)
★★½	It's All in Your Head (RCA, 2003)

Eve 6 frontman Max Collins is a curious pop-rock specimen, a songwriter who's just bright enough to write lyrics betraying the extreme limitations of his callow insight. If that betrayal were conscious, he'd be one to watch. But Collins would seem to have psychological conflicts that no mere mass audience can cure. And audiences have a way of wisely easing out of such overly dependent relationships.

Eve 6 spawned the radio staple "Inside Out," a bit of strained catchiness distinguished by a line about depositing his "tender/Heart in a blender"—pop culture's grossest use of that particular appliance since Rerun made a baloney shake on *What's Happening?* But once you notice that Collins' plea to "tie me to the bedpost" makes consensual S&M sound as much fun as having your teeth cleaned, you wonder if the boy's getting out often enough.

In fact, Collins spends the better part of *Eve 6* convincing himself that his sexual impulses are dirty and shameful. And that is *no* turn-on. A cannier (or just less uptight) vocalist might have delivered "May I help you put aside your moral fiber?" in a gentle enough way to turn "Jesus Nitelite" into a funny seduction scenario, but Collins clobbers it with melodramatic self-loathing. *Horrorscope* relaxes a bit, musically and vocally, but neither Collins' take on relationships ("Amphetamines") nor on stardom ("Sunset Strip Bitch") is very enlightening. With *It's All in Your Head,* the band tries for more sophisticated lyrical themes (classism, lost children) and doesn't quite pull it off. —K.H.

Everclear

★★★★	Sparkle and Fade (Capitol, 1995)
★★½	World of Noise (Capitol, 1995)
★★★½	So Much for the Afterglow (Capitol, 1997)
★★★★	Scenes From an American Movie: Learning How to Smile (Capitol, 2000)
★★★	Songs From an American Movie, Vol. 2: Good Time for a Bad Attitude (Capitol, 2000)
★★	Slow Motion Daydream (Capitol, 2003)

Everclear was initially touted as yet another instamatic Nirvana rip-off when they first arrived, but in fact they honorably represented grunge's tauter, punkier fringe. And in a sense, scene veteran Art Alexakis is the anti–Kurt Cobain. His gift is to make the base, crass motives that alternative rock used to look down upon seem desperate, even heroic, a slob's way of exerting his tiny bit of control over a cruel world. Class consciousness permeates "I Will Buy You a New Life," about the transformative power of new money, and "Rock Star," about a guy (possibly Alexakis himself) who wants to get laid and "a girlfriend who does not drink beer."

The tangled *World of Noise* was too aptly titled, but *Sparkle and Fade* was everything a radio-ready rock record should be: explosive, soul-searching, belligerent. When his proudly flaunted "black girlfriend" on "Heart Spark Dollar Sign" declares "You're possessed by a power bigger than the pain," you want to kick him in the shins. But the awesome "Santa Monica" encapsulates Alexakis' cynically escapist worldview—walking hand in hand away from bland normalcy, "we can watch the world die." The perfectly titled *So Much for the Afterglow* is a worthy successor.

With grunge gone, the two volumes of *Scenes From an American Movie* ply Art's sentimental side, intending to establish him as power-ballad troubadour of nuclear-family fission. But having a pop sensibility isn't the same as possessing pop gifts, and Alexakis employs the same tunes over and over. But the first volume contains nice reminiscences, both personal and cultural, as well as decorative but unobtrusive strings and horns, and the repetition of similar melodies has a cumulatively heart-tugging effect. Volume two thrashes about with less focus, often adequately if not fully convincingly. But the refrain of "Babytalk" ("She's got him by the balls") won't reassure anyone who hoped maturity might temper Art's woman issues. A guy can only rehash his troubled youth so often, however, and so Alexakis surveyed the present on *Slow Motion Daydream.* The best he could come up with was the tepid social commentary of "Volvo Driving Soccer Mom." This is the way alt-rock ends—not with a bang but a whimper. —K.H.

Everlast

★½	Forever Everlasting (Rhyme Syndicate-Warner Bros., 1990)
★★★	Whitey Ford Sings the Blues (Tommy Boy, 1998)
★★★½	Eat at Whitey's (Tommy Boy, 2000)
★★★	White Trash Beautiful (Island Def Jam, 2004)

Everlast is hip-hop's least likely auteur: a teen discovery of original gangsta Ice-T, who rose from a sullen white boy aping rap clichés to become a brooding artist fluent in hip-hop, folk, rock, and meaningful social commentary. Born Erick Schrody, Everlast first hit the charts with the furious shamrocks-and-beer trio House of Pain, but found his true voice retooled as a solo artist, with a stirring hybrid of turntables and acoustic guitars he called "hick hop," equal parts thug and cracker.

Nothing like that was evident on Everlast's disposable 1990 debut, *Forever Everlasting,* a thin collection of unremarkable beats and raps, stripped down and generic. He works up some empty dance-floor beats for "What is This?" and goes urban romantic (a la LL Cool J) for "On the Edge," and the effect is soft and unconvincing, leaving no impression at all. But Everlast was no Marky Mark either, and soon transformed himself into a burly, tattooed frontman overflowing with attitude and Irish testosterone in House of Pain (1992's double-platinum "Jump Around"). It bounced and rocked, but suggested none of the layers of feeling to come. Everlast was an artist in transition.

Everlast's true self emerged on *Whitey Ford Sings the Blues.* Hip-hop was now just one of many ingredients in his sound, and he was as likely to pick up an acoustic guitar as bust a hard-core rap groove. Mixing guitars and beats was no gimmick but a genuine statement of self, landing him close to Beck's musical territory. Everlast opens with some playful nursery rhyme funk (echoing the Tom Tom Club) that announces, "The white boy is back, and you know he never smoked crack." Jokes aside, he included lots of hard-headed raps circa 1998, all toughness and bluster, rapping on getting laid and paid ("Dolla-dolla-dolla-dolla-bill, y'all!"). More important was the debut of Everlast as postmodern bluesman: he redefined himself as a world-weary troubadour for a new age with "What It's Like." "Ends" rode a similar talking blues groove, colliding guitar with scratches into a new genre, where the real folk blues meet hip-hop, delivering social commentary as potent as Stevie Wonder's "Living for the City."

Eat at Whitey's dug even deeper into roots, cranking up the funk, even turning Slick Rick's "Children's Story" into fresh Delta hoodoo with some human beatbox from the Roots' Rahzel. "Black Jesus" is an ominous, full-boil rocker, with Everlast's white rasp sounding straight outta Lynyrd Skynyrd. The presence of guests Carlos Santana and B-Real suggests the kind of range at his disposal, as does the sticky funk with Cee-Lo on "We're All Gonna Die." This time, however, inspiration didn't translate into radio. But not even disappointing sales for *Eat at Whitey's* shook Everlast's musical muse. Four years later, *White Trash Beautiful* turned his wounded growl further inward; he's still tough but not so limited by machismo that he can't feel loss or longing. The result is often closer to Hank Williams than beat street, as a shell-shocked Everlast rhymes about a woman he used to know, even resorting to pedal-steel guitar on the dreamy "This Kind of Lonely." He rocks harder on the boastful "Soul Music," but the tracks on lost love are devastating. Hard, soft, and soulful, *White Trash Beautiful* isn't the sound of commercial calculation. It's basic instinct. —S.A.

★★★½ The Essential Cadence Singles (Varèse Sarabande, 2003)

Raised in Kentucky by parents who were successful folk and country musicians, Don and Phil Everly occupied a special niche in early rock & roll as a direct link to Appalachian folk music, traditional country, and bluegrass. Their keening harmonies were distinctive and deeply moving and most often put to devastating use in some of the most exquisite tales ever written on the timeless themes of teenage misery and true love. The Everlys set a standard for harmony singing that still resonates with contemporary country artists, but their most profound impact was on '60s rock and folk artists such as the Beatles, the Hollies, and Simon and Garfunkel; Don and Phil heard themselves being channeled by the likes of Peter and Gordon and of Chad and Jeremy.

Their first professional experience apart from the family show came in 1955 when the teenage brothers were hired as songwriters by Roy Acuff's music publishing company in Nashville. One of Don's songs, "Thou Shalt Not Steal," became a hit for Kitty Wells, but the brothers' own recording attempts fell flat. Their fortunes changed in 1957 when Cadence Records president Archie Bleyer brought them "Bye Bye Love," written by Felice and Boudleaux Bryant. Thirty acts had already passed on the song, but Bleyer (who had originally declined to sign the Everlys yet had given them an introduction to executives at Columbia Records) saw the duo as Cadence's entrée into the rock & roll market. With Don and Phil's insistent harmonies soaring high over an acoustic guitar–driven beat, "Bye Bye Love" jetted to #2 on the pop chart and was followed in short order by the first of three #1 singles, "Wake Up Little Susie" (again from the Bryant-Bryant pen). Largely on the strength of the Bryants' well-crafted, literate, and often wry commentaries on the teen psyche, the Everly Brothers charted 11 singles in the Top 30 from 1957 through 1959, with the beautiful "All I Have to Do Is Dream" and the whimsical rocker "Bird Dog" also topping the chart. In allowing room for the playful ("Poor Jenny," "Problems") and the poignant ("Devoted to You," "Take a Message to Mary"), the Bryants' songs painted a broad emotional canvas depicting in verse the most extreme emotions roiling the brothers' core audience.

Don and Phil, though, were developing as songwriters, and before long the hits had their credits below the title. In 1959 Don checked in with " 'Til I Kissed You," a Top 10 single, and Phil followed suit a year later with "When Will I Be Loved." In 1960, the brothers began a productive, near decadelong association with Warner Bros. that was marked by a reflective turn in their material. Don's "So Sad (To Watch Good Love Go Bad)" and the Howard Greenfield–Carole King tearjerker "Crying in the Rain" were indicative of the Everlys' journey into love's darker recesses, and with that journey came deeper, more cutting lyrics in their self-penned songs and their cover choices.

Since all travel ultimately leads back home, Don and Phil responded to the intimate, personal songs of a new generation with their own rustic take on *Rubber Soul:* 1968's *Roots,* a moving look back at the sources of their own music and something of a companion volume to a daring album they had released 10 years earlier called *Songs Our Daddy Taught Us.* The latter's song selection includes an Irish ballad, a cowboy song, a folk song, and traditional country songs; although Elvis dipped into roots music for an album cut here and there, not even he had he nerve to do an album as rootsy as *Songs Our Daddy Taught Us.* A year after *Roots* celebrated family values, the family split apart when Phil stalked offstage in mid-concert, leaving Don to announce the group's breakup to a stunned audience.

Years of personal animosity and unsuccessful solo albums followed, until the brothers buried the hatchet and reunited at London's Royal Albert Hall in 1983. Captured on record *(The Reunion Concert)* and filmed for HBO, the concert was a complete triumph; their mature voices had lost none of their power to stir souls and move hearts, and the songs benefited from the subtext brought by middle-aged men who had been around the block a couple of times and knew the difference between puppy love and the real, deep, and giving thing. The reunion concert was followed by a brief tenure at the Mercury label, which was kicked off in grand fashion with the album *EB84* and the jubilant "On the Wings of a Nightingale," penned and produced by Paul McCartney. In songs such as "The Story of Me," "You Make It Seem So Easy," and the tender "Asleep," the brothers work out their reconciliation in forceful detail, and in the process, deliver one of the strongest studio albums in their career. The followup, *Some Hearts,* also in a self-revelatory vein, includes Don's too-true take on love's fleeting nature, "Any Single Solitary Heart." And that was that.

Through the '90s, the Everlys continued to perform live, reportedly arriving and leaving the venues separately and never speaking to each other before or after the show. Their voices have been conspicuously silent during the rise of the New Traditionalist and alt-country movements, given that many of their recordings in the '50s and '60s foreshadowed both trends.

The Cadence years are best represented by Rhino's *Cadence Classics (Their 20 Greatest Hits)* and two Varèse Sarabande titles, *The Complete Cadence Recordings: 1957–1960* and *The Essential Cadence Singles.* Completists will enjoy *All They Had to Do Was Dream,* a collection of outtakes from the Cadence sessions that includes between-songs patter. As for the Warner Bros. years, the place to start is the 50-track, thoroughly annotated retrospective *Walk Right Back: The Everly Brothers on Warner Bros., 1960–1969,* which contains not only the hits but also a sampling of album tracks that demonstrates the brothers' long musical reach and absolute command of country, blues, and rock & roll, from the old-time (Jimmie Rodgers' "T for Texas") to hard-edged Bakersfield honky-tonk (Merle Haggard's "Sing Me Back Home"). *Walk Right Back* incorporates a number of tracks from the *Roots* album. The must-avoid is Warner Bros.' *The Very Best of the Everly Brothers:* It features rerecordings of the Cadence hits, which are fine, but stick with the originals.

The One Way label offers a couple of interesting artifacts from the Everlys' early-'70s tenure at RCA. One, 1972's *Stories We Could Tell,* includes songs by John Sebastian (the title track), Rod Stewart ("Mandolin Wind"), Jesse Winchester's lovely "Brand New Tennessee Waltz," Kris Kristofferson's "Breakdown," and two of the finest songs to carry the Everly copyright, "Green River" (energized by Ry Cooder's stinging bottleneck and Buddy Emmons' pedal steel) and Don Everly's revealing "I'm Tired of Singing My Songs in Las Vegas." *Pass the Chicken & Listen,* filmed by their first producer, Chet Atkins, was the brothers' final album before they split up. It's a more overt mainstream country effort, and while not entirely successful, it does offer a powerful version of John Prine's cautionary tale about the devastation of strip-mining in Kentucky, "Paradise." Post-breakup, the brothers are represented by Curb's *Best of the Everly Brothers: Rare Solo Classics,* but alas, there are not many classics to be found. Since all of their other solo work is out of print, this disc at least fills what would otherwise be a void in their story, but it's for completists only.

Of the multilabel retrospectives, Rhino's 16-track *All-time Original Hits* is a superb anthology of blockbusters, whereas Varèse Sarabande's *Love Songs* ranks especially high in the swoon category. The big picture is definitively captured in Rhino's four-CD, 103-song box set, *Heartaches & Harmonies,* which has the exhaustive annotation and sessionography fanatics demand (including Don and Phil's own song-by-song commentary), illuminating the singular path the Everlys trod. Quite simply, *Heartaches & Harmonies* is one of the best box sets ever, and it doesn't hurt that the music it contains will always reach out across time to touch hearts and stir souls. —D.M.

Everything but the Girl

★★★½	Everything but the Girl (1984; Sire, 1995)
★★★★	Love Not Money (1985; Sire, 1995)
★★★	Baby, the Stars Shine Bright (1986; Sire, 1995)
★★★	Idlewild (1988; Sire, 1990)
★★	The Language of Life (Atlantic, 1990)
★★★½	Worldwide (Atlantic, 1991)
★★★	Acoustic (Atlantic, 1992)
★★★½	Amplified Heart (Atlantic, 1994)
★★★★	Walking Wounded (Atlantic, 1996)
★★★	Temperamental (Atlantic, 1999)
★★★★	Like the Deserts Miss the Rain (Atlantic, 2003)

Over the course of their two-decades-long career, U.K. duo Everything but the Girl has evolved from stylized, loungey pop to dance-driven futurist pop. By the time of EBTG's self-titled American debut, Tracey Thorn and Ben Watt had already begun moving away from the cafe pop that had aligned their U.K. debut, *Eden* (which came out earlier the same year), with mannered faux-jazz Brits such as the Style Council. *Everything but the Girl* retreads six of *Eden*'s 12 tracks, and those songs—including "Each and Every One," with its bossa-nova beat and muted trumpet, and "Frost and Fire," with its bongos and organ stabs—define the record's blue, lovelorn mood. But the six tracks not drawn from *Eden,* presumably newer material, lean more toward the literate Northern soul/Brit-pop of contemporaries such as the Smiths and Lloyd Cole, all full of guitar jangle and strum, and less concerned with romance than with issues of feminism and racism. Its followup, *Love Not Money,* continues in this direction, with intricate, melodic guitar lines and punchy beats ("Any Town," "Ballad of the Times") taking precedence over the jazz noir ("This Love [Not for Sale]") and Phil Spector beats ("Heaven Help Me").

Baby, the Stars Shine Bright, with its lush string and choir orchestrations, is a wrong turn that nevertheless offers some worthwhile sights. Arrangements for "Come On Home," "Careless," and "Come Hell or High Water," in particular, are so billowy and grand, they revisit a lost era of easy listening that's quaint and evocative in a way that the group's later excursions toward Muzak would not be. *Idlewild* marks the duo's transition into an unfortunate—though probably inevitable—middle period. As if *Baby* never happened, the album alternates *Love Not Money*'s soulful British pop ("Those Early Days," "The Night I Heard Caruso Sing") with the overly slick R&B lite ("Love Is Here

Where I Live," "Tears All Over Town") that would populate subsequent records.

The Language of Life serves as EBTG's career low point, not only because its smooth-jazz veneer strips away the group's more classic jazz and soul touches, but also because it's quite often a downer. Along with other odes to discontentment and failure, "Me and Bobby D" takes Dylan and Kerouac to task for being male-chauvinist weaklings. Is nothing sacred?

Worldwide is almost as slick, but the lite jazz gives way to a far more digestible soul/pop sound, as well as a brighter mood. Tracks like "Understanding," with its backing track closely resembling Marvin Gaye's "Sexual Healing," or "You Lift Me Up," a slow jam with gospel shadings, bring EBTG about as close as they'd get to commercial R&B. With its title less a reference to internationalism than to the actual act of traveling, *Worldwide* stands as Watt and Thorn's testament to being a band on the road.

No doubt, anyone who believed the twosome's pursuit of studio polish needed tempering welcomed *Acoustic,* EBTG's 180-degree turnaround. The mix of well-chosen covers (Elvis Costello's "Alison," Tom Waits' "Downtown Train") with originals ("Me and Bobby D," "Driving") featured stripped-down and imaginatively reconfigured arrangements—quite a novelty in the years before *MTV Unplugged. Acoustic* also served to revive the duo's faith in acoustic instruments. Not that they were prepared to abandon studio gloss entirely—the followup, *Amplified Heart,* in fact, pushes the group further toward dance and commercial pop than it had ever gone to that point, earning a Top 10 hit with the house-influenced "Missing." But by incorporating organic elements, EBTG's music regains a sense of weight and balance.

With the group emboldened by the success of "Missing" and by Thorn's appearance on trip-hop pioneers Massive Attack's "Protection" single, *Walking Wounded* sees EBTG fully embracing modern electronica. Pairing the cool-blue croon of early records with intricately cut beats—the skittering drum and bass of "Before Today," the house throb of "Wrong," the scratching of "Flipside"—the duo found a wonderful new niche for itself at the forefront of pop currents. A late-career highpoint. With somewhat less success, *Temperamental* continues the path of *Walking Wounded,* exploring various beats and textures while pairing them with soul/pop melodies.

After releasing three anthologies available only on import, the group finally put out a domestic best-of set. Anyone looking to the 20-track *Like the Deserts Miss the Rain* for a definitive hits collection, however, will be disappointed. Instead, Watt and Thorn culled together their personal favorites, mixing most of their best-known material with an appealing selection of album tracks, side projects, rarities, and remixes. —R.M.S.

Cesaria Evora

★★★½	Cesaria (Nonesuch, 1995)
★★★★	Cabo Verde (Nonesuch, 1997)
★★★	Miss Perfumado (Nonesuch, 1998)
★★★	Mar Azul (Nonesuch, 1999)
★★★★½	Café Atlantico (Lusafrica/RCA, 2002)
★★★	Sao Vicente (Windham Hill, 2001)
★★★★	The Very Best of Cesaria Evora (RCA, 2002)

There was plenty for rock & rollers to distrust about the overwhelming reception with which the world music audience greeted Cape Verde's premier chanteuse in the mid-'90s. At her most lively, Evora's version of morna disrupts the mournful strum of fado, the notoriously melancholy Portuguese peasant music, with hearty West African rhythms. But at her most genteel, she's a standard Western fantasy of native grace—an exemplar of the long-suffering "folk" given to dignified pining for the rural good old days. Evora's work, though, is marked by a reluctance to settle easily into that stereotype.

If the barefoot diva's self-titled debut was a vocal showcase, the plaints on *Cabo Verde* are stirred up by swifter arrangements and whirling, almost klezmer-like clarinets. On "Coragem Irmon" ("Take Courage, Brother") the guitars seem to surf forward, powered by the clustered soundwaves generated by saxophone colossus James Carter. Evora tempers her resignation with something approaching indignance on "Mar E Morada de Sodade" ("The sea is the home of nostalgia"): "It separates us from distant lands," Evora sings of the sea. The distant lands of Africa, that is, from which the people of Cape Verde did not leave willingly.

On *Mar Azul,* Evora was laying back, and the result was as dignified as it was dull. *Miss Perfumado* one of the discs that made her a star in France, suffers similarly—its one undeniably classic track, "Sodade," is heard to better effect on the compilation *Adventures in Afropea 3: Telling Stories to the Sea,* which compiles the songs of Portuguese-speaking musicians of African descent from various countries. *Café Atlantico* may be Evora's most joyful album, as well as her most wide-ranging stylistically, assaying rhythms from Cuba and Brazil. But while *Sao Vicente* maintains much in that spirit, Evora's move to the New Age label Windham Hill is worrisome. —K.H.

F

Fabolous

★★★½ Ghetto Fabolous (Elektra, 2001)
★★½ Street Dreams (Elektra, 2003)

Breezy, monumentally conceited, and blessed with an agile flow and mind for wordplay, Fabolous came closer than anyone to duplicating Jay-Z's singular personality at a time when the latter ruled hip-hop radio. But Fab never struck a workable balance between populism and egotism, a task perfected by his model, who uses one to reinforce the other. Only the off-message Eminem and, later, 50 Cent could truly share center stage with Jay—confident though he may have been, Fabolous could never escape Jay-Z's shadow.

Still, *Ghetto Fabolous* went platinum, and rightfully so: Almost every song combines the sparkling beats of a top producer—Timbaland, the Neptunes, Rockwilder, Just Blaze—with whale-hunting hooks and Fab's lube-smooth rhymes. If the phrase "holla back" ever ends up in the dictionary, we will probably have the album's pager-sampling first single, "Young'n," to thank. Ditto the locution of "Keepin' It Gangsta," which, rather than intimating violence, suggests that maintaining the gangsta lifestyle merely involves drinking expensive champagne and dancing the night away.

Even boring people can be fun at parties. Fabolous, like any other pompous jerk, loses himself in the moment. Plus, changing Biggie's famous line from "I see some ladies tonight that should be havin' my baby" to "I see some ladies tonight that should be drinkin' my babies"—swallowing, that is—makes a fine joke, if not a pickup line. Unfortunately, on *Street Dreams,* Fab's big head gets squeezed into a narrow R&B format that he's simply not sexy enough to inhabit. Too tastefully produced not to score airtime, the first single and typical track "Can't Let You Go" slinks sleepily and finds Fab asserting that "the barrel of [his] gun's big enough to spit out a rocket—oh!" That's a lame attempt at keepin' it gangsta. —N.C.

John Fahey preferred album titles like *Death Chants, Breakdowns and Military Waltzes,* and *Blind Joe Death,* suggesting either a dark private humor or plain morbid fixation, but this Maryland guitarist's forte is music of an exhilarating, almost rapturous beauty. Uplifting or soothing, tinged with melancholy, his sets of country blues, Scotch-Irish folk, or classically derived melodies showcase often dazzling acoustic-guitar work. Generally unaccompanied and without overdubs, he crafts complex tapestries of sound; his virtuosity is less a matter of speed or jazzy convolution than tone, and Fahey's guitar resounds like no other. Big, bell-like, immediate, helped out by very clear production, his tone comes through like a signature. Confusingly, he rerecorded a number of LPs because he thought his technique had improved, and one of his finest releases, *Of Rivers and Religion,* features a whole band with horn charts. A very consistent artist—the assured delivery of "Old Southern Medley" off *The Transfiguration of Blind Joe Death,* from 1973, isn't dissimilar to his rousing take on Eric Clapton's "Layla" (from *Let Go*)—Fahey kept to a very high standard through much of his 40-year career. Gorgeous mood music that can provoke trance and reverie, his albums might appeal to New Age listeners—but his music is denser and smarter than that genre. He survived for years as a perennial Christmas-music favorite. Fahey's stubborn, outsider nature and his '60s experimental works led to his rediscovery as an indie hero; his final albums, however, are feeble echoes of the more clever curios on *Voice of the Turtle* and *The Great San Bernardino Birthday Party.* Newcomers will do well with *Return of the Repressed* or the best-of anthologies; *Vol. 2,* selected by guitarist Henry Kaiser, is particularly well programmed. Fahey's stoic combination of deep sadness and unshakeable resolve to transcend will keep his work forever in fashion. —M.MI.

A remarkable debut, *Fairport Convention* (1968) introduced a British folk-rock band whose instrumental prowess and eclectic repertoire qualified them as a nascent supergroup. Dizzying personnel shifts and haphazard commercial success, however, would dog the band throughout its long career, ultimately making Fairport more a style and a vision than a cohesive aggregation. Whatever the lineup, Fairport's players managed a union of Scotch-Irish folk, rock & roll rhythm, and cunning, elliptical lyrics. *Unhalfbricking* (now out of print) featured a legendary cast: angel-voiced Sandy Denny and guitarist Richard Thompson were a pair of singers as potent as the Jefferson Airplane's Grace Slick and Marty Balin; Dave Swarbrick's violin grounded the band in the Celtic tradition; and drummer Dave Mattacks kept things swinging. Whether soaring through the 11 minutes of "A Sailor's Life" or rendering Dylan's "If You Gotta Go, Go Now," the musicians came off as daunting, witty virtuosos. *Liege and Lief* completed Fairport's first chapter, establishing the group at the forefront of late-'60s experimental British bands. *Meet on the Ledge,* the band's best compendium, is especially good at covering the first, great albums.

By the early '70s, both Thompson and Denny had departed; what was left of Fairport forayed even further into traditional music, which seemed limiting. Subsequent recordings were mainly Swarbrick's shows, and the band suffered from the lack of an outstanding vocalist. *Live Convention* (out of print) briefly brought back Sandy Denny, and the album was one of the band's last true highlights. Denny died in 1978, which was about the time the band's original vision had begun to fade.

Fairport kept on going, however. All the '80s-and-after albums, mainly featuring Martin Allcock on vocals, are worth a listen, but they only echo the long-past glory of the group's first three records. *Expletive Delighted!* (1987) is a fair example of the group's later work; it's an interesting fusion of jazzy licks and Celtic reels. *The Copredy Box* is a fine, three-disc live set that captures the excitement of the massive European folk festival that Fairport has hosted for years. *XXXV* commemorates the 35th anniversary of Fairport Convention, by then a ghost, however charming, of its former self. —P.E.

Marianne Faithfull

★★	Marianne Faithfull's Greatest Hits (1969; Abkco, 1988)
★★½	Faithless (1977; Immediate, 1989)
★★★★	Broken English (Island, 1979)
★★★	Dangerous Acquaintances (Island, 1981)
★★★	A Child's Adventure (Island, 1983)
★★★	Strange Weather (Island, 1987)
★★★	Blazing Away (Island, 1990)
★★★★	Faithfull: A Collection of Her Best Recordings (Island, 1994)
★★★	20th Century Blues (RCA Victor, 1997)
★★★	The Seven Deadly Sins (RCA Victor, 1998)
★★★★	A Perfect Stranger: The Island Anthology (Island, 1998)
★★★	Vagabond Ways (Instinct, 2000)

As Mick Jagger's late-'60s squeeze, Marianne Faithfull played the archetypal Brit-rock-star girlfriend: pale, blond, regal, hip. And this daughter of an Austrian noble could sing—notably, at 18, Jagger-Richard's lovely "As Tears Go By." A few other hits followed, but by 1966, she was finished as a soft-voiced popster. *Greatest Hits* chronicles this period; *Faithless* is a reissue of her '70s pop—her voice is strong, the material is not.

By the dawn of the '80s, experience—in the stark form of heartbreak, drug busts, press notoriety, and suicide attempts—had made Marianne Faithfull an artist. As a demimonde chanteuse, Faithfull is indisputably the real thing: wised-up, courageous, bullshit-free. *Broken English,* with a song about cocksucking and a dramatic reading of Lennon's "Working Class Hero," was her startling adult entrance, unleashing a Gauloises-rich voice and a fierce intelligence. *Dangerous Acquaintances* insinuated its power more softly; its Steve Winwood collaboration, "For Beauty's Sake," took a wary look at obsession. *A Child's Adventure* found her in stronger but still uningratiating voice; while a fine record, especially for the wounded strength of "Falling From Grace," it just missed the cracked accomplishment of her mature debut. With *Strange Weather,* Faithfull darkly covered work by Dylan, Lead Belly, and Jerome Kern. And in *Blazing Away,* she commemorates her life lessons; a sharp live album, it serves as a loose best-of. Of the two official best-ofs, *Faithfull* is the tighter and stronger.

Faithfull kept things interesting in the '90s. *A Secret Life* teamed her with composer Angelo Badalamenti, best known for his film scores for David Lynch's eccentric flicks. The collaboration is a kind of moodiness fest, dark on dark, blue on blue. The live *20th Century Blues* is Marianne doing Kurt Weill to a stark piano and acoustic-bass accompaniment—haunting stuff, as are the album's other songs, by Harry Nilsson and Noël Coward. The Vienna Radio Symphony backs her up on another live rendering of Weill gems, *The Seven Deadly Sins;* again, the effect is unsettling, smart, hypnotic. With *Vagabond Ways,* Faithfull returns to original material, cowriting with Daniel Lanois, among others; the voice has retained its haggard beauty. —P.E.

★★★★	50,000 Fall Fans Can't Be Wrong (Beggars Banquet, 2004)

Mark E. Smith is a ranter, but rarely a crowd-pleaser; he's also a *Twilight Zone* fanatic, a William Blake obsessive, and something of a thug, not to mention, just maybe, Britpunk's poet laureate and philosopher king. He's also the sole constant member of the Fall, one of the most indestructible musical ideas to emerge from British punk.

Using half-sung, half-snarled, sometimes hysterically funny, endlessly quotable lyrics that tear apart class, art, politics, lit, other bands, themselves, and more, Smith spot-welded his harangues to a rough-and-tumble groove that choogled like rockabilly, droned like Euro art rock, and squalled like the gnarliest punk. (It also shone like dance rock and beeped like techno, but that was later.) As long as Smith is alive, the Fall will never vary all that much from this singular, highly rhythmic racket, but they sure as hell don't sound like anyone else, and generations of indie rockers have stolen from Smith as if his name were Chuck Berry.

Add all of this genius to an obscenely huge discography and you have the makings of a serious-ass cult act. Devout Fall fans argue about their favorite albums like rabbis hashing out the Talmud. Most regular humans don't need more than a few of these albums, but everyone needs at least one; any of the '80s singles collections are excellent places to start.

Live at the Witch Trials features fetal but nifty workouts of an aesthetic that was discovered quickly and subsequently refined endlessly. As "Crap Rap" puts it, "We're the crap that talks back." Look for this as a theme throughout Smith's career, people. An excellent debut, but not too far from punkodoxy.

Dragnet is the first record with brilliant guitarist Craig Scanlon, who put up with Smith longer than anyone else. The Fall has never sounded stranger than on this dank, appallingly recorded, and fascinating album. (Not to mention self-aware: "I don't sing/I just shout.") *Totale's Turns* is the first of roughly 1 billion live albums, all of which have moments of high rant and rough, tuneless lows.

Grotesque is the first truly great Fall album, the sound of pieces coming together: the trebly guitar, the weird groove (the amazing "New Face in Hell," which clearly changed Pavement's life), and That Voice spitting, yelling, and jabbering his bent, sinister vision, sneering at the middle-class liberals on "English Scheme" and shouting out his hometown ("The N.W.R.A."). Fantastic.

Early Years 1977–1979, Early Singles, and *It's the*

New Thing!: The Step Forward Years all cover much the same territory, and many of these songs show up as bonus tracks on early '00s pressings of albums from the same era. The "definitive rants" on the *Slates* EP, the endlessly powerful *Hex Enduction Hour,* and the slightly less great *Room to Live* finish out the Fall's first era on a spectacular high. On *Slates'* six spotless tunelets, Smith's dissections get sharper still (the self-defining "Prole Art Threat," "An Older Lover") as the music's palette opens up (outta-nowhere acoustic guitar on "Fit and Working Again"). *Slates* can be found on CD with the solid live album *A Part of America Therein.*

Hex . . . adds a second drummer and higher-fidelity production, turning the smart bombs into a fucking freight train. "The Classical," "Fortress/Deer Park," and the anticritic "Hip Priest" all shine, and Smith has never sounded so . . . large, like an indestructible Saxon magus, totally in control of his singular vision. The weaker followup, *Room to Live,* sports fabulously irritated lyrics aimed squarely at bourgeois Britain ("Hard Life in Country" and the title track) undercut by thinner, less compelling music and an uninterested-sounding Smith. *Fall in a Hole* is the excellent live album from this period. (*Hip Priest* compiles tracks from this same period, as does the totally excellent *Totally Wired* and the rare three-CD box *Psykick Dance Hall.*)

Perverted by Language ushers in a new epoch for the Fall; it's the first album to feature the guitar and songwriting of Smith's now-ex-wife Brix, a Yank with a keen melodic sense and, by all accounts, the patience of a saint. It's yet another keeper, complete with a great "football" tune ("Kicker Conspiracy"), weird pounders ("Smile," "Eat Yrself Fitter"), and the oddly moving "Garden."

The Wonderful and Frightening World of the Fall moves the group into the worlds of dance rock, pop riffs, and mass British fame. The singles from this period ("Oh! Brother," "C.R.E.E.P.") are both fabulously slick and endlessly cool. *This Nation's Saving Grace* wanders even further into the mainstream ("What You Need," the shimmering "L.A."), with by now typically excellent results, and also contains the seriously odd "I Am Damo Suzuki," a shout-out to the Can singer of the same name. *Palace of Swords Reversed* compiles (mostly) great singles from 1980 to 1983.

Then the shine began to fade. *Bend Sinister* is the cranky flip side of *This Nation's Saving Grace*'s smooth power. *The Frenz Experiment* is more of the duller same, complete with a hit cover of the Kinks' "Victoria." *I Am Kurious Oranj* is the smart soundtrack to a ballet (check out his cover of Blake's "Jerusalem"). The spotless singles collection *458489 A Sides* is a hit-after-hit cheater tape to the Brix era, which ended when she split in 1989. Producers Craig Leon, Adrian Sherwood, and Coldcut give *Extricate* a glossy sound. Guitarist Martin Bramah, not heard since *Live at the Witch Trials,* rejoins as Smith takes shots at Brix on the fabulously nasty "Sing! Harpy," covers the garage primitives the Monks' "I Hate You" as "Black Monk Theme Part One," and generally wallows in his own dank, not-quite-as-tuneful bitterness. *Shift-Work* and *Code: Selfish* enlist keyboards to ill-fitting effect (though the *Listening In* singles collection makes the best of the weak music).

In 1993, the Fall found themselves on Matador Records, sharing a label with Pavement, who may very well still owe them royalties for egregious gimmick infringement. *The Infotainment Scam* does some light genre-surfing (disco on "Lost in Music," T. Rex on "glam racket," 1983-era Fall on "The League of Bald Headed Men") while retaining That Fall Thing.

Having largely invented the stuff, the Fall do American indie rock quite well on *Middle Class Revolt.* "Behind the Counter" smokes, "15 Ways" is classic Fall pop, and the rest hangs together tunefully and oddly professionally. They were off Matador by *Cerebral Caustic,* which is too bad, as it's a furious return to noisy, reckless rant form. Brix is back, and it seems to have inspired and infuriated both her and Smith. "Don't Call Me Darling" is pure rage, "Bonkers in Phoenix" is epic. (The year 1996 also marked the debut of the dreaded compilations of demos, outtakes, and live material on Receiver Records. Don't bother with any of them unless you are a helpless addict and have purchased almost everything else on this list.)

Cerebral was also the last album with Craig Scanlon, and the post-Craig years have had their ups and downs. *The Light User Syndrome* still has Brix aboard, which adds some zip to the tunes, but something truly fundamental feels missing. *Levitate* mixes drum and bass into the Fall thing for a solid outing, then a few more key musicians left. Could this be the end?

Please: 1999's *The Marshall Suite* and 2000's excellent *The Unutterable* roar the band back to life, the former a three-part suite, the latter an absolute bulldozer of electronic thunder able to stand with any of the group's '90s work. The Fall are back, baby.

Or maybe not. The dull *Are You Are Missing Winner?* of 2001 and the is-it-brilliant-or-awful? mishmash *2G+2* from 2002 did not bode well for the future. (The Fall does keep endlessly recycling the past, however. All of the 2002 comps are good, and the BBC sessions collection just crackles.) But as long as Smith has breath in his ranting little Mancunian body, the Fall will be there, churning out albums as well as bile. The 2003 Fall album *The Real New Fall LP* finally saw the light of day in the States in 2004, and it's another good one, full of loud chugging rock overseen by Smith in all of his mumbling, nasty glory. The double-disc retrospective *50,000 Fall Fans* reaches all the way back to the band's first single, "Repetition," and goes up to "Green Eyed Loco-Man," a gnarly rocker from *The Real New.* Track selections range from good to great ("Victoria" is an amazing cover, though it doesn't belong here); this primer on 25 years of prime bile is the ideal place to start for anyone who wants an overview of the Fall's career. —J.G.

Fastball

★★½	Make Your Momma Proud (Hollywood, 1996)
★★★	All the Pain Money Can Buy (Hollywood, 1998)
★★★	The Harsh Light of Day (Hollywood, 2000)
★★★	Keep Your Wig On (Rykodisc, 2004)

This Austin, TX, trio—complete with two equally talented songwriters in guitarist Miles Zuniga and bassist Tony Scalzo—entered into the pop consciousness in 1998 on the strength of "The Way," one of the great pop-rock radio moments of the era. Scalzo gives the anonymous couple who walk off into "eternal summer slacking" a quietly heroic dignity and grace, turning an everyday romance into epic adventure, "where they won't make it home/But they really don't care." A moving tale flawlessly and efficiently told.

After gaining some notoriety around central Texas, Fastball found the center line down the middle of the cross street where zippy punk-pop trips over nerdy pop-rock, where the guys from Orange County skate to the first Weezer album. Songs on the 1996 debut, such as "Human Torch" and "Are You Ready for the Fallout?" are effortlessly catchy, well crafted, and fairly forgettable.

All the Pain Money Can Buy contained "The Way" and the ballad "Out of My Heads." The rest are slightly rootsier versions of the power-pop on the debut. On *The Harsh Light of Day,* Scalzo's voice is sounding more Elvis Costello–ish by the note, and his songs, like "Love Is Expensive and Free," come complete with horn and string arrangements they can finally afford. Scalzo and Zuniga trade off solid melodies like old pros, but there's still no sign of those folks from "The Way." You get the distinct impression those wandering lovers took the money and ran "without ever knowing the way." *Keep Your Wig On* is a solid, adult reunion album. Scalzo and Zuniga found themselves writing together for the first time ("The Way" and "Out of My Head" were Scalzo's tunes). The results combined the straight-ahead popcraft of the 1998 glory days with the off-the-cuff rock feel of their earliest albums, the sound of bandmates finally figuring out that they need one another and accepting adulthood. Unlike the folks in the "The Way," looks like Fastball will get old and gray. —J.G.

The Fat Boys

★★★★	The Fat Boys (Sutra, 1984)
★★★½	The Fat Boys Are Back (Sutra, 1985)
★★	Big & Beautiful (Sutra, 1986)
★★★½	Crushin' (Sutra, 1987)
★★★	Coming Back Hard Again (Tin Pan Apple, 1988)
★★★★	All Meat No Filler: The Best of the Fat Boys (Rhino, 1997)

An era-defining mid-'80s hip-hop group, the Fat Boys have been consigned somewhat to history's crumb bin as corny comedy rappers. This assessment is deserved, at least based on their highest-profile moments: 1987's Three Stooges–style hospital high jinks movie *Disorderlies,* and the cheesy hits "Wipeout," a 1987 team-up with the Beach Boys (sadly without a fat Brian Wilson), and "The Twist (Yo' Twist)," a 1988 pairing with the appropriately rotund Chubby Checker. But there are nuggets of greatness studding the Fat Boys' recording career—their first two albums are hard-hitting humorous classics, expertly produced by the great Kurtis Blow—and they set the proverbial buffet table for Biz Markie and Heavy D and the Boyz' subsequent hip-hop feasts. Brooklyn buddies Damon "Prince Markie Dee" Morales, Damon "Kool Rock-Ski" Wimbley, and Darren "the Human Beat Box" Robinson (a.k.a. Buffy, a.k.a. the Ox That Rocks) won a Radio City Music Hall talent show in 1983 and promptly changed their name to the Fat Boys. Wearing matching satin jackets, Kazal glasses with sequin frames, and brightly colored T-shirts sporting iron-on letters spelling FAT BOYS, the group had an approachable, lovable look. Their self-titled debut featured rugged vocals and spare, slamming beats that put them in a league with Run-D.M.C., with Robinson's instantly recognizable hyperventilating beat-box style driving "Human Beat Box." Sophomore album *The Fat Boys Are Back* ("and you know they can never be wack!") was even better. On the title track, Prince Markie Dee set things off: "I'm starving, I'm in the mood/plain and simple I need food/eat some beans and pretty soon/everybody in the place will leave the room!" "Don't Be Stupid" warned of the dangers of vices such as gambling, and "Hard Core Reggae" married an *irie* bass line with shout-outs to fat reggae stars such as Jacob Miller. They would go on to have the aforementioned Top 40 hits, only to splinter in the early '90s when Prince Markie Dee went solo. Sadly, the Human Beat Box died in December 1995 of a heart attack. —P.R.

Fat Joe

★★½	Represent (Relativity, 1993)
★★★	Jealous Ones Envy (Relativity, 1995)
★★½	Don Cartagena (Atlantic, 1998)
★★★	Jealous Ones Still Envy (Atlantic, 2001)
★★	Loyalty (Atlantic, 2002)

Bronx's Fat Joe, a.k.a. Joey Crack, spent the earlier part of his career outshined by the more senior members of his Diggin' in the Crates crew. With members such as Showbiz & A.G., Lord Finesse, and Diamond D., the crew promoted an occasionally tired, true school version of hip-hop: beats, rhymes, and life dug from the gutter and the classic soul/R&B record bins. Fat Joe's early albums certainly follow this model. This is fair-to-middling '90s New York hip-hop, with a few exceptions: *Represent* put Fat Joe on the map with its minor hit, "Flow Joe," while *Jealous Ones Envy* contains the minor classic street anthem "Shit Is Real."

It wasn't until 2002's *Jealous Ones Still Envy* that Joe was able to escape the shadow of DITC or, even more significantly, that of his late partner in rhyme, Big Pun. Powered by two of that year's biggest singles, "We Thuggin' " (featuring R. Kelly) and the infectious "What's Luv?" (on which he takes a backseat to the Murder Inc. duo of Ashanti and Ja Rule), *J.O.S.E.* made Joe a household name outside the Bronx. The album's decided step up in production values allowed Fat Joe to swing smoothly between the club-oriented singles and more raw cuts like "Fight Club." Unfortunately, perhaps tempted to capitalize on his new success, Fat Joe rushed out *J.O.S.E.*'s followup, *Loyalty.* The single "Crush Tonight" tried to recapture the R&B crossover success of "What's Luv?," but it, and the album, didn't fare as well commercially. —C.R.

The Feelies

★★★★	Crazy Rhythms (1980; A&M, 1990)
★★★★	The Good Earth (Twin Tone, 1986)
★★★★	Only Life (Coyote, 1988)
★★★★	Time for a Witness (A&M, 1991)

Among the formal breakthroughs accomplished by the Velvet Underground was something called the drone strum. As perfected by Lou Reed, this strum didn't syncopate to emphasize the backbeat the way rock rhythm guitar usually did—in fact, it barely syncopated at all, tending more toward chopped, evenly accented eighth notes dropped squarely on the beat. And it was this nervous *chink-chink-chink-chink-chink-chink-chink-chink* that gave the anxious edge to the likes of "I'm Waiting for the Man" and "White Light/White Heat."

That same strum is at the heart of the Feelies' sound on *Crazy Rhythms.* Yet as much as it defines the band's groove, it doesn't limit the band's rhythmic vocabulary; indeed, songs like the briskly tuneful "Fa-Cé-La" or the slow-building "The Boy With Perpetual Nervousness" augment the basic pulse with a second line of overdubbed percussion. Moreover, this strictly disciplined approach to rhythm makes even the slightest variation, such as the lengthy breakdown on the title tune, stand out in bold relief.

Six years later, the Feelies—this time sporting a new bassist and drummer as well as a full-time percussionist—returned for round two, *The Good Earth.* This time around the band's groove is more conventional (note the standard folk-rock strum of the acoustic guitars on "On the Roof") but still heavily indebted to Reed and the Velvets. If anything, the group has added a few Velvetisms to its repertoire—in particular, the "Heroin"-style acceleration and explosion of "Slipping (Into Something)." *Only Life* can't quite match that growth (though it does include a cover of Reed's "What Goes On"), though it doesn't backslide, either. But *Time for a Witness* pushes beyond mere imitation as the band refines its sound into something that's at once evocative of the band's influences and yet stylistically distinct, especially on the plangent, bluesy "What She Said" or the dark, moody "Find a Way." —J.D.C.

Bryan Ferry

★★★★★	These Foolish Things (1973; Virgin, 2000)
★★	Another Time, Another Place (1973; Virgin, 2000)
★★★	Let's Stick Together (1976; Virgin, 2000)
★★★	In Your Mind (1977; Virgin, 2000)
★★★½	The Bride Stripped Bare (1978; Virgin, 2000)
★★★½	Boys and Girls (1985; Virgin, 2000)
★★	Bête Noire (1987; Virgin, 2000)
★★★	Taxi (Reprise, 1993)
★★	Mamouna (Virgin, 1994)
★★★½	As Time Goes By (Virgin, 1999)

Bryan Ferry began his solo career while Roxy Music was still in full flower, and at times he has come close to the glam-rock thrill of Roxy on his own. His first solo album was a conceptual and musical tour de force. *These Foolish Things* is a blasphemous collection of oldies covers, mixing up respectable rock classics such as Dylan's "A Hard Rain's a-Gonna Fall" and the Stones' "Sympathy for the Devil" with the evanescent kicks of Lesley Gore's "It's My Party" and the Paris Sisters' "I Love How You Love Me." Sometimes, it's intensely soulful, as in "River of Salt," and always it's hilarious, especially when Ferry leeringly delivers the solemn poetics of "Hard Rain" with a disco-style beat and a cheesy background chorus.

These Foolish Things was such a shocker that Ferry's basically been trying to top it ever since. *Another Time, Another Place* had a moment or two ("The In Crowd," "Wonderful World"); *Let's Stick Together* has some nice stripped-down Roxy Music remakes, including a smoky "Casanova"; *In Your Mind* is a low-key batch of originals. *The Bride Stripped Bare* was a real puzzle, slicking over some potentially great songs with a hack L.A. studio band (Waddy Wachtel on a Bryan Ferry record?). There's the glorious seven-minute "When She Walks in the Room" and a great version of the Irish folk song "Carrickfergus," but Ferry's "Take Me to the River" has about one eighth of the Big Muddy juice of Al Green's original, and it had the misfortune to come out the same year as Talking Heads' version.

Boys and Girls, his first solo album after Roxy Music broke up, was his disco-friendly bid for solo stardom, and while it's too fluffy, it does have one of his greatest songs ever, the hypnotic slow-dance "Slave to Love." *Bête Noire* and *Mamouna* are tuneless sequels, the latter a reunion with Roxy comrades Brian Eno and Phil Manzanera, neither one particularly listenable. His best recent work has returned to the oldies-cover gambit. *Taxi* is a consistently inspired set that ranges from "Amazing Grace" to "All Tomorrow's Parties." Even better, *As Time Goes By* is a straight-up standards album, torching up old-fashioned songs like "Falling in Love Again," "Where or When," and "September Song" with simpatico backup musicians who swing more than they rock. As Bryan Ferry always understands, the fundamental things apply, as time goes by. —R.S.

50 Cent

★★★½ Guess Who's Back? (Full Cup, 2002)
★★★★ Get Rich or Die Tryin' (Shady/Aftermath, 2003)

Dropping gory yet imperturbably cool rhymes, commanding attention with a media presence that matched Eminem's, and turning the bulletproof vest into a hot fashion accessory, 50 Cent established himself as the most lovable hip-hop villain in years with the release of *Get Rich or Die Tryin'* in early 2003. After securing a $1 million deal with Eminem's Shady/Aftermath label and scoring a hit with "Wanksta," a cut on the soundtrack to his new boss's film debut, *8 Mile,* even casual pop fans were aware of the most arresting part of 50's biography—namely that this former hustler, crack dealer, and inmate had taken more bullets than most platinum-selling rappers have hits.

Born Curtis Jackson in Queens, NY, 50 had already built a solid rep by the time he was shot in 2000. He recorded a full album for Columbia Records (the unreleased but heavily bootlegged *Power of the Dollar*) that presaged the mix of spacious, synth-heavy funk and menacing rhymes 50 and his producers would nearly perfect on *Get Rich or Die Tryin'.* After recovering from his brush with death, 50 (armed with a heavily slurred flow, courtesy of a bullet hole in his cheek) released a cavalcade of underground mix-tapes, most of which featured recycled beats and dis-heavy freestyle rhymes. The mixes made a strong case that 50 was the underground's best MC, and they eventually made their way to Eminem, who touted 50 as "the illest motherfucker in the world." As a bidding war broke out, 50 released *Guess Who's Back?,* the only commercially available collection of his pre–*Get Rich* work. *Guess Who's Back?* finds a middle ground between the off-the-cuff rhymes of 50's underground mixes and the more polished assault of his proper studio recordings. Half the material comes from *Power of the Dollar,* including ghetto-life bangers such as "Life's on the Line" and "As the World Turns." "That's What's Up" features 50 and his fellow G Unit soldiers (who would release a platinum record of their own later in 2003) trading quick-tongued verses over the beat to Wu-Tang's "Y'all Been Warned"; "Too Hot" and "Who U Rep With" showcase above-average cameos from Nas. As a smart distillation of the kind of anything-goes mixes sold on Canal Street in downtown NYC, *Guess Who's Back?* is plenty solid.

By the time 50 recorded *Get Rich,* his main producers Em and Dr. Dre knew they had a potential monster on their hands, and the album succeeded in exploiting both gangsta rap's brawniness and its unflappable cool, not to mention its clichés. Dre, Eminem, and a handful of lesser-known producers were at the top of their game on *Get Rich,* concocting alternately club-ready and spaced-out tracks from dark synth grooves, buzzy keyboards, and a persistently funky bounce. "Wanksta," one of Jam Master Jay's last productions, and the Dre-produced "In Da Club" tore up the pop charts, and it's easy to see why: Each sports a spare yet irresistible synth hook augmented by a tongue-twisting refrain; both sound anthemic even though they don't shout their messages. Elsewhere, the hooks are equally slick and powerful—the half-sung, half-shouted chants of "Life's on the Line," the slick steel drum on "P.I.M.P." Wandering stoned through this engaging sonic landscape, pulling off rounds like he's just cooking breakfast, drawling and balling, 50 complements the production with a steady, laid-back flow whose basic tenor is summed up in "Like My Style": "I'm a New Yorker, but I sound Southern." When Eminem pops up with two excellent cameos, on "Patiently Waiting" and "Don't Push Me," you kind of wish 50 could be as brassy and definitive. But his real strength lies in making thugism sound effortless, and much of the time he glides along so easily, you wonder if he's just freestyling. —C.H.

Filter

★★	Short Bus (Reprise, 1996)
★★	Title of Record (Reprise, 1999)
★★	The Amalgamut (Reprise, 2002)

Former Nine Inch Nails collaborator Richard Patrick joined forces with programmer Brian Liesegang in Filter and made an immediate impact with "Hey Man, Nice Shot," the breakout single from the debut album, *Short Bus.* Widely—and, according to Filter, incorrectly—interpreted as a darkly sardonic tribute to Kurt Cobain, the song was as significant for its sonics as for its disturbing imagery. It finds a middle ground between grunge's world-weary sense of melody and industrial rock's icy steel-pulse rhythms. But *Short Bus* otherwise fails to take its Nails-Nirvana hybrid beyond formula.

With Liesegang departed, Patrick jettisons the mutter-then-scream approach on *Title of Record,* choosing instead to expose the vulnerability behind the jackboot-and-trench-coat pose. Folk guitar underpins a postindustrial ballad, "Take a Picture," and Eastern percussion puts an intoxicating spin on "Miss Blue." Patrick can croon, but his sensitivity, such as it is, is oppressively downcast, and too many of the songs rehash the Jekyll-and-Hyde dynamics that became alternative rock's creative downfall. *The Amalgamut,* with Filter reconfigured as a four-piece rock band, is Patrick's uninspired bid to keep up with the Ozzfest new-metal audience. —G.K.

Fischerspooner

★★★½	#1 (Capitol, 2003)

The flamboyant performance troupe Fischerspooner personified the polysexual fashion-oriented electroclash dance fad that grew out of the Williamsburg, Brooklyn, club scene. Formed by Art Institute of Chicago grads Casey Spooner and Warren Fischer, Fischerspooner put on elaborate choreographed stage shows that stripped pop music's sexy varnish to a noxious fume—they get busted lip-synching and have diva-style breakdowns onstage. After fierce bidding wars for all things electro, the U.K.-based Ministry of Sound signed them for a reported $2 million, an unheard-of sum for a techno band. The buzz grew loudest in May 2002, when Fischerspooner staged six shows (at a reported cost of $300,000) at New York's Deitch Projects, a fashionable SoHo art gallery packed with celebrities and journalists. Not bad for a couple of art pranksters who supposedly had their first gig at a Starbucks and shopped for their sound at an East Village record store. After significant delays, Capitol finally released *#1* in February 2003, and the new-wave anthem "Emerge" became its first single. Yet, despite Fischerspooner seemingly drowning in its own hype, *#1*'s updated electro manages to stay fresh—a trans-Euro dance express out of New York City's gritty punk-rock renaissance. —C.S.

Fishbone

★★★	Fishbone (Sony, 1985)
★★★	In Your Face (Columbia, 1986)
★★★★	Truth and Soul (Epic, 1988)
★★★½	The Reality of My Surroundings (Sony, 1991)
★★	Give a Monkey a Brain and He'll Swear He's the Center of the Universe (Columbia, 1993)
★★★	Chim Chim's Badass Revenge (Rowdy, 1996)
★★★	The Psychotic Friends Nuttwerx (Hollywood, 2000)
★★★	Live at the Temple Bar and More (Nuttsactor 5, 2002)
★★★★	The Essential Fishbone (Columbia/Legacy, 2003)

Fishbone was formed from a disparate, all-black oddball crew at a South Central Los Angeles junior high in 1979. Playing an orgasmic urban gumbo of punk, funk, and ska, the six-man band became a favorite of the L.A. postpunk scene; eventually, the group would become a notoriously powerful live act, opening for the Beastie Boys on their *Licensed to Ill* tour and coheadlining club tours with the Red Hot Chili Peppers. Fishbone's albums have some great moments, but they neither capture the excitement of the band's shows nor hold much commercial appeal; the band still plays to sold-out crowds, but it remains one of the shouldabeens of '80s alternative rock.

Although Fishbone's 1985 self-titled debut forecasted good things with its essential, butt-wiggling "Party at Ground Zero," it suffered from reed-thin production. The band aimed higher with *In Your Face,* struggling to combine P-Funk, the Specials, and Black Flag, but didn't quite have the songs to pull it off. It all finally clicked on *Truth and Soul,* which was released in 1988; still in their early twenties but already tour veterans, the members of Fishbone were writing combustible anthems. Catchy tracks like "Bonin' in the Boneyard" sound like the musical wheels might fall off if the band dared to stop and breathe. Many songs contained social and political commentary: "Ma and Pa" decries the destructive behavior of divorcing parents, as leader Angelo Moore sings, "There's lots of moneys/for all the attorneys," who are the only winners in divorce. The band's Bone in the USA tour consolidated its strengths as a live act; simply put, there was no better conscious party to be found than a Fishbone show.

Followup *The Reality of My Surroundings* is even sharper productionwise, but its tunes aren't as memorable; the hard-charging *Give a Monkey a Brain and He'll Swear He's the Center of the Universe* is their most rocking disc. Sadly, before that record was released, guitarist Kendall Jones left the band after he apparently suffered a nervous breakdown. On the eve of Lollapalooza '93, the band was decimated, and it never truly recovered. Despite the additional departures of original/long-standing members drummer Philip "Fish" Fisher and keyboardist/trombonist Chris Dowd, Fishbone remains a potent live band; in its prime, it was a wholly unique beast. —P.R.

The "5" Royales

★★★★ Dedicated to You (1957; King, 1994)
★★★½ The "5" Royales Sing for You (1959; King, 1994)
★★½ The "5" Royales (1960; King, 1994)
★★★★½ Monkey Hips and Rice: The "5" Royales Anthology (Rhino, 1994)
★★★½ The Apollo Sessions (Collectables, 1995)
★★★ Take Me With You Baby (Cleopatra, 2000)

One of the crucial prerock R&B groups of the '50s, the "5" Royales (actually a sextet, thus the quotation marks) were formed in 1947, in Winston-Salem, NC, around lead vocalist Johnny Tanner, guitarist/songwriter Lowman Pauling, and, later, second lead Eugene Tanner (Johnny's brother). The Royales, originally known as the Royal Sons Quintet, a gospel group, began recording for the Apollo label in the early '50s; these sides (including several Royal Sons tracks) can be heard on Collectables' *The Apollo Sessions.* Pauling was already writing great, bluesy material like "Baby Don't Do It" and the risqué "Laundromat Blues" ("My baby's got the best machine, the best washing machine in town"). After switching to Cincinnati-based King Records in 1954, the group—one of the hardest-touring acts of the era—had fewer hits but made even better music. They also began releasing albums, the first and best of which was 1957's *Dedicated to You,* which led off with "Think," the group's final Top 10 hit (#9 R&B), and is considered one of the finest '50s R&B albums. (*The "5" Royales Sing for You* and *The "5" Royales* followed, with diminishing returns.)

The group broke up in 1962 and was largely forgotten afterward, though their material wasn't. "Think" was revamped twice by James Brown, in 1960 and 1973, while both the Shirelles and the Mamas and the Papas had enormous hits with "Dedicated to the One I Love" in 1961 and 1967, respectively. In 1994, Rhino brought forth *Monkey Hips and Rice,* a brilliantly chosen two-CD anthology covering everything from the Royal Sons' early sides to a 1962 rerecording of the early single "Help Me Somebody." Unfortunately, the Rhino compilation is currently out of print, but it's worth the search. *Take Me With You Baby,* another collection, rounds up later material that isn't included on *Monkey Hips and Rice.* —M.M.

The Five Satins

★★★ The Five Satins Sing Their Greatest Hit (1982; Collectables, 1993)

In 1956, Fred Parris wrote a song for his doo-wop group, the Five Satins, titled "In the Still of the Nite" (sometimes listed as "[I'll Remember] In the Still of the Night"). Setting up in the basement of a New Haven church with a two-track tape machine, the Satins (only four sang on the record) made the most out of the crude conditions—the track's sludgy, dense sound threatened to engulf the singers, but the primitive nature of the recording actually added an exotic allure. (Reports that a truck can be heard in the background as it tools past the church are false, but the story makes for good myth.) Singing in a clear, heartfelt tenor, Parris proclaimed his love over a turgid rhythm as his fellow Satins voiced eerie, brooding "shoo-do-shoo-be-do" background chants that heightened both the romantic fiction of love in the shadows and a certain undercurrent of dread over what the morning would bring. Released initially on New Haven's local Standord label, "In the Still of the Nite" became the classic rock & roll story of a B side that gained more attention than the planned A side (in this case, "The Jones Girl"), and it inspired the New York–based Herald/Ember label to purchase the master and reissue it in the late spring of 1956. Today, "In the Still of the Nite" is a doo-wop classic, a song that has permanent rotation on the playlists of oldies stations and still earns Parris and his current group of Satins immediate standing ovations at oldies shows.

A year after "In the Still of the Nite," the Satins hit the Top 30 again with a far less ambiguous love song, "To the Aisle," which featured Bill Baker on lead vocal in place of Parris, who was in the army. Parris finished his tour of duty and returned to the group, but the hits ceased. *The Five Satins Sing Their Greatest Hits* proves, however, that the fellows were a formidable contingent, whether Baker or Parris was singing lead, even if their singles failed to muster much commercial enthusiasm. Of special note are "Shadows," with Baker delivering a masterful performance bursting with powerful feeling and conviction, and a sensitive interpretation of Bing Crosby's 1944 chart-topper "I'll Be Seeing You." —D.M.

Flaming Lips

★★	The Flaming Lips (Restless, 1985)
★★	Hear It Is (1986; Restless, 1994)
★★★	Oh My Gawd!!! . . . The Flaming Lips (Restless, 1987)
★★★	Telepathic Surgery (1989; Restless, 1993)
★★★½	In a Priest Driven Ambulance (With Silver Sunshine Stares) (Restless, 1990)
★★★½	Hit to Death in the Future Head (Warner Bros., 1991)
★★★★½	Transmissions From the Satellite Heart (Warner Bros., 1993)
★★★★	Clouds Taste Metallic (Warner Bros., 1995)
★★★	Zaireeka (Warner Bros., 1997)
★★★	A Collection of Songs Representing an Enthusiasm for Recording . . . By Amateurs: 1984–1990 (Restless, 1998)
★★★★★	The Soft Bulletin (Warner Bros., 1999)
★★★	Finally the Punk Rockers Are Taking Acid 1983–1988 (Restless, 2002)
★★★	The Day They Shot a Hole in the Jesus Egg—The Priest Driven Ambulance Album, Demos, and Outtakes (Restless, 2002)
★★★★	Yoshimi Battles the Pink Robots (Warner Bros., 2002)

Rock has produced few stranger or more daring bands in the last 20 years than Oklahoma City's Flaming Lips, who embrace everything from merry prankster psychedelia to orchestral pop. At the outset, the Lips tried to bridge the seemingly insurmountable gap between Butthole Surfers–style dementia and bubblegum pop, with mixed results. Their early albums are jumbles of ideas, the weirdness genuine, the songs expansive and sometimes giddily incoherent. They're as much a response to hardcore punk's inflexible pithiness as to mainstream rock's polish.

With *In a Priest Driven Ambulance,* a coherent vision starts to peek through the chaos. It comes courtesy of an irony-free cover of the standard "(What a) Wonderful World," sung with wobbly conviction by Wayne Coyne. For all its disorienting ugliness and alienating strangeness, the world really is a wonderful place, the Lips insist—an unfashionable stance that the band would continue to explore with increasingly plangent results.

The addition of guitar-effects maestro Ronald Jones and monster drummer Stephen Drozd gave Coyne the musical muscle to carry out his ambitions, and on *Transmissions from the Satellite Heart,* the Lips fashioned their first masterpiece: the Buttholes-bubblegum fusion fully realized in sing-along noise anthems such as "Turn It On" and "Be My Head," and the strangely poignant "Pilot Can at the Queer of God." Despite the fluke hit "She Don't Use Jelly," the album transcends novelty. Its multilayered production rewards headphone scrutiny and inspires headbanging, thanks to Drozd's John Bonham–like beats.

Clouds Taste Metallic is a similarly obtuse but fascinating attempt at making a pop album, while *Zaireeka* represents the Lips at their most indulgent. It's impractical—a box set of four CDs designed to be played simultaneously—and inspiring in its loony ambition. At its best, *Zaireeka* allows listeners to feel as through they're not just hearing the music but standing inside it.

The Soft Bulletin marks a turning point. Instead of clouding Coyne's vulnerability in weirdness, the ornate orchestrations heighten it. The album uses offbeat subject matter—the dizziness caused by a head wound, a poisonous spider bite, two scientists competing to find the cure to a disease—as a doorway to universal subjects such as failure, perseverance, and mortality. Coyne's lyrics display a newfound directness that is disarming, while the retooled lineup bypasses rock in favor of sumptuously arranged, ultramelodic grandeur.

On the surface, *Yoshimi Battles the Pink Robots* is a return to the artfully conceived strangeness of the band's earlier work. Its cover image is a cartoon that depicts a tiny heroine facing off against a forbidding giant: a Power Puff girl versus Black Sabbath's "Iron Man," a not inaccurate simplification of the band's sound. There's a greater emphasis on computerized drumbeats and loops, with sometimes clumsy results. But there's no denying the emotional punch of the songs. Once again, Coyne strips away his emotional armor on "Do You Realize?," an anthem to transcending tragedy that suggests a cross between acoustic John Lennon and a Disney movie soundtrack. —G.K.

The Flamingos

★★★	Flamingo Serenade (1959; Collectables, 1991)
★★★	Flamingo Favorites (1960; Collectables, 1992)

★★★	Requestfully Yours (1960; Collectables, 1991)
★★★	The Sound of the Flamingos (1962; Collectables, 1991)
★★★★	Best of the Flamingos (Rhino, 1990)
★★★½	For Collectors Only (Collectables, 1992)
★★★	The Fabulous Flamingos (Collectables, 1992)
★★★★	The Moonglows and the Flamingos: Their First Recordings (UGGH Records, 2000)

The sweet science of doo-wop group harmony numbers in its pantheon few greater practitioners than the Chicago-based Flamingos, who formed in 1952 and had a viable career (at least as performers) into the early '70s. Formed by two sets of cousins—Zeke and Jake Carey (born in Bluefield and Pulaski, VA, respectively) and Paul Wilson and Johnny Carter (both Chicago natives)—who considered themselves black Jews, the group changed lineups and labels a few times during the '50s. The Flamingos' most notable work was with the formidable lead singer Sollie McElroy for the Chance label: The wondrous "Golden Teardrops" never charted, but it has since been kept alive on oldies stations as an early, great example of doo-wop. A sampling of their work from this period, as well as their work for Chess/Checker, can be heard on Rhino's *Doo Wop Box.*

In 1959, now fronted by lead singer Nate Nelson, the group signed with End Records. This was to be the Flamingos' most productive and most successful period. A sumptuous version of the ultraromantic ballad "I Only Have Eyes for You" rose to #11 on the pop chart in 1959, and was followed in mid-1960 by the Sam Cooke–penned "Nobody Loves Me Like You," which peaked at #30. That would be the group's last charting single, even though it recorded voluminously at End before returning briefly to Checker in 1964, releasing four albums between 1960 and 1962, all of which have been reissued by Collectables. The albums document the group's broadening musical palette, which changed along with the times. Minimalist arrangements give way to lush orchestrations with strings, woodwinds, and horns; the love ballads are balanced by exotic fare on the order of "Besame Mucho" and "Mio Amore," Broadway show tunes, and golden-age pop.

Although the group continued to record into the late '60s, the End years were in fact the end of the Flamingos as a productive, creative entity. As an alternative to the individual albums on Collectables, the double-CD *For Collectors Only* is a 42-track summation of this period, featuring "I Only Have Eyes for You" and a stunning, unspeakably beautiful reading of "I'll Be Home" previously unissued on any other album. There's a lot of buried treasure on the End albums, though, and to ignore them is to underestimate a great group that always kept the faith vocally, whether singing alone, with only a few instruments playing discreetly in the background, or with a full orchestra in unrestrained flight. The group's impeccable harmonies and haunting falsetto flourishes, along with Nate Nelson's genius for lyric interpretation, created doo-wop that had the ability to move the human heart in profound ways. —D.M.

★★½	Absolutely the Best (1999; Fuel, 2000)
★★	Backtracks (Ranch Life, 2000)
★★★	Slow Death (Norton, 2002)

Some of the greatest riffs of the '60s garage-rock revolution were written in the '70s by San Francisco's Flamin' Groovies—a disconnection that severely curtailed their popularity in their own time but only augmented their legend as the garage scene swelled into an obsessively historicized revival in the '80s and '90s. Their rediscovery led to literally dozens of reissues and bootlegs of live concerts, demos, and other unreleased recordings, of which only a fraction remain widely available. The Groovies' influence is tough to trace since the band's sound is deliberately derivative, but their stripped-down worship of the fundamentals of rock during a decade of excess certainly turned some ears at the dawn of punk, particularly after they moved to England and hooked up with pub rocker extraordinaire Dave Edmunds.

The Groovies formed in 1965 but did not record a disc until 1968's mini-album *Sneakers,* collected with some contemporaneous live tracks on *Supersneakers.* All the basic Groovies elements were loosely in place: the chugging Chuck Berry riffs, the Beatles melodies, the dreamy Byrds chords, the Jaggeresque snarl. But it wasn't until their first proper album, *Supersnazz,* that the young group perfected its distinctive boogie—a heavy mid-tempo swagger leavened by clean, melodic guitar lines and a friendly beat—or its exact relationship to the oldies. *Supersnazz* does that, honoring "The Girl Can't Help It" and "Rockin' Pneumonia and the Boogie Woogie Flu" by not robbing the originals of their beautiful sleaze.

Flamingo and *Teenage Head* tighten the groove but do not budge an inch when it comes to the band's antinostalgic vision—they saw themselves as keeping a tradition *alive*, not dancing with a corpse. There's nothing the band recorded during this period that isn't lean, mean, and pulsing with the passion of all the great rockers they sought to emulate; *Teenage Head* itself is a fierce garage-rock masterpiece that in spots ("Yesterday's Numbers," "High Flyin' Baby") handily competes with the best of the Stones of the same period. The Groovies' raw power is especially clear on some of the posthumous collections of demos and rehearsal tracks lovingly collected by Norton and other labels. *California Born and Bred* has some blazing run-throughs of the Who, Little Richard, and Chuck Berry covers, clearly unintended for public consumption, yet in all their raggedness, they now seem vital to the Groovies' story. *In Person!!!!* has a killer Fillmore West show from 1971, *Slow Death* demos, and TV appearances.

By 1972 the band was having much greater success in Europe than the States, so leader Cyril Jordan moved the group to England. (The other songwriting force, Roy Loney, was edged out and replaced by Chris Wilson.) *Shake Some Action* and *Now*, produced by Dave Edmunds, have a lighter sound, closer to the Byrds and *Revolver*-era Beatles than to *Beggars Banquet*. They even cover a couple early Beatles songs, "Misery" and "There's a Place." These albums are slightly more consistent than the earlier records and add smart new textures of guitar and vocal harmonies, but they lack the lust and rhythmic heft of the San Francisco years. (Both, along with the slightly lesser *Jumpin' in the Night*, sadly are out of print, though once again it speaks to the oddity of their legend that it's easier to get many bootlegs than their original albums.)

The band's legend grew during the '80s, and by 1992 a disc of new material emerged under the Groovies' name. But on close inspection, *Rock Juice* credits only two musicians, Jordan and original bassist George Alexander, a slight relief given the weak material.

Despite a vast posthumous discography of demos, B sides, etc., the Groovies have only a handful of true anthologies. The best is *Groovies' Greatest Grooves*, a 24-track retrospective that gets almost everything, including the best of the band's many non-LP singles ("Slow Death," "Tallahassee Lassie"), though it's heavy on the Edmunds years and omits some essentials from the *Teenage Head* era. —B.S.

The Flatlanders

★★★★½	More a Legend Than a Band (1972; Rounder, 1992)
★★★½	Now Again (New West, 2002)
★★★	Wheels of Fortune (New West, 2004)
★★★	Live at the Kite: June 8, 1972 (New West, 2004)

More a Legend Than a Band, recorded in Nashville in 1971, was a masterpiece of the "high and lonesome" Texas country style created by an outlaw C&W supergroup—Joe Ely, Jimmie Dale Gilmore, and Butch Hancock—a musical family of great depth and resolute individuality. The album's acoustic approach (guitars, Dobro, mandolin, fiddle, and string bass) and the loping rhythms of this short-lived septet, which was based in Lubbock, TX, mix lead singer Gilmore's expressive voice and Steve Wesson's quavering musical saw for a plaintive sound that is beautifully evocative of prairie vistas. The songs, chiefly written by Gilmore and Hancock, revolve around the escape from and return to the unrelenting uniformity of the West Texas landscape and small-town life. Gilmore's writing has a spiritual quality (evidenced in "Tonight I'm Gonna Go Downtown," an enthralling glimpse of existential rootlessness) wholly reinforced by his eye for telling, unpretentious images ("Have you ever seen Dallas from a DC-9 at night?/Well, Dallas is a jewel, oh yeah, Dallas is a beautiful sight").

In the years after *More a Legend Than a Band* was recorded, Ely, Gilmore, and Hancock developed into independent-minded artists and arresting performers: Ely as a dyed-in-the-wool roots rocker and versatile singer; Gilmore as a honky-tonk troubadour in the best Lone Star tradition; and Hancock as a Dylanesque folkie and movingly poetic songwriter. They reconvened exactly 30 years after cutting their masterpiece to record the solid, workmanlike *Now Again;* although it holds together just fine, it doesn't resonate. Fans, however, were delighted to have more Flatlanders music at long last, even if tempered by its, well, ordinariness. *Wheels of Fortune*, the individually written second effort by the reunited principals, was just a little bit more ordinary. Sometimes what becomes a legend most is to remain a legend. —D.WY./B.SC.

There are essentially three Fleetwood Macs: the first, a British blues-rock band in the vein of the Yardbirds; the second, a dreamy, laid-back California-style pop outfit; and the third—well, that's the '70s hit-making, dysfunctional, made-for-TV, hippie family unit we've all come to know and love from reruns of *Behind the Music.*

Fleetwood Mac's earliest studio albums are difficult to find, but they comprise such an essential part of the band's catalogue that you can't just pretend they never existed. Inspired by fellow British blues revivalist John Mayall, Fleetwood Mac began life as a straight-ahead blues band, named after its rhythm section: drummer Mick Fleetwood and bassist John McVie. The group's calling card, however, was the twin-guitar attack of Peter Green and Jeremy Spencer, who wielded a sure, sensitive hand with their oft-abused source material. *Fleetwood Mac* and *English Rose* revolve around Green's economical lead lines and Spencer's Elmore James–style slide work; Carlos Santana plucked the guitar solo nearly intact for his own enduring version of Mac's "Black Magic Woman," from *English Rose. Fleetwood Mac in Chicago* (which wasn't released domestically until the mid-'70s) finds the group recording in the Windy City with its American blues heroes, including Willie Dixon and Buddy Guy.

Then Play On is Fleetwood Mac's transition from blues purists to a band that blends elements of psychedelia and British folk rock into a cool, blues-based stew. Adding a third guitarist, Danny Kirwan, and emphasizing Mick Fleetwood's adventurous rhythmic sense alongside Green's virtuosity, the group conjures a sparse, propulsive sound that's more reminiscent of the American West than Chicago or the Mississippi Delta. On the epic "Oh Well," an itchy electric-acoustic shuffle turns into a stately semiclassical fade with echoes of Ennio Morricone's spaghetti-western soundtrack music. More compact cuts like "Coming Your Way" and "Before the Beginning" pack the tangled guitar lines into clear melodic structures, while "Rattlesnake Shake" proves those guitar strings can still sputter and burn when required. The gentle harmonies of Kirwan's "Although the Sun Is Shining" showcase British progressive folk rock at its most spare and beautiful, as well as hints of Fleetwood Mac's future, more pop-oriented sound.

After *Then Play On,* Green split for a religious cult and a brief solo career (*End of the Game*) followed by early retirement. With Kirwan and Spencer in control, *Kiln House* is a low-key charmer, radically different from what folks expected from the blues-based Mac. Balancing spare folk and country songs with earnest nods to early rock & roll, the album is at once eclectic and cohesive. The gently rocking tributes to Buddy Holly (all three of 'em!) point out the difference between loose and sloppy, while the orgasmic guitar workouts (all three of 'em!) build to lazy, quivering peaks. Spencer left shortly after the album came out, and Fleetwood Mac was down to one guitarist. The addition of Christine McVie (née Perfect) on keyboards and vocals turned out to be an important choice. Spencer's replacement, Bob Welch, was another matter; he never quite gelled with the rest of the group, despite his years of trying.

Flashes of Fleetwood Mac's latter-day pop can be found throughout the band's next set of transitional albums: the smooth talk of Kirwan's title track to *Bare Trees;* Christine's disarming "Show Me a Smile" (*Future Games*); her breezily melodic "Remember Me" (*Penguin*) and "Just Crazy Love" (*Mystery to Me*); and her stately ballad "Come a Little Bit Closer" (*Heroes Are Hard to Find*). Taken individually, however, these fair-to-middling albums are too scattershot to hold much interest. When Kirwan left the group after *Bare Trees* came out, Fleetwood Mac floundered for several years—split between the heavy-handed pseudomysticism of Welch and the gentle, mainstream pop-rock balladry of Christine McVie. The group nearly splintered for good at one point; when Welch left in 1975, the McVies and Fleetwood were back at square one.

Stevie Nicks and Lindsey Buckingham were a young, Southern California folk-rock duo with one unremarkable album (*Buckingham Nicks*) under their belts when they joined Fleetwood Mac. Nicks' sultry voice and Buckingham's songwriting knack focused the group's fledgling pop ambitions. On Fleetwood Mac's self-titled album of 1975, Nicks and Buckingham not only fit in, but they stimulated the core trio, turning the group into a hit-making machine at the point when Fleetwood Mac was about to become a has-been. Christine McVie responded to the Buckingham-Nicks material with a brace of catchy songs, while John McVie and Mick Fleetwood lent their blues-rock punch to the smoothed-out mix. The result is easy-listening pop with a kick, and it was just what mainstream music fans were looking for in the mid-'70s. By the following year *Fleetwood Mac* was at #1, easily outdistancing all the band's previous efforts.

The album kicks off with Buckingham's infectious "Monday Morning" and then builds to new levels of pop-music pleasure with each subsequent track. "Rhiannon" establishes Nicks' seductive, sirenlike presence, while "Say You Love Me" unfurls Christine McVie's wry melodic edge. Unlike many blockbusters, the surrounding songs nearly equal the hits. In addition to the bouncy opener, Buckingham struts his tuneful stuff on the heavy centerpiece "World Turning" and soulful closer "I'm So Afraid." What's more, the slow tracks never impinge on the album's overall pace.

Rumours is even better. Using the same formula that propelled *Fleetwood Mac,* the band upped the quality of the songs. Not only did the album go to #1, it stayed there for 31 weeks! Fleetwood Mac's cast of voices cuts even deeper when you consider that the two couples in the group were breaking up as the album went down. Buckingham's "Go Your Own Way" and Nicks' "Dreams" spell out two clear takes on a romantic dilemma. *Rumours* can be heard as a conversation among a loose circle of estranged lovers, culminating with "The Chain" (written by the entire group).

After striking such a perfect balance between self-expression and commercial appeal, Fleetwood Mac succumbed to studio artiness. The double-disc *Tusk* reveals Buckingham's secret fixation: to become Brian Wilson with a touch of Brian Eno thrown in. "Sara" maintains the band's pop profile, but the bulk of *Tusk* sounds cold and fussy next to the emotional heat of *Rumours.* On *Mirage,* Fleetwood Mac returns to simple pleasures, but the band seems to have lost its spirit. Reconvening five years later on *Tango in the Night,* the group carries on as if it were still 1982—or 1977. The hits "Big Love" and (especially) Christine McVie's "Little Lies" surge with all the relaxed soft-rock grace of yore but none of the quiet fire, hinting at a premature nostalgia. Buckingham quit the band prior to the 1987 tour; in retrospect, that last straw seems to have broken this venerable band's back.

Buckingham's L.A. cowboy replacements (Rick Vito and Billy Burnette) add little to the washed-out *Behind the Mask.* When Nicks left shortly after that album's release, Fleetwood Mac entered yet another phase, though short-lived. In spite of the capable vocals of new female singer Bekka Bramlett (Delaney & Bonnie's daughter) and guitar work of Traffic alum Dave Mason, *Time* proved to be a full-on bore. Fleetwood Mac's '70s-era lineup reunited for *The Dance,* but it seemed more of a business decision than an aesthetic one. In an *MTV Unplugged* setting, the band unavoidably devotes most of the album to repeats of its peak-era hits ("Dreams," "Rhiannon," "Go Your Own Way"), but they bring absolutely nothing fresh to the proceedings. The best cuts are new ones by Buckingham ("Bleed to Love Her" and "My Little Demon"), but they get buried in the nostalgia fest. For a band that practically became a brand-name franchise in the late '70s, Fleetwood Mac set a standard of quality that's proven tough to maintain—or equal.

Not surprisingly, for an outfit as schizophrenic as Fleetwood Mac, none of its collections adequately captures the band. *The Pious Bird* is an excellent overview of the group's early Peter Green period, and the 1988 *Greatest Hits* package is a decent collection of the Buckingham-Nicks era. *25 Years: The Chain* is frustrating; if ever there was a band for which a chronological overview is appropriate, it's Fleetwood Mac, whose evolution from blues to pop came slowly but dramatically. For whatever reasons, the compilers chose to mix and mingle the eras on this four-disc set, and it suffers as a result. —M.C./M.K.

A Flock of Seagulls

★★★ A Flock of Seagulls (Jive, 1982)
★★★ The Best of a Flock of Seagulls (Jive, 1987)
★★★ Platinum & Gold Collection (Jive/BMG Heritage, 2003)
★ I Ran: The Best of (Cleopatra, 2004)

In its prime, Liverpool's A Flock of Seagulls was essentially a two-gimmick band, the first being its blend of minor-key melodies and low-tech electronics, the second being singer Mike Score's hair, an astonishingly ambitious bit of pompadour that spilled over his forehead like a breaking wave. Score's look, along with the arty urgency of the Bill Nelson–produced "Telecommunication," lent *A Flock of Seagulls* a certain cutting-edge sheen at the time, but the old-fashioned hooks of "I Ran" earned the group an audience. Four subsequent albums have gone out of print; no great loss, since the Gulls ran out of compelling ideas pretty fast. The cream of their later catalogue, including the minor hits "Wishing (If I Had a Photograph of You)" and "The More You Live, the More You Love," can be found on *The Best of a Flock of Seagulls.* Swap a handful of that album's lesser-known tunes for a few even more lesser-known ones and you've got *Platinum & Gold Collection. I Ran,* misleadingly called a best-of, is actually a bunch of tacky rerecordings perpetrated by Score at the dawn of the 21st century. Steer well clear. —J.D.C./M.R.

The Flying Burrito Brothers

★★★★★	The Gilded Palace of Sin (1969; Edsel, 1994)
★★★½	Burrito Deluxe (1970; Edsel, 1994)
★★★	The Flying Burrito Brothers (1971; A&M/Mobile Fidelity Sound Lab, 1991)
★★★	Last of the Red Hot Burritos (1972; Rebound, 1995)
★★★½	Close Up the Honky-Tonks (A&M, 1974)
★★★★	Farther Along: The Best of the Flying Burrito Brothers (A&M, 1988)
★★★★★	Hot Burritos! The Flying Burrito Brothers Anthology: 1969–1972 (A&M, 2000)
★★★	The Millennium Collection: The Best of the Flying Burrito Brothers (A&M, 2001)
★★★★	Sin City: The Very Best of the Flying Burrito Brothers (Universal, 2002)

After a very brief stint with the Byrds that resulted in the country-flavored *Sweetheart of the Rodeo,* Gram Parsons took his vision of "cosmic American music" and joined forces with fellow ex-Byrd Chris Hillman and Texas bassist Chris Ethridge to form the pioneering country-rock band the Flying Burrito Brothers. Their first and most satisfying effort, *The Gilded Palace of Sin*—unfortunately out of print in the U.S.—strives for a deep understanding of the honky-tonk tradition, digging beneath the good-timin' Saturday-night veneer of hard-core country to get at the music's emotional depths. The sound is a true fusion: volatile, shaky at times, but always stimulating. The band enlisted pedal-steel guitarist "Sneaky" Pete Kleinow, who blended the instrument's syrupy cry with fuzzy rock guitar riffs. The songs mix traditional country themes with contemporary specifics. At times, it's pleasantly effective; at other times, it's enticingly weird. The psychedelic riff at the end of "Hippie Boy" creeps along like a longhair walking past a church parking lot on Sunday morning, while "My Uncle" is a twangy draft dodger's road anthem. Parsons' breaking tenor voice isn't a powerful instrument, but his matter-of-fact tone and affectless delivery speak of the personal commitment that's so central to country singing. Covering the Southern soul classics "Dark End of the Street" and "Do Right Woman" in high honky-tonk fashion, Parsons and the Burritos unearth some deeply buried roots. The emotional high points, however, lie within the originals "Hot Burrito #1" and "Hot Burrito #2."

Burrito Deluxe—also out of print—jacks up the rock quotient and includes the addition of future Eagle Bernie Leadon. The results are far less intriguing, though the cover of the Stones' "Wild Horses" may well be definitive, and the songs "Cody, Cody" and "God's Own Singer" rank among the Burritos' finest. The best tracks from *Deluxe* are included on the *Farther Along* set; so is most of the debut, though "Hippie Boy" and "My Uncle" are inexplicably absent. The anthology *Close Up the Honky-Tonks* does include those songs, along with other cuts from the first two albums as well as outtakes.

After Parsons split from the Burritos in 1970, guitarist Rick Roberts joined up with Hillman. *The Flying Burrito Brothers* hints at the encroaching blandness that would later dog both Roberts and Hillman. However, *Last of the Red Hot Burritos* is a fiery farewell from this edition of the group. Bolstered by bluegrass fiddler Byron Berline on several cuts, the Hillman-led Burritos charge through a live set of mostly Parsons-era material with a verve that's missing from their other work.

Before the release of the live album, the Burritos split up briefly but then reunited after Parsons' death, in 1973. The band has since toured and recorded with a revolving-door lineup that often includes no original members whatever. The Burritos haven't put out anything memorable since their early-'70s heyday, although several worthwhile Parsons-era collections have appeared. Most notable among them is the comprehensive double-disc *Hot Burritos! The Flying Burrito Brothers Anthology: 1969–1972,* which compiles the first two albums in their entirety plus lots of extra stuff. The rest, while good, merely recycle songs on the better compilations. —M.C./M.K.

John Fogerty

★★½	Blue Ridge Rangers (1973; Fantasy, 1991)
★★★½	John Fogerty (Asylum, 1975)
★★★	Centerfield (Warner Bros., 1985)
★★½	Eye of the Zombie (Warner Bros., 1986)
★★★½	Blue Moon Swamp (Warner Bros., 1997)
★★★½	Premonition (Warner Bros., 1998)

John Fogerty's solo albums decisively prove that Creedence Clearwater Revival was a phenomenal band. While his own raw guitar and rawer vocals clearly dominated America's best straight rock outfit of the early '70s, the ramshackle grace of CCR's rhythm section provided crucial, spontaneous verve. Urgency, in fact, was Creedence's hallmark. The band responded to its fitful times with songs crammed with messages and metaphors of tumult and apocalypse: Vietnam, America's own civil war, and the crashing end of the utopian '60s provoked remarkable songwriting from Fogerty and great, ragged playing from the group.

While crafty and sometimes entertaining, Fogerty's early solo records lack the spontaneity inherent in inspired collaboration, and his once edgy lyrics are blunted. No longer confronted with high-profile upheaval, he doesn't have much to say about America's more insidious, ongoing crisis; here, he trades mainly in nostalgia or writes good-time stuff. A well-meaning attempt to pay tribute to Hank Williams, Jimmie Rodgers, Merle Haggard, and trad country music, *Blue Ridge Rangers* is actually Fogerty alone in the studio, playing everything. Such hermeticism, of course, is the antithesis of the familial spirit of classic country, and while Fogerty's musicianship is impressive, it's a cold virtuosity. Even more unfortunate are his vocals. With Creedence, Fogerty expertly mimicked blues belters (Screamin' Jay Hawkins), but steered wisely clear of its subtler interpreters (Muddy Waters, Robert Johnson). On *Blue Ridge,* he's deaf to the complex grace of country singing, hitting all the notes but missing the nuance.

On *John Fogerty*'s "Rockin' All Over the World" and "Almost Saturday Night," he returns, thankfully, to rock & roll. A solid set, though a little too heavy on (pro forma) oldies, the album is Creedence-lite. Hailed at the time as a return to form, *Centerfield* (1985) hasn't held up. "The Old Man Down the Road" is functional swamp rock, "Rock and Roll Girls" is charming but slight, and attempts at his former, seemingly effortless significance fall flat: Neither the title track's baseball-player/journeyman-rocker metaphor nor the baby-boom elegy "I Saw It on TV" lead anywhere. The music, at times, tries to extend beyond Fogerty's trad-rock limits, bespeaking commendable ambition, but the syn-drum break on "Vanz Kant Danz" is the kind of thing a Spandau Ballet roadie could have handled with more panache. The lovely "Sail Away," from *Eye of the Zombie,* features Fogerty's best singing in years; the rest of the record, however—all studio gloss and labored funking—simply marks the high point of his professionalism. And for this soulful artist, *professionalism* should be a dirty word.

In 1997, after a decade's hiatus, he astonishingly returned to strength. *Blue Moon Swamp,* edgily produced and driven by the powerhouse single "Southern Streamline," was vintage Fogerty: primal rock & roll sung in a voice deepened by experience. Somewhat in the fashion of the grizzled Neil Young, Fogerty was hailed as an elder statesman of jagged guitar power and roots-rock credibility and saw his album rewarded with a Grammy for Best Rock Album. The following year, he released the strong live *Premonition,* a tour de force featuring new work and CCR classics. —P.E.

Folk Implosion

★★★½	Take a Look Inside the Folk Implosion (Communion, 1994)
★★★	Kids: Original Motion Picture Soundtrack (PolyGram, 1995)
★★★	Dare to Be Surprised (Communion, 1997)
★★★½	One Part Lullaby (Interscope, 1999)
★★	The New Folk Implosion (Imusic, 2003)

The Folk Implosion started as a Sebadoh side project, teaming Lou Barlow with indie glam-folkie balladeer John Davis. *Take a Look Inside the Folk Implosion* was a lightweight goof, rocking through 14 catchy songs in 22 minutes, with ramshackle highlights such as "Slap Me" and "Shake a Little Heaven." The story took a strange turn when the Folk Implosion did most of the soundtrack for the cheesy 1995 movie *Kids* and found itself with an accidental Top 40 hit after Modern Rock radio started playing "Natural One." It wasn't the best song on the soundtrack—that honor goes to Slint's "Good Morning, Captain"—but it was adventurous studio pop, meandering around a moody bass line and a Left Banke sample. The success of "Natural One" seemed to break new ground for the band, but the Folk Implosion had no interest in following it up, and *Dare to Be Surprised* was back-to-basics indie rock. *One Part Lullaby* was a surprisingly songful return, especially since it appeared just a few months after a lousy Sebadoh album. But the Folk Implosion had picked the worst imaginable time to go major label, and hardly anyone was listening. Davis' solo work on the Shrimper label is swoonier and moonier than the Folk Implosion: Check out 1994's *Pure Night* first, and then investigate 1995's *Leave Home* and 1997's *Blue Mountains.* In 2003 Barlow delivered *The New Folk Implosion,* recorded without Davis; the result was a bush-league, slightly crisper version of Sebadoh. —R.S.

Foo Fighters

★★★★	Foo Fighters (Roswell/Capitol, 1995)
★★★★	The Colour and the Shape (Roswell/Capitol, 1997)
★★½	There Is Nothing Left to Lose (RCA, 1999)
★★★½	One by One (Roswell/RCA, 2002)

Who'd have thought it? Turns out Nirvana had *two* great songwriters. A year after Kurt Cobain's suicide, Dave Grohl rebounded with Foo Fighters' self-titled debut, on which he wrote and played practically everything himself. Unsurprisingly, he favors the explosive riff-rockers that let him show off his specialty, the apotheosis of punk-rock drumming. The surprises are a couple of tender pop tunes (including the hit "Big

Me") and the confident melodies behind the torrential momentum of songs like "This Is a Call" and "I'll Stick Around."

By the time they recorded *The Colour and the Shape,* Foo Fighters had become a real band, including fellow Nirvana alumnus Pat Smear on second guitar and Sunny Day Real Estate's Nate Mendel; thanks to drummer turbulence, Grohl ended up playing most of the drums himself again. Nobody complained: On tracks like the loud-louder-loudest love song "Everlong," his drumming provides plenty of hooks on its own. *Colour* is the classic-rock album Grohl had waiting to come out of him, with as much Queen as Pixies in its bloodline. The band piledrives everything with maximum force—"Hey, Johnny Park!" is essentially a mid-'70s ballad with a barrel of rocket fuel under its ass.

There Is Nothing Left to Lose, featuring the full band, is a bit of a disappointment. Its lead-off single, "Learn to Fly," became a hit, but the production and songwriting seem somehow tamed. The album has way too much filler and suggests that Grohl & Co. were trying so hard to sound like everything else on Modern Rock radio that they sanded off all the splintery edges that made them exciting in the first place.

One by One is much more like it, a partial return to the attitude and force of *The Colour and the Shape,* with longtime live drummer Taylor Hawkins coming into his own. There are a handful of references to Grohl's get-in-the-van origins (allusions to Hüsker Dü on "Times Like These," cover artwork by Black Flag affiliate Raymond Pettibon), but the album's most exciting moments are variations on Grohl's favorite formulas: "Tired of You," where he braces for a Nirvana-style explosion that never arrives, and the radio hit "Low," whose instruments skip across the mix like stones on a white-water river. —D.W.

Foreigner

★★★½	Foreigner (Atlantic, 1977)
★★★½	Double Vision (Atlantic, 1978)
★★★	Head Games (Atlantic, 1979)
★★★½	4 (Atlantic, 1981)
★★★★	Records (Atlantic, 1982)
★★★½	Agent Provocateur (Atlantic, 1984)
★★★	Inside Information (Atlantic, 1987)
★★½	Unusual Heat (Atlantic, 1991)
★★★½	The Very Best . . . and Beyond (Atlantic, 1992)
★★	Classic Hits Live (Atlantic, 1993)
★★½	Mr. Moonlight (Rhythm Safari, 1995)
★★★	Jukebox Heroes: The Foreigner Anthology (Rhino/Atlantic Remasters, 2000)

Even though Boston, Heart, and Styx, among others, deserve credit for inventing '70s arena rock, no band parlayed the stadium sound with such dependable know-how as Foreigner. The key to the band's success has been main man Mick Jones. A battle-scarred, hit-savvy veteran who played with the artful organ-rock outfit Spooky Tooth before founding platinum-selling Foreigner, Jones is not only a master of the hook but also a guitarist of unerring efficiency. In Foreigner's early days, former King Crimson multi-instrumentalist Ian McDonald added a touch of class, but Jones' passion for a streamlined sound meant that the band was soon reduced to a smarter, trimmer rhythm-section core.

And, of course, there's ace vocalist Lou Gramm. Not quite a stylist on the order of Bad Company's Paul Rodgers, Gramm is still one of the finest singers in all of pop metal. Gramm's gift lay in roughening up Jones' shimmering grooves; Gramm brought an R&B, almost bluesy style to bear on the band's rockers, and in time, he became the Pavarotti of the power ballad.

Foreigner's catalogue of car-stereo hits is nearly unrivaled: "Feels Like the First Time," "Cold as Ice" *(Foreigner);* "Hotblooded" *(Double Vision);* "Dirty White Boy" *(Head Games);* "Waiting for a Girl Like You" *(4).* The canny Jones kept the sound fresh by working with different producers on each album and supplying the perfect surprising flourish (Junior Walker's sax coda on "Urgent," for example) for each hit. The band's high point came with *Agent Provocateur*'s "I Want to Know What Love Is"—backed by a gospel choir, Gramm belted away with commendable anguish. *Inside Information* also displayed his growth as a vocalist, and the record's synth-work saw Foreigner keeping pace with the times. By the time of *Unusual Heat,* however, Jones had asked Gramm to depart. New singer Johnny Edwards was ultracompetent, but he hadn't yet developed a distinctive style. *Heat* marked a return to Foreigner's reliable, full-out rocking standard. A complete comeback in terms of original vision didn't take place until 1995's *Mr. Moonlight,* for which Gramm was coaxed back into the fold. It was solid rock, but Foreigner's moment had long passed. *Records* is the group's tightest greatest-hits collection. Every bar band in the world has burned out several copies. —P.E.

Fountains of Wayne

★★★½	Fountains of Wayne (Tag/Atlantic, 1996)
★★★	Utopia Parkway (Tag/Atlantic, 1999)
★★★★	Welcome Interstate Managers (Virgin/ S Curve, 2003)

If Nirvana was the voice of the youthful, emergent Generation X of the early '90s, then New York's Fountains of Wayne are the voice of the same generation a few years on, in the midst of an extended adolescence. Adam Schlesinger and Chris Collingwood, the group's songwriting team, were in their late 20s when they released their self-titled debut, and on that record they write knowingly of characters navigating the gray area between adolescence and adulthood. The band wraps these vignettes in Beatles-influenced melodies that are endearingly sweet and catchy.

Fountains of Wayne ditch the Beatles homage for *Utopia Parkway,* infusing the album with more of a rock sensibility. The lyrics are less insightful this time, but the sweetness remains, particularly on "Troubled Times," a gentle reminiscence of a botched love. *Welcome Interstate Managers* is the band's best album to date—the lyrics are attention-grabbingly smart and the songs are so catchy it's maddening. The Beatles influence has returned, but this time it's diversified with nods to the Byrds, the Cars, and even Simon and Garfunkel. The songs still deal with the same Gen X–angsty topics as before, but now they show a bit of personal growth: "I'm gonna get my shit together" go the (albeit slightly tongue-in-cheek) lyrics to "Bright Future in Sales." It seems the band may be close to embracing adulthood after all. —N.P.

The Four Seasons

★★★★★	Anthology (Rhino, 1988)

★★★★★	In Season: The Frankie Valli & the 4 Seasons Anthology (Rhino, 2001)
★★★	Off Seasons: Criminally Neglected Sides (Rhino, 2001)

Doo-wop music didn't make it out of the '50s as a commercial force, but New Jersey's the Four Seasons, the genre's Caucasian branch, flourished in a form updated for the go-go '60s. Relying on tight doo-wop group harmony, an utterly distinctive lead tenor (Frankie Valli), and songs of love and loss—with added ballast for the new era provided by exquisite, visionary production that blended the best of Phil Spector–era rock & roll and Motown pop-soul sensibilities—the quartet topped the charts out of the box with "Sherry" in 1962 and maintained a steady presence in the Top 30 before its run petered out in 1968 with a perfectly serviceable remake of the Shirelles' hit "Will You Love Me Tomorrow." By then, the group had sold some 80 million records worldwide. Against all odds, a retooled Seasons lineup—still featuring the same utterly distinctive lead tenor—returned in 1975 and cut two more chart-topping hits before the singer took his songs and went solo for good.

There's a raft of splendid choices available for the hardcore Four Seasons fan as well as for the tourist who wants the prime cuts and nothing more. Among single-disc compilations, Rhino's 26-song *Anthology* assembles most of the '60s and '70s hits, including Valli's solo smash "Can't Take My Eyes Off You," and makes fanciful side trips, such as the 1965 version of Dylan's "Don't Think Twice" recorded by the Seasons in chipmunk voices under the *nom du disque* the Wonder Who. Rhino also offers two solid 15-song *Greatest Hits* collections, with *Vol. 1* completely devoted to the '60s classics, whereas *Vol. 2* includes the Seasons' '70s hits and Valli's solo material.

Curb has issued a trove of Four Seasons material in recent years, including long-out-of-print studio albums and the wonderful *Gold Vault of Hits* collections originally issued in the '60s by Phillips. The studio albums are a mixed bag but do contain some interesting off-road excursions beyond the hit tracks. Of special note is the 1964 album *Rag Doll,* with four blockbuster singles: the title song, "Ronnie," "Save It for Me," and the group's Top 10 cover of Cole Porter's "I've Got You Under My Skin." From the first note to the last, *Rag Doll* is a tour de force of exemplary pop singing. Another first-rate studio album is 1964's *Dawn (Go Away) and 11 Other Great Songs.* Here Valli and the guys return to their doo-wop roots on terrific versions of the Crests' "16 Candles," the Penguins' "Earth Angel," and the Willows' "Church Bells May Ring." There's also a solid interpretation of Sam Cooke's "You Send Me" along with, of course, the towering "Dawn."

Two offbeat titles are worth noting. Rhino's *Off Seasons: Criminally Neglected Sides* offers 20 cuts that purport to be overlooked Four Seasons gems. One of these, "Cry Myself to Sleep," is one of the best tear-jerking ballads the group ever recorded. Rhino also offers the group's only yuletide release, 1964's

The 4 Seasons Greetings, which had been out of print for 20 years when it was finally reissued in 1991. Produced by Bob Crewe, with orchestral arrangements by Sid Bass and Charles Calello and vocal arrangements by Nick Massi, *Greetings* is appropriate seasonal fare. By turns reverent and joyous, it comprises mostly familiar songs and carols—"I Saw Mommy Kissing Santa Claus," "What Child Is This," "The Little Drummer Boy," "Jingle Bells," a warm take on "White Christmas," and one new song penned by Crewe and Bass, "Christmas Tears," a bit bluesy but hardly dreary. Valli keeps the falsetto in check here, which was the right call for this material.

Ultimately, the collection to own is Rhino's 2001 double-CD *In Season: The Frankie Valli & the 4 Seasons Anthology,* which leaves no important '60s track unrepresented and also offers all the solo Valli and '70s Seasons tracks anyone really needs, plus detailed liner and session notes to boot. There's no going wrong with this one, especially the first disc, which contains the bulk of the overpowering '60s hits. —D.M.

★★★	Motown Lost and Found: Breaking Through '63–'64 (Motown, 1999)

As George Jones is to country and Roy Orbison is to early rock & roll, so is Levi Stubbs to '60s soul—its baroque expressionist. The other three Tops (Lawrence Payton, Renaldo Benson, Abdul Fakir) were fine, strong singers, but the fire of the most dramatic of all Motown groups was Stubbs, a vocalist to whom David Johansen and Billy Bragg have offered lyrical tributes. His style is simply synonymous with *yearning.*

The writer-producers Holland-Dozier-Holland found the perfect vehicle for their symphonic aspirations in the Tops—nothing outside of Phil Spector's epic work for the Righteous Brothers and Ike and Tina Turner rivals the sweep of "Baby I Need Your Loving," "It's the Same Old Song," "I Can't Help Myself," or especially "Reach Out I'll Be There" and "Standing in the Shadows of Love." On the last two numbers, both released in 1966, the Tops and Motown came of age via cinematic orchestral arrangements, lyrics of an utmost poetic immediacy, and the straining of Stubbs' voice toward a pitch of just-short-of-transcendent frustration, elements that heighten the spine-tingling intensity of the music. Gothic soul, of a sort.

Because they so perfectly embodied the spirit of Motown's heyday, the Four Tops conformed to poetic justice by becoming has-beens (if decent sellers) in the years that followed. Neither disco nor funk suited these operatic soulsters, and their departure from Motown, while adding two gems to their catalogue ("Keeper of the Castle," "Ain't No Woman Like the One I've Got"), didn't help greatly to revive their flame. Stick with the classics, best represented on *The Ultimate Collection* and the Rhino set. —P.E.

Foxy Brown

★★★	Ill Na Na (Def Jam, 1996)
★★	Chyna Doll (Def Jam, 1999)
★★★	Broken Silence (Def Jam, 2001)

Half a decade after Queen Latifah first made a stand for hip-hop feminism, the dominant strategy for female empowerment in the rap game was simply to play the nasty card: If they're gonna call you a bitch and a ho, then be the nastiest damn bitch and the skankiest damn ho you can be. Questionable logic, to be sure—though Madonna rode a similar if less explicit whore/queen routine to global fame and lots of feminist hurrahs—but it spawned some of the '90s' boldest and most talented female rap stars. The former Inga Marchand of Brooklyn, who rechristened herself after a Pam Grier flick, was the biggest, and perhaps the nastiest. On *Ill Na Na* she makes bitch-positive declarations of sexuality ("If he don't do the right thing like Spike Lee/Bye-bye wifey, make him lose his Nikes/Hit the road") and boasts about the wild life; her relationship with men is both dependent—she announces "holy matrimony" with her crew, the Firm—and combatively, pornographically flirty. It's equality of the sexes at the lowest order. Then come the morning-after albums, which find her pushing the same material much harder (*Chyna Doll*'s "Dog & a Fox," a duet with DMX, is perhaps the crassest sex-therapy session ever: "Ya bitches suck a dick/Y'all niggaz eat a clit/Yeah, you think you fuckin' slick/Y'all niggaz ain't shit") and, whenever she isn't grabbing her crotch or cussing out sucka lady MCs, moaning with depression and regret: on *Broken Silence*'s "Fallin' " and "The Letter," she contemplates death, perhaps suicide. A hard-knock life indeed. —B.S.

★★½	Anthology: The History of Peter Frampton (A&M, 2000)

Peter Frampton was one of those quintessential '70s success stories—a fast burn, a hazy comedown, and lots of embarrassing stains afterward. A journeyman English guitarist formerly of the Herd and Humble Pie, with several dull studio albums behind him and no fans to speak of, Peter suddenly scored one of the decade's biggest hits with *Frampton Comes Alive!* He had a simple formula: frizzy blond ringlets, shirts that probably didn't even have buttons, mellow romantic ballads, long guitar solos, even longer electric-piano solos, a strange guitar/voicebox contraption that could say "that's all roit!!" (which we all found inexplicably exciting at the time), and an audience full of kids in dialogue with all the machines in the strangely inspiring techno-utopian epic "Do You Feel Like We Do?" There must have been a killer light show or something, too, judging from the crowd squeals that popped up during the otherwise none-too-rocking boogie jams. "Baby I Love Your Way" was a superbly goopy acoustic ballad, "Show Me the Way" a slightly tougher sequel, and Frampton sold millions of records.

I'm in You was rushed out before the Framp had a chance to catch his breath. The title song was a nice goosebump-raising piano ballad, but side two had perhaps the flimsiest music ever passed off by a major-label rock superstar, gasping to the finish line with a pair of desperately time-killing Motown-cover jams. Cameron Crowe's liner notes proclaimed *I'm in You* "bloody great," but it was actually pretty darn bad, and it stopped the golden boy cold. Frampton later appeared, looking roughed up, in the Bee Gees' film version of *Sgt. Pepper.* To his credit, he never stopped making music, though, and finally got around to *Frampton Comes Alive II* in 1995. Beware of *Anthology* and *The Very Best of,* which present the hits in their inferior original studio versions; *Greatest Hits* and *Classics, Vol. 12* do better just by adding the song "I'm in You" to the highlights of *Frampton Comes Alive!* "Do You Feel Like We Do?" got used brilliantly in the 1993 Richard Linklater movie *Dazed and Confused* as an endless 8-track loop humming in the background, which in the summer of 1976 is exactly what it was. —R.S.

★★	So Damn Happy (Arista, 2003)

A supple mezzo-soprano of astonishing range, Aretha Franklin's voice is a force of nature. What makes her one of the great singers in the history of popular music, however, is the knowing command with which she deploys that force. So artful is her approach to her instrument that she might've chosen any genre within which to triumph. The daughter of Rev. C.L. Franklin, a preacher whose many albums of sermons had earned him the name "the Million-Dollar Voice," Aretha could've inherited Mahalia Jackson's crown as the queen of gospel. Equally, she might've followed after Billie Holiday, conquering the blues, or Sarah Vaughan, mastering jazz. In fact, all of these strains find rich expression in Franklin's work—but her signal passion made her "Lady Soul."

Discovered by John Hammond, the unerring Columbia talent scout who'd also mentored Bob Dylan, Franklin was first forced into the mold of a pop singer, covering such easy fare as "Over the Rainbow." Her work for that label—now best represented on *The Great Aretha Franklin: The First 12 Sides* and a trio of '80s reissues—in no way approaches her coming glory, even if her brilliant piano playing and innate vocal power can't quite be buried by glossy arrangements. Pairing up, in 1966, with Atlantic Records vice president Jerry Wexler and the famed Muscle Shoals, AL, studio players, Franklin found her true voice: Against a backdrop of surging rhythm and punching horns, she turned loose her gospel piano and began singing with such graceful abandon that she became recognized very soon as one of the handful of inventors of hard-core soul. Motown was making R&B with a symphonic sweep and sweet melodicism; Aretha's music—boosted greatly by production assists from Wexler, Tom Dowd, and Arif Mardin—would be consistently tougher, rawer, and, arguably, much deeper.

I Never Loved a Man debuted the new Aretha—and it was a staggering introduction. Her version of Otis Redding's "Respect" knocked cold even his amazing original; and with the title track, "Do Right Woman—Do Right Man," "Dr. Feelgood," and "Save Me," this was music of absolute, fluid assurance. The record may stand as the greatest single soul album of all time.

"Baby, I Love You" enlivened the capable *Aretha Arrives,* but *Lady Soul* was another masterpiece, producing the hits "(You Make Me Feel Like) A Natural Woman," "(Sweet Sweet Baby) Since You've Been Gone," and, most significant, "Chain of Fools." With Aretha singing with infectious swagger and its background vocals recalling the Staple Singers, the song encapsulated the Franklin soul style—while as catchy as any early rock & roll number, it resounded with a much wiser force.

On *Aretha Now,* the singer showed that she could transform pop songs into soul numbers; infusing Burt Bacharach's "I Say a Little Prayer" with swing, she added edge to the delicate melody. And *Soul '69* proved her to be a jazz singer of rare intelligence and dimension. With its great takes on Sam Cooke's "Bring It on Home to Me" and Big Maybelle Smith's "Ramblin' " and its tight brass section featuring King Curtis, *Soul '69*'s highlights can now be found on *Aretha's Jazz.* That compilation also presents the better work from Franklin's later orchestral jazz set with Quincy Jones, *Hey Now Hey (The Other Side of the Sky).*

The early '70s marked the end of Aretha's titanic period. *Greatest Hits* featured "Spanish Harlem," a gospel "Bridge Over Troubled Water," and Ashford and Simpson's "You're All I Need to Get By"; *Young, Gifted and Black* presented the spare, urgent "Rock Steady" and the lovely "Day Dreamin' "; *Live at Fillmore West* found Aretha collaborating with Ray Charles. All of these records are confident and immediate; none, however, matches the majesty of her contemporaneous two-album gospel magnum opus, *Amazing Grace.* Featuring James Cleveland and the Southern California Community Choir, *Grace* is Franklin transcendent, returning to the source of her own—and soul music's—earliest inspiration.

In 1981, Aretha came back from a series of bland, sometimes discofied albums in which she often sounded bored or exhausted, with *Love All the Hurt Away*—a funky pop near-triumph. While it wasn't music of the caliber of the best Atlantic sides, the record showed off her newly energized singing—and its success paved the way for her commercial reemergence with *Who's Zoomin' Who.* In many ways a rock record—there's a duet with Annie Lennox of Eurythmics, a Carlos Santana guitar solo, and sax work by Clarence Clemons—*Zoomin'* may be lyrically slight, but it kicks plenty. With help from the Mighty Clouds of Joy, Jesse Jackson, and Mavis Staples, *One Lord, One Faith, One Baptism* reasserted Aretha's gospel prowess—predictably, it was the best record she'd made in over a decade.

Sadly, Aretha would remain quiet for most of the '90s. *A Rose Is Still a Rose* in 1998 found her collaborating with a coterie of celebrated hip-hop artists. Sure enough, the odd Narada Michael Walden–produced ballad was still there. This time, however, the syrupy pop material competed with more transcendental sessions produced by the likes of Lauryn Hill (the luscious title track) and Puff Daddy ("Never Leave You Again"). Five years later, *So Damn Happy* drowned her royal vocalizing in a tepid sea of lackluster hooks and uninspired arrangements.

While incapable of turning in a vocal performance that doesn't catch fire, Aretha has truly shone only in company with sympathetic producers (Wexler/Dowd/Mardin)—and she's sometimes been overwhelmed by less congenial ones (Van McCoy, Luther Vandross). Occasionally willfull, reticent, or inscrutable, she has the tortured personality of a very private soul, and her career has sometimes suffered from lack of direction. She remains, however, the spirit of soul—a singer of genius. Nearly all of her 1967–72 releases are essential R&B records; the excellent *Queen of Soul,* a four-CD box set, presents Aretha Franklin at her finest. For those with little money to spend, *The Very Best of Aretha Franklin* distills the set's essential moments into one devastating disc of pure R&B gold. —P.E./E.L.

Freestyle Fellowship

★★★★	To Whom It May Concern (Beats & Rhymes, 1991)
★★★½	Inner City Griots (4th and Broadway, 1993)
★★½	Temptations (Ground Control, 2001)
★★★★	Version 2.0 (Beats & Rhymes, 2001)
★★★	Shockadoom (Beats & Rhymes, 2002)

The L.A.-based Freestyle Fellowship is made up of MCs Aceyalone, Mikah Nine, Self-Jupiter, and P.E.A.C.E., a crew of uncompromising hip-hop purists. On its very-limited-edition debut, *To Whom It May Concern,* the group's evangelical rhyming approach is breathtaking (especially for those who got to see the MCs perform at the time). After the release of its second album, the group hadn't quite found a balance between its native environment, the stage, and the studio setting. Whereas *To Whom* was raw, *Inner City Griots* was much more of a traditional hip-hop album (save for the verbal ballistics, the albums could have been made by two different groups). Whatever their faults, these releases delivered on a lot of promise, so the faithful waited—and waited—with bated breath for the next one. Finally, after eight years of various solo albums and mix-tape appearances, 2001 brought *Temptations,* on which the group embraced the ideology of "No Hooks, No Chorus" (also the name of one of the album's tracks). Because the MCs highlight their mic skills here rather than craft compelling beats, they undermine the fellowship's legacy, at least on wax. Ironically, they released an instrumental version of *Temptations,* which is like Billy Bob Thornton listing his country-rock CDs but omitting his movies from his résumé. The chronology of the fellowship's career and catalogue is kind of confusing. For instance, *Shockadoom* was recorded in 1998, so technically it's the followup to *Inner City Griots,* but the disc wasn't released until 2002. And 2001's *Version 2.0* is essentially a reissue of the debut album, of which fewer than 1,000 copies were originally pressed. In 1991, the Freestyle Fellowship was on top of its game, but after 10 years, it became clear that the MCs left out the *fun* in their hip-hop fundamentalism. —K.M.

Freeway

★★★★	Philadelphia Freeway (Roc-A-Fella/Def Jam, 2003)

Philadelphia's Freeway has one of hip-hop's truly distinctive voices, a nasal, raspy wheeze that sounds like a perpetual gasp for air. Originally featured on "Roc the Mic" as part of Beanie Sigel's crew State Property, it quickly became clear that Freeway could stand on his own. He spins grimy yarns about the hustling life on his debut, which are all the more impressive compared to Roc-A-Fella's typically glossier output. Complemented by the best work of the label's two in-house producers, Just Blaze ("What We Do") and Kanye West ("Turn Out the Lights"), Freeway proves that even the most hardened truths can set you free. —J.C.

Glenn Frey

★★	No Fun Aloud (Asylum, 1982)
★★	The Allnighter (MCA, 1984)
★½	Soul Searchin' (MCA, 1988)
★★★	Strange Weather (MCA, 1992)
★★½	Live (MCA, 1993)
★★★	Solo Collection (MCA, 1995)
★★★	The Millennium Collection: The Best of Glenn Frey (MCA, 2000)

After the Eagles split up (for the first time), guitarist-singer Glenn Frey cut a predictably slick solo debut in his old band's party-boy mode; *No Fun Aloud* is like a Joe Walsh album with (slightly) better singing. Not songs, though; apparently that was Don Henley's department. *The Allnighter* glistens with synthesized oomph, but the sugar coating doesn't sit well on Frey's mannered white R&B loverman act. "Smuggler's Blues," the set piece for the followup, was utilized in an episode of the television show *Miami Vice* (Frey had a small role), jump-starting *The Allnighter* on the charts. "Smuggler's Blues," the catchiest tune on the album by far, was a lot more interesting to watch—like a dramatized video clip—than it is to listen to, however. By *Soul Searchin',* Frey sounded like he wasn't even trying anymore; his pump-your-body TV gym commercials at the time displayed more sweat and effort. With *Strange Weather,* Frey seemed determined to make a statement. "Love in the 21st Century" was a catchy but disposable rocker in the vein of his *Beverly Hills Cop* soundtrack hit "The Heat Is On," but both "I've Got Mine" and "He Took Advantage (Blues for Ronald Reagan)" found him stumbling around in the same rich-rock-star-as-self-righteous-angry-liberal footsteps as Henley; suffice it to say, neither song came within spitting distance of the dignified grace of Henley's *The End of the Innocence.* Frey fares much better with the album-closing "Part of Me, Part of You"—a feel-good, top-down anthem in the spirit of his easy-rolling Eagles hits "Take It Easy" and "Peaceful Easy Feeling." Of course, that song was first featured in the film *Thelma & Louise,* conclusive proof that as a solo artist, Frey's forte is hooky soundtrack fodder and lousy albums. As such, he's best represented by either of his two best-of collections, both of which offer "Part of Me," "The Heat Is On," "Smuggler's Blues," and his other *Miami Vice* hit, "You Belong to the City." The lackluster *Live* features most of the same hits, along with a handful of reheated Eagles tunes; fans who waited a year got the real deal when Frey rejoined the Eagles for *Hell Freezes Over* in 1994. —M.C./R.SK.

Lefty Frizzell

★★	American Originals (Columbia, 1990)
★★★★	The Best of Lefty Frizzell (Rhino, 1991)
★★★★½	That's the Way Love Goes: The Final Recordings of Lefty Frizzell (Varèse Sarabande, 1996)
★★★★★	Look What Thoughts Will Do (Sony/Columbia, 1997)
★★★	Songs of Jimmie Rodgers (Koch, 1999)
★★	Country Music Hall of Fame 1982 (King, 1999)

Simply one of the great vocal stylists in country-music history, Texas-born William Orville "Lefty" Frizzell came out of the Southwest honky-tonk circuit to land a recording contract with Columbia Records in 1950, when he was 22 years old; he would become one of the biggest stars in country music only a year later. When his Columbia run ended in 1970, he left with 17 Top 10 hits and six #1 singles on his résumé, plus a host of devoted disciples including Merle Haggard (whose song "The Way It Was in '51" memorialized the total dominance Frizzell and his buddy Hank Williams exerted over country music in one vibrant year) and Willie Nelson, who saw fit to honor one of his major influences with an entire album in 1977, *To Lefty From Willie.* Frizzell was only 47 when he died from a cerebral hemorrhage in 1975, but his legacy lives on in succeeding generations of vocalists such as Clint Black, the late Keith Whitley, and especially Randy Travis, each of whom forged an individual style out of what he had learned from Frizzell's emotionally rich and revealing phrasing.

Frizzell's records, while offering a fair share of heartbreak and despair, are remarkably life-affirming, considering his struggles with alcoholism during his short life. This is especially true of the early smash hits, which build on a traditional country foundation while being streamlined in a way well-suited to the quickening pace of post–World War II America. Lay a personable, gimmick-free tenor voice on top of that, and you've got something that speaks directly to listeners looking for stories relevant to their own lives. The simple affirmations of unconditional and enduring love for parents in 1951's poignant "Mom and Dad Waltz" skirt sentimentality not only in the lyrics but also in the dirgelike fiddle lines and moaning pedal-steel fills, ultimately saying what many feel in their hearts. Similarly, the buoyant expressions of romantic love fueling Frizzell's debut hit, "I Love You a Thousand Ways" (one of his landmark recordings; it's now an acknowledged country classic) effectively encapsulate a starry-eyed view of a significant other, even though the song was written from a jail cell in which the 18-year-old Frizzell was serving a sentence for statutory rape; by the same token, the melancholy strains of "Always Late (With Your Kisses)" describe the kick inside when something's amiss in a relationship, especially in the futility with which Frizzell invests his lyric, "Why oh why do you want to do me this way?" On balance, Frizzell had a way with a love song that brooks few comparisons in all of country-music history—the tenderness he brings to his singing and his uncanny modulations in tone and phrasing to suit the mood of the moment are blueprints in the art of technically adroit, openhearted vocalizing.

The essential overview of Frizzell's Columbia years is the two-CD *Look What Thoughts Will Do.* His music speaks volumes, and there's plenty of it here—34 songs, from the breakout 1950 double-sided chart-topper, "I Love You a Thousand Ways" and the honky-tonk classic "If You've Got the Money I've Got the Time" to his final #1 single, 1964's brooding, haunting treatment of the folk-styled masterpiece, "Saginaw, Michigan." Of special note is the tasty, low-key country blues from 1952, "Lost Love Blues," previously unissued in the U.S., and two masterful homages to Jimmie Rodgers, "Travellin' Blues" and "My Rough and Rowdy Ways." To his credit, Frizzell approached Rodgers' songs in his own way and found where they lived in his stylistic range rather than attempting to replicate Rodgers' vocal approach and arrangements. Columbia eventually released an entire album of Frizzell's Rodgers covers, *Songs of Jimmie Rodgers,* which has now been reissued on CD by Koch. It's neither classic nor indispensable, but it's an enjoyable album that deepens the impression of an artist who has a sure sense of himself.

Elsewhere, Rhino's *Best of* is an exemplary summary of the Columbia years, albeit less thorough than *Look What Thoughts Will Do.* Columbia's *American Originals* and King's *Country Music Hall of Fame* entries fall woefully short of the mark of the Columbia/Legacy and Rhino sets.

Finally returned to print after years in the cutout wilderness are Frizzell's ABC recordings from 1972 to 1974, many of them originally issued in the albums *The Legendary Lefty Frizzell* and *The Classic Style of Lefty Frizzell,* in 1973 and 1975, respectively. Given his self-destructive personal habits, it's fair to say *That's the Way Love Goes: The Final Recordings of Lefty Frizzell* features an older if not necessarily wiser artist. —D.M.

John Frusciante

★★★★	Niandra Lades and Usually Just a T-Shirt (American, 1994)
★½	Smile From the Streets You Hold (Birdman, 1997)
★★	To Record Only Water for Ten Days (Warner Bros, 2001)
★★½	Shadows Collide With People (Warner Bros., 2004)

Possibly the most fucked-up record ever issued by a major label, ex–Red Hot Chili Peppers guitarist John Frusciante's home-recorded solo debut is not for the squeamish. Unspeakably sloppy but often genuinely moving, it's full of tortured beauty: the sound of a man scraping away at his own mind's breaking point, letting both his id and his imagination run loose. Hence, for instance, a lyrical, Hendrix-inspired tune called "Your Pussy's Glued to a Building on Fire." Appreciating *Niandra*'s splattered resplendence also requires a certain tolerance for Frusciante's singing voice—think Robert Plant with splinters under his toenails.

The followup, *Smile From the Streets You Hold,* has a couple of moments of scary sublimity, especially "A Fall Thru the Ground" (as well as several collaborations with Frusciante's late friend, actor River Phoenix), but it's mostly agonizing to listen to—haphazardly dumped onto tape at the nadir of Frusciante's heroin addiction, it sounds like he's singing through convulsions and shattered teeth.

Subsequently, he cleaned up, rejoined the Chili Peppers, and made *To Record Only Water for Ten Days,* whose almost normal verses, choruses, and drum machines make it sound like a set of almost bland sketches for RHCP ballads. *Shadows Collide with People* is a bit looser and weirder, featuring a couple of lovely, noisy instrumentals. Frusciante's lyrics seem to wander away every few words ("Sending a dummy to my God/Driving to eat a Carvel cake/Somewhere you know isn't where you think"), and he wins no prize for musical focus, either, but he does sound like he's having fun for a change. —D.W.

Fuel

★★★	Sunburn (Sony/550, 1998)
★★½	Something Like Human (Sony/550, 2000)
★★	Natural Selection (Sony, 2003)

Part of a vanishing herd of post–Pearl Jam grunge-pop contenders, Fuel came straight out of Pennsylvania in 1998 with "Shimmer," a canny mix of strings and hard-rock hooks that was one of the year's guiltiest pleasures and the best thing on their major-label full-length debut, *Sunburn.* Fuel boasted a charismatic lead singer (the somber, improbably named Brett Scallions) and enough decent tracks ("Jesus or a Gun," "Bittersweet") to ensure a better future for itself than, say, Seven Mary 3. With the same reliance on depressive, love-gone-wrong ballads and melodic metal-lite ("Last Time" and "Hemorrhage [In My Hands]"), the band's second effort, *Something Like Human,* was more of a lateral move than an artistic step forward; *Natural Selection* stayed that uninspired course. —A.S.

Fugazi

★★★★	13 Songs (Dischord, 1989)
★★★½	Repeater + 3 Songs (Dischord, 1990)
★★★½	Steady Diet of Nothing (Dischord, 1991)
★★★★	In on the Kill Taker (Dischord, 1993)
★★★★	Red Medicine (Dischord, 1995)
★★★½	End Hits (Dischord, 1998)
★★½	Instrument Soundtrack (Dischord, 1999)
★★★★½	The Argument (Dischord, 2001)

Fugazi has been such a righteous force in underground rock for so long—charging reasonable prices for concert tickets, scrupulously avoiding any taint from the corporate-level music biz—that it's easy to forget they're an actual *band.* At least until you put their records on, or see one of their legendary live shows. But singer/guitarists Guy Picciotto (whose earlier band Rites of Spring pretty much invented emo) and Ian MacKaye (whose earlier band Minor Threat was the formal pinnacle of hardcore) and the mighty rhythm section of Brendan Canty and Joe Lally are a staggeringly powerful combination. They've been challenging themselves and their audience constantly for 15 years, giving some of the hemisphere's hardest punk rock an increasingly arty, thoughtful spin.

Compiling two early EPs, *13 Songs* leads off with Fugazi's best-known song, the white-hot dub-punk anthem "Waiting Room," and keeps going with one feral rocker after another. Picciotto's "Margin Walker" articulates the specific rage of wanting to destroy the culture that excludes you, but the real knockout here is "Suggestion," an explosive attack on everyday sexism, sung by MacKaye from a woman's POV. *Repeater* is a development and refinement of the same basic approach, this time as a refutation of mass culture: "We owe you nothing/You are not what you own," MacKaye bellows on "Merchandise," and Picciotto's "Blueprint" finds him screaming "I'm not playing with you!" over and over. There's a bit of filler (two instrumentals and a remake of "Provisional" from *13 Songs*), and more energy than craft at work, but you can't accuse them of being undercommitted.

With *Steady Diet of Nothing,* they slow down and dig in, making the music both tougher and more complicated. Lally's bass parts are three parts Joy Division to one part dub; you can hear the band's years of playing together turning into tricky, spacious instrumental patterns, as on "Stacks." MacKaye addresses the Gulf War in "Nice New Outfit" ("There's blood in your mouth, but not in mine"), and there are rumors of war elsewhere in the lyrics, but they're mostly the sort of raw impressionism that the late-'90s emo generation subsequently picked up on.

Illness is everywhere on *In on the Kill Taker,* literally or metaphorically—it shows up all over the lyrics, and there are sick, nasty guitar noises starting or ending most of the songs, like the blistering feedback coda of "23 Beats Off." The band actually quiets down and builds tension a few times, but it's usually to give them somewhere to lunge from. Picciotto's words get weirder and are open to interpretation—"crush my calm, you Cassavetes"—but he declaims them like he's taking his revenge. There's also a fabulous MacKaye punk-rock quickie, "Great Cop" (as in "You'd make a . . ."). *Red Medicine* continues along the same path into even denser, darker territory and suggests that Fugazi is feeding on lots of stuff that's very different from its own music. "Fell, Destroyed" even borrows a hook from Tenor Saw's dancehall reggae hit "Ring the Alarm," and "Version" is an ambitious, if not exactly successful, noise-dub experiment. The MacKaye knockout this time is "Bed for the Scraping," with its battle cry of "I don't want to be defeated"—in his mouth, it comes out as "idawannabeedafeeda."

The disjunction between the anthems and the arty moments of *End Hits* is schizzier still: MacKaye's "Five Corporations" savages music-biz hegemony with laconic precision, and Picciotto sings "Guilford Fall" like his head's exploding, but then there are pieces like the hushed bass gurgle "Pink Frosty" that are unrecognizable as the Fugazi of 10 years earlier. (That's a good thing, but the combination makes for difficult listening.) The recording is curious, too, switching between the audio equivalent of long shots and close-ups. A soundtrack to a documentary about Fugazi's first decade, *Instrument* includes oddities, instrumental doodles, and a half-dozen demos, mostly of *End Hits* songs. It's mostly ragged and unformed, but for confirmed Fugaziphiles, it's a solidly interesting peek into the band's creative process.

The four core members of Fugazi (plus live percussionist Jerry Busher, playing with the group for the first time on record) are clearly pulling in different directions on *The Argument,* and the result, miraculously, is their best album—somehow, they seem to have discovered that pleasure has radical possibilities too (backing vocals! cello! tunes, even!). Picciotto's "Full Disclosure" is as headlong a punk charge as they've ever made, but they've also figured out how to make their points by implication and understatement, musically as well as lyrically. The songs shift their textures restlessly as the band flexes its collaborative instincts, playing as if with a single pair of hands. —D.W.

Fugees

★★★	Blunted on Reality (Ruffhouse/Columbia, 1994)
★★★★½	The Score (Ruffhouse/Columbia, 1996)
★	Greatest Hits (Sony, 2003)

The Fugees arrived quietly with *Blunted on Reality;* they were a trio led by two Haitian-American cousins with a sound grounded in conscious rap that also acknowledged the group's Caribbean heritage, blending elements of traditional and dancehall reggae with hip-hop—seemingly an alternative-rap oddity with few commercial prospects. But the group's musicianship brought another layer to the music, and *Blunted*'s best tracks—the acoustic-guitar-driven "Vocab" and "Some Seek Stardom," a showcase for versatile rapper/singer Lauryn Hill—dazzle with compositional flair. Ultimately, *Blunted* catches the group still finding itself, and some awkward rapping by cousins Wyclef Jean and Pras makes the record more about promise than actualization.

That is not the case with its followup, *The Score,* which very consciously sidesteps the group's weaknesses and accentuates its strengths. Mainly, that means Hill has moved front and center, delivering the album's most memorable rhymes and inviting hooks. The production is also notably stronger and more mature than on the debut, enabling the Fugees to emerge as not only the major pop crossover of the day but—with Hill's relatively faithful vocal on a cover of Roberta Flack's "Killing Me Softly"—the rap group even soccer moms could love. At its best, *The Score* suggests ways in which hip-hop can expand musically (and demographically) without becoming tepid or inane. Perhaps a victim of its own achievements, *The Score* has not been followed up, as Jean (the group's musical force) and Hill have jockeyed the notoriety they earned into successful solo careers. Considering that the Fugees made only two albums, *Greatest Hits* is merely an attempt by Sony to squeeze the last drops of juice from the Fugees' career—once it became apparent no third studio record would ever materialize. Seven of the 10 tracks are from *The Score,* and just two come from *Blunted* (a Lauryn Hill solo track rounds out the album). Thoroughly inessential. —R.M.S.

Funkadelic

★★★½	Funkadelic (Westbound, 1970)
★★★	Free Your Mind and Your Ass Will Follow (Westbound, 1970)
★★★★	Maggot Brain (Westbound, 1971)
★★★	America Eats Its Young (Westbound, 1972)
★★★½	Cosmic Slop (Westbound, 1973)
★★★½	Standing on the Verge of Getting It On (Westbound, 1974)
★★★★	Let's Take It to the Stage (Westbound, 1975)

★★★★	Uncle Jam Wants You (Warner Bros., 1979)
★★	Connections and Disconnections (LAX, 1981)
★★★½	The Electric Spanking of War Babies (1981; Priority, 2002)
★★★★	Music for Your Mother: Funkadelic 45s (Westbound/Ace, 1992)
★★★★	Live: Meadowbrook, Rochester, Michigan, 12th September 1971 (Westbound/Ace, 1996)

James Brown will always be the Father of Funk, but George Clinton is the Son and Holy Ghost with some pagans thrown in. Clinton's work with Funkadelic and Parliament is still a sample lode for hip-hop (there would be no Dr. Dre without Clinton), and his catholic vision of a rock and funk marriage is sui generis. It didn't all work—Clinton's synthesist tendencies and taste for open-ended improvisations resulted in some pretty confused records—but he started more conversations than anyone in funk.

The band's genealogy is near Biblical, tied up with lawsuits and label hopping, but in short: Detroit songwriter George Clinton had a doo-wop vocal group in the '60s called the Parliaments, who became Parliament and recorded a very Funkadelic-like album, the excellent *Osmium,* and then changed their name for legal reasons. At any point, Parliament and Funkadelic have many of the same members, but the reductive breakdown is Funkadelic = rock, Parliament = disco. The first three Funkadelic records—*Funkadelic, Free Your Mind and Your Ass Will Follow,* and *Maggot Brain*—are heavily weighted in favor of Eddie Hazel's post-Hendrix guitar wailing and a druggy worldview. When it works, it's like the Stooges with swing, a mildly terrifying urban funeral procession that can't decide whether to cry or do the Popcorn. There isn't a Black Sabbath song heavier than "Super Stupid" *(Maggot*

Brain), and songs like "Good Old Music" *(Funkadelic)* and "Hit It and Quit It" *(Maggot Brain)* make one nostalgic for a time when funk didn't necessarily drag gentility along for the ride. These songs are *fierce.* On the other hand, Clinton's spoken word and echo-chamber decoration are mostly entertaining because they suggest a day gone by. They will not go on your mix tape. And Eddie Hazel, for all his emoting, is a one-trick pony: Some of the solos are torrid blues narratives, and some are just really long. When Funkadelic gets above nine minutes, it's usually not a good sign. (The excellent *Live: Meadowbrook* disc proves, though, that this band was a force of nature when they got going on stage.) The themes that will make Clinton Clinton are all here: Sex is the point but also kind of scary; money's a game where the house always wins; and funk will somehow resolve the contradiction between the two, if only by making you forget it.

America Eats Its Young isn't the strongest Funkadelic album, but it introduces key elements that will lead Clinton to Parliament: keyboardist Bernie Worrell; a light, playful sense of humor that favors catchphrases and leavens some of Clinton's ickier scatology; and a massive talent for harmony vocal arranging. The political anger is upped on *America,* but it's the party tunes that will survive ("You Hit the Nail on the Head," "A Joyful Process," "Loose Booty"). You could say much the same of *Cosmic Slop* and *Standing on the Verge of Getting It On,* with qualifications. The title track of *Cosmic Slop* is a painful incantation ("I hear my mother call . . .") answered by a very Temptations vocal and Eddie Hazel's crying. (Think of him more as a black cantor than as the next Hendrix.) "Nappy Dugout" is classic Clinton sex talk, in a good way. *Standing* revives a stomper from *Osmium* called "Red Hot Mama," and then moves into larger, dance-friendly jams (the title track). *Let's Take It to the Stage* (not a live album) was a summing-up of everything Funkadelic had done to date, and is still their most playable record. Clinton's sexual politics aren't at their best ("No Head, No Backstage Pass" says it all) but the band is in high gear, from the old-style rock funk of "Good to Your Earhole" and "Stuffs and Things" to the proto-Parliament party tracks like the title track and "Get Off Your Ass and Jam." Everybody is about to take backseat to the synth squiggles of Bernie Worrell and the dusted ad-libs of the young bassist with the funny glasses—Bootsy Collins—but this album captures what made the band so good.

(*Music for Your Mother* and *Best of the Funkadelic Early Years* both have most of what you need from the pre-Parliament era, the former tending toward unnecessary completeness and the latter leaving out a few key tunes. But be thankful that *Music* is all single-length edits, which helps.)

Hardcore Jollies attempts to balance the new horizontal, de-rocked groove with some echoes of guitar fire (courtesy of Michael Hampton, the new Eddie Hazel) but it's just pleasant, neither cathartic nor bumpalicious. As Clinton shifts labels from Westbound to Warner Bros., *Tales of Kidd Funkadelic* fulfills a contract with outtakes from the Westbound years (including the excellent "I'm Never Gonna Tell It" and concert favorite "Take Your Dead Ass Home!") without actually achieving albumness. For the next two years, Parliament commands Clinton's attention and Funkadelic is on hiatus.

The 1978 return, *One Nation Under a Groove,* is basically Funkadelic as Parliament, with the crucial help of singer Junie Morrison, formerly of the Ohio Players. The title track is sheer pleasure, a nimble blend of vocal ad-libs, bursts of harmony singing, and a bed of guitar and percussion that reads as Clinton's most explicitly African track to date. It's good enough to buoy up the rest, which is average. The overly polite "Who Says a Funk Band Can't Play Rock?" suggests that a funk band can't, though their early records had already put the question to bed for eternity. "Into You" is a breed of sex ballad that Bootsy would do better on his solo records, but "Cholly" is a durable chunk of funk. Add a lot of talk about shit, literally, and a superfluous live cover of "Maggot Brain," and you still need the title track to live a proper life.

Uncle Jam Wants You is the best Funkadelic-as-disco album, just because of the first two songs. "Freak of the Week" is like slowed-down Chic, a classy chick singing and working around that polyrhythmic, squishy center that *One Nation* relied on. And then there's "(Not Just) Knee Deep," now famous as the basis for De La Soul's "Me, Myself and I," but still its very own gimme on the dance floor. Everyone sings, everything bends in the heat, and at 15 minutes, it's about 20 minutes too short. It's still a great template for communal joy. The title track and "Foot Soldiers" beat the military concept to death, and "Holly Wants to Go to California" is like Clinton trying to imitate Elton John without having heard him. "Field Maneuvers" is Clinton copying Lynyrd Skynyrd, sorta, with much better results. The first 20 minutes of music, though—goddamn.

Connections and Disconnections bears the Funkadelic name, inaccurately, but it's just Fuzzy Haskins and friends in a feud with Clinton, trying to cash in. Avoid. *The Electric Spanking of War Babies,* the final Funkadelic album, is loose and fluid but lacks any of the killer hooks and chants that pull their open-ended funk into focus. "Funk Get Stronger" features Sly Stone doing a surprisingly good job, though Clinton and Stone's real keeper is the stellar P-Funk All Stars album, *Urban Dancefloor Guerrillas. Spanking* is a listenable record, but never hits those epiphanic Clinton heights. —S.F.J.

Nelly Furtado

★★★½	Whoa, Nelly! (DreamWorks, 2000)
★★½	Folklore (DreamWorks, 2003)

A first-generation Canadian whose restless ears never stray too far from her Portuguese roots, Nelly Furtado scored a coup for intelligent female popsters with the release of her debut in 2000. *Whoa, Nelly!* is a wild-ass pop go-go, filled with songs that pursue adventure yet could still make the hit parades. Like high-impact hip-hop but melodically durable and sensuously international, the album jumps on Portuguese and Brazilian styles not as exotic refinements but as cool ways to express yourself in everyday tunes. "Turn off the Light" is a reggae-directed rock-blues tune done with towering confidence.

After three years—during which time she sold 2 million CDs, won a Grammy, and had a baby—Furtado reappeared with *Folklore,* a slick multiculti hodgepodge that sounded like *Whoa, Nelly!* redux, only without a single as good as "I'm Like a Bird." The 24-year-old kicks things off by proclaiming, "I am not a one-trick pony," but fails to back up that claim on the 11 songs that follow. Aside from the mechanized drum loops and assorted world-beat flourishes, she mostly sounds like a funkier Michelle Branch. —J.H./J.E.

★★★	Up (Real World/Geffen, 2002)
★★★½	Hit (Geffen, 2003)

Over the course of his career, British rocker Peter Gabriel has metamorphosed from theatrical prog-rock cult artist to canny, multimedia pop star to worldly rock sage. It's been a dramatic change: Fans of sly, pop/funk singles like "Big Time" might actually find it hard to accept that their hero was also responsible for the baroque silliness that is "Moribund the Burgermeister."

Gabriel's first three solo albums—each entitled *Peter Gabriel,* although the remastered versions are helpfully numbered *1, 2,* and *3*—were experiments in reinvention. The first *Peter Gabriel* (the cover of which finds our hero half-hidden behind a wet windshield) arrived three years after his last studio recording with Genesis, 1974's arty, ambitious *The Lamb Lies Down on Broadway.* Between the flabby dramatics of "Moribund the Burgermeister" and the forced whimsy of "Excuse Me," it was clear that Gabriel without Genesis wasn't all that different from Gabriel with. Yet the folky economy of "Solsbury Hill" and the understated majesty of "Here Comes the Flood" clearly pushed toward something else—not mainstream pop, exactly, but something close.

The second *Peter Gabriel* (with the fingernails cover) moves closer to that new sound. Produced by King Crimson's Robert Fripp—himself a prog-rock star hoping to remake himself to fit a postpunk world—the album finds Gabriel trying to square his past with the (then) present. "D.I.Y.," his paean to self-produced punk, seems especially prescient in the post-Napster world, while the spare, abstract "Exposure" reveals an unexpected edge. Still, neither the Who-style pomp of "On the Air" nor the ham-fisted pathos of "Home Sweet Home" suggests that Gabriel was surrendering his old turf easily.

It's the third *Peter Gabriel* album (with the melting-face cover) that finally puts him on the proper path. Rather than being written on piano and having the ideas translated to band arrangements, the songs on this album were written using digital synthesis and drum loops. Suddenly, there's a new urgency to Gabriel's voice as he rides the rhythms of "Intruder" and "No Self Control," while the blissfully transcendent "Biko" and "Games Without Frontiers" hint at a pop future very different from the guitar-based world Gabriel came up in.

Security expands on those possibilities by adding world-music elements to the mix. Gabriel had already made moves toward African music in "Biko," which opened with a brief mbube chorale, but that bit of color is nowhere near as dramatic as the burst of percussion that the Ekome Dance Company provides in "The Rhythm of the Heat." It isn't simply exoticism that makes the song (or the similarly flavored "San Jacinto" and "The Family and the Fishing Net") so intriguing; it's the way Gabriel incorporates these rhythmic ideas into his melodic concepts, resulting in a kind of magic that's as applicable to the boisterously tune-

CONCORDIA COLLEGE LIBRARY
BRONXVILLE, NY 10708

ful "Shock the Monkey" as the moody, mysterious "I Have the Touch."

Gabriel's internationalist musical strategy didn't translate particularly well to live performance, at least not by the evidence of *Plays Live* (although *P.O.V.,* a 1990 concert video shot with a different band and repertoire, isn't quite so flat). But it does make excellent soundtrack source material. In fact, several selections on the all-instrumental *Music From the Film "Birdy"* are reworkings of tunes from *Security* and the third *Peter Gabriel,* transforming familiar melodies into emotionally evocative mood pieces.

With *So,* Gabriel finally figures out how to play these new tools as pop. Amazingly, he does so without compromising the ambition or adventurousness of his previous efforts. Although the hits "Sledgehammer" and "Big Time" are pointedly funk-driven (and serve up a fair amount of sarcasm with their big-beat arrangements), the rest of the album shows how much Gabriel had gleaned from his world-music side project, the W.O.M.A.D. (World of Music, Arts, and Dance) Festival. There are allusions to Zimbabwean Shona mbira themes in Tony Levin's bassline for "Don't Give Up," and Senegalese mbalax singing (courtesy of Youssou N'Dour) spikes the final choruses to "In Your Eyes." Exotic touches, to be sure, but delivered in a context conventional enough to make them palatable to any pop fan.

Gabriel's second soundtrack album, *Passion* (composed for Martin Scorsese's *The Last Temptation of Christ*), is similarly world-music savvy, though it draws more from the Middle East than Africa. Unlike *Birdy,* it feels more like a genuine film score, covering a range of styles (from Gabrielesque prog rock to quasi-symphonic tone poems), and suggests that there are depths to Gabriel that his pop work barely hints at.

Shaking the Tree, by contrast, makes no such moves in that direction, offering only a representation of his big hits augmented by a fresh collaboration with Youssou N'Dour (the title tune) and a new version of "Here Comes the Flood." *Us,* which followed, did its best to pick up where *So* left off, mixing sophisticated funk-pop ("Steam," "Kiss That Frog") with issue-oriented art rock. In this case, however, the issues were more personal, focusing more on psychosexual drama than on social issues, which lent the whole project the fruity air of postanalytic revelation instead of pop-culture inspiration. None of that was audible in *Secret World Live,* however, which made the pop content seem more like the white funk it wanted to be, while rendering the artier fare all the more indigestible.

That, sadly, seems to have been the high-water mark for Gabriel. Eight years passed before he finally released a new album, and that turned out to be another *Birdy*-like soundtrack, *Long Walk Home* (from the film *Rabbit-Proof Fence*). Taken on its own, it not only complements the film's vision of the Western Australian outback, but reduces many of the major themes from his subsequent "commercial" release, *Up,* to a far more potent essence. *Up,* on the other hand, manages to make several of Gabriel's stylistic habits—grandiloquent prog, slyly mannered funk—seem less like strengths than tics, and (worse) with the tabloid TV-bashing "Barrie Williams Show" turns his gift for satire into an embarrassing and slow-arriving statement of the obvious. We deserve better—and so does he.

After *Up,* Gabriel seems to have tried to make up for his slack productivity in the '90s by releasing numerous new albums. Sadly, he's done so without producing much in the way of new music. The misleadingly titled *Hit* offers only one new song ("Burn You Up, Burn You Down") while recapping much of *Up* and rounding the disc out with middling rarities plus a sprinkling of actual hits. It's hardly an improvement on *Shaking the Tree.* Simultaneously, he has been releasing concert recordings online through the "Encore Series" (www.themusic.com). There were 21 released from his 2003 tour, and several dozen more planned for his 2004 outing. It beats writing new songs, apparently. —J.D.C.

Serge Gainsbourg

★★★★	Comic Strip (Phillips/Mercury, 1996)
★★½	Couleur Café (Phillips/Mercury, 1996)
★★	Du Jazz dans le Ravin (Phillips/Mercury, 1996)
★★★★	Aux Armes et Caetera (Sunnyside, 2004)

The great French pop provocateur Serge Gainsbourg's thirty-year-plus career—or at least the early part of it—has been boiled down to three themed compilations for American listeners. *Comic Strip* is the essential introduction to his deliriously inventive late-'60s hits: lush, witty, campy, and throbbing with the kind of irresistible erotic charisma that only truly ugly people can pull off. "Je T'Aime . . . Moi Non Plus" ("I Love You . . . Me Neither"), his heavy-breathing duet with Jane Birkin, has become audio shorthand for Euro-sleaze. It's amazing how timeless a lot of this stuff sounds: "Requiem Pour un Con," released in 1968, could pass for mid-'90s trip-hop.

The other two comps are for confirmed Gainsbourg fiends only. *Du Jazz dans le Ravin* surveys decent but not particularly inspired jazz-influenced material from the late '50s and early '60s. *Couleur*

Café collects his experiments with African and Latin rhythms, including most of 1964's *Gainsbourg Percussions* album (notably the delightful "Pauvre Lola"). Gainsbourg's deeply improbable 1979 album, *Aux Armes et Caetera,* found him in Jamaica, rasping through reggae versions of "La Marseillaise" (the title track), the early jazz standard "You Rascal You" ("Vielle Canaille"), and a bunch of his own songs, with a band that included Sly Dunbar and Robbie Shakespeare. Even more improbably, it's terrific, and the 2004 reissue (which appends a disc of dubs and newly recorded DJ versions) is doubly entertaining.

Note: Most Gainsbourg is much more fun if you know enough French to understand his legendary and largely untranslatable wordplay. —D.W.

Galaxie 500

★★★	Today (Rough Trade/Rykodisc, 1988)
★★★★½	On Fire (Rough Trade/Rykodisc, 1989)
★★★½	This Is Our Music (Rough Trade/Rykodisc, 1990)
★★★★	Galaxie 500 (Rykodisc, 1996)
★★★	Copenhagen (Rykodisc, 1997)
★★★★	The Portable Galaxie 500 (Rykodisc, 1998)

Galaxie 500's dusted Boston dream-pop was one of the most influential sounds to emerge from the '80s rock underground. The band took off from reference points such as the usual third albums (Velvets, Big Star) and early New Order for a sound that was seductively drowsy and intimate: Dean Wareham's quavery voice and sparse guitar, Naomi Yang's reverberating bass, and Damon Krukowski's decidedly unrocking drums. Their excellent summer-of-'88 debut single "Tugboat"/"King of Spain" was a foretaste of *Today,* which featured "Temperature's Rising" and a cover of Jonathan Richman's "Don't Let Our Youth Go to Waste." But the Galaxie 500 sound really came together in the chamomile psychedelia of *On Fire,* their best album by far. The band hit a songwriting roll with moody ballads such as "Blue Thunder," "Tell Me," and "Strange." Yang sang haunting vocals on "Another Day," while "Leave the Planet" actually kinda rocked in that if-only-I-could-get-off-the-couch sort of way. The sound was lighter than air but melodically rich enough to float around your head, making *On Fire* an album that holds up—definitely one to break out every April.

This Is Our Music wasn't as strong as *On Fire,* with thinner melodies and an awful title, but it has worn well. Despite the excellence of songs such as "Fourth of July" and "Summertime," you can hear the trio competing for attention: There's only so long you can simmer before you either come to a boil or cool off. The band split acrimoniously, with boiler Wareham departing for Luna and the other two recording simmery albums as Damon & Naomi and Magic Hour. They also began a useful publishing venture, Exact Change Press, reprinting modernist classics such as Gertrude Stein's *Everybody's Autobiography. Copenhagen* documents a late-1990 gig, with some tasty guitar bits. As Galaxie 500's posthumous cult kept growing, Rykodisc reissued the original albums as well as a well-packaged complete-works box. It has an entire disc of uncollected material, including the B-side cover of New Order's "Ceremony," always a live favorite. The previously unreleased "The Other Side," an acoustic groover sung by Yang, stands as one of the most beautiful songs Galaxie 500 ever recorded. —R.S.

Gang of Four

★★★★★	Entertainment! (1979; EMI, 2001)
★★★	Gang of Four (EP) (Warner Bros., 1980)
★★★	Solid Gold (Warner Bros., 1981)
★★★★	Another Day, Another Dollar (Warner Bros., 1981)
★★★	Songs of the Free (Warner Bros., 1982)
★★	Hard (Warner Bros., 1983)
★★★★	A Brief History of the Twentieth Century (Warner Bros., 1990)
★★	Mall (Mercury, 1991)
★★★½	Shrinkwrapped (Castle, 1995)
★★★★★	100 Flowers Bloom (Rhino, 1998)
★★★	Solid Gold/Another Day, Another Dollar (EMI, 2004)

Oh, the burden of a university education! Gang of Four sprang up around England's Leeds University about the same time as the Mekons, the Au Pairs, and Delta 5, exhibiting a marked fondness for brittle, simplistic funk riffs; jagged, post-Hendrixian guitar noise; and a blunt, Marxist lyrical dialectic. But what kept the Gang of Four from slipping—at least at first—into the sort of postgraduate tedium such a formula suggests was a flair for propulsive, approachable pop and an understanding that the band's ideology should never supersede its musical values.

Entertainment! draws most of its energy from Andy Gill's slash-and-burn rhythm guitar, which uses feedback-singed shards of sound to cauterize the beat until the music is as abrasive as any punk without sacrificing rhythmic agility. Much as Talking Heads' David Byrne turned a white fan's gawky approximations of R&B into an alt-rock touchstone, so Gill's guitar—particularly as contrasted with the slick, disco-schooled pulse of bassist Dave Allen and drummer Hugo Burnham—opened new ground between punk and funk, thus making the whole early-'80s new-wave dance boom possible.

Earlier versions of this approach can be found on the *Gang of Four* EP, but *Solid Gold* downplays Gill in favor of Jon King's bland, hectoring vocals, making it a disappointment despite the rhythm section's valiant efforts. *Another Day, Another Dollar* pumps up the rhythm section even further while restoring Gill to his primacy; as a result, "To Hell with Poverty" stands as the group's finest moment. Unfortunately, bassist Dave Allen—the disco cover band vet who grounded the Gang's groove—left soon thereafter. Although *Songs of the Free* and *Hard* had their moments (such as "I Love a Man in a Uniform" from *Songs*), they were few and far between, as the Gang's efforts to spruce up its sound with slick production merely highlighted King's vocal inadequacies, particularly when framed against soulful backing vocals.

By the '90s, the Gang of Four became, effectively, a Gang of Two, as Gill and King soldiered on with a variety of rhythm sections and backing vocalists to diminishing audience response. This didn't soften the duo's politics; if anything, the songs on *Mall* and *Shrinkwrapped* were more pointedly dialectical than ever. *Mall* was undercut by the duo's inability to adapt to new rhythmic technology, but the guitar-centered *Shrinkwrapped* found something of the original fire returned to the group's sound. Since then, the group has disbanded, and King has left the music business entirely.

A Brief History is a choppy but well-chosen best-of drawn from the first five albums. It has since been superseded by the broader, more inclusive, and better-programmed *100 Flowers Bloom,* which condenses the whole of the band's career into a compelling and quite listenable package. —J.D.C.

Gang Starr

★★★	No More Mr. Nice Guy (Wild Pitch, 1989)
★★★★½	Step in the Arena (Chrysalis, 1991)
★★★★★	Daily Operation (Alliance, 1992)
★★★★½	Hard to Earn (Noo Trybe, 1994)
★★★½	Moment of Truth (Virgin, 1998)
★★★★½	Full Clip: A Decade of Gang Starr (Virgin, 1999)
★★★½	The Ownerz (Virgin, 2003)

Guru

★★★	Jazzmatazz, Vol. 1 (Chrysalis, 1993)
★★	Jazzmatazz, Vol. 2: The New Reality (Chrysalis, 1995)
★★	Streetsoul (Virgin, 2000)

Production maestro DJ Premier and wordsmith Guru have defied convention since Gang Starr's first album, *No More Mr. Nice Guy,* establishing the gold standard for high-quality hip-hop and career longevity. First, there's Premier, probably the most consistent and highly revered producer in hip-hop, making beats for Notorious B.I.G. and Jay-Z and virtually everyone in between. His production résumé includes hundreds of songs—some hits, some not. Guru made a big splash with his solo debut, the pioneering 1993 jazz-rap album *Jazzmatazz, Vol. 1.* The album is notable for introducing America to MC Solaar, the tongue-twisting African-French MC, though a newcomer can skip Guru's solo albums and go straight to the Gang Starr catalogue. Though the group's first release—which contained one of the first DJ cuts on a full-length hip-hop album—was not at all a shabby record, *No More Mr. Nice Guy* pales in comparison to their later releases, but that's only because those records that followed shone so brightly.

Released in 1991, *Step in the Arena* sounded far ahead of its time, both slick and raw, with an unassuming touch of jazz that avoided the clichés of groups such as Digable Planets. Guru stood out as an important MC because of his easy flow and wordy rappinghood, though his only weakness is that 15 years of rhyming experience didn't change or complicate his somewhat simple, monotone delivery. In the sonic context of later albums such as *The Ownerz,* which highlights how far Premier has come as a producer, Guru's rhyme style sounds somewhat antiquated, though that's part of its unpretentious charm. Provided with a bed of beats delivered by DJ Premier, Guru could rhyme from *Popular Mechanics* magazine and still sound hot.

Daily Operation delivered darker, denser atmospherics while still never losing touch with the funk; in the era of gangsta rap, this New York crew rewrote the hip-hop playbook. Premier proved that less is more on the stripped-down opening track, "The Place Where We Dwell," while the rest of the album continued in the inventive vein of its predecessor, though with more claustrophobic production. On *Hard to Earn,* it seemed they could do little wrong, though after this album Gang Starr began a slow slide from relevance, but not a dramatic or devastating one.

For any other group, *Moment of Truth* and *The Ownerz* would be career highs, but for Gang Starr they just didn't live up to their jaw-dropping 1991–94 run of albums. The group's best-of collection, *Full Clip: A Decade of Gang Starr,* is a great introduction, but they really deserve a much closer inspection than this collection of singles and near-misses serves up. —K.M.

The Gap Band

★★	The Gap Band (Mercury, 1977)
★★½	The Gap Band II (Mercury, 1979)

★★★	The Gap Band III (Mercury, 1980)

★★★	The 12" Collection (Mercury, 1986)
★½	Straight From the Heart (Total Experience, 1987)
★★	Round Trip (Capitol, 1989)
★★★	Best of the Gap Band (Mercury, 1994)
★★	Testimony (Rhino, 1994)
★★	Ain't Nothin' but a Party (Rhino, 1995)
★½	Y2K: Funkin' Till 2000 Comz (Big Trax/ Mercury, 1999)
★★★★	The Ultimate Collection (Hip-O, 2001)
★★	Love at Your Fingertips (Ark 21, 2001)
★★	Original Artist Hit List (Intersound, 2003)
★★½	Gap Band '80s: The Best of the Gap Band (Varèse, 2003)

So what if the Gap Band's best ideas are generally just P-Funk rip-offs? Originality has always played second fiddle to groove in dance music, and that goes double for this crew. Consisting of brothers Ronnie, Charles, and Robert Wilson, the Gap Band had a handful of solid (if slightly goofy) funk hits spread across its first three albums, including "I Don't Believe You Want to Get Up and Dance (Oops!)" from *The Gap Band II* and "Burn Rubber on Me (Why You Wanna Hurt Me)" from *The Gap Band III,* which also includes the Isley Brothers–style ballad "Yearning for Your Love." But it was *Gap Band IV* that made the group's reputation, stretching as it does from the rhythmic insistence of "Early in the Morning" and "You Dropped a Bomb on Me" to slow and soulful songs such as "Stay With Me" (a thinly veiled rewrite of the Orleans hit "Dance With Me") and "Outstanding."

It's downhill from there, though. *The Gap Band V* does at least deliver a serviceable groove with "Party Train," but *Gap Band VI* begins to fall back on stuff such as "Beep a Freak," which seems derivative even by this band's secondhand standards. *Gap Gold* is the first of many best-ofs, each of which tries hard to make the same old songs seem worth buying again (*Ultimate Collection* offers the best value for money). The rest merely chronicle the Gapsters' slow march to irrelevance. —J.D.C.

Garbage

★★★	Garbage (Almo Sounds, 1995)
★★★★	Version 2.0 (Almo Sounds, 1998)
★★★★	Beautiful Garbage (Interscope, 2001)

A Scottish "supervixen" fronting a band of considerably older Wisconsin rock veterans, Shirley Manson was the ideal embodiment of pop-star-as-one-night-stand on *Garbage*'s debut: sleek, wicked, asking nothing but a reciprocation of her icy lust. Teasing "You can always pull out if you like it too much," Manson offered all the ego boost of attracting your own private stalker without the messy reality of late-night phone calls and restraining orders. Like Manson's lip-licked poses, the cold trickery of the electroid guitar hooks masterminded by *Nevermind* producer Butch Vig flaunted their tawdry disposability. Who could resist? The band hit big with Manson's difficult-woman anthem "Only Happy When It Rains" and the dismissive "Stupid Girl." With *Version 2.0,* Vig increased the density of the debut's dance-rock beats with chilly slabs of electronic sleaze, hitting again with "Push It."

Beautiful Garbage found Manson vamping less and sulking more, and still remaining coldly clinical with her interpretive approach; even the girl-group facsimile "Can't Cry These Tears" is an homage more to Blondie than to the Shirelles. By now many young rockers were starting to copy Blondie themselves, though, and Garbage's version of new wave—from a band that could remember the real thing—seemed a little dated. —K.H.

Jerry Garcia

★★★★½	Garcia (Grateful Dead, 1972)
★★	Garcia (Compliments of Garcia) (Grateful Dead, 1974)
★★	Merl Saunders, Jerry Garcia, John Kahn, Bill Vitt: Live at Keystone (Fantasy, 1973)
★★½	Reflections (Round, 1976)
★★½	Run for the Roses (Arista, 1982)
★★★	Almost Acoustic (Grateful Dead, 1988)
★★★½	Jerry Garcia Band (Arista, 1991)
★★★	Don't Let Go (Arista, 2001)
★★★½	Shining Star (Arista, 2001)
★★★½	All Good Things: Jerry Garcia Studio Sessions (Rhino, 2004)

with David Grisman

★★½	Jerry Garcia/David Grisman (Acoustic Disc, 1991)
★★½	Not for Kids Only (Acoustic Disc, 1993)
★★½	Shady Grove (Acoustic Disc, 1996)
★★★	So What (Acoustic Disc, 1998)
★★★	Been All Around This World (Acoustic Disc, 2004)

with David Grisman and Tony Rice

★★★	The Pizza Tapes (Acoustic Disc, 2000)

Sounding very like the mellower Grateful Dead, Jerry Garcia's solo work is pleasant and unremarkable. In combination with Dead lyricist Robert Hunter, he turned out well-crafted fare—his vocals capable, his guitar, as always, understated and stunning. His first two efforts are the Deadest, very akin to that band's *American Beauty. Garcia* is the essential album, boasting songs such as "Sugaree" and "To Lay Me Down," which went on to become Dead staples. On the Dead's label, the live *Almost Acoustic* is delightful; a folk quintet tackles such Dead classics as "Casey Jones" and "Ripple." The aggregation Deadheads dubbed "the Jerry band" debuted with *Jerry Garcia Band,* a live double album featuring Garcia's expert dueling with organist Melvin Seals. *Don't Let Go* features JGB, again in concert, at their strongest and supplest. *Shining Star* collects the best of the outfit—and their range of covers is startling, from Dylan to Irving Berlin to the Stones.

Jerry Garcia/David Grisman initiated a remarkably productive alliance between Garcia and legendary mandolinist Grisman. *Shady Grove* offers the finest of their trad blues and ballads, *So What* finds them turning jazzward, and *The Pizza Tapes,* with second guitarist Tony Rice, presents a very relaxed and charming Garcia. —P.E./N.B.

Art Garfunkel

★★★	Angel Clare (Columbia, 1973)
★★★	Breakaway (Columbia, 1975)
★★★★	Watermark (Columbia, 1977)
★★	Fate for Breakfast (Columbia, 1979)
★★	Scissors Cut (Columbia, 1981)
★	Lefty (Columbia, 1988)
★★★	Garfunkel (Columbia, 1990)
★★	Across America (Hybrid/EMI, 1997)
★★	Songs from a Parent to a Child (Sony Wonder, 1997)
★★★	Everything Waits to Be Noticed (EMI/Manhattan, 2002)

On his own, Art Garfunkel exhibits many of the same strengths that marked his work with Paul Simon—an angelic tenor voice, a fine sense of understatement and subtlety, and a genius for harmony vocals. Unfortunately, that's not enough to support a solo career, and without a strong creative voice to play off, Garfunkel's albums end up seeming as empty as they are pretty. *Angel Clare* is all too typical. When given good material, such as Randy Newman's "Old Man" or Van Morrison's "I Shall Sing," Garfunkel is in his element, but when the material slips, as on "Mary Was an Only Child," so does the value of his performance. *Breakaway* keeps that from being a problem, thanks to a soaring rendition of Stevie Wonder's "I Believe (When I Fall in Love It Will Be Forever)" and the aching "99 Miles From L.A." There's even a Simon and Garfunkel reunion on "My Little Town."

Watermark is the high point of Garfunkel's solo career. Built around a Jimmy Webb song cycle, its evocation of longing and loss makes it a perfect vehicle for Garfunkel's voice (even though the cover of Sam Cooke's "[What a] Wonderful World," cut with Paul Simon and James Taylor, was the only hit).

Beyond that, Garfunkel's recordings are pretty much fans-only affairs. *Fate for Breakfast* is a slick and unsuccessful attempt at mainstreaming Garfunkel's sound; *Scissors Cut* is too dull to leave a mark; *Lefty* strikes out; and *Garfunkel* proves only that a greatest-hits package is not necessarily the same thing as a best-of album. No surprise, then, that the singer went on hiatus, returning in 1997 for *Across America,* an oldies-dependent live album that reminds us why the duo was billed as Simon and Garfunkel and not the other way around (though the duet with Taylor on "Cryin' in the Rain" is unexpectedly poignant), and *Songs from a Parent to a Child,* a must-hear for those wondering how well Garfunkel harmonizes with his young son. Still, it may be premature to write him off, as *Everything Wants to Be Noticed* convincingly evokes the wistful charm of his early albums as it explores the difficulties of late-life romance. A bit more of this, and Garfunkel may yet earn a reputation that doesn't depend on an ampersand. —J.D.C.

★★ Love Songs (Sony/Legacy, 2003)
★★★★ Love Songs—Greatest Duets (Motown, 2003)

From R&B star and soul-music giant to pop icon, the stature of Marvin Gaye has risen steadily over the years. Others had greater vocal range; there were certainly better performers (Marvin never did fully vanquish his stage discomfort); and for one who is regarded as a creative visionary, his genius often needed to be kick-started by collaborators. Yet few artists in any genre can approach Marvin Gaye's breadth of accomplishment. Following the failure of an album of standards aimed at establishing him as a black Sinatra, Gaye submitted to the conventional Motown hit-making machinery. (He would never lose his desire to become a "serious" singer, as evidenced by his affectionate 1965 tribute to Nat "King" Cole.) His first couple of successes, "Stubborn Kind of Fellow" and "Hitch Hike," were not at all how he saw himself, but they got him in the door and on the charts.

Most of Gaye's early albums are out of print, but the string of hits he recorded between 1962 and '69 with the label's bottomless pool of writers and producers—including Smokey Robinson ("Ain't That Peculiar"), Holland-Dozier-Holland ("You're a Wonderful One"), and Norman Whitfield ("I Heard It Through the Grapevine")—made him Motown's premier male singer and have been the basis of countless compilation packages. What impresses is not only the endless excellence of Motown's production line, but the ease with which Gaye's voice accommodated the very different demands of each piece, from the gospel exhortations of "Can I Get a Witness" to the breezy swing of "How Sweet It Is (To Be Loved by You)." He maintained a parallel and almost equally successful career as a singer of romantic duets with labelmates such as Mary Wells ("What's the Matter With You Baby"), Kim Weston ("It Takes Two"), and his most significant other, Tammi Terrell ("Ain't No Mountain High Enough"). *Greatest Duets* collects the highlights of all his associations (except, curiously, "Ain't No Mountain"), including a session with gospel singer Ona Page. *The Complete Duets* gives you everything recorded by Gaye and Terrell, arguably the most romantic singing partnership in pop history. (After Terrell's death, Marvin vowed he'd never sing with another partner. Judging by his tepid 1976 album with Diana Ross, it was a vow he should have kept.)

Having worked all these wonders, Marvin Gaye then did something no other Motown artist had ever dared. With *What's Going On* (1971), he committed a revolution. Although it spawned three hits—the antiwar title song, the ecological plea "Mercy Mercy Me," and "Inner City Blues"—this was Motown's first true *album*. Its blend of unembarrassed spirituality and unflinching social realism, as well as relentless percussion set against lush orchestration, was unlike anything that came before it in both form and content. For Gaye, it was a self-produced declaration of independence. (The 2001 *Deluxe Edition* adds an earlier and substantially different mix and a rare live performance of the album from 1972.) After a detour to score the film *Trouble Man,* he followed his masterpiece with the almost equally magnificent *Let's Get It On* in 1973. From the title-track opener to the closing "Just to Keep You Satisfied," it is as unashamedly sexual as its predecessor is spiritual. (Its *Deluxe Edition* bonus disc illuminates Marvin's many false starts with multiple collaborators before he settled on the final framework.)

I Want You boasts the seductive title song and "After the Dance" but is otherwise slight, a disappointment after the twin peaks of *What's Going On* and *Let's Get It On. Live* is from a 1974 concert that was his first in two years, and it shows, though the sparks that fly on "Distant Lover" are eternal. *Live at the London Palladium* catches a better show and contains the 12 studio minutes of "Got to Give It Up," proof positive that disco and genuine soul could coexist in a single slab of wax. *Here, My Dear* (1978) was not a successful album saleswise, but it may be his most fascinating. Forced to give up the royalties to his ex-wife in their divorce settlement, Gaye's album brutally chronicles the breakdown of the marriage—no hits, but plenty of bruises. After a European exile and a divorce from Motown, he reappeared in 1982 with *Midnight Love* on Columbia. Its slinky single "Sexual Healing" intertwines his two major themes—sex and salvation—and is as seductive as anything in Marvin's overstuffed little black book of song. That said, the rest is smooth and superficially pleasing but leaves little lasting impression. What was a welcome comeback would prove to be his final album.

Since the tragic shooting death of Marvin Gaye in 1984, collections, compilations, and unissued material have rained down on an apparently insatiable marketplace. Steer clear of the countless packages of bootleg-quality live material drawn from his erratic 1983 comeback tour, issued under titles like *Greatest Hits Live, Performance,* and *In Concert.* Even the best of these, *The Final Concert,* offers only marginally improved sound on a performance that is charitably characterized as adequate. *Super Hits* is not the wonderful 1970 Motown collection, now deleted, but a budget set of *Midnight Love* material. There are no less than three packages trading under the title *Love Songs:* 1) the aforementioned *Greatest Duets;* 2) a Sony comp that again reshuffles the *Midnight Love* material; and 3) *Love Songs: Bedroom Ballads,* assembled by biographer David Ritz to combine the singer's most amorous slow songs with the handful of standards arranged for Gaye by Bobby Scott (previously available as *Vulnerable*). In the same vein as the Ritz collection—imagine an update of Jackie Gleason's '50s albums of makeout music—is *Romantically Yours,* which was compiled by Marvin's mentor and sometime producer Harvey Fuqua.

Love Starved Heart is a true rarity: an album of vault material that doesn't waste your time; Gaye rivals Bob Dylan in the quantity of quality material left on the shelf. *Every Great Motown Hit of Marvin Gaye* ain't all that, but its 17 songs make it an acceptable sampler; ditto *18 Greatest Hits,* but *I'll Be Doggone* is just a Motown mishmash. The two best-of volumes in the *Millennium Collection* series, split between the '60s and '70s, contain only 11 songs each. Pick of the litter is the two-CD *Very Best of Marvin Gaye,* though it is not quite up to the double *Anthology* it replaced in the catalogue. The 1995 four-CD set *The Master* is excellent, as well as being a marked improvement over a botched box attempt earlier in that decade. But in the eight years since its release, so much worthy music has been unearthed that a rethink may be in order. Every time they measure Marvin Gaye for a monument, he's grown a few more inches. —B.E.

Gloria Gaynor

★★	I Am What I Am (Hot, 1996)
★★	The Best of Gloria Gaynor (PGD Special, 1997)
★★★	I Will Survive: The Anthology (Polydor, 1998)
★★	The Fabulous Voice of Gloria Gaynor (BCI, 1998)
★★	Best of Gloria Gaynor (Cleopatra, 1999)

Although Gloria Gaynor sang R&B during the early to mid-'70s, once she lent her magnificent voice to the late-'70s disco hit "I Will Survive," she became known for little else. Most of her still-available records are compilations—all of them essentially various record labels' attempts to keep "I Will Survive" in circulation—and on them, Gaynor always sings well. But she never sings as pertinently as she did on the song that became an anthem of freedom and self-empowerment for millions of dance-obsessed listeners. —A.B.

★★★★	Houseparty: The J. Geils Band Anthology (Rhino, 1992)

"Take out your false teeth, mama . . . I wanna SUCK on your GUMS." With these gentle words, the J. Geils Band's frontman, Peter Wolf, seared himself onto rock history, and his henchmen took their place as the finest Jewish blues-rockers ever to do the Boston Monkey. The J. Geils Band had a lean, mean approach to old-school R&B, blasting through John Lee Hooker and Otis Rush classics in a completely nonacademic way, making everything sound tough and crass and ironic. Wolf, the self-proclaimed "Woofa Goofa with the Green Teeth," made David Lee Roth seem like the shy type; Magic Dick played the harmonica; in album-cover photos, the entire band dissolved into one giant Jewish Afro with shades; and naming the band after the nonsinging guitarist (who could barely play) was *so* rock & roll. The Geils gang didn't do much songwriting at first, covering obscure blues and soul treasures instead, though the 1973 hit "Give It to Me" was a freaky seven-minute move into early reggae. But *Full House* (source of the aforementioned "false teeth" patter) proved that J. Geils could rip it up live, from "First I Look at the Purse" to the pounding finale, "Looking for a Love." The Magic Dick showcase "Whammer Jammer" became the "Smoke on the Water" of the harmonica.

Nightmares was the best of the early J. Geils studio albums, with the house party "Stoop Down #39," the stoopid-fresh "Detroit Breakdown" (for some reason, Boston bands are always obsessed with Detroit), and the breakup ballad "Must of Got Lost." The double-live *Blow Your Face Out* had a classic live version of the latter, beginning with a long preacherly rap from Wolf ("this is a song about L-O-V-E and if you abuse it, you're gonna lose it, and if you lose it, you ain't gonna be able to choose it," etc.), and whomping renditions of "Love-Itis" and "Where Did Our Love Go?" But J. Geils was starting to mature, calling itself just "Geils" on the cover of *Monkey Island* as Wolf recited a nine-minute poem about alienation in the title track. *Sanctuary* was even tougher, with the touching "I Don't Hang Around Much Any More," the Italian-girl-worshipping "Teresa," the manic "Jus' Can't Stop Me," and the confusing but kind-of-intense title anthem.

Sanctuary was so damn good, it seemed that J. Geils would never be able to match it, but to everyone's surprise, the band bought a synthesizer and promptly became 10 times bigger than ever. Not with a pop sellout, either: "Love Stinks" was one of the great trash-rock singles of the '80s, with a three-chord riff that later showed up as "Smells Like Teen Spirit." The album added the rollicking "Till the Walls Come Tumbling Down," the failed Eurodisco experiment "Come Back," and the Firesign Theatre rip "No Anchovies, Please." *Freeze Frame* updated the band's rock attack with arty synth-funk beats, resulting in a couple of huge singles ("Freeze Frame," "Centerfold") and a hit album that bridged traditional rock, new wave, punk, disco, and slick pop. The best was the finale "Piss on the Wall," where Wolf pondered the nature of reality: "Some people say the world ain't what it is/All I know is I just got to take a whizz."

Unfortunately, after years of white-knuckling it to the top, the band responded to mainstream success by kicking out Peter Wolf. Keyboardist Seth Justman took over the vocals for *You're Getting Even While I'm Getting Odd,* one of the most disastrous followups in music-biz history, a career ender for everyone involved. (Chili Peppers fans take note: It did include a song called "Californicating.") Wolf went on to solo success, but J. Geils fans still wept for what might have been. *Showtime!* was the band's third and weakest live album. *Flashback* is a flimsy best-of from the band's three big EMI albums; the two-disc *Houseparty* is a much better compilation of both early and late J. Geils. But the best places to start are the Atlantic collections *Best of,* with the bowling pins on the cover, and *Best of Two,* which has classic album tracks such as "Stoop Down #39" and "The Lady Makes Demands." —R.S.

Generation X

★★★½	Perfect Hits 1975–1981 (Chrysalis, 1991)

Thanks to the '80s pop-rock career of singer Billy Idol, nobody ever believes that Generation X were present-at-the-creation London punks. But there they were, along with the Pistols, the Damned, and all the rest. They weren't founding fathers by any stretch, with their fat hooks and a willingness to cover Lennon's "Gimme Some Truth" on their excellent (no, really) pop-punk debut. Punk bands may worship fellow pop-punk visionaries such as the Buzzcocks, and even Stiff Little Fingers get a nod or two. But when was the last time you heard a punk band cover Generation X?

These days, their stock is so low their proper albums are available only as imports. Then again, *Perfect Hits* is all you ever need, including iPod-worthy singles such as "Wild Youth," "Your Generation," and "Ready, Steady, Go," a version of "Dancing With Myself," Idol's brilliant ode to whacking off, and the genuinely groundbreaking "Wild Dub," maybe the very first time a punk band turned punk into reggae, a stunt that would happen *a lot* on both sides of the pond over the next thirty years. —J.G.

Like Rodney Dangerfield, Genesis has had a hard time getting respect. In the early '70s, when the group specialized in ambitious, theatrical story-songs, it attracted an avid cult following but was largely ignored by the rock press and public at large. Later in the decade, lead singer Peter Gabriel was finally recognized as a major talent—but only after he'd left the band, who were at this point being derided as middlebrow throwbacks still in thrall to the pomposities of art rock. Even in the early '80s, when Genesis did finally shed its art-rock inclinations and move toward pop, becoming international stars in the process, the press was unimpressed, dismissing the group as easy-listening lightweights. By the '90s, even the solo success of members Phil Collins and Mike Rutherford was being held against the group, by then one of the best-known rock acts in the world.

All of which, to be honest, has been grossly unfair to the group. Granted, Genesis has made its share of mediocre albums—perhaps even more than its share, considering how long the band has been around. But bad albums? None to speak of.

In fact, the worst that can be said of the group's early albums is that they sound dated, almost quaint. *From Genesis to Revelation* seems laughably "mod" at points—for instance, the jazzy, bongo-spiked intro to "The Serpent"—but that hardly takes away from the genuinely tuneful quality of the songs. Genesis was hardly a band when this was recorded, however, and it isn't until *Trespass* that we get any real sense of what this band has to offer. Unfortunately, it's something of a mixed bag. At their best, the lyrics are grippingly mythic, but too often Gabriel's wordplay loses its way in a forest of puns and self-conscious allusions; likewise the music, although often potently melodic and making nice of use of Tony Banks' semiorchestral approach to keyboards, is frequently sidetracked by too-busy arrangements and needlessly ornate embellishments.

That was pretty much the pattern for the band's early albums, though. *Nursery Cryme,* for instance, offers Grimm play with Mother Goose tales in the 10-minute "Musical Box," while *Foxtrot* concludes with the marathon "Supper's Ready," an ambitious, inscrutable 23-minute suite built around such titles as "Apocalypse in 9/8 (co-starring the delicious talents of Gabble Ratchet)." Stilted as this stuff sometimes sounded in the studio, it did have an edge in concert; indeed, the performances on *Genesis Live* are enough to make even the most skeptical listener reconsider the value of "The Return of the Giant Hogweed." But "edge" wasn't really what this band was looking for, and so *Selling England by the Pound* continues Genesis' journey into the conceptual, flanking blissfully melodic material such as "I Know What I Like (in Your Wardrobe)" with the self-consciously clever "Dancing with the Moonlit Knight" and its ilk. No wonder, then, that the group's masterpiece move—an intensely abstruse double album entitled *The Lamb Lies Down on Broadway*—is both brilliant and overblown, with moments of genuine majesty and long stretches of pointless obscurantism.

Gabriel left at this point, and Genesis auditioned hundreds of singers before finally deciding on Collins, who had been drumming with the group since *Trespass* (and who, in fact, had already sung lead on "More Fool Me," from *Selling England*). It was a canny choice, for Collins, though obviously possessing a voice of his own, sounded enough like Gabriel to ensure a smooth transition for the band. Even so, it isn't Collins' voice that makes *A Trick of the Tail* a turning point for the band—it's the writing. Instead of showcasing the band's cleverness, this album puts the emphasis on the music, unveiling an unexpected gift for close-harmony singing in "Entangled." *Wind and Wuthering* expands the band's musical palette still further; typical is the droll clockwork effect that crops up during an instrumental segment of "One for the Vine." More telling, though, is the ballad "Your Own Special Way," a gorgeously lilting love song that seems a harbinger of the band's pop-friendly future.

Indeed, after *Seconds Out*—a concert double album apparently intended to prove that Collins and company could handle the band's back catalogue—the band made a genuine pop breakthrough with . . . *And Then There Were Three.* With guitarist Steve Hackett gone, Genesis' studio lineup is reduced to just Collins, Banks, and Rutherford, and while that doesn't noticeably affect the band's instrumental mix, it does hone the playing so that there's less empty flash and wasted energy. At this point, the songs are the focus, and while that doesn't prevent the band from showing off any (note the odd-metered rhythms of "Down and Out"), it does add power to character songs such as "Say It's Alright Joe" and gave the band its first U.S. pop success, through the winsome, upbeat "Follow You, Follow Me." *Duke* and *ABACAB* further enhance the group's pop reputation—the former through "Misunderstanding," a simple, poignant broken-heart song that brings Collins to the fore as a writer, and the latter through "No Reply at All," a surprisingly complex composition that leaves the band plenty of playing room yet maintains strong melodic content. Unfortunately, these pop-oriented efforts are followed by *Three Sides Live,* a double album that's mostly live and totally tedious.

It hardly mattered, though, for by this point the band's superstar status had been established beyond the shadow of a doubt, and both *Genesis* and *Invisible Touch* merely seemed to confirm its popularity. And not without reason, either, as both are sublimely melodic, producing hits as effortless and idiosyncratic as "That's All" (from *Genesis*) and "Tonight, Tonight, Tonight" (from *Invisible Touch*). But *We Can't Dance,* despite its strong pop inclinations, finds the band trying to reclaim some of its old turf, a move that works surprisingly well, thanks to tuneful-but-extended numbers such as "Driving the Last Spike" and "Fading Lights."

Collins left Genesis after the *We Can't Dance* tour, and Genesis stalled for time by releasing two live albums—one of "short" pop hits, the other of "long" art-rock chestnuts—before finally deciding to move on without him. Scots singer Ray Wilson, formerly of the little-known prog-rock band Stiltskin, was drafted by Banks and Rutherford to take Collins' place. Had he come in after *Foxtrot,* Wilson would have made for a smooth transition, but given the pop expectations engendered by Collins' tenure, his succession was deemed a failure, and Genesis slipped quietly into oblivion. Not that interest in the band evaporated, and *Genesis Archives, Vol. 1* offered an olive branch to older fans by bringing back both Peter Gabriel and Steve Hackett to recut tracks from rare live recordings. *Vol. 2* also relied mainly on live recordings, but without the advantage of reworked performances, it held only marginal interest. —J.D.C.

When Rick Rubin happened upon them in 1990, Houston's Geto Boys were poised to fill a void the mainstream didn't know it had yet: shock rappers. At the time, a couple of artists had raised hackles in the world outside of hip-hop, but the Geto Boys' seeming lack of a taboo zone marked them as troublemakers before they could even get much momentum. The Rubin-produced *Geto Boys*—a slight reworking of their *Grip It! On That Other Level* album—was packed with absurd, sometimes galling tracks ("Mind of a Lunatic," "Trigga Happy Nigga"). So shocking was the music at the time that Rubin was forced to seek alternate distribution for the project.

The controversy had a perhaps unexpected effect on the Boys: On their next album, *We Can't Be Stopped,* they became unlikely first-amendment crusaders. The title track decried the perceived hypocrisy that led to the group's virtual banning, and "Fuck a War" showed they had political ambition beyond their own personal interests. The cover of *Can't Be Stopped*—a snapshot of Bushwick Bill in the hospital after his girlfriend shot out one of his eyes—attracted as much attention as the content, a collection of morbid, gruesome street tales, including "Mind Playing

Tricks on Me," one of the classics of the genre that showed the seamy underbelly of street life rather than celebrating its spoils. This was their free speech—potent, but potentially costly. After *Stopped,* the group never again released a top-flight album (though *The Resurrection* was a strong effort).

It wasn't more than three years into his career as a Geto Boy before Scarface, né Brad Jordan, decided he needed to branch out. Face was already the ringer in the crew—Willie D was a loose cannon, and Bushwick Bill's physical novelty often outshone his rapping. In the same year that *We Can't Be Stopped* was released, Face dropped his solo debut, *Mr. Scarface Is Back,* and managed to outdo the work he had done with the rest of the group. "Murder By Reason Of Insanity" was vividly unhinged, and on "Good Girl Gone Bad" and the stellar "A Minute to Pray and a Second to Die," Face honed his greatest talent: serving up unglamorous, economical storytelling packed with sympathy and heart. The humanity continued on his third solo album, aptly titled *The Diary.* "I Seen a Man Die" is up there with Face's most psychologically illuminating work, and Ice Cube showed up to pay his respects to his Southern counterpart on "Hand of the Dead Body."

For two solo albums, Face floundered, but with 2002's *The Fix,* Scarface once again proved himself to be a rap music pioneer. This time out, though, the demographic ground he broke wasn't geographic, but age based. For the first time in rap music, the aging gangster became an acceptable character archetype. While scores of younger rappers viewed their careers as a means to financial and personal ends, Face put his history of clear-eyed social criticism to work, delivering an album both tangibly wistful ("Guess Who's Back" featuring Jay-Z and Beanie Sigel) and impossibly world-weary ("Someday," "Heaven"). Unlike other rappers who retire in clunky fashion, Face has been the first to find a way to age gracefully, growing wiser with experience and turning it into great art.

Both Bushwick Bill and Willie D have had solo careers, though neither one has produced particularly distinguished output. Willie D also made a name for himself as a boxer in the late '90s. —J.C.

Get Up Kids

★★	Four Minute Mile (Doghouse, 1997)
★★★★	Something to Write Home About (Vagrant, 1999)
★★½	Red Letter Day/Woodson (Doghouse, 2001)
★★½	Eudora (Vagrant, 2001)
★★★	On a Wire (Vagrant, 2002)
★★★½	Guilt Show (Vagrant, 2004)

With their bouncy name and their middle America hometown (Kansas City, MO), the Get Up Kids embody the clean-cut, nerdy side of the emo subculture. But the Get Up Kids actually only made one true emo bill. On 1999's *Something to Write Home About,* the quintet balanced its earnest romanticism between lurching punk and yearning pop, representing the genre as gracefully as the Promise Ring, Saves the Day, or any other late-'90s emo icon, while also reaching out for something bigger.

Until then, the Kids' talents had been of interest mostly to those who shared their adenoidal awkwardness. Listen closely to 1997's *Four Minute Mile* and you'll hear evidence of a budding talent for memorable melodies and riffs, especially on "Don't Hate Me," which not only features an instantly catchy chorus but also encapsulates how passive-aggressive sensitive young men can be ("Oh Amy don't hate me/For running away from you"). But that evidence is buried among lots of weedy, off-key laments wailed over fast and familiar punk rock. *Eudora* collects all the vinyl singles and compilation cuts of those early years, and although it's less coherent than *Four Minute Mile,* the disc's eclectic covers—from New Order to the Replacements to Mötley Crüe—add a welcome jolt of unpredictability. The *Red Letter Day/Woodson* set offers two EPs separated by three long years of growth, and although 1999's *Red Letter Day* demonstrates a huge leap in songwriting ability from the earlier *Woodson,* it's still hampered by amateurish production. The Get Up Kids found the right sound only by moving to Vagrant for *Something to Write Home About,* and the album's critical and commercial success in turn transformed the struggling label into an indie-rock powerhouse. After grueling tours with arena acts such as Weezer, however, the band retreated in 2002 with *On a Wire,* an album that leaves behind emo's earnest pleading for the comforts of straight pop-rock. Tracks such as "Overdue" and "Walking on a Wire" are gorgeous, but they don't make up for the loss of the group's youthful, punky punch. With 2004's *Guilt Show,* however, the Kids proved themselves all grown up and ready to look beyond their own navels, especially on tracks such as the anti-imperialist plea "Holy Roman" and the twinkling portrait of a dull life, "Martyr Me." Despite a few missteps, their newly confident pop rock is something to write home about again. —F.S.

Ghostface Killah

★★★★	Ironman (1996; Epic/Razor Sharp, 2001)
★★★★	Supreme Clientele (Epic/Razor Sharp, 2000)
★★★★½	Bulletproof Wallets (Epic, 2001)
★★★½	Shaolin's Finest (Epic, 2003)
★★★★	Pretty Toney (Epic, 2004)

The Wu-Tang Clan's best MC, Ghostface Killah developed a narrative style that's deeper, denser, and wittier than any of his groupmates'—and just about any gangsta rapper's, for that matter. Ghostface had it from the start of his solo career: *Ironman* combined the RZA's most soulful production to date with torrents of imagery and eddies of observation, a stream of consciousness funneled through back alleys, gun barrels, and big dicks. (Ghost's guest-spots on Raekwon's classic 1995 debut, *Only Built 4 Cuban Linx,* promised as much.) On "260," which slides in with wagging horn figures and soul-man sighs, Ghostface turns a mundane botched robbery into a grand tragedy.

Sparkling and brassy, *Supreme Clientele* showcases a slightly more self-conscious storyteller swinging from skyscraper-size hooks. After each gymnastic verse in album-opener "Nutmeg," Ghostface lets the dramatic disco-stringed chorus run, taunting not just lesser MCs but every listener in awe of his verbal backflips and rolls: "Yeah! See what I mean, you motherfuckin' crybabies? Get in line, punk." *Bulletproof Wallets* (officially featuring Raekwon) was somewhat derided as a commercial move, and sure enough, every song lunges for the ear. The mostly no-name producers cut can't-go-wrong samples into supple, hard-driving loops and polish it all to a gleam. The tinkly, insistent cowbell in "Flowers" cuts through string-section swoops while Ghostface and Method Man soft-shoe along with it. "Never Be the Same Again," featuring a mournful Carl Thomas, is the most sentimental of Ghostface's "cry" songs, yet this long goodbye to a cheating lover flits so realistically from regret and anger to bewilderment that the trickling sap is fully justified.

Choppy, blaring, and shape-shifting, *Pretty Toney* makes peculiarly effective use of its vintage R&B lifts. A couple of the best cuts are brief experiments billed as skits: "Last Night" sketches an evening that starts with deviant sex and ends with an unanswered call; a phone rings incessantly over a dusty throwback break. In "Keisha's House," Ghost recalls a wet summer night in which he drinks on the stoop, takes a shit in his friend's bathroom, and gets horny looking at every woman except the one he's with; the sampled song could be a boom box playing in the background. In the end, he goes home with his girlfriend. —N.C.

Jimmie Dale Gilmore

★★★	Fair & Square (Hightone, 1988)
★★★	Jimmie Dale Gilmore (Hightone, 1989)
★★★★½	After Awhile (Elektra/Nonesuch, 1991)
★★★★	Spinning Around the Sun (Elektra, 1993)
★★★★	Braver New World (Elektra, 1996)
★★★½	One Endless Night (Rounder, 2000)

There are those who call Jimmie Dale Gilmore's voice an acquired—or impossible to acquire—taste. But don't trust them. Out of all the artists to spring out of the unlikely town of Lubbock, Texas—a heady list including Buddy Holly, Waylon Jennings, Delbert McClinton, and Gilmore's fellow Flatlanders bandmates Joe Ely and Butch Hancock—Gilmore's high, wispy vibrato is the voice that best captures the lonesome wail of the West Texas wind, the peal of a pedal-steel guitar ringing through an old honky-tonk, and the ghost of Hank Williams shooting across the desert sky from a border radio tower. Matched with the right song, it can be an instrument of otherworldly beauty . . . or at the very least, straightforward hillbilly bliss. The traditional country stylings of *Fair & Square* and *Jimmie Dale Gilmore* both fall into the latter category, as Gilmore plays it safe by sticking to the tried-and-true, keep-'em-dancing Lefty Frizzell playbook. The song choices are hit and miss; his shuffling take on Ely's bittersweet "Honky-Tonk Masquerade" *(Fair & Square)* borders on hokum, but his own "Dallas" *(Jimmie Dale Gilmore)* is definitive, and his spin through Hancock's comic "Red Chevrolet" is a hoot. Both albums, however, fail to distinguish Gilmore as an artist with a unique vision.

After Awhile—and pretty much everything in its wake—changed that. While still undeniably drawing from classic country influences, *After Awhile* finds Gilmore liberated from the strictures of a dancehall stage, free to serve song over form in the spirit of a folk artist rather than an entertainer. It's also the first of his albums to showcase his strength as a writer as well as a singer—Gilmore wrote every song but one, among them "Tonight I Think I'm Gonna Go Downtown," "Treat Me Like a Saturday Night," and "Chase the Wind," vaulting him into the ranks of some of the Lone Star state's finest troubadours. *Spinning Around the Sun* is less intimate but no less beautiful, featuring another handful of sterling Gilmore originals, a pair of ace Hancock tunes, and, courtesy of songwriter A. B. Strehli Jr.'s exquisite "Santa Fe Thief" and its opening line, "Oh the townhouse warbler lives far apart in a song," the finest marriage of song and voice of Gilmore's career. The T-Bone Burnett–produced *Braver New World,* meanwhile, lives up to its title, with Gilmore singing over rivers of shivery electric guitar on atmospheric beauties like "Borderland" and rocking out on "Headed for a Fall" (among his best originals) and "Outside the Lines," which sounds something like Roy Orbison fronting Doug Sahm's Tex-Mex Sir Douglas Quintet. Like Gilmore's voice itself, the results are weird and wonderful. *One Endless Night* could stand a few more risks. Despite an exemplary cover of John Hiatt's "Your Love Is My Rest" and some left-field picks (the Grateful Dead's "Ripple" and, in the spirit of Willie Nelson's *Stardust,* "Mack the Knife"), the return to more folksy, familiar territory distinguishes it as Gilmore's safest album in a decade—and by extension, his weakest. That said, it's still head and shoulders over just about anything you'll hear on mainstream country radio. —R.SK.

Gin Blossoms

★★	Dusted (1989; Bakman, 2002)
★★★	Up and Crumbling (EP) (A&M, 1991)
★★★½	New Miserable Experience (A&M, 1992)
★★★	Congratulations . . . I'm Sorry (A&M, 1996)
★★★½	Outside Looking In: The Best of the Gin Blossoms (A&M, 1999)
★★★	The Millennium Collection (A&M, 2003)

In 1987, R.E.M. was rising to superstardom; most rock fans would admit to owning a dB's album; the Replacements had made some of the decade's finest ache; somewhere Alex Chilton was doing something; and even Cheap Trick had a hit single. No wonder the Gin Blossoms got together. Their rootsy, indeterminate power pop, primarily harnessed to the songwriting vision of guitarist Doug Hopkins, would take a few years to gel, but by 1993 they had created one of the best-selling rock records of the year. *Dusted,* from 1989, was a self-released crack at tunes that would (mostly) show up later, and the tough, melodic, five-song *Up and Crumbling* EP pointed toward big things.

Recorded at Ardent Studios in Memphis (where power pop lives!), *New Miserable Experience* took a few months to gather steam, but by the middle of '93 five of the album's seven songs had taken up residence and built houses on various Modern Rock and album-rock radio charts: It was damn hard to hide from tough, tender heartbreakers such as "Hey Jealousy," "Until I Fall Away," "Found Out About You," and "Alison Road."

Hopkins' sharp, melodic songwriting gelled nicely with singer Robin Wilson's bar-band, just-folk vocals. No wonder it went all kinds of platinum. *New Miserable Experience* was Pottery Barn rock, but it was about as good as Pottery Barn rock got. (The album was reissued as a deluxe double CD, with tracks from *Dusted, Up and Crumbling,* outtakes, "Idiot Summer" from *Wayne's World 2,* a cover of Big Star's "Back of a Car," and live material.)

But even before the hits began piling up, the Blossoms sacked Hopkins, having grown frustrated with his drinking. Hopkins committed suicide on December 5, 1993. The band then scored its first post-Hopkins hit with the sweet, folkish "'Til I Hear It From You," which can be found on both hits collections. (Buy both of those, or even one; casual fans don't need anything else.) But the band's bland, Hopkinsless followup, *Congratulations . . . I'm Sorry,* reminded everyone just how important the late guitarist was to the band's punchy sound. The Blossoms broke up soon after, but quietly re-formed in 2003. —J.G.

Ginuwine

★★	Ginuwine . . . the Bachelor (550 Music/Epic, 1996)
★★★	100% Ginuwine (550 Music/Epic, 1999)
★★★	The Life (Epic, 2001)
★★★	The Senior (Epic, 2003)

Fans knew where they stood in relation to neo-love-man Ginuwine, who introduced himself as "The Bachelor" and just wanted to get close to you. *Ginuwine . . . the Bachelor* went much further musically than it did lyrically, introducing the skittering, complex, superfunk beats of producer Timbaland into the world of smooth soul. *100%* was more of the same, but slightly more refined; even the soul stuff itself had its edges rubbed smooth by chill, trip-hop-style production. The sex-you-up-innuendo-free "Pony" made him a star, and by 2001's *The Life,* Ginuwine had perfected the song's format and expanded it into an album's worth of attitude while sacrificing its beat, to the detriment of this romantically schizo recording. He's the good boyfriend, the domineering bully, the kinky hottie, and the earnest suitor, all at too slow a pace and without anyone remotely as talented as Timbaland at the helm. *The Senior* is buoyed by the R. Kelly party bomb "Hell Yeah." But without his support staff, Ginuwine is revealed as not saying anything more interesting than his similarly shirtless rivals. —A.B.

Girls Against Boys

★★	Venus Luxure No. 1 Baby (Touch and Go, 1993)
★★★	Cruise Yourself (Touch and Go, 1994)
★★★	House of GVSB (Touch and Go, 1996)
★	Freak*on*ica (DGC, 1998)
★★★	You Can't Fight What You Can't See (Jade Tree, 2002)

The unfocused Washington, D.C., post-hardcore scene spawned this thrash-rock band with lounge sensibilities, and despite the band's move to New York (where it found a bassist), *Venus Luxure* is a fuzzy piece of bottom-heavy pretense: Call it pop bombast. Scott McCloud's ragged voice burbles up through the sludgy mix like a pond creature surfacing to sneer at idle boaters, and the quartet's prog-rock tendencies—the attenuated length of songs, the lyrics' suggestion of some obscure macro worldview—obviate any headbanging fun inherent in the music's beat-pounding drive. Still, GvsB sounded nothing like early-'90s radio rock, and its thorny confrontationalism, if not exactly pleasurable, seemed at least refreshingly perverse. Tapping its taste for lounge with menacing directness made for a crisper if no more well-adjusted GvsB on *Cruise Yourself.* McCloud remains unfriendly, but the album has a sense of humor not indicated by the group's previous work, with wiry guitars, tricky song structures, and cutely self-conscious cynicism in the lyrics. The slow pace of the songs is much more infectious when stripped of their obfuscating sonic density. *Cruise Yourself* is mean, slow lounge-metal, melodic as any vocal standard and performed in clean, crushing march time, like a swankily tricked-out Panzer rolling through streets where martinis run like blood. For a band that found a million ways not to be tiresome on one recording, *House of GVSB* is an impressive achievement, if not a great leap forward. Ted Nicely's production allows each instrument to force its agenda, especially the bass, always GvsB's secret weapon, which gets funky even while eschewing non-rock elasticity. The songs are built intelligently, bristling with overlap and alluring switches in pace, and McCloud's barbed-wire vocals are more controlled and complex. It looked like the group had nowhere to go but up, but it fulfilled the indie cliché of accepting a major-label contract and releasing a weak distillation of its former sound. Even weirder, the Geffen Company release *Freak*on*ica* adds, or rather teases out, chunky industrial impulses that had been overridden by GvsB's talent for swinging a song. The band then left Geffen and landed on tiny emo label Jade Tree, sounding none the worse for wear on the revved-up *You Can't Fight What You Can't See.* —A.B.

G. Love and Special Sauce

★★★★	G. Love and Special Sauce (Okeh/Epic, 1994)
★★★	Coast to Coast Motel (Okeh/Epic, 1995)
★★½	Yeah, It's That Easy (Okeh/Epic, 1997)
★★½	Philadelphonic (Okeh/550 Music, 1999)
★★★	Electric Mile (Okeh/Epic, 2001)
★★★½	The Best of G. Love and Special Sauce (Okeh/Epic, 2002)

Guitarist and singer Garrett Dutton, a.k.a. G. Love, grew up listening to hip-hop and classic rock, learned the blues from street musicians in his hometown of Philadelphia, and, like the Roots and others, got his start busking on South Street. His music is a coarse melding of several worlds: groaning slide guitar careening over kicky rap or strutting New Orleans march beats, with vocals that combine Beastie Boys–brattiness with a bluesman's sense of emotional investment.

The eponymous *G. Love and Special Sauce* remains the best representation of the group's gumbo: Songs like "Cold Beverage" and "Garbage Man," which have been subsequently used in ad campaigns, exude a buoyant recklessness, while other pieces, notably "This Ain't Living," suggest that Dutton is a crafty student of hip-hop narrative. While not an instant success, the album established the trio's reputation for feverish live performances, a rep it has sustained through less-than-magical studio output.

Coast to Coast Motel finds Dutton broadening his message to include reggae-tinged uplift anthems; despite clear evidence of musical growth, particularly in Dutton's unconventional guitar playing, only several tracks have the immediacy of the debut. *Yeah, It's That Easy* and *Philadelphonic* are only intermittently interesting, but the group's 2001 effort, *Electric Mile,* marks a return to the scruffy refrains and easygoing grooves of the band's debut. —T.M.

The Go-Betweens

★★	Send Me a Lullaby (1982; Beggars Banquet, 1996)
★★★	Before Hollywood (1982; Beggars Banquet, 1996)
★★★½	Spring Hill Fair (1984; Beggars Banquet, 1996)
★★★	Liberty Belle and the Black Diamond Express (Big Time, 1986)
★★★½	Tallulah (Big Time, 1987)
★★★½	16 Lovers Lane (Beggars Banquet/Capitol, 1988)
★★★★	Bellavista Terrace: Best of the Go-Betweens (Beggars Banquet, 1999)
★★½	78 'til 79: The Lost Album (Jetset, 1999)
★★★½	The Friends of Rachel Worth (Jetset, 2000)
★★½	Bright Yellow Bright Orange (Jetset, 2003)

Grant McLennan and Robert Forster have been the core dyad of the Go-Betweens since they formed in Australia in 1977, a partnership strong enough that they picked up again after a pause of a decade or so without breaking stride. They're about as much a songwriting "team" as Lennon and McCartney—after the early days, each one has generally written the songs he sings—and as different: McLennan is the tender intellectual committed to tunecraft, Forster the bitter intellectual who distrusts the easy pleasures of melody.

78 'til 79: The Lost Album, issued 20 years after it was recorded, is mostly crude rehearsal tapes of some spunky but unformed songs. It's mostly worth it for their joyful early singles, "Lee Remick" and "People Say," and for "The Sound of Rain," recorded for a never-released single. Another few years would go by before their first actual album (in the meantime, their long-standing drummer Lindy Morrison joined). Forster has suggested not buying 1982's *Send Me a Lullaby* "without at least owning three others" from the Go-Bs' discography, and he's right—it's dry and graceless. You can hear the intelligence behind it, and the will to do something different, but the songs aren't much fun.

In mid-1982, the band relocated to London and loosened up a bit. Forster's still attached to tune-deprived art-pop on *Before Hollywood,* but McLennan comes into his own, especially with the exquisite single "Cattle and Cane," still remembered as a classic in Australia. The album is also where they developed the classic Go-Betweens sound: a light touch on acoustic guitars, slightly eccentric rhythms, and near-conversational singing. *Spring Hill Fair* of 1984 (on which they expanded to a quartet with bassist Robert Vickers) was the Go-Betweens' first encounter with high-gloss production, and the booming drums don't sit well with the likes of McLennan's prosy "River of Money." The songwriting is improving by leaps, though, and Forster gets off some great lines: "Man O'Sand to Girl O'Sea" begins "Feel so sure of our love/I'll write a song about us breaking up."

Forster inexplicably tries to reinvent himself as a highbrow sex symbol on the brittle *Liberty Belle and the Black Diamond Express,* and McLennan just gets weird—"The Wrong Road" is a nearly surreal power ballad. It only really clicks on the singles "Head Full of Steam" and "Spring Rain." *Tallulah* expanded the band's lineup once again, with the addition of violinist/oboist Amanda Brown. Laugh if you like, but the oboe part *makes* McLennan's "Bye Bye Pride." It's their most genteel record, populated by postcards from Algiers, gray-haired sisters who "sleep in the back of a feminist bookstore," and rumors of adultery.

16 Lovers Lane was the band's final attempt to go commercial, and sounds like it, in a good way—they played up the acoustic prettiness, and McLennan, in particular, rises to the challenge with some of his most seductive melodies. "Streets of Your Town" was their simplest song since "Lee Remick" and became a college-radio hit.

Bellavista Terrace, the band's third stab at a greatest-hits, gets it right. It skips some of their better songs and nonalbum singles, but it flows smoothly and coherently as an album in its own right—a smarter, more literate bridge between new wave and alternative rock than what actually got on the radio.

A 1999 acoustic tour by McLennan and Forster went so well that they decided to make a new Go-Betweens album (without Morrison), and they were open-minded enough to draw on the generation of indie rock that they'd influenced: On *The Friends of Rachel Worth,* their backing band includes both members of Quasi and guest appearances by Sleater-Kinney. They were never especially invested in being young in the first place, so age hasn't hurt them a bit; the album is inconsistent but intermittently delightful, peaking with Forster's bemused, hard-riffing memoir "German Farmhouse." In mid-2002, the British label Circus released expanded two-CD versions of the Go-Betweens' first three studio records, and Forster and McLennan announced plans for another new album. That album, *Bright Yellow Bright Orange,* is somewhat less eventful than its predecessor; the Go-Betweens have settled comfortably into a routine of mid-tempo jangle, and they're hardly stretching the way they did in the *Liberty Belle* days. Forster, in particular, seems to be repeating himself—he's written "In Her Diary" before and better. Still, McLennan has some lovely songs here, especially "Poison in the Wall." —D.W.

Godsmack

★★★	Godsmack (Republic, 1998)
★★½	Awake (Republic, 2000)
★★	Faceless (Republic, 2003)
★★½	The Other Side (Republic, 2004)

Godsmack emerged out of Boston's metal scene in the late '90s to become yet another down-tuned, chunky multiplatinum new-metal act that rode that genre's bull market as well as or better than anyone else. The band—Wiccan vocalist Sully Erna, guitarist Tony Rambola, bassist Robbie Merrill, and drummer Tommy Stewart—debuted in 1997 with *All Wound Up,* which was rereleased and mildly resequenced in '98 as *Godsmack.*

The tough, mopey *Godsmack,* reportedly recorded for less than two grand, eventually went all kinds of platinum. The hearty riff that powers the mildly anthemic "Whatever" is new metal in a nutshell: a thick hook driven into the ground with Erna's basso rumble imparting a loathing directed both outward and inward. "Someone in London" is almost vibrant, but the most intriguing moment is "Voodoo," which changes up the formula with a rolling, vaguely tribal percussion, a subtler riff, and a hefty-yet-catchy chorus. A solid if fairly uninteresting debut.

Awake declines to build on or really in any way modify Godsmack's initial success—why fuck with a platinum formula?—so it's merely *Godsmack* with a bigger budget and a larger, if occasionally slightly slower, sound. "Vampires" wander around, "Greed" eats the soul, and Erna (with his awe-inspiring sideburns) is still self-obsessed and cranky, as Godsmack continues to work over the sound of no new ideas. Bummer.

Faceless is one brave-ass album title for a band that keeps falling further into metallic anonymity. The blocky riffs continue to jackhammer away here and swing a bit there, but they still flat-out refuse to make a lasting impression. The band picks up acoustic guitars for *The Other Side,* a seven-song set of old and new tunes that trades whomp for feeling. The highlight is "Touché," which gets its blues on. If Godsmack doesn't want to fall clear into the abyss, the band would do well to take this moment to expand its still limited palette. —J.G.

The Go-Go's

★★★★	Beauty and the Beat (IRS, 1981)
★½	Vacation (IRS, 1982)
★★★	Talk Show (IRS, 1984)
★★★★	Greatest (IRS, 1990)
★★★	Return to the Valley of the Go-Go's (IRS, 1994)
★★★★	Go-Go's Collection (Uni/A&M, 2000)
★★½	God Bless the Go-Go's (Beyond, 2001)

The Go-Go's may have sprung from the same L.A. underground that produced X, Fear, and the Germs, but you wouldn't know it from the group's recordings, which are tuneful, perky, and eminently accessible. Like Blondie, the Go-Go's were punk in the pop sense, owing more to beach music, girl groups, and leather-jacket attitude than to the amped-up snarl of the Stooges and Sex Pistols. *Beauty and the Beat* played up the band's Blondie roots admirably, from Gina Schock's surf-rock drumming behind "We Got the Beat" to the itchy innocence of Belinda Carlisle's vocal on "Lust to Love." Unexpectedly, the album was a hit, which may be why things suddenly got slicker with *Vacation,* which was overproduced and, apart from the title track and "Beatnik Beach," easily forgettable. *Talk Show* brought things back into focus, but by then the band was splintering. Carlisle went solo, as did Jane Wiedlin; the others played in various new bands; eventually, they reunited, but were hardly as productive as before. They cut a version of the Capitols' "Cool Jerk" for *Greatest,* and three forgettable tracks for the compilation *Return to the Valley of the Go-Go's. Collection* was released in conjunction with their episode of VH1's *Behind the Music,* which apparently bought the band enough time to write a full album's worth of new material, which appears on *God Bless the Go-Go's.* Older and wiser, they re-create the sound they had 20 years earlier while somehow capturing little of its original magic. —J.D.C.

Goldie

★★★	Timeless (FFRR/London, 1995)
★½	Saturnz Return (FFRR/London, 1998)
★★	Ring of Saturn (FFRR/London, 1999)
★★★½	INCredible Sound of Drum 'n' Bass Mixed by Goldie (Sony, 2000)
★★	Goldie.co.uk (Moonshine, 2001)

Anointed "the face of jungle" thanks to his penchant for self- and scene-aggrandizing public proclamations, London graffiti artist, actor, producer, and DJ Goldie began making music under the name Rufige Kru. Early tracks like "Terminator" helped usher jungle and drum and bass from their ravey beginnings as break beat hardcore, and his 1994 singles "Angel" and "Inner City Life" evinced a sonic sophistication then little heard from other junglists. *Timeless,* Goldie's first album, was a double CD that displayed both his best tendencies (the steely breaks of "This Is a Bad") and his worst (the mist-trailing guitars of the godawful "Sea of Tears") in equal measure. Still, the album opened up a lot of ears to the new sound. Three years later, though, *Saturnz Return* helped close many of the same ears, thanks to a turgid, hour-long "opera" titled "Mother" and a second disc of largely undistinguishable drum and bass tunes, as well as lousy cameos from Oasis' Noel Gallagher and KRS-One. *Ring of Saturn* featured seven remixes from *Saturnz Return,* all of which improved on their models, which isn't saying much. Goldie has since concentrated on acting in movies rather than making albums, though he's issued a couple of DJ-mix CDs. *Goldie.co.uk* is a humdrum set that mostly shows how far drum and bass has fallen creatively from its mid-'90s peak, but his volume of *INCredible Sound of Drum 'n' Bass* is a smart history lesson that includes several classic cuts from his Metalheadz label. —M.M.

Gomez

★★★	Bring It On (Virgin, 1998)
★★★	Liquid Skin (Virgin, 1999)
★★	Abandoned Shopping Trolley Hotline (Virgin, 2000)
★★★	In Our Gun (Virgin, 2002)
★★★	Split the Difference (Virgin, 2004)

Gomez strives to do something that was once a proud rite for British bands but hasn't been done in decades: play the blues.

Bring It On shows the band is up for it; graceful and spacious, with calm, unhurried riffs and growling but still intimate vocals by Ben Ottewell, Tom Gray, and Ian Ball, the album is a novel take on the blues, accommodating the soaring bigness of Led Zeppelin and Pink Floyd—via Pearl Jam and Spiritualized, perhaps—with a cutting minimalism learned from indie rock. There's also a refreshing sense of quiet humility, a feeling otherwise absent from much boisterous '90s Britpop. *Liquid Skin* has a greater emphasis on acoustic instruments, resulting in a more sit-down vibe. There's a series of gorgeous pastorals ("Revolutionary Kind," "We Haven't Turned Around"), and though things tend to drag a bit, the sprawl never gets too far out of control, something that could never be said for, say, Derek and the Dominoes. Too bad about the lyrics, though ("Beautiful bitch, I could consider this a simple glitch/You're just a hopeless stitch in time").

After an inessential odds 'n' sods compilation sporting not one but two songs called "Shitbag," a reinvigorated Gomez burst out of the gate with *In Our Gun*. "Shot Shot" is easily the band's most excited track, with funky horns and an uncharacteristically quick tempo. Electronica makes a somewhat unwelcome appearance, with lots of distracting zips and zaps and touches of dub, but when the lads stick to the smooth, restful blues they do so well, everything works fine. *Split the Difference* finds the band back in classic form, channeling gloomy, spacey blues, with some novel instrumentation and a coldly deconstructed Junior Kimbrough tune, "Meet Me in the City." —B.S.

Rubén González

★★★★½ Introducing . . . Rubén González (Nonesuch, 1997)
★★★★ Chanchullo (Nonesuch, 2000)

Ever wonder what *Buena Vista Social Club* would have sounded like without that damn slide guitar? Pianist Rubén González's first American solo album, cut at the age of 77, retains much of the band Ry Cooder assembled, but trims away the vocals and Yanqui frippery to reveal the band's rhythmic backbone. Bassist Orlando "Cachaito" Lopez strings together the timbales, congas, and other percussion into a lean, swaggering line of polyrhythms. And the leader, who helped Arsenio Rodriguez create modern Cuban music in the '40s, parades stately, semiclassical melodies that he then undercuts with giddily frenetic runs before clanging into some bent clusters of harmonics.

Since González's U.S. output was limited to a single Afro-Cuban All Stars spot, his performing was largely unknown to American audiences prior to *Buena Vista*. Yet *Introducing . . .* was an even more remarkable document than one would expect, introducing not just González but Cuban music in its entirety, plumbing the gamut of Cuban styles from *cha cha cha* to *danzón,* from *guaracha* to *bolero.* Even to Yanquis for whom those styles are just delightfully evocative syllables, the artistry is apparent. González had been in retirement through most of the '90s, claiming arthritis; if it ever existed, that affliction was nonetheless belied by the fluidity of these piano lines. As with most followups, *Chanchullo* offered fewer surprises. But though you've heard González's mix of staccato majesty and fleet upper-register runs, you haven't heard them on *these* songs. And you haven't heard González integrate his piano flourishes so fully into such a collaborative group effort. González has recorded imports awaiting U.S. marketing, and he has appeared on still more group sessions—Nonesuch's release of the 1979 all-star jam *Los Heroes,* credited to Estrellas de Areito, is where González fans should immediately proceed. And González's eighth decade may produce yet more music. What has come before may indeed be only an introduction. —K.H.

Good Charlotte

★½ Good Charlotte (Epic, 2000)
★★½ Young and the Hopeless (Epic, 2002)

Daddy, where did pop-punk come from? According to the rock & roll bible, original 1977 punks the Buzzcocks begat SoCal punk rockers the Descendents, who begat All, who begat Screeching Weasel, who begat Green Day, who begat the Offspring, who begat . . . you get the point. By the late 1990s we got Blink 182 and Sum 41, and on the sixth day, God created Good Charlotte. More accurately, Epic Records created Good Charlotte, who skipped the indie-label game and went straight to the majors. This gives the group negative 50 punk-rock points, which would be a problem if Good Charlotte—who are led by twin brothers Joel (lead vocals) and Benji (guitar) Madden—cared about such things. Perhaps they knew that a punk group with a guitarist named Benji is an oxymoron, so they decided not to even bother playing the credibility game. The group's breakthrough was the MTV favorite "Lifestyles of the Rich and Famous," which was followed by another major hit, "The Anthem," which has to be the most cynical song written in the postalternative era. The song's chorus sounds like it was created by a random punk song generator: "Do you really want to be like them?/Do you really wanna be another trend?/Do you wanna be part of that crowd?" Joel Madden continues singing, "This is the anthem/throw all your hands up," as though he knows how clichéd this dumb (but catchy) song is. In all, *Young and the Hopeless* is a tuneful but unsatisfying pop album, though it's far better than their mediocre self-titled debut, which contains what has to be one of the all-time worst hidden bonus tracks, the sincerely titled "Thank You Mom," wherein Madden sings, "You showed me how to love God . . . and I thank you." Thankfully, God rested on the seventh day, so we hopefully won't have to endure more groups like this. —K.M.

Goodie Mob

★★★★	Soul Food (LaFace/Arista, 1995)
★★★½	Still Standing (LaFace/Arista, 1998)
★★★	World Party (LaFace/Arista, 1999)
★★★★	Dirty South Classics (Arista, 2003)
★★★	One Monkey Don't Stop No Show (Koch, 2004)

Big Gipp

★★★	Mutant Mindframe (Koch, 2003)

Cee-Lo

★★★½	Cee-Lo Green and His Perfect Imperfections (Arista, 2002)
★★★★	Cee-Lo Green . . . Is the Soul Machine (Arista, 2004)

After introducing itself a year earlier on the debut album by OutKast, this Atlanta quartet made a splash of its own with *Soul Food.* True to its name, the record offered a deeper, heartier hip-hop sustenance in the form of soulful singing, particularly through the contributions of raspy-voiced standout Cee-Lo and the earthy chanting and poetry of the entire group. Where OutKast added smarts and musical substance to Southern hip-hop, Goodie Mob went a step further with a more developed political conscience, confronting issues such as low-income housing ("Cell Therapy") and prison overcrowding ("Live at the O.M.N.I."). But even at its most outspoken, the group masks its sentiments in a street-warrior stance that keeps the group connected to its grassroots. And with "Dirty South," Goodie Mob found a name for the Dixie-fried rap that would come to dominate the hip-hop charts in the years ahead.

Still Standing follows largely in the same direction, with slightly diminishing returns. Cee-Lo's versatile voice continues to dominate, and many of the album's finest moments are his, though Big Gipp teams with OutKast for *Still Standing*'s biggest hit, "Black Ice." On the whole, though, the record offers fewer memorable cuts, and a generally darker vibe, than its predecessor.

Hoping to brighten its sound and show the world a side of the group other than its ghetto militance, Goodie Mob embraced an internationalist vision of millennial celebration for its third release. *World Party*'s stab at pop crossover took fans by surprise, particularly its choice of samples (Lionel Ritchie?) and outside producers (including TLC producer Dallas Austin). Tracks such as "Chain Swang" and "Get Rich to This" are easily Goodie Mob's most accessible, reinvigorating the group and injecting a sense of fun into what had begun to get bogged down in self-importance. But just as often as this new approach worked, it also tended to feel awkward—not good for a group whose strength was its rootedness in the red clay of its Georgia home. *World Party* was not quite as freewheeling as it wanted to be, and a little too lightweight for the group's taste.

With the original Goodie Mob lineup fracturing after *World Party,* the best-of compilation *Dirty South Classics* presented a fine summation of the quartet's output over three albums. Most of the group's standouts appear here, providing an adequate taste of Goodie Mob's strengths and significance in the scope of Southern hip-hop. Fans looking for previously unreleased extras will be disappointed, however.

After five years away, Goodie Mob returned to the studio—this time without its de facto frontman, Cee-Lo—and came up with the pointedly titled *One Monkey Don't Stop No Show.* Said monkey might not stop the show, but the absence of his dynamic delivery and melodic sense is certainly noticeable. Without Cee-Lo, though, Goodie Mob still manages to squeeze out a decent record. *Monkey* updates the group's sound by adding in a Southern "crunk" feel that takes advantage of the gruff voices of remaining members T-Mo, Khujo, and Gipp.

With his debut solo outing, *Cee-Lo Green and His Perfect Imperfections,* Cee-Lo manages to strike the balance his group missed on *World Party.* The music is eccentric and eclectic but most of all accessible, with an emphasis on Cee-Lo's warm singing and songwriting over his sharp, rapid-fire rhyming. And while it's not afraid to show its slightly naughty side on the funky "Bad Mutha" and "Closet Freak," *Perfect Imperfections* remains committed to relaying messages—social themes of monogamous love and staking out individuality, if not necessarily political ones. More than anything, the record reveals Cee-Lo's strong pop instincts, whether reaching back to doo-wop ("Awful Thing"), embracing regional flavors ("Country Love"), or going straight piano-man on the powerful closer, "Young Man."

Cee-Lo's second outing, *Cee-Lo Green . . . Is the Soul Machine,* continues along the lines of its predecessor, showcasing his rapping, singing, and compositional talents. This time, however, Cee-Lo makes a more concerted stab at a current pop sensibility, enlisting superstar producers the Neptunes, Timbaland, and Jazze Pha to slicken the sound. The effect makes *Soul Machine* a less sprawling, ambitious affair than *Perfect Imperfections,* but altogether a stronger, more consistent effort.

During Goodie Mob's extended absence, Big Gipp also recorded a solo album, *Mutant Mindframe.* Featuring notable guest spots from OutKast's Andre 3000 and others, it's an uneven affair with some great moments and a refreshing musical variety. —R.M.S.

Goo Goo Dolls

★★	Jed (Metal Blade, 1989)
★★★	Hold Me Up (Metal Blade, 1991)
★★★	Superstar Car Wash (Metal Blade, 1993)
★★½	A Boy Named Goo (Metal Blade, 1995)
★★½	Dizzy Up the Girl (Warner Bros., 1998)
★★★½	Ego, Opinion, Art & Commerce (Warner Bros., 2001)
★★	Gutterflower (Warner Bros., 2002)

Hugely influenced by Paul Westerberg of '80s postpunkers the Replacements, Goo Goo Dolls singer Johnny Rzeznick transports the aching vocals of Westerberg from the rock dive to the prom, elevating mundane postpunk sentiments to the rarefied atmosphere where the power ballad soars. The Dolls started out as a Buffalo bar band with a punky spark of desperation they didn't so much douse as ease out of. Fans who complained that Replacements comparisons were facile were half right—by the time of *Hold Me Up* they sounded more like Soul Asylum, crafting credibly strained and restrained hard rock with a punk pedigree. *A Boy Named Goo* established them as alt-rock's answer to Journey and Foreigner—a competent "hard-rock" band whose hits happened to be soft, not-particularly-rockin' ballads. Not-half-bad ballads either—1995 was a wiser age than 1982, and among the "soulful" oversinging of the many Eddie Vedders–thrice-removed crowding the airwaves, Rzeznick was credible, subtle, self-deprecating.

But *Gutterflower* was the glossy work of a band taking fewer chances than ever—Matchbox 20 without the subtext. Ultimately, the Dolls suffer from an inability to push their innate sentimentality beyond the banality of yearbook quotes. "What you feel is what you are/And what you are is beautiful," Rzeznick sang on "Slide." Diane Warren couldn't have said it any better. But Paul Westerberg could have said it better. But if, as so many deluded fans once predicted, the Replacements had become the world's biggest rock band, could he have said it any more honorably? —K.H.

Gorillaz

★★½	Gorillaz (2001, Virgin)
★★★½	G-Sides (2002, Virgin)

Not the first band in history to evoke the response "So, what exactly is this, again?" Gorillaz doesn't make confusing music; it just has a confusing pedigree and, technically, doesn't exactly exist. A cyber-conglomerate usually attributed to Blur's Damon Albarn, this hip-hop-rock concept includes musicians like Chris Frantz and Tina Weymouth of Talking Heads and Tom Tom Club, Cibo Matto's Miho Hatori, Afro-Cuban musician Ibrahim Ferrer, Dan "the Automator" Nakamura and his Deltron 3030 posse—Del tha Funkee Homosapien and Kid Koala—as well as comics artist Jamie Hewlitt, who conceptualized Gorillaz as an animated troupe of manga-style slacker zombies. What all this means for the music is not as fascinating as how all this looks on TV, where the cryptic, zoned-out horror show "Clint Eastwood" enjoyed a juicy run in short-format video throughout 2001. *Gorillaz'* anime conception evokes a rich and unpredictable landscape, whereas the music recalls Butthole Surferesque "weirdness." The diverse strains of expertise among the musicians makes for a surprisingly smooth blend—parallel-universe neo-soul on "New Genius" (featuring a sample from Odetta), electronica played underwater with falsetto vocals on "Man Research," a comment on punk in the punk style on "Punk," whose existence seems to posit that one's six-year-old can make punk. *Gorillaz* is full of expertly assembled songs-as-references-to-song-styles that range from loungey ("Double Bass") to funky ("19-2000") to salsa-y ("Latin Simone"), all of which is soothing, impressive, and deliberately annoying.

Not B sides, *G-Sides* compiles four alternative versions of three Gorillaz songs from the group's one and only full-length recording, plus five previously unheard songs. Fittingly, the thinky music-makers aren't in the business of demonstrating increasing maturity with each release, but this slim album shimmers the way Cibo Matto can, with sugar and vinegar, march and sway. From the Asian hip-hop/spy-movie groove of "The Sounder" to the spooky handclaps animating the fuzz on "Ghost Train," *G-Sides* comes closer to the spirit of Jamie Hewlitt's cartoonish conception of Gorillaz than the album of the same name. —A.B.

Gorky's Zygotic Mynci

★★★	Tatay (Ankst, 1994)
★★★	Patio (Ankst, 1994)
★★★	Bwyd Time (Ankst, 1995)
★★★★	Introducing Gorky's Zygotic Mynci (PolyGram, 1996)
★★★	Barafundle (Fontana, 1997)
★★★	Gorky 5 (Fontana, 1998)
★★★	Spanish Dance Troupe (Beggars Banquet, 1999)
★★★	The Blue Trees (Beggars Banquet, 2001)
★★★★	How I Long to Feel That Summer in My Heart (Beggars Banquet, 2001)
★★★★	The Singles Collection (Castle, 2003)

Gorky's Zygotic Mynci (with a hard *c*) is a name that has almost certainly come between this exuberant Welsh band and pop world penetration. Translating loosely as "Gorky's Embryonic Monkey," it's like the Breeders—just a joke on making art in an age of mechanical reproduction.

Though playing together since the late '80s, they didn't release a record in the U.S. until 1996's *Introducing,* a crackerjack collection culled from singles and EPs previously released on local label Ankst. Though hailed as part of a Welsh invasion storming U.S. shores along with the likes of Catatonia and Super Furry Animals, in reality they were never part of a "Welsh scene" and felt more affinity with atmosphericists such as Low than ironic indie hipsters or alt-radio readymades.

GZM's style has morphed as members have come into their own as songwriters. The early records are Beefhearted and chaotic—sung almost exclusively in Welsh, and sporting titles such as "Merched Ya Neod Gwalt Eu Gilydd." After 1999's angularly peppy *Spanish Dance Troupe,* containing the glam Blur-ry single "Poodle Rockin," founder and lead guitarist John Lawrence left GZM. The pop-pastoral vision of guitarist Euros Childs, whose sugar-mountain voice and Christine McVie melodicism now prevail, moved the band further into the realm of the deceptively simple. *The Blue Trees,* an acoustic treat of 2000, is a pleasing set of piano-and-guitar ballads recorded with deliberative spareness. Playing 25 different instruments among them, the six main members can suggest the vista of Welsh cliffs, the blissful arrival of long-delayed spring, and the sad beauty of an industrial valley—sound portraits as vivid as Grandaddy's Southwestern sweep or Low's frozen lakes. *How I Long to Feel That Summer in My Heart,* from 2001, is a lush and lovingly multitracked translation of alone time. The second most prominent songwriter, acoustic guitarist Richard James, has a breathy, Elliott Smith attraction that provides a nice respite from Childs' more intense angel's plea. And Childs' sister Megan has a Mo Tucker tremble that fits her gamboling contribution "Can Megan" perfectly. With lyrics as basic as the weather, melodies move along with forgivable familiarity. —L.S.

Gov't Mule

★★★½	Gov't Mule (Relativity, 1995)
★★★½	Dose (Capricorn, 1998)
★★★	Live . . . With a Little Help From Our Friends (Capricorn, 1999)
★★★½	Life Before Insanity (PolyGram, 2000)
★★★	The Deep End, Vol. 1 (ATO, 2001)
★★★	The Deep End, Vol. 2 (ATO, 2002)
★★★½	The Deepest End: Live in Concert (ATO, 2003)

Beginning in the mid-'90s as a side project for new-model Allman Brothers Warren Haynes and Allen Woody, Gov't Mule quickly became a full-time band in its own right. Tough, bluesy, and not afraid of an epic jam, the Mule, led by Haynes' righteous vocals and guitar heroics, has successfully brought the classic power-trio sound of bands such as Cream and the Jimi Hendrix Experience into the 21st century.

On floor-stomping songs such as "Mother Earth" *(Gov't Mule),* "Blind Man in the Dark" *(Dose),* and "Bad Little Doggie" *(Life Before Insanity),* Haynes and his pals step into a secret time tunnel leading directly to the Fillmore East circa 1970. Disorienting at first, it's lots of fun once you're used to it. Memorable tunes can be tough to locate, but the temperature of the performances is so high it hardly matters. The "friends" at the New Year's Eve '98 show documented on the live album include P-Funk keyboardist Bernie Worrell, who enlivens "Soulshine" and "Mule" with his daredevil Hammond organ work.

Allen Woody's sudden death in 2000 left Gov't Mule with a void in the bass region. Bring on the Deep End project, which pairs Haynes and drummer Matt Abts with a different bassist on each track, from Larry Graham and the Who's John Entwistle on *Vol. 1* to the Dead's Phil Lesh and Metallica's Jason Newsted on *Vol. 2.* The four-alarm playing on display here proves that everyone's up to the challenge, though the music does, understandably, lack consistency. *The Deepest End* takes all this to its logical culmination: nearly six hours of music (on two CDs and one DVD), recorded at Jazzfest 2003 in New Orleans, featuring 12 bassists and a small army of other guests. Good stuff, but perhaps it's time to move on to another idea now. —M.R.

Grandaddy

★★★½	Under the Western Freeway (Will, 1997)
★★★★	The Sophtware Slump (V2, 2000)
★★½	Concrete Dunes (Lakeshore, 2002)
★★★★	Sumday (V2, 2003)

His falsetto as forlorn as Neil Young's, Jason Lytle emanates the wry pessimism of a guy who only skulks reluctantly into town when he needs new guitar strings. *Under the Western Freeway*—the second album from these Modesto, California, indie rockers—is a hidden fortress of hot-wired Casios and antique drum machines, with an uneven acoustic strum at its foundation and dissonant guitar fragments looped around like chicken wire. The regrets yelped in lyrics like "Everything Beautiful Is Far Away" are both callow and moving, as if the feeble protests spray-painted on the Northern California overpasses of I-5 had been composed by the world's smartest teenage burnout.

The Sophtware Slump could be America's answer—its halting, quizzical answer—to the sculpted crystalline grandeur and nail-biting technophobia of *OK Computer.* Make-do Yanks that they are, the Grandaddy boys employ a shimmering synthetic surface to nearly conceal a rickety acoustic infrastructure, in contrast to the Brits' chilly precision. Creeping amid a "Broken Household Appliance National Forest," stranded on the moon and gazing earthward, eulogizing a paranoid android named Jed who drank himself to death, Lytle recognizes that the future has already come and gone here, leaving him to root among its detritus.

As a reward for the many plaudits *Sophtware Slump* earned, the band saw some sketchy early material released by an old label. Some of the tunes are just fine, but the sonic support system that allows Grandaddy to thrive isn't yet in place. There's a lesson for arty pessimists in there: Fear the future all you like, it's the past that always turns to bite you in the ass. *Sumday* was more modest in its lethargic, weary optimism. Lytle's structures were more conventional, resulting in what sounds like a homemade, slacker ELO. —K.H.

★★★½	Trunk of Funk (Capitol, 2003)

Not for nothing are they Homer Simpson's favorite band: Dumb but with delusions of grandeur, critically reviled but worshipped by '70s stoners, Grand Funk Railroad's vulgarity translated for many into charming exuberance. The Flint, MI, natives—singer/guitarist Mark Farner, bassist Mel Schacher, and drummer/singer Don Brewer—began mixing up hard rock and boogie in 1969. By '71 they released their best album, the disco-informed hard pop classic *E Pluribus Funk.* From the explosive groove-anthem "People, Let's Stop the War" to the eight-and-a-half-minute stairway-to-hell monster ballad "Loneliness," Farner wails like a cross between Axl Rose and Lynyrd Skynyrd's Ronnie Van Zant, Schacher sprints through fuzz-toned walking basslines, and Brewer guarantees the "funk" promised in the disc's title.

Survival, released later that year, grooves with an unhurried but still spry assurance, each instrument sticking to its respective sweet spot. Until, that is, "Gimme Shelter." Perfectly capable of emulating Marvin Gaye and Stevie Wonder on the disc's original songs, Grand Funk smothers the Stones' R&B beat in coarse, driving guitar—thereby anticipating the imminent dominance of hard rock and heavy metal over rock & roll. The remixed and previously rejected tracks included here, like the bonus cuts on the other reissues, were kept in the vault this long for good reason, so unless you've been aching to hear the "guitar intro, harmonica solo, several extra bridges and verses, and double-time section" of "All You've Got Is Money," hang on to the vinyl if you've got it.

Even without the extended version of its instrumental intro, 1972's *Phoenix* would sound ponderous. Stalwart producer Terry Knight, who quit before the disc was recorded, is sorely missed. The album lacks the rhythmic finesse and walloping drive of GFR's early releases. Rather than trading off between his signature crude riffs and juicy funk chords, Farner attempts to play guitar with a subtlety he just doesn't have, while his flatly cheerful voice lingers over deep thoughts like "been gettin' loaded/too much these days."

Luckily, Don Brewer was still looking for a party.

The first Grand Funk song he wrote himself, *We're an American Band*'s rousing title song, was the band's first #1 hit, a career-defining document of the group's hedonistic touring lifestyle. Politically incorrect by today's standards, the comparably inspired "Black Licorice" concerns a specific type of female fan, one with "slender legs" and "hot, black skin." Farner shrieks the refrain like a man who has rediscovered his favorite vices, and the guys (including recent addition Craig Frost) swing harder than a drunk in a brawl. But the band never recovered from the ensuing hangover. They produced a few more *Phoenix* photocopies, like the mopey, self-fulfilling prophecy *Born to Die;* their embarrassing cover of "The Loco-Motion," from *Shinin' On,* was their second chart topper. Mel Schacher and Don Brewer went on tour as Grand Funk Railroad in 2004, but Mark Farner had long since devoted himself to a successful career in contemporary Christian rock. —N.C.

Grandmaster Flash and the Furious Five

★★★★★	Message from Beat Street: The Best of Grandmaster Flash, Melle Mel, and the Furious Five (Rhino, 1994)
★★★	Greatest Mixes (1997; Castle, 2002)
★★½	The Showdown: Sugarhill Gang Vs. Grandmaster Flash and the Furious Five (Rhino, 1999)
★★★★½	Adventures on the Wheels of Steel (Sequel, 2000)

Grandmaster Flash

★★★	Grandmaster Flash Presents Salsoul Jam 2000 (Salsoul, 1997)
★★★★	The Official Adventures of Grandmaster Flash (Strut, 2002)
★★★½	Essential Mix: Classic Edition (Rhino, 2002)

Grandmaster Flash helped invent both an art form, the hip-hop sound, and a type of artist, the turntablist DJ. When the 16-year-old Flash (Joseph Saddler) got into Bronx street parties in 1973, he discovered he had no skills as a break dancer, but he did have a passion for music and tinkering with electronic equipment in his bedroom. Adored, party-throwing DJs such as Kool Herc, Pete DJ Jones, and Grandmaster Flowers inspired Flash to combine the sharpest parts of their acts into something better and stronger. During 1974–75, Flash perfected a way to intercut and extend break beats on the beat, so that dancers could just keep rolling on with the funky bits he selected. He could also assemble pieces of records into complete new workouts, something everybody takes for granted today. This was so innovative back then that it called for a new style of MC, or rapper, to put it across to an audience. The Furious Five, who were up to the challenge, consisted of exhorter Cowboy (Keith Wiggins), wordslinger Kid Creole (Nathaniel Glover), and Kid's more politically minded brother Melle Mel (Melvin Glover), who brought in Scorpio (Eddie Morris) and love-man Raheim (Guy Williams). The Five began to finish one another's lines and toss around raps rhythmically in time to Flash's turntable work. Together they became the mightiest originators in hip-hop history.

Message from Beat Street contains key underground singles, such as "Freedom"; numbers that made Flash and the Five favorites of the new-wave rock set, such as "It's Nasty (Genius of Love)"; and Melle Mel's most ferocious, relentless performance ever, on "The Message," the gunshot that signaled the rise of gangsta rap. Also very desirable is the British import of *The Message,* the only LP issued while the original group was intact. The clincher is "The Adventures of Grandmaster Flash on the Wheels of Steel," the only prime-period example of Flash's ability to set and shatter moods, with his turntables and faders running through a collage of at least 10 records that sound like hundreds. Those who want to spend more and get a full picture of the group should go for *Adventures on the Wheels of Steel,* with choice rarities. *Greatest Mixes* unfortunately entrusts the sound of Flash and the Five to outsiders, while *The Showdown* and *The Message: Greatest Hits* needlessly pair Flash and the Five with the much more trivial Sugarhill Gang.

When a new generation of DJs such as the Invisible Scratch Piklz revived the art of turntablism a few years ago, Flash finally began to get his due as a pioneer scientist of sound. *Presents Salsoul Jam 2000,* however, shows that Latin disco isn't his finest mode of operation. Much more on target, *Essential Mix: Classic Edition* is a super-solid assembly of cuts that never quite goes delirious. Though a standout, *The Official Adventures of Grandmaster Flash* is rather skimpy, padded by brief interview segments and four vintage jams such as Babe Ruth's "The Mexican," which provide old-skool ambience or something. The CD becomes nearly essential, however, because it contains four restless, scratchedelic, funk-filled "turntable mixes" by Flash that are the first and so far only released followups to "Wheels of Steel." Plus, Frank Broughton and Bill Brewster's liner notes provide a definitive history of Flash's techniques and career. Looking back on his achievements, Flash puts it best: "First is forever." —M.MI.

The Grateful Dead became such a larger-than-life social phenomenon that it would be easy to overlook their music, or simply to dismiss it as self-indulgent noodling for stoned hippies. But the Dead's music occupies a unique niche; their open-ended approach to songs and sound was unprecedented in rock. Their emphasis on live performance and their self-sufficiency—in effect the band became a self-contained music industry—fathered the jam-band movement that flourished in the '90s with Phish, the Dave Matthews Band, Blues Traveler, and countless others. All forged lucrative careers built on the Dead's lead: Music mattered more than image, tours counted for more than slickly crafted studio albums, and concerts were improvised in the moment, assuring that no two would ever be alike.

The Dead began as the house band for the acid tests in mid-'60s San Francisco, making the transition from a jug band to garage-blues rockers documented on the *Birth of the Dead* album, and eventually to something far more difficult to categorize.

This was a band whose legacy was forged on the stage rather than the studio, in large measure because the Dead used their songs as starting points for improvisation rather than as ideals to be duplicated. They treated America's indigenous music—blues, bluegrass, country, jazz, folk, and early rock & roll—as one long, living tradition that demanded to be transmuted and expanded nightly. They covered the songs of their contemporaries, especially Bob Dylan, but also those of Charley Patton, Marty Robbins, Buddy Holly, Woody Guthrie, the Dixie Cups, and Bobby "Blue" Bland. Bassist Phil Lesh was an accomplished avant-garde composer, guitarist Jerry Garcia recorded with everyone from David Grisman to Ornette Coleman, drummer Mickey Hart was one of the first musicians to introduce world music and rhythms to the rock lexicon, and virtuosos such as Branford Marsalis and Bruce Hornsby sat in with the band. To avoid repeating themselves, they risked looking foolish or inept, and sometimes did.

Garcia applied the dexterity of his bluegrass-banjo background to the electric guitar, and he developed one of the signature styles of the last half century, an unhurried approach to the instrument that stood in sharp contrast to rock's faster-is-better orthodoxy. In addition, his songwriting collaborations with lyricist Robert Hunter provided the foundation for the Dead's career: "Dark Star," "Uncle John's Band," "Ripple," "Bertha," "Casey Jones," "China Cat Sunflower," "U.S. Blues," the epic "Terrapin Station," and their sole Top 10 hit, "Touch of Grey." Garcia's interplay with Lesh and guitarist Bob Weir was supported by two percussionists in Hart and Bill Kreutzmann who favored busy polyrhythms over more conventional rock beats, while a succession of keyboardists brought disparate strengths to the band's many eras: the blues raunch of Ron "Pigpen" McKernan, Keith Godchaux's jazzier voicings, Brent Mydland's versatility with synthesizers.

The early albums, particularly *Anthem of the Sun,* are ambitious but awkward, as the Dead experiments with everything from finger cymbals to crotales and extended song suites. *Live Dead* is where the band finds its voice, particularly on a 24-minute "Dark Star" that is closer in feel to Miles Davis' jazz-fusion than rock. The song is the acid test, if you will, of Dead-dom, both the defining work in the canon and the most demanding. It was among the first Hunter lyrics written for the band and is the centerpiece of countless concert recordings to surface over the next 30 years with its open-ended, modal-jazz structure.

Workingman's Dead, in part inspired by the rustic soul of the Band, ranks as the Dead's studio masterpiece, followed closely by *American Beauty.* The focus is on the songs, rather than the jams, and these would provide the focal point of an era, spanning 1969–74, when the Dead played some of the most remarkable concerts in American history, virtually every one available in some incarnation thanks to the band's dedicated tapers. The band's last major statement as a studio band would be *Terrapin Station,* the epic title track ranking with the finest of the Hunter-Garcia collaborations.

The late '70s and '80s saw the Dead struggling to remain relevant amid unfriendly commercial trends, hitting its nadir in disco experiments such as *Shakedown Street,* but improbably scoring a major hit with the wryly touching "Touch of Grey" from *In the Dark.* That said, the polished pleasantness of most of the Dead's latter-day studio recordings is depressing coming from these erstwhile pranksters. The Dead often found themselves going through the motions in concert as well, providing a soundtrack for a party they no longer had any desire to join.

Garcia's death in 1995 effectively ended the band, but not the flood of recordings. Particularly remarkable is the ongoing *Dick's Picks* series, named after the late Dead tape archivist Dick Latvala, which cherry-picks some of the band's finest concert recordings. Best of the bunch is *Volume 4,* which culls highlights from two masterly 1970 performances at the Fillmore East in New York. Here the full range of the band's arsenal is represented: the luminous "Dark Star," a raging "Not Fade Away," the sheer nastiness of McKernan on his showpiece, "Turn on Your Love Light."

A few months later, the Dead nearly topped that performance; their Harpur College concert in Binghamton, NY *(Vol. 8),* should give pause to anyone who buys into the Dead's reputation as mellow. Fresh off recording *Workingman's Dead,* the band opens in acoustic mode, which brings a more melodic concision to the arrangements and a bite to the voices that carries over to the electric set. Garcia and Lesh slug it out on a majestic "The Other One," while "Viola Lee Blues" and "Morning Dew" build to howling climaxes. The group even wages war on Martha and the Vandellas' ebullient "Dancing in the Street," transforming it into a freakish, funky, antiwar meltdown.

Among Dead arcana, *Grayfolded* stands apart: a two-CD deconstruction of "Dark Star." Sound engineer John Oswald, who coined the term "Plunderphonics" to describe how he manipulates and layers or "folds" recorded music, compresses 25 years of "Dark Star" performances into two epic tapestries, including an "ambient dance" mix that recontexualizes the Dead as precursors of the Orb or Aphex Twin.

The uninitiated looking for an entry point to this bewildering catalogue should seek out *What a Long,* *Strange Trip It's Been,* a good one-volume retrospective, or *So Many Roads,* a box set that gives a solid overview of the Dead's many incarnations as a touring band. —G.K.

Gravediggaz

★★★	Six Feet Deep (V2, 1994)
★★★½	The Pick, the Sickle & the Shovel (Gee Street/V2, 1997)
★★	Nightmare in A-Minor (Empire, 2002)
★	6 Feet Under (Cleopatra, 2004)

This blood-and-gore-obsessed side project of Prince Paul and the Wu-Tang Clan's RZA was the prime suspect in the "horrorcore" subgenre that emerged just as gangsta rap was losing its shock value. In lesser hands it would have been a dull novelty indeed, but these gifted and adventurous producers make it work the way great horror movies work: You may come for the violence, but you stay for the characters.

Six Feet Deep is basically a rap *Tales From the Crypt,* with a cast of ghouls (Gatekeeper, Grym Reaper, Rzarector, Undertaker—Frukwan, Poetic, RZA, and Paul, respectively) making corny graveyard/ghetto boasts ("I've been examined ever since I was semen/They took a sonogram and seen the image of a demon") and reveling in the macabre. The MCs are all in top form, but the production is oddly understated, considering that the album came just a year after RZA's epochal work of ultraviolent sci-fi rap, *Enter the Wu-Tang (36 Chambers).*

Things turn puzzlingly serious on the second album. Suddenly the concept of gravedigging carries immense metaphoric significance to the crew, leading to claims about resurrecting the "mentally dead" with vague mystic teachings. "Hidden Emotions" and "Deadliest Biz" probe fascinating territory about the hyper-masculine world of hip-hop itself. There's still plenty of room for gore, though here it tends to be discussed in the context of "the black-on-black crime saga."

RZA and Paul left after *The Pick,* and the group got a taste of real-life death when Poetic succumbed to colon cancer in July 2001. *Nightmare in A-Minor,* recorded by Poetic and Frukwon as a last testament, is a slow-witted shadow of its predecessors, as is *6 Feet Under,* a pointless postmortem made by Frukwon with one Arnold Hamilton. Death be not proud. —B.S.

David Gray

★★★½	A Century Ends (Caroline, 1993)
★★★	Flesh (1994; Caroline, 2001)
★★½	Sell Sell Sell (1996; Nettwerk, 2000)
★★★★	White Ladder (1999; ATO/RCA, 2000)
★★★½	Lost Songs 95–98 (ATO/RCA, 2001)
★★½	The EPs 92–94 (Caroline, 2001)
★★★	A New Day at Midnight (RCA, 2002)

English-born, Welsh-bred performer David Gray sings his earnest songs of love and spirituality in a passion-soaked voice that, powerful as it is, sometimes seems barely enough to withstand his intensity. The ghosts of Bob Dylan and, especially, Van Morrison float close to Gray's fiery folk rock—intimidating ghosts, to be sure, but more often than not he proves himself worthy of them.

Though it's occasionally hampered by melodic sameness and Gray's tendency to overemote, *A Century Ends* is an assured debut nonetheless. "Shine," "Debauchery," and "Birds Without Wings" merge modern and traditional British folk styles with Morrisonesque fervor. *Flesh* is tougher and almost as good; the anthemic "New Horizons" is a standout. Leaning more on loud rock arrangements and sounding less distinctive as a result, *Sell Sell Sell* is a slight misstep, but the album's quieter moments—"Hold On to Nothing," "Smile," "Gutters Full of Rain"—are captivating.

White Ladder, Gray's commercial breakthrough, is also his finest collection to date, harnessing his muse to a tasteful array of sampled and programmed beats. "Please Forgive Me," "Babylon," and the title cut have a warm, human depth that contrasts brilliantly with their high-tech surface. *Lost Songs* isn't as strong as its predecessor, but it's by no means a throwaway. The stately restraint of "Hold On" and "Falling Down the Mountainside" proves once again that Gray is at his best when at his most intimate.

On *A New Day at Midnight,* Gray benefits by calming down. The impact of certain songs ("Last Boat to America," "The Other Side") is enhanced without the heavy breathing, but as a whole, the album edges toward snooziness. When he lets out a lusty whoop on the propulsive "Caroline," it's a relief.

In the wake of Gray's platinum success with *White Ladder,* his former label released a compilation of British EPs from his early acoustic-troubadour years; its best songs were already available on his first two albums. —M.R.

Macy Gray

★★★★	On How Life Is (Epic, 1999)
★★★½	The Id (Epic, 2001)
★★★½	The Trouble With Being Myself (Epic, 2003)

Has there been a voice in recent pop history with more character than Macy Gray's? Okay, put it another way: Has there been a more bizarre voice in recent pop history than Macy Gray's? Raspy and raw, Gray's pipes bear more of a resemblance to Donald Duck's than Aretha Franklin's. Still, linked up (as she usually is) with some sharp melodies and simmering funk grooves, Gray sure sounds soulful. Add in her knack for writing heartfelt, sometimes giddy lyrics and her eye-popping visual style, and you've got one distinctive artist; whether she ends up an unlikely superstar or just a cool cult figure remains to be seen.

On How Life Is didn't gain commercial momentum for nearly a year after its release, but one listen is enough to explain its eventual multiplatinum sales. Though the big hit, "I Try," is a catchy and affecting wounded-love ballad, the album's bedrock is the deliciously slinky "Do Something," which quietly condemns a stoner's retreat from the world. Elsewhere, the spirits of Prince, Sly Stone, and Stevie Wonder lurk in the bouncing beats of "Why Didn't You Call Me" and "Sex-O-Matic Venus Freak."

That word *freak* (used to lovingly describe both oneself and others) shows up all over *The Id* as Gray continues to develop her uninhibited persona; "Gimme All Your Lovin' or I Will Kill You" is a fairly representative title. The retro-soul vibe here is, if anything, even more buoyant than it was on her debut, and "Don't Come Around" is a worthy successor to "I Try." Unfortunately, the album loses direction toward the end. "When I See You," the first track on *The Trouble With Being Myself,* sounds like a lost nugget from Kool & the Gang's archives. The remainder suggests that Gray's stuck in a creative holding pattern. But it's a fun holding pattern. —M.R.

It is a testament to the fact that the world needs a secular Al Green as much as Green himself needs God that Green's early love-and-hard-times soul recordings remain in print and still essential. And it's a testament to the power of the singer's conviction and his unerring vocal instincts that 1995's gospel recording *Your Heart's in Good Hands* signifies no drop-off in quality even if Green deliberately limits his potential audience.

Al Green's blazing streak of hit singles sweetened the sound of Memphis soul just enough to suit the changing times; he reasserted the music's gospel base without losing that identifying grit. Even though he returned to the church halfway through the decade, Green is the preeminent soul man of the '70s, hands down. And given the proper motivation, he can still move mountains. He'd already been performing gospel in public for several years when his secular debut, "Back Up Train" by Al Green and the Soul Mates, reached the R&B Top 10 during the soul-saturated year of 1967. Moving from Grand Rapids down to Memphis a couple of years later, Green hooked up with producer and bandleader Willie Mitchell—the creative main man at Hi Records, Stax/Volt's crosstown rival. *Green Is Blues* made for a rather tentative (if mostly uptempo) debut. But *Al Green Gets Next to You,* released later that same year, accomplishes its stated goal. Here, Green finds the intimate tone that will become his calling card, and Willie Mitchell finally defines a Hi house sound—slower and sweatier than the bristling Booker T.–Bar-Kays groove, but fully capable of the same supercharged emotional impact. Together, they reshape the Temptations' chesty Motown classic "I Can't Get Next to You" into something fresh—no small feat.

"Tired of Being Alone" and "Let's Stay Together" brought Al Green to the pop charts in 1971, introducing his lush, electrifying romanticism to an apparently ballad-starved general public. Sliding from a gravy-thick lower register to an ethereal, heart-stopping falsetto, Al Green makes his seductive pleading hard to resist throughout *Let's Stay Together.* Hi's house band hits its stride right alongside the label's new star: Former MG's drummer Al Jackson Jr. pumps up a subtle pulse, while guitarist "Teenie" Hodges plucks uncommon, jazz-flavored chord progressions against Mitchell's bittersweet horn and string arrangements.

I'm Still in Love With You refines that approach on the title cut and "Look What You Done for Me," while indicating Green's wide-ranging tastes with cover versions of Roy Orbison's "Oh, Pretty Woman" and Kris Kristofferson's "For the Good Times." If those interpretations are a bit forced, Green breathes natural fire into the Memphis-Nashville connection on his next album, *Call Me.* His readings of "I'm So Lonesome I Could Cry" (Hank Williams) and "Funny How Time Slips Away" (Willie Nelson) merge the country heart-tugging of the originals with some R&B sinew-flexing—magnificent. *Call Me* captures Green at a dizzying peak; the hit title track sums up his preceding achievements, while "Jesus Is Waiting" suggests his future destination.

In retrospect, you can hear Al Green inching closer and closer to the Lord on each subsequent record: "Sweet Sixteen" and "My God Is Real" stand out on the spacey, string-laden *Livin' for You,* while "Take Me to the River" is the testifying centerpiece of the funkier, more direct *Al Green Explores Your Mind.* The flawless *Greatest Hits* concludes his superstar run, but he's far from finished.

After releasing two increasingly sketchy albums in 1976, Al Green stopped working with Willie Mitchell—and radically changed his tune. Around this time, Green's singles quit crossing over to the pop charts. *The Belle Album* explains just what he'd been going through: a difficult, often painful reassessment of his faith and its relation to his art. Picking up an acoustic guitar, Green began to write and sing about his transformation, about his belief and his nagging doubts. "It's you that I want," he tells his lover on the title track, "but it's Him that I need." Perhaps because of Green's up-front uncertainty, *The Belle Album*'s gently funky heat can melt the coldest, most atheistic resolve. *Truth 'n' Time* plugs this best-of-both-worlds approach back into Green's traditional mix of originals and cover versions; "Say a Little Prayer" and, yes, "To Sir With Love" lend themselves to the task quite well. Al Green's next move comes as no surprise, then: In 1980 he began recording straight-up gospel for the Myrrh label. The import-only live album captures a good-sized chunk—but not all—of Green's seductive stage presence and thrill-a-minute virtuosity, while the outtakes and rarities on *Love Ritual* soar above his official mid-'70s releases (especially the wild, African-influenced mix of the title track).

Expectations of a return to secular music sabotaged these albums for many Al Green devotees at the time of their release. In retrospect, the very best ones *(The Lord Will Make a Way, Higher Plane,* and *I'll Rise Again)* weave a delicious spell all their own; they're not as robust as '70s Green, but just as musically complex and soul-satisfying. Though he's shifted his lyric focus to pure spread-the-word proselytizing, Al Green (now a reverend and preacher with his own church in Memphis) has never really lost his knack for crafting dramatic, catchy pop songs—or his ability to make the most unlikely cover versions sound utterly natural. Take *Higher Plane* as an example; "Amazing Grace" is as good as you'd hope, but nobody else on earth could pull off "The Battle Hymn of the Republic" quite the way Green does. *Precious Lord* is a little too soft, and not all the lightweight pop covers on *Trust in God* get over—he is human, after all.

The long-awaited reunion with Willie Mitchell *(He Is the Light)* sounds bracingly familiar, and yet a curiously uninspired batch of songs (save for the Clark Sisters' "You Brought the Sunshine") makes it something less than a magic moment. To his credit, Green didn't linger at this nostalgic crossroads; *Soul Survivor* and especially *I Get Joy* tastefully integrate some contemporary rhythms and synth textures into his ongoing testimony. *One in a Million* is a frustrating, brutally truncated summary of Al Green's Myrrh period; still, those 38 minutes (including "Amazing Grace") should be enough to convince any skeptic. With Al Green, hearing is believing.

Green's work continued to be diffused among various labels and repackagers long after he bowed out of recording secular soul. Hi kept the hits coming with *The Supreme Al Green,* which belied its claim of featuring the greatest hits by omitting the magnificent "Here I Am (Come and Take Me)." The label did a better job following up *The Supreme* with the companion volume *Take Me to the River* five years later. Hi's cleverest repackaging of its Green catalogue comprised a trio of collector's essentials: *Hi Masters; A's and B's,* a collection of singles and their original 7-inch B-sides; and the aptly titled *Listen to the Rarities* (cuts mysteriously deemed unworthy of release but surely able to stand beside Green's most noteworthy hits).

The Right Stuff waited 23 years to release a second volume of its 1975 *Greatest Hits* with the incohesive *More Greatest Hits,* a poorly paced hodgepodge of hits major and minor. Its *Greatest Gospel Hits,* however, is a welcome introduction to Green's inspirational soul for fans of the secular stuff. In 1995, the budget label Cema Special Markets managed to squeeze Green's sterling work onto a series of well-chosen collections—*Here I Am, Unchained Melody, Back to Back Hits,* and the accessible gospel-driven *Glory to His Name.* Capitol's *Anthology Live* is deceptively slick-looking and massive; it's crammed with fillerlike lengthy interviews and uninteresting live tracks, dragging down any momentum generated by the hits, which are available on less expensive volumes. *Take Me to the River,* this one Capitol's, is equally patchwork, including most but not all of the Hi biggies and some very inferior tracks. Empire dipped into the Green well once, on *True Love,* for a random mess of old love songs and gospel tracks, creating a no-doubt-odd aural disjunction for anyone hearing "God Is Standing By" next to "Ride, Sally, Ride." AMW's tidy *Rock of Ages* compiles 10 gospel standards, while Capitol brings together everything in the Green oeuvre that fits the title profile for *The Love Songs Collection,* thereby omitting his essential, ambivalent secular work. Green completists will surely own every track, somewhere, to be found on the two most important later releases, but both A&M's *Testify* and Music Club's solid, completist *The Very Best* efficiently cover the magnificent panorama of the man's career. Green reunited with Mitchell for another go-round in 2003 for *I Can't Stop.* Mitchell's production still has much of its '70s-soul snap; Green's voice has lost maybe a half step, which still puts him in the top 1 percent of singers. —M.C./A.B.

Green Day

★★½	1,039/Smoothed Out Slappy Hour (Lookout, 1991)
★★★	Kerplunk (Lookout, 1992)
★★★★★	Dookie (Reprise, 1994)
★★★★	Insomniac (Reprise, 1995)
★★★★	Nimrod (Reprise, 1997)
★★★★	Singles Box (WEA, 1999)
★★★★	Warning: (Reprise, 2000)
★★★	Take 2 (WEA, 2000)
★★★	Tune in Tokyo [live] (Reprise, 2001)
★★★★★	International Superhits! (Warner Bros., 2001)
★★★	Shenanigans (Reprise, 2002)

Just weeks before Kurt Cobain killed himself in April 1994, Green Day released its blockbuster major-label debut, *Dookie,* transforming the ennui that ruled the day into a racket that affirmed life, not death. The three East Bay stoners—snotty-not-snooty singer/guitarist Billie Joe Armstrong, fleet-fingered bassist Mike Dirnt, and flailing-armed drummer Tre Cool—played peppy pop-punk uncomplicated by heavy metal or deep thoughts, and lodged it on radio where, at press time, it still remains.

"I declare I don't care no more/I'm growing up and out and growing bored," announced Billie Joe in *Dookie*'s opening lines, his snarl keening in a way that suggested—and would always suggest—brattiness, boyish innocence, adult anxiety, and (rarely noted) guileless flirtation. The rest of the album, like the rest of Green Day's career, would be spent wringing exuberance out of aimlessness, finding the sweet spot in life's sour moments. The band's indie albums showed glints of brilliance—*Kerplunk*'s chugging ballad "Christy Road," for one—but any cut here could light up a room. "She" whips around like a severed power line; "Burnout" explodes like a flare; the tightly coiled "Basket Case" drives like a corkscrew; "When I Come Around" slinks with a naked soulfulness; and, last but not least, "Longview" gleefully reinvents grunge's quiet-loud melodrama.

According to the numbers—about 2 million to *Dookie*'s 8 million sold—*Insomniac* absolutely qualified as a sophomore slump. And indeed, if up until then Green Day had been fueled by speed and weed, it seems that posthigh paranoia had set in. "I'm blowing off steam with/methamphetamine," Armstrong sings in "Geek Stink Breath," his voice edged with desperation and a weird, almost fatalistic excitement, his guitar tone tighter and blacker than ever before. It sounds as if he's got more bottled up than he can blow off. The album's best song and biggest hit, "Brain Stew," sometimes played on radio along with the tacked-on tantrum "Jaded," marked a formal wrinkle in the band's Ramones- and Buzzcocks-derived hum; slivers of silence block off bursts of lead-heavy sound, while Armstrong, "past the point of delirium," stretches his vocal cords over the changes. Gloomy but crackling with energy, *Insomniac* resembles—even rivals—Nirvana's bleak response to sudden fame, *In Utero.* But, squinting in the spotlight or not, Armstrong wasn't about to disappear underground.

Nimrod, for all its familiar complaints—one minute in and Armstrong's declaring "I'm so happy I could die"—glows with the relief of someone who's avoided a brush with death. The band, as tight as they were on the extraordinarily wound-up *Insomniac,* nail the syncopated bounce of "Hitchin' a Ride" like a bleached-blond John Henry, set a rock land-speed record on "Nice Guys Finish Last," convincingly spice "Walking Alone" with harmonica, and blast through the near-ballads "Redundant" and "Worry Rock." And then, marking another formal wrinkle, Armstrong steps out for the effortlessly gorgeous, acoustic, all-the-way-there ballad "Good Riddance (Time of Your Life)."

Life goes on: In a spurt remarkably free of growing pains, Green Day welcomes the new millennium with *Warning:.* Adding strings and one solo's worth of ersatz sax to the acoustic guitar and harmonica ushered in on *Nimrod,* the threesome fully focus on the textures that have always differentiated their sturdy grooves and simple melodies. Armstrong's voice, now as throaty as it's always been whiny, leads a dozen speedy, neatly packaged reinterpretations of pop-rock history, from the Beatles to Creedence Clearwater Revival to the Ramones themselves. Grunge had long ago bit Green Day's dust. —N.C.

Green Velvet

★★★★ Green Velvet (F-111/Warner Bros., 2000)
★★★½ Whatever (Relief, 2001)

Cajmere

★★★ TechnoFunk (311, 2000)

Curtis A. Jones is generally credited with helping revive Chicago's house-music scene in the mid-'90s with his record labels Cajual and Relief and with his production of club hits like "Brighter Days," which he recorded under the name Cajmere. It is under the Green Velvet moniker, however, that Jones has been most successful, indulging his taste for droll, over-the-top satires of the nightlife his music helps soundtrack, as well as stiff, punishing, near-industrial beats. *Green Velvet,* his U.S. debut, is essentially a greatest-hits package of his '90s singles, but it works like a concept album, from "Flash," a gleefully decadent guided tour of a nightclub, to the creepy first-person narrative "The Stalker," to "Answering Machine," a hilarious litany of bad-luck missives from creditors, neighbors, and ex-girlfriends. *Whatever* is less inspired, but features the great "La La Land," a snide put-down of ecstasy culture ("Who's gonna give me a ride to the after-show?" *"Me!"*), and "GAT (The Great American Tragedy)," whose psychoses ("They say it's just a phase/This is *not a fuckin' phase*") feel more lived-in than usual. Between those albums, Jones switched monikers to Cajmere and released *Techno-Funk,* a smart if sometimes claustrophobic minimal techno DJ set. —M.M.

★★ These Eyes (1992; BMG, 1997)
★★★★ The Ultimate Collection (RCA, 1997)
★ The Spirit Lives On: Greatest Hits Live (J-Bird, 1998)
★★★★½ Greatest Hits (RCA, 1999)
★★ Running Back Through Canada (RCA, 2001)
★★½ Shakin' All Over! (Sundazed, 2001)
★★ The Platinum & Gold Collection (RCA, 2003)
★★½ Extended Versions (BMG, 2004)

Rock superstars at home in Canada, the Guess Who had to be content with merely being hitmakers in America. Formed by singer Chad Allan and guitarist Randy Bachman in Winnipeg, the group scored a 1965 hit with its cover of Johnny Kidd's "Shakin' All Over." The early sides collected on the Sundazed anthology show a band of no special distinction (outside of having the good sense to record an early song by fellow countryman Neil Young) that fairly screams "one-hit wonder." Then Allan left, keyboard player Burton Cummings moved out front, Bachman found his writing chops with Cummings, and the band found producer Jack Richardson. The Guess Who was reborn in 1969 with "These Eyes," a gorgeous ballad that was more pop than rock, but did the job of putting the band back in the spotlight.

Any thought that the band was a two-hit wonder was dispelled by its second album that year, *Canned Wheat,* containing the hits "Laughing" and "Undun," and an early version of "No Time." Powered by Bachman's hooky and often fuzz-toned licks and Cummings' robust voice, these records brought rock & roll honor to the pop charts. The pinnacle was "American Woman," with hard-rock rhythms so infectious that this anti-U.S. rant became an American #1. The album of the same name includes the reworked "No Time" and the "No Sugar Tonight/New Mother Nature" medley. Bachman left after this (to found Bachman-Turner Overdrive, another band adept at making Top 40 hard rock) and was replaced by two guitarists who would later give way to Domenic Troiano. "Hand Me Down World" rocks almost as spitefully as "American Woman," but "Share the Land," though a bigger hit, is a rather clumsily attempted anthem that marks the beginning of the band's decline. They recorded four more albums before disbanding in 1974, the crisply delivered *Live at the Paramount* being the only one still available.

The band's final hit, the novelty dreck of "Clap for the Wolfman" with deejay Wolfman Jack, was an unfortunate coda to an impressive run. As earnest and workmanlike as their album filler was, it does the Guess Who no disservice to say they were about the hits. Ignore the skimpy collections *These Eyes* and *American Woman, These Eyes & Other Hits.* On the other hand, the triple-CD *Ultimate Collection* box is too much for all but the most seriously committed devotee; even the double *Track Record* may overstate the case. The 18 tracks on *Greatest Hits* are all you really need. Add to the ignore category: *The Spirit Lives On* from a "reunion" that often featured bassist Jim Kale as the only original member, and *Running Back Through Canada,* an obligatory live album from the band's legitimate reunion tour of 2000. *Platinum & Gold* is a spotty, incomplete compilation. Waste no time with the deceptive *Extended Versions,* which is nothing more than 10 of the tracks from *Live at the Paramount* reshuffled and repackaged. —B.E.

Rock & roll life stories don't come much more heartwarming than Robert Pollard's. Just over a decade ago, he was a schoolteacher in Dayton, OH, with a fun little hobby: writing peculiar pop songs and recording them on crappy 4-track machines, helped out by a loose assemblage of pals that he called Guided by Voices. Ten years on, Guided by Voices are an internationally admired band, and Pollard's regarded as one of modern rock's most inspired tunesmiths. Now in his forties, he doesn't need to teach anymore; instead, he gets to live out all his Robert Plant and Roger Daltrey fantasies on concert stages across the country. Lucky bastard.

At its best, Guided by Voices' music is a winning combination of power pop, indie rock, punk-metal, and stream-of-consciousness psychedelia buoyed by Pollard's lilting melodies and Daltreyesque vocals. Identifying GBV's best work can be a chore, however. Their early albums (the ones recorded on those crappy 4-tracks) helped turn the term "lo-fi" into a '90s buzzword, but that doesn't make it any easier to hear the jewels scattered beneath the sonic sludge. And because Pollard is a prolific writer who doesn't tend to edit or develop his ideas much, most GBV discs are maddeningly inconsistent, packed with dozens of tracks—many of which are more fragments than songs—that run the gamut from transcendent to unlistenable.

Newcomers curious to sample Pollard's wares should start with the Matador best-of, an enticing introduction to the oeuvre. If you get hooked, pick up *Bee Thousand, Under the Bushes Under the Stars,* or *Mag Earwhig!,* all of which boast a highly favorable manna-to-dross ratio. Any of the remaining Matador and Scat albums will reward further investigation. GBV's two-album tenure on TVT was disappointing, but *Isolation Drills* sounds far less compromised by marketplace considerations than the Ric Ocasek–

produced *Do the Collapse*. Although the five-CD *Box*, which brings together GBV's earliest music (1987–90); the four-CD *Suitcase*, an outtakes (!) collection; and the five-CD/one-DVD *Hardcore UFOs*, a career-spanning potpourri, are obviously meant for the converted, there's good stuff to be found there as well. Still, the only perfect Guided by Voices album is the one you compile yourself. —M.R.

Guns n' Roses

★★	Live! Like a Suicide (Uzi Suicide, 1986)
★★★★★	Appetite for Destruction (Geffen, 1987)
★★★	G N' R Lies (Geffen, 1988)
★★★★★	Use Your Illusion I (Geffen, 1991)
★★★★	Use Your Illusion II (Geffen, 1991)
★★★	The Spaghetti Incident (Geffen, 1993)
★★	Live Era: '87–'93 (Geffen, 1999)
★★★★	Greatest Hits (Geffen, 2004)

Sometimes an album seems like an announcement from the Big Rock Dude in the Sky: its very grooves declare, *This is what must be heard now. Appetite for Destruction* was that kind of inevitable hit. Released at the height of the '80s, *Appetite* expressed the captive energies of young America in a voice—the unbounded scream of W. Axl Rose—that was both horrifying and irresistible. Hard rock seemed so dumb until Guns n' Roses attacked it with smarts, snot, and vitriol, cutting through a decade of hairspray with one nasty punch.

This band of journeymen punks and metalheads had gathered in L.A. to fulfill the get-laid-get-rich dream, and had individually tried glam, indie, and whatever came in between without much success. Together, they found the mix that made hard rock a different beast. What Guns n' Roses did, apparently without much forethought, was embrace contradictions: speed and musicianship, flash and dirt. That's why *Appetite* sounded new—it wasn't any one old thing.

The hard-core rhythm section of Duff McKagan and Steven Adler lit napalm under the butts of riff duelists Slash and Izzy Stradlin, while Rose pinpointed where a punk snarl becomes a metal yell. First track "Welcome to the Jungle" is a Hollywood novel on meth, and what follows never takes a breather: the smack boogie of "Mr. Brownstone," the poisoned anthem "Paradise City," Rose's twisted love-hate song to a hooker, "Rocket Queen." That last song, like the massive power ballad "Sweet Child o' Mine," captured the paradox that made Rose the Golem of rock & roll: The era's most sensitive songwriter was a girlfriend-slapping bigot on a tear. And the band was as mixed-up as Axl's mind, unifying lyricism (via Slash) and scruffiness (Stradlin), romanticism (Rose) and raw power (the rhythm section).

G n' R's personality crisis became tabloid fodder as Rose's control-freak ways clashed with his bandmates' bad habits, nearly destroying the band out of the gate. The double EP *G N' R Lies* made things worse by matching up the group's most tenderoni ballad, "Patience," with the jokey murder ballad "I Used to Love Her" and "One in a Million," in which Rose trashed gays and immigrants over Slash and Stradlin's sloppy guitar sparring. (*Lies* also contains four pleasantly raw live tracks from a 1986 indie release, *Live! Like a Suicide.*) "Million" is unforgivable mostly because it's stupid; usually Rose says the worst with more forethought.

Forethought definitely fed what came next. *Use Your Illusion I* and *Use Your Illusion II* offered a stunned public nearly three hours of serious exploration and wild fucking around. Interband tensions had destroyed group authorship, and Rose's heroics (as well as drugs, which contributed to Steven Adler's replacement by Matt Sorum) strained his bandmates' good-rockin' chemistry. Critics chided Rose for Queen-like minioperas "November Rain" (from *I*) and "Don't Cry" (on both discs), but those songs have endured, while Stradlin jaunts like "Dust n' Bones" now seem efficient but conservative. Throughout *I* and *II*, it's Rose who takes all the interesting turns. But he still needs his band, especially the adventurous stylings of Slash, to properly negotiate them.

I is the more propulsive record, with Stradlin songs, the Wings/Bond cover "Live and Let Die," and vintage G n' R bullshit like "Back Off Bitch" tempering the grandiosity of the centerpiece "November Rain." The psycho fantasy trip "Coma" appeals more to *Appetite* lovers because it's creepy and it rocks. But the lush "Rain" redefines the band—with Dizzy Reed's expressive keyboards giving both Rose and Slash permission to spew emotion, and that hard-rock bottom still bouncing, this song showed how a ballad could be as bloody as a high-speed assault.

II starts in a similarly expansive space and gets even spacier. "Civil War" is a shattered landscape painting; the cover "Knockin' on Heaven's Door" turns Dylan's West into spaghetti. Nastiness and levity (like McKagan's Johnny Thunders paean "So Fine") counter the weirdness of "Breakdown" and "My World" and the extravagance of the riveting, nine-minute "Estranged." Two songs here, however, show that G n' R can still focus to great effect—the cutting "You Could Be Mine" and the plainly inspirational "Yesterdays."

Though endlessly intriguing, the *Use Your Illusion* albums signaled big trouble for Guns n' Roses. Their lack of cohesiveness represented the state of the band. Stradlin, the cowriter who could best focus Axl's excesses, left in 1991. An enjoyable album of punk, glam, and soul covers, *The Spaghetti Incident* suggested that G n' R might be headed back to its spiritual base of shredding rock. But Rose had something different in mind. His growing interest in industrial music and electronica split him from his bandmates, whose ambitions lay more in the Stones direction. Without officially disbanding, the band began its long retreat.

Live Era: '87–'93 attempted to keep interest alive as late as 1999, but the scattered recordings didn't do justice to any of their studio versions. Slash formed his own mildly successful band, Slash's Snakepit; other members pursued other gigs. Rose became the antihero of his own internal rock opera, retreating into the studio, hiring and firing scores of collaborators, and occasionally trotting out a strangely shaped new song. Designed to sell to casual fans looking for something to pop in the players in their Range Rovers, *Greatest Hits* offers the crucial hits and a couple of fun cover tunes. A disastrous Axl-led 2002 tour, canceled halfway through, coincided with his former mates' announcement that they were re-forming without him. Pride may have never dealt so cruel a blow to a rock genius. But for the most Shakespearean of late-20th century stars, the outcome was appropriate. —A.P.

Arlo Guthrie

★★★½	Alice's Restaurant (Reprise, 1967)
★★★	Running Down the Road (1969; Koch, 1997)
★★★	Washington County (1970; Koch, 1997)
★★★	Hobo's Lullaby (1972; Koch, 1997)
★★★	Last of the Brooklyn Cowboys (1973; Koch, 1997)
★★★★	Amigo (Reprise, 1976)
★★★	The Best of Arlo Guthrie (Warner Bros., 1977)
★★★	Mystic Journey (Koch, 1996)
★★	Alice's Restaurant 30th Anniversary Edition (Koch, 1997)
★★★★	Outlasting the Blues/Power of Love (Koch, 2002)

with Pete Seeger

★★★½	Precious Friend (Reprise, 1982)

As sons of titanic fathers go, Arlo has acquitted himself pretty well. The 20 minutes of "Alice's Restaurant"—the draft protest that thrust him to fame at the 1967 Newport Folk Festival—don't hold up to repeated listening, but Guthrie's comfortable, slightly wiggy persona remains welcome. Contending not only with the potent ghost of Woody (whose simple, prophetic songs form America's definitive folk music) but with Woody's disciple Bob Dylan, Arlo has opted generally for easier music. As resolutely anti-authoritarian as his forebears, he champions personal and political rebellions, but he's nostalgic in ways they never were, and his humor has little of their bite.

As a vocalist, however, his sunniness lends his delivery charm. "Coming Into Los Angeles," a doper's gleeful apologia, was a big hit at Woodstock and the best thing off *Running Down the Road; Hobo's Lullaby* featured Arlo's other mass exposure, in a cover of Steve Goodman's sweet "City of New Orleans." *Last of the Brooklyn Cowboys* is an ambitious crazy-quilt of all kinds of American music, from country to Latino; *Amigo* was stronger, and perhaps Arlo's best. *Mystic Journey,* coproduced by Arlo's son Abe, finds Guthrie still vital after a 20-year absence from the mainstream.

Best of Arlo Guthrie isn't very intelligently compiled. A much better example of Guthrie at his finest remains 1979's *Outlasting the Blues,* popular music at its most honest. A rigorous self-examination, spurred on by Guthrie's conversion to Catholicism, it meditates deeply on love, faith, and death, and it's paired, on the 2002 release, with the more polished but still profound *Power of Love. Precious Friend* locates Guthrie squarely within the folk tradition; it's a tasty collaboration with Pete Seeger, a genre presence nearly as august as Guthrie's dad. —P.E.

★★★★★	The Asch Recordings, Vol. 1–4 (Smithsonian/Folkways, 1999)

Weathered, lean, and kindly, Woody Guthrie's face is the face of American folk music. Born in 1912, this astonishingly prolific composer is to the gritty, acoustic story-song what Louis Armstrong is to jazz and Little Richard and Elvis are to rock & roll—the clearest, deepest source. Writing, according to his friend Pete Seeger, a thousand songs in the years between 1936 and 1954, he recorded with absolute fidelity, wit, and grace the struggles and celebrations of the working class. An Okie leftist (his guitar bore the legend "This machine kills fascists"), he was an activist whose politics were the furthest thing from theoretical—he'd suffered the wrongs he strove so passionately to correct. Outlaws from Jesus Christ to Pretty Boy Floyd, from debtors and prisoners to hobos, formed the misfit pantheon from which he took inspiration—and his hard but ecstatic life was an act of protest and of prayer, of anger and of healing.

Influenced by Jimmie Rodgers and the Carter Family, Guthrie also absorbed the strains of cowboy music, country blues, and the music-hall pop of his day; from that tangled yarn he wove his own bardic, simple music, with each song featuring only a few chords, but containing entire condensed volumes of wisdom. His voice was flat, clear, somewhat trebly, and unerringly direct: He sang like a casually chatting prophet. So profound was his effect on not only American music, but on the American character, that it's not just Dylan, Springsteen, and every single folk musician who owes him a debt, but writers like Kerouac and the rest of the Beats, as well as naturalist filmmakers, vernacular poets, and populist politicians. Alongside Walt Whitman, Guthrie remains a national poet laureate.

While all of his records are worth owning, the best place to start is with any of the Asch recordings, or, better yet, the entire four volume set: Its jewels, "This Land Is Your Land," "So Long, It's Been Good to Known Yuh," "Deportee," "Hard Travelin'," and so many more, form the basis of American folk. *Library of Congress Recordings* is an epic three-record set featuring a good handful of Guthrie's dust-bowl ballads and laconically witty spoken intros to the songs. *Folk Songs* pairs him with his friends Leadbelly, Cisco Houston, Sonny Terry, and Bess Lomax Hawes; *Struggle* concentrates on the political work. *Columbia River Collection* is an excellent round of songs from 1941 that had been lost for 40 years; *The Early Years* is a good one-CD intro. Also essential for full appreciation of the man is his 1943 autobiography, *Bound for Glory.* —P.E.

Guy

★★★	Guy (MCA, 1988)
★★½	The Future (MCA, 1990)
★★★	Guy III (MCA, 2000)

With Guy, production's the thing. The songs and the singing are ultrapro on these albums, but it's the sound—a percolating hip-hop feast of slamming percussion and floating keyboard textures—that grabs the listener. This makes sense, as one third of the trio Guy is producer Teddy Riley, virtually the creator of New Jack Swing. New Jack, of course, added new musicality and sonic surprise to all manner of rap—and Guy was a proving ground for the form. Michael Jackson hired Riley to produce *Dangerous* (1991) and to take the Gloved One to hipper ground.

Ten years after, *Guy III* proved that the trio hadn't lost its luster—it still sounded soulfully slick. —P.E.

★★★	Alone and Acoustic (Hightone, 1991)
★★★	Last Time Around: Live at Legends (Silvertone, 1998)

Slash-and-burn guitar solos are the specialty of this Louisiana-born Chicago blues mainstay, whose string-sizzling sides for Chess in the '60s (and session work at the label for artists including Muddy Waters and Howlin' Wolf) made a particularly strong impression on Jimi Hendrix and Eric Clapton. *The Complete Chess Studio Recordings* is an exhaustive collection of his early singles, but MCA's single disc *Buddy's Blues* makes a stronger impact by skipping the filler and diving right into his best-known hailstones and firestorms, like *My Time After Awhile* and *Stone Crazy! A Man and the Blues,* his Vanguard debut and first proper album (previous Chess titles had been singles compilations), is similarly drenched in Stratocaster-ignited fire; highlights include a soulful crack at "Money (That's What I Want)," the playful "Mary Had a Little Lamb," and "Just Playing My Axe," an extension of Keith Richard's signature "Satisfaction" riff. Both *Hold That Plane* and the live *This Is Buddy Guy* are fun if not quite as consistent, though they supplement *A Man and the Blues* handily on the three-disc *Complete Vanguard Recordings.* Touring with harmonica player Junior Wells in the '70s, Guy added R&B licks and chunks of rock to his trick bag. *Buddy Guy & Junior Wells Play the Blues* features indebted guests along the lines of Eric Clapton, while *Drinkin' TNT and Smokin' Dynamite* catches the duo's act at the 1974 Montreux Jazz Festival. *Last Time Around,* recorded in 1993 but not released until '98 (after Wells' death), is a document of their last performance together, at Guy's own Legends nightclub in Chicago. Guy recorded less and less frequently during the '70s and '80s, though his intermittent outings during that era found his stun-power relatively undiminished—witness the righteously wailin' *Stone Crazy!* from 1981. Rhino's *The Very Best of Buddy Guy* is an exemplary overview of the guitarist's career through that point, including a pair of singles he cut for the Cobra label before the Chess years.

Beginning with the Grammy-winning 1991 Silvertone set *Damn Right, I've Got the Blues,* however, Guy's comeback began in earnest. Even with its requisite superstar walk-ons (Clapton and Jeff Beck this time), *Damn Right* is a thoroughly satisfying dose of pure Buddy Guy fretwork. *Feels Like Rain* was a decent followup, though this time the guests start to weigh things down. It's not so much that vocalists Paul Rodgers and Travis Tritt stink up the joint, but their presence is unnecessary; while justifiably best known for his guitar playing, Guy is no slouch as a singer—as comfortable here belting out his own rocker "She's a Superstar" as he is easing into Marvin Gaye's "Trouble Man." Fortunately, *Slippin' In* is Guy's show from start to finish, with a crack band including Chuck Berry pianist Johnnie Johnson and Stevie Ray Vaughan's Double Trouble rhythm section, Chris Layton and Tommy Shannon. Nevertheless, by *Live: The Real Deal,* a strong but predictable set featuring G. E. Smith and the Saturday Night Live Band, Guy's Silvertone run seemed fresh out of ideas—until *Heavy Love* and its followup, *Sweet Tea.* The refreshingly modern, if uneven, *Heavy Love* was nothing if not eclectic, offering everything from jump blues to soul to funk to psychedelic hard rock to a ZZ Top cover ("I Need You Tonight"). But *Sweet Tea* was something completely different, returning Guy to his Southern roots for an inspired—and frequently chilling—collection of swampy hill-country blues numbers cherry-picked from the Fat Possum songbook. Spooky fare like Junior Kimbrough's "Done Got Old" and James "T-Model" Ford's juke-joint shakin' (as opposed to big-city nightclub rockin') "Look What All You Got" aren't Guy's normal stock in trade, but he wears it all convincingly well. The acoustic *Blues Singer,* from 2003, is an even more back-to-basics affair, with many of the songs featuring just Guy, his guitar, and those devastating "Hard Time Killing Floor," "Lonesome Home Blues." —M.C./R.SK.

GZA/Genius

★★	Words From the Genius (Cold Chillin', 1991)
★★★★	Liquid Swords (MCA, 1995)
★★	Beneath the Surface (MCA, 1999)
★★★★	Legend of the Liquid Sword (MCA, 2002)

It's no wonder why Wu-Tang Clan believed they needed to follow up *Enter the Wu-Tang (36 Chambers)* with the double-disc album *Wu-Tang Forever.* In the four years that separated the collective's brilliant debut and its overlong sophomore effort, Wu-Tang's Ghostface Killah, Raekwon, and GZA each expanded the parameters of gangsta rap. Ghostface glammed it up with soul on *Ironman.* Raekwon anticipated the bling era with *Only Built 4 Cuban Linx*'s traditional gangster—not gangsta—tales. And on *Liquid Swords,* Genius (born Gary Grice—it's no wonder he changed his name) went goth, painting the Clan's street grime black.

Before all that, Genius made one very middling album for the Cold Chillin' label. Listening to *Words From the Genius* makes it clear that RZA deserves half the credit for Genius' post–*Enter the Wu-Tang* success. But GZA's syrupy flow—which 50 Cent might evoke if he were to master Rakim's tongue acrobatics—coats *Liquid Swords*' minimal beats with seamless mininarratives that stick to the brain like a tar baby. The Genius emerged from a group known for its creepy sonics and samples, but this album's opener, presumably lifted from a cheesy kung fu movie, chills like no other throwaway intro in hip-hop: Over bottom-scraping strings and a woman's tortured cries, a young boy recalls his father, a "decapitator" for the Shogun (possessed of a brain "infected by devils"), who narrowly escaped assassination by ninjas. On the track that follows, "Liquid Swords," Genius claims to "represent from midnight to high noon" over a trancelike combination of violin cuts, bass wash, and a ghostly beat.

If *Beneath the Surface* came from a deep, dark place, every grain of dirt was washed off it. Principal producer Mathematics brightens the corners, and the nonmusical interludes are either laughably overserious or unfunny jokes. Even the album's highlight and one hit, "Breaker Breaker," stretches itself thin straddling GZA's foreboding, minimalist aesthetic and radio's maximalist party vibe. These were dark times for the Wu-Tang empire, challenged as it was by Jay-Z, Eminem, et al.

With *Legend of the Liquid Sword,* Genius chose to reassert his myth rather than sit on his laurels. The intro features children, not unlike the one who opens *Liquid Swords,* telling the story of Wu-Tang's origins trading rhymes on the "floatin' forum" we call the Staten Island Ferry. GZA spits with renewed vigor over stomping beats and shooting synths, similar to Ghostface's, that evoke marching followers and horns announcing the entrance of royalty. On "Fame," he puns on the names of dozens of celebrities ("water dripped out of Farrah's Fawcett into a glass/she was super fly/Curtis Mayfield her ass/Chris Tucker to a show/Ted Turner to a 'ho"), demonstrating—without boasting—his dominion over all. —N.C.

H

Sammy Hagar

★★½ Standing Hampton (Geffen, 1981)
★★ Three Lock Box (Geffen, 1982)
★★ VOA (Geffen, 1984)

After making his name as the voice behind Montrose, Sammy Hagar launched his own band in 1976 and spent most of the next decade churning out unmemorable assemblages of raucous, glandular hard rock. At this writing, all but three of his 10 solo albums are out of print, and the world is none the worse for it. Nor is Hagar (who has since replaced David Lee Roth in Van Halen), inasmuch as the remaining albums are the least embarrassing remnants of his solo career.

Although *Standing Hampton* has the veneer of hard rock—loud guitars, loud drums, loud everything else—the writing is surprisingly pop-friendly, and it includes two of Hagar's finest: "There's Only One Way to Rock" and the tuneful, touching "I'll Fall In Love Again." *Three Lock Box* pursues that approach into full-blown pop rock, and ends up sounding like bad-imitation Journey, but *VOA*—which includes the got-a-fast-car anthem "I Can't Drive 55"—returns him to the chest-thumping sound of yore, with predictably tedious results. —J.D.C.

Merle Haggard is both a guardian of the country-music tradition and one of that tradition's most important artists. It's tempting but dangerous to dismiss most of the Hag's recent work as inferior to the great Capitol albums from the '60s or some of the interesting titles he released on MCA and Epic in the '70s and early '80s. He's not as consistently brilliant as he was in his younger days, but on sporadic occasions, he's as good as anyone out there. Both *5:01 Blues,* another entry addressing the drudgery of the working life, and *Kern River* have moments of grandeur, and Hag's world-weary delivery brings a cutting edge. Moreover, time has tempered a self-righteous streak in Hag's makeup. Considered as a whole, the body of work Haggard has created is stunning in its stylistic range, historical resonance, and flinty observations on the forces that bring people together and then tear them apart.

Haggard's affinity for the working class is bred in the bone. His family fled from the Oklahoma dust bowl in the early '30s and settled in Bakersfield, CA, where he was born in 1937. Haggard's life came unhinged at age nine when his father died. From that point through his teens, he became familiar with the insides of reform schools and jails, where he was often confined on charges of breaking and entering, petty theft, and other minor offenses. In 1957, he hit rock bottom when he was sentenced to a maximum of 15 years in San Quentin on a robbery charge. Upon his release in 1960, he headed for the Bakersfield club scene, where he found work as a sideman in various local bands. He began recording in 1963 for the small Tally label, and his second single, "Sing a Sad Song," written by Wynn Stewart, who was heading a band for which Haggard was playing, hit the Top 20 on the country chart. After a Top 10 single in 1965, "(My Friends Are Gonna Be) Strangers," Capitol bought out the Tally label, and with it Haggard's contract.

Every aspect of Haggard's earliest work indicates his debt to the plainspoken eloquence of Jimmie Rodgers and the plaintive but solid vocal style of Lefty Frizzell. He has also named Bing Crosby as an influence, and indeed, some of his bluesier phrasings recall Der Bingle's subtle touch. Also, the spirit of Bob Wills hovered over Haggard's eclectic approach. Fittingly, Haggard assembled a band, the Strangers, that could move easily between folk, country, and Western swing; its members included lead guitarists James Burton and Roy Nichols, rhythm guitarist Glen Campbell, Glen D. Hardin on piano, and the estimable Ralph Mooney on pedal steel.

After establishing himself with some standard drinking and cheating songs, Haggard dug into deeper material, beginning in 1966, when he recorded Liz and Casey Anderson's "I'm a Lonesome Fugitive." He also made public his own sordid past and began mining it, immediately penning one of his most poignant songs, "Sing Me Back Home," reportedly written for a friend on San Quentin's death row. These two songs brought an implicit political dimension to Haggard's work that would become more pronounced in the following years, when songs such as "Okie From Muskogee" (written, Haggard insists, as a goof) and "The Fightin' Side of Me" (a conscious blast aimed at Vietnam War protesters) were embraced first as anthems by Nixon-era right-wingers, and shortly thereafter as inspired satires by a younger generation at odds with the president's agenda. This seemed to amuse Haggard, who had taken note of the changing times during a visit to Sunset Strip in the late '60s, where he saw "hippies running down the street with Bibles under their arms and pencils up their asses."

However much of a hero he became to the right wing, Haggard rarely let politics intrude so blatantly on his music again. His best songs from the Capitol years were autobiographical gems on the order of "Mama Tried" and "Hungry Eyes," deeply felt and often tragic adult love songs ("The Emptiest Arms in the World," "Someday We'll Look Back," "It's Not Love [But It's Not Bad]"), and observations on the struggles of the working class. The sadly out-of-print *A Working Man Can't Get Nowhere Today* (1977) is the most sustained statement of policy from this period, and it's also as tough a set of country blues as was released in the '70s. (There is, however, no excusing the racist sentiments of "I'm a White Boy.") *The Best of the Best of Merle Haggard* represents the highlights of the Capitol years, but boiling down Haggard's work to "hits" ignores much of what is essential about the man. All of the above-mentioned albums are worth the price of admission, as are a tribute to Hank Williams and Lefty Frizzell, *The Way It Was in '51; High on a Hilltop;* and the laconic *30th Album,* which finds Hag dipping into blues, Western swing, and traditional country in spare settings.

The MCA and Epic years represent periods of retrenchment, consolidation, and, of late, renewal. Boozing and broken hearts are the dominant themes, save for a recent return to social commentary. If you sift through these selections, a few treasures emerge. By far his best from these years is *Serving 190 Proof,* cut in the midst of a midlife crisis. Hag's contradictory feelings about his life and career produce some mesmerizing, though unsettling, moments; enigmatic and moving, it's a first-rate effort. Apart from this album and the excellent, out-of-print *Ramblin' Fever,* the MCA years are aptly summarized on *The Millennium Collection. Rainbow Stew/Live* captures the star and his band at their peak.

As his music took on a darker shade of the blues, Haggard remained introspective on his Epic albums. *Going Where the Lonely Go* (1983) is one of the best of this ilk, though its followup, *That's the Way Love Goes,* finds him at his contradictory best on "What Am I Gonna Do (With the Rest of My Life)" and the album's closer, "I Think I'll Stay." Three duet albums, *A Taste of Yesterday's Wine,* with George Jones, and *Poncho and Lefty* and *Seashores of Old Mexico,* both with Willie Nelson, team Haggard with vocalists who can challenge him; the results, though spotty, are always interesting.

There are dozens of Haggard compilations in circulation; the two-CD sets *Lonesome Fugitive* and *40 #1 Hits* are excellent overviews of his career and excellent places to start. Perhaps finding inspiration in the late career renaissance of Johnny Cash, Haggard has made two of his best albums in decades for the punk label Epitaph: the spare, unforced *If I Could Only Fly* and soulful *Roots.* Haggard's singing remains remarkable in his command of phrasing and inflection. He sounds like he knows a little bit more than he's letting on; his great art is in suggesting you better beware of what's coming and strap yourself in for the bumpy ride. With Hag, it's take it day to day, make your stand, and hope the sun comes up tomorrow. —D.M.

Bill Haley & His Comets

★★★½ Bill Haley and His Comets—From the Original Master Tapes (MCA, 1985)
★★ Greatest Hits (MCA, 1991)
★★★½ The Millennium Collection (MCA, 1999)
★ Golden Classics/Lucky 13 (Golden Lane, 2000)

Bill Haley laid much of the groundwork for a cultural and musical rebellion in the early 1950s, but by the end of the decade had been unceremoniously dumped by the genre and the audience he had helped create. Haley died in 1981 a lonely, alcoholic, and mostly forgotten figure, but the wonderful music he made with his band, the Comets, survives and will not be denied.

As early as 1951 he was forging a new style out of country & western, R&B, swing, and blues that eventually featured among its sound signatures a slapback stand-up bass that later became a defining feature of rockabilly music. Also, before Carl Perkins, before Chuck Berry, before Scotty Moore, there was Danny Cedrone, the Comets' extraordinary guitar player, whose intricate, advanced solo on Haley's breakthrough hit, "Rock Around the Clock" (almost the same solo he had crafted for Haley's 1952 single "Rock the Joint"), could be the first great rock & roll guitar break in history, nearly impossible to reproduce by even the most gifted of players, and a clarion call to an entire generation of budding pickers in postwar America. When Cedrone died of a heart attack in 1954, Haley found another guitar stalwart in Frank Beecher, who came in with solid jazz credentials, having been influenced foremost by Charlie Christian, and boasting a résumé that included stints with jazz bands led by Buddy Greco and Benny Goodman. His approach was less flamboyant than Cedrone's but more melodic and, in his rhythmic sense, more inventive than his predecessor's. A band having even one instrumentalist of Cedrone's or Beecher's caliber would consider itself fortunate; having one replace the other is a luxury few have been allowed. The rest of the Comets were no slouches either, and in wild man Rudy Pompilli, in particular, the band laid claim to having one of the founding fathers of rock & roll saxophone. The final, crucial element that put Haley over was the A&R chief and producer who signed him to Decca, Milt Gabler, a visionary himself who understood that something new was in the air musically, knew how to get the most out of the rudimentary recording gear of the time, and used a good studio, the Pythian Temple in New York City, to maximum effect. Up to the point when he started working with Haley, Gabler had been one of the top jazz producers around, having worked with everyone from Louis Armstrong and Ella Fitzgerald to Louis Jordan, whose jump-blues recordings laid the structural foundation for rock & roll. (He had also founded the first independent label, Commodore, whose roster included some of the jazz world's most respected instrumentalists in addition to one of its preeminent vocalists, Billie Holiday.)

Born William John Clifton Haley on July 6, 1925, in the Detroit suburb of Highland Park, Bill Haley began his professional career as a country & western artist, known in his younger years as the "Rambling Yodeler." His recording career began in 1948, when he and his band, the Four Aces of Western Swing, cut three singles for the Cowboy label. From that time into early 1952, Haley recorded for five other labels; in 1949 the band's name was changed to the Saddlemen, then changed again in 1952, after signing with the Essex label, to Bill Haley and His Comets. Haley's first hint of things to come occurred in 1951, when he cut a cover version of Jackie Brenston's "Rocket 88" for the Holiday label. His single was unsuccessful, but Haley saw enough reaction to it to know there was a large, young, and hungry audience eager for something new. For Essex in 1952, Haley and the Comets cut an uptempo side called "Rock the Joint," which sold 75,000 copies; the next year Haley came up with an original song, "Crazy Man Crazy," that spoke the new lingo and made the charts to boot.

Come 1954, Haley changed labels again, this time signing with Gabler to record for Decca, with "(We're Gonna) Rock Around the Clock" being the group's initial release. A modest success, "Rock Around the Clock" set the stage for Haley's explosion into the mainstream with his next single, a sanitized cover version of Joe Turner's "Shake, Rattle and Roll," which made the Top 10 in the U.S. and in Britain, and sold a million copies. In 1955 "(We're Gonna) Rock Around the Clock" was rereleased and soared to #1; a rebel image also accrued to the rather square, avuncular band leader—who had long since discarded his western wear in favor of loud, plaid sport coats and a spit curl that looped down onto his forehead—as a result of the song being used as the theme for the film *The Blackboard Jungle,* a vivid depiction of urban juvenile delinquency in which rock & roll is inextricably linked to the aberrant behavior of adolescents. In 1955 and 1956 Haley cut 11 Top 40 singles and was the best-known rock & roll artist in the world—riots greeted his 1957 shows in Britain. But his run was doomed with the ascension of Elvis Presley in 1956, followed by a host of other young, handsome, musically dynamic artists who could match the fire of Haley's recordings with their own and had the advantage in being energetic, often rambunctious performers. The tepid "Skinny Minny" in 1958 marked Haley's final Top 40 appearance. He remained active on the concert circuit—especially overseas, where his popularity never waned—and continued recording, without success, for Decca into 1964. For the remainder of the decade, and periodically throughout the '70s, Haley always found a home musically, recording for a number of labels (one of them being Orfeón, based in Mexico, which eventually released three albums' worth of Haley's recordings); in 1971 he made a last stab at returning to the country market from whence he sprang with *Rock Around the Country,* recorded for the Sonet label in Nashville with some of the original Comets, supplemented by several of Music City's A-team session players, and produced by the respected blues scholar Sam Charters. Two other Charters-produced albums for Sonet were also released, the last coming in 1979. "Rock Around the Clock" was introduced to a new generation of fans via the TV show *Happy Days,* but there was no longer a market for Haley's music, and Haley himself struggled to keep the flame burning after Rudy Pompilli lost his bout with cancer in 1976. A three-year hiatus from the music business ensued, then a half-hearted, ill-conceived comeback fizzled, and Haley went into seclusion until his death.

Any of the MCA titles in Haley's catalogue are recommended best bets for most of the prime stuff—or at least all of the hits. Unfortunately, Haley's pre-Decca recordings, particularly the Essex sides that would best show the progression of the artist's music from staid C&W to the big beat of prototypical rock & roll, tend to pop up only on short-lived budget labels. Caveat emptor when it comes to Golden Lane's *Golden Classics/Lucky 13,* as its selections are rerecordings of the classic Haley canon. Also, some online retail sites offer Haley's Orfeón recordings in a double-CD package titled *30 Exitos,* but these would be of interest only to completists, despite some spirited performances. —D.M.

Hall & Oates, the most commercially successful boy-boy duo of the rock & roll era, began in Philadelphia as a pair of soulful folkies, or perhaps folkful soulies. Daryl Hall was the tall, blond lead vocalist, John Oates the mustachioed Gabe Kaplan look-alike, and together they pursued the mellow R&B sound of the Stylistics or the Chi-Lites, although they were initially lumped together with '70s soft-rock duos such as Seals & Crofts, England Dan & John Ford Coley, and the Captain & Tennille. Their early hits were love-bead ballads such as "She's Gone" (one of their few actual harmony duets) and "Sara Smile" (better than Starship's "Sara," not as good as Dylan's, about even with Fleetwood Mac's). Hall & Oates became stars in 1977 with the excellent "Rich Girl," which set a new standard for AM radio profanity by (1) hitting #1 and (2) repeating the word *bitch* three times. Mystery surrounded them: Were Daryl and John lovers? Was "Rich Girl" secretly about Bryan Ferry? What did Oates do, exactly? But they couldn't follow it up, and soon descended back into the soft-rock minor leagues.

Voices was the album that turned Hall & Oates into a hit machine. It wasn't any more solid than *Along the Red Ledge* or *X-Static,* with an awful cover of "You've Lost That Lovin' Feeling." But it did have "Kiss on My List," a slick, bouncy #1 synth-pop smooch that taught Hall & Oates the way to make rock girls, disco girls, and new-wave girls scream together. Wasting no time, they banged out *Private Eyes* and *H_2O,* easily their most consistently hooky albums, and scored hit after hit: "Did It in a Minute," "You Make My Dreams," "Private Eyes," "I Can't Go for That (No Can Do)," and "Head Above Water," the catchiest song on *Private Eyes* although it was never a single. They still had a weakness for boring ballads ("One on One"), but redeemed themselves with sick thrills such as "Maneater," which warned about "a she-cat tamed by the purr of a Jag-u-ar." *Big Bam Boom* found the boys slipping a bit, with echoey production to hide the slackened songcraft, but "Out of Touch" did provide a serial-monogamy credo for the '80s: "Smoking guns, hot to the touch/We'd cool down if we didn't use them so much."

Hall & Oates went on hiatus for a few years, returning with *Ooh Yeah!* in the summer of 1988. But they quickly found that relying on the old man's money was a lot easier than relying on the young girls' money, because their entire fan base had moved on to Bobby Brown and Keith Sweat. "Everything Your Heart Desires" was their last big hit; after that, they settled for a low-key presence, occasionally recording minor hits such as the pleasant "Promise Ain't Enough." Oates' solo career peaked with the title of his 2002 album, *Funk Sui;* Hall's peaked with his 1993 hit "I'm in a Philly Mood," although he'd been in a Philly mood for the entirety of his career, and therefore perhaps should have called the song "I've Got a Philly Obsessive-Compulsive Disorder." By now, we all know that Daryl and John were not actually lovers; however, that leaves the question of what Oates did as mysterious as ever. —R.S.

Hammer

★★★½	Let's Get It Started (Alliance, 1988)
★★★	Please Hammer, Don't Hurt 'Em (Capitol, 1990)
★★	Too Legit to Quit (Capitol, 1991)
★★	The Funky Headhunter (Giant, 1994)
★★	Inside Out (Giant, 1995)
★★★½	Greatest Hits (Capitol, 1996)

The ultimate *Behind the Music* subject: Because his success owes more to hard work and showmanship than to originality, Hammer (who called himself MC Hammer on his first two albums) was frequently reviled as a sellout and a fake in the hip-hop community. The fact is, he didn't do anything musically that Puff Daddy hasn't: His music beds not only borrow from obvious sources—Queen's "Another One Bites the Dust" for "Let's Get Started," Rick James' "Superfreak" for "U Can't Touch This," James Brown's "Superbad" for "Here Comes the Hammer"—but often act as straight-up covers, like *Please Hammer*'s embarrassing remake of the Chi-Lites' "Have You Seen Her." Like Puffy, Hammer understands the value of a strong beat (particularly on *Let's Get It Started*) and knows how to wring every ounce of energy from a dance groove. The relentless criticism took its toll, as *Too Legit to Quit* finds the rapper avoiding sample-based grooves and hedging his bets by moving toward a more explicit R&B sound, an approach that works passably on "This Is the Way We Roll" and the album's title tune, but fizzles elsewhere. On the gangsta'd-out *Funky Headhunter,* Hammer tries to play catch-up with Snoop and Dre, to bad effect; *Inside Out* finds him totally at sea. *Greatest Hits* shows that he might have been better off persevering with his original shameless good-timey sound. —J.D.C./N.B.

Butch Hancock and Jimmie Dale Gilmore

★★★★	Two Roads (Caroline, 1992)

In Texas, where the song is king, Butch Hancock is both poet and jester, bringing a wry literary sensibility rooted in traditional folk and country. With Joe

Ely and Jimmie Dale Gilmore, he's one of the founding members of the Flatlanders—alternative-country godfathers who bonded in the late '60s over wide-ranging interests in Eastern philosophy, Beat literature, and *Mad* magazine as much as the music of Bob Dylan, Hank Williams, and the Beatles. They recorded one highly influential album, later issued as *More a Legend Than a Band,* before scattering for solo careers.

Hancock, who grew up on a farm outside Lubbock, was the Flatlanders' primary songwriter, and his solo debut, *West Texas Waltzes & Dust-Blown Tractor Tunes,* is focused more on songs than sonics. His craggy singing, acoustic guitar strumming, harmonica tooting, and foot stomping are raw as a West Texas wind, and the songs update the Americana tradition of Harry Smith's *Anthology of American Folk Music,* Woody Guthrie, early Dylan, and Hank Williams Sr.

The Wind's Dominion and *Diamond Hill* flesh out but don't overpower the songs with band arrangements orchestrated by pedal-steel virtuoso Lloyd Maines. *Firewater . . . Seeks Its Own Level* is even better, with Hancock fronting a small combo in a club setting that suits his offhanded gifts. *Own & Own, Own the Way Over Here,* and *Eats Away the Night* rely on older songs, some of which (the political commentary "Talkin' About That Panama Canal") sound dated. But the sharper production values on *Eats Away* lead to definitive versions of Hancock classics such as "Boxcars" and "If You Were a Bluebird."

You Coulda Walked Around the World brings Hancock full circle, back to the sparse country-folk of his debut. The back-cover image depicts Hancock pondering life alongside sculptures of Socrates and Stan Laurel, and it's a fitting snapshot of his music. Between those two sensibilities, the songwriter stakes his claim as a true Texas original. —G.K.

Jazz was once popular music, but as far as the jazz community of today is concerned, the less said about that, the better. For many fans and critics, jazz that is dissonant, demanding, and rhythmically complex is to be cheered, while jazz that is funky and direct is to be scorned. As such, the jazz community remains baffled and bemused by Herbie Hancock, a gifted composer and keyboardist who successfully plays both sides of the street.

Most jazz fans think of him as having started as the pianist in Miles Davis' classic mid- to late-'60s quintet, where his playing bridged the gap between the cool intellectuality of Bill Evans and the edgy abstractions of McCoy Tyner. But actually, Hancock's first big splash was in the pop end of jazz, having composed the Mongo Santamaria hit "Watermelon Man" (which went to #10 in 1963). His own take on the tune, recorded that same year and included on *Takin' Off,* is more hard bop than Latin pop, and uses its supple groove to fuel the improvisatory musings of Freddie Hubbard and Dexter Gordon. Hancock radically reinvented the tune 11 years later with his first dip into electro-funk, *Headhunters.* But there "Watermelon Man" played second fiddle to "Chameleon," the only single to put him within spitting distance of *Billboard*'s Top 40 (it peaked at 42).

But let's get back to the '60s. Where his debut found him playing the sort of funky jazz Horace Silver was known for (though even Silver rarely got so soulful), *My Point of View* finds Hancock moving toward a more abstracted, Davis-oriented sound—although "Blind Man, Blind Man," featuring guitarist Grant Green, does seem to proceed from that "Watermelon Man" groove. His subsequent sessions for Blue Note reflect a steady move away from pop-jazz. That doesn't mean they aren't tuneful; the dreamy title track from *Maiden Voyage,* for instance, quickly became a jazz standard. But *Inventions and Dimensions* (which was briefly available under the title *Succotash*) proffers loosely structured experiments with Latin rhythms; *Empyrean Isles* and *Maiden Voyage* are Davis-influenced small-group sessions with Freddie Hubbard on trumpet; *Speak Like a Child* and *The Prisoner* use slightly larger ensembles to extend the coloristic possibilities of his music. The casually curious may want to settle for Blue Note's *The Best of Herbie Hancock,* which highlights the best of these recordings, while completists should seek *The Complete Blue Note Sixties Sessions,* which includes everything from Hancock's solo albums as well as some notable sessions he cut as a sideman.

Fat Albert Rotunda was Hancock's first album after leaving Blue Note in 1969, but it's more of an aside than an indication of where he was headed. Consisting of material he wrote and recorded for Bill Cosby's *Fat Albert* cartoon series, its funky, R&B-oriented material is actually more of a piece with Hancock's *Blow-Up* score (best known for "Bring Down the Birds," which Deee-Lite sampled for "Groove Is in the Heart") than with his regular jazz output. "Li'l Brother," in fact, seems a continuation of an earlier attempt at instrumental R&B called "Don't Go There" (included on the *Complete Blue Note* set).

Mwandishi, Hancock's first proper album for Warner Bros., was a radical move away from the sound of his Blue Note recordings, recalling the rock-influenced sound of Davis' *Bitches Brew* sessions but augmenting it with the Gil Evans–ish horn voicings heard on *The Prisoner. Mwandishi* is dark and dreamy, with its rolling rhythms and swirling electronics, while the sonic tapestry of *Crossings* conveys an almost otherworldly sense of atmosphere, particularly on the haunting, synth-colored "Quasar." But *Sextant* is the standout, thanks to its richly detailed sound and intricate interplay.

Hancock changed direction again with *Headhunters,* dumping two horn players and devoting more energy to synths than to electric piano. But it was the pop credibility he earned through the success of "Chameleon" that truly altered the course of his career. The music on *Headhunters* isn't R&B per se, but Hancock was getting there, and his output became funkier and funkier. *Thrust* plays down the more abstract elements that rounded out *Headhunters,* emphasizing the music's pulse, while *Man-Child* added R&B guitarists to the mix, bringing depth to the groove without compromising the improvised content. (These are the albums emphasized in Columbia's *The Best of Herbie Hancock.*)

Yet despite his pop success (*Headhunters, Thrust,* and *Man-Child* all cracked the Top 40 of the *Billboard* album chart), Hancock hadn't given up on jazz. The import-only live album *Flood* shows how easily Hancock's mid-'70s band could move from straight jazz to groove-heavy funk without compromising its sound or identity. *Secrets* went for a similar balance in the studio, and even included an imaginative update of "Cantaloupe Island." *V.S.O.P.,* a 1976 concert recording, presents three sides of Hancock—his then-current funk band, the reunited *Mwandishi* group, and an acoustic quintet featuring his old Davis bandmates Wayne Shorter, Ron Carter, and Tony Williams (Hubbard did the honors on trumpet). Of the three, it was the acoustic group that thrilled jazz fans most, and so they were reconvened for an album of their own: *V.S.O.P.—The Quintet.* Although it has much the same sound as the Davis quintet's classic recordings, it lacks the fire and daring of the Davis albums. (Far more persuasive is the import-only *Herbie Hancock Trio,* which finds Hancock, Carter, and Williams pushing limits with abandon.)

Neoconservatism has always sold well with jazz fans, however, and so Hancock regularly released Davis-schooled live albums with all-acoustic bands. *Quartet* features a young and brash Wynton Marsalis; *A Tribute to Miles Davis* uses shameless Davis-clone Wallace Roney. Fortunately, not all of Hancock's "traditional" recordings mine that vein or are as predictable. *1+1,* an album of duets with Shorter, is quiet, touching, and wonderfully lyrical—a staggering performance by both. *The New Standard,* meanwhile, inverts the pop formula by offering straight-ahead jazz treatments of such tunes as Peter Gabriel's "Mercy Street" and Nirvana's "All Apologies."

By that point in the '90s, it seemed as if Hancock had put his funk days behind him. Although his '70s electronic albums after *Man-Child—Secrets; Feets, Don't Fail Me Now; Monster; Lite Me Up;* and *Magic Windows*—aspired to mainstream R&B, Hancock lacked both the aesthetic insight and commercial touch of Quincy Jones. In a word, the albums stank. Mercifully, hip-hop and high technology saved the day.

With *Future Shock,* Hancock uses drum machines, digital synths, and DJ Grandmixer D.ST to conjure the sound of the urban jungle, an approach that turned "Rockit" into a club hit (and earned Hancock airtime on MTV). *Sound System* adds a world-beat flavor to the mix, thanks to Hancock's use of Gambian griot Foday Musa Suso (with whom he later recorded the wonderfully exotic *Village Life* and a somewhat more predictable live album, *Jazz Africa*), while *Perfect Machine* recruits P-Funk bassist Bootsy Collins and Ohio Player LeRoy "Sugarfoot" Bonner. The ambitious *Dis Is da Drum* found Hancock once again flirting with R&B, but the music was too cerebral to successfully engage the booty. Maybe that's why *Future 2 Future,* despite its use of vocals and flirtation with drum and bass rhythms, chose to offload its overt "pop" content in separately sold remixes; overall, the album has more in common with *Sextant* than *Headhunters.*

In addition to his solo career, Hancock has also been doing soundtrack work since 1966, when he scored Michelangelo Antonioni's *Blow-Up.* Although his contributions can be heard in films ranging from *Death Wish* to *House Party 2,* he's probably best known for the elegiac *Round Midnight,* a score as jazz-soaked and moody as the film itself. —J.D.C.

Hanson

★★★★	Middle of Nowhere (Mercury, 1997)
★★★	Snowed In (Mercury, 1997)
★★½	3 Car Garage: The Indie Recordings '95–'96 (Mercury, 1998)
★★	Live From Albertane: Hanson Tour (Mercury, 1998)
★★★	This Time Around (Island, 2000)
★★★	Underneath (3CG, 2004)

The Hanson brothers came along in the summer of 1997 with "MMMBop," a song bursting with guitars and harmonies and shockingly unstupid lyrics about the meaning of life. Isaac (16, guitar, the Shy One), Taylor (14, keyboards, the Hot One), and Zac (11, drums, the Bonaduce) only took an mmmbop to melt every barrette in America, as the home-schooled Tulsa boys roller-boogied through a video that looked like a *Dynamite* cover shoot circa 1974, a kiddie utopia of after-school California sunshine. They've never topped the super-sugar-crisp rush of "MMMBop," but songs like that only roll around once in any band's career—the Jackson Five never topped "I Want You Back," either. And Hanson has already made more good records than the Bay City Rollers, Bo Donaldson and the Heywoods, Tony DeFranco and the DeFranco Family, and Kristy and Jimmy McNichol *combined!*

With a little help from its producers, the Dust Brothers, Hanson plays its own instruments and writes its own songs on *Middle of Nowhere,* as Liz Phair look-alike Taylor hits high notes that could make a grown woman blush. "Where's the Love" made teen girls scream "Right here, baby!" at the Taylor posters on their walls, while "Weird" and "Yearbook" were pure adolescent ache. But the Hanson boys were too young to fall in love, and we were all too young to know. One thing Hanson was definitely too young to understand was quality control, because it flooded the market with a Christmas album ("Everybody Knows the Claus"!), a live album ("Money [That's What I Want]"!), and early demos (boys, boys—enough already). By *Underneath,* they already sounded old-fashioned; in the wake of "MMMBop," the radio had clogged up with teen-pop disco, while Hanson was evolving into a bang-up rock & roll band. But "MMMBop" still sums up the punch of a perfect pop song—it comes out of nowhere to rock your socks off, and then in an mmmbop, it's gone. —R.S.

Happy Mondays

Black Grape

★★★★	It's Great When You're Straight . . . Yeah (MCA, 1995)

Anyone who heard the single "24-Hour Party People" when it came out in 1987 would have been hard-pressed to predict the eventual success and cultural import of its authors, the Happy Mondays. A mess of nonsensical lyrics ("24-hour party people, plastic face can't smile the white's out") that were slurred by the band's buffoonish singer, Shaun Ryder, over a stupidly repetitive synth melody, the song didn't sound like the work of a band that would kick-start the biggest English rock scene into the '90s. And yet kick-start a scene they did. With their heady combination of acid house, Northern soul, and '60s psychedelia, they provided the soundtrack for British kids' ecstasy-fueled nights out, and for a time turned Manchester into "Madchester," the epicenter of British music.

Pills 'n' Thrills and Bellyaches is the best of the band's oeuvre, the sound of Madchester at its peak. (The Mondays' first two studio releases, *Squirrel and G-Man Twenty Four Hour Party People Plastic Face Carnt Smile [White Out]* and *Bummed*, are no longer in print in the States.) The band's extended psychedelic jams transport rather than bore, and Ryder, who has finally learned to sing, displays a unique twisted genius on such lyrical gems as "I'm here to harass you/I want your pills and grass, you/You don't look first class, you/Let me look up your ass, you," from "Holiday," the band's ode to customs officials. The record also contains the Mondays' best song ever, the exuberantly trippy "Step On." A rather muffled version of that song, along with much of *Pills 'n' Thrills,* gets reprised on *Live,* a stopgap album that was recorded at Leeds' United Football Ground—quite possibly from beneath the bleachers, if its muddied tone is any indication.

For the Mondays' next—and last—studio release, *Yes, Please,* the group repaired to Barbados, purportedly so the drug-addled members could get clean. But although the island was free of heroin, Ryder's primary addiction, it happened to be rich in crack, and *Yes, Please* sounds as if the Mondays were high on the stuff the entire time they were recording. The music drags, Ryder's lyrics make no sense, and choruses are repeated at least 10 times per song. The old Madchester magic does return on the songs "Sunshine & Love" and "Angel," but since they appear on *Double Easy,* a 16-track best-of, *Yes, Please* is entirely passable.

When the Mondays disintegrated in 1993, it seemed impossible that Ryder could create anything quite so brilliant again. Yet two years later, he returned with Black Grape, a group that not only was as good as the Mondays but was actually better. The ironically titled *It's Great When You're Straight . . . Yeah* is a nonstop romp that takes the Mondays' dance sensibility and focuses it with straight-ahead Brit-pop melodies, funk, and rap, the latter courtesy of Ryder's new partner in rhyme, the rapper Kermit. Ryder's lyrics approach whole new heights of genius here; soaking his lines in pop culture and (sac)religious references, he comes up with such doozies as "Jesus was a black man/No, Jesus was Batman/No, no, no, no, that was Bruce Wayne," from "Kelly's Heroes." Sadly, the momentum could not be maintained: After releasing a subpar followup, *Stupid, Stupid, Stupid* (now out of print), Black Grape split up. —N.P.

Ben Harper

★★★	Welcome to the Cruel World (Virgin, 1994)
★★	Fight for Your Mind (Virgin, 1995)
★★	The Will to Live (Virgin, 1997)
★★★½	Diamonds on the Inside (Virgin, 2003)

Ben Harper and the Innocent Criminals

★★★	Burn to Shine (Virgin, 1999)
★★★	Live From Mars (Virgin, 2001)

This California native's four principal weapons are a smooth, airy voice; enviable facility on an unusual instrument (the Weissenborn lap steel guitar); a deep love for American roots music; and a righteous moral compass. By combining these features, he's come up with a socially and spiritually conscious soul/folk hybrid that's often a little lightweight, but never less than pleasant.

Predominantly acoustic, *Welcome to the Cruel World* is the closest Harper's come to making a straight folk record. Though the songs deal with big issues, most notably racism, Harper's too loose to get angry, and the prevailing vibe is one of quiet dignity, broken only by the jaunty, zydeco-infused "Mama's Got a Girlfriend Now." *Fight for Your Mind* dabbles with funk grooves, but except for the extended feedback freakout on "God Fearing Man," it's pretty mellow stuff. Titles like "Oppression," "People Lead," and "Power of the Gospel" show where Harper's head is at; they also display a tiresome penchant for soapbox sloganeering.

With its deft production touches—a backward track here, a cool vocal filter there—*The Will to Live* is a more engaging listen, but by now Harper's laid-back approach is becoming a liability. Even when the band's raging behind him, his voice barely rises above a hushed coo. Finally, on *Burn to Shine,* Harper allows himself to cut loose as a singer, fulfilling the promise he'd always shown. It doesn't hurt that the songs are among his best, from the Curtis Mayfield stylings of "The Woman in You" to the New Orleans brass-band whimsy of "Suzie Blue" and the raunchy, Stones-like title track. Harper's winning streak continued with *Diamonds on the Inside,* which found him further refining and expanding his sound; highlights include the self-explanatory "Bring the Funk" and the a cappella gem "Picture of Jesus," guest-starring Ladysmith Black Mambazo. The guy still preaches too much, but his grooves are so tight that it seems silly to complain.

Two lengthy in-concert discs may be more Ben Harper than a non-fan needs. Still, *Live from Mars* is valuable for demonstrating just how incendiary a performer Harper can be. The covers of Marvin Gaye's "Sexual Healing" and Led Zep's "Whole Lotta Love" are great fun, too. —M.R.

Slim Harpo

★★★½	Raining in My Heart (1961; Hip-O, 1998)
★★★★½	The Best of Slim Harpo (Hip-O, 1997)
★★★★½	The Excello Singles Anthology (Hip-O, 2003)

James Isaac Moore, professionally known as Slim Harpo, was so naturally gifted a musician that he was credible whether he was singing gutbucket urban blues, R&B, or country blues. Even a partial list of artists and bands that have covered Harpo's songs indicates the broad sweep of his influence, starting with the Rolling Stones (who even paraphrased Harpo's song "Got Love if You Want It" for the title of their first live album, *Got Live if You Want It*) and continuing on through the Kinks, Van Morrison and Them, Dave Edmunds (in Love Sculpture), the Jeff Beck–era Yardbirds, Alex Chilton, and the Moody Blues, who took their band name from a Harpo track. His oft-covered song "I'm a King Bee" has become part of the lingua franca of blues rock; "Rainin' in My Heart" has found favor with blues and country singers through the years.

Harpo's first single, 1957's "I'm a King Bee," features lascivious double-entendre lyrics ("I'm young and able/to buzz all night long"); a laconic vocal that would become Harpo's signature; a solid, stomping rhythm courtesy of drummer Clarence "Jockey" Etienne; some tasty, lowdown harmonica work by Harpo; and Clinton "Fats" Perrodin's ostinato top-string bass lick simulating a bee's buzzing sound. The flip side, "I've Got Love if You Want It," is a variation on the Bo Diddley rhythm, right down to the Jerome Green–style maracas supplying some extra rhumba juice to the upbeat affair. Harpo's second single, "Wonderin' and Worryin' " b/w "Strange Love," was the first evidence on record of Jimmy Reed's influence on Harpo's style, both in the heavy groove and in the propulsive harmonica work.

These worthy efforts were finding little success on the sales front (although in Britain an entire generation of young rockers was eating up Harpo's work). That changed in 1961, when Harpo and Miller came up with "Rainin' in My Heart," a measured shuffle with a decidedly country feel, a haunting, minor-key harmonica intro and fills, a midsong narration not uncommon to country singles of the day, and a weary vocal that conjures a portrait of a man entrenched in deep regret over his mistreatment of the good woman who left him.

Rather than capitalizing on their good fortune with more recordings, though, Harpo and his producer, J. D. Miller, began feuding over his contract; at one point Harpo bolted for the Imperial label in New Orleans, but the sessions went unissued after Miller threatened a lawsuit. Harpo then returned to Miller's studio in Crowley, but three years and a moment had passed by the time Excello issued a feisty instrumental, "Buzzin'," which featured Harpo's gutsy, Little Walter–style harmonica lines bouncing off Al Foreman's angular single- and multistring guitar solos redolent with quotes from jazz, blues, and pop styles in rapid succession. Despite the flop of "Buzzin'," Harpo persisted, and in 1965 he and Miller came up with another chart winner. "Scratch My Back" is about as perfect an example of swamp music as anyone has ever put on record, its identifying features being a murky ambience, an irresistible, slinky, mid-tempo groove, some engaging chicken-pickin' guitar work by either James Johnson or Rudolph Richard, some odd woodblock licks that surface in the song's last few bars, and a low-key, spoken vocal by Harpo so benign in its delivery you could almost overlook its salacious message—as a vocalist, Slim Harpo was nothing if not subversive, really one of a kind in that department. One of the final sessions Harpo cut with Miller produced one of their best efforts, the relentless "Shake Your Hips," a John Lee Hooker–style boogie number that cooked mightily but didn't do much for Harpo's commercial fortunes (it resurfaced in 1972 as "Hipshaker" on the Stones' *Exile on Main Street* album). In 1970 Harpo was contracted to tour Europe and had plans to record in London with some of the British musicians who numbered him among their influences. Neither event happened. A couple of weeks after an early January recording session in Baton Rouge, the 46-year-old Harpo, still a young man in seemingly good health, suffered a massive heart attack and died on January 31.

Hip-O's *The Best of Slim Harpo* provides the best overview extant of the artist's enduring legacy. All of the above-mentioned recordings are included on this 16-song overview, along with other interesting, nonhit studio sides, including a slow-boiling talking blues, "Blues Hangover," and a slow, R&B-flavored instrumental, "Snoopin' Around," which features saxophonist Willie "Tomcat" Parker. Almost half of the songs on *The Best of* can be found on the reissue of Harpo's first Excello album, *Slim Harpo Sings Rainin' in My Heart,* which also includes other interesting fare such as "Moody Blues" and quintessential swamp rock prototypes in "Buzz Me Babe" and "Don't Start Crying Now." An excellent package is further augmented by three bonus tracks, two of which—"My Little Queen Bee (Got a Brand New King)" and "Late Last Night"—are unavailable on *The Best of. The Excello Singles Anthology* includes much of the above and is another fine overview. There's a lot more Slim Harpo material where this came from, but these three albums serve his memory well. —D.M.

Corey Harris

★★★	Between Midnight and Day (Alligator, 1995)
★★★★	Fish Ain't Bitin' (Alligator, 1997)
★★★★½	Greens From the Garden (Alligator, 1999)
★★★★	Downhome Sophisticate (Rounder, 2002)
★★★	Mississippi to Mali (Rounder, 2003)

Corey Harris and Henry Butler

★★★	Vu-Du Menz (Alligator, 2000)

Roughly around the time that OutKast and Goodie Mob rose from the South to represent country manners, several fleet-fingered musicologists were similarly rehabilitating the reputation of acoustic blues. The tradition of Son House and Charley Patton had long been maligned as shabby and backward by young black bluesmen who favored the flashy urbanity of the music's Chicago descendants. Along with Keb' Mo' and Alvin Youngblood Hart, however, Corey Harris was among the young African-Americans who steeped themselves in the styles and ethos of Delta music in the mid-'90s. He soon became the most strikingly original blues writer and performer since Robert Cray.

Of these three, Harris internalized the Delta ethos most startlingly. On *Between Midnight and Day,* Harris performs solo, brawnily adapting blues structures to his own idiosyncratic sense of rhythm—no mean feat for an anthropology major from Denver. On *Fish Ain't Bitin',* a three-piece brass section (two trombones and a tuba) and simple percussion occasionally augment Harris' National steel for an off-kilter New Orleans feel. Meanwhile, his own compositions, which name-check Mumia Abu-Jamal and insist on the persistence of lynching, put the time-honored plaints of poverty and racism in contemporary perspective.

Harris was the most stylistically omnivorous of his Delta-influenced fellows, which meant that he'd never settle into one style forever. He goes electric on *Greens From the Garden,* which roams from reggae to Cajun even as it consolidates Harris' ability to integrate blues licks and lyrics alike into a modern idiom. ("Seen the devil last night, walk like a natural man," he observes on "Basehead," "Had a pipe in his mouth, a rock in his hand.") The roots retrenchment of *Vu-Du Menz,* a duet album with pianist Henry Butler, apparently exorcised his old-timey jones, since Harris was further out than ever when he returned to his electric guitar. *Downhome Sophisticate* rambles from Neville Brothers cover to roadhouse boogie to Central African soukous, too busy accumulating styles to attempt anything as neat as fusion. Murky, sardonic, playful, and restless, this may just be a bluesman's answer to *Stankonia.* —K.H.

Emmylou Harris is the patron saint of what's come to be known as alternative country. Her sad soprano harmonies on Gram Parsons' two early-'70s solo albums (*GP* and *Grievous Angel*) introduced a young interpretive singer who would help to alter the look and sound of Nashville. Stepping out on her own, Harris forged a soft country-rock style that appeals to fans of both genres. Her enduring influence on music is wide ranging, spanning from New Traditionalist country singers like Dwight Yoakam to such postpunk country rockers as Ryan Adams and Kasey Chambers. Harris' immaculate tone and gentle phrasing may not sit well with purists (of rock or country), but it's hard to argue with her creative spirit, her taste in material—or her execution.

Harris' albums are inconsistent up until *Luxury Liner,* on which her signature crystalline voice really takes shape. Her interpretations of the Louvin Brothers ("When I Stop Dreaming"), Townes Van Zandt ("Poncho and Lefty"), and even Chuck Berry ("[You Never Can Tell] C'est La Vie") are strikingly original. The newfound confidence she brings to the album can be attributed, in part, to the strong backing band, which includes such future country-rock luminaries as Ricky Skaggs, Rodney Crowell, and Brit picker Albert Lee.

On *Quarter Moon,* Harris breaks her dependence on the music of her mentor; for the first time she doesn't cover one of Gram Parsons' songs. Instead, she focuses on living songwriters like Crowell, and the result is an album that feels alive (especially her reading of Dolly Parton's protofeminist missive "To Daddy"). Sparked by the bluegrass accompaniment of Skaggs, Harris made a convincing roots move on *Blue Kentucky Girl* and *Roses in the Snow,* the latter of which flows with grace and respect for the old-time, Anglo-Celtic origins of her sound.

Harris stumbled in the early 1980s, having lost some of her audience to punk and new wave. Her albums suffered. Save for a heartfelt rendering of James Taylor's compassionate "Millworker," *Evangeline* stalled at the gates; *Cimarron* wasn't much better. To her credit, Harris kept "Movin' On" when the New Traditionalist movement—which she'd prefigured by a decade—began churning out cookie-cutter cowboys. Turning to pop with the same measured grace she brought to folk and bluegrass, she fills *White Shoes* with some boggling cover selections (Donna Summer's "On the Radio"?) and boldly flirts with autobiography on her *Red Headed Stranger*–like concept album *The Ballad of Sally Rose.*

On her lucky *Thirteen,* Harris returns to her roots again, but with less success than she had on *Roses in the Snow. Angel Band* is a solid but low-key set of old-time gospel songs, and *Trio* finds the singer joining forces with her sometime collaborators Parton and Linda Ronstadt for a light but enjoyable set of harmony-based songs. Harris closed out the '80s with *Bluebird,* a set of folk and country rock from left-field songwriters such as Kate and Anna McGarrigle, Tom Rush, and Texas troubadour Butch Hancock. The highlight, however, is her simple, aching interpretation of Johnny Cash's "I Still Miss Someone." Harris' last album for Warner Bros. *(Brand New Dance)* was an uninspired misfire, complete with a bad Bruce Springsteen cover.

When she switched from Warner Bros. to Elektra, in 1993, Harris got a renewed blast of creative energy. The mix of lightness and depth on *Cowgirl's Prayer* goes to the heart of her talents as an interpretive singer. And the song selection is sterling, from the Leonard Cohen–penned title track to Harris' down-and-dirty version of Lucinda Williams' "Crescent City." Nothing, however, prefigured the grace and brilliance of *Wrecking Ball,* on which Emmylou Harris shoves at the boundaries of both country and pop. Enlisting producer Daniel Lanois (Bob Dylan, U2) to give her sound the atmospheric feel of artists normally associated with the experimental-rock label 4AD (Cocteau Twins, Breeders), Harris reinterprets the music of a variety of songwriters, from Neil Young (the title track) and Jimi Hendrix ("May This Be Love") to Kate McGarrigle ("Going Back to Harlan"), Lucinda Williams ("Sweet Old World"), and Gillian Welch ("Orphan Girl"). *Wrecking Ball* polarized the critics, but no one can deny the gauzy sizzle of Harris' voice, her gorgeous, emotional phrasing, or the haunting nature of these interpretations. If for no other reason (and there are many reasons), the sheer ambitiousness of *Wrecking Ball* makes it Harris' masterpiece—a full two decades into her solo career.

Having taken the road less traveled with *Wrecking Ball,* Harris wrote and recorded *Red Dirt Girl* with the same atmospheric feel as its predecessor, but this time she sang her own songs. It was only the second time Harris had recorded an album of all-original material (*The Ballad of Sally Rose* being the first), and the strength of the material raises the question "Why?" From the gospelish "Pearl" to the heartbreaking title track and the tough talk of "I Don't Wanna Talk About It," *Red Dirt Girl* reveals the natural songwriter that's been lurking inside Harris all along. *Stumble Into Grace* continues in the vein of *Red Dirt Girl,* with Harris writing most of the songs and producer Malcolm Burn staying with the spare and gauzy sound begun on *Wrecking Ball.* While the atmospherics are no longer so refreshingly new, *Stumble* is as strong as its two predecessors. The sound now fits Harris like the white dress she wears on the cover, and the collaborations—with Kate and Anna McGarrigle on "Little Bird" and Lucious Jackson's Jill Cunniff on the biting social commentary of "Time in Babylon"—are just right. Harris teams with her old friend Linda Ronstadt on "Strong Hand," a powerful ode to American music matriarch June Carter Cash.

The two *Profile* albums are solid best-of collections, but their brevity makes them less than satisfying. *Duets* is a definitive selection of what some folks feel is Harris' true calling: harmony vocals. *Songs of the West* gathers her cowboy laments. *Anthology* is a solid place to start for a summary of Harris' purest years on Warner Bros. Records. But nothing fully represents Harris' pre-Elektra years as well as the three-CD *Portraits,* a strong selection of songs that includes a handful of her early duets with Gram Parsons. The live *Last Date* is a bit schizophrenic, but she makes up for it on *At the Ryman,* a wide-ranging assortment of covers performed at the original home of the Grand Ole Opry, with the all-acoustic Nashville Ramblers. *Spyboy* is a post-Lanois live set that lends Harris' newfound atmospheric feel to some of her old chestnuts. —M.C./M.K.

George Harrison

★★½	Wonderwall Music (1968; Capitol, 1992)

★★★	Brainwashed (Dark Horse/Capitol, 2002)
★★★½	The Dark Horse Years 1976–1992 (Dark Horse/Capitol, 2004)

Joining a band with John Lennon and Paul McCartney was a stroke of luck for George Harrison, but it also led to bitter frustration. Under the influence of his elder colleagues, Harrison blossomed not only as a guitarist but also as a singer and songwriter. "If I Needed Someone," "Within You Without You," "It's All Too Much," "While My Guitar Gently Weeps," "Something," and "Here Comes the Sun" would have been peak achievements for most other groups. Ah, but most other groups weren't the Beatles, who barely had room enough for two great songwriters, let alone three. In the late '60s, Harrison diverted excess creativity into side projects such as the East-meets-West film soundtrack *Wonderwall Music* and the early synthesizer experimentation of *Electronic Sound* (both interesting, though only for established fans), but that did little to alter the basic situation: As long as John and Paul were in charge, most of George's growing backlog of songs would never see release.

The Beatles' breakup solved that problem, and the floodgates opened almost immediately with *All Things Must Pass,* which was originally released as a three-record set. Even at its current two-CD size, it's pretty big; producer Phil Spector packs the studio with musicians, imbuing the already epic likes of "Isn't It a Pity," "Let It Down," and "Art of Dying" with gargantuan grandeur. The monster hit "My Sweet Lord" unveiled two features that would become hallmarks of Harrison's solo career: a deep concern with spirituality, and a magisterial, instantly recognizable slide guitar style that took its cues more from the Indian Subcontinent and Hawaiian Islands than the Mississippi Delta.

Excellent as *All Things Must Pass* is, it's a tad overrated, mostly by people who then underrate the remainder of Harrison's catalogue. Those folks tend to forget that the album's last half hour—the entire third record, in its original form—is a bunch of instrumental blues jams that nobody listens to more than once, which is particularly nonsensical considering how many top-notch songs George was still sitting on (some of which have never been issued officially; consult your local bootlegger).

Harrison's next move was to organize the all-star benefit show documented on *The Concert for Bangla Desh.* Though Bob Dylan and Ravi Shankar are the top performers here, George's set has plenty of magic. On a purely sonic level, *Living in the Material World* is preferable to *All Things Must Pass;* you can hear the lovely instrumental details much better without Spector's wall of sound, and the tunes ("Give Me Love," "Don't Let Me Wait Too Long," "Be Here Now") rank among Harrison's prettiest. But the enticing atmosphere sometimes gets deflated by overly preachy lyrics.

Apparently, no one told George that he shouldn't make an album while suffering from laryngitis, and so we got *Dark Horse,* which ruins several decent songs with croaky vocals. *Extra Texture* starts off well, then runs out of steam midway through. *The Best of George Harrison* takes half its contents from Beatles albums, which is a little insulting.

Dipping back into his vat of unreleased '60s compositions, Harrison pulled out "Beautiful Girl," one of the many highlights of his upbeat return to pop form, *Thirty-Three & 1/3.* Another Beatles outtake, "Not Guilty," surfaced on *George Harrison.* The understated gem "Your Love Is Forever" is the next best track, but elsewhere mellowness overwhelms musicality. Warner Bros., George's label at the time, rejected the first version of *Somewhere in England,* and even the released version is hard to fathom. Why, for example, are there two Hoagy Carmichael songs? And why is "All Those Years Ago," supposedly a serious tribute to fallen friend Lennon, so damn bouncy? The dynamic, synth-driven "Wake Up My Love" opens *Gone Troppo* and the spooky "Circles" (yet another lost Beatles song) closes it, but there ain't much in between.

Five years later, on *Cloud Nine,* Harrison sounds rejuvenated. Hooking up with Beatle junkie Jeff Lynne yielded George's strongest batch of tunes in over a decade, though weirdly enough, the biggest hit, "Got My Mind Set On You," was a cover of a Rudy Clark song. Subsequent years featured a tour of Japan (captured on the so-so live disc) and collaborations with the Traveling Wilburys and the surviving Beatles, but no further solo albums. Harrison hadn't stopped making music; he just wasn't interested in playing the music-biz game any longer. Following his death from cancer in 2001, some of the tracks he was working on toward the end of his life came out on *Brainwashed.* They're nice, but nothing special.

Given the maddening absence of a worthwhile Harrison best-of (*The Dark Horse Years,* a six-CD set, doesn't fit the bill), *All Things Must Pass* remains your best first buy. Just don't go expecting the Beatles; George's charms are different, modest yet undeniable. —M.R.

Deborah Harry

★★	Rockbird (Geffen, 1986)
★★	Once More Into the Bleach (Chrysalis, 1988)
★★½	Collection (Disky, 2000)

The former Blondie singer's fake-tough-girl act on her solo records proves that Deborah Harry needs her ex-Blondie songwriting partner, Chris Stein, like a fish needs gills. Her only semidecent solo effort, 1989's *Def, Dumb & Blonde,* wandered out of print, but its one hit, the crisp, driving "I Want That Man," can be found on the otherwise pointless *Collection.* —A.B.

PJ Harvey

★★★½	Dry (Indigo, 1992)
★★★★½	Rid of Me (Indigo, 1993)
★★★½	4-Track Demos (Island, 1993)
★★★★½	To Bring You My Love (Island, 1995)
★★★½	Is This Desire? (Island, 1998)
★★★★★	Stories From the City, Stories From the Sea (Island, 2000)
★★★½	Uh Huh Her (Island, 2004)

When Polly Jean Harvey burst out of a tiny English farm town and into the hearts of adoring cultists in 1992, the world may not have been ready for her. A guitar-toting succubus with a remarkably elastic voice, Harvey found common ground in the blues and opera and made sexpot melodrama and metaphysical yearning sound kind of fun. If you look for sunniness in your pop music, she may actually frighten you. Her music is doggedly dark and her lyrics never stray too far from something a sexually liberated Emily Dickinson might have turned out—but give Harvey a chance, and she'll get under your skin something fierce. Also, she's made three world-class albums: *Rid of Me; To Bring You My Love;* and *Stories From the City, Stories From the Sea.*

Dry announced Harvey in all her stark, hard-rocking glory. As Harvey wailed like a modern-day Howlin' Wolf and cranked out sloppy guitar noise, her power trio (collectively known as PJ Harvey) ripped through blues-inspired songs that match the anything the hair-flailing grunge boys could deliver. On the superb single "Sheela-na-gig," Harvey even supplies an honest-to-goodness hook of sorts, rhyming "Gonna wash that man right outta my hair" with "Gonna take my hips to a man who cares," but standouts such as "Dress" and "O Stella" get by on Harvey's rough-hewn and undeniable presence.

Rid of Me burns with the same raw, DIY intensity, but by then, PJ Harvey, abetted nicely by producer Steve Albini, was pushing herself to extremes. On "50 Ft. Queenie" (possibly about a cock that grows longer throughout the song), Harvey declares herself "the king of the world"; on the title track, Harvey whispers, "You're not rid of me" over and over again, before the band erupts into a torrent of noise and Harvey tells a lover that he'll eventually wish he had never met her. For heroic good measure, Harvey also provides a perfectly rocking version of "Highway 61 Revisted." Harvey's original sketches for most of the *Rid of Me* material are presented on *4-Track Demos,* augmented by several unreleased songs (including the excellent

"Reeling," on which she urges Robert De Niro to sit on her face). The disc isn't revelatory, but it's nice to be able to clearly discern the over-the-top emoting that was ambushed in *Rid of Me*'s guitar onslaught.

With U2 producer Flood (along with Harvey and percussionist John Parish) behind the boards, *To Bring You My Love* was inspired by the blues only figuratively, in its slow ache and in her dancing with the devil. No longer so sex-obsessed (or driven to make sex-fueled music), Harvey tones down her guitar attack and draws on keyboards and eerie electro-atmospherics for a set of songs that are slow, beautiful, and preternaturally dark. Over the title track's slow, spare riff, Harvey calls out to Jesus himself, and from there she keeps up the metaphysical oompah, most notably on the creepy, cabaret-influenced "Down by the Water," the psychotically pounding "Meet ze Monsta," and "C'mon Billy," on which she begs a lover to come home with her and meet their kid.

Harvey resolved not to fuck with her formula too much on *Is This Desire?* Like its predecessor, *Desire* is atmospheric, haunting, and vaguely evil, but it's also more cerebral and beholden to Eurogloom textures; Harvey layers keyboards, acoustic guitars, and electrobeats with subdued precision. The gothic third-person narratives—featuring characters named Leah, Angelene, and Elise, among others—don't quite radiate the immediate presence of Harvey's best stuff, but the desperate, truly disconcerting "Joy" and the whispered, creepy "The Wind" rank high in her catalogue.

After a two-year hiatus, Harvey returned with her finest album, *Stories From the City, Stories From the Sea,* pulling a truly shocking about-face: She sounds downright happy, or at least well-sexed. Recalling the loud-and-fast guitar tumult of her first two albums augmented by a mature elegance and a lingering fondness for texture, "Big Exit," "Kamikaze," and "The Whores Hustle and the Hustlers Whore" are expansive and strangely rousing. She drops some deliciously dark and slow moments (especially "Beautiful Feeling" and the Thom Yorke–assisted "This Mess We're In"), but she also gets drunk and wanders happily around New York City. And on the bombastic and awesomely raunchy "This Is Love," arguably her best song ever, she says a big fuck-you to psychosis and sadness as guitars crunch and garments hit the floor: "I can't believe life's so complex/When I just wanna sit here and watch you undress." For anyone wondering what the big deal is about PJ Harvey, this is the place to start.

Uh Huh Her once again found Harvey in entrancing blues-poet mode, conjuring disturbed, historically significant females such as Clytemnestra, Emily Dickinson, and . . . Polly Jean Harvey. Raw, riff-heavy numbers such as "Who the Fuck?" and "The Letter" revisit her punkish early days, while "It's You" and the delicately atmospheric "You Come Through" recall the slow-burning metaphysical turn she took with *To Bring You My Love.* As usual, the songs don't exactly greet you with open arms; instead, they ask you to meet her and her elastic, evocative goth-croon halfway while she wanders badlands of dissatisfaction and desire, comparing a lover's words to poison ("The Life and Death of Mr. Badmouth"), dreaming of good times ("You Come Through"), and brandishing a knife to thwart off marriage (the magnificently creepy "Pocket Knife"). —C.H.

Juliana Hatfield

★★½ Bed (Zoë/Rounder, 1998)
★★½ Beautiful Creature (Zoë/Rounder, 2000)
★★★ Juliana's Pony: Total System Failure (Zoë/Rounder, 2000)
★★★ Gold Stars 1992–2002: The Juliana Hatfield Collection (Zoë/Rounder, 2002)
★★★ In Exile Deo (Zoë/Rounder, 2004)

Blake Babies singer/bassist and occasional Lemonheads member Juliana Hatfield has often seemed like the James Taylor of '90s alt rock: a decent enough writer and performer, but one who consistently lacks the fuel to turn sparks into fire. But while singer/songwriters of the 1970s aimed to go down easy, Hatfield's girlish voice combined with sex-and-drugs lyrics are often harder to swallow. From song to song, the mix can add up to either intriguing juxtaposition or tired coquetry. The obit on the Blake Babies was barely finished when Hatfield began working on her solo debut. Because her early albums—*Hey Babe* (1992), *Become What You Are* (1993), and *Only Everything* (1995)—have fallen out of print, snatches from that work are most readily available on the first half of *Gold Stars 1992–2002.* That's where you'll find mainstream near-misses such as "Spin the Bottle" and the engagingly adolescent "My Sister." Unreleased cuts and covers (the Police, Neil Young) cap the disc—treats for fans, but inessential.

Bed swaps Blake Babies jangle for a tighter rock sound, which is a rare progressive step on an album devoted to people making bad choices or harboring ugly self-opinions. Hatfield, who once penned a track called "Nirvana," lets the rock references fly, with not-so-subtle nods to Tom Petty and Stevie Nicks as well as John Mellencamp.

In 2000, she issued two albums simultaneously. The quieter *Beautiful Creatures,* originally intended as a slate of demos, unveils a distinctly adult point of view. Despite its title, "Cool Rock Boy" is invective more personal than professional; "Choose Drugs" is a heartbreaking junkie tale ("I say it's me or drugs/You choose drugs"). Finally, the characters in Hatfield's songs are taking control, which comes across better still on the noisy, assertive *Juliana's Pony: Total System Failure* (though the title suggests she just can't leave the little-girl imagery behind). The previously wallowing Hatfield spews vitriol like buckshot (toward bad corporations, bad drivers, bad parents, bad dressers, and the bad music industry), and goes nearly an entire record without dishing pity, even for herself.

After an indie-rock excursion in the band Some Girls (*Feel It* [Koch, 2003]) with Blake Babies drummer Freda Love and bassist Heidi Gluck, Hatfield returned with *In Exile Deo,* a gratifying album on which she mingles laid-back grooves and wistful sounds with doses of familiar jangle and aggressive rock. While dark themes still lurk, Hatfield finally sings like she's ready to claim responsibility for living. "I've been sleeping through my life," she says. "Now I'm waking up and I want to stand in the sunshine." —C.N.

Donny Hathaway

★★★★½	Everything Is Everything (Rhino/Atlantic, 1970)
★★★★	Donny Hathaway (Rhino/Atlantic, 1971)
★★★½	Extension of a Man (Rhino/Atlantic, 1973)
★★★★	A Donny Hathaway Collection (Atlantic, 1990)
★★★½	These Songs For You, Live! (Atlantic, 2004)

Voices such as Donny Hathaway's come along maybe once a decade. Before his brief but influential career was cut short by suicide in 1979, Hathaway proved himself a maestro of protest soul who effused equal amounts of political anger and romantic tenderness. With that being so, it's a curious fact that despite his vocal gifts and his acknowledged influence on today's crop of neosoul singers, his back catalogue is very poorly served, especially in the compilation category. But a few of his early LPs are still in print, such as his debut, the spiritual and political *Everything Is Everything,* a stirring introduction to Hathaway's many vocal and songwriting influences (gospel, jazz, classical) and where he strove to take them. *Donny Hathaway* consists mainly of his redefining interpretations of the current Top 40, like his shiver-inducing versions of the Leon Russell/Carpenters tune "A Song for You" and the Hollies' "He Ain't Heavy, He's My Brother." *Extension of a Man* is his ambitious, "heavy" album, featuring the epochal "Someday We'll All Be Free" and the LP's grandiose orchestral opener, "I Love the Lord, He Heard My Cry (Parts 1 & 2)."

The 15 songs on *A Donny Hathaway Collection* include the work he's best known for by the casual music fan: namely his synergistic duets with Roberta Flack, such as "Where Is the Love" and "The Closer I Get to You." Only the omission of the more creatively challenging songs of Hathaway's early years prevents it from being definitive. *These Songs for You, Live!* culled from several early '70s concerts, displays the passion and charm that have inspired artists from Alicia Keys to the Neptunes, and attest to his knack for finding a great band. But what emerges most is Hathaway's irrepressible charisma and talent. The casual seduction of "You've Got a Friend" turns into a joyous sing-along; and in his hands, even "Yesterday" becomes a blues lament nonpareil. —G.F./J.C.

Ronnie Hawkins

★★★½	The Best of Ronnie Hawkins and the Hawks (Rhino, 1990)
★★★	Ronnie Hawkins/Folk Ballads of Ronnie Hawkins (Collectables, 1999)
★★	Mr. Dynamo/Sings the Songs of Hank Williams (Collectables, 1999)

Born (January 10, 1935) and raised in Arkansas, unrepentantly rockabilly Ronnie Hawkins may go down in history as a footnote for his band, the Hawks, having once included the musicians who became as legendary as the Band. (Some no doubt will recall him as the cousin of Dale Hawkins, whose 1957 Top 30 single, "Susie-Q," has been overshadowed by Creedence Clearwater Revival's cover version.) He had but one chart hit in the States—1959's indelible, incendiary "Mary Lou," one of the great one-hit smashes—but carved out a substantial niche for himself in Canada, where he has lived since 1958. It's a shame that had it not been for "Mary Lou" and the Band connection he might have been forgotten, because the recent reissue of four of his late '50s–early '60s studio albums makes it clear that Canada picked up on something the U.S. had overlooked.

Hawkins didn't have a great vocal instrument in terms of range, but his voice was loaded with personality and feeling. Plus he had a sure sense of phrasing and nuance, and knew how to twist a lyric just so to express futility, anger, exasperation, heartbreak, or tender-hearted yearning. Throw in some good original songs—most of which he cowrote with others, including Hawks (and the Band) drummer Levon Helm—along with some flawless, spirited band support, and attention must be paid.

Rhino's *Best of* is the best place to start, because it offers a thorough overview of Hawkins through the years, concluding with a 1970 cut, "Down in the Alley," that shows the artist in a peak performance. In "Mary Lou" he can lay legitimate claim to being among the artists who carried the rockabilly banner into the '60s even as its leading practitioners from the '50s, hoping to remain commercially viable, were moving on to mainstream rock & roll or country. All of the '50s sides here showcase to good effect in other contexts the trademark Hawkins growl heard most effectively on "Mary Lou." The hot stuff on this disc has stood the test of time: the driving rewrite of Chuck Berry's "Thirty Days," retitled as "Forty Days"; the moody "One of These Days"; a taste of the honky-tonk in "Odessa." Any one or all of these songs could have been as big as or bigger than "Mary Lou," but none even made it to the Top 40. So goes the luck of the draw in show bidness. —D.M.

Richie Hawtin

★★★★	Decks, EFX & 909 (Novamute, 1999)
★★★★½	DE9: Closer to the Edit (Novamute, 2001)

Richie Hawtin and Sven Väth

★★★	The Sound of the Third Season (Mute, 2002)

Plastikman

★★★	Sheet One (Novamute, 1993)
★★★	Musik (Plus 8, 1994)
★★★	Mixmag Live!, Vol. 20: Plastikman (Mixmag, 1995)
★★½	Consumed (Novamute, 1998)
★½	Artifakts [bc] (Novamute, 1998)
★★	Closer (Mute, 2003)

Born in England and raised in Windsor, Ontario, just over the border from Detroit, Richie Hawtin is one of techno's most celebrated DJs and producers. On its own, his music tends to be forbiddingly austere; he's best heard in the mix, where his tracks and others like them—usually deliberately unfinished—can be stacked and interlocked like Lego pieces. As a DJ, Hawtin connects them like a gamelan orchestra conductor, lining up single rhythms into an undulating whole, and it tends to be livelier and more physical than most of the music-as-music he makes, either under his own name or as Plastikman or F.U.S.E.

This isn't to say there isn't a certain . . . well, *charm* is overstating it, but Hawtin's early work has an impressive intensity. Starting Plus 8 Records in 1990 with friend and fellow Windsor DJ John Acquaviva, Hawtin helped push techno into faster, harder terrain, and his early work, which explores the nuances of the jabbering "acid" sound of the Roland TB-303 bass synth, ranks among the most influential music of the early '90s. Often, though, the music is too nuanced for its own good. The three various-artists *Plus 8 Classics* compilations offer both Hawtin's crucial work from the period and that of other artists such as Acquaviva, LFO, and Kenny Larkin. This means relief, something not afforded by later Plastikman albums *Consumed* and especially *Artifakts [bc]*, which take minimalism so far it becomes near-immobile.

Hawtin's DJ work is something else. *Mixmag Live! Vol. 20* covers much of the acidic (in both the 303 and bitter-metallic-aftertaste senses) style that marks his early work, but it's with 1999's *Decks, EFX & 909* that Hawtin began stretching out, layering 35 records atop one another, adding texture and space via a Roland TR-909 drum machine and a handful of the titular effects and processors, making for the most impressively physical music he'd made since the early '90s. *DE9: Closer to the Edit* breaks it down even further by expanding the number of sound sources (there are some 100 tracks utilized here) but limiting the amount of surface texture. The results resembled a continuously flowing composition like Steve Reich's *Music for 18 Musicians,* with the beat and bass lines mutating continuously as tiny melodic fragments sprout up every so often, surprisingly approachable and gratifyingly beautiful. *The Sound of the Third Season,* a gauzy mix by Hawtin and German trance jock Sven Väth, was a pleasant stopgap. Hawtin returned as Plastikman with 2003's *Closer,* even adding some vocals to his usual mix, but the music was more claustrophobic and less inviting than ever. —M.M.

Isaac Hayes

★★★★	Presenting Isaac Hayes (1967; Stax, 1995)
★★★★	Hot Buttered Soul (1969; Stax, 1995)

★★	Instrumentals (Stax/Ace, 2003)
★★★★	Isaac Hayes at Wattstax (Stax, 2003)
★★★★	Greatest Love Songs (Hip-O, 2004)
★★	For the Sake of Love/Don't Let Go (Raven, 2004)

Shades, dashiki, gleaming bald pate: Isaac Hayes cut an imposing figure during his early '70s heyday. The hulking auteur behind the ultra funky "Theme From *Shaft*" was actually a Barry White prototype, given to steamy bedroom raps and lush orchestrations. Or maybe he wasn't: The remainder of the *Shaft* soundtrack is rather mundane action-movie music, spiced by the occasional burst of streetwise syncopation or vocal color. A far cry from Curtis Mayfield's *Superfly,* to say the least. However, Hayes shouldn't be written off as a period oddity. His rambling soundtracks (two of which, *Truck Turner* and *Tough Guys,* are available on a single CD) and full-blown cover versions had a big effect on soul music in general, broadening and softening the instrumental palette. Hayes paved the way for disco; whether he deserves credit or blame is a matter of taste.

Hayes and David Porter made up one of the most successful songwriting and production teams at Stax/Volt. When they started to drift apart in the late '60s, Hayes began to record under his own name. *Presenting Isaac Hayes,* his 1967 debut, is a loose and bluesy after-hours jam session. *Hot Buttered Soul,* the 1969 followup, must have seemed like the eccentric vanity project of a brilliant behind-the-scenes man—until it reached the pop Top 10, anyway.

Elongated and embellished to the point of sonic overkill, "Walk On By" and "By the Time I Get to Phoenix" saunter through full-blown rearrangements. The former song entered the Top 40 as an edited single, although the full-length version of the latter (*Soul*'s entire second side on vinyl) establishes the Hayes game plan. Using the basic melody as theme and springboard, Hayes ruminates on the vagaries of romance in a spoken intro that takes up nearly half the song. His words aren't cued to the rhythm like a modern rapper's, but the contrast between the smoothly spoken and haltingly sung sections adds a delicate tension. *Hot Buttered Soul* is a landmark album.

Spread across two hour-long CDs, *The Best of Isaac Hayes* conveys the maddening expansiveness of his Stax records. *Volume 1* holds "Theme From *Shaft*" and "Walk On By," along with all 19 minutes of the rote "Do Your Thing." *Volume 2* includes a delicious silk-and-molasses crawl through "Never Can Say Goodbye" and the full version of "By the Time I Get to Phoenix." A collection of single edits—a distillation album—would be less authentic, but more approachable. Several of Hayes' biggest hits are included on a dynamite series of Stax samplers: *Original Big Hits Volumes 1–4.*

Though he occasionally dented the charts in the mid- to late '70s, Hayes sounds like he's playing catch-up on his disco period entries. (Most of his work from this period, including *Disco Connection, New Horizon,* and *Don't Let Go,* is unavailable on CD.) Even the bubbly track "Don't Let Go," from 1980, has nowhere near the commanding presence of earlier Hayes concoctions. And "Ike's Rap," from the otherwise forgettable *Love Attack,* lays claim to hiphop over a soupy, unsympathetic beat. Perhaps modern technology makes Hayes and his bodacious sense of scale seem anachronistic, but then again, *Shaft*'s stuttering wah-wah rhythm has launched many a rap jam.

Hayes has continued to release albums regularly in recent years, but his only consequential recent work was 1995's *Branded,* cut for the boutique blues label Pointblank. He was introduced to the contemporary audience via the '90s animated series *South Park;* his deathless "Chocolate Salty Balls" is on the *South Park*–related *Chef Aid* as well as the soundtrack to the feature film *South Park: Bigger, Longer, Uncut.* More recently, he appeared in the remake of *Shaft* (2000) and on Alicia Keys' best-selling album *Songs in A Minor.* —M.C./B.SC.

Heart

★★★	Dreamboat Annie (1976; Capitol, 1990)
★★★	Little Queen (1977; Epic/Legacy, 1994)
★★	Magazine (1978; Capitol, 1990)
★★½	Dog and Butterfly (1978; Epic/Legacy, 2004)
★★★	Bebe Le' Strange (1980; Epic/Legacy, 2004)
★★★	Greatest Hits—Live (Epic, 1980)
★★½	Private Audition (Epic, 1982)
★★½	Passionworks (Epic, 1983)
★★½	Heart (Capitol, 1985)
★★½	Bad Animals (Capitol, 1987)
★★	Brigade (Capitol, 1990)
★★½	Rock the House "Live" (Capitol, 1991)
★★★★	The Road Home (Capitol/EMI, 1995)
★★★★	Greatest Hits (Epic/Legacy, 1998)
★★★★	Greatest Hits: 1985–1995 (Capitol, 2000)
★★★	Jupiter's Darling (Sovereign, 2004)

Along with debut albums from Foreigner and Boston, Heart's *Dreamboat Annie* ushered in the era of arena rock and Album Oriented Radio. The album sees the band's sister team of Nancy and Ann Wilson shrewdly pulling off a Led Zep role reversal. Lead singer Ann can shift from pop-thrush blandness to piercing shrieks with the stroke of a power chord, as she does on "Crazy on You" and "Magic Man." *Little Queen* ups the heavy quotient on hits like "Barracuda" with satisfying results, but murky folk-rock filler like "Dream of the Archer" cuts away at the record's overall power. The clunky *Dog and Butterfly* merely proves that some aspects of Led Zeppelin's legacy are better left alone. *Magazine* was a rush-job release of demo tapes, perpetrated when Heart skipped from the Canadian label Mushroom over to Epic.

Bebe Le' Strange shows strong signs of development: On "Even It Up," for example, Ann's vocals are bolstered by a snappy horn chart and firm beat. *Greatest Hits—Live* kicks off well, pulling together the obvious high points—and promptly falls apart, concluding with a turgid cover of Zeppelin's "Rock & Roll." *Private Audition* is a failed attempt at regaining *Bebe*'s relatively adventurous spirit. *Passionworks* introduces the Wilsons' latter-day approach on cuts like "Allies" and "How Can I Refuse"—supercharged bathos encased in a glossy production.

Another label change, from Epic to Capitol, jumpstarted Heart's career a second time. *Heart* and *Bad Animals* are the repositories for half a dozen interchangeable power-ballad smashes, any one of which could break your heart or turn your stomach. Oddly enough, *Rock the House "Live"* is not the second-time-around summation fans might have expected. It's a realistic tour documentary, at best: a hodgepodge of minor album cuts and several resounding nonhits from the middling *Brigade*. Yet another live album, *The Road Home,* which collects the band's early hits, strips down the bombastic, arena-rock Heart of the '80s and reveals its sweet folkie soul. —M.C./A.B.

Heavenly

★★½	Heavenly Vs. Satan (1991; K, 2001)
★★★	Le Jardin de Heavenly (K, 1992)
★★★★	P.U.N.K. Girl (EP) (K, 1995)
★★★	The Decline and Fall of Heavenly (K, 1994)
★★★½	Operation Heavenly (K, 1996)

Oxford, England's Heavenly became avatars of the bouncy and saccharine indie-rock style known variously as "shambling," "twee pop," and "cuddlecore," and became an important influence on British and American indie rock, most notably Belle & Sebastian. Though the quartet had already recorded as Tallulah Gosh in the late '80s, lead singer Amelia Fletcher still sounded like a prep-school freshman on Heavenly's eight-song debut, *Heavenly vs. Satan,* breathily crooning with passive, pitch-challenged yearning about teen topics such as a "Cool Guitar Boy" ("There's heaven in his eyes!"). A twee-pop touchstone, the 1991 album was rereleased a decade later with six additional tracks, but although the tunes are strong throughout and several lyrics suggest dark recesses beneath Heavenly's sunny sound, the songcraft is ultimately overwhelmed by the gangly tumble of knock-kneed beats and off-key vocals. A year later, Heavenly was ready to channel its talents more smoothly on *Le Jardin de Heavenly.* Newcomer Cathy Rogers helps—she adds light keyboard fills and solid vocal harmonies behind the perennially tone-challenged Fletcher—as do memorable experiments such as "C Is the Heavenly Option," a duet with K Records' gravelly honcho, Calvin Johnson.

Still, the improvements were hardly preparation for the jolt of *P.U.N.K. Girl,* a musically diverse, thematically unified EP that plants Heavenly's feet on the ground with newly assertive lyrics—at least one of the five songs is about date rape—and newfound tinges of musical menace beneath the retro pop cutesiness. The group eased up on that menace on its following release, but this short album still earns its title, *The Decline and Fall of Heavenly.* "I'm not the same girl that you once knew," sings Fletcher on "Modestic," one of several numbers in which she finds her man falling short of her dreams. For that matter, Heavenly isn't the same band, exploring its '60s pop-rock influences more explicitly than ever before, with horn charts here, girl group melodies there, even a "Tequila"-tinged instrumental ("Sacramento"). *Operation Heavenly* dares even more with a harder rock sound, and Fletcher finally sings tough enough to qualify as a p.u.n.k. girl herself, upsetting romantic conventions with an easy sneer on almost every song. Sadly, the suicide of Amanda's brother and the group's drummer, Matt Fletcher, ended Heavenly only weeks after *Operation Heavenly*'s release, though the surviving members later regrouped as Marine Research. —F.S.

Richard Hell

★★★★½	Blank Generation (Sire, 1977)
★★★	Destiny Street (Razor & Tie, 1982)
★★★½	Time (Matador, 2002)

Kentucky-born Richard Hell deserves credit (or blame) for originating much of the punk imagery and style associated with the London scene. Musically, though, the Voidoids resemble Captain Beefheart's Magic Band much more than the Sex Pistols. And Hell has never managed to capitalize on his early notoriety.

The sullen, punked-out *Blank Generation* stings like a casual insult. "Love Comes in Spurts"—if you're lucky. Behind the sliced T-shirts and ear-scorching amplification, however, lurks an underrated band: The Voidoids focus Richard Hell's boundless alienation into bold, innovative rock & roll. Lead guitarist Robert Quine (who would later gain recognition for his work with Lou Reed) spikes the angry rush of sound with quick runs and sudden explosions; Quine milks each tender electric nerve of his Fender for all it's worth. Hell's no more a poet than he is a bass player, but his snarl-to-a-croak vocal range sounds downright affecting here, not affected. His indictments of society (and himself) are propelled by his band's headlong attack: There's not a wasted growl or gust of feedback on *Blank Generation.*

But during the long layoff between *Blank Generation* and *Destiny Street,* Hell's creative momentum froze; the latter album sounds testy, a little hedging—not exactly what you'd expect from the author of scathing rave-ups like "Betrayal Takes Two" and "New Pleasures." Though he made a brief return in the supergroup Dim Stars, after *Destiny Street,* Hell mostly abandoned music to focus on acting and writing. Quine committed suicide in spring 2004, months after the death of his wife, Alice.

Time brings together all the odds and ends—many of which were first included on *R.I.P.*—into a two-disc set that includes Voidoids-era outtakes, lo-fi live recordings, an odd 1984 New Orleans session, and some crude, compelling demos from Hell's howling tenure with Johnny Thunders and the Heartbreakers. —R.A.

Helmet

★★★	Strap It On (Amphetamine Reptile, 1990)
★★★½	Meantime (Interscope, 1992)
★★★½	Betty (Interscope, 1994)
★★★	Born Annoying (Interscope, 1995)
★★★	Aftertaste (Interscope, 1997)
★★★½	Unsung: The Best of Helmet 1991–1997 (Interscope, 2004)

Quintessential noise-rockers from lower Manhattan, Helmet is a rhythm juggernaut. Guitars, bass, and drums play interconnecting lines and shift tempos with machinelike precision. The quartet's tight, taut sound bridges the gap between thrash metal and the art-damaged vocabulary of New York City guitar innovators such as Glenn Branca and the Band of Susans, both of whom employed Helmet founding member Page Hamilton. The music's cold relentlessness is broken by Hamilton's hellish wails and terse, punishing guitar solos. Yet it's the band's tightly wound compositions and canny use of silence that distinguish the debut, *Strap It On,* from typical headbanging fare.

Once relying solely on dynamics to carry the music, the band introduced melody and actual singing to its repertoire on its 1991 single "Unsung," which is reprised on *Meantime. Betty* expands the musical choices considerably, touching on Wes Montgomery ("Beautiful Love") and primordial blues ("Sam Hell"). By *Aftertaste,* the formula has been perfected: Hamilton stretches guitar lines like high-tension wires across a grid of cross-rhythms, and when the wire snaps, it's cathartic. But too often the band's workmanlike rock sounds like work, and Hamilton's get-a-grip, commonsense lyrics take no risks. *Unsung* culls the stronger tracks from the quartet's hit-and-miss albums, and it builds a persuasive case for Helmet as songwriters as well as sonic ball-crushers. —G.K.

Jimi Hendrix is the quintessential rock guitarist, as much as Bob Dylan is the quintessential singer/songwriter and the Beatles are the ultimate rock band. As only classical or jazz players had done before him, Hendrix defined his music's instrument: Expanding the possibilities of the amplified six-string, he confirmed beyond question its status as rock's essential vehicle—as Pablo Casals was to the cello and Charlie

Parker to the saxophone, so was Jimi Hendrix to the electric guitar. A psychic successor to Elvis Presley, Hendrix also embodied the politics of rock & roll as a black-white fusion—the twin pillars of his music were the earthiness of the blues and the ethereality of jazz, but his primary contemporary audience was white rock fans and the psychedelic subgenre that provided the context for his particular triumph was a white one. Finally, through lyrics heavily influenced by Bob Dylan, he delivered a message of universal emancipation. A personality large enough to thrive on apparently contradictory impulses, he was both the painstaking artist and the unabashed cock-rocker, a showman whose act presaged the melodrama both of glitter and of punk, a player explosive enough to influence equally jazz perfectionists and heavy-metal thunderers, an erotic liberator and a spiritual force. Sly Stone and Prince obviously learned much from Hendrix; so did Pete Townshend, Gil Evans, and Bob Marley.

The Seattle-born ex-paratrooper began his career, with mythic appropriateness, backing up such originators as B.B. King and Little Richard. Significantly, however, he only hit his stride in Britain—where someone who possessed both Hendrix's looks and talent could pass for an exotic god; Animals bassist Chas Chandler hooked him up with bassist Noel Redding (a former lead guitarist whose playing would subsequently, and felicitously, betray its grounding in melody) and jazz-styled drummer Mitch Mitchell. The interracial Jimi Hendrix Experience was born—ready to come on like psychedelic supermen (already Jimi sometimes soloed with his teeth, and the band's freak-out garb was an acidhead's dream). *Are You Experienced?* was the Summer of Love debut, and it sounded like divine madness—"Purple Haze," "I Don't Live Today," "Manic Depression," and "Fire" were all feedback finesse and arrogant virtuosity wrapped around lyrics sprung from primal wondering, lust, and fear.

Axis: Bold as Love plunged deeper. Ballads ("Little Wing") met mind-warp blues—the songs blurred together, metaphorically implying the fact of Hendrix's creative impatience (and prefiguring his later ventures into jazz freedom). Psychedelia's triumph came next: a double-album manifesto featuring contributions from Steve Winwood, Buddy Miles, and Jack Casady, *Electric Ladyland* showed Hendrix serving notice of his unstoppable ambition. The chord progressions of "Burning of the Midnight Lamp" echoed Bach (and featured perhaps the only example of a wah-wah pedal employed elegantly); "Crosstown Traffic" was the Experience at its most rocking; "All Along the Watchtower" became Hendrix's classic Dylan cover; and, with "Voodoo Child (Slight Return)," the songwriter reached back into gris-gris mythology to fashion a mock-cosmic persona. Like the sounding of a gigantic gong, the album reverberated across the airwaves; it also sounded the death knell for the Experience.

Mitchell held on long enough to join Jimi and new bassist Billy Cox for an appearance at Newport, but the legendary Woodstock gig (including the famous, fiery "Star Spangled Banner") was performed by an ad hoc group called the Electric Sky Church, and by the time of the live *Band of Gypsys,* the drummer's post had been taken by the bombastic Buddy Miles. For once playing with a black band, Hendrix tackled funk. "Machine Gun" and "Message of Love" were the fearsome highlights of *Gypsys,* yet while the power trio achieved the essence of force, it lacked melody—and aesthetic fullness suffered as a result.

Hendrix died in 1970, choking on vomit following barbiturate and alcohol intoxication, at a period of seeming creative transition. He'd been moving further away from rock, alternately returning to blues, delving deeper into funk, and studying jazz fusion. *The Cry of Love* (1971, out of print), however, showed the master, playing with Cox and Mitchell, at his most confident: "Ezy Rider" and "Angel" are the tough and tender faces of the genius at his most appealing.

A deluge of posthumous albums then began. Of the live work, *BBC Sessions* and *Live at Winterland* are the most exciting (we're still waiting for a new package of Hendrix's out-of-print classic Monterey performances). The last decade has seen the Hendrix estate reclaim the guitarist's catalogue from the hands of producer Alan Douglas, who had for years been clogging record-store shelves with albums such as *Crash Landing* and *The Cry of Love,* which combined unreleased Hendrix recordings with new overdubs and production. If you want to hear unreleased Hendrix material, go to the estate's *First Rays of the New Rising Sun* and *South Saturn Delta*—both of these '90s compilations were remastered by Hendrix's original engineer, Eddie Kramer, and feature some blazing material. The fine four-CD *Jimi Hendrix Experience* box also collects some worthwhile unreleased music. And the recently reissued *Smash Hits* best-of is still the tightest collection of killer Hendrix. —P.E./N.B.

Don Henley

★½	I Can't Stand Still (Asylum, 1982)
★★½	Building the Perfect Beast (Geffen, 1984)
★★★★	The End of the Innocence (Geffen, 1989)
★★★½	Actual Miles: Henley's Greatest Hits (Geffen, 1995)
★★½	Inside Job (Warner Bros., 2000)

Heartache and outrage aren't the most obvious bookends for a songwriter's work, but those two emotions are clearly important touchstones for Don Henley. That was true when he was in the Eagles—he, after all, was the voice of both "Desperado" and "Life in the Fast Lane"—and it became even more the case with his solo career, where he scored hits with both the sneering rage of "Dirty Laundry" and the itchy longing of "The Boys of Summer." But while heartache can be timeless and eternal, outrage tends to sour if not leavened with wit or humor, and as such, Henley ultimately went from angry young man to surly old crank—and took his solo career with him.

Of course, he was fairly cranky when he started. His first big solo hit was "Dirty Laundry," a nastily infectious diatribe against media exploitation of personal tragedy. (Presumably Henley, who was arrested in 1980 after a 16-year-old girl was found overdosed in his Los Angeles home, knew whereof he sang.) There's more where that came from on *I Can't Stand Still,* from the schools-are-going-to-hell rant of "Johnny Can't Read" to the anti–Cold War rocker "Them and Us." Trouble is, those issues now seem as dated as the new-wavey keyboard sounds littering the arrangements, and apart from the deliciously melancholy "Talking to the Moon," the ballads don't really work.

Building the Perfect Beast finds a better balance, thanks in no small part to "The Boys of Summer," which expands Henley's romantic longing to near-cinematic grandeur. Both "Sunset Grill" and "Not Enough Love in the World" also manage a certain emotional frisson, but "All She Wants to Do Is Dance" marries a pallid update of the "Dirty Laundry" groove to a muddled Ugly American story, while the title track is undermined by Henley's strained falsetto.

With "The End of the Innocence," Henley's writing achieves something close to perfection, framing his political commentary with a melody that makes the most of his dry, yearning delivery. While the rest of *The End of the Innocence* rarely matches that apotheosis, neither does it fall much short, thanks to the vividly written and artfully sung "New York Minute," "Heart of the Matter," and "I Will Not Go Quietly."

Assembled largely to fulfill his contractual obligations to Geffen Records, *Actual Miles* augments Henley's hit singles with three new songs, one of which is a cover. Had it also included his duets with Stevie Nicks ("Leather and Lace") and Patty Smyth ("Sometimes Love Just Ain't Enough"), it would have been a much better buy. It would be another five years, however, before Henley delivered an entire album of new material, and *Inside Job* was barely worth the wait. Apart from a sprinkling of ballads—among them the genuinely moving "Annabel"—the album is a nonstop gripefest, with Henley railing against corporate greed ("Goodbye to a River"), rampant consumerism ("Workin' It"), boorish Americans ("Nobody Else in the World but You"), and those punks on MTV ("Damn It, Rose"). —J.D.C.

Joe Henry

★★½	Short Man's Room (Mammoth, 1992)
★★★½	Kindness of the World (Mammoth, 1993)
★★★★	Trampoline (Mammoth, 1996)
★★★½	Fuse (Mammoth, 1999)
★★★½	Scar (Mammoth, 2001)
★★★★	Tiny Voices (Anti-, 2003)

While the typical recording career arcs from more inspired early work to more conventional later stuff, Joe Henry is one of the very few artists (like, say, Tom Waits, Scott Walker) whose music has gotten more challenging and dynamic over time. As such, only the most determined completists need troll the used bins for Henry's out-of-print early albums, 1986's *Talk of Heaven,* 1989's *Murder of Crows,* and 1990's *Shufletown.* They're full of utterly conventional singer/songwriter fare—at best, a thinking man's Adult Contemporary—that crosses mellow piano-man balladry with a slight Southern twang (Billy Joel gone country-rock? Bruce Hornsby does bluegrass?). In places, though, they point to a still-evolving voice and better things to come. One their own, however, these records sound at best workmanlike.

Short Man's Room, which features Minneapolis country-rockers the Jayhawks as backing band, constitutes Henry's first tentative leap toward a style that would warrant notice. While tracks such as "Good Fortune" and "Sault Sainte Marie" are too reminiscent of the Jayhawks to qualify as a distinct new sound for Henry, elsewhere the influence isn't so obvious. Having been recorded live in the studio gives the album a more lively, immediate feel, while bits of fiddle, mandolin, and banjo root the songs in a country tradition that complements Henry's songwriting.

Kindness of the World continues Henry's fling through the still-nascent world of alt-country Americana, and it's here that his development as a stylist begins to pay real dividends. Again utilizing the talents of the Jayhawks and friends such as Victoria Williams, Henry crafts his first consistently compelling collection. In particular, the subtly tragic optimism of "Fireman's Wedding" and the fatalistic storytelling of "She Always Goes" put him in league with the best country songwriters—in fact, a cover of Tom T. Hall's "I Flew Over Our House Last

Night" fits right into the mix. Meanwhile, "Third Reel" hints at the even more artsy and refined writing to come.

After a three-year absence, Henry returned with *Trampoline,* on which he not only shifted his sonic palette once again—embracing a funkier, albeit taut, groove—but also seemed to find his truest voice. As such, it's his best album to date. Country touches resurface on the acoustic "Go With God (Topless Shoeshine)" and with the pedal steel in "Parade," but many of the record's most impressive tracks are completely removed from anything Henry's done before. He was certainly never the obvious choice to cover Sly Stone, as he does here with "Let Me Have It All." "Ohio Air Show Plane Crash" is mesmerizing in its subtle guitar churn, and the lyrics read like a modernist (very) short story. So do the words of "Flower Girl," which, accompanied by pump organ and orchestrations, invites comparison to Tom Waits' off-kilter later work. Tying it all together is a moody, atmospheric production that adds sophistication to Henry's ever-sharpening songcraft.

Fuse and *Scar* not only continue Henry's fascination with highly imagistic, one-word titles, they also push his music further into the intellectual/sophisticate/hipster realm *Trampoline* first entered. Where *Fuse*'s "Monkey" and "Like She Was a Hammer" maximize the juice of a subtle hook using tension and repetition, "Fat," "Want Too Much," and the instrumental "Curt Flood" flirt with jazz colors and riffs. Meanwhile, the New Orleans funeral march of "Beautiful Hat" (courtesy of the Dirty Dozen Brass Band) and "We'll Meet Again," with its David Lynch–style sunny/sinister edge, offer other new settings for Henry's writing. *Scar* embraces jazz even more fully with help from Ornette Coleman ("Richard Pryor Addresses a Tearful Nation") and former Waits guitarist Marc Ribot ("Stop"), and with "Struck" and "Lock and Key" also explores a type of hushed, adult-pop art song not far removed from the work of Brazilian composer Caetano Veloso. While *Scar* can get too artsy and esoteric for its own good, both it and *Fuse* show how Henry has developed into a singularly adventurous songwriter who continues to take chances in expanding his vocabulary.

Tiny Voices further refines the lounge-jazz, art-song approach Henry launched with *Fuse* and *Scar,* achieving here his most rewarding returns of the trilogy. Again backed by first-rate jazz musicians, including clarinetist Don Byron, Henry crafts works that, while mild on the surface, brim with grandeur, edge, funk, poetry, and even a fair number of irresistible hooks. This is for anyone who thinks adult pop doesn't have to be easy listening. —R.M.S.

Kristin Hersh

★★★★	Hips and Makers (Reprise, 1994)
★★½	Strings (EP) (Sire, 1994)
★★½	Strange Angels (Rykodisc, 1998)
★★★	Sky Motel (4AD, 1999)
★★★	Sunny Border Blue (4AD, 2001)
★★★	The Grotto (4AD, 2003)

With a gift for raw-nerved, impressionistic lyrics and a history of bipolar disorder, Throwing Muses frontwoman Kristin Hersh had been considered indie rock's answer to Sylvia Plath long before her first solo album, 1994's *Hips and Makers,* sealed the deal. Produced by Lenny Kaye (Patti Smith Group) and recorded in two weeks, *Makers,* both razor-sharp and maddeningly obtuse, is still Hersh's finest solo record, a hushed (especially in comparison to the often clamorous Muses), largely acoustic offering populated with the sort of darkly incisive love songs that are Hersh's stock-in-trade. "Your Ghost," a gorgeous and eerie duet with Michael Stipe that qualifies as Hersh's one modest hit, anchors an album's worth of guitar and piano ballads. Though the songs' sparse arrangements served them well, Hersh released *Strings* soon after, an EP of outtakes and retakes that refashioned some of *Makers'* starkest tracks into chamber music pieces, with a jaunty cover of Zeppelin's "When the Levee Breaks" (!) thrown in.

Hersh spent the next few years shuttling between the on-again, off-again Muses and a series of solo records, most of which varied little from *Makers'* bare-bones template of guitar, piano, and cello. *Strange Angels,* like almost all of Hersh's solo work, is alternately dreamy and harrowing, a typically stripped-down and echoey folk record that in its worst moments tends toward Tori Amos–like spaceyness and in its best ("Like You," "Cold Water Coming") recalls *Makers'* strongest tracks.

Hersh plugged in for 1999's *Sky Motel,* using drums, electric guitars, and keyboards to create a buzzing, Museslike rock album that hits ("Fog," "White Trash Moon") more often than it misses. Hersh played almost all the instruments on the characteristically strange *Sunny Border Blue,* a dark, ambient folk album that boasts all the tangled wordplay fans have reasonably come to expect, with trumpets and a cover of Cat Stevens' "Trouble." With its emphasis on acoustic guitars and pianos, 2003's *The Grotto,* released the same day as the Muses' self-titled reunion disc, is more reminiscent of Hersh's Makers-era solo recordings than anything else in her catalogue. It's affecting and lovely, and unlike some of Hersh's other solo albums, it's not just for completists. —A.S.

John Hiatt

★★★½	Hangin' Around the Observatory (Epic, 1974)
★★★	Overcoats (Epic, 1975)
★★★★	Slug Line (MCA, 1979)
★★★	Two Bit Monsters (MCA, 1980)
★★	All of a Sudden (Geffen, 1982)
★★★★	Riding With the King (Geffen, 1983)
★★★	Warming Up to the Ice Age (Geffen, 1985)
★★★½	Bring the Family (A&M, 1987)
★★★★	Slow Turning (A&M, 1988)
★★½	Stolen Moments (A&M, 1990)
★★★	Perfectly Good Guitar (A&M, 1993)
★★½	Hiatt Comes Alive at Budokan? (A&M, 1994)
★★★	Walk On (Capitol, 1995)
★★★	Living a Little, Laughing a Little (Raven, 1996)
★★★★	The Best of John Hiatt (Capitol, 1998)
★★★½	Greatest Hits: The A&M Years: '87–'94 (A&M, 1998)
★★½	Crossing Muddy Waters (Vanguard, 2000)
★★★	The Tiki Bar Is Open (Vanguard, 2001)
★★★★	Anthology (Hip-O, 2001)

He stood right at the brink of something bigger for so damn long that you can't really blame John Hiatt for finally sitting back and relaxing on his last decade or so of records. This Indiana-born singer/songwriter has a plethora of slightly neurotic gems sprinkled throughout his bumpy career: witty 'n' warm love songs that have provided hits for Three Dog Night ("Sure As I'm Sittin' Here," from *Hangin' Around the Observatory*) and Bonnie Raitt ("Thing Called Love," from *Bring the Family*). Stylistic uncertainity and a wavering vocal attack marred even the best of Hiatt's own albums, though several have much to recommend them and none (save the Tony Visconti–produced synth-pop disaster *All of a Sudden*) are outright duds. The Epic albums (*Observatory* and *Overcoats*) are his most country-oriented, though Hiatt would return to Nashville in the mid-'80s after a new wave–inspired spell. "Slug Line" failed to establish Hiatt as the American Elvis Costello, but the rangier, nervously rockin' accompaniment accentuates the slightly twisted hooks of "You're My Love Interest," "Radio Girl," and the title track. Despite his flair for sardonic rockers, Hiatt also evinces a talent for disarmingly pretty ballads with "Washable Ink" (exquisitely covered by the Neville Brothers a few years later). "Two Bit Monsters" is a somewhat pallid followup in the same mode; "Pink Bedroom" (later claimed by Rosanne Cash) is the only true keeper in the pile. Hiatt's wicked sense of humor comes to the fore on the confident "Riding With the King," bolstered by the producing and bass-thumping presence of Nick Lowe. The double-edged title track and "She Loves the Jerk" cut far beyond the surface yuks.

Typically, Hiatt follows up this artistic turning point with another shaky holding-pattern album: On *Warming Up to the Ice Age,* a heavy-handed AOR mix sabotages sterling heartbreak sagas like "The Usual" and "She Said the Same Things to Me." Recorded with a band consisting of Lowe, Ry Cooder, and drummer Jim Keltner, *Bring the Family* greatly benefits from their loose, spacious tone and bluesy input. Not quite the breakthrough impatient fans and critics hyped it as, *Bring the Family* is still one of Hiatt's most consistent efforts. Hiatt reaches a mature peak on *Slow Turning,* recorded with his tight regular road band; the heartfelt hearth-and-home scenarios ("Georgia Rae," "Is Anybody There?") lend contrast and depth to the gleefully perverse stompers ("Drive South," "Trudy & Dave," "Tennessee Plates"). But when Hiatt kicks off the too-satisfied "Stolen Moments" by declaring himself "unworthy" of his woman's "real fine love," his self-deprecating gift starts to resemble a glib automatic reaction.

By the time the '90s rolled around, there was no sense in complaining about Hiatt's gargly voice—either you accepted it or you'd already moved on. But his '90s output didn't add too much to his canon—*Perfectly Good Guitar* sounded like the work of a crank who happened to glance at the TV over the bar between sets and catch Nirvana on *SNL.* Among the compilations, Hip-O's *Anthology* is the most comprehensive, Capitol's *Best of* the most consistent. But even here Hiatt's a victim of his own success—he'd have less money in the bank if Bonnie Raitt and Roseanne Cash hadn't seen fit to cover him, but because they did, his own versions of songs like "Thing Called Love" and "The Way We Make a Broken Heart" seem unnecessary. —M.C./K.H.

Faith Hill

★★	Take Me as I Am (Warner Bros., 1994)
★½	It Matters to Me (Warner Bros., 1995)
★★	Faith (Warner Bros., 1998)
★★	Breathe (Warner Bros., 1999)
★★½	There You'll Be: The Best of Faith Hill (Warner Bros., 2001)
★	Cry (Warner Bros., 2002)

The C&W industry regularly throws a bunch of ingenues at the charts to see what sticks. In 1993, Faith Hill stuck. "Wild One" was #1 for four weeks—an all-but-unheard-of feat for a country gal at the time—and she consolidated her star power with a big-voiced rehash of "Piece of My Heart." However, she didn't have career security until after she conveniently traded in producer-boyfriend Scott Hendricks for hunky Tim McGraw. Nor did McGraw—their connubial synergy has buoyed both their careers, and the pair have reigned as Homecoming King and Queen of Nashville High ever since. They could be a great testament to the joys of married sex if only their duets weren't so DOA. You'd think the two had never fucked with the lights on.

There's no such thing as "real country"—the stuff's been incorporating pop styles since back when they called it hillbilly music—but inauthenticity can be as much a drag as musty traditionalism. The singles Hill's crossed over on—the giddy "This Kiss," the swooning "Breathe," the ditzy "Way You Love Me"—have been such transcendent trifles you might be tempted to dig a little deeper. Bad idea. Given space to stretch out, Hill is oppressive, bombastic, and conniving, in many ways more Mariah than Shania. *Cry* marks Hill's final descent into schlock. On the cover, she looks like she's been greased down for a *Maxim* shoot, and the Instamatic grooves make her no more R&B than David Gray or Phil Collins. She's coated in Teflon. Any time someone whispers she's gotten a little slutty, she flashes her wedding band. Every time someone intimates that she's sold out, she just smiles a little wider and sweeter. Say what you will about Nashville's bland hat acts—at least they're gone in a flash. Faith Hill ain't going nowhere. —K.H.

Lauryn Hill

★★★★½	The Miseducation of Lauryn Hill (Columbia, 1998)
★★½	MTV Unplugged 2.0 (Columbia, 2002)

Though the press made much of her balancing the demands of being in one of the most popular hip-hop groups of the mid-'90s and still trying to complete her undergraduate studies at Columbia University, to anyone with eyes and ears, it was clear that Lauryn Hill wasn't long for the Fugees or, for that matter, for school. Instead, she poured her energies into her solo debut, *The Miseducation of Lauryn Hill,* as earnest, unpretentious, and pleasantly sloppy an album as any woman of the hip-hop generation has ever made. Hill was always an outstanding rapper, but *Miseducation* showed her to be a more-than-competent singer as well on songs like "Doo Wop (That Thing)" and "Everything Is Everything." By turns socially engaged, personally revelatory, and, in the hip-hop tradition, a bit arrogant, *Miseducation* managed to filter hip-hop through a womanist lens, resulting in an album that appealed to an improbably wide spectrum of listeners.

Miseducation made Hill a superstar of epic proportions: She earned five Grammys and found herself at the focal point of hip-hop's crossover into the mainstream. But by all accounts, the pressure on her was overwhelming, and she quickly slipped out of the public eye. In her downtime, Hill renounced her old image, radically altering her wardrobe and her hairstyle; rediscovered a profound spirituality; and grappled with problems with both her manager, whom she fired, and her husband, Rohan Marley, one of Bob and Rita's sons. When Hill finally reemerged on *MTV Unplugged,* she was a woman transformed. The two-disc recorded version of the concert captures the performance in all its eccentricity. In between songs, Hill meanders through a set of spoken interludes, in which she discusses spirituality, personal responsibility, and her own struggles with fame. The songs themselves, though they hew to the same subject matter, aren't any more focused. "Adam Lives in Theory" and "Mystery of Iniquity" are just plain confusing, a bizarre set of statements from an artist whose shtick was once self-assuredness. The sentiment of the set, both explicit and implied, can be summed up in one song title: "I Gotta Find Peace of Mind." True enough. —J.C.

Robyn Hitchcock

★★★½	Black Snake Dîamond Röle (1981; Relativity, 1986)

★★★★½	Perspex Island (A&M, 1991)
★★★★	Respect (A&M, 1993)
★★★★★	Greatest Hits (A&M, 1996)

One of rock & roll's most gifted eccentrics, Soft Boy frontman Robyn Hitchcock at his best evokes much of the same benign insanity that marked John

Lennon's whimsicality—at times, his songs even evoke a similar sense of melody. His first solo album, *Black Snake Dîamond Röle,* picks up pretty much where his work with the Soft Boys left off, even to the point of employing most of his former bandmates. Still, this suits the material, particularly the manic "Brenda's Iron Sledge" and the lovely, semipsychedelic "Acid Bird."

Working with a pickup band, Hitchcock then recorded *Groovy Decay,* using ex-Gong guitarist Steve Hillage as producer. Dissatisfied with the result, Hitchcock eventually substituted a revamped version entitled *Groovy Decoy;* although some of the songs are agreeably melodic (especially "America" and "The Cars She Used to Drive"), neither the Hillage recordings nor the Matthew Seligman–produced remakes are in any way essential. But if you're curious, the whole mess was compiled into *Gravy Deco (The Complete Groovy Decay/Decoy Sessions)*. After a two-year hiatus, Hitchcock returned with the drolly titled *I Often Dream of Trains.* Recorded without a band, its lean, guitar-and/or-piano arrangements leave it sounding less like a finished album than a collection of song demos. Thus, although the songs are wonderful—particularly "Sounds Great When You're Dead" and the barbershop harmony number "Uncorrected Personality Traits"—the performances rarely do them justice.

Eventually, Hitchcock got tired of being solo and recruited the Soft Boys' original rhythm team of Morris Windsor and Andy Metcalfe (plus keyboardist Roger Jackson) for a new band, the Egyptians. That this was the right thing to do becomes obvious with the first notes of *Fegmania!,* which showcases Hitchcock's cheerful insanity through authoritatively played, tunefully surreal numbers such as "Egyptian Cream" (a perverse fertility song) and "The Man With the Lightbulb Head" (a loopy monster-movie send-up). Even better, Hitchcock and band followed *Fegmania!* with the spirited concert album *Gotta Get This Hen Out,* which not only righted some of the wrongs done by *I Often Dream of Trains* and *Groovy Decay* by remaking "Sometimes I Wish I Was a Pretty Girl" and "America," but also reclaims the Soft Boys' "Leppo and the Jooves." But Hitchcock and the Egyptians don't really begin to show their true potential until *Element of Light,* which augments the usual lyrical whimsy with well-crafted, insinuating melodies such as those to "Winchester," "Lady Waters & the Hooded One," and the homoerotic "Ted, Woody and Junior." (The best of his work to this point is compiled as *Uncorrected Personality Traits.*)

Obviously, others sensed the group's potential, for with *Globe of Frogs,* Hitchcock and the Egyptians made the leap to the majors. Unfortunately, the album doesn't quite live up to the inspired standards of *Element of Light,* for despite the appealing lunacy of "Balloon Man" and the raucous "Sleeping With Your Devil Mask," the album fizzles where it should sizzle. Hitchcock bounces back, though, with *Queen Elvis,* which includes the expected flashes of insanity (for instance, the wicked wit of "The Devil's Coachman") but puts the bulk of its energy into tuneful tidbits such as "Wax Doll" or the chiming, Byrdslike "Madonna of the Wasps." Hitchcock hadn't gone completely commercial, however, and had by this point assembled enough musical oddities to fill an album; hence, *Eye,* which takes the same stripped-down approach as *I Often Dream of Trains,* although without its predecessor's lo-fi sound. It's not a great album, but Hitchcock does seem to need an outlet for his apparently relentless creativity. After all, up to this point he had been regularly releasing occasional collections such as *Eaten by Her Own Dinner* and *Exploding in Silence;* indeed, *Invisible Hitchcock* compiles more than a dozen songs from such projects.

Hitchcock compensates for those underproduced efforts with the surprisingly slick and accessible *Perspex Island.* What makes this such a delight isn't that its conventional love songs—"So You Think You're in Love," for instance—are so infectious, but that Hitchcock's melodic standards are the same regardless of lyrical content. *Respect,* which turned out to be his final album with the Egyptians, is a somewhat more low-key affair, but it doesn't lack for verve—the wacky "Yip Song" sounds as if it was inspired by a four-year-old after too many cookies. From "The Wreck of the Arthur Lee" to "Then You're Dead," it's classic Hitchcock. It's worth owning pretty much all of the A&M albums, but for those on a budget the sterling *Greatest Hits* includes most of the highlights.

Hitchcock went back to playing solo, with a revolving cast of accompanists, with *Moss Elixir,* a mildly folkie effort long on whimsy but packed with melodic punch, especially on "Sinister But She Was Happy" and "The Devil's Radio." *Jewels for Sophia* reflects an unexpected L.A. influence and features such big marquee names as Peter Buck, Jon Brion, and Grant Lee Phillips. Its sound is more traditionally rock & roll than any of Hitchcock's non-Egyptian projects, and tracks such as "Sally Was a Legend" and "You Got a Sweet Mouth on You, Baby" are sassy, nonsensical, and nearly irresistible. Even the outtakes from those sessions, collected on *A Star for Bram,* are pretty fab. But just as Jonathan Demme's concert film *Storefront Hitchcock* failed to generate any buzz outside the music world—or, to be honest, much buzz within it—*Jewels* didn't set the world on fire, and Hitchcock slid back into indie semiobscurity. At least he has his freedom, and makes the most of it on *Robyn Sings,* a serious sort of gag album in which he covers a number of Dylan songs, including the infamous "Royal Albert Hall" bootleg. The mostly acoustic *Luxor* returns to the stripped-down sound of *I Often Dream of Trains* and maintains the usual standards of inspired whimsy through the likes of "Penelope's Angles" and "Solpadeine." —J.D.C.

The Hives

★★★	Barely Legal (Gearhead, 1997)
★★★★½	Veni Vidi Vicious (2000; Reprise, 2002)
★★★★	Your New Favourite Band (Poptones, 2002)
★★★½	Tyrannosaurus Hives (Interscope, 2004)

Coming straight out of Fagersta, Sweden, the Hives formed in 1993 but will be forever known as members of the Class of 2002, when rock was officially declared Back. (See also White Stripes, Strokes, Vines.) On their 1997 debut full-length, *Barely Legal,* it's clear that high-energy '60s garage rock is the foundation idea, but they're tighter and heavier than most of their brethren, like they've absorbed as much Big Black as the Seeds. Singer Howlin' Pelle Almqvist has a knack for good put-downs and pithy social commentary sans self-righteousness. Their rock aliases (Chris Dangerous, Dr. Matt Destruction, etc.) and policy of dressing only in black-and-white slacks and button-down shirts made them memorable, but their 2002 return to the studio, *Veni Vidi Vicious,* further made clear they were thinking a lot about this whole allegedly party-hearty, nonthinking genre. "Die, All Right!" is anticorporate garage punk worthy of the Peanuts dance, and the singles are killers—"Main Offender" and the MTV hit "Hate to Say I Told You So." The band's signal strength is the ferocity they bring to every single tune, as if they couldn't possibly be more psyched to be the Hives. *Your New Favourite Band* is on Alan McGee's Poptones label and collects four songs from both full-lengths plus various tracks from EPs and a generous selection of videos. —S.F.J.

Courtney Love

★★	America's Sweetheart (Virgin, 2004)

Well, you wouldn't want to share a bathroom with her, but let the record show that Courtney Love did, in fact, make a great album once, and even her many enemies must concede, lest they look like total tools, the achievement of *Live Through This,* the album she released only days before the dead body of her husband, Kurt Cobain, was found. Five years earlier or later, her music would have been unthinkable on a major label; let alone the radio. But in 1994 she defined mainstream rock.

Love rips herself apart on *Live Through This,* while backed by a tunefully anonymous grunge band. She howls about needing to be the girl with the most cake, veering from rage-queen guitar explosions such as "Violet" and "Miss World" to the folk-rock beauty of "Softer, Softest" and "Doll Parts." "I've got a blister from/Touching everything I see," Love snarls, and she left her share of blisters on us as well, voicing her female audience's most forbidden fantasies of power and freedom. After Cobain's death, the songs seemed sadder than ever—in terms of emotional intensity, *Live Through This* is a landmark, if not a land mine.

Nothing else in Hole's recorded work has any of the same fire. *Pretty on the Inside* was just routine indie trashola, unnoticed before Love's 1992 marriage to Cobain. *Ask for It* is a stopgap EP of rarities released in the wake of *Live Through This.* Love has repeatedly denied the rumors that Cobain helped her write *Live Through This,* but she hasn't done herself any favors by failing to write new songs. *Celebrity Skin* took four years, with writing help from Smashing Pumpkins' Billy Corgan. But although the title song was great ("when I wake up in my makeup"—nice one), even die-hard fans had trouble finding any songs buried in all the slick verbiage and production goop. It was the sort of made-in-L.A. meatball that could only have come from a professional rock contractor, in the tradition of Rod Stewart's *Body Wishes,* Mick Jagger's *Primitive Cool,* or Stevie Nicks' *Rock a Little.*

By now, Love was concentrating on her movie career, and what can you say about an artist who could have chased Bob Dylan but decided to chase Juliette Lewis instead? Love spent the next few years suing the surviving members of Nirvana, successfully preventing fans from hearing any of the band's unreleased material. She returned to music with the heavily hyped solo debut *America's Sweetheart,* but it was ignored by fans and apparently unnoticed by the artist herself. Love seems to crave the spotlight, and she's welcome to it, but *Live Through This* reminds you she once had something to say there. —R.S.

Epitomizing as absolutely as does Charlie Parker the saga of the jazz genius as tragic soul, Billie Holiday's biography reads like a Dostoyevsky novel: Raped at 10 years old by a neighbor (some accounts say "cousin"), she was sent to a home for wayward girls; in her teens she spent four months in jail for prostitution. Starting as a singer in New York's rough-and-tumble speakeasies of the early '30s, she was famous by mid-decade. Heroin and a hard-luck love life began wearing her down in the '40s; with her success, too, came the pressures of song pluggers and aesthetic compromise—all of Tin Pan Alley's hack songwriters dogged Holiday to sing their tunes. Her personality a tense mix of the rebel and the victim, Holiday's life was wholly struggle; self-destructive, incandescent, she died at 44. And she left music that, at its finest, continues to work like a depth charge—few singers of any genre can approach its emotional intensity; few singers, either, command her skill.

Remarkably, Holiday's voice wasn't the natural force that some stars (Sarah Vaughan, Aretha Franklin, even Dionne Warwick) have been given. Instead, her greatness lies in how she deployed it; by 1937, she was in full control of her style. Hitting notes against the beat the way all jazz horn players do (an early influence was Louis Armstrong's trumpet), she shaped rhythmic lines ingeniously—and interpreted lyrics with intuitive savvy. Humor, sass, toughness, and yearning all formed part of her staggering emotive repertoire; Holiday was expert both at laying bare the essence of a great lyric and at tossing off a mediocre one with such happy virtuosity that the words were elevated into pure swinging sound.

A number of massive, worthwhile compilations cover Holiday. Columbia's *Quintessential* series chronicles her work in the 1933–42 heyday; her sessions are grounded on the elegant piano work of Teddy Wilson, and her range of sidemen extends to such legends as clarinetist Artie Shaw and saxophonist Lester Young. (She cut a few sides, too, with the orchestras of both Benny Goodman and Count Basie.) *Volumes 3, 4,* and *5* are the crème de la crème: Billie at the peak of her powers. *Legacy* does a good job of condensing the nine sets of the *Quintessential* series, including such standouts as "I Must Have That Man," "Having Myself a Time," "God Bless the Child," "Summertime," and "Long Gone Blues." Not only does Columbia repackage the first three of the series in a handsome set, all of her Columbia recordings are available on the gargantuan *Lady Day: The Complete Billie Holiday on Columbia.* In 2002, the label subdivided its offerings further, focusing alternately on bluesy, romantic, and swinging Holiday. A year later, it reconfigured the catalogue yet again, this time chronologically. The Commodore period covers the years 1939–44, with Billie swinging staunchly. Her work for Decca was string-laden and lush; with its selections recorded between 1944 and 1950, GRP's *The Complete Decca Recordings* gives us Holiday in her middle period—not quite so swaggering as during her late-'30s reign nor so powerfully desperate as she became later on.

Holiday's later work continues to divide listeners—some jazz purists scorn her experiments with richer string arrangements, others consider her interpretive approach occasionally melodramatic or strained, and some fans of Billie's early, clearer tone find disturbing the roughness that comes into her voice in the mid-'40s. Listen to *The Complete Billie Holiday on Verve,* a 10-record collection that documents her 1946–59 period, however, and discover remarkable music that, for all its hit-and-miss technique (sometimes poorly chosen material, sometimes overwhelming instrumentation), is an astonishing spiritual autobiography—at times, Holiday's singing is the very voice of pain, loss, and hard experience. *Lady in Autumn* encapsulates the Verve years, and it's a bittersweet triumph; in fact, it's often against the lush backdrop of a full orchestra that she achieves her most eerie effect—her singing is acid splashed against velvet. Those who appreciate the fearsome, agonized Holiday might also check out *Lady in Satin* and *The Last Recordings;* Ray Ellis' somewhat soupy arrangements serve (who knows how intentionally?) to set off Lady Day's singing in ways that can provoke feelings of real terror.

At Carnegie Hall is memorable live Holiday. Of the superabundance of Holiday repackagings, perhaps the best place to start is the *Ken Burns Jazz* disc. The songs are very intelligently selected and the chronological range is generous. —P.E.

The Hollies

★★★ The Hollies (EMI, 1965)
★★ Evolution (1967; Sundazed, 1999)
★★½ Dear Eloise/King Midas in Reverse (1967; Sundazed, 1997)
★★ Moving Finger (1970; Sundazed, 1997)
★★★ The Hollies' Greatest Hits (Epic, 1973)
★★ Live Hits (Polydor, 1977)
★★★ The Best of the Hollies, Vol. 2 (EMI America, 1983)
★★★ Epic Anthology (Epic, 1990)
★★ Magic Touch (Hollywood, 1992)

★★	The Midas Touch (Sony Special Products, 1995)
★★★	Archive Alive! (Archive Alive, 1997)
★★	Take Two (Sony Special Products, 2001)
★★	Super Hits (Legacy, 2001)
★★★	Classic Masters (Capitol, 2002)
★★★	The Hollies' Greatest Hits (Sony, 2002)
★★½	What Goes Around (Wounded Bird, 2002)

The Hollies' mid-'60s hits were British Invasion pop of the cute school—sweet-voiced, upbeat, and ultracrafted. Vocalists Allan Clarke and Graham Nash crooned about teenagers in love on hit singles including "Stop Stop Stop" and "Dear Eloise," in addition to songs by non-Hollies such as Graham Gouldman (later a founding member of 10cc), who provided such valentines as "Here I Go Again," "Look Through Any Window," and "Bus Stop." The band made massive singles but couldn't stretch enough for albums, and bombed when trying anything difficult (their 1969 album of Dylan covers, *Hollies Sing Dylan,* for example). Their better albums have been reissued by Sundazed, and they range from the semipsychedelia of *Evolution* and *Dear Eloise/King Midas in Reverse* to the slick pop of *Moving Finger.* Nash departed for Crosby, Stills & Nash in 1968, but the Hollies, with ex–Swinging Blue Jean Terry Sylvester added on second lead vocal, persevered. The '70s found them scoring big with "Long Cool Woman," "He Ain't Heavy, He's My Brother," and "The Air That I Breathe." Of the abundant compilations, *Epic Anthology* and *Classic Masters* are the strongest. *Archive Alive!* features a fine 1983 concert: It's amazing that they could pull off those complex harmonies live. *What Goes Around* is a nice reunion album of almost all the original members on the 20th anniversary of the Hollies' founding. —P.E.

Buddy Holly

★★★★½	The Chirping Crickets (1957; MCA, 2004)
★★★★★	The Buddy Holly Collection (MCA, 1993)
★★★★½	Greatest Hits (MCA, 1996)
★★★	The Best of Buddy Holly: The Millennium Collection (MCA, 1999)

Buddy Holly was one of rock's first great singer/songwriters, a double threat who inspired the Beatles and countless other recording artists to take control of their own repertoires; he was also a product of country music who made that music's influence on rock & roll clear. But those achievements pale next to Holly's towering achievement: a collection of songs that have become a part of rock's DNA and still sound fresh today, including "That'll Be the Day," "Peggy Sue," "Maybe Baby," "Everyday," "Not Fade Away," "Oh Boy," "Rave On," and more. That run started in 1956, when, having been dropped by Decca Records after the commercial failure of his work with Nashville producer Owen Bradley, Holly took the song "That'll Be the Day" to producer Norman Petty's studio in Clovis, New Mexico. Holly—who had grown up in a musical family and who was performing, writing, and making home recordings in his mid-teens—and drummer Jerry Allison had written the song after being inspired by a line of dialogue spoken by John Wayne's character in director John Ford's classic 1956 film *The Searchers.* With Allison, bassist Jerry Welborn, and new rhythm guitarist Niki Sullivan joining him in the studio, Holly fired off the opening licks and came roaring in with a no-compromises vocal that underscores the narrator's determination to steer a rocky relationship's tenuous course. Holly works the verses masterfully for dramatic effect, and behind him the band charges hard, especially Allison on drums, and Holly adds some razor-edged guitar solos to boot. In May 1957, following some tricky contractual maneuvering, Brunswick, a Decca subsidiary, released "That'll Be the Day" b/w "I'm Looking for Someone to Love" (another Holly original, this one featuring a tough guitar solo rooted in the licks from "Holly Hop"), and by August it was sitting at #1 on the singles chart.

Over the next year, Crickets singles made the Top 20 three times, hit the Top 30 once, and hit #10 in December 1957 with one of Holly's most ferocious performances, "Oh Boy." However, a month ahead of "Oh Boy" came Holly's first solo hit, "Peggy Sue," which topped out at #3 in November. In their brief chart history, Crickets recordings were far more successful than Holly's solo efforts—he was in the Top 20 only once more, in March 1959, a month after his death, with a lilting ballad Paul Anka had written for him, "It Doesn't Matter Anymore." But whereas the Crickets' recordings emphasized the big beat and the basic band, Holly's solo work is where the visionary in him surfaced most dramatically. Disc two of *The Buddy Holly Collection* is virtually a showcase for the artist Holly was on his way to becoming when his life ended in a 1959 plane crash that also claimed the lives of Ritchie Valens and the Big Bopper. The addition of ace guitarist Tommy Allsup to the Crickets lineup (replacing a road-weary Niki Sullivan) freed Holly to focus on other aspects of his performance and sound, so great was his confidence in Allsup's ability to fashion commanding instrumental statements. Sometimes a simple new touch made all the difference, such as pianist C. W. Kendall pounding out ebullient boogie-woogie riffs on his own "Little Baby," a cut from

Holly's debut solo album in 1958; piano, in fact, figures prominently in the sound Holly was constructing in those days, as a softening touch, for lack of a better term, even in the midst of an uptempo workout such as "Fool's Paradise," a 1958 cut featuring Vi Petty (Norman's wife) on the 88s. The "Fool's Paradise" session also yielded "Take Your Time," a Holly-Petty collaboration marked by infectious cross-rhythms accented by Allison's thumping on a cardboard box, Holly's softly strummed acoustic guitar, and Petty's robust fills on Hammond organ. It wasn't a single, but in 1958 no rock & roll record really sounded like "Take Your Time," and it would be another four years, in 1962, before Booker T. & the MG's brought an organ-rich sound into the mainstream. The first appearance of a stuttering sax solo on a Holly record came via the acknowledged copyright owner of the style, King Curtis, on the lively, R&B-flavored take on Curtis' own "Reminiscing," from 1958. Recording at the Pythian Temple in New York City in June 1958, Holly took "Early in the Morning," cowritten by Bobby Darin, into gospel territory, with a hearty, free-flowing vocal as the Helen Way Singers provide exultant responsive background vocals and jazz stalwarts Sam "the Man" Taylor (saxophone) and Panama Francis (drums) set a propulsive pace. "True Love Ways," another New York cut from 1958, is as lush and dreamy as any mainstream pop song of the day, with romantic allure courtesy of Taylor's seductive tenor sax fills, a beautifully arranged string section from Dick Jacobs' orchestra, and a gentle vocal from Holly in which he dispenses with all his eccentricities and sings his vows of enduring love straight and with powerful conviction. Its timelessness is rooted in its simplicity: Despite its grandiose aspirations, the production doesn't call attention to itself, but rather serves to heighten the message the lyrics impart, to the point where a listener could almost regard it as an acoustic ballad. The same approach worked to equal emotional impact in Holly's final studio session, in January 1959, on an incandescent heartbreaker written by Felice and Boudleaux Bryant, "Raining in My Heart."

The amazing journey that is *Collection*'s disc two concludes with four home recordings Holly made in January 1959. The original acoustic recordings have since been overdubbed by Norman Petty, with the Fireballs adding additional instrumentation and backing vocals. All four of these songs are Holly originals, and rank as some of his finest lyric writing: "Peggy Sue Got Married" is no lightweight sequel, but a deeply felt lament over a lost love done to a driving arrangement that subtly evokes the sound of "Peggy Sue"; "Crying Waiting Hoping," which gained some measure of fame when Marshall Crenshaw performed it in portraying Holly in the film bio of Ritchie Valens, *La Bamba,* is about as good a statement as anyone has come up with to describe the hope-against-hope a jilted lover experiences in the aftermath of a breakup; the stolid rhythm and stop-time measures of "Learning the Game" point up the emotional toll love can exact on a vulnerable heart; "What to Do" is a midtempo evocation, gently sung with complete understanding, of postbreakup identity loss.

Over the years, the amount of Buddy Holly in print has expanded and contracted, depending on the vagaries of the record labels. Apart from *The Buddy Holly Collection,* the disc to own is *Greatest Hits.* This 18-song entry is all choice cuts, from "That'll Be the Day" to "Raining in My Heart" and all stops in between, solo and band, flat-out rockers to breathtaking ballads, plus inspired album cuts such as "Fool's Paradise" and "Heartbeat" that offer an intelligent overview of the artist's oeuvre.

Also, don't overlook *The Chirping Crickets,* the only album Holly made with his band before he was given headline billing. Unlike many long players of its day, *The Chirping Crickets* is not a couple of hit singles and throwaway filler. Each cut is a marvel of inspired playing and intelligent singing. The familiar tracks are rather amazing: "Oh Boy," "Not Fade Away," "That'll Be the Day," "Maybe Baby" (which sounds like the basic text for the next decade's British Invasion). There's also a cover of Chuck Willis' R&B gem "It's Too Late" that Holly makes his own; a nice turn on "Send Me Some Lovin'," originally recorded by Little Richard; and an impassioned take on "An Empty Cup (and a Broken Heart)," one of Roy Orbison's early entries in the tear-stained ballad category.

Lesser inspired but no less inspiring, *The Best of Buddy Holly* is in keeping with MCA's 20th Century Masters series in offering only a taste of an artist's most delectable fare. Though its 10 cuts are above reproach—"That'll Be the Day," "Peggy Sue," "Words of Love," "Rave On," "Raining in My Heart," "True Love Ways," etc.—10 cuts is 10 cuts only. There's so much more to say. But then that sentiment's been true since about, oh, February 3, 1959. —D.M.

Holy Modal Rounders

★★★★½	1 & 2 (1964; Fantasy, 1999)
★★★½	Live in 1965 (1965; DBK, 2002)
★★★	Indian War Whoop (ESP/Calibre, 1967)

★★★★★	Have Moicy! (1976; Rounder, 1991)

★★★½ Last Round (1978; Adelphi, 2000)
★★★★ Too Much Fun (Rounder, 1999)
★★★★½ I Make a Wish for a Potato (Rounder Heritage, 2001)

Peter Stampfel is that rarest of all creatures, a modest genius. He has one of the most distinctive voices in American music, a twangy screech that somehow he can actually sing in. What makes him so modest is his conviction that all of the really great American music was done a long time ago, and mostly collected on Harry Smith's *Anthology of American Folk Music.* What makes him a genius is that instead of putting his beloved old-timey music up on some pedestal, he makes it an organic part of his own life experience—which is mostly that of a radical '60s speed freak who appreciates nothing better than a cosmic joke.

When Stampfel hooks up with guitarist Steve Weber, as he has infrequently for a third of a century, they knock off a Holy Modal Rounders album. These are filed as Folk, because their first two albums, now known as *1 & 2,* with Stampfel on fiddle and banjo, are full of public domain songs like "Flop Eared Mule" and "Fishing Blues." But it also has a novelty called "Mr. Spaceman," and prophetic songs by future Rounder Robin Remailly and fellow traveler Michael Hurley. It may have sounded weird way back when, but it sounds fresher than ever today. The recently released *Live in 1965* sounds harsh but kicks the energy up a level, and Stampfel's between-song patter is a plus.

The other '60s Rounders albums are curiosities, conceived as psychedelia and sloppily executed, but there is a rousing "I.W.W. Song" on *Indian War Whoop,* and *The Moral Eels Eat* generates dim-witted glee on pieces like "My Mind Capsized" and "The STP Song." The '70s albums are folkier, but most of the songs are originals and the band has devolved into posthippie counterculture. They seem to be crawling back into print, along with old tapes like *Live in 1965* and *Bird Song: Live 1971. Good Taste Is Timeless* is blessed with new liner notes by Stampfel, but both it and *Last Round* are very inconsistent: Some of the best songs ("If You Want to Be a Bird") are remakes, and the inspired titles ("Boobs a Lot," "Snappin' Pussy") aren't as good as you'd hope. Meanwhile, the live tapes add period color, like Stampfel's wit in 1965 and the indiscriminate banging and tooting of their loud 1971 band (seven pieces, including sax).

But *Have Moicy!,* attributed to "Michael Hurley/The Unholy Modal Rounders/Jeffrey Frederick & the Clamtones," is an improbable masterpiece. The extra songwriters broaden the worlview: Hurley is comfy, Frederick has a bitter streak, and Antonia has her mind on sex and drugs. And every song is quotable, from "oh I see the dishes over there/they fill me with despair" to "I got a jug of wine, Griselda/why should you waste your time in sorrow/hold out your hand and have no fear/if we're caught I'll marry you tomorrow."

Stampfel's albums under his own name are out of print, including *You Must Remember This* (Gert Town, 1995), where he reworks pop chestnuts. But Weber surfaced again for 1999's *Too Much Fun,* where the Rounders returned strongly to traditional material, including some of their own. The Rounder compilation *I Make a Wish for a Potato* tries to synthesize another *Have Moicy!* by slipping tracks from Hurley and Frederick solo albums into a passel of Rounders songs, including one that goes, "Superman's/on the can/contemplating synergy." —T.H.

Hoobastank

★★ Hoobastank (Universal, 2001)
★★ The Reason (Island, 2003)

This well-scrubbed California four-piece combine aggressive new-metal riffs, swooning melodies, pained lyrics of masculine anger and self-pity, and big, happy grooves. It all holds together, in the same way that grunge bands have mixed exuberant music and whiny vocals for years. "Running Away" and "Crawling in the Dark," high-octane and tuneful, with achingly earnest lyrics ("Is there something more than what I've been handed?/I've been crawling in the dark looking for the answer") set the tone for the first album. The followup mostly stays the course, with an increase in the ballad quotient ("The Reason," which became a huge smash) and an unwelcome addition that most of their L.A. rock peers wouldn't touch with a ten-foot pole: Hollywood strings. —B.S.

John Lee Hooker was born near Clarksdale, MS (the year is in question, as Hooker variously gave 1915, 1917, and 1920 as birthdates), but his music was born farther south, thanks to his stepfather Will Moore, who was raised in Louisiana and played a style of blues built on a one-chord droning tone, relentless vamping, and stinging, lower-strings punctuations. Blind Lemon Jefferson, Blind Blake, and Charley Patton often visited Moore at his house, but their effect on Hooker was virtually nil—Moore's music possessed him and is the most direct influence on a style that became one of the touchstones of blues-based rock & roll. In fact, in the last few years before his death in 2001, Hooker found his "children" coming home to pay homage to the master. In his excellent latter-day releases, *The Healer, Mr. Lucky, Boom Boom,* and *Chill Out,* Hooker is joined by Bonnie Raitt, Albert Collins, Robert Cray, Keith Richards, Carlos Santana, Los Lobos, George Thorogood, Booker T. Jones, Johnnie Johnson, John Hammond, Charlie Musselwhite, a new incarnation of Canned Heat, Ry Cooder, Johnny Winter, and others in what amounts to Hooker's whistle-stop tour through 25-plus years of rock music bearing his signature in the voices of other players. In his twilight resurgence, he was well served by producer Roy Rogers, who didn't let the marquee names overwhelm the proceedings. Indeed, *Chill Out*'s best moments feature not the all-stars but Hooker alone with his guitar, carving out some savage blues all on his own.

Hooker's signature sound isn't easily copied, since its only pattern is no pattern at all. Vamping and droning are its constants, but Hooker regularly breaks down the 12-bar structure in order to extend his story to a conclusion only he envisions; moreover, his fingering and chording follow no discernible logic, and time is without question a moving thing almost from bar to bar. Then Hooker brings everything home with his brooding, low-down vocals, which hint at some impending danger even in the brightest moments. Like Muddy Waters', Hooker's is the deepest of deep blues, and his point of view is that of someone who regards life as a tragedy and humankind as basically no damn good. This is, after all, a bluesman who sang the murder ballad "I'm Bad Like Jesse James" with utter conviction, and whose repertoire included scalding entries such as "When My First Wife Left Me," "I'll Never Get Out of These Blues Alive," "Serve Me Right to Suffer," and, if only to show the universe in perfect alignment, "Serve You Right to Suffer."

After working odd jobs and playing music as a sideline in Memphis and Cincinnati in the late '30s and early '40s, Hooker moved to Detroit. There he made some recordings for a local distributor, Bernard Besman, who had his own small label, Sensation, but leased the first masters to the folks at Modern and proceeded to work extensively in the studio with the artist over the next five years. From that first session, "Boogie Chillen" broke out in 1948 and reportedly sold over a million copies; its success loosed on the world an insistent, brooding, pulsating rhythm—built on a simple ostinato figure played slightly behind the beat—that both heralded the coming of a distinctive new artist and brought traditional blues into step with the accelerating pace of America's postwar society. Thereafter Hooker's masters were leased to a variety of labels and issued with the artist identified by a variety of names: Delta John, Texas Slim, the Booker Man, even John Lee Booker. Regardless of the name on the labels, most of the songs (and certainly the most effective) featured only Hooker accompanied by his electric guitar and his own foot stomping, in large part because his unusual approach to a song's structure and rhythm made it difficult for other musicians to stay in step with him.

Apart from the late '80s and '90s albums, Hooker's most noted band sessions are those he cut in 1970 with blues revivalists Canned Heat, which started life as a single album, were reissued in a two-CD set, and are now available in a boiled-down single CD from EMI, *The Best of Hooker 'n' Heat.* Rhino's catalogue features a live album as well, *John Lee Hooker and Canned Heat Recorded Live at the Fox Venice,* featuring Hooker, Canned Heat, and, on backup vocals, the Chambers Brothers. In its original incarnation with 300-pound lead singer Bob Hite and ace guitarist/vocalist Al Wilson (both are now deceased), Canned Heat was the foremost exponent of Hooker-style boogie in a blues-rock setting.

Nothing, however, supplants Hooker solo or with minimal backing. His finest records through the years have benefited from a stark approach that elevates the mood of his most personal stories. Rhino's *The Ultimate Collection: 1948–1990* supports this theory even as it shows Hooker sometimes effective in a broader setting. Guitarist Eddie Kirkland, who provided exemplary support on several Hooker sessions, is heard here in good form on "Think Twice Before You Go," and again on a 1968 track, "Back Biters and Syndicators," which also features Louis Myers on harmonica, Eddie Taylor on bass, and Al Duncan on drums. Similarly, a track from Hooker's marvelous *The Real Folk Blues,* "You Know I Know," finds him backed by one of his early accompanists, guitarist Eddie Burns, as well as Lafayette Leake on piano, Willie Dixon on bass, and the incomparable Fred Below on drums.

You don't have to be a purist to appreciate the power of Hooker's earliest sides cut in Detroit. These represent the darkest, rawest tales in the artist's literature as well as his most acerbic slants on life as black Americans knew it in the immediate postwar years. Some of these have the feel of having been carefully prepared and worked out, others are ragged and improvisational. All are powerful statements. Numerous first-rate overviews of this period are now in print, and it's difficult to recommend one over another. However, as a complete package the Capitol Blues Collection's three-CD survey of the Besman-produced sessions, *Alternative Boogie: Early Studio Recordings, 1948–1952,* is hard to beat. In addition to 56 recordings, including some alternate and previously unreleased takes, the set comes with an informed liner essay by Pete Welding and a short piece by Bernard Besman himself, who lays out his argument that Hooker's music is so distinctive it cannot be called blues at all, but rather should be designated "early Americana." Less ambitious but no less essential is Flair/Virgin's 24-track single-CD survey, *The Legendary Modern Recordings 1948–1954.* Other key titles that round out Hooker's early years on various labels include *Detroit Blues 1950–1951,* with solo recordings by Hooker and by Eddie Burns (Hooker's tracks are also available separately in Collectables' Gotham Golden Classics); and two fine Specialty titles, *Graveyard Blues* (from 1949–50, its 20 Besman-produced cuts were released on the producer's own Sensation label) and *Everybody's Blues* (a handful of solo Hooker tracks from 1950–51 and others from 1954 recorded for Specialty but seeing the light of day for the first time here). A more recent and equally vital entry, in that it goes far toward completing the picture of Hooker's early years, is the Atlantic/Savoy disc *Detroit 1948–1949,* which finally brings to light 20 sides Hooker cut pseudonymously for Savoy during those years. Most of these tracks are Hooker and solo guitar, but four feature him in a duo with acoustic guitarist Elmer Barbee, and four feature Hooker with Barbee, James Watkin on piano, and Curtis Foster on drums. Check out a searing adaptation of Louis Jordan's "Ain't That Just Like a Woman," here titled "Just Like a Woman," with Hooker flailing his guitar furiously at the outset, then settling into a fierce vamp as he sings/declaims his explanation for dumping a two-timing woman, whom he regards as simply reverting to type. There's also a raw Christmas blues here, "Christmas Time Blues," with the band in tow, and its melody and piano part sometimes bear a striking resemblance to Charles Brown's Yuletide classic, "Merry Christmas, Baby." Deeper into the '50s, another exemplary package comes by way of the 31-track, double-CD Tomato/Rhino set, *The Early Years,* also graced by a Pete Welding essay and covering Hooker's band recordings for the Vee Jay label from 1955 to 1964. On this set the stellar Vee Jay artist Jimmy Reed is heard blowing a mean harmonica and playing guitar on two cuts, Hooker is backed by horns on a 1961 session, and the Vandellas sing backup vocals on two cuts from 1963. An overview that takes Hooker from his solo days into his first band sides is available by way of GNP Crescendo's well-considered *The Best of John Lee Hooker.* For a brief period Hooker also was in the Chess stable in Chicago, and those recordings have been returned to print in MCA's double-CD *The Complete '50s Chess Recordings,* which comprise not only Hooker's recordings while under contract to Chess but also some sides the Chess brothers leased from other labels (Fortune, HiQ, and Gone). Some of these sides feature Eddie Kirkland on guitar, but in terms of Hooker's development on record the most interesting are three tracks teaming Hooker with a horn section, a precursor to the mainstream R&B bent his music would take later in the decade and into the '60s during his tenure with the Vee Jay label.

The development of Hooker's style within a band context is demonstrated on the sides dating from the late '50s forward, for Vee Jay and several other labels that had the benefit of Hooker's services through the '60s. Not that the style developed all that much—Hooker was resolutely Hooker, no matter the setting; what was interesting was how other musicians respond to the challenge posed by his unorthodox sense of song structure. Thanks to an ambitious reissue program by Collectables, 10 of Hooker's Vee Jay albums have been returned to print (available individually or in a boxed set, *The Man, The Legend*). The place to start in the Vee Jay recordings is the monumental *The Folk Lore of John Lee Hooker.* In the early '60s Hooker had started referring to himself as a folk singer, and emphasized the point by appearing regularly at folk festivals around the country, including Newport (memorialized in the Vee Jay album *Concert at Newport*). The first track on *Folk Lore* is "Tupelo," a story song, a deep, dark blues told in a foreboding voice, about the devastation visited upon the Mississippi town when the river overflowed. That live cut (recorded at Newport in 1960) marks the start of an amazing journey that features some of the finest writing, singing, and musical accompaniment Hooker ever delivered on a long player. It's followed on disc by a tale of revenge and murder, "I'm Mad Again," in which Hooker recounts how he took in a down-on-his-luck friend who betrayed his benefactor by sleeping with his wife. "I'm made like Al Capone," Hooker announces in a threatening tone, and then proceeds to describe drowning the lout and watching him sink. Generally there's no going wrong with the Vee Jay albums from the standpoint of arresting music and performances; the only negative is the lack of session info and dates, all too typical of Collectables' reissues.

Apart from Vee Jay, some of the strongest work from this period was done for the Riverside label, starting in 1959 with the potent, stark solo renderings on *The Country Blues of John Lee Hooker,* wherein the Hooker boogie is displaced by a blues style redolent of the Delta. From those same sessions comes *Burning Hell,* issued first in England (and even there not until 1964) and unavailable Stateside until its release on CD in 1992. In 1960 producer Orrin Keepnews cut Hooker with bassist Sam Jones and drummer Louis Hayes, rhythm masters recruited from Cannonball Adderley's band, for *That's My Story: John Lee Hooker Sings the Blues.* Of interest here is Hooker's "I Need Some Money," which showed up in slightly different form as "Money (That's What I Want)," a Top 30 pop single that year for Barrett Strong and later covered by the Beatles. A brief liaison with jazz producer Bob Thiele, first for Thiele's Impulse label in 1965 and a year later at the Thiele-led ABC–Bluesway, yielded two memorable efforts. For Impulse, Hooker served up fire, brimstone, and a sinister ambience on *It Serves You Right to Suffer* (his bloodcurdling scream on the album-opening boogie, "Shake It Baby," is worth the price of admission) accompanied not by die-hard bluesmen but rather by some top names in the jazz–big band world, including Milt Hinton on bass, Panama Francis on drums, Barry Galbraith on guitar, and, on another version of "Money" (now titled as such), trombonist Dicky Wells, a veteran of the Count Basie Band. Purists are adamant in arguing the superiority of undiluted Hooker, but the great players Thiele assembled for this session seem to understand every nuance of the Hooker approach, and respond with support that's as intelligently crafted as it is subtle. When Impulse folded its tent a year later, Thiele founded ABC's

Bluesway imprint and cut one more noteworthy session with Hooker, a live album recorded at New York's Café au Go-Go on August 30, 1966. There's not a thing wrong with Hooker's dramatic performances on *Live at the Café au Go-Go,* but what must have been seen by Thiele as a summit meeting of giants doesn't quite pan out. Muddy Waters had preceded Hooker with a set and stayed onstage with his band to accompany his fellow Mississippian, but it turns out to be Waters' piano player, the redoubtable Otis Spann, who gets in the good licks throughout. Nevertheless what's here is choice, from the first cut ("I'm Bad Like Jesse James," which is "I'm Mad Again" retitled) to the eighth and final cut, the wrenching heartbreaker "Seven Days." *Live at the Café au Go-Go* is now paired with another live recording, a searing performance memorialized as *Live at Soledad Prison,* on a must-have MCA twofer. One of the best live Hooker performances ever captured on tape was released in 1972 (reissued in 1989) on Fantasy's double-album *Boogie Chillun.* Recorded at San Francisco's Sugar Hill nightclub—a regular stop for prominent blues artists in its day—these acoustic performances are vivid demonstrations of the mesmerizing power Hooker wrought with only his voice, his guitar, his foot beating time, and a stockpile of lived-in blues sagas. Now 19 more performances from that night have surfaced on *Live at Sugar Hill Vol. 2.* Suffice it to say, Hooker, in 1962, was at the top of his game, a judgment borne out by every purposeful note played and sung on the second Sugar Hill volume.

Recorded in 1966 (reissued in 1991) as the followup to the outstanding *Real Folk Blues* album for Chess, the engaging *More Real Folk Blues* finds Hooker plugged in and working with a band on some of the most overt efforts he made at chart success. This is a mixed bag, but Hooker does an interesting take on "Mustang Sally & GTO," basing his version on the original "Mustang Sally" cut by Mack Rice in 1965, two years before Wilson Pickett hit paydirt with it. One of Hooker's final '60s recording sessions took place in Paris in late November 1969. Some of these sides were issued on a Black and Blue import, and these plus six other previously unreleased songs comprise Evidence's *Get Back Home.* Among the interesting oddities here: John Lee having a boisterous go at "Hi Heel Sneakers" and a reconsideration of Jimmie Rodgers' "T.B. Blues" in which Hooker's vocal takes on a penetrating Bukka White–style vibrato. Sessions from 1967 and 1969 comprise *Urban Blues,* which finds Hooker dipping ever so slightly into social commentary on the dark, turgid "Motor City Is Burning" (from 1967) and, less successfully, on "I Gotta Go to Vietnam" (a previously unreleased track from 1969); the latter, which borrows generously from "Rollin' and Tumblin'," percolates along steadily, but delivers less in its ho-hum narrative than in its powerhouse riffing (with Earl Hooker's snarling wah-wahed guitar lines most prominent).

Payback time begins in the '70s with the Canned Heat sessions and continues with the above-mentioned guest artists populating his latest recordings. Additionally, *Never Get Out of These Blues Alive* teams Hooker with a band whose numbers are bolstered on several cuts by Elvin Bishop on slide guitar, the Butterfield Blues Band's Mark Naftalin on piano, and, on the title track, Naftalin, Bishop, and Van Morrison, the latter sharing lead vocals with Hooker. *Endless Boogie* (1971) brings Steve Miller on board to add some pungent electric guitar lines to the proceedings, although it is harmonica wizard Dave Berger who steals the show with his Little Walter–style wails and moans. *The Cream* is four sides of live, prime Hooker, recorded in 1977 with a band featuring Charlie Musselwhite on harmonica. Note also that two Hooker albums are titled *Alone.* One of these is available on vinyl from Specialty and contains sides cut between 1948 and 1951 with Bernard Besman in Detroit; the other is a two-CD live album on Tomato featuring Hooker solo at New York City's Hunter College. As for single-CD overviews, both MCA and Rhino have top-notch samplers of Hooker's work, with MCA's covering the years 1965 to 1974, while Rhino's *The Very Best of John Lee Hooker* ranges from the original Modern recording of "Boogie Chillen" through representative tracks from the '50s and '60s cut for Modern, Vee Jay, Riverside, Impulse, Chess, and Bluesway, plus a side from the 1971 *Hooker 'n' Heat* album and an interesting take on Robert Johnson's "Terraplane Blues" recorded for Roy Rogers' 1987 album, *Sidewinder.* It can be argued that Hooker rarely varied his tried-and-true formula; but more than 50 years after that formula was first heard on record, the man's "early Americana" sounds as vital and stirring as ever. Elemental, fundamental, monumental, John Lee Hooker's blues is the stuff of life. —D.M.

Hootie & the Blowfish

★★★ Cracked Rear View (Atlantic, 1994)
★★½ Fairweather Johnson (Atlantic, 1996)
★★★ Musical Chairs (Atlantic, 1998)
★★½ Scattered, Smothered and Covered (Atlantic, 2000)
★★½ Hootie & the Blowfish (Atlantic, 2003)

At press time, 16 million Americans had purchased a copy of Hootie & the Blowfish's *Cracked Rear View.* However much music snobs may shake their heads in disbelief, the major-label debut by these four South Carolinians touched a lot of people, many of whom probably didn't listen to much pop music or hadn't in a long time. The reason? Hootie's brand of classic-flavor Middle American guitar rock was unoriginal and kind of dull, but you could also call it pleasantly familiar. "Hold My Hand," "Let Her Cry," "Only Wanna Be With You," and "Time" became megahits because their melodies are catchy and likable, and because Darius Rucker's mellow voice worked on listeners like a fuzzy security blanket.

Unfortunately, even the best bar bands have trouble with artistic growth, and Hootie proved no exception. *Fairweather Johnson* is more of the same, just not as good. Actually, the tunes hold up well; the central problem is Rucker, who apparently decided between albums that he'd sound more soulful if he sang more gruffly. He only sounds more constipated. *Musical Chairs* is a significant improvement, with less mannered vocals enhancing punchy rockers like "Wishing" and down-home country-style outings like "Michelle Post." Song for song, it's their best so far.

Hootie's next album, an all-covers affair, takes songs by such notables as Tom Waits, R.E.M., and the Smiths and makes them sound like Hootie & the Blowfish originals. Which proves a point: This band, unlike a lot of other pop acts, has an instantly recognizable style. If only it were a little more exciting. Recorded after a four-year hiatus, *Hootie & the Blowfish* is another helping of meat and potatoes, with slight detours into smoky soul ("Little Brother") and sassy Southern rock ("Go and Tell Him"). As usual, it's pleasant but nothing special. —M.R.

Sam Hopkins, who died in 1982, left behind a staggering collection of country and urban blues as personal and topical as any artist of his time. He recorded solo acoustic; he recorded with small backing groups of anywhere from one to four players, some playing acoustic instruments, some playing electric. He talked some of his blues; he sang most of them. In narrative and ambience, his acoustic sides reflect the country life and attitudes he stayed close to from the cradle to the grave; his band sides burn with the fierce energy of rock & roll, as if the artist were acknowledging the quickening pace of society around him. From his songs you sense the man: witty, acerbic, truculent, deep feeling, confident, loyal, giving, somewhat sentimental, sensitive, engaged in the world, and if not misogynistic, certainly quick with his put-downs of the distaff side.

In 1946 Sam was discovered by a talent scout for the Aladdin label and sent to Los Angeles to record with pianist Wilson "Thunder" Smith. Thunder and Lightnin''s single, "Katie Mae Blues," did well in the Houston area, and Hopkins returned to the Aladdin studio, where he was to cut 41 more sides between 1946 and 1948, now collected on the double-CD set *The Complete Aladdin Recordings,* one of the critical early documents in Hopkins' recording history.

Arhoolie's *Early Recordings* and *The Gold Star Sessions* document the beginnings of his career (1947–50), when he was recording a broad variety of material. For example, in the midst of the fairly traditional folk blues on volume 1 of *The Gold Star Sessions,* Hopkins launches into "Zolo Go," accompanying himself on organ. The title is a phonetic misspelling of zydeco, and the song is one of the early recorded examples of that genre, cut several years before Clifton Chenier first appeared on record.

From the 1950s, Hopkins is represented by a set of recordings made for the Herald label, now issued on Collectables as *The Herald Recordings—1954* and *The Herald Recordings Vol. 2;* on BMG/Buddah as *Lightnin' and the Blues: The Herald Sessions;* and by Smithsonian/Folkways' *Lightnin' Hopkins,* recorded in 1959 when he was rediscovered in Houston by blues scholar Samuel Charters. Setting up a tape recorder in Hopkins' drab living quarters, Charters held the microphone in his hand while the artist produced one remarkable performance after another. The chitchat is kept to a minimum here, save for one brief but vivid reminiscence about Lightnin' 's personal encounters with Blind Lemon Jefferson. Otherwise, "Penitentiary Blues," "Bad Luck and Trouble," "See That My Grave Is Kept Clean," "Trouble Stay Away From My Door," and the salacious "Fan It" represent a blues titan at the top of his game.

One of Hopkins' most productive periods occurred between 1960 and 1964, when he recorded for the Prestige label. The seven-CD box set *The Complete Prestige/Bluesville Recordings* is a must-have title. As for individual Prestige/Bluesville titles, *Smokes Like Lightnin'* is highly recommended, both for the quality of the songs—"Prison Farm Blues" is a grim portrait of the bleakest of places a bluesman could and often did land—and for folklorist/producer Mack McCormick's liner notes.

Last Night Blues, with Sonny Terry sitting in on harmonica and singing one song, is quintessential Lightnin'. His vocals are crisp and clear, full of feeling, and he's right there on guitar, strong and cutting and propulsive, as Terry's harmonica snakes it way through the melody line, energizing Hopkins' every lick. *Hootin' the Blues* is a live album from 1962, recorded at the Second Fret in Philadelphia, featuring among its cuts an etiology of the blues ("The Blues Is a Feeling") and an original instrumental dialogue imagining a musical interchange between Lightnin' and Ray Charles ("Me and Ray Charles"). *Straight Blues* (1999) collects a dozen tracks culled from three Prestige/Bluesville albums and also contained on the seven-CD box set. These range from four solo efforts cut in Houston in 1961 to two with bass and drum accompaniment recorded in May 1964 and six solo acoustic live tracks from December 1964. It includes "Get It Straight," one of the artist's few forays into traditional country music.

In 1964, Lightnin' recorded with his brothers John Henry and Joel at John Henry's home in Waxahachie, Texas. This was something of a family reunion, since John Henry had not been in touch with his siblings or mother in years. As evidenced on *The Hopkins Brothers,* this was a reunion full of laughter, love, and some melancholy over time passed—Lightnin''s disc-opening "See About My Brother John Henry" is about as sad as blues gets. Other Arhoolie titles are worthy examples of the variety of blues Lightnin' was proffering in his later years. *Po' Lightnin',* in particular, is recommended.

Sometimes I Believe She Loves Me (1964) finds him accompanying the blues/folk singer Barbara Dane on guitar and vocals on an interesting collection of numbers. Some were written by Dane (whose earthy voice has an appealing rough edge, not unlike, say, Bonnie Raitt's or Maria Muldaur's), some by Lightnin', and covers of two Woody Guthrie songs ("Don't You Push Me Down" and a stirring version of "Deportees") and Malvina Reynolds' "Bury Me in My Overalls."

Arhoolie also has reissued on CD a live album from 1968 featuring Hopkins, Mance Lipscomb, and zydeco king Clifton Chenier (who was Hopkins' cousin by marriage by this time), recorded at the Berkeley Music Festival. Hopkins, playing electric guitar and backed by drummer Francis Clay, is medium-cool throughout, offering up some of his signature songs—"Short Haired Woman," "Lightnin's Boogie," "Black Cadillac"—as well as a strutting take on Big Bill Broonzy's "I Feel So Good." The real star of the show was Chenier, accompanied only by his accordion and Clay on drums. Of special note are his cover versions of Slim Harpo's "Scratch My Back" and a rocking version of Ray Charles' "What'd I Say."

From Hopkins' brief tenure on Chicago's Vee Jay label, two must-have albums remain in print, both from the Collectables catalogue. *Lightnin' Strikes,* from 1962, features Hopkins solo acoustic and electrified with a backing band, and though it's a mere 10 cuts total, it's full of fury, anger, heartbreak, and outrage. "War Is Starting Again" is a surging, outraged blues decrying the waste of human lives in Vietnam, from the moment the news media was starting to document the ever-escalating nature of the war. Equally startling, from a personal standpoint, is the spoken/sung acoustic blues "Walkin' Round in Circles," with Hopkins firing off angry licks to punctuate his litany of life's woes.

Collectables' four-volume *Anthology of the Blues* series is culled from the Everest label's vaults and takes Hopkins from the late '50s into the early '60s. The four albums in the series are available either individually or as a box set titled *From the Vaults of Everest Records,* which is handsomely packaged but poorly annotated, a persistent flaw with Collectables reissues. Another Collectables title, *Mojo Hand,* features some of Hopkins' most searing guitar work, close-miked and violent in its intensity, produced by Bobby Robinson, whose Fire and Fury labels were home to some of the great blues and R&B artists of the '50s.

From later years comes the GNP Crescendo *Legacy of the Blues* entry, which in 1976 reunited Hopkins with Samuel Charters for what proved to be one of the artist's final recording sessions. Collectables also chips in with an intriguing five-volume series titled *The Lost Texas Tapes,* which may be (there's no annotation) recordings Hopkins made in Houston in the '70s for the Home Cooking label. (Collectables has two other Home Cooking releases in its Hopkins catalogue, *Lonesome Life* and *Lightnin' Hopkins Strikes Again.*) Volumes 1 through 3 are Hopkins solo; 4 and 5 bring on guest artists. Volume 4 is a live recording, a true down-home effort done in a club or restaurant; patrons are heard conversing in the background, and on one track a cash register rings as Hopkins plays. He's accompanied by Curley Lee, who blows mean and low harmonica fills throughout and engages Hopkins in some humorous but cutting between-songs banter.

Among several Hopkins overviews, three stand out. Arhoolie's *The Best of Lightning Hopkins* has 17 tracks of choice performances: seven recorded for Gold Star between 1947 and 1950, the other 10 cut in Houston and Berkeley for Arhoolie. The songs run the gamut from classic blues ("Whiskey Blues") to gospel ("Jesus Will You Come by Here," again with Hopkins on piano) to social commentary ("Mr. Crow & Bill Quinn," "Tim Moore's Farm," "Please Settle in Vietnam"). You can't go wrong with this one. Ditto for Rhino's Blues Masters entry, *The Very Best of Lightnin' Hopkins,* with 16 tracks recorded for 10 different labels, beginning with Aladdin in 1947 and concluding with tracks cut for Folkways in 1961.

Finally, for those who really want some sense of the path of Hopkins' career, get *Mojo Hand: The Lightnin' Hopkins Anthology.* This well-annotated double-CD set contains 41 cuts, ranging from the original "Katie Mae Blues" cut for Aladdin with Thunder Smith in 1947 to a 1974 track previously released on a Swedish blues album. Among other things, this set shows that no matter the passing of time and trends, Hopkins remained true to his style and never ran out of things to say. —D.M.

Bruce Hornsby and the Range

★★★	The Way It Is (RCA, 1986)
★★½	Scenes From the Southside (RCA, 1988)
★★★	A Night on the Town (RCA, 1990)
★★★	Harbor Lights (RCA, 1993)
★★★	Hot House (RCA, 1995)
★★★	Spirit Trail (RCA, 1998)
★★★	Here Come the Noise Makers (RCA, 2000)

Bruce Hornsby's mid-'80s singles were almost aggressively tasteful: ultraprofessional piano pastiches, Americana, and MOR-ready hooks. But "The Way It Is" and "Mandolin Rain" suffered from an air of wistfulness that passed, on first listen, for melancholy but left a "Well-then-who-gives-a-damn?" aftertaste. *Scenes From the Southside* continued in the same vein, producing "The Valley Road," another stainless hit. Hornsby enlisted such diverse talents as Jerry Garcia and Wayne Shorter to help make *A Night on the Town* his most direct, almost bluesy record. Not that great a departure from the Range's earlier sound, it garnered critical encouragement but no big hits. *Harbor Lights* and *Hot House* found Hornsby dropping the Range and moving further jazzward. The double-album *Spirit Trail* was his most ambitious yet, stretching out his playing without resorting to aimless jamming. By this time, he was almost as well known for his part-time membership in the Grateful Dead as he was for his own music. The two-disc live album *Noise Makers* is culled from concerts in 1998 through 2000 and includes hits from "The Way It Is" to "Mandolin Rain." —P.E.

Baby

★★ Birdman (Cash Money/Universal, 2002)

As soon as New Orleans' Master P and his No Limit Records crew started to cool off in the late '90s, Cash Money Records was there to pick up the bling-bling and run with it. Assembled by producer Manny Fresh under the auspices of label heads Ronald "Suga Slim" Williams and Bryan "Baby" Williams (who later made an ill-advised album under his name), Cash Money's music shared some common traits with their hometown rivals in No Limit: a mix of over-the-top materialism and Run-D.M.C.–era production values; an assembly-line approach to releases and merchandising (new CDs often pictured the next few album covers well before the actual recordings were even finished); and lyrics that introduced thick Big Easy slang into the mainstream vernacular. But if Master P's No Limit Records created the template for successful New Orleans hip-hop, Hot Boys operated on a higher artistic plane, with the nimble playfulness of their raps and the extraordinary futuristic productions of Manny Fresh. Fresh, in codifying the Southern bounce sound, effectively became the most significant rhythmic innovator out of New Orleans since the Meters' legendary Porter/Modeliste rhythm section. The fly-by-night nature of the albums didn't matter to fans: After years of being ignored by the hip-hop scene at large, New Orleans had a huge reserve of enthusiasm and style to be tapped.

Juvenile (born Terius Gray) was the highest-profile member of the crew, which also included Lil' Wayne, B.G., and Turk. Growing up in and around N'awlins' lethal 17th Ward neighborhood, the Hot Boys were immersed in a hard-core existence of drugs and guns from a young age, which makes the fact that they were rhyming on record about this reality before they reached puberty (B.G. waxed his 1993 debut *True Story* at age 11) shocking and sadly credible. These tricky, regional rhythms manifested themselves in a Big Easy version of booty bass, which the Hot Boys gleefully adorned with anthem-making catchphrases. "Back That Azz Up" and "Ha," the hit singles from Juvenile's *400 Degreez,* sounded wildly original when spun on narrowly programmed radio stations in both New York and Los Angeles, and a regional niche sound blew up nationwide. While the Hot Boys' image as baggy-jeaned, heavy-lidded, medallion-wearing adolescents—not to mention their lyrics about platinum-crusted teeth and diamond-toenailed hoes—suggested little depth, tracks like "F*** Tha World" (from *Tha Block Is Hot,* where Lil' Wayne details the murder of his father) carried significant emotional heft. Apparently, Lil' Wayne's drug troubles led to his ouster from the group (Wayne countered with *500 Degreez,* a record that purported to be 100 degrees hotter than Juvenile's hottest release), and producer Manny Fresh took his turn on the mike with his group Big Tymers. Curious listeners should start with *400 Degreez* and B.G.'s *Chopper City in the Ghetto,* and move to *Tha Block Is Hot.* And if all this music fails to entice, mainstream America can nevertheless thank the Hot Boys for popularizing the phrase "bling-bling." —P.R./N.B.

Son House

★★★★½	Father of the Delta Blues: The Complete 1965 Sessions (1965; Columbia/Legacy, 1992)
★★★★	Delta Blues: The Original Library of Congress Sessions From Field Recordings 1941–1942 (Biograph, 1991)
★★★★	Delta Blues and Spirituals (Capitol Blues Collection, 1995)
★★★★★	The Original Delta Blues (Columbia/Legacy, 1998)

Son House's blues universe is like no other Delta artist's, and to some his music is without parallel in its spiritual force. Born in Lyon, MS, and raised in Tallulah, LA, the forever-restless Eddie James "Son" House (1902–88) returned to his native state periodically in his teens in what now seems a search for peace of mind that would consume him throughout his life. A devout churchgoer from childhood, by age 15 he was a dedicated Baptist preacher who loved and sang gospel music but scorned the blues for its evocations of immorality and slovenly behavior.

In his mid-twenties, though, House heard the music with new ears, perhaps because he was on his way to living out the very tales he so despised as he rambled aimlessly from town to town throughout the South, preaching, riding the rails, working a variety of manual-labor jobs, designing his next getaway. From a wandering Mississippi guitarist named Willie Wilson he learned the fundamentals of the bottleneck style that would lend his music its eerie, edgy quality. In another bluesman, Rubin Lacey, he heard the guitar being used almost as a second, inner voice, its hard-flailed chords crying out heartache as Lacey sang dark tales relating the ongoing battles in his soul between the sacred and the profane. In Lyon, he stumbled on James McCoy, whose songs "My Black Mama" and "Preachin' the Blues" House mastered, then rewrote into what are now regarded as Delta blues classics (the former in turn served as the foundation for Robert Johnson's "Walkin' Blues"). With these songs as a springboard, House soon found himself with steady work playing Delta juke joints.

In 1928, at the moment his career was gaining some momentum, House shot a man to death after the fellow had opened fire in a Lyon juke joint where House was performing. Rejecting the defendant's claim of self-defense, a judge sentenced House to serve two years at the notorious Parchman prison farm; he was pardoned before his sentence was up by a judge in Clarksdale, MS, who warned him never to set foot in town again. House agreed, telling the judge he could "cover as much ground as a red fox" if he were set free. From the Parchman experience came another House monument, "Mississippi County Farm Blues," whose tune was adapted from the great Blind Lemon Jefferson's "See That My Grave Is Kept Clean."

More important to House's high standing in the blues pantheon was a 1941 trip through the Delta by a team of field recordists (Alan Lomax among them) working on a documentary project cosponsored by Fisk University and the Library of Congress. These recordings, capturing House at his artistic peak (even though he was recorded playing solo rather than in the blues combo he and Brown had formed), were followed a year later by another session with the same team. House had by then moved to Rochester, NY, where he stayed until 1978. Biograph's *Delta Blues: The Original Library of Congress Sessions From Field Recordings 1941–1942* is the document arising from those sessions, and monumental it is. While he had his share of songs about faithless lovers and general feelings of doom and degradation, House, more so even than Robert Johnson, found his soul in a constant tug-of-war between God and the Devil (a reason, perhaps, for his frequent returns to the pulpit), and this battle lent the music a moral depth rarely encountered in any genre, let alone Delta blues. "Preachin' Blues" may be the most explicit delineation of the artist's inner conflict, but spiritual turmoil shadows him in almost every circumstance. As powerful as the lyrics are in detail and imagery, it is House's deep, gravelly voice, haunted and haunting, that brings the message home with chilling authority. Supporting all this are some rather simple guitar stylings, by Delta standards—no showy polyrhythms, no startling key changes, no sweeping single- or double-string solo runs; rather, House wielded his slide as if it were on the left hand of God: It slashed, it wailed, it howled, it moaned, it wept. In the end, these fundamental parts created a mesmerizing whole.

When Willie Brown died in the mid-'50s, House lost interest in music completely. After moving to Rochester, he left his instrument in its case, preferring various day jobs (railroad porter, cook, etc.) to playing without Brown. By 1964, when blues scholars tracked him down, he didn't even own a guitar. Coaxed out of retirement, House began playing to enthusiastic audiences all over the country, leading to a 1965 contract with Columbia Records. The resulting sessions, produced by John Hammond and Frank Driggs and first issued on vinyl as *Father of Folk Blues,* are now collected on the two-CD set *Father of the Delta Blues: The Complete 1965 Sessions,* the second disc of which is composed entirely of previously unreleased alternate takes ("Death Letter" and "John the Revelator" among them) and seven cuts that didn't make the original vinyl issue. Here he reprises many of the Delta blues landmarks that established his legend—"Death Letter," "Preachin' Blues," "Pony Blues," "Louise McGhee"—along with newer material, including the touching, loving elegy "President Kennedy" (a retooling of a song House had written years before as a tribute to General Douglas MacArthur and then discarded after the general was relieved of his command by President Harry Truman). House is a bit rusty in spots—a blown lyric here, a fumbled guitar lick there—but the imperfections are endearing glitches in otherwise remarkable performances. These sessions are available in a whittled-down version—11 cuts, including two of the previously unissued tracks on the double-CD set—on Columbia/Legacy's *The Original Delta Blues.*

The House canon is rounded out beautifully by Capitol's *Delta Blues and Spirituals,* which wraps four blues songs and four spirituals around a pair of insightful House monologues explaining in folk poetry—which was general conversation for Son House—the link between the two musical styles.

Although House struggled on performing as his health permitted, by 1975 he had played his last show. After moving in with relatives in Detroit, he was later taken to a rest home, where he died on October 19, 1988. His legacy is a body of work rarely equaled, never surpassed. His guitar is in the Delta Blues Museum in Clarksdale; his voice is in the wind. —D.M.

House of Pain

★★★	House of Pain (Tommy Boy, 1992)
★★★★	Same As It Ever Was (Tommy Boy, 1994)
★★½	Truth Crushed to Earth Shall Rise Again (Tommy Boy, 1996)

DJ Muggs was one of the most talented hip-hop producers to emerge in the '90s, a real missing link between the wailing artillery barrage of Public Enemy and the claustrophobic minimalism of Wu-Tang. But Cypress Hill's albums hardly tell the full story. Muggs' commercial success with his home crew led him to endlessly imitate himself, and the group's smoked-out fans neither noticed nor cared. Fortunately, he hooked up with a couple of rowdy white guys who fit his groove. The result, House of Pain's *Same As It Ever Was,* is a lost classic—relentless, clever, and free of the sentimental bullshit with which tough guys try to explain away their nastiness.

It had to be all that, if only on account of "Jump Around," probably the only House of Pain track you've ever heard, a party anthem that launched itself recklessly in the air without the slightest care where it might land. It was as inescapable in the summer of 1992 as that other "Jump," by Kris Kross, and it earned House of Pain just as much street cred. But *Same* was a statement of purpose—Everlast represents the first generation of white kids raised on hip-hop who speak its rhythms and lyrical codes as a first language—though he's capable of dropping some punky comparisons ("Like G.G. Allin I'm crazy ill" or "I'm not Phil Collins/More like Henry Rollins"), he has none of the Beasties' indie roots.

Though capable of telling stories (check out the criminal vignettes of *Same*'s "It Ain't a Crime," neither celebratory nor judgmental, just factual) Everlast preferred sticking to ingenious boasts, which only takes you so far. The third album showed that the concept had outlived its usefulness. And Everlast apparently understood that—he went on, of course, to a solo career that ably mixed hip-hop and protest folk, overflowing with genuine empathy. —K.H.

Whitney Houston

★★★	Whitney Houston (Arista, 1985)
★★½	Whitney (Arista, 1987)
★½	I'm Your Baby Tonight (Arista, 1990)
★★★★	My Love Is Your Love (Arista, 1998)
★★★	Whitney: The Greatest Hits (Arista, 2000)
★★★½	Love Whitney (Arista, 2002)
★½	One Wish: The Holiday Album (Arista, 2003)

Soundtrack Appearances

★★	The Bodyguard (Arista, 1992)
★	Waiting to Exhale (Arista, 1995)
★★	The Preacher's Wife (Arista, 1996)

Whitney Houston has one of the most powerful and polished voices in popular music, an instrument exquisitely capable of balladic intimacy, gospel exuberance, and soulful expression, and she has misused that gift in more ways than most singers could imagine. She began her career slinging blandly romantic pap; from there, she became a singing actress and overblown torch song specialist. Eventually, she decided to show she did indeed have soul, but her career had been so battered by erratic behavior and rumored drug use that the achievement almost went unnoticed.

Although utterly calculating, *Whitney Houston* does have its moments, particularly when Houston leans toward R&B, as on "You Give Good Love." *Whitney,* on the other hand, was a shameless attempt to downplay the singer's blackness and thus capitalize on her Top 40 pop following. It made sense as a marketing move—the album generated four #1s, including the insanely chipper "I Wanna Dance With Somebody"—but as music it's not much.

I'm Your Baby Tonight found the singer trying to recapture the increasingly alienated R&B listeners who had been her initial audience, although the music was less soul than vaguely soulful. Houston would pick up this thread at the end of the decade with *My Love Is Your Love,* but in the meantime, Hollywood beckoned. She appeared in three movies and on their soundtracks. *The Bodyguard* contained her biggest hit, the rafter-rattling ballad "I Will Always Love You," but undermined her soul roots with an overwrought remake of Chaka Khan's epochal "I'm Every Woman." *Waiting to Exhale* had only three Houston efforts, including the hit "Exhale (Shoop Shoop)"; the rest was given over to tepid R&B by other artists. *The Preacher's Wife* is a good idea in theory, as it promises to return Houston to her gospel roots, but ends up bland and unconvincing, as if Houston were afraid to cut loose.

My Love Is Your Love boasts cameos by Mariah Carey, Faith Evans, and Missy Elliott, and comes closer to proving Houston's mettle as an R&B star than any album in her catalogue. Unfortunately, personal problems kept her from fully capitalizing on the achievement, and her label resorted to gimmicks—the bloated *Greatest Hits,* the ballad-focused *Love Whitney,* and the lamentable Christmas collection *One Wish*—to keep new product in the stores. —J.D.C.

Howlin' Wolf

★★★★★	Howlin' Wolf/Moanin' in the Moonlight (1958, 1964; Chess/MCA, 1986)
★★★★★	His Greatest Sides, Vol. 1 (1967; MCA/Chess, 1986)

★★★★	The Back Door Wolf (Chess, 1973)
★★★★	Cadillac Daddy: Memphis Recordings, 1952 (Rounder, 1987)
★★★★★	The Memphis Days: Definitive Edition, Vol. 1 (Bear Family, 1989)
★★★★★	The Memphis Days: Definitive Edition, Vol. 2 (Bear Family, 1990)
★★★★★	The Chess Box (MCA/Chess, 1991)
★★★★	Howlin' Wolf Rides Again (Flair, 1993)
★★	Highway 49 and Other Classics (Intercontinental, 1996)
★★	Bluesmaster (Universal, 1996)
★★★★	His Best (The Chess 50th Anniversary Collection) (MCA/Chess, 1997)
★★★	Goin' Down Slow (Classic World, 2000)
★★★	Legendary Blues Recordings: Howlin' Wolf (Direct Source, 2001)
★★	Killing Floor (Magnum, 2001)
★★	Electric Blues (Delta, 2001)
★★	Wolf at Your Door (Arpeggio Blues, 2001)
★★★★	The Real Folk Blues/More Real Folk Blues (MCA, 2002)
★★	In Concert (Prestige Elite, 2002)
★★★	Live at Joe's 1973 (Wolf, 2002)

Along with his lifetime rival, Muddy Waters, Howlin' Wolf was the archetypal Chicago bluesman—raw, electric, deep, and continually astonishing. Born Chester Burnett in 1910, the singer/guitarist was raised in Mississippi, there absorbing the country blues tradition of Robert Johnson and Charley Patton. Picking up on the harmonica style of Sonny Boy Williamson, he formed his first band in Memphis with James Cotton and Junior Parker in the 1930s; he'd go on to play with Ike Turner, Willie Dixon, and other genre greats. While seldom recording as a guitarist, he gripped listeners with his voice in the early '50s: Moving to Chicago, he recorded a series of seminal electrified singles whose appeal—particularly to Brit rock legends such as the Stones, Yardbirds, and Led Zeppelin—was their sheer visceral power.

The Chess Box is the best collection. Extending from 1951 to 1973, its three CDs feature 75 songs, including rarities and all Wolf's hits. "How Many More Years," "Smokestack Lightning," "I Ain't Superstitious," "Killing Floor," and "Back Door Man" are by turns sly, terrifying, spooky, profane, and wise. The Bear Family sets are absolutely scorching early-'50s blues, rawer even than his Chess classics. *His Best* is the finest single-CD compilation; *Rides Again* is also phenomenal—Wolf young and very hungry. The paired *Howlin' Wolf* and *Moanin' in the Moonlight* CD brings together his two most consistent albums. *The London Sessions* is a good late collaboration with Eric Clapton, Stevie Winwood, Charlie Watts, and Bill Wyman; *Cadillac Daddy* is another great review of the earliest work. All of the Chess records are worth seeking out. *The Box,* however, is so thorough (and nicely annotated) that it serves as more than a mere introduction. —P.E.

The Human League

★½	Reproduction (1979; Caroline, 2003)
★★	Travelogue (1980; Caroline, 2003)
★★★	Dare (1981; Caroline, 1997)
★★½	Love and Dancing (1982; Virgin, 1998)
★★	Fascination! (EP) (A&M, 1983)
★½	Hysteria (1984; EMI, 1998)
★★½	Crash (1986; EMI, 2004)
★★★½	Greatest Hits (A&M, 1988)
★½	Romantic? (A&M, 1990)
★	Octopus (East/West, 1995)

★★★ The Very Best of the Human League (Ark 21, 1998)
★½ Secrets (Ark 21, 2001)

The most impressive thing about the Human League's output isn't that the band went from avant pop to Top 40 in three albums, but that its best singles hold up despite all the hokey electronics.

Needless to say, the League's early recordings sound pretty primitive at this point. With its buzzing, clanking synths and dour "postindustrial" perspective, *Reproduction* sounds less like a rock album than an art school project gone awry; even its nod to the mainstream—a cover of the Righteous Brothers' "You've Lost That Loving Feeling"—seems studied and theory-driven. The League loosens up some with *Travelogue,* with songs that are more melodic and accessible. But the rudimentary synth programming renders the arrangements clunky and mechanical.

Between *Travelogue* and *Dare* two unexpected developments dramatically changed the Human League's sound. One was the departure of Martyn Ware and Ian Marsh, the band's original synth wizards; the other was the introduction of the Linn drum, a computerized drum machine that used digitally sampled drum sounds instead of synthesized equivalents. Original singer Phil Oakey recruited a new lineup, including ex-Rezillo Jo Callis plus singers Joanne Catherall and Susanne Sulley (whom Oakey claimed to have met at a disco), and delivered the first true synth-pop album. In truth, the most radical thing about *Dare* was its instrumentation, since the songs—particularly "Love Action (I Believe in Love)" and the marvelously melodramatic "Don't You Want Me"—were fairly conventional pop numbers. But in 1981, drum machines and sequencers were novelty enough, and helped make *Dare* an international smash.

The League immediately cashed in on its newfound success, releasing an amusing album of dance-oriented remixes entitled *Love and Dancing,* which is credited, in a nod to Barry White, to the League Unlimited Orchestra. An amusing trifle, it's a prelude of sorts to *Fascination!,* a somewhat thinner slice of dance pop whose principal point of interest is the flirtatious "(Keep Feeling) Fascination." Apparently afraid of falling into a rut, the Human League tried to turn serious again with *Hysteria.* Unfortunately, pompous message-heavy numbers such as "The Lebanon" are as ridiculous as dance fluff like "Rock Me Again and Again and Again and Again and Again and Again."

Luckily, the League then decamped for Minneapolis and the studios of Jimmy Jam and Terry Lewis. *Crash* is a fairly schizo affair, with some songs ("Money," for instance) sounding like the Human League of yore, albeit with a better rhythm section, and others ("Swang") coming across like contemporary R&B sung by the generally soulless Oakey, Sulley, and Catherall. Fortunately, "Human," a classic Jam & Lewis ballad, finds the perfect middle ground, thus rescuing the album as well as the group.

"Human," along with the rest of the group's singles, can also be found on *Greatest Hits,* which is understandably the most consistent album in the group's catalogue. (*The Very Best* offers a similar, though slightly inferior, selection.) The League returns to its old tricks with *Romantic?* and seems to have recorded *Octopus* and *Secrets* simply to have a "new album" to flog while working the nostalgia circuit. —J.D.C.

Humble Pie

★★½ Rock On (1971; MCA, 2000)
★★ Performance: Rockin' the Fillmore (1971; A&M, 1990)
★ Smokin' (1972; A&M, 1990)
★ On to Victory (Atco, 1980)
★ Go for the Throat (1980; Atco, 1991)
★★½ Humble Pie Classics (A&M, 1987)
★★ Hot 'n' Nasty: The Anthology (A&M, 1994)
★★ King Biscuit Flower Hour (King Biscuit, 1996)
★★ Natural Born Boogie (Recall, 1999)
★ Natural Born Boogie: BBC Sessions (Varèse, 2000)
★½ Live at the Whisky A-Go-Go '69 (Sanctuary, 2002)

At the peak of the Pie's inscrutably monstrous success—*Performance: Rockin' the Fillmore*—amiable maniac Steve Marriott brandished one of the most annoying voices in rock: a hectoring, sandpaper parody of black authenticity. With the group's platform boots and troglodyte riffing crushing the subtlety out of blues standards, *Fillmore* featured a 16-minute slaughter of Muddy Waters' "Rollin' Stone" that typified the band's "appeal." Now unlistenable, this stuff then was considered soulful, perhaps as a populist headbanging antidote to the smarmy "good taste" of the singer/songwriters who dominated radio.

For Marriott, at least artistically, such tripe was a bringdown. Having begun as a snappy popster with Small Faces, he formed Humble Pie in 1968 as a progressive outfit whose first two albums weren't bad, no matter how fawning their homage to the Band. *Rock On* hit harder, but still nodded toward taste. Peter Frampton helped keep things tuneful. Formerly of the Herd and later to find megastardom as a heartthrob, Frampton on guitar balanced Marriott like sweet does sour. Soon enough, though, Humble Pie headed for the boogie wastelands, never to return.

With more than 30 cuts, *Hot 'n' Nasty* is enough Humble Pie for anyone; the *King Biscuit* CD features characteristic live work from 1973—powerful in a neanderthal kind of way. —P.E.

Hüsker Dü

★★	Land Speed Record (SST, 1981)
★★★	Everything Falls Apart (Reflex, 1982)
★★★★	Metal Circus (EP) (SST, 1983)
★★★★★	Zen Arcade (SST, 1984)
★★★★★	New Day Rising (SST, 1985)
★★★★½	Flip Your Wig (SST, 1985)
★★★★	Candy Apple Grey (Warner Bros., 1986)
★★★	Warehouse: Songs and Stories (Warner Bros., 1987)
★★★	The Living End (Warner Bros., 1994)

You can see Hüsker Dü on the cover of *Zen Arcade:* three Midwestern boys wandering through the junkyard of their souls, seeing their lives piled up like abandoned scrap metal, steeling themselves to build toweringly inspirational cathedrals of industrial-strength punk rock guitar noise. The Minneapolis trio emerged from the hardcore scene, but the Hüskers' savage sound set them apart, as did the stark emotional exorcisms in their songs. The band had two singer/songwriters on the job: Guitarist Bob Mould looked a lot like Charlie Brown, drummer Grant Hart looked a lot like Snoopy, and as they traded vocals back and forth in their happy-sad songs of adolescent turmoil, it was easy for fans to imagine them cheering each other up, even if they hated each other in real life. Bassist Greg Norton didn't write or sing—he was the band's token straight guy, even though he had the gayest mustache in indie rock. The Hüskers had a this-could-be-you realness about them; for one thing, they were easily the ugliest, worst-dressed rock band of all time, which is intended as a compliment. Their records were cheaply recorded, and for that matter badly recorded; but for a few years, everything they touched felt noisy, aggressive, compassionate, human.

Good as the early hardcore records were, the story really begins with the 1983 EP *Metal Circus.* Acerbic but not ironic, including not one but two explicit anti-rape songs, *Metal Circus* burns with moral zeal and guitar bile. The band followed it with a noise-soaked single covering the Byrds' "Eight Miles High" (so far unissued on CD), which set the table for the monster double album *Zen Arcade.* There's a loose plot here about a teenage boy leaving home and running away to the city, but the real surprise is the expansive musical and emotional approach, as the Hüskers stretch from the two-minute acoustic kiss-off "Never Talking to You Again" to the 14-minute psychedelic feedback finale "Reoccuring Dreams," with an unforgettable plug-pulling ending. The songs slam home, especially "Something I Learned Today," "Newest Industry," "Pink Turns to Blue," and "Whatever." Side three is louder than the last 20 minutes of *The Wild Bunch,* and just as moving. Buried in all the noise, an inspirational message: "Don't get up, don't give in, don't let go, don't let on."

Acclaimed as geniuses overnight, despite the fact that they were barely breaking even, the Hüskers released *New Day Rising* just a few months later. The intensity of the guitar kicks harder than ever before, especially on "Powerline," but it's their song album, with a cheerfully carefree kamikaze approach to pop melody and structure. "Books About UFOs" and "I Apologize" sound like garbage trucks trying to sing Beach Boys tunes, while Mould breaks out his acoustic guitar for the devastating "Celebrated Summer" and "Perfect Example." Tune for tune, it's their best album, and a huge influence on Nirvana and all that followed. Later that year, it was time for *Flip Your Wig,* a little straighter but still packed with great tunes, especially Mould's protest song against literally everything, "Makes No Sense At All," and Hart's ode to childhood sledding memories, "Flexible Flyer."

At this point, nobody was making rock records anywhere near as intense as the Hüskers, who were churning them out every six months. They kept their historic roll going with *Candy Apple Grey,* their most downbeat album (and their major-label debut), with the purgative climax of "Eiffel Tower High," "No Promise Have I Made," and "All This I've Done for You." But *Warehouse,* another double album, aimed for professional rock craft, which was beyond the band's skill set—what sounded like mushy pop music to hardcore fans still sounded like sloppy guitar noise to everyone else. There are good songs if you dig them out—"Could You Be the One" even cracked MTV—but the Hüskers were spreading themselves too thin. They broke up acrimoniously, leading to a live epilogue, *The Living End,* which has a swell version of the Ramones' "Sheena Is a Punk Rocker," and solo projects. As they once sang, everything falls apart; Hüsker Dü fell apart more loudly than anybody else. —R.S.

Ice Cube

★★★★★	AmeriKKKa's Most Wanted (Priority, 1990)
★★★★	Death Certificate (Priority, 1991)
★★★½	The Predator (Priority, 1992)
★★★	Lethal Injection (Priority, 1994)
★★★	Bootlegs & B-Sides (Priority, 1995)
★★★	Featuring . . . Ice Cube (Priority, 1997)
★★★	War & Peace, Vol. 1 (The War Disc) (Priority, 1998)
★★★	War & Peace, Vol. 2 (The Peace Disc) (Priority, 2000)
★★★★	Greatest Hits (Priority, 2001)

"It's the nigga ya love to hate!" Roaring out of the blocks, holding his mike like a Glock, Ice Cube opened his 1990 solo debut with those words, and for the first half of the '90s, the man born O'Shea Jackson lived up to his pledge with a vengeance. One of the most ferocious and effective rappers ever to pick up a mike, Ice Cube was the first member to defect from notorious gangsta rap pioneers N.W.A, and no matter where you rank him on the shortlist of the Greatest MCs of All Time, it's clear that Cube changed the hip-hop game. While a student at Taft High School in Woodland Hills, CA (where he was bused from his home in South Central L.A.), Cube, who had learned how to combine profanity with hilarity from Richard Pryor records, wrote the seminal story-rap "Boyz N Tha Hood." At the time, Cube had a group called CIA with his buddies Sir Jinx and Kid Disaster. Then Eazy-E recorded "Boyz" and released it in 1987 as the first record on his Ruthless label; the single's success led directly to the creation of N.W.A, a group that consisted of Cube, Dr. Dre, Eazy-E, MC Ren, and Yella. Cube had gone to Phoenix, AZ, to get a one-year degree in architectural drafting, but returned in time to rap and write many of the rhymes on N.W.A's 1988 debut, *Straight Outta Compton.* A genuine street-level phenomenon, *Straight Outta Compton* aroused the ire of the FBI and sold more than 3 million copies with nearly zero radio airplay.

A beef with N.W.A's management prompted Cube to go solo, and Cube teamed up with the Bomb Squad, Public Enemy's production team and the preeminent beatmakers of the time. Together they made *AmeriKKKa's Most Wanted,* an album of menacing, unflinchingly fierce rhymes that took millions of listeners deep into the terrors of South Central L.A.

A year later, *Death Certificate* continued the brutal sonic and lyrical assault, but the multiplatinum album found Cube growing more articulate even as he grew more vulgar. The man who once wrote "F— Tha Police" now took lyrical aim at LAPD Chief Darryl Gates: "Turn him over with a spatula/Now you got Kentucky Fried cracker." Factor in the sensational violence of "Black Korea" (a song that apparently condoned the burning of Korean-owned convenience stores) and *Death Certificate* was roundly condemned by a rattled news media, including *Billboard* magazine. But hey, if you didn't like it, well, like Cube said, you could new jack swing from his nuts.

Followup *The Predator* debuted at #1 on both the pop and R&B charts, the first album ever to do so. With the Bomb Squad out of the mix, production duties were handled primarily by Cube, Sir Jinx, and DJ Pooh, and their collective fondness for P-Funk and Isley Brothers–derived loops was amply evident. By this time Cube had shaved off his Jheri curl and felt comfy enough to release his first laidback classic, "It Was a Good Day." (The fantastic remix of "It Was a Good Day" on *Bootlegs & B-Sides* uses a loop of the Staple Singers' "Let's Do It Again" that ups the blissful sentiments of the original.) *The Predator* also included "Check Yo Self," Cube's hit collaboration with duo Das Efx. On 1994's *Lethal Injection,* Cube's original power seemed to have waned, but typically ill tracks like the musically sweet lowrider classic "You Know How We Do It" shone.

Cube and his estranged running partner Dre eventually buried the hatchet and recorded the duet "Natural Born Killaz" (which appears on 1997's so-so compilation *Featuring . . . Ice Cube*), and in 2000 Dre took Cube out on his Up In Smoke tour (immortalized on a DVD of the same name). Fanatics should also ferret out Cube-related releases by Westside Connection (Cube's group with W.C. and Mack 10), protégés Yo-Yo (1991's *Make Way for the Motherlode*), Kam (1994's *Neva Again*), and Da Lench Mob (1994's *Guerillas in tha Mist*), as well as the soundtracks to films Cube has starred in, including *Higher Learning, Dangerous Ground, Friday,* and *Barbershop.* The out-of-print *Kill at Will* EP, released in 1990, is also worth finding for the awesome "Dead Homiez." While latter-day Cube releases have been maligned as soft (just about anything would seem lightweight when compared to his early work), both *War & Peace* discs have at least a couple great party jams. Now a proven Hollywood actor and screenwriter, Cube commands attention and respect with anything he does; no matter the venue, Ice Cube s presence simply cannot be discounted. —P.R.

Ice-T

★★★	Rhyme Pays (Sire, 1987)
★★★★	Power (Sire, 1988)
★★★★	The Iceberg/Freedom of Speech . . . Just Watch What You Say (Sire, 1989)
★★★★	O.G.: Original Gangster (Sire, 1991)
★★	Body Count (Sire, 1992)
★★	Home Invasion (Priority, 1993)
★★★	The Classic Collection (Rhino, 1993)
★★½	VI: Return of the Real (Priority, 1996)
★★	7th Deadly Sin (Atomic Pop, 1999)
★★★★	Greatest Hits: The Evidence (Atomic Pop, 2000)

Ice-T's lyrical preoccupations (pimping, police brutality, thug life) are now the most clichéd motifs in hip-hop, but he was the first West Coast rap star to get those themes over to the massive record-buying public of Middle America. While he often wore the de rigueur gangsta uniform of ski cap and wifebeater T-shirt, Ice-T's lightish skin and flowing ponytail gave him a different look, and his unadulterated, intelligent rhymes were often critical of criminality on both sides of the law. Born Tracy Morrow in Newark, NJ, in 1959, Ice-T was raised in the gang-infested streets of South Central Los Angeles, and took his MC handle from the infamous pimp-turned-novelist Iceberg Slim. His first single was 1983's "The Coldest Rap" (much of his early work reappeared on 1993's *The Classic Collection*). He quickly found his opinionated footing. *Power* (1988) featured "I'm Your Pusher," based around Curtis Mayfield's "Pusherman," a strong antidrug song ("For this bass you don't need a pipe/Just a tempo to keep you hype") where a deadpan Ice-T hooked up a jonesing customer with "dope" 12-inch records. No matter how important such songs were at the time (and their message remains relevant), the tinny drum programming has not dated well. Yet the rolling groove of "Colors" (his theme song to the 1988 film of the same name), where Ice-T tells the first-person tale of a gangster ("I'm a nightmare walking/Psychopath talking"), retains a rugged musical appeal. From the screaming sirens of "Home of the Bodybag" that open 1991's *O.G.: Original Gangster,* Ice-T presented an adrenalized, near-classic: gangsta rap with a minimum of bullshit. In 1992, he fronted his heavy metal group Body Count, and while they were no better than the countless rap/metal acts they spawned, the ensuing media firestorm over their track "Cop Killer" spurred Ice-T to take to the lecture circuit, speaking at Harvard about First Amendment rights and civil liberties. Film and TV work has been a big part of Ice-T's career: a rapping cameo in the 1984 movie *Breakin',* more substantial roles in films *New Jack City* and *Trespass,* and a current starring role (as, of all things, a police detective) in NBC's *Law & Order: Special Victims Unit.* —P.R.

Idlewild

★★★½	Hope Is Important (Odeon, 1999)
★★★★	100 Broken Windows (EMI, 2000)
★★½	The Remote Part (EMI, 2002)

Coming of age in the last days of Brit Pop's glory years (Oasis, Blur, Suede), Idlewild searched outside of the Brit Rock music tradition of Beatles, Kinks, Bowie, glam rock, and vaudeville to the western shores of America, finding themselves intoxicated by American indie and classic alt-rock. Early R.E.M., Pixies, Nirvana, and Slint records in tow, *Hope Is Important* is very much a love letter to their favorite bands, as spiky anthems such as "Captain," and "When I Argue I See Shapes" betray them as members of the *Nevermind* generation. Idlewild grows up and gets smart ("Roseability" references Gertrude Stein!) on their second album, a gorgeous mixture of jangle pop and heavy rock: *100 Broken Windows* is a step up in songwriting quality, as melody takes precedence over noise, for great results. Sadly, they may have grown up too fast. *The Remote Part* (2002) sees the band coming of age a little too fast. Where earlier records showed vocalist Roddy Woomble as an engaging, idiosyncratic, and above all bravely intelligent lyricist, *The Remote Part* finds him settling for sweeping generalizations. The band follows suit, playing for big crowds with U2-style arena rock. —C.R.

Billy Idol

★★★	Billy Idol (1982; Capitol, 2001)
★★★★½	Rebel Yell (1983; Capitol, 1999)
★★★	Whiplash Smile (Chrysalis, 1986)
★★★★	Vital Idol (1987; Capitol, 2002)
★★★	Charmed Life (Chrysalis, 1990)
★	Cyberpunk (Chrysalis, 1993)
★★★★½	Greatest Hits (Capitol, 2001)
★★★	VH1 Storytellers (Capitol, 2002)

One of the reasons Billy Idol is so dearly beloved is because he obviously didn't know any better. Of all the mindless new-wave haircut rockers of the '80s, he was the most mindless, the most rocking, and the most '80s, shaking his fist, greasing his hair, and boozing and brawling through a rock-star trip that was so unironic, it *had* to be ironic. He began as a punk, singing lead for Generation X. But as soon as that band folded, he launched his solo career with the 1982 single "White Wedding," and it turned out his name wasn't the joke everybody had assumed. "White Wedding" became a monster hit, with Billy cramming himself into skintight black leather pants and singing like Richard Nixon doing an Elvis imitation, and things only got better from there. He remade Generation X's best song, "Dancing With Myself," as a 1983 video in which Billy stands alone at the top of a postnuclear wasteland, a Prometheus in chains, showing off his impressive upper-lip musculature and acting out all his tawdriest fantasies of adolescent idolatry. As the sweat pours out of his body, and the zombies dance all around him, Billy knows the loneliness that only the gods know.

Rebel Yell was a brilliant combination of punk, disco, synth pop, glam rock, metal, and mud wrestling, with producer Keith Forsey cranking the rhythm tracks and guitar sidekick Steve Stevens going *wonka-wonk* at the appropriately dramatic moments. Billy's finest hits are all here: "Blue Highway," "Catch My Fall," and the ludicrously pretentious "Eyes Without a Face" ("Hanging out by the state line/Turning holy water into wine/Drinking it down," and so on). But the killer is the title track, which by federal law was played at every prom for the rest of the decade. "Rebel Yell" preaches a gospel of sex as liberation, with the example of a dancing queen who becomes insatiable in the midnight hour, tormenting Billy with screams for "mo, mo, mo!" of his funky stuff. It was the sort of song you could be proud to get your first speeding ticket to, and the video was one of the cinematic landmarks of the '80s, capturing unbelievable levels of egomania, hostility, sexual hysteria, and narcissistic preening.

Whiplash Smile was a letdown, but "To Be a Lover" is as good as anything on *Rebel Yell* (better than the William Bell original, truth be told), and "Sweet Sixteen" was a smoldery acoustic interlude. The remix album *Vital Idol* had a hit cover of Tommy James' "Mony Mony," inspiring obscene sing-alongs at high school dances across the land. *Charmed Life* was smarmily entertaining enough to make *Rebel Yell* sound subtle, with the manic "Cradle of Love," an idiotic cover of the Doors' "L.A. Woman," the rockabilly standard "Endless Sleep," and the confessional "Trouble With the Sweet Stuff," which attested to Billy's dangerous Clairol Styling Gel habit. Despite his dull *Cyberpunk,* a near-fatal 1990 motorcycle crash, and at least one high-profile drug overdose, Billy remains inexplicably alive, unrepentant, still revered as the New Romantic era's version of Busta Rhymes. He stole the show at MTV's 2001 20th-anniversary special, rocking the house with a torrid "Rebel Yell." He also appeared in *The Wedding Singer,* making the climax one of the funniest 15-minute comic sequences ever filmed. It is an atrocity that Robin Williams has an Oscar for Best Supporting Actor and Billy doesn't. —R.S.

Natalie Imbruglia

★★	Left of the Middle (RCA, 1998)
★★½	White Lilies Island (RCA, 2001)

When Natalie Imbruglia arrived in 1998, the former Australian teen soap star managed to conquer the American pop charts without much battle, thanks to an undeniable hit, "Torn." Resurrected from the catalogue of alt-rock also-rans Ednaswap, the addictively catchy song deserved every bit of radio overplay it got. However, *Left of the Middle,* Imbruglia's debut, never matches its standout track. Instead, the album tries a little of everything—some Alanis Morissette rock ("One More Addiction"), some Portishead trip-hop noir ("Leave Me Alone"), even some old Madonna house ("Impressed")—without much distinction. Imbruglia's voice, with a guileless sweetness that worked so well on "Torn," seems unremarkable elsewhere.

Its followup, *White Lilies Island,* improves upon the debut by offering a more consistent medium-rock sound—less stylized, and seeming less market-researched to capture the latest hot sounds. Here, the reference points are more random: the rushing vocals and swirling music of "That Day" sound like Pink singing Morrissey; "Satellite" is Crosby, Stills, & Nash–style pop-folk. "Wrong Impression," meanwhile, makes a valiant attempt at rewriting "Torn" but doesn't quite match its predecessor's heart-on-the-sleeve tunefulness (or, it turned out, its chart success). Like its predecessor, there's little essential listening on *White Lilies Island,* but the album works perfectly well as somewhat generic, slightly left-of-center mainstream pop. —R.M.S.

Imperial Teen

★★★½	Seasick (PolyGram, 1996)
★★★½	What Is Not to Love (Slash, 1999)
★★★½	On (Merge, 2002)
★★★	Live at Maxwell's (DCN, 2002)

The members of Imperial Teen have some loud, crashing noises in their backgound—keyboardist Roddy Bottum was in Faith No More, and drummer Lynn Perko played with the Dicks—but now they specialize in old-school pop-rock and relatively mature themes, making them a happy indie rock oddity. Like bands such as Yo La Tengo or the Go-Betweens, Imperial Teen promise that love among consenting adults is the key to happiness, and that the modest glamour of life in a cult rock band beats having a day job. To communicate this, they employ bright hooks and riffs, delicate harmonies, catchy choruses, and guitar-and-keyboard raveups. Imperial Teen's vibe is both gay and straight, male and female, sweet and a touch sadistic, as Bottum can proclaim, "Why you gotta be so proud?/I'm the one with lipstick on" just as fervently as the whole band can holler "I like you/I like you" until the crowd believes it. Although widely separated in years and recorded for different record labels, their three studio albums are remarkably consistent. *Live at Maxwell's* is full of premium material, but the rougher, flatter sound renders it best for those already in the Imperial court. —M.M.

The Impressions

★★★★★	Curtis Mayfield and the Impressions: The Anthology, 1961–1977 (MCA, 1992)
★★★★	The Very Best of the Impressions (Rhino, 1997)
★★★★★	Ultimate Collection (Hip-O, 2001)

Beginning with "Gypsy Woman," from 1961, the Impressions' *Ultimate Collection* defines the sweet inspiration of soul music. This Chicago-based harmony group amplifies its gospel conviction ("Amen," "Meeting Over Yonder") through a lush, orchestral pop approach ("It's All Right," "You Must Believe Me"). Working with arranger Johnny Pate, group leader Curtis Mayfield constructs a supple wall of sound: His dynamic string arrangements underline rather than undercut the urgency of his messages. "People Get Ready" and "Keep On Pushing" reflect and reinforce the hard-earned optimism of the civil rights movement. These two spiritual pleas sound more relevant—and necessary—than ever. Original lead singer Jerry Butler left after an initial hit, "For Your Precious Love," in 1958, and was replaced by Fred Cash. (It's no accident that Butler later achieved solo success with producers Gamble and Huff; the precise richness of Curtis Mayfield's songwriting and production strongly foreshadows the Sound of Philadelphia.) Mayfield, Cash, and Sam Gooden carried on together until 1970, when Mayfield departed to pursue a solo career; on its two discs, *The Anthology, 1961–1977* couples most of the essential Impressions sides with Mayfield's socially conscious '70s work. While Motown hits of the mid-'60s go for your gut, the Impressions aim a little higher—and never miss. —M.C./G.F.

Incubus

★	Fungus Amongus (Epic/Immortal, 1995)
★★	S.C.I.E.N.C.E. (Epic/Immortal, 1997)
★★★★	Make Yourself (Epic/Immortal, 1999)
★★★	Morning View (Epic/Immortal, 2001)
★★★	A Crow Left of the Murder (Epic/Immortal, 2003)

Although it may be only vaguely recalled, the great funk-metal scare occurred at the dawn of the '90s, between the waning of hair metal and the waxing of grunge. Incubus was a latecomer to a boomlet of shirtless suburban funkateers who were greatly influenced by the Red Hot Chili Peppers, Faith No More, and Primus. *Fungus Amongus,* a compendium of slapped bass, atonal guitar noise, and forced wackiness, seemed hopelessly dated in 1995.

S.C.I.E.N.C.E., from 1997, links funk metal to the rap metal (replete with turntable scratches and down-tuned guitars), a fusion that had become the dominant rock idiom by the decade's end. But the record is far more emotionally and texturally nuanced than those by peers like Korn, and its Santana-esque "Summer Romance" supports the fact that Brandon Boyd, unlike Anthony Kiedis or Les Claypool, is a fine singer. Hence, *Make Yourself*'s shift toward genuine songwriting was quite welcome. Incubus had found a beta-male approach to new-metal: roaring, assymetrical riffs and herky-jerky dynamics coexisting with Boyd's yearning tenor and burgeoning melodic gift. The record yielded two of the finest Modern Rock singles of the era, "Stellar" and "Drive," easily the band's best song.

Morning View purged Incubus' remaining traces of hip-hop (barring the odd scratch) but boasted only one standout cut, the exultant "Wish You Were Here." *A Crow Left of the Murder* commences with the turbulent "Megalomaniac," a barely veiled condemnation of George W. Bush, and dives headlong into art rock reminiscent of the Police and King Crimson. If the album offers few immediate pleasures, at least Incubus demonstrates a glimmer of ambition. During the past decade, it has been much bemoaned that major labels no longer give artists time to develop; Incubus' steadily improving arc is evidence, however scant, to the contrary. —R.K.

India.Arie

★★★½ Acoustic Soul (Motown, 2001)
★★★ Voyage to India (Motown, 2002)
